Walnut Grove is a nine-year-old black stallion by Constantine 2:12½ and is the second fastest performer credited to that famous son of Wilkes Boy, Royal R. Sheldon having the best of the argument by a half a second. His dam is Lindis, a double producing daughter of Jackdaw 2:28¼, second dam Viola by Silverthorne 2:15, and as he was bred by a Kansan, M. A. Low of Topeka, he is stamped as a genuine Kansas-Missouri product. He was raced first in 1910 over the half-mile tracks of the Jayhawker state, winning in the neighborhood of $2000, and twice demonstrating his ability to pace in 2:10 on the twice-arounds, his miles in 2:10 at Abilene and 2:09¼ at Minneapolis (Kansas, not Minnesota) still standing as the track records for those points. In 1913 he went a bit farther east and hooked up with some pretty speedy company, making his best showing at Lexington, where he was returned second in two separate races, being a heat winner in each event. Michigan Queen ranked him in his first start in which he finished 2-2-1-2 in 2:05, 2:05¼, 2:05¼ and 2:03¾, and Lowanda "outnickered" him a few days later in a five heat affair from 2:05½ to 2:09½. In 1914 he won his first start before going to the big line, where he gave a fair account of himself against the good ones that were out in his class, ranking once third and once second in races won by Peter Stevens 2:02¼, third to Our Colonel 2:03¾ and Baron A. 2:04½ and fourth to Del Rey 2:03¾, Harry the Ghost 2:04½ and King Daphne 2:04¼. He is in nice shape at present and if he gets to the races unharmed he will be a hard nut to crack.

Rose Equity is also a Kansas product, one year younger, bred by C. H. Samson of Topeka. She is a daughter of Equity 6866, being the fastest of his get, out of Anna Rose by Orphan Knight 2:26¾, second dam Hazel McGregor by Fergus McGregor. As a three-year-old she made a couple of starts in classes for that age, finishing third and fourth, and as a four-year-old earned a record of 2:15¼ and was but twice outside the money in nine starts. She paid a profit in 1912, and in 1913 declared a genuine dividend, starting in twenty-one races, winning six and being but three times unplaced, obtaining her present record in a winning race at Decatur, Ill. She was entered April 1, 1914, in the local pacing stakes and held over for this season, paying her way for the off year by suckling a nice foal that is a member of the present stable.

Miss Johnson, foaled in 1905 at Kendall Farm, Valley Falls, Kansas, has raced earlier and oftener than either of her stable mates, owing her rugged qualities to a double barreled dose of the blood of Happy Medium, as she is by Happy Treasure 2:28¼ and out of Maud Johnson by Happy Heir. She finished in the money in her only start as a colt trotter, and has raced regularly and profitably every season for the five last passed. She did her fastest work last season and promises to be good in her class this year, as she is eligible to the events for the 2:17 trotters.

The youngsters of the stable are all by Walnut Grove and look to be of the same general quality as their dad and his older companions. G. C. W. is a three-year-old pacing colt out of a Jackdaw mare, the two-year-old Little Grove has trotted eighths as a yearling in :18, and the last and least—and boss of the barn at that—is the yearling out of Rose Equity. All the kids have juvenile engagements and will make a good growth and some speed at Pleasanton. The horses are all doing nicely, and both Mr. Ruthven and Mr. Overt are much pleased with the general situation at their temporary home.

Millard Sanders has taken into his stable the Stockton pacer Johnny Ray that Frank Childs turned over when he took charge of the Bailey stable the first of the month. Johnny is a hog for work and has a raft of speed, but has notions that interfere with his usefulness. With these overcome Millard will have another real good green pacer, but it is not a job to be performed successfully in a few days or weeks, apparently.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

FISH FARMING.

"Fish farming is a rapidly growing industry throughout the United States. The up-to-date fish farmers find a ready market for young fish and eggs and for food and game fish. The government and the States purchase large quantities of eggs and fry from fish farmers every year. Private clubs with their own fish preserves and hatcheries also furnish a market at good prices for eggs and fry. The commercial market for food and game fishes is a profitable one. This is particularly true of trout and bass. A steady market with an average price of 50 cents per pound for game trout makes the production of this fish particularly attractive."

H. M. Smith, commissioner of fisheries, made this statement. Commissioner Smith is greatly interested in the growing demand for supplies by fish farmers, as well as by clubs and State authorities, and fish production by these means is growing by leaps and bounds.

"In addition to the fish farmers who are in the business commercially," continued the commissioner, "there are large numbers of farmers all over the country who have come to realize the value of the private fish pond as a source of food supply. With a fuller realization of the benefits accruing from the maintenance of fish ponds on farms, as an inexpensive and ready food supply for home consumption, the demand for black bass, crappies, sunfish, catfish and other species adapted to pond culture, which are obtainable only through natural reproduction, is increasing out of all proportion to the annual supply available.

"During one recent fiscal year the total production and output of food and game fishes by the bureau exceeded 3,863,000,000. During the fiscal year just closed the total was considerably more than 4,000,000,000. Notwithstanding the high cost of labor and materials this steady increase in production and output has been accomplished without a proportionate increase in expenditures.

"While the fish farmer can be sure of securing a larger profit per acre of fish than from other products, the best work is done today in small cement ponds where eggs and fry can be kept under observation at all times.

"Many fish farmers sell eggs and small fishes to other fish farmers as well as to the government, the States and clubs. Many of them make a specialty of this work. Fish eggs can be shipped around the world in safety if kept cool and moist. They do not perish when taken from the water if properly protected in this way. This makes it easy for the fish farmers to find a market regardless of how far it is away."

The bureau has only limited means for the investigation of fish diseases, which at times cause large losses to the government, States and private fish culturists. Commissioner Smith is receiving, growing and insistent demands for the investigation of various fish diseases and for the study of the relations of industrial and other contaminations to fish life in streams.

"These demands," said Commissioner Smith, "are of a character that makes them entirely appropriate for attention at the hands of the fishery service, but owing to lack of facilities the bureau has been able to do very little to help either itself or the general public in this respect. From every consideration of economy adequate means should be provided for such investigations. At one hatchery alone, at Holden, Vt., over 350,000 trout died from an epidemic in two months. This was practically the entire stock on hand, and the cost of producing these fish, to say nothing of their ultimate value, was greater than would suffice to pay for an assistant qualified to find means of preventing such losses."

While fish farming is largely on the increase and is a profitable industry, oyster farming in those sections where it is possible is enormously profitable.

"The artificially planted oyster beds are away ahead of the natural beds, and the latter may be said to be a diminishing industry," said Commissioner Smith. "Private beds, usually leased from the States in which they are located, or purchased outright, are naturally better protected from contamination and depredation than the public beds. Connecticut and Rhode Island found it so much more satisfactory to sell or lease their oyster grounds that there are no longer any public beds in the waters of those States. Other States are following suit, Virginia being quite advanced in this line. The bulk of the Maryland beds is still on public ground. It is a noteworthy fact that the prices received for oysters on leased grounds or from private beds bring a higher price in the market than those taken from public waters. The cultivation of oysters—or oyster farming—is increasing very rapidly. It is an industry of great promise. Thousands of bushels of oysters may be harvested from an acre of oyster beds. With the beds properly protected and otherwise cared for this means an enormous income."

ANENT THE MOUNTAIN LION.

Largest of all the Felidae known to inhabit America north of the Mexican boundary; more fabled, possibly, than any other animal in all history save the bear, there is a peculiar interest centering about the mountain lion, felis concolor, in whatever part of the continent it is found.

With a range extending from Cape Horn on the south to the Canadian border and beyond in the north, this cat is known to every tribe that inhabits the New World, and every tongue had a different name for it. To South Americans, ranging far and wide over the boundless Pampas, it was and is the puma; Pennsylvanians, residents of the Adirondacks and the Alleghenies, and others of eastern hunters in whose States this cat once ranged, called it panther, which speedily became corrupted into "painter"; still farther north it is the catamount, close kin in the terror it inspires with the loup garou and the "lucevee" of northern woods.

West of the Mississippi—possibly I should be more particular and say west of the Missouri—this lank, gray denizen of the barren buttes and the timbered hills has been the "mountain lion" since the early days of the trappers. In a more restricted sense, west of the Sierra Nevadas, it is commonly called California lion.

In a way there is reason for these names, for the panther of Pennsylvania is, in minor characteristics, different from the puma of South America, the catamount of the North or the lion of the West, just as they are each different from the other. But I doubt very seriously if there is a naturalist in these United States who could separate these animals species by species from a series of skins taken throughout their wide breeding range.

Like precious gold, the mountain lion is found where he happens to be. The hunter may look for him through all one slope of the Sierra today and not find anything but old tracks; he may wander across a whole range of barren lava on the desert without so much as striking a warm trail, and, on the morrow, he may find the great cats in both of the regions over which he searched so assiduously the day before.

The mountain lion is a great traveler, and places which have not known him for years may suddenly wake up to find that a pair have domiciled themselves in a little-suspected cave or beneath the roots of some fallen tree, where hunters most familiar with the section never would think of looking for them.

In spite of this trait of moving about, the mountain lion is also a permanent resident in sections where he is not too much molested, as many a cattle raiser of Montana and Wyoming and many a sheep herder of the Southwest can testify.

Gradually, however, these cats are disappearing from the hills and the mesas of Southern California. Time was when even so young a hunter as the writer can remember "lions" as more than common in the hill regions of the Southwest. Now the killing of one of these cats with a pack of hounds, or the capture of one in a trap set for coyotes, is the signal for a great congratulation to the hunter and much noise in the local papers.

In the central and northern counties of this State, however, and in Oregon and Washington, there seem to be plenty of the big cats left for those ambitious Nimrods who care to go so far in pursuit of them amid the tangles of the mountain fastnesses to which they have for the most part been driven.

The center of abundance of mountain lions a few years ago in Southern California was down on the slopes of Smith Mountain and the near-by hills of San Diego county. A man in that region with a well-trained pack of hounds can have great sport, and if he fails to get the mountain lions he seeks he at least can have the consolation of as good wild cat hunting as can be had in the State, bar none.

And this brings us to one of the real outdoor games of the Southwest—the pursuit of the mountain lion with hounds. There is good fun to be had with the same hounds and horses after wild cats and coyotes over much the same ground as that frequented by the larger cats, but it never compares for all round uncertainty and excitement, or in the surety of a fight if the animal is treed, that comes from the chase of the lion.

The fur of any of the four-feet, of course, is never very good in this part of the world, but the pelt of the lion is best in December or early in January before the females retire to their caves to bear their young. These same young can be tamed to a certain extent if captured, but as they gain in size and strength they become unruly captives, and as a rule their captors are only too willing to turn them over to some park or zoological garden for safe keeping behind bars.

When young the cubs, which are usually two in number and born in March, are spotted, as are the young of African lions, and are the most playful kits the wildwood produces. Young wild cats have some of the innate ferocity of their ancestors from the moment they first draw in their mother's milk, but young mountain lions are as good-natured as tame kittens; I have played with two such for hours with nothing but a rubber ball and a piece of string. In the cave at first they scratch and bite like little demons, but they soon get over this ugly disposition, especially when fed on bread and milk and given but small quantities of meat.

So far as I am able to learn, the mountain lion family stays together almost for a year. It may be that the animals breed only every two years, but I know that I have seen half-grown youngsters prowling about the mountains back of "Arden" in company with an older female. One afternoon, sitting in the bed of the wash of the Santa Ana river, up above Yorba, in company with H. A. Bradford, an enthusiastic naturalist and sportsman of Placentia, California, we were surprised to see two lions come walking out of the thick underbrush, right beside the dim clearing which marked the road, and start across the wash. This was in June or July, I do not well remember which, but think it the latter month. One of the cats was full grown, apparently a mother and her kitten of the spring previous.

Bradford reached for the only weapon we had, a .22 repeating rifle, and sent a bullet after the pair just as they turned into the brush. With a snarl the larger cat wheeled in her tracks and bit savagely at one hip. Apparently the bullet found its mark, for Bradford is a good rifle shot, but we were unable to trace the lions farther than the opening in the tangle, into which they disappeared almost as soon as the little gun cracked.

This, however, is one of the few and rare instances in which I or anyone else, for that matter, have come on these animals in the wild. They are the greatest hunters known to this part of the country, and the man never lived who could successfully stillhunt them.

In the total I suppose I have spent days, .25-20 rifle over shoulder, tramping through the known range of the big cats, finding fresh tracks here and there, always near the spring, absolutely sure that from some coign of vantage at least one pair of wild eyes was following me, yet never able to come on one. Whenever the good luck has fallen to me to see the cats I have been without my gun, and the glimpses I got of them were only the most fleeting, so that little short of a ten-bore shotgun charge of buckshot would have stood any chance of stopping one.

One of the last mountain lions of which I know as being killed near Los Angeles by chance hunters was shot in a dense growth of willow scrub in the same Santa Ana river wash in which the incident narrated above took place. Three young men from Anaheim were hunting rabbits in the dry river bed, with a couple of mongrel dogs. The dogs, ranging through a narrow strip of willows, "flushed" the big cat, and two charges of No. 4's from the boys' shotguns laid it out.

It was a small lion, and apparently had been caught between nights on its way from the hills back of Olive to the hills of the Chino Ranch on the other side of the valley. For a full grown lion to be caught in a narrow strip of willows so far from home hills and a friendly sheltering cave would practically be an impossibility, and it must be that this was nothing but an overgrown kitten who had slipped away from parental range too soon. Perhaps his story—his tragedy—would prove interesting reading, did we but know it, for manifold and wonderful are the dramas worked out under the sky and the trees with four-footed Hamlets and Iagos, not to mention Desdemonas and Portias.

But the lion is no sentimentalist; he is a coward, a thief, a cut-throat and a renegade, but he is the cleverest hunter that ever graced four feet. He has a weasel beat so far that the little brown fellow hasn't even a look-in for his white chip. The golden eagle, that famed harrier of the air, is not more clever in his hunting than the big gray cat of the hills and the valleys of the Southwest.

But despite all his own skill in the pursuit of his quarry, the mountain lion is a ridiculously simple animal to capture with dogs and horses by men who know the game as thoroughly as do some of the members of the hunt clubs of which California boasts.

I am going more into detail as to the hounds and horses which the exigencies of hunting demand in this end of the State in a later paper; just now I have room but to tell of one chase which resulted in the death of a small lion. At the time of which I write, I was possessed of two as good hounds as ever gave tongue on warm trail.

One Sunday afternoon, my father knocked a young wild cat from a tree with a stone, and thereafter killed it. When he came home I took the dogs and a pony, reasoning that where there was one young cat there ought to be another, and rode up the canyon through which he had just passed. About a mile up, the dogs struck a cold trail which they ran down in about half a mile. This run led me over the ridge into a small valley, well hemmed in by hills.

Here the dogs circled about aimlessly for some time and then, breaking through a tangle of some low shrub, the old white and tan hound let go the warning cry. The younger dog took it up, and in the space of a breath dogs, horse and I were well up the far side of the pocket, going into a bit of country I had never visited before, after game of which I had not as yet had a glimpse.

We ran about a mile over the hill, then along the ridge another mile and down the steep side of another canyon into the bed of a creek, almost dry, but still encountering enough water for the animal ahead to run in. Here, of course, the hounds lost their grip

and we spent nearly half an hour ranging up and down the creek, first on one side and then on another, before we found the trail again.

When we did pick it up it ran down first one side of the stream, then crossed, apparently at a bound, and doubled back along the far side of the canyon and close up against the rim of the hills. Here we could follow the track easily and soon we passed the place where we had first lost the trail. Above this the going became very rough and we found a perfect wilderness of small boulders. To one of these I tied the pony and followed the dogs, now a good distance ahead, on up the gorge, for gorge the canyon had now become.

When I left the horse, I expected a long tramp, mayhap a mile, possibly five of them, though I knew that the lion, for tracks in the sand had long ago told the identity of the animal we were following, was not prone to long runs, especially when picked up as fresh as the voices of the dogs said this trail was.

In the midst of the boulders, however, the trail crossed the stream again, and by the time I had made my way with no broken legs to the other side of the creek, the dogs had found the still warm trail and were away up the canyon, quite out of sight. Clinging as closely to the creek bed as possible, I followed the sound straight into a little pocket at the head of the canyon.

Here, over a low wall of rock, not more than twenty feet high, but sheer from the bottom of the gorge, the stream tumbled, and there, gathered about the base of a huge sycamore, the dogs bayed the long, gray form of a lion, up among the branches.

Apparently the cat, hard pressed at the point where the trail last crossed the stream, had taken directly up the creek bed instead of keeping on across the canyon and had run itself into a pocket, whence the only escape was to climb a tree, one of the time-honored prerogatives of his kind throughout the New World.

With his teeth bared, and his body arched into a semicircle, he looked like nothing so much as a huge red-gray housecat which had unwittingly come across the path of the hounds and been treed by them. Unfortunately for the hunted, the top of the tree in which he had taken refuge, and which was the only tree in the canyon, was a considerable distance from either side of the gorge. Consequently all hope was cut off of leaping to safety to the top of the ledge. The cliff itself was unscalable to anything not having wings, and while the tree was easy for the cat, he did not like the looks of the cliff, especially with the snarl of the two dogs ringing in his ears.

For a weapon I had a .38-calibre revolver, set in a .41 frame, single action, the best all round gun for horseback hunting I have ever seen. I did not care to climb the tree for a closer acquaintance with the sharp claws of the lion, now well bared and sunk deep into the bark on the white sycamore limb.

I am not a Dr. Carver, nor yet Buffalo Bill, while Annie Oakley quite outclasses me, but I took three shots at the cat, and at the third one brought him down with a bullet through one side of his head, a very fortunate shot, for he would have cut the two dogs up badly, if he did not kill them, had he lit on the ground in good fighting trim.

This was one of the most enjoyable hunts of my life, though it was short and made alone, the manner in which most of my hunting has been done. Wherefore none of my kind friends have ever punctured me by mistake for a deer or a bear.

—o—

The Coming Show Season.—Spring, sunshine and shows are here. Now is the time to whip your dog into shape for the 1915 campaign. The season opened with the Pasadena event which ended last Saturday night. It was a four point event and was a good start for those looking for points.

Frequent inquiry has been made in reference to the coming shows in San Francisco during 1915, and many of these queries have been from those who were unfamiliar with the showing game and who have conflicted the Golden Gate Kennel Club show with the International Dog Show given by the Panama-Pacific Exposition.

The Golden Gate Show takes place in the spring, possibly in May; the Panama-Pacific show will be in November. The Golden Gate show will take place in some hall, the Panama-Pacific in the grounds of the exposition. The Golden Gate Kennel Club is composed of only three members: Irving Ackerman, Alec Wolfen and A. J. Folger. The Panama-Pacific is given under the auspices of the directors of the Exposition.

The Golden Gate Kennel Club has affixed "International" to its May event, although so far not one foreign dog fancier has suggested bringing his dogs from the other side. On the other hand the Panama-Pacific dog show is entitled to the word "International" because scores of foreign dog owners from all points of the world have applied for blanks to enter their dogs.

The Golden Gate Kennel Club will hold its show under American Kennel Club rules; the Panama-Pacific Exposition will be under the Exposition's own rules, and everyone will be entitled to show—even those who were ruled off from showing under A. K. C. rules for some intentional or unintentional infractions of a regulation.

The Eastern press in some way has mixed up the Golden Gate show with that of the Panama-Pacific—but people in California should understand that one show is being given by three members of a dog club above mentioned, while the Panama-Pacific will be entirely separate.

AN ALASKAN DOG TEAM RACE.

[by Jack Jungmeyer.]

Poke fun at John Johnson, crack "musher" of Alaska, and he will grin good-naturedly; jibe at his dogs and his fighting blood is up.

Twice winner of the great $10,000 Nome-Candle Creek dog race, with an unbeaten record of seventy-four hours and fourteen minutes over the 408-mile course, Johnson is known as "The Iron Man" for his amazing grit and endurance.

How he won the desperate race that gave him the monacher, with a "scrub" team, under the goad of derision, and became the hero of Alaska, Johnson here tells for the first time.

It is an epic of the frozen tundra, wherein fierce ambition, high courage, clean sportsmanship and the comradeship between man and beast played big parts.

"The men who were betting their thousands looked us over—me and the dogs," began Johnson, "and they laughed! It was then I made up my mind to win or to run myself and the team to death."

Johnson is 40 years old, was born in Finland, sailed before the mast, prospected and faced death in Siberia, where he was lost once for four days, finally coming to a native hut in the nick of time to save himself from starvation or freezing to death, and went to Nome in the gold rush of 1900. In his face is the austerity of the north, in his speech the halt of men who have lived long in Arctic silences.

His love of dogs is like a religion.

"There were fourteen dogs in the team I was driving for Colonel Fox Ramsey," Johnson resumed. "Most of them were his, but some belonged to me—shaggy little fellows who had gone over thousands of miles of perilous trail with me—especially Kolma, my blue-eyed leader.

"Ramsey had entered three teams of Siberian dogs. He drove the pick himself. The second went to Charlie Johnson, and I was given the 'scrub' team. Four other teams were entered.

"Ahead, to the northeast, stretched the bleak snows over which we would race. Candle Creek was 204 miles away—the half-way point. It was Thursday, April 7, and a clear day. A little too warm, though, meaning hard work breaking trail. This would be tough on me, for I was to start first, the others to follow at ten-minute intervals. I would have to pound snow for them.

"Around us 6,000 people were packed, watching. They jingled their gold. But little was bet on my 'scrubs.'

"Beside me stood 'Scotty' Allen, a great racer who had already won one sweepstake and come second in the other. He is a favorite in Nome—the 'King of the Arctic trail.' As we waited for the start 'Scotty' looked at me—squinting.

"'I'm going to run the heart out of you!' he said.

"And then my dogs leaped at the signal, running low and whining with excitement.

"I nursed the dogs along—getting acquainted with them. Siberian dogs do not gallop, like the Malamute and the Husky. They pace, bellies close to the snow. And they do not quit until their heart breaks.

"Most of my team I didn't know. They belonged to Fox Ramsey, for whom I was driving. But Kolma, my leader, I could rely on. He would go through hell for me.

"We covered the first 125 miles to Telephone Creek in about thirteen hours. And the dogs were still fresh. At Timber, one of the stations on the trail, I was fifty minutes ahead of Charlie Johnson, an hour ahead of Allen, and about forty minutes to the good over Ramsey. The stars had come out. Candle was still seventy-nine miles away."

From the telephone stations along the course word was flashed back to the Nome bulletin boards, where men waited sleepless with excitement all night.

"That pace won't last," said the sourdoughs. "It can't,"

"I was beginning to get a good lead," said Johnson, "when we ran spang into a snow fog so thick I could hardly see my leader.

"This was at Death Valley Hill, a dangerous bit of country. Kolma lost the way. We floundered around for three hours. The delay was heartbreaking. I had to back-track to find the trail. When we finally got away again it was nearly four o'clock Friday morning.

"I nearly lost my head here. I thought Scotty and Ramsey might have passed me. I pushed my dogs to the limit. We were desperate, the dogs catching my excitement. We flew over hummock and slides, the sled slipping crazily. Several times I almost lost my grip on the handles. But at Haven, the next station, I learned that I still led. The other drivers were having trouble, too.

"In fact, I now led Ramsey by over an hour, and Allen by three.

"I began to get anxious about Kolma. Deciding to save his strength, I took him out of the collar and put him on the sled. But he'd have none of it. As soon as I yelled 'mush!' he leaped off and took his place ahead of the team, spurring them on.

"Never a whip cracked over their backs. The lash makes cowards. My dogs have been trained by kindness.

"One hundred and twenty miles from Nome," he resumed, "the first of my team gave out. It was Miscah, a game little fellow whose feet had gone back on him. He begged me even then, with his eyes, to let him stay in the traces, but I laid him on the sled under my parka. Poor old Miscah!

"Every twenty-five miles I fed the dogs a handful of meal.

"I wanted to drink all the time. My thirst became a fever. The sweat poured down my body, into my mukluks. I kept sucking lemons for relief.

"The weather turned colder. My mittened hands began to freeze to the sled bars. The bite of the wind against my face was terrible. My feet were sore, and the snow glare was beginning to bother me.

"Scotty Allen, the watchers at the telephone relays told me, was creeping up fast. Now I didn't laugh when I thought of his brag.

"I had now been on the trail thirty hours and twenty-three minutes without rest or food.

"The excitement was too strong for my hunger. I was living on my nerve, and so, largely, was my team, although I had fed them a little meal along the trail.

"I was giving the dogs a breathing spell and changing my underwear, soppy with sweat, when Ramsey, the first man behind me, sped into Candle and out again without stopping. He left word that he would rest at the tent eight miles away on the return course, and suggested that I do the same.

"It was 7:25 o'clock Saturday evening when Ramsey left Candle. I got away at 8 o'clock. In point of time I was still two hours ahead of him.

"I didn't stop at the tent, though. High up on the river bank I saw the glow of Ramsey's fire and heard the 'woof-woof' of his dogs. I spoke to Kolma, and we streamed by like ghosts in the night. I figured that if I stopped to rest there Ramsey would get away with me and I couldn't shake him off. He'd have all the advantage.

"He didn't know that I had passed on ahead until he reached First Chance, thirty-nine miles beyond.

"'Holy smoke!' said Ramsey, 'John must be driving!'

"And I was driving!

"The strain was beginning to tell on me and the dogs. I had my clean living to thank for my endurance."

No man has ever seen John Johnson drunk, and he does not smoke. His life of prospecting has made him hard as nails. Once in a Siberian blizzard he went four days without eating.

"My second dog gave out when within fifty miles of Nome," said John Johnson.

"It looked like my team was going to pieces under the terrific strain. Two dogs were on the sled, and several of the others were slowing down. This was at Topkok.

"I began to push the sled—helping the brave fellows in the traces.

"Four of the other teams had already dropped out. Only Ramsey, 'Scotty' Allen and I hung on, driving like the devil with our last strength. Allen was about four hours behind, while Ramsey had three hours to make up at Topkok.

"But hours can be quickly lost or gained at the finish of a race like this. I was uneasy.

"Again I tried to spell Kolma, the leader, but he stopped the team until I had given him the leadership. It just seemed to take the life out of him to be taken from the front. I knew he felt it.

"My own strength was going fast. The sweat seemed to draw the life out of me, cold as it was. We were now making only five miles an hour.

"My will kept saying to the body, 'You must go on,' but the muscles said, 'No, let's rest.' And that was my fight over those last fifty miles—between the body and the will.

"Remember, I had not slept at all now for over seventy hours.

"And what made it harder on me and the dogs was the joking of the watchers at the telephone relays. They would tell me that Ramsey and Allen were gaining fast. I did not know they were joking. I thought I was going to lose after all. The plugging became just plain hell.

"Morning came—the glisten of snow in my half-blind eyes. Wind and sun had tanned me black as a native. The air seemed like ice in my lungs. I think I blubbered once or twice.

"You see, my dogs and I had run as far as across the State of Kansas without sleep, and with almost no rest or food. It wasn't boy's play!

"And then we came in sight of Fort Davis, four miles out of Nome. Here a cannon is fired when the first racer comes in sight. People began to crowd up so thick I could hardly get through.

"The roar of the gun stiffened me up for the final spurt. It was for me and my 'scrubs'! Kolma looked back at me, his tongue out, his blue eyes wide with exhaustion. And I yelled at him.

"And so we came down the stretch, a little of the heart still left in us. I looked at my dogs, and I felt sort of solemn. I had brought them all in alive.

"They had all been willing to die for me—the poor fellows who didn't even know what it was all about.

"And then—well ,they hung some flowers around my neck and patted the dogs, and swore at us—nice bragging oaths. We had made it in seventy-four hours and fourteen minutes.

"And by and by 'Scotty' Allen came plugging in with his great shaggy Malamutes. I hardly knew him, his face was so gaunt, his voice so hoarse.

"'You're the toughest man I ever saw on the trail, John,' he said, sticking out his hand."

The "Iron Man" didn't quite finish the story. Bill Brady, his pal, concluded it.

"John," he told me, "blubbered like a baby when they hung the flower horseshoe around his neck and patted the dogs. So we knew he had a heart, even if there isn't a man living who can run it out of him."

THE BEGINNER AND THE RIFLE.

(Concluded from last week.)

He would be an unreasonable man who would expect to be a good golf or tennis player or a good fencer or boxer without plenty of good, hard, concentrative practice, yet there are a good many shooters who get discouraged because they cannot go out and become good shots by simply banging away with the rifle, regardless of what mistakes they make in holding and firing the gun. It is not the amount of practice as much as it is the kind of practice that counts.

When you feel that you thoroughly understand the firing practice, and can raise the gun and pull the trigger and feel that most of your cartridges would not be wasted were the gun loaded, then get out your ammunition and load the gun. Most rifles as they come from the factory are sighted correctly for a normal eye, but so many persons differ from the normal that you should watch the general grouping of your shots in your early practice; and if you find after firing a hundred or so shots that the general grouping is toward the left, take a brass rod about two inches long and with it and a hammer drive your rear sight to the right just a trifle and then try a few more shots until you have the correct combination. You may rest the rifle on a pillow and get your elbows braced on something, then with a steady pull off, your shots should go into the center every time. If not, change the sights accordingly. Don't be in a hurry to change your sights at first; in nine cases out of ten the fault is in you and not in the sighting. It hardly seems necessary to caution the beginner that a .22 calibre in spite of its small size is not a toy, and that the bullet will penetrate six inches of soft pine; but it is well to remember this fact and see that your backstop is good and substantial before going into the practice with cartridges.

Your preliminary practice will count for more than the shooting with the rifle loaded, and if you have practiced faithfully before using cartridges you will find no trouble in getting the majority of your shots at least somewhere near the object shot at. Learn early to call your shots: that is, when you pull the trigger you should feel that you know exactly where your shot will strike. It may be you have pulled just as the gun was a little to the left of the bullseye and you should be able to instantly announce the resulting location of the bullet hole before the shot is marked or you examine the target. The best military shots will call their shots nine times out of ten correctly, and the whole secret of this is the steady pull-off that you have been practicing. The target is in military parlance a clock face, and the shots are called where they would strike were the target supplied with figures of a clock. That is, a shot just a trifle to the left of the bullseye and just cutting the lower edge would be a seven o'clock bullseye, and one cutting the top of the bullseye on the exact center vertical line would be a twelve o'clock bullseye or "Bull" as it is called in military slang. Therefore, when you pull the trigger announce the result of your shot before you examine the target, saying "an eight o'clock bullseye" or an "eleven o'clock four" as the case may be. (The ring next to the bullseye on a military target is a four in value while the bullseye is a five.) If your shot does not strike where you called it, or at least on the same side of the bullseye, you will know that your pull-off was not good or that the wind affected your bullet, although the last reason would not apply except in shooting a hundred yards or more with a brisk wind.

Don't "cant" the rifle to one side; if you do get into this habit and ever shoot at long range you will not be able to account for the misses you get with a perfect sight, so don't get in the habit at all. Hold the gun so that the flat top of the barrel is level, not tilted either to right or left.

Once you have learned to pull the rifle quickly and steadily without jerking it, you have learned the most important thing in rifle shooting; and if you do not learn this you will always be an unreliable, erratic shot, making a bullseye one shot and a miss the next. This sort of a shooter never wins a match and never has a place on a rifle team if there is a man who can make fours or even threes consistently. A miss and a bullseye averages two and a half points to each shot, so don't make misses! And if you make a good score one string of shots and a poor one the next, kick yourself; for you are not shooting consistently and consistency is the sine qua non of a good match shot.

Once you have mastered the target or inanimate object shooting get some friend—or still better your wife, so you can blame your misses on to her poor throwing—to throw an empty can into the air for you, and practice shooting at flying objects. This sort of a thing will teach you to catch your sight quickly and to shoot at just the right moment, valuable practice for game shooting. Aim at the bottom edge of the can as it is coming down, or better still catch it as it is turning to come down. Aim your rifle at about the heighth to which the can is thrown and follow it with the sights, never stopping the gun, under any circumstances, as you pull the trigger. You will be surprised with a little practice how easy it is to hit flying objects with a rifle.

One more word to the beginner: as far as you are concerned, regard every kind of firearm as being always loaded, always cocked and equipped with a hair trigger that the least jar will discharge, and handle your rifle or any other firearm you may use accordingly.

At the Traps

Interstate Association Trophies, 1915.—The Interstate Association extends the privilege to trapshooters contesting for its trophies to select any of he articles illustrated in Plate 1, on this page, or in Plates 2, 3 or 4, which will be published on successive weeks hereafter, in accordance with the following rules:

A club applying for "All Trophies" may elect to take ten of the Number 1 prizes; or two of the Number 1, two of the Number 2, and two of the Number 3, or, if desired, two of the Number 4. In other words, any combination is in order provided the selection does not exceed a maximum of $50 under the different classifications.

A club applying for "One-Half Trophies and One-Half Cash" may select the trophies in the same manner, but only to the maximum of $25 under the different classifications. The trophy winners will indicate their choice of trophy on the blanks furnished by the Interstate Association, through the club secretary, the numbers designating the trophies to be used; the club secretary will thereupon mail the blanks to the Pittsburgh office, together with the complete records

NUMBER ONE.
$5 Classification.

of the shoot, as required. The trophies, properly engraved, will be sent direct to the winners, all charges prepaid.

No trophies will be forwarded prior to the date of the tournament for the purpose of examination or display.

It is understood that the winner of the Interstate Association's State amateur championship event at the State tournament will be given the privilege of selecting one of the $25 classification trophies, the other six of the trophies donated to State tournaments for the 100-target championship event to be selected by the winners, two trophies from each of the other three classifications.

Duplicates of the trophies may be secured from Black, Starr & Frost, Fifth Avenue and Forty-eighth Street, New York City, at their regular retail prices.

Plate No. 1.—C 8 Pipe—14-carat gold mount—in case.

C 9 Pipe—14-carat gold mount—in case.

C 10 Silver-Plated Combination Coffee Pot, Sugar and Cream, 7 inches high.

C 11 Pair Sterling Silver Drinking Cups—in case, 1⅞ inches high.

C 12 Sterling Silver Combination Cigar Cutter and Cigar Box Opener, 7⅜ inches long.

C 13 Silver-Plated Cocktail Shaker, 9¾ inches high.

C 14 Six Sterling Silver Tea Spoons—in case.

C 15 Sterling Silver Bon-Bon Dish, 6¼ inches in diameter.

C 16 Sterling Silver Flower Vase, 8 inches high.

C 17 Sterling Silver and Cut-Glass Jar and Spoon, 4 inches high.

C 18 Sterling Silver Combination Bottle Opener and Corkscrew, 6¼ inches long.

C 19 Sterling Silver, Glass-Lined, Ash Receiver, 4 inches in diameter.

C 20 Sterling Silver Top Cigar Jar, 5¾ inches high.

C 21 Silver-Plated Love Cup, 7⅛ inches high.

C 22 Sterling Silver Photograph Frame, 8x6 inches.

C 23 Sterling Silver Mounted Whisky Bottle, 1 quart.

C 24 Pewter Mug, 6⅛ inches high.

C 25 Sterling Silver Mounted Pitcher, 6 inches high.

* * *

Wing Shots Open Season.—Seven straight scores signalized the opening shoot for 1915 at Sobrante of the California Wing Shooting Club. The winning guns in the club medal shoot were: Pete Walsh, who has missed but few opening shoots of the club; E. L. Hoag, A. J. Webb, Frank Ruhstaller of Sacraners in the club purse match with eleven birds each, were: Toney Prior, Ruhstaller, Nauman, Riley and Northcroft.

After the regular club matches Ruhstaller and Simpson were the winners in a six bird pool shoot. The scores:

Forenoon medal shoot, 12 pigeons, distance handicap, high guns to win.

Pete Walsh	28 yds.	2221 1111 2111	—12
E. L. Hoag	30 "	2222 1121 2222	—12

* * *

Long Run Trophies—A feature at all local and State trap shoots this season will be the Du Pont "long run trophy" shoots—for runs of 50 straight or more. This competition is for both amateur and professional shooters during 1915 and 1916, and there are no entrance fees charged. For a first straight run of 50 breaks a gold fob is the award. For every succeeding run of 50 or more straight breaks the successful gun-pointer will receive a gold bar. For fifteen runs of 50 or more straight, a shooter will be recognized with a gold watch. Professionals are required to do this trick twenty-one times before securing the coveted vest clock. Runs made at registered shoots only to count.

* * *

New Trap Ground Desired.—A long-felt want among the trap-shooting sportsmen is a shooting ground easily reached and where, outside of regular club shooting days, a shotgun devotee can go and indulge in practice shooting or impromptu matches when the humar suggests that recreation. Such was the vogue during the days of the old Ingleside trap grounds, an opportunity that has been decidedly missed since that range was closed. If the efforts of the Exposition City Gun Club members are successful, a new and popular shooting ground will be available in this county. At present the Golden Gate Gun Club grounds at West Alameda station are open for practice shooting on Saturdays. Once get a local range started, it will be a popular resort.

* * *

Vallejo In Line—The Vallejo Gun Club adopted a programme for a season of six months' blue rock shoots recently. The officers elected for the ensuing year are: James V. O'Hara, president (re-elected); J. W. Peckham, vice-president; Fred Leicke, secretary; C. L. Wisecarver, treasurer; A. G. Flickinger, captain; W. Mann, lieutenant. This club is also on the lookout for a new shooting location. A "Fred Gilbert" shoot, at 100 birds per man, will be held March 14 or 21.

* * *

Exposition City Gun Club.—The Easton trap grounds will be the scene of the club's Fred Gilbert 20th anniversary shoot tomorrow.

* * *

Garden City Traps.—The dates for the registered tournament of the San Jose Blue Rock Club are announced as May 29, 30 and 31.

The club will hold a Fred Gilbert 20th anniversary shoot tomorrow.

* * *

Dog Killed Rattler—The life of Mrs. P. Hamilton of Bakersfield was probably saved recently by "Bay," a handsome Airedale terrier owned by Dr. J. Walter Key, when the intelligent animal killed a rattler which was poised to strike at her. The woman did not notice the reptile until she saw the dog striking at it. The Airedale killed the snake unaided.

Drink Jackson's Napa Soda.

Offerings for Private Sale from the Stable of

WILLIAM G. DURFEE

of Prime Campaigners and Well Proven Prospects
READY TO RACE THIS YEAR

I have no objections to hard work or to driving an entry in every race of the day's program during the racing season, but daylight hours are limited, and neither physical possibility nor the judges will stand for me driving more than one horse in each race, so I am making this offering of tried and proven campaigners and well developed prospects for classes and coast futurities. I have too many horses already well developed for one man to train and race, with more coming on steadily that must be handled. Many of the individuals offered here are well known to you, and a trip here will give you full acquaintance with any others that may interest you. Every claim made for speed already shown will be fully substantiated, every horse is exactly as represented, and every price is based fairly on what long experience assures me is a conservative estimate of their actual earning capacity in competent hands. Look this list over, come and see them, and you will realize that you have never been afforded a better opportunity for a profitable investment in horseflesh for racing purposes.

All previous prices are invalidated—Quotations below are subject to change according to future conditions.

MISS QUEALY (2) 2:26¾
Full sister to MANRICO (3) 2:07¼, winner of Kentucky Futurity 1912, and holder of world's record for sixth heat. Seven years old, trained slightly as a three-year-old and showed half in 1:06 over a half-mile track; has been in training ninety days and can trot a half in 1:05; absolutely will not break, good gaited, sound, and a handsome individual. Can trot a two-minute gait and has every right to make a very fast, consistent, good mannered race mare. Price $1750.

ALARICH 2:11¼ (Breeder's mark 2:09),
trotter, bay gelding with black points, 15.3, handsome, sound, fast and game; trialed at Santa Rosa last season in 2:06¾ and can do it again. Is a first class doer, can race twice a week and is eligible to the 2:13 class trots on mile tracks and to the 2:18 class on half-mile tracks; has shown well on the twice-arounds. Price, $650.00.

HELEN BELLE (2) 2:22½, breeder's record,
bay filly, foaled 1912, good gaited, good headed, sound and extremely fast; was taken up absolutely green on Sept. 3 and has developed in a most satisfactory manner, taking her mark in December, since which time she has been an eighth in :16, half in 1:09. Sired by California's greatest sire of colt trotters, CARLOKIN 2:07½. First dam Carolyn C. by Axtell (3) 2:12 (a champion); second dam by Expedition, sire of Bon Voyage 2:08; third dam by Princeps (son of Woodford Mamb.); fourth dam by Hambletonian 10.
Carolyn C. had two minute speed. This great filly is entered and paid up in the Occident stake, the State Fair, P. C. T. H. B. A., and Oregon Futurities for 1915. The best buy in California at $1400.

NELLIE Mc,
black mare, trotter, eight years old, racing sound but is blemished; has always trained sound and I believe will continue to do so. Trialed at Sacramento in 2:10½ and has been a half lately in 1:03¾. Is a splendid mannered mare—anyone can drive her anywhere. She races first class, is fast, good headed, good gaited and dead game.
Sired by ZOLOCK 2:05¼, dam by Wilkes Moor, son of Guy Wilkes.
Stands about 15.3, is a round made extra good looking mare, weighs about 1140, has splendid legs and feet. She negotiates a half mile circle in A-1 style, should surely beat 2:10 this year. Does not pull a pound and can be placed anywhere. Eligible to any class. Price $1000.00.

CARLETA,
bay filly, two years old, by CARLOKIN, dam ALEXANDRIA, tr. 2:20, by Bon Voyage 2:08; second dam by Oakland Baron 2:09¼; third dam by Allandorf, etc.
This is a good trotter and should be prominent in her stake engagements. Is very handsome, good headed, sound and comes from familes noted for early speed. In training now and improving very fast; trialed recently, half mile in 1:14, eighth in :17¼.
She is entered and paid up to date in the following stakes: Panama-Pacific $3,000 for two-year-olds, Stanford, Occident, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. Price $1000.

O M A R, gelding,
trotter, trial 2:13¾, half in 1:05, eighths in :15; good headed, sound and can be depended upon. Is a beautifully gaited big horse and should prove useful to race over the twice arounds or for a matinee and road horse. He is fearless and is one of the most pleasant driving horses I have ever ridden behind. Stands slightly over 16 hands, weighs about 1200, is eight years old. Sired by DEL CORONADO 2:09½, dam Pineapple by Albion (son of General Benton). A present at $350.00.

CARLSCHEN (2) 2:23, breeder's record,
brown gelding by CARLOKIN, dam BONNIE AILSIE 2:08½ (dam of Contention B. (3) 2:08¼) by Faustino, son of Sidney.
Trialed with a little work last year a half in 1:09, is extremely promising and looks to be as good a prospect as any of the colts racing last year in the two-year-old trots. Is engaged in several of the futurities including the P. C. T. H. B. A., Pleasanton and State Fair Futurities. Is a splendid type, beautifully gaited, good headed and has extreme speed. He does it right. Ready to show and can trot a half in 1:07. Price $800.00.

HERMES, brown colt,
two years old, by CARLOKIN, dam MISS QUEALY (full sister to Manrico 2:07¼).
This is one of the most promising trotters I have ever handled. Is an especially nice gaited colt, can show a 2:20 gait, is good headed and on the whole the most promising youngster I know of for the western stakes. Is also a show horse. Is entered and paid up in the Occident, Stanford, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. His dam is an extremely fast trotter, having shown a two minute gait in her three-year-old form, and his second dam produced two to hold world's records—Manrico and Don Pronto.
This youngster is spoken of as the most impressive colt trotter at Los Angeles. Price $1500.00.

JOHNNY DUGAN,
3-yr.-old breeder's record 2:16,
pacer, no straps, bay gelding four years old, straight and sound, trialed a half in 1:04 last year in his three-year-old form and could pace around 2:10 in June.
Sire, CARLOKIN 2:07½; dam Annabelle L. (full sister to Murray M. and Robert L 2:08¾) by Hambletonian Wilkes; second dam Annabelle 2:27½ (dam of La Belle 2:16); third dam by Williamson's Belmont. A great buy at $350.00.

OLD FOLKS,
bay gelding, trotter, five years old, trialed as a two-year-old in 2:31½, as a three-year-old in 2:18½, and in his four-year-old form last May in 2:11, last half in 1:04. Is sound, good gaited, good headed, and should 2:08 this year. Comes from a family of good race horses on both sides—by DEL CORONADO 2:09½, dam IRAN BELLE, by Iran Alto 2:12¼; second dam ANNABELLE, etc. He stands A-1 with the railbirds around Los Angeles and is in training and ready to go on with and race this year. Price $1100.

NICOLA B. (2) 2:23¼
Winner two-year-old division Oregon Futurity, 1914.
Received slight injury just prior to going to the races in 1914, up to which time he was the most promising colt in my stable, working mile first part of June in 2:17, half in 1:06. Started twice, was once first, once second. Now in training and has brushed an eighth lately in :16; sound, grand individual, paid up in six western stakes and has every license to win. Son of Carlokin 2:07½ and Atherine 2:16¾, dam of Copa de Oro 2:01, Rags 2:09¼, etc. Price $2000.

AND ONE FOR THE $20,000 P.-P. I. E. TROTS—RAGS 2:09¼,
winner of the Breeder's and Oregon Futurities, the Stanford and the Occident stakes as a three-year-old, and the Governor's Stake, $5000, as a four-year-old—in all, beaten in but two out of eight starts, second in those two, and beaten only by 2:05 trotters. In my opinion as good a prospect for the big stakes as anyone has. He is a really great race horse, is racing sound, and has developed from an overgrown four-year-old into a sturdy, strong, exceptionally fine individual. Should be engaged in the Panama-Pacific $20,000 stakes, for which I already have entries. None better bred—by Del Coronado and out of the dam of Copa de Oro 1:59, etc. Price $2000.

In addition to the ones above mentioned I will offer to intending buyers JIM CRAM, three-year-old pacer (brother to Changa 2:12¼), the two-year-old pacerSANDY McNABB (staked), FIVE YEARLINGS and SIX TWO-YEAR-OLDS, most of which are in training and ready to show.

Prices and descriptions on application.

WILLIAM G. DURFEE, 2019 S. Figueroa St., LOS ANGELES, CAL.

THE FARM

HORSEPOWER ON THE FARM.

The bureau of animal industry of the United States department of agriculture, in a recent publication of the department, calls attention to the fact that European Russia and the United States have about 50 per cent of the horses of the world, that this country alone has one-fourth of the world's supply.

The department thinks as soon as peace is restored in Europe that horses for agricultural purposes will be in great demand. It is suggested that with the exception of Russia, European countries now at war will demand a large number of work stock and that Russia may have the number so decimated on account of war that many will be needed there to rehabilitate farming.

If this be true, farmers in our country have great opportunities for raising horses. Whether the war ends in a few months or whether it continues a year or two, good work stock will be needed. Our country has already furnished many cavalry horses to the armies in Europe and while the number is not thought sufficiently large to interfere with our farming operations for the present, it is nevertheless a fact that more must be raised on our farms before we can expect good teams to be abundant.

With the use of improved implements better teams are required and more are needed to do the work required under advanced methods of farming. Tractors and gas engines will be more frequently used than formerly, but it is very doubtful whether this will reduce the usefulness of horses and mules.

Every farmer who has good mares should raise a few colts every year. The mares may be used in the fields and still be useful in raising colts. By keeping mares instead of mules, farmers may raise teams and help supply the demand for more horsepower on the farm.—Farm and Ranch.

COYOTES SPREAD HYDROPHOBIA.

The spreading of rabies by infected coyotes among cattle grazing in the national forests has assumed a grave aspect, according to a report received by the forest service from the district forester in charge of the forests in Washington and Oregon. Numerous townships in eastern Oregon, it is reported, have ordered that all dogs be muzzled lest those that have been bitten by rabid coyotes develop hydrophobia and attack humans or domestic animals.

Efforts are being made by the state authorities of Oregon to stop the spread of hydrophobia by this means and officers of the forest service are co-operating in attempts to kill off the coyotes. In one county alone a loss of 300 head of cattle is charged to rabid coyotes.

A little tankage or meat meal with its corn, will help the pig to make a better hog of himself in less time.

HORSE OWNERS! USE
GOMBAULT'S
CAUSTIC BALSAM.

A safe, speedy and positive cure. The safest, Best BLISTER ever used. Removes all bunches from Horses. Impossible to produce scar or blemish. Send for descriptive circulars.
THE LAWRENCE-WILLIAMS CO., Cleveland, O.

SADDLE HORSE FOR SALE
PRINCE ARISTA (brother to Arista Ansel (2) 2:18¾), young, sound, handsome and perfectly mannered, properly educated for park or show purposes. Goes five gaits without a flaw. Write for particulars or make personal inspection at Woodland Stock Farm.
H. S. DOWLING, Supt.,
Woodland, Cal.

ABSORBINE
TRADE MARK REG. U.S. PAT. OFF.

will reduce inflamed, swollen Joints, Sprains, Bruises, Soft Bunches; Heals Boils, Poll Evil, Quittor, Fistula, or any unhealthy sore quickly as it is a positive antiseptic and germicide. Pleasant to use; does not blister under bandage or remove the hair and you can work the horse. $2.00 per bottle, delivered. Book 7 K free.
ABSORBINE, JR., antiseptic liniment for mankind. Reduces Painful, Swollen Veins, Goitre, Wens, Strains, Bruises, stops pain and inflammation. Price $1.00 per bottle at dealers or delivered. Will tell you more if you write. Manufactured only by

$5000 Guaranteed **$5000 Guaranteed**

The Stanford-Occident Futurity No. 1

(For foals of mares covered in 1914)
To Trot and Pace at Three Years Old.

$3000.00 for Trotting Foals **$2000.00 for Pacing Foals**

To be Given Under the Direction of the

California State Agricultural Society, 1918

Entries to Close April 1st, 1915

Money divided as follows:

TROTTING DIVISION	PACING DIVISION
$900.00 to 1st heat.	$600.00 to 1st heat.
$900.00 to 2nd heat.	$600.00 to 2nd heat.
$900.00 to 3rd heat.	$600.00 to 3rd heat.
$300.00 to horse standing highest in summary.	$200.00 to horse standing highest in summary.

ENTRANCE AND PAYMENTS—$5 to nominate mare on April 1st, 1915; when name, color, description of mare and stallion bred to must be given; $5 July 1st, 1915; $10 December 1st, 1915; $10 on yearlings April 1st, 1916; $10 on two-year-olds April 1st, 1917; $10 on three-year-olds April 1st, 1918.

STARTING PAYMENTS—$50 to start in pacing division; $100 to start in trotting division. All starting payments to be made ten days before the 1st day of the State Fair at which the race is to take place. Nominators when making payments to start must designate whether the horse is a trotter or pacer.

CONDITIONS.

The race in each division will be for three heats; if no horse wins two of the three heats a fourth heat must be raced by the heat winners to decide the winner of the race, all other horses to go to the barn.
Trotting Division Heat Purses $900. Total Purse $3000.00.
Pacing Division Heat Purses $600. Total Purse $2000.00.
Heat purses divided 50, 25, 15 and 10%; the extra $200 in pacing and $300 in trotting divisions goes to the winner of two heats.
Distance 100 yards. A distanced horse shall be entitled to money already won.
If a mare proves barren or slips or has a dead foal or twins, or if either the mare or the foal dies before December 1, 1915, her Nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment nor will any entry be liable for more than the amount paid in or contracted for. In entries the name, color and pedigree or mare must be given; also the name of the horse to which she was bred in 1914.
Entries must be accompanied by the entrance fee.
Nominators are liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for $5000, the amount of the guarantee, only. Hobbles will be barred in trotting and pacing divisions.
Right reserved to declare off or re-open these Stakes in case the number of entries received is not satisfactory to the Board of Directors.
There will be no more moneys in each division or heat than there are starters.
No horse shall receive more than one money in each heat.
Entries open to the world.
Other than exceptions made in this entry blank, rules of National Trotting Association to govern.

A. L. SCOTT, President. CHAS. W. PAINE, Secretary.
Sacramento, Cal.

Have You Tried The Improved Grand Grand Circuit Hopple?

No. 471.

"THE EEL" HOPPLE RING SPREADER PREVENTS CHAFING. LACES ON. FITS ANY HOPPLE.

There is no other hopple on the market that's one, two, three with the famous Grand Circuit. It has been the leader for over eleven years and contains more exclusive features than all other makes of hopple together, including the Sell Patent Aluminum Ring Spreader, English Webbing and Indian Tanned Rawhide construction, Detachable Ring Covers and Improved Safety Hopple Harness Fastener. It's the strongest and most comfortable hopple ever devised. Come in and examine it, or write for full particulars. **SEND FOR CATALOGUE.**

This Patent Ring Spreader is an Exclusive Sell Feature

I stock all the famous Sell Brand Horse Goods

INCLUDING:

Track Harness, Road Harness, Riding Saddles — Patent Bits, Horse Boots — Blankets, Coolers, Hopples

ALSO

Gombault's Balsam, Absorbine, Smith's Wonder Worker — Reducine, Vita Oil — Save-the-Horse, Tweed's Liniment, Giles Embrocation

Wholesale and Retail Phone 1253

Peter The Great

is the world's foremost progenitor of extreme speed; sire of 30 in 2:10, etc.

His Son

Peter McKlyo 3, 2:12 1-2

will make the season of 1915 in the training stable of James Thompson at the San Jose Driving Park beginning March 15 and ending July 1.

PETER McKLYO (3) 2:12½, the only California-owned son of Peter the Great of an age permitting stud duty, is out of a great-bred young matron by Jay McGregor 2:07¼—Klyo (2) 2:29½; second dam Miss Spears 2:21¾ (dam of 6 including Shakespeare (3) 2:09¾); third dam Medium's Last (dam of 7 including Trampfast (2) 2:14¼); fourth dam Suzanne (dam of 1 and grandam of 10 including Susie J. 2:06½).

This colt is four years old, having obtained his record last season with a very limited amount of work. He came into my hands perfectly green in February, 1914, and developed speed so fast that I had to take his shoes off and jog him for two months barefooted. Being by Peter the Great, the sire of the century, and, as you will notice, out of a daughter of Jay McGregor, another wonderful family of horses, he is one of the best bred young horses in the world and I can truthfully say he is one of the very best individuals that I ever had the pleasure of looking at. He can trot a quarter in 30 seconds, and I am firmly of the opinion that he will trot a mile this fall in 2:06 or better.

Fee, $75 the season with return privilege. Mares pastured at usual rates and accorded best of care, but no responsibility assumed for accidents or escapes. Service fee and pasture bills must be paid before removal of mares. Address for all particulars

L. H. TODHUNTER, Owner, Sacramento, Cal.

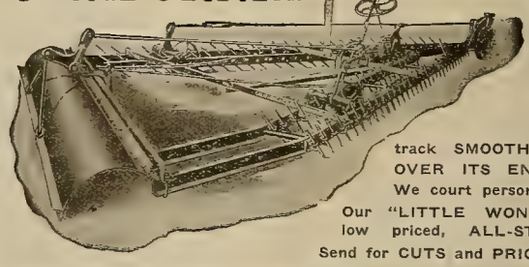
JAMES THOMPSON, San Jose Driving Park, San Jose, Cal

The Year Book For 1914

VOLUME 30

Will be ready about March 10. Will contain over 900 pages, with same tables as heretofore.

Price $3.00 f. o. b. Chicago



If desired sent prepaid remit 25 cents additional. Please make all remittances by draft on New York or Chicago, or money order.

WOODLAND STOCK FARM

INCORPORATED

Offers for Service for the Season of 1915

PRINCE ANSEL

CERT. 1062

2, 2:20½ A. T. R. 29220

Sire of

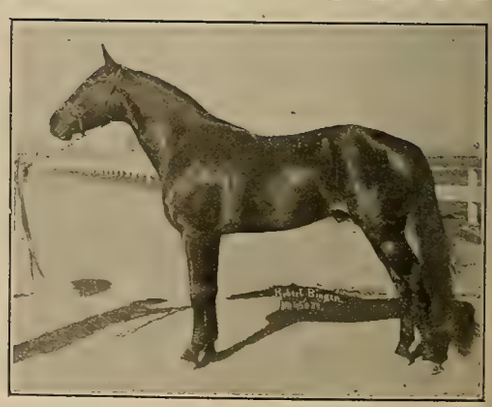
Prince Lot 2:07¾
Joseph Ansel (3) 2:12¾
Lottie Ansel (2) 2:14¼
Laura Rogers 2:11¼
Adansel (3) 2:14½
Arista Ansel (2) 2:18¼, etc.

And the dams of

John Malcolm (2) 2:11½, etc.

PRINCE ANSEL is not only doing more than any other individual to perpetuate the fame of the great family of **Dexter Prince**, but he has few rivals in the land as a progenitor of futurity winning youngsters, as attested by the summaries of coast classics year by year. His qualities as a sire are fully proven and breeders sending mares to his court have every assurance that the resultant foals will possess soundness, high individual excellence, and early and extreme speed. None better bred—none more highly esteemed by horsemen in general. **Fee, $50 with usual return privilege.**

ROBERT BINGEN



CERT. 1061

2:11¼ A. T. R. 45033

Best Bred Son of

BINGEN 2:06 1-4

Sire of **Uhlan 1:58**; 14 in 2:10
First dam **Episode 2:18** half sister to Peter the Great 2:07¼
Second dam **Santos**, dam of Peter the Great 2:07¾, J. Malcolm Forbes 2:08, etc.

ROBERT BINGEN, in every way one of the most desirable horses ever offered for service in California, represents the families whose blood is most eagerly sought by successful breeders today—Bingen and Peter the Great. His inheritance is of the kind that is breeding on most spectacularly and that he will found for himself a remarkable trotting dynasty seems inevitable. Bred right, built right, gaited right, and his few foals show that he breeds right. He is the only son of Bingen standing for service in California and his book is rapidly filling. **Fee, $75 by the season.**

BOTH STALLIONS LICENSED PURE BRED

JOHN W. CONSIDINE, PRESIDENT

Mares sent to these stallions will be cared for at $5.00 per month on pasture; $10.00 per month in box stalls. Colts entered in all the Futurities, Brood Mares, Racing Prospects and Saddle Horses for sale at all times. Correspondence solicited, visitors cordially welcomed. Address **HARRY DOWLING, Supt., Woodland, Cal.**

COPA DE ORO 1:59
WINNING PERFORMANCE

DURFEE'S STALLIONS

CARLOKIN 2:07 1-2
EXHIBITION MILE 2:05 1-4

Champion Pacing Stallion of the West and Sire of a Champion

Reg. No. 52785. Licensed Pure Bred. Cert. No. 1037

Golden Bay. Height 15.3½. Weight 1160.

Sire of CONTENTION B. (2) 2:24¼, (3) 2:08¼, the latter mark a world's record when made, and but one-quarter of a second removed from present record for three-year-old pacing geldings. Public trial (3) 2:07¼. Also sire of

Chango p. (3).....2:12¼ — 2-yr.-old record 2:13½. — Trial (3) 2:09

De Ora (3) .....2:17 — 2-yr.-old record 2:27¼. — Gold Lily p. (2)....2:24½

Patrick de Oro p (3)2:22¼, trial (3) 2:08¼, ½-mi. track

Copa de Oro has been retired to the stud for but a very few years and these are from his first foals. Where can you find a stallion whose get have made an equal showing?

COPA DE ORO is the fastest son of Nutwood Wilkes 2:16½ (sire of 8 in 2:10); first dam Atherine 2:16¾ (great brood mare) by Patron 2:14¼, sire of the dams of 7 in 2:10; second dam Athene (dam of 2 trotters, etc.) by Harold 413, sire of Maud S. 2:08¾ and the dams of 6 in 2:10; third dam Minerva (great brood mare) by Pilot Jr. 12, sire of the dams of Maud S. 2:08¾ and 3 others in 2:10, etc. He is one of the handsomest horses in the world, as well as one of the fastest, and is undoubtedly the best bred of all extremely fast pacing sires. From the first I heralded him as the Coast's future great pacing sire, and the performances of his youngsters recorded above certainly show that I had most excellent grounds for that belief.

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred. Cert. No. 1038

Mahogany Bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

Ethel D. (3).....2:11 — Johnny Dugan p (3)2:16 — John Warwick (2) 2:17 — The Lark (3).....2:18½ — Carl (2) .....2:19¾ — Miss Carlokin p ....2:20 — Carsto (2) .....2:22½ — Carlschen (2) 2:23

Helen Belle (2)....2:22½ — Nicola B. (2).....2:23½ — Santiago (3) .....2:24¼ — May Marian p (3)..2:24¼ — Carlrich p (2) .....2:24½ — El Carbine (2).....2:27½ — Eileen C. (3) .....2:29 — Carlos (2) .....2:29¾ — Fuiton G. (2).....2:30

CARLOKIN is the best bred son fo McKinney 2:11¼, foremost among the progenitors of 2:10 speed, being out of that sterling producing matron Carlotta Wilkes (dam of Inferlotta 2:04¾, Mary Dillon 2:06¼, Guy Borden 2:07¼, Carlokin 2:07½, and 6 others in 2:30) by Charley Wilkes 3653; second dam Aspasia (dam of 4) by Alcantara 2:23, sire of the dams of 20 in 2:10; third dam Miss Buchanan (dam of 1) by Clark Chief 89, sire of the dams of 2 in 2:10, etc. Carlokin was not only a fast and rugged campaigner, but, point for point, one of the most ideal individuals ever foaled. I chose him from among all the best horses of the country as a prospective great sire, and in 1913-1914 his get won more coast futurities than those of all other sires combined. What more could you ask of them?

FEE: $75 For the Season, Usual Return Privilege

I am especially well equipped for caring for mares at reasonable rates in any way that owners may desire. Every attention will be given mares in my charge, but no responsibility is assumed for accidents or escapes. Further particulars may be had by applying to W. G. DURFEE, 2019 So. Figueroa St., Los Angeles, Cal.

Pleasanton Driving Park

offers for service for the season of 1915 the following stallions:

Joe Patchen II 2:03¼

Licensed Pure Bred—Cert. No. 1128.
A. T. R. No. 47491

BEST MONEY WINNING PACER

By JOE PATCHEN 2:01¼, sire of Dan Patch 1:55¼ and 6 others in 2:10. Dam, Bessie Bonehill 2:05¾ (dam of 2 in 2:10) by Empire Wilkes 2:29¼; second dam Arab Girl (dam of 7) by Crittenden 433, sire of the dams of 6 in 2:10.

Joe Patchen II comes from a long line of famous ancestors and is himself one of the best known and most popular pacers in America, with all the qualities of speed, stamina and individual excellence necessary to the making of a truly great horse—one of the kind you would expect to find after a glance over the array of famous performers owning allegiance to the families from which he comes. He is an excellent breeder, transmitting uniformly his own desirable characteristics and his few foals in California are promising to the highest degree.

Mahomet Watts 2:08¼

Licensed Pure Bred—Cert. No. 2312.
A. T. R. No. 51518.

AXWORTHY ELECTIONEER

By GEN. WATTS (3) 2:06¾, sire of three three-year-old trotters in 2:10. Dam Alia P. 2:21¼ (dam of 3) by Palo Alto 2:08¾, sire of the dams of 2 in 2:10; second dam Lula Wilkes (dam of 5), by George Wilkes 2:22, sire of the dams of 15 in 2:10.

Mahomet Watts is not only the fastest performer credited to Gen. Watts (3) 2:06¾ (whose breeding on qualities have been prime factors in the rise of the great house of the Axworthys) but he springs on the maternal side from the most firmly established families of champion producers—those of Electioneer and George Wilkes. He is a pleasing individual of fine finish and extreme speed, having a three-year-old record of 2:10 and being timed separately in a race last year in 2:05¼, whose services should be most welcome to California breeders.

Fee for Joe Patchen II or Mahomet Watts, $100 with usual return privilege

Service fee refunded to owners of mares bred to Mahomet Watts proving not with foal.

Vernon McKinney 2:01½

Licensed Pure Bred—Cert. No. 1126.
A. T. R. No. 53803.

FASTEST OF THE McKINNEYS

By GUY McKINNEY 37625, son of McKinney 2:11¼, dam by Guy Wilkes. Dam Maud Vernon by Mount Vernon 2:15¼, sire of the dam of Leata J. 2:03, etc.; second dam Mag by Gen. McClellan, sire of the dam of Mack Mack 2:08, etc.

No member of the McKinney family excells Vernon McKinney in point of speed or individual excellence. He is a horse of much substance—16 hands, 1200 pounds—bred in lines of intense prolificacy and evidencing in every way his ability to "live up to his pedigree." No horse has greater natural speed or a more effortless way of going. He is a sure breeder and his youngsters are the readiest sellers of their age in California—a statement proven by recent sales and tentative offerings for the get of mares due to foal to him this year.

Zomblack 2:26, tr. 3, 2:08¾

Licensed Pure Bred—Cert. No. 1127.
A. T. R. No. 54955

BEST SON OF ZOMBRO

By ZOMBRO 2:11, sire of twenty and the dams of three in 2:10. Dam, Madeline Marshall (dam of 2) by Demonio 2:11¼, sire of 7 and dam of 1 in 2:10; second dam Mamie Comet (dam of 3) by Nutwood 2:18¾, sire of 2 and dams of 21 in 2:10.

Zomblack is one of the handsomest horses ever foaled in California as well as one of the fastest. His extreme speed came to him early and naturally, and he is unexcelled in size and conformation—an ideal type of the American trotter in every important respect. He is intensely bred in speed producing lines and we have no hesitation in advancing the claim that he is the very best son of Zombro 2:11, in his turn the best son of McKinney. In every instance the families represented in his pedigree are breeding on most successfully.

Fee for Vernon McKinney or Zomblack, $50 with usual return privilege

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

WORLD'S CHAMPION YEARLING TROTTING STALLION 1910
Unbeaten Two-Year-Old in 1911

Winner of California State Fair and Pacific Coast Breeders' Association Futurities in 1912. Record in Third Heat of a Winning Race.

Also holder of the World's Record of a Five-Heat Race by a 3-yr.-old Stallion

Limited number of approved mares at $100 the season.

WILBUR LOU was bred to seven (7) mares in 1912 and got seven (7) foals; six (6) were trained, on the property of John Christiansen, of San Francisco, which was said to be the fastest yearling on the Pacific Coast.

The five (5) owned by the Hemet Stock Farm showed as follows:

FIESTA LOU, record 2:25, half-mile track, ½ mile—1:08¾
SELMA PALEY, trotted ½ mile 1:13¾; one-eighth— :17¾
GOLDSMITH LOU " ¼ mile :35½
GERTRUDE RIVES " ¼ mile :36¾
BILLIE BOYD " ¼ mile :38

This includes the entire get of WILBUR LOU.

KINNEY de LOPEZ 2:23,

Son of KINNEY LOU 2:07¾ and BETSY DIRECT by Direct 2:05½

$50 THE SEASON

KINNEY DE LOPEZ is the sire of DON DE LOPEZ, trial one-half as a yearling 1:13¾, one-eighth 17½ seconds; could have trotted in standard time as a yearling. KINNEY DE LOPEZ is certain to sire early speed.

Terms: Cash at time of service with usual return privilege, or money refunded at our option. Excellent pasturage and best of care taken of mares, but no responsibility assumed for accidents or escapes.

BREED TO THE COAST'S CHAMPION CAMPAIGNER AND FUTURITY SIRE

JIM LOGAN 2:01¾

(3) 2:05½, world's record to 1912 and yet the fastest third heat ever paced by stallion of that age; (5) 2:04¼, (6) 2:03¼, (7) 2:02¾, (8) 2:01¾, race record for Pacific Coast.

Licensed Pure Bred—Cert. No. 1028.
All winning race records. Registry No. 44997.

Sire of MAXINE (3) 2:15 Winner Pacing Division Pacific Breeders Futurity 1914

Trial in 2:09, half in 1:01, quarter in :29 as a three-year-old.

Son of CHARLES DERBY 2:20, brother to Klatawah (3) 2:05½, etc., and sire of TEN in 2:10.

Dam, EFFIE LOGAN, California's greatest producer of extreme speed (dam of Jim Logan 2:01¾, Sir Albert S. 2:03¾, and Dan Logan 2:07½, sire of John Malcolm (2) 2:11½, champion two-year-old of 1913), by Durfee 11256; second dam Ripple, by Prompter 2305, sire of the dam of Gratt 2:02¼, etc.; third dam Grace (dam of Daedalion 2:08½, Creole 2:15 and Eagle 2:19½), by Buccaneer 2656, sire of the dams of 2 in 2:10; fourth dam Mary, great broodmare, by Flaxtail.

JIM LOGAN is not only a horse of most acceptable size and pleasing conformation, but is one of the most rugged campaigners ever raced. After acquiring a world's record as a three-year-old he reduced his record every year raced and is a sound horse today—no more eloquent testimony of his genuine natural qualities could be given. Of his very few living foals, every one trained has shown speed in convincing quantity, and the only one to be raced, Maxine (3) 2:15, began her career as a futurity winner. Could you ask more of a well bred horse than that he be a champion campaigner and transmit his qualities to his get?

In the stud, season of 1915, at Woodland Race Track

FEE: $50 for season, with usual return privilege, or $75 to insure living colt. Fees payable at time of service or before removal of mares. Excellent pasture at $5 per month, with best of care for mares, though no responsibility will be assumed for accidents or escapes. Call at race track, or address

Grandly Bred A Colt Trotter A Proven Sire

Bon McKinney 51480

Cal. State License. Pure Bred No. 1213.
Three-year-old record 2:24½; trial (3) 2:15, 1:05.
Sire of

Bon Courage (2) 2:12¾ **Bon Bell (3) 2:17¾**

Son of BON VOYAGE 2:08 and DAPHNE McKINNEY (dam of Frank N. 2:07¼, etc.), by McKinney 2:11¼; second dam La Moscovita (dam of Bon Guy (3) 2:11¾ and 2 others) by Guy Wilkes 2:15¾; third, fourth and fifth dams also in great brood mare list. Bay horse, in every respect a great individual, with substance, finish, and natural, frictionless trotting action. Very sure foal getter and a steadily rising young sire, his few foals possessing his most excellent qualities to a marked degree. Bon Courage was the only California bred three-year-old to win a heat from Esperanza in 1914.

In the stud, season of 1915, at the **Rush & Haile Ranch, Suisun, Cal.**, season closing August 1st. **Fee, $25 with return privilege**, payable cash at time of removal of mare. Good pasturage at $2.50 per month. For further particulars address

KEEFER & SPENCER, Pleasanton, Cal.

1915 WINRACE —and— ELIGIBILITY BOOK

The National Trotting Association Winrace and Eligibility Book for 1915 is now ready for delivery. It is a work of 858 pages, bound in cloth and contains official reports of all races and time record meetings held by members of the National and American Trotting Associations as well as copies of all special reports received by the two Associations. and all reports of non-association meetings which appeared in the columns of the turf and daily papers in 1914 as well as an index giving the starts made by each horse. In addition to this, it also contains an Eligibility List which presents the names of all live horses that acquired records or winraces in 1912, 1913 and 1914. When a winrace was made over a mile track it is designated by the letter (m) and if a horse also has a winrace over a half mile track within the four seconds limit fixed by the rule, it is also given and marked (½m).

Last year after the new eligibility rule was adopted, the National Trotting Association issued a Winrace and Eligibility Book, which covered 1912 and 1913. It assisted materially in the application of the new rule, but members and horse owners were frequently in doubt as to whether a horse was entitled to a time allowance. This resulted in a very voluminous correspondence and in order to obviate it in 1915, the present book has been compiled and issued as approved by the President under an order of the Board of Review.

In the matter of time allowance, a horse with a winrace is allowed one second for each year, if raced, in which he fails to equal or reduce his record or win a race, providing same is claimed by the nominator when making the entry. If a horse was not raced in 1914, he is not entitled to a time allowance and a reference to the index in this book will show whether he was raced or not, while by referring to the summaries, it can be determined whether he equaled or reduced his record or won a race. Also in order to give all the information possible, the reports of meetings contain all races at half mile heats as well as at mile.

This book presents reports of 1,400 meetings at which 12,673 horses started in 8,730 races and 939 performances against time, for which the premiums amounted to $3,228,617.82, while the Eligibility List presents the names of over 14,099 horses.

The 1915 Winrace and Eligibility Book will be sent postage prepaid to any address for $2.00 by

THE BREEDER AND SPORTSMAN
P. O. Drawer 447,

FOR SALE

Hallie D 2:08¼

by WALTER DIRECT 2:05¾, sire of Napoleon Direct 2:02½ (winner of $13,950 in 1914), The Assessor 2:04¼ (winner of $5,790 in 1914), Merry Direct 2:06¾ (1914), Walter Hal 2:04, Manitoba 2:04¾, Annie Laury 2:07¼, Hallie D. 2:08¼, Hallie Direct 2:09¾, etc.

First dam Hallie Dillard by Brown Hal 2:12½, sire of Star Pointer 1:59¼, twelve others in 2:10, and the dams of twelve in 2:10, including Flower Direct 2:01, Braden Direct 2:01½, etc.

Second dam Annie Pointer (dam of Hal Dillard 2:04¾, etc.) by John Dillard Jr., sire of the dams of two in 2:10.

As a five-year-old this mare was one of the best campaigners of the west, starting eighteen times, usually over half-mile tracks, often starting twice in a three or four day meeting. She was eight times first, twice second, five times third, once fourth and but twice unplaced. She took her record in the third heat of a winning race over the half-mile track at Eureka, Kansas (her second start in three days), equaling that mark at Muskogee and repeatedly beating 2:10 on two-lap tracks.

She is right in every way, better than a 2:05 pacer on a mile track and there are none better to take to the twice-arounds. Is bred to make a great procer of speed after her racing days are over, as her blood inheritance from both sire and dam is proven beyond question by any number of fast performers. She is in excellent condition to prepare for a campaign in 1915, and can be seen at Salinas, in the care of Henry Helman. Address or call on for further particulars,

CHARLES H. NEWCOMB
PHILADELPHIA, PA.

"Trapshooting IS THE Sport of Kings"

So says Charles H. Newcomb One of Pennsylvania's Leading Amateur Shooters.

(From The Philadelphia Press, February 21st, 1915)

"TRAPSHOOTING is rightly called 'The Sport of Kings and Princes','' says Mr. Newcomb, ''because we find 'The Prince of Good Fellows' a follower of same. The degree of clean cut competitive sportsmanship exhibited in this sport, stands in a class by itself. We have all heard the old saying, 'show me a lover of a gun and dog, and I will show you a good fellow,' and it applies equally to trapshooting.

As a recreation, it is one of the best, as naturally the tired and worried business man cannot get out with a crowd of such friends as he finds in this game, without being benefited. Furthermore, he cannot be successful at the traps without putting his mind on the game, as concentration of mind is one of the fundamental principles of trapshooting. In doing this he is giving his brain a rest from business worries of the past and strengthening and clearing it for future problems.

It is also a very beneficial physical exercise. In fact it is only another demonstration of a popular form of exercise that was very much exploited a few years since, viz., the act of making one's muscles rigid and then relaxing, repeating same a number of times. This is exactly what the trapshooter does as he calls, ''pull.'' His muscles are tense, and at the recoil of the gun relax, which performance he repeats one hundred to two hundred times per day as the program may call for. When the shoot is over he knows by his tired muscles that he has had all the exercise he needs for one day.

It is also a sport where quick judgment is necessary, as well as quick action. In fact all of its environments are beneficial, as it occupies the mind, eye and muscles, and trains them to act in unison.''

VICTORIES OF PARAMOUNT **PARKER GUNS 1915**

Look, Read, Remember!!!

At the Pinehurst Mid-Winter Handicap Shoot the four contestants making the highest scores in the preliminary event all shot Parker Guns.

RATHER STARTLING, ISN'T IT?

In the main event, the PINEHURST HANDICAP, Mr. S. A. Huntley, although placed further back than any other contestant, scored

95 out of 100 Targets at 23 Yards

and landed the Trophy. Furthermore Mr. Huntley was high over all for the entire tournament, and as usual shot his 34-inch barrel PARKER GUN.

In 1914 Parker Guns won **The Grand American Handicap, The National Championship** at single and double targets, the

FIRST and SECOND YEARLY AVERAGES

and made the best scores on the Pacific Coast.

Follow the pace set by the champions of America and for either single or double target shooting use

Entries for all above races for the FALL MEETING close on April 1st, 1915, except Nos. 2, 3, 8, 14, 18, 21, 24, 26, 33, 36, 38 and 39.

CONDITIONS FOR ALL RACES CLOSING APRIL 1st, 1915.

All races three heats, money divided 25 per cent to the first heat, 25 per cent to the second heat, 25 per cent to the third heat, and 25 per cent to the race according to rank in the summary. Money in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

Nominators have the right of entering two or more horses in any race by the payment of two per cent. additional on each horse, but only one of the horses so entered to be started in the race, and the starter is to be named by 5 o'clock p. m. the day before the race is to take place.

Entries to close Monday, April 1st, 1915.

Nominators who make entries and ship horses from east of the Rocky Mountains will be given $50 towards the return to points east of the Rocky Mountains on such horses as start in any of the races and fail to win any money.

Entrance fee, three per cent, due at time entries close, two per cent. additional if not declared out on or before June 1, 1915, for the Summer Meeting and on or before August 1, 1915, for the Fall Meeting. Declarations must be paid in full at time of declaring out or declaration will not be accepted. Usual five per cent. additional from winners in all races except Futurity Stakes, Occident and Stanford Stakes.

Professional drivers will not be permitted to drive in Amateur and Driving Club Races. Hopples barred in Amateur and Driving Club Races.

The Management reserves the right to declare two starters a walkover. When only two start they may contest for the entrance money paid in, divided 66 2-3 per cent. to the first and 33 1-3 per cent. to the second horse. A horse distancing the field shall be entitled to first and fourth money only and in no other case will a horse be entitled to more than one money.

The Management reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause.

Entries not declared out by 5 o'clock p. m. the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.

The Management reserves the right to start any heat after the fourth score, regardless of the position of the horses.

All Stakes are guaranteed by the Panama-Pacific International Exposition for the amount offered and are for the amount offered only.

Records made against time, i.e., breeders' records, and records made in a losing race, shall not be a bar to class eligibility.

Any horse that started in 1914 without improving its record, equaling its record and not winning a race, shall be entitled to one second.

The owner hereby releases the Panama-Pacific International Exposition from all liability of every kind and character on account of loss, damage or injury to horses or other property said owner may have on said Exposition grounds; and further agrees to abide by all the rules of the said Exposition, especially as to the use of track for working out as well as for racing, use of stalls, paddock, wearing of colors, uniforms, numbers and general conduct of all employees.

CONDITIONS FOR $20,000 STAKES—FINAL CLOSING DATE JUNE 1st, 1915.

SUMMER MEETING

No. 17—2:10 CLASS TROTTING.....$20,000
No. 33—2:06 CLASS PACING $20,000

FALL MEETING

No. 2—2:10 CLASS TROTTING $20,000
No. 39—2:06 CLASS PACING $20,000

ENTRIES MADE JUNE 1, 1915, $1000 TO START.

Horses to be named with entry. Entrance fee to accompany nomination. Horses must be eligible on Jan. 1, 1915, to stakes in which they are entered. Stakes divided $5000 to the first heat, $5000 to the second heat, $5000 to the third heat and $5000 according to rank in summary. Moneys divided 50, 25, 15 and 10 per cent. $20,000 Stakes mile heats, 3 in 5. No race longer than five heats, and moneys in races not decided before the fifth heat will be divided according to rank in the summary at the termination of the fifth heat.

A horse with a record shall be allowed one second for each year, if raced, in which it fails to equal or reduce its record or win a race, if same is claimed by the nominator when making the entry.

Time allowances according to National Trotting Association rules.

(STAKES GUARANTEED BY THE PANAMA-PACIFIC EXPOSITION)

Members of National Trotting Association and American Trotting Association. National Trotting Association rules to govern.
For entry blanks and further particulars, address

F. W. KELLEY, Secretary Race Meetings,
Live Stock Department, Exposition Grounds, San Francisco, Cal.

Derbertha Bells

Licensed Pure Bred. Cert. No. 1172.

NO. 60907 A. T. R. RULE 1.

DERBERTHA BELLS, foaled 1911, stands 15.3, weighs 1200 pounds, and is of magnificent conformation, style, trotting action and color; being a solid dark bay or brown with splendid mane and tail, massive well-formed limbs and feet, beautiful neck and head, fine, well set ear and eye as kindly as a fawn's and as courageous as a lion's. His breeding can only be hinted at here as he traces 20 times to Hambletonian 10—5 through Electioneer, 5 through George Wilkes, 4 through Strathmore and 4 through Abdallah 15 (the big four of the sons of Hambletonian), and twice through his daughters. This breeding is perfectly balanced by 18 crosses to Mamb. Chief 11—5 of these through his greatest son Mamb. Patchen 58 (leading progenitor of the dams of trotting sires), backed up by 2 crosses to Pilot Jr. 12, 4 to Black Hawk 5, 4 to Imp. Trustee and crosses to such other famous broodmare sires as American Star, The Moor, A. W. Richmond, Williamson's Belmont, etc.

I challenge any man to name a stallion with a broodmare inheritance approaching that of Derbertha Bells,—5 crosses to Green Mountain Maid (dam of 9 and Electioneer), 3 to Alma Mater (dam of 8 and 7 sires, including Alcyone and Alcantara), and 1 each to Miss Russell (dam of 7, including Maud S. 2:08¾ and 6 sires, including Nutwood), Dolly (dam of 4 and 5 sires, including Director, Onward and Thorndale), Beautiful Bells (dam of 11, including 4 world's champions and 10 sires) and Minnehaha (dam of 8 and 6 sires). These are pre-eminently the greatest mares of history in point of number of descendants in the standard list, besides 2 crosses to Bertha, the only mare with 2 in 2:04½, 5 in 2:10 and 13 in the list. Counting duplicates this pedigree contains the blood of 20 mares with an average of 9 performers each, and of the 14 mares appearing in the pedigree of two or more 2:10 trotters in 1910 this pedigree contains 8.

His disposition and deportment are in perfect harmony with his superlative breeding and conformation, all that could be desired. I own a yearling filly by him that stamps him as a sire of the first rank, and I invite the most critical inspection both of him and his get. He will be allowed a few choice mares at $25.00 the season with usual return privilege. Tabulated pedigree upon request.

J. W. PENDLETON, Owner,
1601 Seminary Ave., OAKLAND, CAL.

Grandly Bred A Colt Trotter A Proven Sire

Bon McKinney 51480

Cal. State License. Pure Bred No. 1213.
Three-year-old record 2:24½; trial (3) 2:15, 1:05.

Sire of

Bon Courage (2) 2:12¾ **Bon Bell (3) 2:17¾**

Son of BON VOYAGE 2:08 and DAPHNE McKINNEY (dam of Frank N. 2:07¼, etc.), by McKinney 2:11¼; second dam La Moscovita (dam of Bon Guy (3) 2:11¾ and 2 others) by Guy Wilkes 2:15¼; third, fourth and fifth dams also in great brood mare list. Bay horse, in every respect a great individual, with substance, finish, and natural, frictionless trotting action. Very sure foal getter and a steadily rising young sire, his few foals possessing his most excellent qualities to a marked degree. Bon Courage was the only California bred three-year-old to win a heat from Esperanza in 1914.

In the stud, season of 1915, at the Rush & Haile Ranch, Suisun, Cal., season closing August 1st. Fee, $25 with return privilege, payable cash at time of removal of mare. Good pasturage at $2.50 per month. For further particulars address

BEN F. RUSH, Suisun, Cal.

THE ONLY SON OF JAY McGREGOR 2:07¼ ON THE PACIFIC COAST

ONWARD McGREGOR 3, 2:23 1-4

Yearling Trial Quarter in :33

Bay horse, black points. Height 16 hands, weight 1100 lbs. Licensed Non-Standard. Cert. No. 24.

First dam MARY GORDON 2:09¾ by Gordon 3127 (son of Onward 2:25¼); second dam Nell by Young Octoroon, sire of Shadow (dam of 4 and granddam of Peter the Great 2:07¼, J. Malcolm Forbes 2:08, etc. Will make a limited season of 20 mares at Pleasanton Driving Park at $35 with usual return privilege. Every mare bred to him this year will be nominated in the Breeders and State Fair Futurities for foals of 1916 and first payment made by his owner. Address for all particulars

BERT WEBSTER, Manager, Pleasanton, Cal.

BREEDER AND SPORTSMAN

urf and Sporting Authority on the Pacific Coast.

(Established 1882.)

Published every Saturday.

F. W. KELLEY, Proprietor.

FFICES: 363-365-366 PACIFIC BUILDING

Cor. of Market and Fourth Sts., San Francisco.

P. O. DRAWER 447.

ational Newspaper Bureau Agent, 219 East 23rd St., New York City.

ntered as Second Class Matter at San Francisco P. O.

erms—One year, $3; six months, $1.75; three months, $1. oreign postage $1 per year additional; Canadian postage 50c per year additional.

loney should be sent by Postal Order, draft or registered letter addressed to F. W. Kelley, P. O. Drawer 447, San Francisco, California.

ommunications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

STALLIONS ADVERTISED.

Woodland Stock Farm solicits high class consignments for the sale to be held at the farm on April 15.

◈ ◈ ◈

The third annual Southern Arizona Fair was held at Tucson on Thursday, Friday and Saturday of this week.

◈ ◈ ◈

The committee in charge of the P.-P. I. E. programs announced this week that hopples will be barred in amateur and driving club classes.

◈ ◈ ◈

The Horse Review states that Dan Harvey, whose whereabouts were recently sought by a California advertiser, is now a resident of Cooperstown, N. Y.

◈ ◈ ◈

Sam Bush is at the Salem, Oregon, track with a stable of six head, some of which suit the webfoot railbirds pretty thoroughly, according to the wireless reports.

◈ ◈ ◈

mare nominated.

The Horseman and Spirit of the Times futurity for foals of 1915 will be worth $20,000 as heretofore, but the entrance fee has been reduced to $1 on each

◈ ◈ ◈

Con Harkins of Stockton has booked to Keefer & Spencer's grandson of Bingen, The Proof (2) 2:29¾, a good trotting daughter of Silver Bow, with a trial in 2:23 in two months' work.

◈ ◈ ◈

Only a few more days until entries close for the P.-P. I. E. class purses—April first. Don't overlook any bets in making up your program, as you can get a number of starts.

◈ ◈ ◈

The first foal for 1915 at the International 1:55 Horse Farm at Savage, Minn., is a full brother to the brown horse Dazzle Patch 2:09¾, now at Pleasanton being fitted for the $20,000 pace at the fair.

◈ ◈ ◈

Sue Fletcher (dam of the good General Watts filly Miss Perfection (3) 2:09¼, owned by R. J. MacKenzie) by Tregantle 2:09¼, was recently bred to Peter Volo 2:03½ at Poughkeepsie. Sue Fletcher gives promise of becoming a very great producer, and is now owned by Miss K. L. Wilks of Galt, Ontario.

◈ ◈ ◈

Horsemen who have entries in Pacific Breeders Futurity No. Thirteen for foals of 1913 are reminded that a ten dollar payment is due on Thursday, April first. These foals are the two-year-olds that will race this fall at the P.-P. I. E. and care must be taken that these entries are not allowed to lapse.

◈ ◈ ◈

George Oliver, formerly of this city and the R. D. A. N. Y., now located at Salmon City, Idaho, where he is proprietor of the "Chester Ranch," blew into town from the West in time to attend the recent Midwinter sale. George was as brown as an Indian, and a group of his friends at the sale were busy trying to tack on to him some sort o' nom de plume that would fit. Mr. Oliver stated that there is a good half-mile track located near Salmon, and that they expected to have some sport there this summer, in addition to conducting a regular purse meeting. He will take several brood mares home with him—Trotter and Pacer.

All of our eastern contemporaries have "done themselves proud" with recent stallion and breeders' numbers, and we can heartily recommend all of them to horsemen for reading both entertaining and enlightening.

◈ ◈ ◈

Woodland Stock Farm has two brand new trotters, both fillies, both by Prince Ansel, one out of Ida Millerton 2:12¼ by Millerton 2:28¼ and the other out of Goldie McKinney by Prince McKinney 45079 (not the California Prince McKinney), grandam Kitty Todd by Todd.

◈ ◈ ◈

Al Russell, who wintered at St. Paul, Minn., has moved into training quarters at Lincoln, Neb., where he has Columbia Fire 2:04¾ and others owned by Mr. Bohanan, as well as a number of horses owned by Fremont parties. Al got a nasty hurt at Phoenix last fall and left that city with the aid of a cane, but has suffered no permanent injuries from his spill.

◈ ◈ ◈

D. O. Lively of the Department of Live Stock of the P.-P. I. E. received notice this week by cablegram that the Percheron Society of France will give six objects of art as supplementary prizes in the Percheron classes at the exposition shows. Further particulars follow by letter and will be announced in full upon receipt.

◈ ◈ ◈

The jawbone telegraph has sent out some real yarns this week, one of them telling of a half in 1:03 and some odd by Zomblack and Frank Perry, with the last eighth in nothin' at all, absolutely nothin'—while Ed Parker's three-year-old trotted in 2:19. And they do say that some of the days in Chicago are almost springlike!

◈ ◈ ◈

Oniska, dam of San Francisco 2:07¾ and others, was bought at New York by Harry Burgoyne of Walnut Hall Farm for $150 and was taken to the blue grass home of her famous son. She was in poor shape to sell, as she had traveled far during the winter and it told on her. Rosemint, dam of Arista Ansel (2) 2:18¼, brought a similar figure and went to H. F. Pierce of Stanstead, Quebec.

◈ ◈ ◈

A special meeting of the Board of Review of the National Trotting Association will be held at ten o'clock on the morning of Tuesday, May fourth, at the Murray Hill Hotel, New York, and will consider business arising in all of the districts. All communications intended for the consideration of the board at this meeting must be forwarded not later than April 20 to Secretary W. H. Gocher, Hartford.

◈ ◈ ◈

With plenty of racing in New York with "jawbone betting" and with pari-mutuels getting the right of way in Nevada, Arkansas, Arizona and perhaps Texas, things in horsedom begin to "look a little up." The pendulum swings just as far one way as it does the other, and a general return of fair racing conditions looms upon the horizon. California will eventually fall in line.

◈ ◈ ◈

During the beginning of the week four local horses will be shipped to San Francisco to race at the Panama exposition. Barney Barnes will take College Gent and Strathtell for Joe Carson, while W. W. Fleming will care for Senator Boy and Alberta Dillon for Mac Rochon. Mr. Rochon intended to send the Beaver along but now announces he will be trained at Fort William—Canadian Sportsman.

◈ ◈ ◈

A meeting of the Park Amateur Driving Club is called for next Monday evening, when some very important matters will come up for consideration concerning the future of the club's property near the Stadium. An offer has been made for this property and there is a division of sentiment toward the same, some members favoring a sale and others wishing to retain the property intact and proceed with the needed improvements. At Monday night's meeting a proposition will be considered to amend the by-laws to allow more than one membership to be held by an individual, which would allow those wishing to dispose of their holdings, at a figure commensurate with the pro rata sum that would be realized from an acceptance of the present offer.

◈ ◈ ◈

The Humboldt County Fair Association claims the dates of September 6 to 10 inclusive for their Twentieth Annual Exposition to be held at Ferndale. There is a good card of races for both harness horses and runners, the latter events open to all comers and the trotting and pacing classes limited to horses owned in Humboldt county prior to January first, 1915. The harness horse purses cover a good range, and run from a twenty dollar half mile buggy race for farmers to a free-for-all trot and pace for four hundred dollars, with the junior contingent cared for by a nice purse for two- and three-year-olds. Without a railroad and minus an appropriation from the state, Humboldt has maintained a successful fair for twenty years and has never failed to pay out. With its improved transportation facilities, a bit of state aid, and the same old brand of honest management that has made the former events successful, Ferndale and Humboldt county offer a beautiful opportunity for a district fair—and some day they will have it. Vice-President W. B. Alford states in a recent letter that they have gotten along nicely so far without the "services" of a racing commission, evidently agreeing with the Breeder and Sportsman that the commission bills introduced this year are less than bum jokes.

MAKE YOUR ENTRIES FOR THE P.-P. I. E.

With the automobile races passed into ancient history, Superintendent William Maxwell and his big force of men and teams have been busily engaged of late in getting the exposition track in shape for the purpose for which it was originally constructed, with the result that few if any signs remain of the days when it was the scene of two of the most entertaining gas buggy contests ever staged. Not only is it rapidly rounding into shape, but excellent shape, the opinion being practically unanimous among recent visitors to the grounds that Mr. Maxwell has laid a piece of dirt both safe and fast. Stable accommodations are in readiness and the forerunners of the racing contingent that will soon take up their quarters at the plant where the greatest meetings in history are to be conducted will find everything prepared for them that can add to comfort, convenience and efficiency.

With but a trifle over ten days remaining until the date of entry closing, everything points to big fields and big crowds in attendance, as horsemen in general have set the seal of approval upon the exposition programs and the crowd at the St. Patrick's Day horse show gave ample evidence of the popularity of the horse with great percentages of the visitors.

Never have more comprehensive or more generous programs been arranged by promoters of harness horse racing. Youngsters have been provided for in stakes already closed for the junior divisions at both gaits, and for both meetings there is an unprecedented array of class races ranging in time from free-for-all to events for green horses, in sums of from one to five thousand dollars, while the 2:06 pacers and 2:10 trotters have the great $20,000 stakes open to them, with entries not closing until June first.

Amateurs, also, have been accorded extensive recognition with a number of classes for purses of one and two thousand dollars, these events open to all who can qualify under the National rule defining an amateur driver as one who has never accepted wages or hire for his services as a trainer or driver. In the pacing events for amateurs hopples will not be allowed, the concensus of opinion being that a hoppled pacer is not properly a "fun horse."

All class races have been made on the plan that encourages snappy contests from the word to the finish, as seventy-five per cent of each purse is awarded on heat standings and the remainder on the standing in the summary at the end of the third heat, when the race ends unless two or more horses be tied for first position, in which case these horses only will race a deciding heat. Time allowance of the National Trotting Association will be recognized in determining eligibility, but must be specified by parties claiming same when entry is made. Breeder's and non winning race records do not constitute a bar. Horses may be entered for 3 per cent on April first, two per cent additional to start, or unless declared out on or before June first for the summer meeting or August first for the fall meeting. Two or more horses may be named in one race by paying one per cent additional on each horse, the starter to be named by 5:00 p. m. on the day before the race.

In fact, the conditions have been drawn in an earnest effort to provide a truly modern meeting on the plans most acceptable to horsemen the land over, in addition to which the promoters have gone one step further by offering to advance $50 per animal towards defraying the return expense of non money winning horses shipped here from east of the Rockies.

Under these conditions we recommend the P.-P. I. E. programs to your most careful consideration—and to your most liberal patronage.

MRS. BALDWIN GETS GREAT PERCHERONS

Pursuant to her intentions announced some time ago of making the Santa Anita ranch famous as a producer of utilitarian horses, Mrs. Anita Baldwin recently purchased in the east a number of the very best Percherons obtainable, securing them through the Dunham-McLaughlin Company of Wayne, Ill., and Oakland, from the famous Dunham establishment at the former city. These most recent purchases, with the stallions and mares obtained some time ago, will form a portion of the livestock display at the exposition until after the horse shows are all over in the fall, when they will be taken to their permanent home at Santa Anita.

The recent importation includes a number of mares famous in show rings either in this country or abroad—in some instances both—among them being the three-year-old Manon, winner of first award as the best mare of her age at the Minnesota State Fair last September (also winner of first prize in France at the Laferte show); the six-year-old mare Imprecise, one of the largest mares in America, that was awarded champion over all ages at Iowa State Fair, and winner of first prize at Lemans, France; another, Rising, three-year-old; Marcotte, first prize winner at Forest City Fair at Cleveland; Livia, winner of seven blue ribbons on the Ohio and Indiana Fair circuit last fall; the two-year-old Rising filly Cicely, and others.

Breeders are cautioned that they must not confuse the Stanford-Occident State No. One, which closed March first, with the Stanford-Occident Futurity No. One which closes Thursday, April first, as the latter stake is drawn on much more popular lines, which are considered elsewhere in this paper.

BREED TROTTERS THAT CAN RACE.

With the demand for trotters and pacers capable of winning on mile and half-mile tracks so great that the most ordinary prospect is given careful consideration by would-be purchasers, those who breed race horses have every reason to look forward to prosperous years. The public demands racing as one of its greatest out-of-door recreations and so long as this continues to be a fact there will be plenty of associations willing to provide the entertainment.

While race horses are in greater demand than ever, the breeder is also confronted with the fact that the market for trotting bred horses lacking in speed is not what it once was. Previously, if a breeder failed to produce a race horse he could sell the animal at a good price as a roadster, while matched pairs of good lookers commanded fancy prices. This condition, while an extremely satisfactory one from a financial standpoint, led too many breeders to become careless. They kept too many mares in the harem that never produced a money winning trotter. This filled the country with trotting bred horses that were valueless for the race track. To breed twenty or thirty colts and get one or two with ability to win was satisfactory so long as the twenty-odd could be sold at a profitable figure.

Breeders did not care and they did not seem to realize that while they were supposedly raising race horses, and had gotten the public to believe the trotter a race horse, they were getting away from their first intention. As a matter of fact, they were breeding roadsters and were content to get an occasional race horse.

If the breeders are to keep on breeding just trotters it would be as well to abolish all the present rules for registration with the exception of rule one. If, however, breeders intend to breed horses, there should be a new register and new methods. Breeders of rac horses make money but the old-fashioned breeders of trotters are not making as much money as formerly, because the demand for road horses is not so great as in years past. And this leads up to the situation that is confronting the breeders.

Will they keep on breeding just trotters, or will they concentrate their attention and devote their whole energies to breeding the race horse?

As noted above, no record has been kept of the percentage of trotting bred foals that develop into race horses. As a guess one might say that ten per cent. are race horses, although personally that seems to be too large. Assuming it to be correct, it would indicate that ninety per cent. of the efforts of the breeders is waste effort. That is considerable of an indictment, is it not? What manufacturing business would be considered a success if but ten per cent. of its goods were up to standard? A large number of trotting stallions are bred to from eighty to one hundred mares each year and yet the stallion that adds ten new performers to his list is the exception. Why is it that forty out of fifty foals do not take standard records? Of course, some are knocked out in training and others meet with accidents, but allowing for these, the percentage is woefully small.

The race horse breeder can make money, lots of it. What should the trotting horse breeder do to become a race horse breeder? He has to discard the trotting bred mares that do not foal race horses. Owners of stock farms have been content to purchase pedigrees. Formerly they paid little attention to the individual, but that day is gone. There are lots of mares being bred each year that are standard bred for five generations and may be all the stallions in the top cross have records, yet when the dams are considered it will be found that few of them have foaled colts with records. Perhaps some of the remote dams have foaled a mediocre performer. Is there any reason why such mares should be kept in the harem if one is trying to breed race horses?

Blood is essential and I would not advise keeping cold blooded mares on a stock farm, but the men who are going to breed race horses will have to consider more than blood. Or perhaps it would be better to say they will have to consider only performing blood, or blood that has and is producing performers.

Right here let us consider some of the methods of European breeders. Horse breeding is such a slow process that the passing of stock farms from father to son, with a certain amount of government direction and encouragement, is an advantage that cannot be disregarded. We cannot have that, but we may study the methods and results and may be able to apply some of the lessons. In one of the European countries no draft mare can be registered until she has proven that she is a worth-while matron. If over there it is considered essential that the mares must show fine colts, should it not be even more necessary when race horses are being produced? If the trotting bred dam had to produce a colt with a standard record before being eligible to registration, a whole lot of worthless well-bred mares would be eliminated from the register, or else a new register association would have to be formed.

The present register association has done excellent work in recording blood lines and this will be even more appreciated by the breeders of the future who will study the work of the early breeders in combining such blood as they had at hand and successfully evolving a new and great breed of horses. As a historical work for the student the present register will be invaluable. In the future there will have to be a ruthless pruning and thousands of richly bred trotting mares will have to be eliminated in order to form a race horse register. The breeder with a lot of well bred mares hesitates about destroying the registration papers of those that have failed to produce standard speed and selling them as just plain horses. He feels that he is doing the industry a great harm, for may not some one of these mares be bred to the right horse some day and produce a really fast race horse? There is such a chance, but it would be better to "destroy" the one more along with ninety-nine worthless ones. The latter, continued in use, serve to discourage a great many breeders until in disgust they chuck the whole business and the industry loses a man who might have attained fame and fortune with the proper foundation stock.

If out of a band of one hundred trotting bred mares the ninety non-producers of speed are eliminated from the breeding ranks by being sold for army or general purpose use, the profits from the resulting foals of the ten remainin mares will be something tangible. The saving in feed, care and service fees would be something enormous. The feed and training of the foals would be another great sum. Today all this expense, or a great part of it, has to be met with the profit from the ten mares producing race horses. If the latter do not happen to be sufficiently sensational to bring exceedingly fancy prices, then the breeder declares his farm a financial failure. Should the foals of the ten mares prove to be only fairly good race horses they would make a big profit for the breeder if he did not have to feed and care for the non-race-horse producing mares.

Russian statisticians claim that some ninety per cent of the trotting bred foals in that country have sufficient speed to take standard records. This is due in a great measure to the care with which the brood mares are selected. For instance, several fast trotting stallions that in this country were only ordinarily successful in siring speed, were able when mated with the Orloff mares to impart standard speed to from eighty to ninety per cent. of their foals. The Russian tracks are not as fast as the ones in this country, while the Russian trainers are certainly not the superiors of Americans as speed makers. The Russian breeders, being men of great wealth, can well effort to exercise great care in the selection of brood mares, and it must be said to their credit that they use rare good judgment. The results stated were possible, too, because of the small number of really fast stallions, so that in order not to overtax them only the best and proven mares were bred to them. Whether this had any bearing or not, it is evident that the owner of a four-minute trotting mare was not allowed to breed her just because he had the price. I have heard the owner of a stallion standing at a high figure—three figures—declare himself as follows: "That fellow has a mare with a couple of cold trotting crosses that cannot trot in three minutes. A few years from now he will be knocking my stallion because the colt he will have cannot beat 2:30." His stallion had a record of better than 2:10. However, he took the money and probably the farmer and scores of more like him, later declared there was "nothing in breeding race horses." He and his friends were not competent to judge, because they were not breeding race horses. They were sending mighty ordinary mares with considerable trotting blood but absolutely no race ability to the court of a good race horse.

Unfortunately, the sire cannot do it all. It was also fortunate for the industry that this stallion stood in a country where there were few fast mares and also none carrying fashionable blood lines. During his lifetime this stallion was bred to at least 1,500 mares. About fifty of the produce took standard records, which was an excellent showing, considering the class of mares sent to his court. The worst thing was that several hundred mares, incapable of taking records, were retained in the breeding business because they were by this stallion and this pedigree did not look so bad on paper. Scores of these mares were mated with really good stallions but, of course, mighty few foals resulted that took records. Possibly a few have won occasional races on half-mile tracks.

Hundreds of farmers have thought they were breeding race horses when they were merely breeding trotters, any many of the latter were not even good individuals. Owing in great measure to the persistent preachings of the turf journals, breeders have paid more attention to size and conformation in recent years. That was a big step forward. Now if they are going to breed race horses they have to take a more important step. The mares that cannot foal at least standard speed each year must be eliminated. Oh, no! The owners do not have to kill them, actually, but as far as the harem is concerned, the harem of the farm breeding race horses, they must be as dead. Their blue-blooded lineage must not save them.

Breeders recognize the importance and value of having record horses—fast ones—at the head of their stud. Now they must apply the same reasoning to the mares. If they do not they will not be breeding race horses.

There is a wealth of trotting material from which to make selections. There are lots of real diamonds. The task of selection will not be an easy one. Many an owner of a mare of high race horse quality has mated her with an unsuitable stallion because the latter happened to be owned by a friend of his and he was willing to sacrifice the services of the mare for a year on the altar of friendship. Most commendable in these commercial days when business recognizes no friends! Hundreds of others have lost their value to posterity because their owner picked a stallion because of his fee.

Things are very much mixed up and it will be no easy thing to make a beginning. The sentimentalist must be replaced by the scientist. The farms with a hundred brood mares will have to sacrifice fift perhaps more. The smaller farms may not have t eliminate so large a proportion in some instance while in others it will be greater. There will b much hesitation and questioning and there will b many mistakes. Of course there will be mistake The history of the trotter is full of them and th occasional instances where they have resulted ha pily, as when a famous breeder returned a mare t her own sire, have encouraged others, and othe were not so happy as when the producing qualitie of a queen of the turf were lost for a year in orde that the whim of introducing the thoroughbred blod close up might be gratified. A foal resulted, bu what a gain might have been made if she had bee bred to Bingen or some other great sire.

What the breeder must do if he is going to mak money is to stop breeding mere trotters and go t breeding race horses. When the breeder is sevent or eighty per cent. efficient in his industry he wil make money and lots of it.

In the meantime he has not got to lose money. Fa from it. The trotter makes the greatest saddle hors and when the European war is over all those armie will have to have good remounts and the farmer will have to replace the horses the armies hav seized. If the breeder is sure he has some culls an wishes to get rid of them immediately now is a goo time—the cannon ball does not stop to ask if th animal is a race horse or a cull. Go on, Mr. Breede and raise race horses and if you get a few that d not come up to the speed standard the man of leisur will purchase them for park use. The saddle path in Central Park are going to be made more use o than ever.

Never was there a more opportune time for th breeder to take account of stock, clean house an arrange to go ahead on progressive lines. Don't b afraid to discard mares about whose qualities ther is any doubt. This fear of disposing of trotting bre stock as just horses for common horse prices in th belief that the new owner may possibly secure a bar gain is the reason so many farms have become bur dened with "boarders" of a most expensive type There is not one chance in a hundred that there wil be any great bargains in the horses so disposed of not if the breeder has sufficient judgment to conduc a really successful farm. You have to take a chance use your best judgment and start in to build up a quality stock farm.

If in the past breeders had been willing to sell th trotters that did not measure up to race horse stand ards to the farmers at the price of farm horses, they would even now be in a position to do a good deal o experimenting with large studs with little or no expense. Unfortunately they expected race horse prices for all trotters and the farmers turned to the draft horse. The farm papers encouraged the farme in the use of the slow, sluggish mountains of flesh and the trotting people never disputed. The latte did not try to show the farmer that the trotter made a more useful animal on the average farm. In this way a big market for the non-race horse was lost and the belief of the public that the trotter is a racing machine, pure and simple, was encouraged.

In the show ring the trotter with tail docked has masqueraded as the hackney and the latter has ob tained credit not due him. Prizes that should have advertised the trotter have gone to other breeds. No organized body of trotting horse breeders has inter fered and demanded that the horse show associations give prizes for trotters and have all pedigrees in all classes published in the catalogs.

The edict has been allowed to stand that the trot ter is a race horse. Under this the old standard is valueless. A new standard must be evolved and the race horse breeders must live up to it.—George A. Ryan in the Western Horseman.

WOODLAND'S SPRING SALE.

On Thursday, April 15, there will be held at Woodland Stock Farm, Woodland, Cal., a sale of high class stock that should attract a good crowd of buyers from all over the coast. The farm has recently disposed of a lease that afforded them some high priced grazing and feed growing facilities and will cut down their band of horses to a number that the farm proper will support in first class shape, and the public will be given opportunity to make selections from their excellent offerings at its own figure. The farm's consignment includes a number of good brood mares, among them proven producers and some of them in foal, saddle horses, racing material, and some exceptionally choice youngsters, all staked, all well broken, and all trotters. Consignments of similar nature are solicited from parties wishing to market same, and assurance of ample publicity and the best possible "deal" is given unreservedly. Entries must be made not later than April 5th, to allow for cataloguing and advertising, and a most reasonable charge will be made to patrons of the event. All particulars may be obtained upon application to Supt. Harry Dowling.

On the heels of the news that the much berated lowly pacer, Sand Hill Pete 2:18¼, will be raced at the trot, comes word that two of his more aristocratic brethren, Tommy Horn 2:04½ and Oakdale 2:06¾, formerly raced as trotters and good ones at that, are being converted to the pace. Roy Owen still has Tommy out in Nebraska, and Lon McDonald's former mount is now in Fred Jamison's stable at Washington, Pa., and may be raced over the eastern twice arounds.

The Bingens

Nearly half a century ago, in the spring of the year 868, there were born in the east two foals of oppo- ite sex (one in New York state, the other in the lue Grass of old Kentucky) who were destined in ture years to find their way to the Golden Slope nd there found, through their union, a dynasty of rotters that is giving to the world many of its great- st light harness performers of today. The colt was lectioneer, the Blue Grass filly was May Queen :20, the son who was to add much luster to the amily name was May King 2:21¼, and we call the ynasty that has sprung from that line the Family of Bingen.

To the writer's notion, the Bingens are a most triking example of the part the dam plays in the roduction of speed, for from the beginning of the ine in the early day of the American trotter, the tallion has had a worthy mate. The dam of Elec- ioneer, famous old Green Mountain Maid, produced ot merely nine standard trotters, but four speed iring sons and five producing daughters, and the lam of May Queen, with fewer opportunities, laid a irm foundation for her claim to prolificacy in the irst generation. Jenny gave birth to two standard rotters to the cover of two stallions of different blood—King Almont 2:21¼ to Almont 33 and May Queen 2:20 to Norman 25—and the offspring of each nating in turn proved a fountainhead of trotting speed, King Almont becoming an established sire with a number in the list and producing sons and laughters, and May Queen's blood breeding on as hereafter noted. She was also the grandam of the rotters Pilgrimage 2:30 and West Egbert 2:29½, the atter a sire of some note, the dam of this pair being he resultant foal from her mating with a non stand- rd non speed siring son of Norman 25, another tes- imonial to the value of her blood as an agency for he begetting of speed and the controlling of gait.

Still a bit further may be traced the foundation of May Queen's worth, as Jenny was a daughter of Crockett's Arabian and Evelina by the old time pacer Davy Crockett. Through Crockett's Arabian is another excellent brood mare cross, as he was by Imp. Mokhladi and out of Kate Crockett (dam of Lula 2:15, by Norman 25, and grandam of Centella 2:21 and Star Hambletonian 2:23¾, a sire) by Imp. Hooten. While Lula produced no standard perform- ers in her first generation her blood has been per- petuated through her daughters, including Lulaneer by Electioneer and Lula Wilkes by George Wilkes, both matrons of a high degree of excellence.

May Queen was herself a trotter of merit, and emerged victress from a number of stoutly contested engagements in the middle seventies, having a total of some twenty-four or five heats to her credit and a record of 2:20 made in the fourth heat of a winning race at Utica, New York. Brought to California by Leland Stanford when past middle age for the aver- age horse she was bred to Electioneer in 1883, her first foal to the cover of the premier of Palo Alto being the bay filly Maiden 2:23, who became in turn the dam of the trotters Ourbells 2:25, Virginia 2:29¼ and Marston C. 2:19¼, the latter a sire. In 1885 she gave birth to Election, who became the sire of nearly a score of performers, and in 1886, at the age of eighteen, threw the brown colt to be known to fame as May King, these three foals by Electioneer being her only produce so far as is known to the writer.

It's a long, long way to Tipperary, if modern ballads are to be believed, and perhaps to some of the readers of this story it seems a long, long way to Bingen, but the writer confesses to a fondness for a sound foundation on the maternal side if great things are to be regularly expected in future years and coming generations, and the temptation to portray fairly fully that portion of the ancestry of May King was irresistible. Having disposed of the maternal inheritance of that good stallion, now pardon as well a backward turn to review the similar branch of the ancestry of Bingen himself.

Bingen's dam was Young Miss (dam of three trotters, two sires, three dams, with seven performers) by Young Jim, sire of the dams of five 2:10 performers, of whom Bingen 2:06¼ is the greatest. Young Miss was out of Miss Mambrino by Red Wilkes, sire of the dams of thirteen in 2:10 including Walnut Hall 2:08¼, sire of the world's champion trotting stallion The Harvester 2:01. (Incidentally it may not be out of place to remind those whose "forget- tories" are more efficient than their memories that Conductor 2:14¼, sire of Walnut Hall, etc., was also a Californian, being foaled at Palo Alto a year later than May King.) Miss Clark, third dam of Bingen, was a daughter of Alric 983 (son of Almont 33 and the great brood mare Queen Lizzie by Mambrino Chief); fourth dam Kate by Clark Chief, sire of the dams of two in 2:10; fifth dam Lida by Vandal, etc.

Bingen was foaled in Kentucky in 1893, the result of the mating by Smith McCann of Young Miss and May King, the latter then unknown to fame as a sire, though possessed of some distinction as a trotter. May King had previously been bred to but very few mares, and not until Bingen was a three-year-old was his place among sires established, Bingen taking a record of 2:12½ in 1896, with two older trotters also appearing and racing in standard time. From this modest beginning May King's representation has spread to include thirty-four performers, five speed siring sons and three producing daughters. Bingen was a great trotter as a five-year-old and also in the following year, which witnessed his permanent retirement to the stud.

His first performer was begotten as a two-year-old, but did not gain a record until 1901 at the age of five, the same year witnessing the appearance of the great son of Bingen and Nancy Hanks 2:04—Admiral Dewey (3) 2:13¼, the first of the family to trot in 2:10 (2:04¾). The first son to sire a 2:10 performer was Todd, whose initial representation in ultra select company was Kentucky Todd 2:08¾. Today the first generation (sons and daughters of Bingen) include one hundred and seventy-five performers, among them Uhlan 1:58, world's champion trotter at all hitches, and thirteen others in 2:10. Five 2:10 trotters, three of them three-year-olds, have been produced by his daughters, and the next generations are breeding right along in similar lines and speeds.

In the table of world's records at the close of the season of 1914, as published in the holiday edition of this paper, members of the family "registered" in over twenty-five instances, which is a fairly comprehensive condensed statement of their championship qualities.

While California has proved the original breeding ground for many championship families, she has at various times found herself "short" in after years on these same strains of blood, and has been compelled to draw upon the east for stallions to perpetuate families founded within her boundaries, the forerunners of the same having been exported to the last member. Such has been the case with the Bingens, as May King was sold as a colt, as was Election, and only in recent years have California breeders had local access to the services of members of the family—first The Proof (2) 2:29¾, a grandson, owned by Keefer & Spencer, now at Pleasanton, and Robert Bingen 2:11¼, a son, established at Woodland Stock Farm.

It may also be mentioned "in passing" that when Californians invade the east for horseflesh they usually get "as good as they make 'em," and no exception has been made in either of these cases. Robert Bingen 2:11¼ is not only a most pleasing type of the family, but is bred on the maternal side in lines that have been most prolific, as his dam is Episode 2:18 (half-sister to Peter the Great 2:07¼, and dam of one performer, one sire of six (including one in 2:04¼) and the dam of Victor Forbes (2) 2:23¾) by Ambassador 2:21½, sire of the dams of Guy Nella 2:07¾, Sylvie T. 2:09¼, etc. His second dam is Santos (dam of Peter the Great 2:07¼, sire of thirty in 2:10; J. Malcolm Forbes 2:08 and five others, etc.) by Grand Sentinel 2:27¼; third dam Shadow (dam of four trotters, one sire of seven, one dam of seven) by Young Octoroon, sire of the dam of Mary Gordon 2:09¾, etc. Peter the Great is hailed as the "sire of the century," and the combination of proven potent. "breeding on" blood carried by Robert Bingen can hardly prove to be other than successful in the production of extreme and uniform speed. His first California foals are due to be dropped this year and their development will be watched with a great deal of interest.

The Proof, who has been longer in California, is a grandson of the head of the house, so that foals by him belong to the same generation as Anna Bradford (3) 2:00¾, Squantum, the three-year-old that forced her to step to this record and was himself timed in 2:01¾, Etawah 2:03¼, Walter Cochato 2:02¼, Princess Todd (3) 2:09¼, and many others already widely known to fame. The Proof is by The Exponent 2:11¾, son of Bingen and Iva Dee, a producing daughter of the great Onward; The Exponent is owned at Maple Lawn Farm in Illinois, and at ten years of age his get include one yearling, twenty two-year-olds, six three-year-olds, and one five-year-old with a record of 2:08½ among a total of thirty-two that have gone into the list, making him one of the most highly respected sires in the middle west. Through his dam, also, The Proof inherits the strains of producing blood that afford the solid backing that is so envied on the maternal side, as his dam is Chord 2:27 (dam of four trotters, one sire) by Wilkes Boy 2:24½, whose daughters have produced eleven in 2:10; second dam Sonata (dam of three trotters, one sire, two dams of nine) by Dictator, sire of the dams of Nancy Hanks 2:04, Brace Girdle 2:04¼ and five others in 2:10. The produce of Sonata include Elfin Dance 2:27, dam of the great stake winning trotter Spanish Queen 2:04¼, Elfin Dance and Chord being full sisters. The Proof's third dam is the double producer Cadenza (whose merits as a matron are further enhanced by the performance of the offspring of her sons and daughters) by King Rene, sire of the dams of W. J. Lewis 2:06¼, Gen. Forrest 2:08, etc.; fourth dam Virgie Wilkes (dam of four, two sires, two dams) by Geo. Wilkes 2:22; fifth dam Cleopatra by American Clay 34, whose daughters were represented by a 2:10 trotter twenty years ago, when less than half a hundred horses had achieved that distinction.

The Proof's oldest foals are now two years of age and are coming rapidly at the trot and will have an opportunity to show their worth in the junior stakes this season. That both representatives of the family just referred to will sire speed of a very profitable nature seems almost inevitable, and with their services in easy access California breeders have no cause for complaint on the grounds of having no proper "Bingens" to which to breed their mares in the hope of getting trotters of the kind that have made the clan so popular and successful farther east.

C. A. HARRISON'S REMINISCENCES OF RUBY LIGHT.

Ruby Light, the bay mare that Lou Crellin raised at Ruby Hill winery, Pleasanton, Cal., was raced last year by a man named O'neal, and she won the 2:19 pace at Rutland, Vermont, half-mile track, on September 8, in straight heats, time 2:20½, 2:20¾, 2:19¼.

Ruby Light was sired by Aerolite G. 2:05¼, son of Searchlight 2:03¼, and was the last foal of Bertha, by Alcantara, one of the world's best brood mares. When Ruby Light was named, Lou Crellin gave a christening party at his winery, about three hundred horsemen being invited. Mr. Crellin had tally ho coaches, stage coaches, carriages and all sorts of vehicles to carry his guests from the depot at Pleasanton; arriving at the Crellin place the guests were received by Mr. and Mrs. Crellin and after the usual Crellin welcome and each guest being made to feel most comfortable, an elaborate feast was set before them consisting of nearly every known variety of eatables and drinkables. The particularly choice eatable was the bull's heads prepared in the original Spanish way.

After the feast was over Mr. Crellin conducted his guests all over the Ruby Hill wineries, and when this interesting expedition was over old Bertha was brought up on the lawn with her beautiful young daughter close beside her. A Mr. McDonald was made spokesman for the occasion, and Mr. McDonald knew the history of the great Bertha and in well chosen words he told all about each and every one of Bertha's sons and daughters. When he had finished about Bertha he called for a name for Bertha's beautiful filly. Well, everyone had a name; the writer had his mind set on Bertha-Light, but Mr. D. L. Hacket suggested the name Ruby Light in honor of Mr. Crellin's home, Ruby Hill, and Searchlight. Every one present voted for the name of Ruby Light and with as much good cheer and good wishes as if we were christening a real queen, Ruby Light was christened by Mr. Crellin's friends. After partaking of more of Mr. and Mrs. Crellin's hospitality the christening party said good bye to the Crellin household, and I know that if every man who was at that party is alive today—which I hope they all are—each and every man will remember that it was one of the most enjoyable parties ever given by a gentleman to his horsemen friends, while the writer will always think of Mr. Crellin's christening party as the one best picnic of his life.

I have watched Ruby Light's career and know she was a great two- and three-year-old, but she had a mishap in her four-year-old form and did not get over it. When Dick Wilson took her east two years ago, she got all off and was sold at New York sale. Tonight I picked up the Horse Review of September 23, 1914, and was looking over the reports and came across Ruby Light's name and her race which gave me the notion to write all this, which while I know it is ancient history, yet I believe that every man who was a guest at Ruby Hill will read with pleasure and each and every one will say with me, May Lou Crellin himself, his wife and family and fine horses, live for ever.

Old Bertha is gone to Horse Heaven but many of her sons, daughters and granddaughters and grandsons are making new harness horse history and will continue to do so.

Ruby Light is owned in Vermont Marble hills but her name will, I know, bring back a pleasant reminder to those who attended her christening at the Ruby Hill winery bome of one of California's best men and one of the world's best sportsmen.

Yours truly,

C. A. HARRISON.

GETAWAY DAY MADE DAN AND EDDIE NERVOUS.

"It was a busy day at the Savage farm. Dan himself seemed to scent in the atmosphere of hustle and bustle, prospective turf contests, admiring crowds and the like. He accordingly took a lively interest in the proceedings and displayed every evidence of his desire to join the family party.

"The entire population of the city of Savage, headed by Mayor E. J. Hanson and the local band, assembled at the station to witness the departure, the mayor making one of the clever speeches for which he is famous. He wishes the stable luck, and declared that the carload of glistening race horses, the war chests and the track paraphernalia had caused the lure of the turf to once more seize him with a wellnigh irresistible force. He opined that he was sorely tempted to forsake his municipal duties for the plebeian rub-rag and scraper, which he wielded so skillfully in the days of yore."

So runs the Spirit of the West's story of the departure of the International 1:55 Horse Farm's racing stable for Pleasanton early in the month, and if there is anything regrettable about the Dan Patch stable as it now stands in its new training quarters it is the absence of the "old boss" and Mayor Eddie Hanson. However, the fall horse shows will doubtless bring the farm's premier to the coast, and the big meetings at the fair—one or both of 'em—will just naturally cause the mayor to turn over his job to the constable and beat it for a seat right near the wire at the exposition track. Incidentally, His Honor has sent out some awful yarns about Dazzle Patch and that 2:06 pace—regular bear-cats! Nobody would be overly surprised if Eddie's yarns came true, either.

ST. PATRICK'S DAY HORSE SHOW.

Taking Wednesday's horse show at the Forum in the Live Stock Department of the P.-P. I. E. as a proper medium for gauging the part to be played by the horse in the doings of the big exposition at various dates, the management has made a strike of the first order in according so much prominence in its programs to this best of man's friends. A crowd estimated at ten thousand enthusiastic souls gathered in the stands surrounding the show rings and clear through a program of fifteen events gave hearty applause to the equine beauties that were put through fancy paces for their entertainment.

The kiddies started the show with their pet ponies, and officers and troopers from Uncle Sam's forces wound it up with a keenly contested class for high jumpers, the intervening program providing classes for the exhibition of a wide range of horses—ladies' jumpers, three and five gaited saddlers, cavalry chargers, saddle tandems, "cow horses," carriage pairs, and trotters, both single and double. A mile race to saddle brought out a nice contest which the crowd enjoyed hugely, and the performance of Mrs. R. J. MacKenzie's Quarrie Denmark, ridden by Mrs. Olive Beckman, handsomely and most appropriately clad, brought forth round after round of applause. Mrs. Beckman has trained Quarrie from the first and has made him one of the greatest highschool performers in the country. The handsome pair also appeared in the evening at the ball at the Auditorium and repeated the triumphs of their afternoon appearance, their presence adding much to the gayety of the closing celebration of the day.

Many of the winners at the recent Charity Horse Show reappeared in the classes in the Forum, with a goodly number of new faces appearing as well. Prominent among the "repeaters" were Dan Hoffman's entries, Tom Smith and Jonesie Mac; the handsome pairs from the Kelly Stables; Smiley Corbett, ridden by Mrs. Wand; E. C. Ford's Golden; Rex Mack, Delight, Black Bart and Gwendoline, Lady Barbara, Killarney, and a number of others. The day's awards were as follows:

First event, children's ponies, under 12 hands—First, Larua McGinn, riding Bonnie; second, Riding and Driving School entry, Silver; third, Thomas Privett, riding Prince.

Second event, children's ponies, over 12 hands and not exceeding 14.2—First, Nola I. Phillip, riding Joe; second, Riding and Driving School entry, Gold; third, Mary Lennon, riding Mary Ann.

Third event, pairs of trotters, stallions, mares or geldings over 15 hands—First, Dan Hoffman, driving Jonesie Mac and Tom Smith; second, Ed Kelly, driving McKay and Johnson; third, E. M. Doyle, driving Alto Trix and Peachey.

Fourth event, three-gaited saddle horses, stallions, mares or geldings exceeding 15.2, three years old or over—First, Mrs. E. H. Lockwood, riding Killarney; Lieutenant Wainwright, riding Jack; Edgar J. de Pue, riding Emiline.

Fifth event—Carriage pairs, mares or geldings, exceeding 13.2, 3 years old and over—First, Kelly stables, driving Starlight and Harriet; second, Kelly stables, driving Flood and Flannigan; third, Kelly stables, driving Pleasure and Pastime.

Sixth event—Stock horses, shown under stock saddles—First, S. T. Privett, with Midnight; second, Pedro Leon, with Star; third, G. A. Merchant, with Baldy.

Seventh event—Trotters: Stallions, mares or geldings, over 15 hands—First, J. J. Gethin, driving Sutton; second, D. E. Hoffman, driving Tom Smith; third, Thomas Nelson, driving Thomas N.

Eighth event—Saddle tandems, mares or geldings, exceeding 15 hands, manners and reinsmanship counting 30 per cent. First, Miss Mary Andrus, riding Rex Mack and Lee Rex; second, Mrs. Phil Wand, riding Black Bart and Gwendeline; third, Mrs. W. C. Ralston, riding Emiline and Delight.

Ninth event—Officers' chargers, over 15.1 hands, four years old and over: First, E. C. Ford, riding Golden; second, Lieutenant Wainwright, riding Jack; third, Joseph Speck, riding Splitt.

Tenth event—Horses suited for cavalry; mares or geldings, 4 years old and over, exceeding 15.1 hands: First, E. C. Ford, riding Golden; second, Sergeant Sorensen, riding Chief; third, Trooper Johnson, riding Chester.

Eleventh event—Five-gaited saddle horses, stallions, mares or geldings; all horses to show five distinct gaits: First, O. O. Youngren on GypsyJim; second, Miss Mary Andruss on Rex Mack; third, Henry Hewett on Lee Rex.

Twelfth event—Three-gaited saddle horses, stallions, mares or geldings: First, E. J. de Pue on Delight; second, Major J. G. Harbord on Halim; third, Miss Mauricia Mintzer on Lady Barbara.

Thirteenth event—Ladies' jumping exhibition; best performance over four consecutive hurdles 3 feet 6 inches high: First, Miss Mary Andruss on Wonderful; second, Mrs. Phil Wand on Santa Cruz.

Fourteenth event—One mile race, trotters under saddle: First, Mrs. Phil Wand on Smiley Corbett; second, J. J. Hewett on Allen; third, I. B. Dalziel on Cresto.

Fifteenth event—High jump, open to all: First, Sergeant W. C. Connor on Sugarbird; second, Trooper Johnson on Blue; third, Lieutenant Wainwright on Skyrocket. Highest jump, 5 feet.

ENGLISH RACES TO CONTINUE.

London, March 16.—The Jockey Club has decided to continue racing in spite of the war. The only change from times of peace will be the necessary curtailment of social functions in connection with the Epsom and Ascot meets. The club held at the residence of Lord Derby in London today a special meeting to decide the question, on which public opinion is divided so widely. After an exhaustive discussion the club confirmed its decision.

BOB COSGROVE RESIGNS.

After serving eleven years as secretary and manager of the Spokane, Wash., Interstate Fair, Robert H. Cosgrove has resigned, after gaining the reputation of building up the greatest fair in the Northwest. George P. Larsen, formerly secretary and manager of the Columbia River Interstate Fair at Vancouver, Wash, has been appointed to succeed him. This year's show at Spokane will be the twenty-second annual one, and advance notices give lots of promise on its quality.—Western Horseman.

IN TRAINING AT SALEM.

Salem, Oregon, Mch. 16, 1915.

The Willamette valley is famous, among other things, for having generous quantities of rain—these same showers being responsible directly for the generous incomes derived from agriculture by the residents of the valley—but no one could have found any fault with the winter and early spring just passed for conditioning horses. The track here has been pretty good all winter, and now is being worked daily and is in shape for much faster stepping than the local trainers are yet indulging in, though most of them are beginning to move along in pretty fair shape.

Sam Bush is here with a nice though not extensive stable, including the Zolock trotter McAlzo 2:21¼, out of Zodell by Zombro, and the green trotters Robin West by R. Ambush 2:09½, dam by Zombro, and Bon Diablo by Bonaday 2:11¼ and out of a Diablo mare.

Dean Swift 2:08, last season's fastest western trotting gelding, is in the Skaggs stable and is doing nicely, while Trainer Grant has J. C. Leggett's good pacer Francis J. 2:08 by The Patchen Boy (3) 2:10¾.

Ed Keyt has a stable of good ones including the trotting mare Wild Girl 2:19½ by Wild Nutling, dam Lucy B. by Geo. Washington 2:16, and her son Wild Boy by King Seal 2:09; a black colt by On Voyage 2:25¾, dam by Coeur d'Alene 2:19½; Edith M. by R. Ambush 2:09½, dam by Vinmont, and the green pacer Ilene by R. Ambush, dam by Coeur d'Alene.

John B. Stetson has one of the largest stables in the valley, and while the pacers predominate they are not unanimous, as John has one real good trotter in the bay mare Novela by Letrado (3) 2:25, dam by Alaska 2:29, bred at the Brook Nook Ranch in southern Montana. She is racy and rugged and worked last year in 2:17, with quarters in :31. The pacing contingent goes free legged for the most part and includes Excellency by Hal B. 2:04¼, dam by Sternberg 2:15½; Hal Onward by Hal B., dam Belle Onward by Shadeland Onward; Bonnie B. 2:17½ by Hal B., dam Alma K. by Bonnie Boy; Tosora (3) 2:26½ by The Patchen Boy (3) 2:10¾, dam Niquee 2:13¼ by Joe Patchen 2:01¼; Boniquee by Count Boni, dam Niquee 2:13¼, and Hal Regent by Hal B. 2:04¼, dam by Vice Regent. This is the lad that C. A. Harrison claims to have had "wished on him" by Mr. Stetson, and while C. A. was perfectly satisfied with the fellow as an individual, and liked the Hal B. part of the pedigree all right, he seemed a bit afraid of the maternal side. Listen: Vice Regent, who is himself a sire and has a further representation through both sexes of his get, is a full brother to Heir at Law 2:05¼, being by Mambrino King and out of Estabella (dam of six and grandam of Ess H. Kay 2:00¼, Lady of the Manor 2:04¼, etc.) by Alcantara 2:23. Hal Regent's second dam is Antonia (dam of A. Laundry 2:18, sire of a 2:10 performer; grandam of two trotters) by Electioneer; third dam Columbine (dam of four trotters, six sires, two producing daughters) by A. W. Richmond; fourth dam Columbia by Bonnie Scotland, and so on back to Sir Charles and Sir Archy. How J. C. Simpson or S. W. Parlin would revel in that pedigree! The chances are they would tell Clint his horse was all right if he only had a sire. Times do change, don't they. At any rate, in the jargon of Yesler Way, Clint should worry—not. —OREGON.

STANFOR-OCCIDENT FUTURITY No. ONE.

Close upon the heels of the Stanford-Occident Stake Number One for foals of 1914 to trot and pace in 1917, comes the announcement by the State Agricultural Society of its inauguration of a new series of events to be known as the Stanford-Occident Futurities, Number One of which series, for foals of mares covered in 1914, to trot and pace as three-year-olds in 1918, closes with Secretary Paine on Thursday, April first, 1915.

The sum of $5000 is guaranteed by the society, $3000 for trotters and $2000 for pacers, money to be divided and raced for under the same general plan as in the stake just closed, with these very important and pleasing exceptions—no percentage of any portion of the purse will be deducted from money winners, and a right of substitution is provided. This will make the futurity much more popular with breeders than was the stake, wherein no substitution clause was incorporated and in which most of them felt the money winners were heavily penalized.

Five dollars must accompany the entry on April first, $50 in all carrying same until ten days before the first day of the state fair of 1918, when starting payments of $50 on pacers and $100 on trotters must be made. The conditions are based on the popular three heat, every heat a race plan, and division is so made that the winner will find his efforts to have been decidedly worth while.

Following the lead set by Detroit and Cleveland in the matter of making their big trotting stakes for faster classes, Kalamazoo is now out with the announcement that her ten thousand dollar Paper Mills Stake is made for 2:07 trotters, while the three thousand dollar Burdick Hotel pace is for those eligible to the 2:09 class. Four events of two thousand dollars each are offered for 2:18 and 2:11 trotters and 2:17 and 2:06 pacers, these early closers to be supplemented later by an offering of fourteen class purses of one thousand dollars each.

The Alameda County Butchers will hang up $2350 for harness races at Pleasanton on July fifth.

◈ ◈ ◈

Lou Taylor, who for some months has occupied quarters at the Pleasanton Driving Park, transferred the scene of his activities this week to his former stand at the track at San Jose. Lou is an old favorite at that point, and as he had some San Jose horses to train he moved back so their owners could have the pleasure of seeing them work without inconvenience. The delegation there continues to increase steadily and the railbirds are beginning to twitter there as elsewhere.

◈ ◈ ◈

The Percheron Society of America favors the single judge system in their classes at the P.-P. I. E., and the directors have recommended the services of any one of the following gentlemen to the Department of Livestock as fully competent to officiate in that capacity: C. F. Curtiss, Ames, Iowa; William Bell, Wooster, Ohio; James M. Fletcher, Elgin, Illinois; J. L. DeLancey, Northfield, Minnesota, and W. E. Pritchard, Ottawa, Illinois. All are prominent in heavy horse circles.

◈ ◈ ◈

Visiting or resident horsemen will find everything in the way of "tack" and stable accessories always obtainable at the establishment of J. David West, 1265-67 Golden Gate avenue. Mr. West specializes on the well known "Sell" lines and can furnish anything desired on short notice. All standard veterinary remedies are also kept constantly on hand, and hurry up calls for "Giles," "Save the Horse," "Gombault's," "Reducine," "Absorbine," "Wonderworker" and the like will be promptly cared for.

◈ ◈ ◈

The northwest offers some nice training and racing grounds this year, in charge of competent men, and in every instance horsemen are taking advantage of the facilities offered to get their horses in shape for the season's activities later on. Joe Huber, Montana's "old reliable," has the Bozeman track, which is one of the best in the treasure state, and out on Puget Sound the half-mile tracks at Seattle and Everett are in the capable hands of P. J. McCormack and Sheriff Donald McRae, respectively. Fred Woodcock has the Forest Grove track, Fred T. Merrill is in charge of the Portland oval, and the "Lone Pine" course at Salem is in great shape—has been good nearly all winter and is now being worked daily.

◈ ◈ ◈

Just where he found the time to do it nobody knows, as he is always busy at something or other, but in Prince Arista Superintendent Harry Dowling of Woodland Stock Farm has developed an amazingly clever young high school saddler in a very short time. Less than two months has elapsed since the Prince's education in the "higher branches" commenced, and in that time he has not only developed five distinct gaits to an exceptional degree of perfection, but also has become "letter perfect" in a wide range of "stunts," which he goes through as though he enjoyed doing them thoroughly. It is a nice example of what a bit of patience and "savvy" can accomplish with a horse of brains and breeding.

◈ ◈ ◈

Roy Owen at West Point, Neb., is wintering a strong racing stable and from all indications he is getting ready to repeat what he did in 1912 and 1913, that of being the largest money winner racing on middle western half-mile tracks. His stable numbers Tommy Horn 2:04½ (now training on the pace); Shadeline p. 2:07¼; Sirlain p. 2:08¼; Bill Barleycorn p. 2:08¼; Glen Onward 2:14½; Lord Duke 2:15¼; Dolly Dimple 2:21¼, and among the balance of the stable is much stuff eligible to the green classes that are real race horses and are by such noted sires as Archdale, Mighty Onward, Peter the Great, Burning Star, Onslow, Shady Dude, etc.—Spirit of the West.

◈ ◈ ◈

Godfrey Preece has just returned from California with a lot of saddle horses and polo mounts which he considers to be the best he has yet procured. They include sixty head, mostly of thoroughbred type, as well as some children's ponies. Among the polo mounts Mr. Preece especially fancies Truthful, by Borgia, dam Cheviot, bred by Mr. C. Boots of San Jose, Cal.; Billy Shoot by Dave Tenny, dam Jay Gibb; Ding Dong by Yellow Tail, dam Tinkle Tinkle; Lady Cougar by Cougar, dam Sweet Marie; Why by Poyart and several others by Dan Tenny. Among the polo mounts is Little Birdie, winner of many races and roping competitions in Arizona and El Paso, Texas. Registered saddle-bred and Thornton saddle horses top the lot.—Rider and Driver.

◈ ◈ ◈

Robert E. Ellison of Lima, Ohio, who has been spending the winter in California, has been among the visitors at Pleasanton recently and his stay has been highly enjoyable both to himself and his many old acquaintances among the Pleasanton colony, as well as to a good many new ones. Almost a quarter of a century has passed since "Uncle Bob" sat behind that great old Brown Hal pacer, Storm 2:08½ (who, by the way, was the first of the get of the Tennessee sire to break into the 2:10 list), but the passing seasons have dealt kindly with him and his interest in horses is as keen as ever. With V. L. Shuler, Charley DeRyder, S. S. Bailey and others of the senior members of the fraternity he has raced over a lot of old time events during the trip, and while none of them got back as far as Paul Revere's famous trial against time, they did race 'em clear to Phil Sheridan's attempt at the twenty mile record.

The 1:55 Stable

In charge of Trainer Railey Macey and a goodly force of competent caretakers, eleven head of the Dan Patch family arrived at Pleasanton on Monday, March eighth, several hours overdue owing to unloading at Ogden on account of a touch of illness suffered by one of the youngsters en route. The weather encountered across Nebraska and part of Wyoming was of the "ringtailed snorter" kind that occasionally manifests itself in those sections, and considerable difficulty was experienced in keeping the car at anything like the temperature of the enclosed track and stables at Savage. But one of the number suffered any ill effects of the blizzard, however, and that one is rounding to very nicely at Pleasanton, while the balance are in the very best of condition.

Chief among the stable's mainstays for the exposition events are the sons of the 1:55 farm's premier, Dan Patch 1:55¼, that are entered in the big $20,000 stakes at both meetings—Dazzle Patch 2:09¾ for the 2:06 pace and Electric Patch 2:09¼ for the 2:10 trot. The former is a racy looking brown horse, now six years of age, out of Renline (dam of Rena Patch 2:06¼, Dazzle Patch 2:09¾, etc.) by Online 2:04, grandam Kate Fearnaught (dam of three) by Royal Fearnaught 1501, sire of the dams of Auto 2:04¼, Octoo 2:07¼ etc. As a two-year-old this lad had a mark of 2:24¼, which he reduced last year to the present figures, and he is hailed by Mr. Savage as the successor to his sire for pacing honors if accidents will steer clear of his path. He has worked halves in :56¾ and miles in 2:02½, so he looms pretty formidably among the field of great pacers that will contest for the greatest stakes ever hung up for horses of their gait.

While Dan Patch has been most successful as a sire of extreme speed at the pace, seventeen of his get having attained honorable recognition in ultra select company with records of from 2:05¼ to 2:10 at the lateral way of going, it remained for Electric Patch to prove his rightful claim as a sire of 2:10 trotters, the black boy being the first of the family to break into the exclusive set at that way of going. As a two-year-old he was merely put in the list with a time record, but as a three-year-old he went out in company and brought home a whole string of scalps, as is befitting a "savage" when he goes on the warpath. Before leaving home he was given a time record of 2:12 and then made a campaign of eight starts, over both mile and half-mile tracks, never losing a heat, and winning a total of $2650. His best mile over a two lap track was in 2:17¾ at Des Moines, and on two separate occasions he demonstrated his ability to beat 2:10 over the big rings, stepping the Illinois State Fair Grounds oval in 2:09¾, 2:11¼ and 2:11¾, and the mile track at Sedalia in 2:09¼ and 2:11. He is a bit different type from the fast pacer, being more rugged, larger, and of a more sluggish disposition—the kind that only accident keeps from lasting a long time. He is a black horse, now four years old, out of Zella Directum 2:27¼ (dam of two) by Directum 2:05¼, grandam Crescent 2:24¼ (dam of Gulvallis Directum 2:09¾, etc.) by Robert McGregor 2:17½.

Fay Patch, the farm's entry for the two-year-old trot, is a nice brown filly by Dazzle Patch, out of Miss Flashlight (dam of Cory Kilvert 2:16½) by Baron Wilkes 2:18, grandam Vera 2:18¾ by Stamboul 2:07½, the latter mare bred by L. J. Rose of Los Angeles and raced here in California in 1893. For the two-year-old pace they also have a daughter of their candidate for stake honors, Judith Patch, the bay filly out of Hal Raven 2:03¾, by Hal B. 2:04½, grandam Raven 2:10 (dam of two) by Alcantara 2:23. This lass has a great speed inheritance and promises to live up to it, as she has shown very nicely at the pace in her early education. For the three-year-old pace the International colors will be up behind Agnes Patch (2) 2:24 by Dan Patch, out of Louise Hersey by Arion 2:07¾, grandam Jennie Jackson (dam of two) by Mambrino King.

In addition to these already entered in the stakes, the farm will make numerous entries throughout the program, and have brought out a number of the "tried and true" that have been to the races in former seasons. Drift Patch (2) 2:21, now three, is the youngest and least experienced of the balance of the stable, and is a breezy gaited lad out of May Drifton 2:10¼ by Drifton B. 2:20, grandam Lima by Saranac. Mary E. Patch, out of Prelissa (dam of Alpha W. 2:06¼, Bob Fitzsimmons 2:07¾, Pearl Patch 2:06¼, etc.) by The Prelate, grandam Toto by Totoway, is another good Dan Patch trotter. She had a record of 2:29½ as a two-year-old, was second to Jack Swift at Milwaukee as a three-year-old in 2:16¾ and 2:10½, raced very little in 1913 but won one of her two starts and reduced her record to 2:24¼, and obtained her present mark of 2:17¼ last year at Peoria, in a five heat race in which three heat winners developed, the other two being John Mack 2:12¼ (now at Los Angeles being fitted for the exposition meeting) and Judge Hutch 2:17¼. She is a husky seven-year-old now, and as she is eligible to the 2:25 class she looks like a pretty fair one for 1915.

Buzz Patch is a four-year-old black mare whose pedigree is reminiscent of good days done, as she is out of Heloise Grattan by Grattan 2:13, grandam the good campaigner of two decades ago, the gray mare Phenol 2:07¼ by Jersey Wilkes. She was given a time record of 2:25¾ as a two-year-old, and last year reduced this record first to 2:15½, then to 2:12. Princess Patch, now seven years of age, is out of International Queen 2:13½ (dam of four) by Tom Exum 2:13½, grandam Sylvinia 2:17¼ (dam of two) by Silver Cloud Jr., and has been raced regularly since her two-year-old form, reducing her record season by season from 2:24¼ to 2:18¼, 2:11¾, 2:08¼ and 2:06¾. Last year she figured in some hard fought split heat races in fast company and will doubtless give some good man and horse a "considerable chore" to beat her in 1915. The other pacer of the string is the bay horse Power Patch 2:09¼, full brother to Liberty Patch 2:08¼, both being out of the old favorite of many a "gory field," Effie Powers 2:08¼ by Anderson Wilkes, grandam Fanny Powers by Regalia. This lad was raced a bit last year as a four-year-old for education and is eligible to the slow classes; if he bears the "earmarks" of his mammy when the roundups start he will give folks something to think about pretty seriously.

But one member of the stable does not own allegiance to the Joe Patchen dynasty—the eight-year-old bay trotting mare Jean Arion 2:08¼. As her name implies, this lass is by the Palo Alto champion Arion 2:07¾, who made his home at the International establishment, her dam being Sarah Shelton 2:28¼ by Bedford 2:30, grandam Princess Clay by American Clay 34. From a time record of 2:24 as a two-year-old she has come on down the line with a four-year-old record of 2:17, racing to her present record as a five-year-old at Milwaukee, that being the only year she was raced to any extent. She has always managed to get tangled up in tough company when going fast and in 1912 figured prominently in a number of the "split heat" kind that keep the crowd interested. In the seasons of 1913 and 1914 she made but one start each, winning the 2:09 trot at Cleveland in the former year and finishing second to Aquill at Peoria last summer.

The Savage stable is making its usual pleasing impression at Pleasanton, as everything about the outfit is "spick and span" and Mr. Macey and his assistants are always ready to give the visitor all information desired. They are stabled in the same row with the horses of the Childs family, and the 1:55 boys promise to run those eminent landscape gardeners a hot race for well kept lawns and flowers after they really get settled for the season. Mr. Savage is expected to arrive early in April, and as he has been one of the most steadfast supporters of the exposition meetings among horsemen from across the divide, Californians will take considerable interest in the welfare and success of the horses he has brought out as prima facie evidence of his belief in big races for big fairs, and as a fitting testimonial of his approval of the enterprise displayed by the directors of the P.-P. I. E. in according pacers the prominence that is their due on modern racing programs.

—o—

Highbrows please note: Earl Beezley of Syracuse, Nebraska, promises to race Sand Hill Pete 2:18¼ on the trot this year, after having gained an honorable record, some money and the severe disapproval of certain finicky folks back east as a pacer. You simply kinnot keep a good horse down.

◈ ◈ ◈

Holly Brand 2:06¾ paced a half over the ice on the last day of the Winnipeg Driving Club meeting in :59½, while Mollie Darling 2:05¼ did the trick in :59¾ and 1:00½. R. J. MacKenzie was one of the timers and there was no shenanigan about either time or distance, as the engineers' test shows the track to be a foot over the half.

◈ ◈ ◈

Elmo Montgomery has leased of Carey Montgomery the pacer Dan Logan 2:07½, full brother to the redoubtable Jim and always claimed by very many horsemen to be just as good or better—which means he is "some hoss" when right. He was off last year with sickness, but has shown some very fast work at different times, and if he comes on right may be a starter in some of the good pacing events at the exposition meetings.

◈ ◈ ◈

Johnny Ray, of Cleveland, the well known actor, who is a real fanatic on the subject of a good trotter, spent two or three days here the past week, on his way home from St. Augustine, Fla., where he had been recuperating from a slight illness. He went from here to Dayton, where he will resume his work on the Keith vaudeville circuit. Mr. Ray has four horses in training here in the stable of H. C. Moody and another in charge of John Splan, which will be turned over to Moody soon to train this season. Mr. Ray has Fiesta Maid 2:11¾, by Zombro 2:11; Prince Ansel Jr., a two-year-old Prince Ansel colt; a two-year-old bay filly by Nushagak, and a yearling by True Kinney 2:12¼, dam by Nutwood Wilkes 2:16½, which are in the stable of Moody at the present time. The other one is a three-year-old chestnut filly, formerly known as Miss Stackhouse, but which name will be changed to Emray in honor of Mrs. Ray. Emray is a chestnut filly by Peter the Great, dam by Cochato, and is quite a handsome filly. In conformation and general appearance she bears no little resemblance to the grand little mare, Soprano 2:03¾, but Mr. Ray says that he will be satisfied with considerable less speed than the great daughter of Bellini showed. She has a faint stripe in her face like Soprano.—Lexington Correspondence, Western Horseman.

FIVE HARNESS RACES AT PLEASANTON JULY 5

The Butchers Exchange of Alameda County will hold their annual picnic independently this year rather than in conjunction with the San Francisco organization as has generally been the practice in the past, and are arranging a big two-day celebration to be held at Pleasanton Driving Park on Sunday and Monday, July fourth and fifth. For Sunday they will have motorcycle races, vaquero contests, special trade matinee races, dancing and all the general sports that go to round out a real picnic program, while on Monday the big feature of the day will be a good card of five races, with $2,350 hung up for the trotters and pacers.

The main events, the 2:20 trot for $500, the 2:20 pace for a similar sum, and the 2:12 trot for $650 are open to horsemen everywhere, and in addition there is offered two purses of $350 each, one for trotters and one for pacers, limited to horses owned by butchers on June first, when entries close, owners to drive. These events, which are to be known as "The T Bone Trot" and "The Porterhouse Pace" are expected to be the big scream of the picnic from the cleaver-wielders' standpoint and the competition promises to be as keen as keen. A number of the members of the craft who already own steppers are beginning to get 'em ready, while those who can drive and want to get in the fun have ample time to make purchases of steeds tried and true.

The Exchange has taken out membership in the National Trotting Association and will conduct the meet under National rules. All races will be on the three heat, every heat a race plan, with the money on each heat awarded 50, 25, 15 and 10 per cent as usual. The money in the butchers' specials will be divided $100 to each heat and $50 to the horse standing highest in the summary, in the 2:20 trot and 2:20 pace $150 to each heat and $50 to the winner of the race, and the 2:12 trot $200 to each heat and $50 to the boss horse. In case two or more horses are tied for best position in the summary at the end of the third heat, those horses only shall race a fourth heat, as is customary, heat winners not race winners receiving no eligibility records. Entrance will be five per cent, divided in two equal instalments, one to accompany entry and the balance to be paid before starting, with the usual five per cent from money winners. Entry blanks and all particulars will be fully circulated before time of entry closing.

The Alameda butchers are a live bunch with money to spend and they like horse races—as most normal minded folks do. There will be none too much racing in California this season, and their ready money offerings, under the conditions most generally acceptable, should meet ready favor at the hands of all horsemen who are training within easy access of Pleasanton. Competent officials will be in charge and purses paid at the wire. Should anyone desire information concerning the event in general, prior to the issuance of entry blanks and further particulars, the same may be obtained upon application to Messrs. O. G. Newhall, Chairman, 2863 Broadway, or C. A. Bright, Sec.Treas., 603 Castro street, Oakland.

—o—

HARTFORD BACK IN GRAND CIRCUIT.

Hartford, March 6.—The Connecticut State Fair Association, members of the Grand Circuit, will hold the dates assigned to Charter Oak Park track the week of September 6. This was voted unanimously by the board of directors at a special meeting held here this afternoon.

Under the by-laws of the fair association the executive committee that had the power to adopt or decline the dates decided the latter at a meeting held late in January, by a vote of four to one. Later the committee allowed an exception and allowed a special meeting of the board of directors to reconsider the question, with the result that the decision was rescinded and Charter Oak Park, the oldest member of the circuit, still remains in the big racing line.

Homer J. Kline, of Cleveland, secretary of the Grand Circuit, attended the meeting here today and presented many strong arguments in favor of Hartford's return to the Grand Circuit, its benefit to harness racing in general and the eastern division in particular, and also the damage sure to result if Hartford track remained out.

The discussions at the meeting developed the fact that the general sentiment of all the directors was strongly in favor of maintaining the dates, yet some were still smarting under the raw deal which a member of the circuit, Michigan State Fair, gave Hartford by conducting an opposition meeting last year. These were persuaded to forget the past, and everything passed off smoothly, not a single vote being cast in opposition.

The unanimous action of the directors fully proved the falsity of the reports sent out from Hartford that some were in favor of offering purses for half-mile track horses and others doubting the advisability of following Montreal and Empire City, with any hope of drawing the big line stables to Hartford. The action of Detroit last year proved to be the only cause of dropping out from the circuit for a short time at least. Secretary Orlando Jones was instructed to prepare his early closing programme, which will be announced in due time within the specified 126-day limit. Secretary Kline returns to Cleveland tomorrow very much pleased with the result of today's meeting—Horse Journal.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

ANIMAL LIFE ON THE MOJAVE DESERT.

There is no place on the Mojave Desert so barren, hot, desolate, or far from water but what gives sustenance to many and varied forms of animal life, is the story of Will Frakes, who will be remembered by sportsmen as the only successful captor of big horn mountain sheep, which he succeeded in making tamer than the ordinary variety. Specimens he caught are now in different zoological gardens in this country and thriving well. These living creatures in different localities range from the tiny ant to the magnificent bighorn mountain sheep.

The naturalist who goes out there for the social love and companionship of the different forms of life that he will find, and not for murder, money, nor to gather material for a fancy magazine article, will be so deeply interested that he will fail to see any desert. For wherever he may wander he will see many and varied living creatures that are different from the same species that he has met with in other localities.

They are simply differently constructed and better adapted abiding places for that mysterious vital force called life. Still it is the same life that throbs in every one of them. It is the same life that throbs in the man, the very same, there is no difference. Yet, should one of these brother forms of life show the least friendliness or confidence in man by coming too near to him, and more especially if it was some rare creature that man had never seen before, and in need of his protection, the chances are about even that the man would grab up a rock or a six-shooter and try to murder his poor dumb friend.

If he succeeded, he would feel a thrill of pleasure, even when he saw it quivering and gasping for breath. Although he had no possible use for it, it never did him any harm, and was a beauty and a grace to the country in which it lived, man feels a sort of fiendish happiness in murdering these innocent creatures.

Occasionally I meet a man (not often) who does not require the law to keep him from butchering for pleasure more game than he has any possible use for. We can all clearly see what a merciless devil of a brute a wolf is when he gets into the flock and kills a dozen or more sheep just for fun; but man, who knows better, can go out and do a thousand times worse for the same purpose, and it is all right. The fact of the business is that there are but few of us but what should be ashamed to look a wolf in the face.

The bighorn mountain sheep is by far the most magnificent animal that makes its home on the desert. They were once plentiful in every winding range of desert mountains from Tehachapi to the Colorado river. But today there are only a few left here and there on some almost inaccessible rocky mountain, and it is only a matter of time when they too will cease to exist.

When I first came out here to capture sheep for the Government, I thought the prospectors were responsible for their lack of numbers. But, after much investigation, I found that there is not one miner in fifty that has ever killed a sheep in his life. The most harm the miner does is in keeping the sheep away from the water.

The Indian is the curse and destroyer of our mountain sheep. Too lazy to work, without shame or decency, he hires out his squaw for immoral purposes, and hides around the springs with his rifle and murders the poor sheep when they come there to drink. If the Indian had to go out on the range to hunt and give the sheep some show for its life, he would starve to death. There are but few hunters that are expert enough to do much harm to mountain sheep on the open range, for every one of their senses is highly developed and ever on the alert for danger. Even when they are perfectly gentle, they are ever on the watch. They sleep but very little, and then it is only for three or four minutes at a time, when they will raise up their heads, take a look around, and then have another little nap.

The next animal in size is the coyote. This fellow is at home anywhere. He will eat almost anything, and can make a splendid meal on an old piece of dried cowhide that has been dead for years. And halter-straps, lines and stake ropes are delicacies that he seems never to get enough of. He is too well known to need any description and hasn't a friend in the animal kingdom outside of his own species, and they fight a good deal among themselves. They will club together and run jack-rabbits, but the one that catches the rabbit never divides with the others unless he has to. This is a business rule that holds good with a great many human beings, yet they would be indignant were they called coyotes.

In the early spring the coyotes pair off and dig themselves a den on some sunny side hill and there the female gives birth to two little ones. The father coyote hunts and helps take care of the little ones till they are old enough to take care of themselves. Doesn't it all sound lovely, almost romantic? I know it's all so, too, because I've read it many a time after it had been written up and published, and by eminent naturalists at that. Still, my own experience on the Mojave desert, with the coyotes all the time, tells me they do not do anything of the kind.

Coyotes do not pair, but the males fight for the possession of the bitches the same as tame dogs do. The female usually opens up an old badger hole for a den and there gives birth, not to two, but from two to four and five at a litter. If a male coyote is seen around the den he is most likely there trying to steal something that the old bitch has brought in for the pups. He is very clear of bringing in anything for them himself. He is more likely to take one of them up by the nape of the neck and shake the life out of it if it happens to have anything he wants and the old bitch isn't around. If she is, she very promptly puts her teeth into him and fires him out of there, for a dog coyote will not fight a bitch very much, but the bitches will fight among themselves.

There is not the slightest doubt but that the coyote costs the people of the United States directly and indirectly far more than all the other wild animals put together. The sheep alone that he destroys on the open range in a single year could be sold for a vast fortune, to say nothing of the calves, pigs and poultry that he gets away with.

Thousands, perhaps millions, of dollars are expended each year by stockmen for herders and coyote-proof fences that would not be necessary but for the depredations of this sneaking little wolf.

Sheep, if allowed to go free, will scatter out in little bands, eat up weeds and bushes that the other stock do not care for and are a benefit to any country. But they must ever be herded in a close band and consequently tramp the country to death, and through hunger eat up every living green thing that they can reach, destroy much grass, kill many little trees and are a curse instead of a blessing to the country over which they feed—all certainly and surely traceable to the coyote.

There is a claim that the coyote has one redeeming quality—he keeps down the jack-rabbits. But it was amply demonstrated here several years ago that he did not do so. To start with, there were coyotes here by the hundreds and but few rabbits. But early in the spring the rabbits began to come, and by the middle of the summer were here by thousands. The coyote did not keep them down, nor destroy them after they were here.

Where all these thousands of rabbits came from and where they went to I know and shall tell later on in this story, for I made a careful study of the habits and nature of them while they were here.

I trapped 67 coyotes that winter and increased the catch to 100 by spring. Nearly all of them were fat and in fine condition and had good hides. On examining their stomachs I found that they lived mostly on rats. Where did they get so many rats? Well, I'll tell you when I get to rats.

The next animal in line is the desert wildcat. They are not plentiful, but are found sparingly all over the desert. They usually inhabit rocky places and mesquit thickets, but many times I have seen their tracks far out on the sand amongst the sage brush. I believe they are entirely independent of water, for I have found their dens in lonely, rocky mountain ranges on the desert, where from all appearances they had lived continuously for many years, and these dens were a great many miles from any known water.

I believe these cats are more vicious and inclined to be on the fight than the same species of cats that I have met with in other parts of the State. I never knew of one attacking a human being (except reporters) unless the cat had been wrought up to a fighting pitch before the man came along. If one has been chawed by the dogs for a while, it is not really a good idea to interview him at too close a range, for if you do he may light onto you without inquiring which publication you write for; and if he does, you are sure to have two or three first-class paragraphs for your next story before you are ready for them. I have seen one of these cats stop at the foot of a cactus to fight a band of dogs when, had he chosen, he could have gone up the tree and been safe from the dogs at least.

These cats are much worse to kill sheep than the coyotes, but there are about fifty coyotes to one cat on the desert. The cats and coyotes often meet and have furious fights. It is a habit of the coyote to follow the cat till the feline catches a rabbit or a rat, and then take it away from him. I have never seen them fighting, but from the looks of the tracks several coyotes tackled the cat at once, and while he was fighting part of them, the others got away with his rabbit. Such unneighborly intercourse as this is certainly enough to give the cat a furious disposition.

The largest wildcat I ever caught out here weighed 25 pounds. The largest coyote weighed 35 pounds.

The next animal on the desert of any importance is the gray fox. They are very scarce, still there are just a few scattered over the desert almost everywhere. I do not think there are any red foxes out here; at any rate, I never saw one. But the little dwarf desert foxes or swifts are everywhere. They live in dens that they dig themselves, and also seem to be entirely independent of water. I have heard of dens that contained fifty or sixty foxes in one colony, but I have never seen more than eight or ten in one place. The coyotes will kill every fox they can get hold of. They do not eat the foxes they kill, neither does the fox ever molest the coyote or do him any harm. He kills the fox for the same pitiless motive that most men go hunting—the thrill of pleasure derived from the act of mangling to death some harmless and helpless living creature.

The badger comes next. Like the coyote, wildcat and fox, he is everywhere. He is also independent of water, I believe, still he will drink if he can get it. They are rather scarce and not often seen, but their holes are evidences that there are a few badgers here and there all over the desert. I think they are the same species of badger that lives in other parts of the State and live in the same manner—by digging out most of their game, which on the desert is principally rats and chipmunks. They also dig out and eat a great many lizards.

(Concluded next week.)

COYOTES SHOT FROM AIR CRAFT.

Inaugurating a new epoch in the hunting world and showing the ever-increasing practicability of aviation, Fred Mills, a crack trap shot and one of the best amateur marksmen in California, one day recently shot and killed from an aeroplane driven by Glenn Martin at a speed of between sixty and seventy miles an hour and at an altitude of three or four hundred feet, two coyotes which had been loping along in pursuit of quail, little suspecting that they themselves would soon be quarries.

This stalking of game by aeroplane, which Martin declared marked the beginning of the revolutionizing of hunting, was accomplished in the San Fernando valley, which was chosen by the ingenious aviator and the clever marksman as a likely area to demonstrate the possibilities in a combination of hunting and flying.

It was at 3:45 in the afternoon that Martin and Mills, in one of Martin's standard aeroplanes, left the aviator's Griffith Park hangar, near Los Angeles, and mounted skyward, circled once over the aviation field in a farewell to a few friends who were interested in the exploit, and then sailed away to the north, while the reports of Mills' Remington outo-loading rifle, fired in joyous anticipation of "bringing home the bacon," mingled with the whirr of the machine's motor.

It was at 5:20, or an hour and thirty-five minutes later, that the aeroplane returned to the hangar, bringing a happy airman and an equally happy hunter, as well as three coyotes and two wildcats which Mills had shot about seven miles north of Roscoe, or about twenty-five miles north of their starting point.

Two of the coyotes were shot by Mills from the machine as it sped through the air at a speed exceeding sixty miles an hour. The other animals were killed by him on the ground after Martin had made a landing in order to take into the aeroplane the two Mills potted while both he and they were in motion.

As Martin described the flight, they hugged the right side of the valley for about twenty miles when they started and then began circling in great curves three or four miles long, in search of game.

When they found it, Martin made his machine dive from a height of 1,500 or 2,000 feet to within three or four hundred feet of the earth, meantime shutting off the motor, so that the coyotes were apparently unaware of their presence.

Then it was an easy matter for Mills.

He shot the two from the aeroplane only a few seconds apart. Seeing one, he shot it—just like that. Then, seeing the other, he shot that one, also—and in less time than it takes to read it.

Then, while farmers wondered at the new way of hunting, Martin made a landing and the two dead animals were put into the machine. While on the ground, Mills bagged one more coyote and two wildcats.

Martin said that on the trip they covered 150 miles and in one-half hour covered more territory—and from a high point of vantage—than the average hunter could get over in a week.

Martin asserted that all sportsmen who can afford it will in time do their hunting in aeroplanes, as, through such machines, they can better see their quarry, cover more territory in any given time and at the same time do it with less inconvenience than in any other way.

"In a minute," he said, "an aeroplane can cross an arroyo which a hunter on foot would require five hours to negotiate. I believe that the aeroplane is especially adapted to hunting geese and next season Mills and I shall try it out."

Both Mills and Martin believe that coyotes and wildcats destroy more quail than are killed by hunters and say that the sights they had of wild life on their trip prove it. They hope that the legislature will soon provide for a bounty upon those two species of animal.

Martin left Los Angeles, later, for Washington to confer with navy and army officials regarding aeroplanes and aeroplane construction, but upon his return he expects to show something in aviation even more interesting than the feat of last week.

SALT WATER BAITS AND LURES.

The call of the sea has been very strong in my veins for some weeks now; to go fishin', to lie at length on the hot sand while the lance-wood, butt set in beach and a hundred feet of line atrail through the surf, throbbed to the rhythm and the roll of the rim of the sea and now and again bent to some stronger pull.

When I can't fish I think of fishing, of the fish I have caught and how. Not the least of these is the how; and of the hows, the question of bait is uppermost with all of us who catch the fish we go after and do not take a chance of catching any old thing from sculpin to yellowtail.

Of course, I am talking about sea fishing. The trout fisher's game I don't know much about, though I admit it is all he calims for it, and into his discussion of flies and spoons I cannot enter with vim enough to give him a good argument. But I have learned something, not much but a little, about the luring of sea fish to the hook, and when I have time and the inclination to think I sometimes think of them.

Taken all in all, given their habitat and their endowment with what we know as brains, fishes are about as wise as the four-feet when it comes to outplaying man in the game in which their lives are the stake. This being the case, it is not alone necessary that the angler who would be successful should know what baits to use, but how to use them.

There is a right way and a wrong way to put the smelt on your hook when you go after yellowtail; there is a right way and a wrong way to fasten the flying fish or squid to your barbed trap when you want to get a tuna or a black sea bass, and for every kind of fish that swims the sea there is a different bait; nine times out of ten it is the only bait he will touch, being the food for which he travels many miles beneath the sea in order that his appetite may be satisfied.

For instance: I went fishing for mackerel one day, out in a boat about half a mile from shore. I had clam, live sardines, fresh mackerel for bait. Supposedly a strip from the side of a freshly killed mackerel is the best bait in the world for other mackerel. I found the sea full of the blue-sided fish, all lazily swimming about, doing nothing, going nowhere.

I tried every bait I had, and did not get a strike. Then the boatman produced a strip of red flannel from a locker in one end of the launch, tore off a long, narrow pennon, and said: "Try this." I did, and the only reason I did not catch all the mackerel in the Pacific was that I had no use for them and could not have pulled them in.

The strike of the mackerel on this occasion was almost like a trout; when one of the fish passed up the red rag drawn slowly through the water past his nose, another seized it with a rush that made the reel sing. Some of these weighed up to five pounds, and they put up a right lively fight out there in the sunshine and the sea.

In like manner I have taken mackerel on a large red fly, when they would not bite at anything else, and fly-fishing in the sea is a novel experience. There the fly-caster, fishing from a small open boat, launch or rowboat, has all the world, practically, in which to make his casts, and there is no overhanging brush to entangle the fly when it goes back over his shoulder.

This kind of fishing, however, whether it be with rag or with fly, requires not a little work. The game is to cast out and reel in, cast out and reel in, until you get a strike. You may do this a dozen times without a single note from the reel, and then on the thirteenth time you may have a fight of half an hour, if your tackle is light enough, with some fat old cornfed who strenuously objects to being hauled in head first.

I, too, like the bone jig as a lure. There is nothing to the attaching this to your line; you merely fasten it on, trail it over the stern of your launch at the speed you think best, and if a hungry barracuda or yellowtail or bonita comes along you get him, provided you know how to play the fish after he is hooked. When the water is clear and the launch is not running too fast, the strike of the barracuda at a moving bone jig is one of the prettiest sights in all the fishing world. It compares with the drop of the osprey into the school of mackerel; with his rise, laden with a fish and his bronze wings shimmering in the morning sun.

Like a ray of black lightning—if such anachronism were possible—the barracuda comes out of the sea, never pauses an instant in his rush, snaps up the jig and turns away with it. And just about then is the time for the fisherman to get busy, and if he has a light rod he is apt to have his hands full, for all the contempt sportsmen fishermen have for this long gar of the sea.

But when it comes to using live bait, smelt or anchovies or the so-called sardines, there is a real art in attaching them to the hook. The small fish bait should be entered through the mouth with the hook, which should be worked down through him until the tip of the barb can be brought out of his belly. Then close the mouth of your bait over the shank of the hook and wrap with a turn or two of silk thread. Some anglers use wire, I prefer silk. Your fish then looks and moves more like life than any bait possibly can which is hooked through the back or the side of the head indiscriminately.

The squid is a difficult proposition to put on any hook, big or little, and the average sea fisherman can take a lesson worth while from the market anglers, for instance, who frequent Catalina or San Pedro or any other of the beaches whence men go down to the sea in fishing boats. Nine times out of ten anyhow your squid comes off the hook, and trolling with a squid is not half the easy trick it looks when you see some experienced hand take a line and go flying down the channel with a squid atrail.

There isn't much to the hooking of a hunk of white fish or a whole mackerel on your line to bait a black sea bass up out of the depths, but if you put that same mackerel on alive and go after a shark with him, you will probably have your hands full.

Even for the little fish, comparatively speaking, there is a great deal in the way you put the hook into your bait, whether it be sand crab, or gob of clam, or a bit of long-deceased lobster. I am convinced that a yellowfin, running in surf, will bite more often at a sand crab which completely conceals the hook, presenting at the same time an appearance of life, than it will at the same sand crab with the hook stuck roughly through, and presenting all the appearances of a "dead one."

The great trick with lobster, which is the best bait for pompano and some other small fish, is to keep it on your hook at all, but there are days when the pompano are running when they will bite at nothing but lobster, so there you are.

The flying fish as a bait for tuna—and these gossamer "winged" fish are the best of all bait for the giant leapers—is often dead when used, but as often alive. Dead or alive, it should be attached to the hook by the same process as described for the smelt and the small mackerel.

Then, when drawn through the water, or allowed to go down into the depths, the flying fish presents the appearance of life more closely than any other fish bait. And when the tuna strikes, the angler is quite sure that he has something very much alive ahold of that flying fish.

A list of the baits on the South Coast would be practically endless; I have seen grave fishermen using angleworms, and they told me that they caught fish with them, too; I have seen equally grave men putting aniseseed oil on their bait, and I remember one old fellow who would never cast off the wharf without first spitting on his lure, so strong is the hold superstition has on some men.

But the principal list of baits, and the fishes for which they are used, is about as follows: Clam—all sorts of inshore fish, and some of the rock fish of deeper waters; flying fish—tuna; whitefish, mackerel, liver and raw meat—black sea bass; smelt, anchovies, sardines, young mackerel (all alive)—small tuna, white sea bass, yellowtail, albicore, barracuda, halibut and deep sea fish of other and rarer kinds; sand crabs—surf fish and yellowfin, with occasional surf perch, which latter are practically worthless; lobster, shark, stingray—pompano and jack smelt.

A NECESSARY LAW.

Murders, suicides and crimes will be materially reduced in California, it is expected, under the terms of the Finn anti-firearms bill, which passed the Senate recently by a vote of 30 to 6, and which it is to be hoped will in due course be signed by Governor Johnson and become a law.

Under its terms, any one who sells, leases or otherwise transfers a revolver or other firearms which may be concealed, is compelled to keep a register of all sales, including the name, occupation and address of the purchaser. Every purchaser must show a permit from a legal authority before the sale.

The bill forbids the manufacture or the carrying of any blackjack, slungshot, billy, sandbag and metal knuckles, and declares that no one may carry a knife with a blade more than 3½ inches in length.

Anyone convicted more than twice of carrying concealed weapons without a permit or legal right is made guilty of a felony, and is liable to a penitentiary sentence.

The principal objection to the passage of this law has been the epistolary and circular campaign of several Eastern manufacturers of cheap pistols. One result will be, that the pawnshops, second hand clothes stores and hand-me-down joints will have to discard the show window arsenal display of firearms, bowie knives, blackjacks and brass knuckles and other inducements which cater to a criminal or irresponsible patronage.

DUCKS DESTROYED.

An old story is told by Pete Walsh, of Black Point. Across Petaluma creek, a few hundred yards below the railroad bridge, are three heavy electric wires, supported by high towers on each bank of the creek. The suspended wires have been a death trap for hundreds of ducks. Birds flying up and down the creek hit the wires and are cut up and mangled to death—decapitated, wings sliced off, breasts split open, heads smashed and other fatal signs of wire impact have been seen upon many luckless ducks that were picked up.

GOOD WORK.

Emulating the example of many Eastern States, which have enacted similar laws, the Senate Tuesday afternoon passed Senator A. E. Campbell's bill making it unlawful to kill spike bucks.

There was no opposition to the measure—nor should there be. Such a law is sane, wise and humane and better for the sportsmen.

Fish Lines

The Opening Day.—In trout fishing circles great activity is apparent—getting tackle and rods ready for the opening day for steelhead fishing on Thursday, April 1. Recent reports from many coast streams state that there is plenty of water and many trout in the creeks. From now on until the first day of the season the rodsters will be on the anxious seat. A heavy rain and freshet any time before the first of April means that the trout will go down stream and out to sea and that the creeks will be too roily for any decent sport.

* * *

Changes In the Law.—The local brotherhood of steelhead anglers as well as anglers from other sections whose sport, it is claimed, has for years been curtailed, by reason of a closed season when the big trout were running in Russian river, the Paper Mill creek and other favorite fishing resorts, are following with close attention the tip that they are likely to enjoy a much desired change in the fishing law that applies to the steelhead waters.

The proposed change will bring about a closed season for steelhead trout from November 1 to December15, on which date an open season up to February 15 is advocated. The streams to be open during this period both in and above tidewater boundaries, if the bill passes. Five trout, irrespective of size or weight, to be the daily individual basket, caught with hook and line only. This proposed amendment has the indorsement of a majority of anglers.

* * *

Stream Pollution.—Efforts will be made, in the near future, to remedy the alleged pollution of the Mokelumne river at and below Campo Seco. The claim is made that below this point there is not, nor has there been for many years past, any fish, or other life in the stream. Every living creature in the river has been destroyed by poisonous refuse from a mining plant allowed to run into the river, is the claim made by interested sportsmen of that district.

* * *

Fish Screens.—During the past few years, $250,000 has been spent by corporations, irrigation companies and private individuals in placing fish ladders and screens in streams and irrigation ditches, in compliance with the State law to that purport.

* * *

Good Salmon Prospects.—The salmon crop in the waters of this State should be a prolific one, from year to year, when it is taken into consideration that 30,000,000 salmon eggs are being hatched at the Sisson hatchery. The same output, more, if possible, will be handled annually, thus insuring a return to the Sacramento river, in due course of a big yearly run of quinnat salmon. One half of the young salmon will be placed in the river at Sisson, the balance will be released at Benicia.

At the Battle Creek hatchery at present 5,000,000 young salmon are being fed, which requires about 200 pounds a week to keep the young fish going.

* * *

Striped Bass Angling.—Several fine bass, among the catch two 20 pounders, were taken in San Antone creek a fortnight ago. Last Sunday the best results were credited to Jack Clawson and Hugh Draper. The former landed three beauties, 30, 20 and 20 pounds respectively. Bob Sangster came in with a 15 pounder.

The Napa drawbridge rodsters have not landed many large fish for the past two weeks. A number of recent visitors to that resort have, however, caught a plenty of catfish, some running over four pounds in weight. These "cats" were caught in clean waters and are most excellent table fish.

Greenbrae anglers have had fair luck recently. Now that the weather is getting more favorable good sport with the striped fish is expected.

FLY-CASTING TOURNAMENT.

The San Francisco Fly Casting Club's annual midwinter tournament at Stow lake March 7 drew an entry of a score of expert rodsters. The medal winners were:

Delicacy event—Walter D. Mansfield, 99.23 per cent, and Stanley Forbes, 99.11 per cent.

Heavy tackle accuracy—C. G. Young, 90.20 per cent, and F. M. Haight, 90.4 per cent.

Light tackle accuracy—W. J. Davis, 99.28 per cent, and Stanley Forbes, 99.24 per cent.

Dry fly accuracy—T. C. Kierulff, 99.6 per cent, and Stanley Forbes, 90.4 per cent.

Light tackle distance casting—J. F. Burgin, 90 feet, and Stanley Forbes, 85 feet.

Half-ounce lure casting—C. H. Gardner, 98.6 per cent, and T. C. Kierulff, 98.4 per cent.

Half-ounce lure, long-distance casting—Stanley Forbes, 165 feet.

Half-ounce lure, longest cast—Frank J. Cooper, 210 feet.

Salmon fly, distance casting—Paul W. Shattuck, 108 feet.

In and out accuracy, a new event, the contestants cast at buoys 45, 50 and 55 feet distant, casting at the first buoy until a miss sends the contestant to the second and then the third buoy. J. F. Burgin scored a total of 90 points and Stanley Forbes 85.

Drink Jackson's Napa Soda.

At the Traps

The G. A. H.—Chicago is selected as the place for the shooting of the Grand American Handicap in the third week of August, 1915. William E. Phillips, of the South Shore Country Club, of that city, in presenting the claims of Chicago announced that the United States War Department, the City Park and Police Department, had all issued permits for "shooting over the waters of the lake." The tournament will be held in Grant Park, one hundred yards from the heart of Chicago's busiest section, with a 700-foot front on the shore line and a depth of 200 feet. Ten sets of traps will be placed on the strip. The affair will be staged by the Chicago, Riverside, and Evanston Gun Clubs, the Chicago Athletic Association, the Sportsman's Club of America, the Hamilton Club, the Illinois Athletic Club, and the South Shore and other country clubs working in unison as an allied organization to make the event the best ever.

* * *

Interstate Association Trophies, 1915.—The halftone on this page is Plate No. 2 illustrating the $8 classification of trophies which can be selected by gun clubs giving registered shoots this year, as follows:

C 26 Silver-Plated Smoker's Tray—Mahogany lined, 9¼ x 10 inches.

C 27 Sterling Silver Ash Receiver and Match Stand, 5⅜ inches diameter.

C 28 Sterling Silver Flower Vase, 10 inches high.

C 29 Sterling Silver and Cut-Glass Jelly Dish and Spoon, 6 inches diameter.

C 30 Sterling Silver Bon-Bon Dish, 7¼ inches diameter.

C 31 Sterling Silver Mounted Pinch Bottle—Decanter, 10 inches high.

C 32 Silver-Plated Chocolate Pot, 10¼ inches diameter.

C 33 Twelve Sterling Silver Coffee Spoons—in case.

C 34 Sterling Silver Mounted Cane.

C 35 Sterling Silver Mounted Umbrella.

C 36 Sterling Silver Mounted Flask with Cup—Leather-Covered, 6⅝ inches high.

C 37 Silver-Plated Tray—Grape Mounts, 14½ inches in diameter.

C 38 Sterling Silver Top Cigar Jar, 6¾ inches high.

C 39 Silver-Plated Flower Vase, 15¼ inches high.

C 40 Sterling Silver and Cut-Glass Decanter, 11¾ inches high.

* * *

"Distance Lends Enchantment"—We would like very much to join the jovial crew of gun bugs, shake hands again with Fred Gilbert, the gallant old Spartan of the traps and renew pleasant greetings with Doremus, Skelley, Simonton, Turner and the other good fellows we have met, but—and that but is a disjunctive conjunction and there you are, with sincere best wishes:

"Breeder and Sportsman,
San Francisco, Cal.
Gentlemen:

Wednesday, March 17 has been selected as the Fred Gilbert 20th Anniversary Day by the Du Pont Powder Company and it is our intention to properly celebrate the occasion with a trapshooting tournament in the afternoon on the Du Pont Club grounds and with a dinner at eight o'clock in the evening at the Hotel Du Pont.

We very cordially invite you to take part in the shoot and to be our guest for the evening.

Mr. Gilbert will be the honored guest and we hope to make the entire day pleasant for all.

In order to complete arrangements for the dinner will appreciate hearing from you as to whether you can attend.

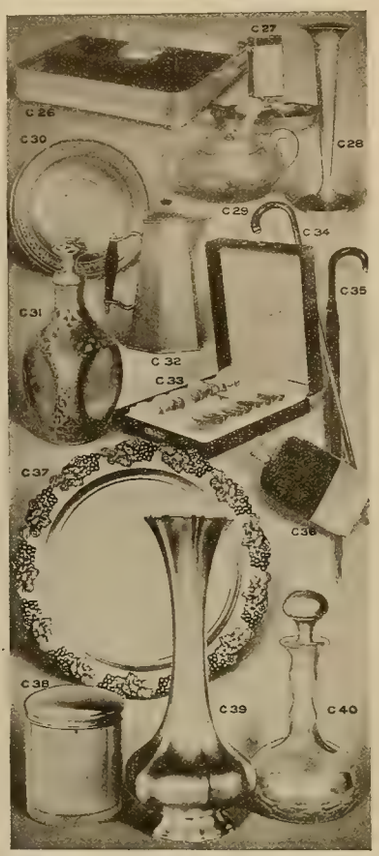
The dinner will follow the shoot quite closely and it is our intention to make it informal.

Hoping to have your acceptance, I am,

Yours very truly,
T. E. DOREMUS,
Manager Sporting Powder Division.

Wilmington, Del., February 27, 1915."

* * *



Fred Gilbert Shoot.—The Exposition City Gun Club's trap shoot at the Easton grounds drew a good attendance of scatter gun enthusiasts, despite rather raw weather. The feature match of the day, a 100-bird shoot for a Fred Gilbert silver cup trophy, was finally won by W. A. Landry after shooting off two ties with C. A. Bridgford and P. Swenson.

Each contestant shot at 100 clay pigeons at 16 yards' rise. The shooters were given added birds, this allowance being based on previous performances, for the first fifty birds. The handicaps for the concluding half of the targets shot at were figured on results for the first fifty birds shot at in the match.

The scores of the three high men were: Bridgford 19, 20, 22 and 23, a total of 84 birds out of 100, to which was added three birds in each 25-bird event—96 altogether. Landry broke 19, 20, 19 and 22; 80 plus four extra birds in each section—96. Swenson scored 14, 22, 18 and 20—74—to which was added his handicap of 22 birds—96. In shooting off the tie Landry smashed 20 clays, plus four, and scored 24 out of 25. Swenson's turn scored 19, plus five—24. Bridgford connected with 15 birds only. His handicap of three was not enough to leave him in the race. On the final tie shoot Landry came out with 22 to Swenson's 15, and annexed the trophy.

Harry Dutton's scores of 18, 22, 19 and 19 (with four birds added to each frame)—94 out of 100—was next best among the handicap results. E. Hoelle, scratch, smothered 92 out of his hundred. Dick Reed, scratch, turned out the best individual trick for the day, 95 x 100, including two 25's—part of a run of over 70 straight. The scores and added bird handicaps, in brackets, follow:

W. A. Landry	19(4)	20(4)	19(4)	22(4)	96
C. A. Bridgford	19(3)	20(3)	22(3)	23(3)	96
P. Swenson	14(6)	22(6)	18(5)	20(5)	96
R. C. Reed*	22(0)	25(0)	25(0)	23(0)	95
H. Dutton	18(4)	22(4)	19(4)	19(4)	94
E. Hoelle	23(0)	23(0)	22(0)	24(0)	92
B. Forestier	13(8)	18(8)	12(7)	18(7)	91
H. Brickell	22(3)	21(3)	19(3)	17(2)	89
English	14(9)	8(9)	11(12)	14(12)	89
Doak	17(4)	21(4)	17(4)	16(4)	87
E. L. Hoag	19(3)	17(3)	15(5)	25(5)	87
J. W. Dorsey	17(3)	18(3)	17(6)	17(6)	87
J. H. Jones	14(4)	12(4)	21(8)	16(8)	87
C. Doe, Jr.	9(11)	8(11)	10(16)	6(16)	87
Dr. C. D. McGettigan	20(3)	18(3)	16(4)	14(4)	82
P. Putzar	17(0)	23(0)	19(0)	18(0)	77
L. Straessler	18(0)	16(0)	13(0)	16(0)	63
Jones	9(0)	14(0)	12(0)	14(0)	49
Capt. Du Bray	9(0)	21(0)	.....	.....	30

San Jose Traps.—A. G. Flickinger, of Vallejo, kept up his "come back" shooting stride last Sunday at the shoot of the San Jose Gun Club when he won the Fred Gilbert cup after shooting off three ties with C. H. Nash of San Jose. Both men had added bird handicaps of 7, and tied with 93 out of 100. The shoot off scores were:

Flickinger	23	23	23	23	92
Nash	23	23	23	22	91

Both men stood at 16 yards, Nash lost by one bird in the fourth time up. Pretty good shooting for both men.

The total scores shot in a card of 200 targets during the day follow:

L. H. Bradley, Hartford, Conn	193	200
Toney Prior, San Francisco	186	200
F. Downs, San Jose	185	200
O. N. Ford, San Jose	183	200
H. C. Barstow, Watsonville	183	200
A. G. Flickinger, Vallejo	182	200
A. F. Lewis, San Jose	182	200
Ada Schilling, San Jose	177	200
Dr. Barker, San Jose	172	200
T. D. Riley, San Francisco	170	200
H. Stelling, San Francisco	168	200
G. H. Anderson, San Jose	165	200
Fred Burnham, Martinez	162	200
H. H. Clark, San Jose	115	150
C. Arquez, San Jose	110	150
C. F. Brewington, Watsonville	80	100
H. S. Anderson, San Jose	30	50
Sullivan, San Jose	25	50
Carl Schilling,* San Jose	174	200
C. A. Haight,* San Francisco	135	200
W. A. Robertson,* Oakland	135	175

* * *

Blue Rocks at Sea.—On Board the U. S. S. Solace (hospital ship) at sea, latitude 22 deg. 30 min., longitude 74 deg. 22 min.—With the Solace rolling several degrees more than is required under the regulations for battle practice in the Atlantic fleet, and pitching a little to add still greater variety, the U. S. S. Solace Gun Club had its first clay pigeon shoot under real "battle" conditions. And those who know the Solace know that she can both pitch and roll with the slightest provocation.

An expert trap was rigged to the port rail on the main deck of the vessel, and the members shot at the targets from the deck above, where they could not see the trap, which prevented their seeing in which angle the clay bird would be thrown. The regulation sixteen yard rise could not be obtained, but this was compensated for to a great extent by the motion of the vessel. Several of the members had not shot at clay pigeons before, and were thus handicapped, but considering everything the scores that follow are regarded as good:

Name	Shot at.	Broke.	P.C.
Dr. Garton	25	19	.760
Dr. Strine	37	19	.514
Paymaster Williams	24	22	.916
Dr. Higgins	30	13	.433
Pharmacist Abernathy	1	1	1.000

The officers of this ship of the navy do not get a chance to "smell gunpowder" during the fleet drills, as this vessel operates under the Red Cross. So they indulge the bent for firearms that is inherent in every American boy with red blood in his veins in the interesting and enlivening sport of trapshooting.

* * *

A Trapshooting Conundrum.—Here's a puzzler that is going around among trapshooters and threatens to become as famous as "How Old is Ann?"

On one of the eastern railroads there is a freight crew, all of whom are trapshooters. As they have limited time to attend trapshooting clubs, they practice their favorite sport enroute.

Their method is to send one of the boys forward about five car lengths ahead of the caboose with a hand trap and some clay targets, and while the train is moving at about thirty miles an hour, the trapper throws the targets off to one side at right angles from the train. The shooters are located in the observatory of the caboose and test their skill at hitting the flying clays.

This gives rise to the conundrum: Suppose the target were thrown from the rear platform of a train going thirty miles an hour; the greatest distance at which a target can be thrown with a hand trap is about eighty yards, and it travels this distance in about two seconds.

Assuming that the average target must be hit within sixty yards of the shooter, and that he is standing alongside the hand trap operator, how much time does he have in which to hit the target?

After our trapshooting friends have solved the above problem, they might turn their attention to this one:

How much time would he have to hit the target if it were thrown forward from the engine pilot and he were standing alongside the trapper?

* * *

Powder Puffs Tomorrow—The Golden Gate Gun Club's regular monthly trap shooting season will start tomorrow at the West Alameda grounds. The feature event will be a Fred Gilbert shoot. Everybody welcome.

The Vallejo Gun Club is also scheduled for a Fred Gilbert shoot tomorrow.

Trade Tips

A Gun of Merit.—In the 15 years that Mr. Gilbert has been shooting the Parker gun, for six years consecutively he won high professional average. This is a feat never accomplished by any other shooter.

Fred Gilbert in writing from Spirit Lake, to Parker Bros. states:

"In reply to your inquiry will say, I commenced shooting your gun in 1899 and have had four of them. One I sold to a friend, and he is shooting it now and it is as good as new. The other guns are in good condition and will last as long as I hope to have use for them.

I have shot from twenty to twenty-five thousand shells a year and have no doubt shot from 300,000 to 400,000 shells in these four Parker guns, with no balks, no misfires and no accidents. I always have a gun to shoot that is ready and willing to do its part, as the records show, and nobody can deny that the gun is well named 'The Old Reliable.'"

* * *

Rem.-U. M. C. Notes.—With a heavy snow blowing into the faces of the shooters all the afternoon, the scores made at the traps of the Dupont Trapshooting Club March 8 were particularly good. G. S. McCarty, of Woodbury, N. J., took the high amateur honors with his excellent 46x50, shooting Nitro Club shells. H. Carlin, shooting the same brand of shells, was second with 44x50. Fifty-six enthusiasts faced the traps.

An interesting shoot was held at the traps of the Pastime Gun Club (San Diego, Cal.) March 6. J. F. Dodds and J. G. Merrill, of San Diego, and Tom Parry, of Chicago, all shooting Arrow Shells, carried off the honors with scores of 96, 94 and 92 respectively.

George Ruthop, of Salt Lake City, took the amateur honors at the Salt Lake Gun Club shoot February 28 when he killed 45 of 50 birds with a Remington pump gun and Nitro Club shells. Gus Becker and E. J. Miller, both shooting Arrow Speed shells, tied for second with 44x50. There was a team race after the regular shoot, each side being made up of nine men. The Nitro Clubs won the score of 103 to 98.

FOR SALE

RACING AND BREEDING MATERIAL

from the establishment of the late

WENDELIN J. MILLER

of Chico, Cal.

The death of Mr. W. J. Miller causes to be put on the market the choice assortment of Broodmares, Youngsters and Race Winners with which he achieved such signal success in recent years, including

JOHN MALCOLM (2) 2:11½

stake winner, world's champion two-year-old pacing gelding (1913), by Dan Logan 2:07½, dam Susie Miller by Prince Ansel (2) 2:20½, etc. Now four years old and can show as much or more than any pacer in California. Prime for this year's races.

CAPITOLA (2) 2:17¾, (3) 2:14½

stake winner, fastest two-year-old pacing filly of 1912, public trial in 2:06½ as three-year-old, by Dan Logan, dam Lulu Mack by Arthur Wilkes, etc. A great race mare for her class.

BONDALEAN (2) 2:20½

winner of second money in two-year-old division, Breeders' Futurity, 1914, and absolutely the best one in sight for this year's three-year-old pacing stakes. Entered and paid up. Trialed in 2:15 last year. By The Bondsman, dam Katalina 2:11¼ by Tom Smith 2:13¼, etc. As great a youngster as the country affords today.

KATALINA 2:11¼

(dam of Bondalean (2) 2:20½) by Tom Smith 2:13¼, dam Kate Lumry 2:20½ (dam of 5 trotters including Baby Doll 2:10¼, Ella Mac 2:11½, etc.) by Shadeland Onward 2:18½. Katalina was a stake winner, a great aged trotter, and her first foal is a fast, standard performer. She breeds regularly and will become more famous as a producer than is her dam.

TWO-YEAR-OLD FILLY

by All Style 2:10, dam Katalina 2:11¼. Staked, paid up. Good prospect.

BAY FILLY, WEANLING

by The Proof (2) 2:29¾, dam Katalina 2:11¼. Nice individual and bred to make a fast mare.

LULU MACK

(dam of Capitola (3) 2:14½), by Arthur Wilkes, sire of Maymack 2:04½, etc., dam Lady Merrill by Tilton Almont, sire of the dam of Monte Carlo 2:07¼, etc. Good breeder and a proven producer.

BAY FILLY

three years old, sister to Capitola (3) 2:14½, never broken.

FIRST NATIONAL

bay colt, two years old, brother to Capitola (3) 2:14½. Staked, paid up. Fine youngster.

John Malcolm and Bondalean are in training at the State Fair Grounds, Sacramento, their workout days coming on Wednesdays and Saturdays. You can see them at any time and they show for exactly what they are—two of the best young pacers in the land to race in this and future seasons. Prices and particulars of all kind may be obtained upon application by mail or in person to either of the undersigned.

MRS. W. J. MILLER,

FOR SALE

Prince Arista

HIGH SCHOOL SADDLE HORSE

Just the horse for any lady or gentleman who desires a really high class saddler for park, road and show purposes. Brown gelding, hind ankles white, showy and nervy but perfectly behaved; smoothly made, substantial, sound, will carry weight. Goes five gaits perfectly, has a good range of high school tricks that he performs on the word, without forcing or prompting, and can be taught everything that any other horse ever learned. Excellently bred. Call at the farm and see him or write for pictures or particulars. None in California to approach him at the price. Address

H. S. DOWLING, Supt., Woodland, Cal.

FOR SALE.—Thoroughbred young stallion KING BRIGHT, 16 hands, weight 1150 lbs. Considered one of the handsomest types of thoroughbred in California. Sire Starbright (great stakewinner), dam Eleven Bells (winner of 87 races), by Imported Quicklime (second in English Derby). Won ½-mile (his first start), 123 lbs. up in :48 easily (only one month training) in Santa Rosa. Guaranteed perfectly sound. Fine disposition and magnificent individual. Excellent prospect for breeding and racing. Price very reasonable. J. P. ENGLISH,
446 South E. St., Santa Rosa, Cal.

FOR SALE—MATINEE PACERS.

Both good ones in every way. MICKY, mat. rec. 2:18, half mile 1:04½, half mile track, 16 hands, 1100 pounds, 12 years old, sound, gentle for every use. $125.00. JERRY, been mile in 2:19½, very toppy, 15.2 hands, 1050 pounds, $100.00. Priced for quick sale and are more than worth the money.

D. F. HERSPRING, Woodland, Cal.

Made in America

For **19 Years** Throughout the Whole World Save-The-Horse Has Stood Up and **"Made Good"** Under Every Test.

H. FELD, Meats and Groceries, 1801 E. Prairie Ave., St Louis, Mo., writes: Your Save The-Horse cannot be excelled for curb. Have also made several recommendations and your remedy did the work in every case. Some of the cases had been giv n up by veterinarians.

N. P. VERNON, Recorder's Office, Parish of Tangipa oa, Amite City, Ba., writes: I used Save-The-Horse with good results on several occasions; one in particular. A mare very lame with ring bone. I applied Save-The-Horse and she is sound.

Every bottle of Save-The-Horse is sold with signed contract-bond to return money if remedy fails on Ringbone—Thoropin—**SPAVIN**—or **ANY** Shoulder, Knee, Ankle, Hoof or Tendon disease.

$5. Druggists everywhere sell Save-The-Horse **WITH CONTRACT**, or we will send it by Parcel Post or Express paid.

Offerings for Private Sale from the Stable of

WILLIAM G. DURFEE

of Prime Campaigners and Well Proven Prospects

READY TO RACE THIS YEAR

I have no objections to hard work or to driving an entry in every race of the day's program during the racing season, but daylight hours are limited, and neither physical possibility nor the judges will stand for me driving more than one horse in each race, so I am making this offering of tried and proven campaigners and well developed prospects for classes and coast futurities. I have too many horses already well developed for one man to train and race, with more coming on steadily that must be handled. Many of the individuals offered here are well known to you, and a trip here will give you full acquaintance with any others that may interest you. Every claim made for speed already shown will be fully substantiated, every horse is exactly as represented, and every price is based fairly on what long experience assures me is a conservative estimate of their actual earning capacity in competent hands. Look this list over, come and see them, and you will realize that you have never been afforded a better opportunity for a profitable investment in horseflesh for racing purposes.

All previous prices are invalidated—Quotations below are subject to change according to future conditions.

MISS QUEALY (2) 2:26¾

Full sister to MANRICO (3) 2:07¼, winner of Kentucky Futurity 1912, and holder of world's record for sixth heat. Seven years old, trained slightly as a three-year-old and showed half in 1:06 over a half-mile track; has been in training ninety days and can trot a half in 1:05; absolutely will not break, good gaited, sound, and a handsome individual. Can trot a two-minute gait and has every right to make a very fast, consistent, good mannered race mare. Price $1750.

ALARICH 2:11¼ (Breeder's mark 2:09), trotter, bay gelding with black points, 15.3, handsome, sound, fast and game; trialed at Santa Rosa last season in 2:06¾ and can do it again. Is a first class doer, can race twice a week and is eligible to the 2:13 class trots on mile tracks and to the 2:18 class on half-mile tracks; has shown well on the twice-arounds. Price, $650.00.

HELEN BELLE (2) 2:22½, breeder's record, bay filly, foaled 1912, good gaited, good headed, sound and extremely fast; was taken up absolutely green on Sept. 3 and has developed in a most satisfactory manner, taking her mark in December, since which time she has been an eighth in :16, half in 1:09. Sired by California's greatest sire of colt trotters, CARLOKIN 2:07½. First dam Carolyn C. by Axtell (3) 2:12 (a champion); second dam by Expedition, sire of Bon Voyage 2:08; third dam by Princeps (son of Woodford Mamb.); fourth dam by Hambletonian 10.

Carolyn C. had two minute speed. This great filly is entered and paid up in the Occident stake, the State Fair, P. C. T. H. B. A., and Oregon Futurities for 1915. The best buy in California at $1400.

NELLIE Mc,

black mare, trotter, eight years old, racing sound but is blemished; has always trained sound and I believe will continue to do so. Trialed at Sacramento in 2:10½ and has been a half lately in 1:03¾. Is a splendid mannered mare—anyone can drive her anywhere. She races first class, is fast, good headed, good gaited and dead game.

Sired by ZOLOCK 2:05¼, dam by Wilkes Moor, son of Guy Wilkes.

Stands about 15.3, is a round made extra good looking mare, weighs about 1140, has splendid legs and feet. She negotiates a half mile circle in A-1 style, should surely beat 2:10 this year. Does not puil a pound and can be placed anywhere. Eligible to any class. Price $1000.00.

CARLETA,

bay filly, two years old, by CARLOKIN, dam ALEXANDRIA, tr. 2:20, by Bon Voyage 2:08; second dam by Oakland Baron 2:09¼; third dam by Allandorf, etc.

This is a good trotter and should be prominent in her stake engagements. Is very handsome, good headed, sound and comes from familes noted for early speed. In training now and improving very fast; trialed recently, half mile in 1:14, eighth in :17¼.

She is entered and paid up to date in the following stakes: Panama-Pacific $3,000 for two-year-olds, Stanford, Occident, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. Price $1000.

O M A R, gelding,

trotter, trial 2:13¾, half in 1:05, eighths in :15; good headed, sound and can be depended upon. Is a beautifully gaited big horse and should prove useful to race over the twice arounds or for a matinee and road horse. He is fearless and is one of the most pleasant driving horses I have ever ridden behind. Stands slightly over 16 hands, weighs about 1200, is eight years old. Sired by DEL CORONADO 2:09½, dam Pineapple by Albion (son of General Benton). A present at $350.00.

CARLSCHEN (2) 2:23, breeder's record, brown gelding by CARLOKIN, dam BONNIE AILSIE 2:08½ (dam of Contention B. (3) 2:08¼) by Faustino, son of Sidney.

Trialed with a little work last year a half in 1:09, is extremely promising and looks to be as good a prospect as any of the colts racing last year in the two-year-old trots. Is engaged in several of the futurities including the P. C. T. H. B. A., Pleasanton and State Fair Futurities. Is a splendid type, beautifully gaited, good headed and has extreme speed. He does it right. Ready to show and can trot a half in 1:07. Price $800.00.

HERMES, brown colt,

two years old, by CARLOKIN, dam MISS QUEALY (full sister to Manrico 2:07¼).

This is one of the most promising trotters I have ever handled. Is an especially nice gaited colt, can show a 2:20 gait, is good headed and on the whole the most promising youngster I know of for the western stakes. Is also a show horse. Is entered and paid up in the Occident, Stanford, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. His dam is an extremely fast trotter, having shown a two minute gait in her three-year-old form, and his second dam produced two to hold world's records—Manrico and Don Pronto.

This youngster is spoken of as the most impressive colt trotter at Los Angeles. Price $1500.00.

JOHNNY DUGAN,

3-yr.-old breeder's record 2:16,

pacer, no straps, bay gelding four years old, straight and sound, trialed a half in 1:04 last year in his three-year-old form and could pace around 2:10 in June.

Sire, CARLOKIN 2:07½; dam Annabelle L. (full sister to Murray M. and Robert I. 2:08¾) by Hambletonian Wilkes; second dam Annabelle 2:27½ (dam of La Belle 2:16); third dam by Williamson's Belmont. A great buy at $350.00.

OLD FOLKS,

bay gelding, trotter, five years old, trialed as a two-year-old in 2:31½, as a three-year-old in 2:18½, and in his four-year-old form last May in 2:11, last half in 1:04. Is sound, good gaited, good headed, and should 2:08 this year. Comes from a family of good race horses on both sides—by DEL CORONADO 2:09½, dam IRAN BELLE, by Iran Alto 2:12¼; second dam ANNABELLE, etc. He stands A-1 with the railbirds around Los Angeles and is in training and ready to go on with and race this year. Price $1100.

NICOLA B. (2) 2:23¼

Winner two-year-old division Oregon Futurity, 1914.

Received slight injury just prior to going to the races in 1914, up to which time he was the most promising colt in my stable, working mile first part of June in 2:17, half in 1:06. Started twice, was once first, once second. Now in training and has brushed an eighth lately in :16; sound, grand individual, paid up in six western stakes and has every license to win. Son of Carlokin 2:07½ and Atherine 2:16¾, dam of Copa de Oro 2:01, Rags 2:09¼, etc. Price $2000.

AND ONE FOR THE $20,000 P.-P. I. E. TROTS — RAGS 2:09¼,

winner of the Breeder's and Oregon Futurities, the Stanford and the Occident stakes as a three-year-old, and the Governor's Stake, $5000, as a four-year-old — in all, beaten in but two out of eight starts, second in those two, and beaten only by 2:05 trotters. In my opinion as good a prospect for the big stakes as anyone has. He is a really great race horse, is racing sound, and has developed from an overgrown four-year-old into a sturdy, strong, exceptionally fine individual. Should be engaged in the Panama-Pacific $20,000 stakes, for which I already have entries. None better bred—by Del Coronado and out of the dam of Copa de Oro 1:59, etc. Price $2000.

In addition to the ones above mentioned I will offer to intending buyers JIM CRAM, three-year-old pacer (brother to Chango 2:12¼), the two-year-old pacer SANDY McNABB (staked), FIVE YEARLINGS and SIX TWO-YEAR-OLDS, most of which are in training and ready to show.

Prices and descriptions on application.

WILLIAM G. DURFEE, 2019 S. Figueroa St., LOS ANGELES, CAL.

Minor Heir Jr.
—Racing Harness—

A HARNESS with two styles of hitches—the two minute attachment for racing and the breast collar and traces for jogging and training—Another famous Sell Brand product.

Made from genuine old-fashioned, slow-tanned Hollinger Oak Leather, without except on the finest harness leather produced in this country, reinforced with Indian tanned rawhide. Hand cut hand finished. No other racing harness at anywhere near its price can equal this in quality. It is indeed a masterpiece of harness-making. If it wasn't the BEST of its kind, I wouldn't be backing it with my name and reputation.

Write for prices and full information, or come and see it. **SEND FOR CATALOG**

The Stanford-Occident Futurity No. 1

(For foals of mares covered in 1914)
To Trot and Pace at Three Years Old.

$3000.00 for Trotting Foals **$2000.00 for Pacing Foals**

To be Given Under the Direction of the

California State Agricultural Society, 1918

Entries to Close April 1st, 1915

Money divided as follows:

TROTTING DIVISION	PACING DIVISION
$900.00 to 1st heat.	$600.00 to 1st heat.
$900.00 to 2nd heat.	$600.00 to 2nd heat.
$900.00 to 3rd heat.	$600.00 to 3rd heat.
$300.00 to horse standing highest in summary.	$200.00 to horse standing highest in summary.

ENTRANCE AND PAYMENTS—$5 to nominate mare on April 1st, 1915; when name, color, description of mare and stallion bred to must be given; $5 July 1st, 1915; $10 December 1st, 1915; $10 on yearlings April 1st, 1916; $10 on two-year-olds April 1st, 1917; $10 on three-year-olds April 1st, 1918.

STARTING PAYMENTS—$50 to start in pacing division; $100 to start in trotting division. All starting payments to be made ten days before the 1st day of the State Fair at which the race is to take place. Nominators when making payments to start must designate whether the horse is a trotter or pacer.

CONDITIONS.

The race in each division will be for three heats; if no horse wins two of the three heats a fourth heat must be raced by the heat winners to decide the winner of the race, all other horses to go to the barn.

Trotting Division Heat Purses $900. Total Purse $3000.00.
Pacing Division Heat Purses $600. Total Purse $2000.00.

Heat purses divided 50, 25, 15 and 10%; the extra $200 in pacing and $300 in trotting divisions goes to the winner of two heats.

Distance 100 yards. A distanced horse shall be entitled to money already won.

If a mare proves barren or slips or has a dead foal or twins, or if either the mare or the foal dies before December 1, 1915, her Nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment nor will any entry be liable for more than the amount paid in or contracted for. In entries the name, color and pedigree or mare must be given; also the name of the horse to which she was bred in 1914.

Entries must be accompanied by the entrance fee.

Nominators are liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for $5000, the amount of the guarantee, only. Hobbles will be barred in trotting and pacing divisions.

Right reserved to declare off or re-open these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

There will be no more moneys in each division or heat than there are starters.

No horse shall receive more than one money in each heat.

Entries open to the world.

Other than exceptions made in this entry blank, rules of National Trotting Association to govern.

A. L. SCOTT, President. **CHAS. W. PAINE, Secretary. Sacramento, Cal.**

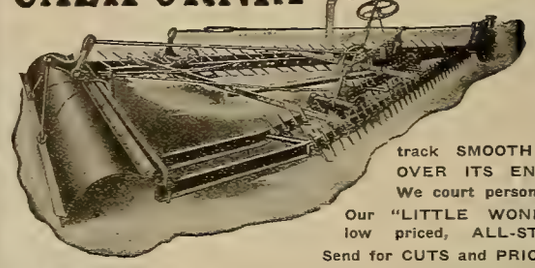
Peter The Great

is the world's foremost progenitor of extreme speed; sire of 30 in 2:10, etc.

HIS SON

PETER McKLYO 3, 2:12 1-2

will make the season of 1915 in the training stable of James Thompson at the San Jose Driving Park beginning March 15 and ending July 1.



PETER McKLYO (3) 2:12½, the only California-owned son of Peter the Great of an age permitting stud duty, is out of a great-bred young matron by Jay McGregor 2:07¼—Klyo (2) 2:29½; second dam Miss Spears 2:21¾ (dam of 6 including Shakespeare (3) 2:09¾); third dam Medium's Last (dam of 7 including Trampfast (2) 2:14¾); fourth dam Suzanne (dam of 1 and grandam of 10 including Susie J. 2:06½).

This colt is four years old, having obtained his record last season with a very limited amount of work. He came into my hands perfectly green in February, 1914, and developed speed so fast that I had to take his shoes off and jog him for two months barefooted. Being by Peter the Great, the sire of the century, and, as you will notice, out of a daughter of Jay McGregor, another wonderful family of horses, he is one of the best bred young horses in the world and I can truthfully say he is one of the very best individuals that I ever had the pleasure of looking at. He can trot a quarter in 30 seconds, and I am firmly of the opinion that he will trot a mile this fall in 2:06 or better.

Fee, $75 the season with return privilege. Mares pastured at usual rates and accorded best of care, but no responsibility assumed for accidents or escapes. Service fee and pasture bills must be paid before removal of mares. Address for all particulars

L. H. TODHUNTER, Owner, Sacramento, Cal. **JAMES THOMPSON, San Jose Driving Park, San Jose, Cal**

Brood Mares, Racing Prospects and Saddle Horses for sale at all times. Correspondence solicited, visitors cordially welcomed. Address **HARRY DOWLING, Supt., Woodland, Cal.**

COPA DE ORO 1:59
WINNING PERFORMANCE

○ DURFEE'S STALLIONS ○

CARLOKIN 2:07 1-2
EXHIBITION MILE 2:05 1-4

Champion Pacing Stallion of the West and Sire of a Champion

Reg. No. 52785. Licensed Pure Bred. Cert. No. 1037

Golden Bay. Height 15.3½. Weight 1160.

Sire of CONTENTION B. (2) 2:24¼, (3) 2:08¼, the latter mark a world's record when made, and but one-quarter of a second removed from present record for three-year-old pacing geldings. Public trial (3) 2:07¼. Also sire of

Chango p. (3).....2:12¼ De Ora (3) 2:17
2-yr.-old record 2:13½. 2-yr.-old record 2:27¼.
Trial (3) .....2:09 Gold Lily p. (2)....2:24½

Patrick de Oro p (3)2:22¼, trial (3) 2:08¼, ½-mi. track

Copa de Oro has been retired to the stud for but a very few years and these are from his first foals. Where can you find a stallion whose get have made an equal showing?

COPA DE ORO is the fastest son of Nutwood Wilkes 2:16½ (sire of 8 in 2:10); first dam Atherine 2:16¾ (great brood mare) by Patron 2:14¼, sire of the dams of 7 in 2:10; second dam Athene (dam of 2 trotters, etc.) by Harold 413, sire of Maud S. 2:08¾ and the dams of 5 in 2:10; third dam Minerva (great brood mare) by Pilot Jr. 12, sire of the dams of Maud S. 2:08¾ and 3 others in 2:10, etc. He is one of the handsomest horses in the world, as well as one of the fastest, and is undoubtedly the best bred of all extremely fast pacing sires. From the first I heralded him as the Coast's future great pacing sire, and the performances of his youngsters recorded above certainly show that I had most excellent grounds for that belief.

FEE: $75 For the Season, Usual Return Privilege

I am especially well equipped for caring for mares at reasonable rates in any way that owners may desire. Every attention will be given mares in my charge, but no responsibility is assumed for accidents or escapes. Further particulars may be had by applying to W. G. DURFEE, 2019 So. Figueroa St., Los Angeles, Cal.

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred. Cert. No. 1038

Mahogany Bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

Ethel D. (3).....2:11 Helen Belle (2)....2:22½
Johnny Dugan p (3)2:16 Nicola B. (2).....2:23½
John Warwick (2) 2:17 Santiago (3) 2:24¼
The Lark (3).....2:18½ May Marian p (3)..2:24¼
Carl (2) .....2:19¾ Carlrich p (2) 2:24½
Miss Carlokin p ....2:20 El Carbine (2).....2:27½
Carsto (2) .....2:22½ Eileen C. (3) 2:29
Carlschen (2) .....2:23 Carlos (2) 2:29¼
Fuiton G. (2).....2:30

CARLOKIN is the best bred son fo McKinney 2:11¼, foremost among the progenitors of 2:10 speed, being out of that sterling producing matron Carlotta Wilkes (dam of Inferlotta 2:04¾, Mary Dillon 2:06¼, Guy Borden 2:07¼, Carlokin 2:07½, and 6 others in 2:30) by Charley Wilkes 3653; second dam Aspasia (dam of 4) by Alcantara 2:23, sire of the dams of 20 in 2:10; third dam Miss Buchanan (dam of 1) by Clark Chief 89, sire of the dams of 2 in 2:10, etc. Carlokin was not only a fast and rugged campaigner, but, point for point, one of the most ideal individuals ever foaled. I chose him from among all the best horses of the country as a prospective great sire, and in 1913-1914 his get won more coas' futurities than those of all other sires combined. What more could you ask of them?

FEE: $75 For the Season, Usual Return Privilege

Every attention will be given mares in my charge, but no responsibility is assumed for accidents or escapes. W. G. DURFEE, 2019 So. Figueroa St., Los Angeles, Cal.

Pleasanton Driving Park

offers for service for the season of 1915 the following stallions:

Joe Patchen II 2:03¼

Licensed Pure Bred—Cert. No. 1128.
A. T. R. No. 47491
BEST MONEY WINNING PACER

By JOE PATCHEN 2:01¼, sire of Dan Patch 1:55¼ and 6 others in 2:10.

Dam, Bessie Bonehill 2:05¾ (dam of 2 in 2:10) by Empire Wilkes 2:29¼; second dam Arab Girl (dam of 7) by Crittenden 433, sire of the dams of 6 in 2:10.

Joe Patchen II comes from a long line of famous ancestors and is himself one of the best known and most popular pacers in America, with all the qualities of speed, stamina and individual excellence necessary to the making of a truly great horse—one of the kind you would expect to find after a glance over the array of famous performers owning allegiance to the families from which he comes. He is an excellent breeder, transmitting uniformly his own desirable characteristics and his few foals in California are promising to the highest degree.

Fee for Joe Patchen II or Mahomet Watts, $100 with usual return privilege

Service fee refunded to owners of mares bred to Mahomet Watts proving not with foal.

Mahomet Watts 2:08¼

Licensed Pure Bred—Cert. No. 2312.
A. T. R. No. 51518.
AXWORTHY ELECTIONEER

By GEN. WATTS (3) 2:06¾, sire of three three-year-old trotters in 2:10.

Dam Alla P. 2:21¼ (dam of 3) by Palo Alto 2:08¾, sire of the dams of 2 in 2:10; second dam Lula Wilkes (dam of 5), by George Wilkes 2:22, sire of the dams of 15 in 2:10.

Mahomet Watts is not only the fastest performer credited to Gen. Watts (3) 2:06¾ (whose breeding on qualities have been prime factors in the rise of the great house of the Axworthys) but he springs on the maternal side from the most firmly established families of champion producers—those of Electioneer and George Wilkes. He is a pleasing individual of fine finish and extreme speed, having a three-year-old record of 2:10 and being timed separately in a race last year in 2:05¼, whose services should be most welcome to California breeders.

Vernon McKinney 2:01½

Licensed Pure Bred—Cert. No. 1126.
A. T. R. No. 53803.
FASTEST OF THE McKINNEYS

By GUY McKINNEY 37625, son of McKinney 2:11¼, dam by Guy Wilkes.

Dam Maud Vernon by Mount Vernon 2:15¼, sire of the dam of Leata J. 2:03, etc.; second dam Mag by Gen. McClellan, sire of the dam of Mack Mack 2:08, etc.

No member of the McKinney family excells Vernon McKinney in point of speed or individual excellence. He is a horse of much substance—16 hands, 1200 pounds—bred in lines of intense prolificacy and evidencing in every way his ability to "live up to his pedigree." No horse has greater natural speed or a more effortless way of going. He is a sure breeder and his youngsters are the readiest sellers of their age in California—a statement proven by recent sales and tentative offerings for the get of mares due to foal to him this year.

Zomblack 2:26, tr. 3, 2:08¾

Licensed Pure Bred—Cert. No. 1127.
A. T. R. No. 54955
BEST SON OF ZOMBRO

By ZOMBRO 2:11, sire of twenty and the dams of three in 2:10.

Dam, Madeline Marshall (dam of 2) by Demonio 2:11¼, sire of 7 and dam of 1 in 2:10; second dam Mamie Comet (dam of 3) by Nutwood 2:18¾, sire of 2 and dams of 21 in 2:10.

Zomblack is one of the handsomest horses ever foaled in California as well as one of the fastest. His extreme speed came to him early and naturally, and he is unexcelled in size and conformation—an ideal type of the American trotter in every important respect. He is intensely bred in speed producing lines and we have no hesitation in advancing the claim that he is the very best son of Zombro 2:11, in his turn the best son of McKinney. In every instance the families represented in his pedigree are breeding on most successfully.

Fee for Vernon McKinney or Zomblack, $50 with usual return privilege

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars
CHAS. L. DeRYDER, Superintendent PLEASANTON, CAL.

WORLD'S CHAMPION YEARLING TROTTING STALLION 1910
Unbeaten Two-Year-Old in 1911

Winner of California State Fair and Pacific Coast Breeders' Association Futurities in 1912. Record in Third Heat of a Winning Race.

Also holder of the World's Record of a Five-Heat Race by a 3-yr.-old Stallion

Limited number of approved mares at $100 the season.

WILBUR LOU was bred to seven (7) mares in 1912 and got seven (7) foals; six (6) were trained, on the property of John Christiansen, of San Francisco, which was said to be the fastest yearling on the Pacific Coast.

The five (5) owned by the Hemet Stock Farm showed as follows:

FIESTA LOU, record 2:25, half-mile track, ½ mile—1:08¾
SELMA PALEY, trotted ½ mile 1:13¾; one-eighth— :17¾
GOLDSMITH LOU " ¼ mile :35½
GERTRUDE RIVES " ¼ mile :36¾
BILLIE BOYD " ¼ mile :38

This includes the entire get of WILBUR LOU.

KINNEY de LOPEZ 2:23.

Son of KINNEY LOU 2:07¾ and BETSY DIRECT by Direct 2:05½

$50 THE SEASON

KINNEY DE LOPEZ is the sire of DON DE LOPEZ, trial one-half as a yearling 1:13¾, one-eighth 17½ seconds; could have trotted in standard time as a yearling. KINNEY DE LOPEZ is certain to sire early speed.

Terms: Cash at time of service with usual return privilege, or money refunded at our option. Excellent pasturage and best of care taken of mares, but no responsibility assumed for accidents or escapes.

BREED TO THE COAST'S CHAMPION CAMPAIGNER AND FUTURITY SIRE

JIM LOGAN 2:01¾

(3) 2:05½, world's record to 1912 and yet the fastest third heat ever paced by stallion of that age; (5) 2:04¼, (6) 2:03¼, (7) 2:02¾, (8) 2:01¾, race record for Pacific Coast.

Licensed Pure Bred—Cert. No 1028.

All winning race records. Registry No. 44997.

Sire of MAXINE (3) 2:15 Winner Pacing Division Pacific Breeders Futurity 1914

Trial in 2:09, half in 1:01, quarter in :29 as a three-year-old.

Son of CHARLES DERBY 2:20, brother to Klatawah (3) 2:05½, etc., and sire of TEN in 2:10.

Dam, EFFIE LOGAN, California's greatest producer of extreme speed (dam of Jim Logan 2:01¾, Sir Albert S. 2:03¾, and Dan Logan 2:07½, sire of John Malcolm (2) 2:11½, champion two-year-old of 1913), by Durfee 11256; second dam Ripple, by Prompter 2305, sire of the dam of Gratt 2:02¼, etc.; third dam Grace (dam of Daedalion 2:08½, Creole 2:15 and Eagle 2:19½), by Buccaneer 2656, sire of the dams of 2 in 2:10; fourth dam Mary, great broodmare, by Flaxtail.

JIM LOGAN is not only a horse of most acceptable size and pleasing conformation, but is one of the most rugged campaigners ever raced. After acquiring a world's record as a three-year-old he reduced his record every year raced and is a sound horse today—no more eloquent testimony of his genuine natural qualities could be given. Of his very few living foals, every one trained has shown speed in convincing quantity, and the only one to be raced, Maxine (3) 2:15, began her career as a futurity winner. Could you ask more of a well bred horse than that he be a champion campaigner and transmit his qualities to his get?

In the stud, season of 1915, at Woodland Race Track

FEE: $50 for season, with usual return privilege, or $75 to insure living colt. Fees payable at time of service or before removal of mares. Excellent pasture at $5 per month, with best of care for mares, though no responsibility will be assumed for accidents or escapes. Call at race track, or address

Three New World's Records

ESTABLISHED DURING THE 1915 INDOOR RIFLE MATCHES, WITH

Peters Semi-Smokeless Ammunition

Inter-Club	**1000 ex 1000**	Scored TWICE by the Engineer's Rifle Club Team of Cleveland, O., during Feb. 1915. Conditions: 25 yards, prone position, open sights.
Individual	**4599 ex 4600**	By T. K. Lee of Birmingham, Ala. Conditions same as above. THE MOST MARVELOUS DEMONSTRATION OF MARKSMANSHIP AND AMMUNITION QUALITY EVER MADE.
Inter-Scholastic	**988 ex 1000**	By the Iowa City, Iowa; High School Team, composed of 16-year old boys. Best previous record 984. Conditions: 50 feet, open sights, 10 shots prone and 10 shots standing.

Without the (P) brand quality these records would never have been hung up. Shooters who are ambitious to WIN should insist upon having the original SEMI-SMOKELESS.

THE PETERS CARTRIDGE CO., Pacific Coast Branch, 583-585 Howard Street, San Francisco, Cal.

THE PROOF 2, 2:29¾

A. T. R. No. 51956
LICENSED PURE BRED CERTIFICATE No. 1029

From the family of Bingen 2:06¼, foremost among present day champions of all ages and gaits.

Son of The Exponent 2:11¾ (by Bingen, dam Iva Dee by Onward 2:25¼), sire of 32 performers including The Temptress 2:08½, 6 three-year-olds, 20 two-year-olds and 1 yearling.

First dam Chord 2:27 (dam of 4) by Wilkes Boy 2:24½, sire of 4 and the dams of 11 in 2:10; second dam Sonata (dam of 3) by Dictator 113, sire of 2 and the dams of 7 in 2:10; third dam Cadenza (dam of 2) by King Rene 1278, sire of the dams of 2 in 2:10; fourth dam Virgie Wilkes (dam of 4) by Geo. Wilkes 2:22, sire of the dams of 16 in 2:10.

In the stud, season of 1915, at Pleasanton Driving Park, at $50 the season with return privilege. We have colts in training to show his qualities as a sire. Grandsons of Bingen are siring champions such as Etawah 2:03½, Anna Bradford (3) 2:00¾, etc. Address for all particulars,

Held Out Because of a Ruptured Tendon

THOUSANDS of races have been won by inferior horses simply because the horses that rightfully should have won were held out because of ruptured or sprained tendons. There's many a horse today pulling delivery wagons, suffering with limb diseases, whose place should be on the race track winning big purses for their owners. And they would be, if their owners would only give them proper treatment with

The Only Spavin Remedy in the

Mack's SPAVIN #1000 REMEDY

World Sold Under a $1000 Bond

There are no limb diseases known among horses that cannot be cured with this powerful, penetrating remedy. It goes right to the seat of the trouble and will absolutely cure Ringbone, Thoroughpin, Curb, Capped Hock, Shoe Boil, Sprung Knee, Ruptured Tendons, Sweeny, etc., quickly and without scars or blemishes. No matter how long the horse has been lame—from what cause—or what you have tried—we'll guarantee that Mack's $1000 Spavin Remedy will cure him permanently. If it fails, we will refund every cent you pay us.

You Can't Lose

We have a special deposit with the First National Bank of Binghamton, N. Y., of $1000 which we must forfeit if we do not do exactly as we say. You take absolutely no chances. Send for a copy of this bond. Read it.

Your Druggist Will Obtain Mack's $1000 Spavin Remedy for You

if you ask him. Price $5.00 a bottle. If he refuses, remit $5.00 to us and we will see that your order is filled without delay.

"TRAPSHOOTING IS THE SPORT of KINGS"

CHARLES H. NEWCOMB
PHILADELPHIA, PA.

So says Charles H. Newcomb One of Pennsylvania's Leading Amateur Shooters.

"TRAPSHOOTING is rightly called 'The Sport of Kings and Princes'," says Mr. Newcomb, "because we find 'The Prince of Good Fellows' a follower of same. The degree of clean cut competitive sportsmanship exhibited in this sport, stands in a class by itself. We have all heard the old saying, 'show me a lover of a gun and dog, and I will show you a good fellow,' and it applies equally to trapshooting."

* * * * * *

"It is also a sport where quick judgment is necessary, as well as quick action. In fact all of its environments are beneficial, as it occupies the mind, eye and muscles, and trains them to act in unison."

FOR DESCRIPTION OF TRAPSHOOTING "THE SPORT OF KINGS" WRITE FOR "SPORT ALLURING" BOOKLET No. 99-S

SATURDAY, NOVEMBER 13

37. Free For All Class Trotting....$ 5000
38. Three Year Olds Trotting, Breeders Futurity (closed).. 2800
39. 2:06 Class Pacing (will close June 1, 1915)..... 20,000

Entries for all above races for the FALL MEETING close on April 1st, 1915, except Nos. 2, 3, 8, 14, 18, 21, 24, 26, 33, 36, 38 and 39.

CONDITIONS FOR ALL RACES CLOSING APRIL 1st, 1915.

All races three heats, money divided 25 per cent to the first heat, 25 per cent to the second heat, 25 per cent to the third heat, and 25 per cent to the race according to rank in the summary. Money in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

Nominators have the right of entering two or more horses in any race by the payment of two per cent. additional on each horse, but only one of the horses so entered to be started in the race, and the starter is to be named by 5 o'clock p. m. the day before the race is to take place.

Entries to close Monday, April 1st, 1915.

Nominators who make entries and ship horses from east of the Rocky Mountains will be given $50 towards the return to points east of the Rocky Mountains on such horses as start in any of the races and fail to win any money.

Entrance fee, three per cent, due at time entries close, two per cent. additional if not declared out on or before June 1, 1915, for the Summer Meeting and on or before August 1, 1915, for the Fall Meeting. Declarations must be paid in full at time of declaring out or declaration will not be accepted. Usual five per cent. additional from winners in all races except Futurity Stakes, Occident and Stanford Stakes.

Professional drivers will not be permitted to drive in Amateur and Driving Club Races. Hopples barred in Amateur and Driving Club Races.

The Management reserves the right to declare two starters a walkover. When only two start they may contest for the entrance money paid in, divided 66 2-3 per cent. to the first and 33 1-3 per cent. to the second horse. A horse distancing the field shall be entitled to first and fourth money only and in no other case will a horse be entitled to more than one money.

The Management reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause.

Entries not declared out by 5 o'clock p. m. the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.

The Management reserves the right to start any heat after the fourth score, regardless of the position of the horses.

All Stakes are guaranteed by the Panama-Pacific International Exposition for the amount offered and are for the amount offered only.

Records made against time, i.e., breeders' records, and records made in a losing race, shall not be a bar to class eligibility.

Any horse that started in 1914 without improving its record, equaling its record and not winning a race, shall be entitled to one second.

The owner hereby releases the Panama-Pacific International Exposition from all liability of every kind and character on account of loss, damage or injury to horses or other property said owner may have on said Exposition grounds; and further agrees to abide by all the rules of the said Exposition, especially as to the use of track for working out as well as for racing, use of stalls, paddock, wearing of colors, uniforms, numbers and general conduct of all employees.

CONDITIONS FOR $20,000 STAKES—FINAL CLOSING DATE JUNE 1st, 1915.

SUMMER MEETING

No. 17—2:10 CLASS TROTTING.....$20,000
No. 33—2:06 CLASS PACING $20,000

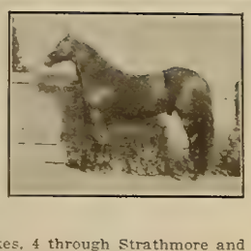
FALL MEETING

No. 2—2:10 CLASS TROTTING $20,000
No. 39—2:06 CLASS PACING $20,000

ENTRIES MADE JUNE 1, 1915, $1000 TO START.

Horses to be named with entry. Entrance fee to accompany nomination. Horses must be eligible on Jan. 1, 1915, to stakes in which they are entered. Stakes divided $5000 to the first heat, $5000 to the second heat, $5000 to the third heat and $5000 according to rank in summary. Moneys divided 50, 25, 15 and 10 per cent. $20,000 Stakes mile heats, 3 in 5. No race longer than five heats, and moneys in races not decided before the fifth heat will be divided according to rank in the summary at the termination of the fifth heat.

A horse with a record shall be allowed one second for each year, if raced, in which it fails to equal or reduce its record or win a race, if same is claimed by the nominator when making the entry.



Time allowances according to National Trotting Association rules.

(STAKES GUARANTEED BY THE PANAMA-PACIFIC EXPOSITION)

Members of National Trotting Association and American Trotting Association. National Trotting Association rules to govern. For entry blanks and further particulars, address

Live Stock Department, Exposition Grounds, San Francisco, Cal.

Derbertha Bells

Licensed Pure Bred. Cert. No. 1172.

NO. 60907 A. T. R. RULE 1.

DERBERTHA BELLS, foaled 1911, stands 15.3, weighs 1200 pounds, and is of magnificent conformation, style, trotting action and color; being a solid dark bay or brown with splendid mane and tail, massive well-formed limbs and feet, beautiful neck and head, fine, well set ear and eye as kindly as a fawn's and as courageous as a lion's. His breeding can only be hinted at here as he traces 20 times to Hambletonian 10—5 through Electioneer, 5 through George Wilkes, 4 through Strathmore and 4 through Abdallah 15 (the big four of the sons of Hambletonian), and twice through his daughters. This breeding is perfectly balanced by 18 crosses to Mamb. Chief 11—5 of these through his greatest son Mamb. Patchen 58 (leading progenitor of the dams of trotting sires), backed up by 2 crosses to Pilot Jr. 12, 4 to Black Hawk 5, 4 to Imp. Trustee and crosses to such other famous broodmare sires as American Star, The Moor, A. W. Richmond, Williamson's Belmont, etc.

I challenge any man to name a stallion with a broodmare inheritance approaching that of Derbertha Bells,—5 crosses to Green Mountain Maid (dam of 9 and Electioneer), 3 to Alma Mater (dam of 8 and 7 sires, including Alcyone and Alcantara), and 1 each to Miss Russell (dam of 7, including Maud S. 2:08¾ and 6 sires, including Nutwood), Dolly (dam of 4 and 5 sires, including Director, Onward and Thorndale), Beautiful Bells (dam of 11, including 4 world's champions and 10 sires) and Minnehaha (dam of 8 and 6 sires). These are pre-eminently the greatest mares of history in point of number of descendants in the standard list, besides 2 crosses to Bertha, the only mare with 2 in 2:04½. 5 in 2:10 and 13 in the list. Counting duplicates this pedigree contains the blood of 20 mares with an average of 9 performers each, and of the 14 mares appearing in the pedigree of two or more 2:10 trotters in 1910 this pedigree contains 8.

His disposition and deportment are in perfect harmony with his superlative breeding and conformation, all that could be desired. I own a yearling filly by him that stamps him as a sire of the first rank, and I invite the most critical inspection both of him and his get. He will be allowed a few choice mares at $25.00 the season with usual return privilege. Tabulated pedigree upon request.

J. W. PENDLETON, Owner,
1601 Seminary Ave., OAKLAND, CAL.

Grandly Bred A Colt Trotter A Proven Sire

Bon McKinney 51480

Cal. State License. Pure Bred No. 1213.
Three-year-old record 2:24½; trial (3) 2:15, 1:05.

Sire of

Bon Courage (2) 2:12¾ **Bon Bell (3) 2:17¾**

Son of BON VOYAGE 2:08 and DAPHNE McKINNEY (dam of Frank N. 2:07¼, etc.), by McKinney 2:11¼; second dam La Moscovita (dam of Bon Guy (3) 2:11¾ and 2 others) by Guy Wilkes 2:15¼; third, fourth and fifth dams also in great brood mare list. Bay horse, in every respect a great individual, with substance, finish, and natural, frictionless trotting action. Very sure foal getter and a steadily rising young sire, his few foals possessing his most excellent qualities to a marked degree. Bon Courage was the only California bred three-year-old to win a heat from Esperanza in 1914.

In the stud, season of 1915, at the Rush & Haile Ranch, Suisun, Cal., season closing August 1st. Fee, $25 with return privilege, payable cash at time of removal of mare. Good pasturage at $2.50 per month. For further particulars address

BEN F. RUSH, Suisun, Cal.

THE ONLY SON OF JAY McGREGOR 2:07¼ ON THE PACIFIC COAST

ONWARD McGREGOR 3, 2:23 1-4

Yearling Trial Quarter in :33

Bay horse, black points, Height 16 hands, weight 1100 lbs. Licensed Non-Standard, Cert. No. 24.

First dam MARY GORDON 2:09¾ by Gordon 3127 (son of Onward 2:25¼); second dam Nell by Young Octoroon, sire of Shadow (dam of 4 and granddam of Peter the Great 2:07¾, J. Malcolm Forbes 2:08, etc. Will make a limited season of 20 mares at Pleasanton Driving Park at $35 with usual return privilege. Every mare bred to him this year will be nominated in the Breeders and State Fair Futurities for foals of 1916 and first payment made by his owner. Address for all particulars

LAST CALL FOR P.-P. I. E. ENTRIES.

Before another edition of the Breeder and Sportsman comes from the press, the entries to all the class races to the harness horse meetings at the Panama-Pacific International Exposition will have closed, though the next publication date follows too closely upon the day of closing, Thursday, April First, for that week's paper to contain the entry lists or even a synopsis of the same, as the mails from even some California points will not reach us until after the last forms have been sent to press. The week following, however, we can make definite announcement as to what is what in the various classes.

Never have prospects seemed more favorable for the holding of a truly great harness horse meeting, both in June and November. Many of the best horses in the country are already on California soil and several stables have signified their intentions of moving here early in April, so that there will be plenty of horses on hand for June, while in November we will get great numbers of horses that adverse circumstances of one kind or another kept from making an appearance in June. Almost all the larger stables of the Grand Circuit have at some time during the winter signified their intention of coming on from Lexington and their entries are expected on April first.

The meetings have been fully advertised in the press in every quarter of the American continent where the trotter is known, and thousands of entry blanks and letters have gone to horsemen throughout the world. The fact is long ere now known in the most remote "cross roads" that the Panama-Pacific exposition is an unparalleled success from every standpoint, and horsemen are going to contribute their share of the support needed for it to establish a "new highwater mark" for its kind that not even even the highest of a coming decade of high tides can efface. From the day of its opening the attendance has been of the figure-smashing kind, and by the time the summer is in its infancy the attendance will have been greatly augmented by the hordes of visitors that "vacation time" will send to us.

Of the many precedents established by the infant exposition, now some thirty odd days of age, none have been of greater import than the high place accorded the trotter in its schedule of major features. For them a sum of many thousands has been spent in providing a racing plant of unrivaled effciency and safety, with every comfort for horse and man, of surpassing beauty and grandeur of environment. For them has been hung up a sum of money, in stakes and purses, in excess of a quarter of a million dollars. Never before has a great world's fair paid such a compliment to the trotter as a provider of popular sport, and a proper support of the meetings on the part of horsemen in general will mean that similar provisions will be made for them and theirs at future like events. Conversely, a lack of support means future short pickings for horsemen around big expositions, but there seems small likelihood of a "flivver" of the latter nature, as the interest taken in the meetings has been general and widespread. Indications are that the rich purse events will not only fill, but fill exceptionally well.

So thoroughly have the meetings been discussed and advertised that we do not believe there is a live horseman in the land who does not know the opportunities they open to him or who is not familiar with the conditions governing them. All particulars appear elsewhere in this issue and for this time all we have to say is—enter "from soda to hock and then call the turn," bearing always in mind that next Thursday, April 1, is your last day of grace for the class races.

A VISITOR FROM AUSTRALIA.

California and California horsemen have had the pleasure recently of entertaining one of the gentlemen who is playing a prominent part in the rise of the trotter into popularity in the lands of the antipodes, Mr. M. E. Pye, presiding judge of the West Australian Trotting Association of Perth, West Australia. Mr. Pye spent several days in San Francisco and vicinity, visiting the exposition and various points of interest, including Pleasanton, where he was greatly interested in the work of the green ones and the more famous members of the senior division, with many of whom he was familiar "on paper." On Wednesday morning he departed for an extended visit in the east, planning to return to the coast the latter part of May in order to be present at the June meeting at the exposition before sailing for his home.

As a result of a number of pleasant chats with the Perth official in which the amount of curiosity displayed on "our" part would have done huge credit to the proverbially curious cat or the insistently inquisitive feminine of the human family, we are more than ever convinced of the soundness of a statement made previously in the columns of this publication to the effect that during the few years that the trotter has been known to our sister countries of New Zealand and Australia, the promoters of the sport in those lands have made far greater proportionate progress in establishing it on a firm basis than have our people in the whole period of the trotter's history. Only a few years ago, especially in West Australia, trotting races were unknown. Today the meetings of the Perth association outrank those of the galloping courses in popularity with the general public, and the galloper has been an institution in that locality "since time was."

About the only points of resemblance between a meeting at Perth and a meeting in this country lie in the fact that the contending horses trot or pace on an enclosed track. From there the contrast is sharply marked, and some of our American sticklers for adherence to the plans upon which trotters were raced by our forefathers will receive a rude shock should they see this story and learn of the methods under which trotting in Australia is making such rapid strides.

Racing at Perth is conducted throughout the entire year, the meetings being held on Saturday nights, under the illumination provided by a hundred thousand candlepowers of electric light, over a third of a mile course built of shell. There are no heat races, the events being of the dash order, from one to two miles, and seven or eight races usually constitute the program. The standing start is used and the distance handicap, all horses leaving their marks at a pistol shot. The totalisator is in use and bookmaking is licensed. Entrance fees are arranged so that they are about 2½ per cent, and often as many as thirty nominations are received for one event. There are no judges save the presiding judge and time is recorded as much as a safeguard against crooked driving as for a purpose of classification.

Doubtless by this time a good many readers have thrown up their hands in holy horror, but just keep this in mind—the system works! You are due for another jolt. The wishes of horsemen are not regarded in framing stakes, handicaps or racing rules, the protection and encouragement of the public being the first consideration with the association. Every rule is made to be obeyed in letter and spirit, and penalties for infractions follow quick and sure.

There are a number of things about the method of racing there that appeal to the writer to a considerable degree, when contrasted with our system. Primarily, a meeting a week means a continued turnover and a continued chance for earnings, and as a horse does not have to be keyed up for a lot of scoring and a number of repeats, he probably would last as long there as here and have greater earning capacity. If a mile suits him he can race a mile—if two miles, all right. If he can trot or pace in 2:20 he has the same chance to win that he would have as a 2:10 performer—and by the same system he does not eventually become outclassed owing to speed, as he is automaticallly cared for in the handicap. Dash races, too, promote honest driving to win as there is no incentive for "laying up." A horse laid up one week and winner the next on an improvement of over three seconds becomes—with his driver and owner—an object of suspicion and is penalized by disqualification or suspension, and Australian suspensions are not overnight affairs. Handicaps are made according to winning performances, but by an ingenious system of timing whereby the performances of all horses finishing ahead of the flag are registered, the consistency of the handicap—and of the horse's rating—can be readily determined. So satisfactory has the system been that closely contested finishes are the rule, and these, of course, are more conducive to public interest than are faster "processions." Handicapping is kept right up to the moment, and should a horse be entered in two events the same evening and win his first start in improved form over his previous rating he would be re-handicapped the next time out on a pro-rata basis that would equalize the winning chances of the remainder of the field. The whole system is so different from anything with which we are familiar that only a personal observation of a few meetings would give an American a real idea of its merits or demerits, but the writer yet maintains that there are things to be learned from our friends across the sea.

For instance, the timing. We have had agitated in this country the timing of the first four horses in each heat, and in certain quarters the idea has been derided as an impossibility, or practically so, and considerable amusement has been derived by some persons in "imagining" timers for four horses, or every horse in the race. These bright gentlemen have yet to learn the lesson that fell to the writer's lot—that watches are made whereby the time of any number of horses, finishing as far as or farther than one-fifth of a second apart, can be recorded correctly by one man. We are a bunch of real bright ginks as long as we stay at home and no one comes to visit us!

The West Australia Trotting Club has about $20,000 invested in its present plant, which is on leased land. So firmly established is its following that it plans at present to pay $30,000 for a bit of land upon which to erect its own plant, with probably a half-mile track and all accessories, bringing the investment to somewhere about $55,000, exclusive of a new totalisator which will cost some twenty-five thousand dollars and which is being constructed to handle wagers on twenty-eight horses. Bookmakers doing business on the Association's ground are licensed for that enclosure only and bonded, so the public is protected both ways.

Mr. Pye is an interesting talker and enthusiastic over the future of the sport in his home. His description of their system is much more thorough than is this short sketch, as he is conversant with it from every angle and is ever on the alert for suggestions leading to its improvement; he will be with us some weeks, and the writer takes pleasure in commending him to the good offices of American horsemen whenever and wherever they meet.

P.-P. I. E. OFFICIALS CHOSEN.

After a number of "false starts" owing to sickness or a pressure of other business affairs, the Executive Committee in charge of the harness horse meetings at the P.-P. I. E. met this week at the office of the department of live stock and gave consideration to a number of matters of importance, chief among the actions taken being the selection of the more important officials under whose guiding hands the meetings are to be conducted.

Applications for the position of starter and presiding judge were on file in profusion from all quarters of the land and the committee had a good deal of a task confronting them in making a choice from the array of talent at their disposal. North met south and east met west in the competition, and when the day was over it was found that an "intersectional compromise" had been arrived at in the most important instances, Mr. O. P. Updegraff of Topeka, Kansas, and Magnus Flaws of Chicago having been chosen as starter and presiding judge, respectively. Both gentlemen are well known to horsemen in all parts of the country, either by reputation or personal acquaintance, and the action of the committee will meet with general approval. Mr. Flaws has long been one of the "standbys" of the judges' stand on a number of major eastern circuits, and Colonel Updegraff has been in the business equally as long a bit farther west. His last appearance was at Phoenix last fall, where he administered the duties of presiding judge most agreeably while Dr. Stone did the starting. Robert S. Brown of Petaluma, long regarded as one of the best men seen in the stand on the coast tracks, has been asked to act as one of Mr. Flaws' associates, while S. Christenson, to whose initiative the exposition meetings are in a large extent due, was chosen as one of the timers. The remaining officials will be selected at a later date and will be of the same degree of competence as the gentlemen above mentioned, so horsemen may be assured of the manner in which the racing will be conducted.

GRAND RAPIDS EARLY CLOSERS.

Grand Rapids, along with other members of the big line, has made faster classifications for its major stakes for its meeting of August 9 to 15, making the following four events to which entries close on Tuesday, April 6: No. One, 2:08 Trot, $5000; No. Two, 2:14 Trot, $3000; No. Three, 2:08 Pace, $2000; No. Four, 2:12 Pace, $3000. The complete starting fee in each event is five per cent, payable in four instalments, nominators having the privilege of declaring out at any time and being liable only for amount due prior to date of making declaration. Additional entries may be made in the same event by the payment of an extra 2½ per cent in each instance, though if two horses start the full five per cent will be charged. Races are three in five under the old system, with the customary four moneys.

In addition to this good offering of early closers, Secretary Moone announces that a comprehensive program of class purses of $1000 each will be prepared, to close July 27, and that especial care will be taken in the arrangement of this schedule to provide classes most acceptable to horsemen who patronize the major events, enabling them to get other engagements for the same horses if desired. The full announcement, with conditions and detailed schedule of payments, appears elsewhere in this publication.

General Sherwood's Tribute

It is usually a case of "nobody home" with the writer when it comes to reading the Congressional Record, but there is a great pleasure to be derived by every horseman from a perusal of that portion of the transcript reprinted herewith—an address in behalf of the horse delivered in the halls of Congress by Representative Sherwood of Ohio, longer known to fame as General Isaac R. Sherwood, "gentleman and scholar" if there ever was one, soldier and statesman from young manhood, and horseman from infancy. The General, who is a welcome figure in any company where horsemen are assembled and who for his city use has held steadfast to a trotting team beside which the luster of the shiniest limousine is dimmed, is no "fanatic" on any topic, and in this instance has presented an able brief for which he has earned the thanks of thousands of friends, old and new. You, too, will thank the General after reading the following, and will feel that the time consumed has been well and pleasantly spent:

Mr. Speaker, the ponderous and unusually expensive Agricultural bill carries a liberal appropriation for horse breeding and experiments in live-stock production. It is the universal opinion among expert horsemen that there are sufficient ways to spend the tax money of the people without going into competition with private enterprise in scientific horse breeding. Every intelligent horseman knows that the United States standard-bred trotting horse, bred for over three-quarters of a century by private enterprise and private capital, is the superior of any horse in either Europe or Asia. He is in stamina, quality, speed and style the superior of the Orloff trotter bred under Government auspices in Russia for a quarter of a century longer than the American trotter.

The following resolution, unanimously adopted, expresses the prevailing views on this subject of not only saddle-horse devotees, but of all other classes of horsemen in the United States, especially the breeder of standard trotters and thoroughbreds:

Resolved by the American Saddle Horse Breeders' Association, in annual meeting, this April 11, 1913, That it be, and is, the sense of this meeting that the breeding of horses is not properly within the function of the Government, and the undertaking on the part of the War Department and Department of Agriculture of the United States Government to breed horses for Cavalry service is an unwarranted and unjustifiable interference with private enterprise; and further, that each member of this association be, and is hereby, requested to communicate with his Member of Congress and two Senators from his State, protesting against this Government's interference with private affairs.

Hostile Legislation Has Ruined Harness Racing.

How is it possible to promote scientific horse breeding by the United States Government in the presence of so much hostile legislation by the States to wipe out horse racing or horse culture? Speed horses of high quality commanded very remunerative prices when breeders were allowed to race their products in the grand circuit. There were plenty of ready home buyers at the end of the grand circuit for tried and educated horses of speed, manners and quality, and buyers from Russia, Austria, London, Paris, and nearly all the leading capitals of Europe. Millions of good gold dollars were brought into the United States by foreign buyers, prices ranging for stallions of fashionable breeding and extreme speed from $25,000 to $75,000. All the stock farms were prosperous, and there was neither a demand nor an excuse for Government patronage or Government aid until the hypocritical blatherers, masquerading as reformers, started on their destructive work.

I am not here to criticize the efforts of the Government to promote scientific horse breeding, but to call attention to the notoriously unfortunate fact that nearly all the States north of the Ohio River have enacted hostile legislation to discredit and practically ruin scientific horse breeding. This has been done largely by legislation against pool selling on race tracks. This legislation has practically ruined the splendid series of harness racing known as the grand circuit, which a decade ago furnished to millions of horse-loving enthusiasts the most wholesome and recreative and alluring of all the outdoor sports and pastimes of the American people. This legislation has also ruined the county fairs, which for half a century have afforded so much wholesome enjoyment to the boys and girls of the farms.

Has Only Increased Gambling.

And what has been the result of this legislation upon the speculative element of modern society? Has it stopped gambling? No; it has increased it. Has it elevated the moral tone of society? No; it has degraded it. All peoples—Christian, pagan and Mohammedan—have their recreations and pastimes. If they are not allowed the best they are liable to go to the worst. In the United Stateswe have practically killed the high-class horse racing and inaugurated prize fighting, baseball and football. And we are now gambling three times as much on these games as we ever did in the very heyday of horse racing. And a game that is outlawed in every civilized country around the world—prize fighting—is now the most popular pastime of the sporting element of the American people. The brutal bouts of the nose smashers and rib crackers of the prize ring are the leading features of all our leading daily newspapers. They are even betting disgracefully on the polo game. And the select ladylike are gambling on it far more than was ever known on race horses.

Here is a reliable telegram showing the big hit made by Mrs. Hitt:

Los Angeles, Cal., March 4.

Perry Beadleston won the laurels in today's polo round robin, his individual score of 6 being the best. Mrs. William Hitt, formerly Katherine Elkins, bid in Beadleston at the auction and pool last night for $35 and won the $700 pot. Some one estimated that at least $12,000 a game has changed hands during the season.

And no protests made anywhere.

As I never bet a dollar in my life on a horse race and never bought a pool ticket on a horse and never bet on any other sport, not even a twilight tango, I am giving an entirely disinterested opinion on this vital question, based on over 60 years of personal observation.

When the football team of the University of Pennsylvania met in combat with the football team of the University of Michigan at Ann Arbor, Mich., this team of high-class university students carried with them $4,000 to bet on the game, and the game was played and the money was bet within the sacred precincts of that great university. Not a sound was heard against it. Had a horse race transpired on that highly cultivated, ethical soil, with $4,000 bet on the result, all the gamblers in the game would have been arrested and penalized. As an ethical question, is it more of a crime, either morally or by statute, to bet on a four-legged animal than on a two-legged human being?

In England, when Edward VII was Prince of Wales, only a few royal degenerates of his fast set patronized the prize ring; but in all the larger cities of the United States the "four hundred" are in the craze to witness the nose smashing and human blood letting of the prize ring. In view of this deplorable degeneracy, the harness horse offers today the most recreative and morally wholesome entertainment of all the outdoor sports and pastimes—a sport free from both brutality and blood, a sport free from smut and immoral trend, a sport full of good health and good cheer. The actor and the showman are always the best types of the moral and social elevation of any people. The actor acts to please only. If the people demand smut, the actor is always a smut machine. If the people demand brutality and blood, the prize fighter and the bully become the stars. How far are we away from that condition now? The grand plays of Shakespeare and all dramas of moral import are everywhere being supplanted by the frivolous, vulgar and smutty vaudeville.

Why God Created the Horse.

The monkey and the magpie, on their respective perches, are always interesting. The former with his grimaces and antics and face, reminding us of the primeval man, and the latter, with his song and chatter, seems the incarnation of the music of the woods. But it is not given to man to know why an All-Wise Creator made them as the companion of the forests. But every intelligent human being knows why God created the horse. In the domain of the utilities of life, in the more esthetic field of the recreations, in poetry and song and sculpture, and on the red fields of war, the horse, since creation's dawn, has been the omnipresent companion and helpmate of his master—man. Let us now scan the law of the inevitable—the natural loves and instincts of man as illustrated by all history. From the ancient Pharoah of the Exodus to Gen. Phil Sheridan, the horse has shared the honors of war, the glamours of love, the wild witchery of chivalric tournament, and the gloom and glory of all the crusades, Christian or Mohammedan. By a law of Moses the Jews were forbidden to ride horses. The horse at that period, before invention of gunpowder, was regarded solely as an engine of war, and Moses desired to make his people a pastoral people, devoted to the arts of peace. This is why Christ rode into Jerusalem on the more docile and peace-loving ass—to symbolize more fully his mission of peace and good will to all mankind. And right here let me turn aside to point a moral. Today we have too much of the machine in our social and political life. The almost universal pursuit of money is trampling in the mire all poetic and patriotic feeling and wearing all the verdure out of men's hearts—and women's hearts, too.

The Horse in the Heroics.

From time immemorial the horse has been immortalized with his immortal master. He has been perpetuated in stone and iron and bronze with the poets, philosophers, and soldiers of the world.

In Berlin it is Frederick the Great and his horse.

In Trafalgar Square, London, it is Lord Wellington and his horse.

In Paris it is Napoleon and his horse.

In our National Capital it is Grant and his horse, Jackson and his horse, and glorious old "Pop" Thomas and his horse. In Richmond it is Washington and his horse, Robert E. Lee and his horse, and Stonewall Jackson and his horse.

On the obelisks of dead old Egypt, on the Arch of Trojan at Rome, and the arch of triumph that Napoleon built in Paris to celebrate his victories, the horse and this hero rider are multiplied on every ascending circle.

The Old Testament prophetess Mriam, taking her timbrels to swell the song of triumph which Moses gave to the poetry of the ages, in celebrating the drowning of Pharaoh and his cavalry in the Red Sea, says:

"Sing ye to the Lord, for He hath triumphed gloriously. The horse and his rider He hath thrown into the sea."

You will notice that the inspired prophetess gives the horse first mention over the soldier, doubtless on his merits, as the more humane of the two.

Prof. Darwin does not tell us in his great work on the evolution of man the number of years that elapsed between the development of the manlike ape to the apelike man; but, since history began, with its dim and uncertain light, I believe the horse with hoofs to have been coexistent with the devil with hoofs and coexistent with the apelike man, if not coequal.

Prof. Leidy, very high authority, says the prehistoric man had a prehistoric horse for his companion. The same high authority says that while it is true that Columbus discovered no horses with the native Indians when he discovered America, there is no longer room for doubt that the horse lived on the American Continent before the race of Adam.

I believe that he lived alongside of the mastodon as the companion of prehistoric man.

Dr. Allen, in his great work entitled "Civilization," gives a vivid picture of the first arrival of the barbaric Huns in Europe in the fourth century. The chiefs are all mounted on magnificent horses, richly caparisoned, that, as Lord Byron says in immortal Mazeppa, "look as if the speed of thought were in their limbs."

In Bullfinch's fascinating book entitled "King Arthur and His Knights," which includes the heroic age of chivalry, we find the horse the conspicuous figure in every joust and tournament escapade and romance. He is prominent in all the songs of the troubadours, many of which were written by women. Indeed, the word chivalry is from the French word cheval, a horse.

The history of all civilization, Christian, pagan, and Mohammedan, prove that God made the horse for man's utility, comfort and pleasure. Those who think that any man-made machine, however artistic, can ever take his place know little and think less. Of course, we shall have machine motors, as we have wax flowers and paste diamonds and crockery dolls. But wax flowers will never shed fragrance on the bosom of a divine woman, like the God-grown blossoms; and the crockery dolls will never take the place of real babies; neither will the counterfeit blaze of paste diamonds ever mock successfully the rainbow tints of the real gems. And the live horse, the horse immortalized in song and story and sculpture and romance and war, will ever be animate and imperishable; man's best and most wholesome friend among the animals.

The Horse in Heroic Literature.

It is a historical fact, with 2,000 years of civilization to verify it, that the introduction of the horse in public amusements has always marked the improved moral tone of every people, either Christian or pagan. In that period of brutal rule so vividly depicted in that great historical novel Quo Vadis, when Nero sat above Rome, wild beasts from the forests of Germany were brought to fight gladiators and devour Christian martyrs in the Roman amphitheater, amid the wild applause of the Roman populace. Later, when Rome was touched with a gentler and more benign civilization, under the Emperor Augustus, the bloody bouts between men and wild beasts were supplanted by the chariot races, where the horse was the main factor of the entertainment.

All the poets of modern times put horses under their heroes. King Richard III, according to Shakespeare, offered his whole kingdom for a horse, after his game steed fell dead on the bloody battlefield of Bosworth. He could not get another horse on his offer, and thereby lost the battle and the crown, and the blood of Plantagenet was dried up forever, and the blood of Tudor came in to rule England, all for lack of a horse.

All the standard English poets were horse fanciers. Lord Byron's Mazeppa, a poem of horse and romance and escapade, is one of the grandest in the language. Sir Walter Scott in immortal Marmion, puts into Lady Heron's sweet mouth the story of "Young Lochinvar," one of the most thrilling musical gems in the English language. And young Lochinvar's horse is the supreme factor of the escapade. You remember, when young Lochinvar stole away the bride, that was about to wed "a laggard in love and a dastard in war," he caught her on the home stretch, and throwing her willing form behind his own, astride his prancing steed, while two pair of chivalrous legs were thrilling the throbbing ribs of his game flier, the lads and lassies of the laggard bridegroom had no steeds fleet enough to follow and young Lochinvar got away with everything.

Even Tennyson, late poet laureate of England, with all his finical, fine ladyisms of versification, occasionally braces up into the robust heroic when he mounts the English thoroughbred. He does this in "Locksley Hall," but his best effort by far is "The Charge of the Light Brigade." But Tennyson is hardly in the same class with Sir Walter Scott. In all the minstrelsy of Scott the horse comes in to gild the heroics, whether he sings of love or war.

And the finest dramatic poem of our great Civil War is "Sheridan's Ride," written by our Ohio poet, T. Buchanan Reed, in which the horse is the hero, because without that game flier Sheridan could never have turned defeat into victory in that immortal 20-mile ride from Winchester to Cedar Creek. It was the fleet black stallion that carried Sheridan that gray October morning in 1864 that made victory possible. And the poet tells it well:

With foam and with dust the black charger was gray;
By the flash of his eye and his red nostrils play,
He seemed to the whole great army to say:
I have brought you Sheridan to save the day,
From Winchester, twenty miles away.

* * * *

And when their statues are placed on high,
Under the dome of the Union sky,
Be it said in letters both bold and bright,
Here is the steed that saved the day,
By carrying Sheridan into the fight
From Winchester, twenty miles away.

In the language of Lord Byron, in his immortal "Mazeppa," "Bring forth the horse"—the harness horse—

(Continued on page 6.)

Entries for the class races at both meetings to be held in connection with the P.-P. I. E.—June 5 to 19 and October 30 to November 13—close NEXT THURSDAY, APRIL FIRST.

Canadian Horses in California

Of the many lands that are participating in the exposition and helping to lend to it a truly international air, none are playing a more prominent part than our sister country just across the line to the north of us—the Dominion of Canada. Her support was promised from the first and she has more than made good in every way. Her building at the P.-P. I. E. houses one of the greatest displays of varied resources of wealth ever assembled, from both utilitarian and purely artistic standpoints; her participation in a number of special features is also assured, and she has sent down the best of her harness horses to compete for the big stakes and purses that will be raced for in June and November, a number of her breeders and owners being among the list of original nominators to the major events.

The most recent arrivals from north of the boundary are Barney Barnes and W. W. Fleming who landed at Pleasanton early last week after a good journey from Winnipeg, Barney bringing Joe Carson's good pacers College Gent and Strathtell, and the Fleming stable including Billy's own trotter Tropic Dawn and the racing string of E. J. Rochon of the Leland Hotel, Winnipeg—The Beaver, The Badger, Alberta Dillon and Seneca Boy, all of which will be among the fields at the exposition meetings.

College Gent, the Carson entry for the big pace, is an Oregon product, bred by F. S. Heard of Haines, foaled in 1908, a son of Kentucky Patterson 32074 and Belle H. by Senator Crisp 46250. He made his first bow to the public as a three-year-old at Baker City, finishing third to El Reno and Bill Hanley, and as a four-year-old started in four events, three of which he won, standing fourth in the other. At Boise that year he defeated Lady Verton, who was being teamed by Barney Barnes, his subsequent purchase by the Canadians following this showing. His record for that season was 2:14¼, and in Barnes' hands in his first season across the line he was invincible, making a clean sweep of eleven winning starts, losing only three heats during the year—one each to Friday, Pointer's Daughter and King Seal—and going into winter quarters with a record of 2:09¼, being the first and only 2:10 performer to be credited either to Kentucky Patterson or the daughters of Senator Crisp. In 1914 he made a dozen starts in good company, winning half of them, standing once second and five times third. He holds the track record of 2:10¾ at Red Deer, and obtained his present mark at Yakima in the fastest race ever pulled off in Washington, the time hung out for the winners (which in each case is the present tag carried by them) being 2:05 for Ovieda, 2:06¼ for Hal Boy and 2:06½ for College Gent, the latter heading the summary. He is a racy looking black fellow who has yet to learn what it means to finish outside the money—and his friends claim that there is no sure thing that he will be taught this lesson at the P.-P. I. E., regardless of the time and the company.

Strathtell is a bay horse of a different type from his stable mate, also a year older. He comes from down in the corn belt, having been bred by Roy Johnston of Centerville, Iowa. His sire is Motell 40427 (son of Moko and Actress T. by Axtell 2:12) and his dam is Ruth Strathberry by the great old Iowa race horse and sire, Strathberry 2:04¼. In 1911 he started in four events, finishing twice third, once second and once first, acquiring a record of 2:24¼. The following season he competed in eleven events, winning two, being twice behind the money and winning his fastest heat in 2:17¼, being twice second in 2:13¼ and once second in 2:12¾. Again raced in the central west in 1913 by his breeder he made a most excellent campaign, winning eight races and being three times third, pacing a number of times below 2:15, his record of 2:14¼ being made at Sac City, where in the same week he won two five-heat races. Last season witnessed his appearance in Barnes' hands, and while he came slow at first and failed for a few early races to land in the money, he improved as the campaign lengthened and from Edmonton on he never failed to get a portion of the purse, from fourth to first, racing against such horses as Ovieda, Imbro, Yedno, Jim Hill, May Davis, White Sox and others with plenty of speed.

The Rochon pacers that Mr. Fleming will race this year, The Beaver and The Badger, are both by Searchlight 2:03¼, the former out of the great brood mare Ripple 2:28½ by Glenbrook 25505 and the latter out of Nancy H. 2:06¼ by Gambetta Wilkes 2:19¼. The Beaver has been raced for two years by Barney Barnes, beginning his career in June, 1913, at Winnipeg with a straight heat win, the fastest heat of which was in 2:16¼, a figure from which he clipped a second the following week at Portage la Prairie in a winning race. Back at Winnipeg he was once winner and once second, to Grand Opera, and won his starts at Regina and Saskatoon, his best record of the year being made at the former city and standing as the track record at that time. Last season he made but three starts, his first one at Portage la Prairie where he was second to Prince Wood in a hot five-heat battle, winning the first two heats in 2:10¼, 2:09½. At Winnipeg he yielded the head of the summary to Haltamont after the same kind of a contest that he figured in at Portage, and in the free-for-all pace at Brandon, half mile track, he nipped two heats from Molly Darling in 2:09¼, 2:08¼, and outranked such good ones as Merry Direct 2:06¼, Ella Penrose 2:07¼, Fern Hal 2:06¾, Alcyfras 2:03¼ and Knight Onwardo 2:04¾. The Badger has done very little racing and is yet eligible to the green classes, his mark of 2:15¼ not being a win race record.

Alberta Dillon, Mr. Rochon's fastest record trotter, is a daughter of Sidney Dillon and the double producing matron Miss Lamartine by Lamartine, being bred, trained and originally raced by the Indiana horseman, Volney French of Montpelier. Volney raced her easily for a few seasons over Indiana, Michigan and Ohio tracks and gave her a mark of 2:17¼, the lass trotting in that notch on two separate occasions. Her best season was in 1913, the first year Barnes had her, when she raced from June till late fall, making twelve starts in which she was six times first and but three times unplaced. Her winning races were in almost every instance hard fought, split heat affairs, her record of 2:10 being made at Salem in the third heat of a five time contest, with Dr. Wayo and Borena D. as her main contenders. In 1914 she raced against such tough nuts as Dean Swift 2:08, Grattan Boy 2:10, Kid Cupid 2:08¾ and others of their kind and was but once not included in the money cutting.

Seneca Boy is the remaining member of the Rochon string, and his blood lines call back some famous days, as he is by King Entertainer 2:10¼ and out of the dam of the unfortunate Penisa Maid 2:04¼—Seneca Maid 2:20 by John Adams. He was foaled in 1909, and as a three-year-old was started four times in Canada and once in this country in mixed events for that age, winning his race and obtaining a record of 2:25¾ at Moose Jaw, and ranking second in his other starts. The following season he was started but twice, being third each time, and last year as a five-year-old he made a nice campaign for Barnes, trotting to a record of 2:15¼ at Portage la Prairie and showing considerably faster later in the year. He won four races and was only once behind the money—in the heavy going at Salem in the race in which only Dean Swift and Rags finished the contest without interference from the flagman. Earlier in the meeting, over the same course, he was three times second to Dean Swift in 2:08½, 2:11¾, 2:10, so that his future looks pretty bright.

Tropic Dawn, Mr. Fleming's own trotter, has had less racing experience than any of her stable mates, but has demonstrated good trotting qualities. As a four-year-old in 1913 she raced at a number of Canadian points, also at Hamline and Milwaukee, winning two races and never finishing behind the money. She figured in some tough "splits" and is bred to like that kind, being by Symboleer 2:09½ and out of Panadora by Allerton 2:09¼, second dam Fay Glen (dam of Stroller 2:05¼, etc.) by Belsire 2:18. She was held over for 1915 and Mr. Fleming modestly describes her as "an average kind of a trotter," so she will probably do.

Californians are more familiar with the other good Canadian trotter now at Pleasanton—Grattan Boy—as he has been with us all winter and Harry Bell is well known to coast horsemen in general through former seasons spent here. In 1913 this lad was raced through the Canadian prairies without distinguishing himself, but in the winter of 1913-1914 annexed considerable fame and money over the ice courses, ranking the trotters racing in that fashion. Evidently he profited considerably in his experiences both fighting the dust out on the prairies and picking little holes in the ice with his sharp calked shoes through the winter, as he came out strong in his campaign last summer. Starting off at Edmonton in May he made a poor showing for John Wall, being behind the money, but that was not to happen to him again for a long time. At Saskatoon he was second, and clear on through the Canadian circuit he was either first or second—more often first. At Detroit he defeated a field composed of such campaigners as Fair Virginia, Peter Billiken, Exall and Bertha Carey, racing to his present record of 2:09½. The Bells bought him about this time and "Pop" Geers had the mount behind him for the balance of the season. At Columbus he was second to Brighton B. in a six-heat race, and at Lexington was behind the money in the memorable contest in which Tommy Torn, Lizzie Brown, Maymack and Oakdale hung up some new world's records. At Dallas he was sick and distanced, loading out for Phoenix with a high temperature. At the Arizona capital he was unable to race, and even when he landed at Pleasanton he was far from a well horse. There, however, he has rounded to nicely and has wintered in excellent shape. He is a horse whom the critics regard highly and promises to play a good part in this year's races, both in California and elsewhere. His winnings were in excess of $6300 in 1914, and out of eighteen starts he was ten times winner and five times second.

In addition to these stables, the Canadians are further represented by the horses now in training at Los Angeles in the hands of James Stewart, owned by Messrs. McClain, Stewart, and others, including the great pacers Homer Mac 2:06¾ and Patrick de Oro, with a three-year-old record of 2:22¼ and a trial at the same age in a fraction slower than 2:08 over a two-lap track. The whole representation is most worthy of respect in casting up the future dope, and after the way Canada and her horsemen have joined in making the P.-P. I. E. an unparalleled success we shall not begrudge these good sportsmen the money they take from us in June and November.

—o—

Vice-President A. Ottinger of the San Francisco Driving Club made the Pleasanton journey last Saturday and threw a few miles into Copper the Ore, Dick W. and Zulu Belle, working the latter a pretty fast clip minus her customary "drawers," which she didn't seem to miss. "Ot's" gray sweater looked warm and "comfy" but the "ice cream" breeches that he sprung on an unsuspecting public looked a bit chilly even for Pleasanton in March. Schwartz worked Agnes Carter for him late in the day, the "come back" going some nice miles with the final quarter at a 2:08 clip. Just where all the scare head stories about the holes in this girl originated is a bit vague, as she behaves perfectly, is an excellent individual and sound as a nut to all appearances.

Entries for the class races at both meetings to be held in connection with the P.-P. I. E.—June 5 to 19 and October 30 to November 13—close NEXT THURSDAY, APRIL FIRST.

One of the leaders of the Canadian "Expeditionary Force"
THE BEAVER 2:08¼, BY SEARCHLIGHT 2:03¼
Entered in the twenty-thousand-dollar 2:06 pace by E. J. Rochon of Winnipeg.
Has been under fire on the two-lap fields and has had his hindquarters
facing the enemy at the wire on the shady side of 2:10.
W. W. Fleming up.

GENERAL SHERWOOD'S TRIBUTE.

(Continued from page 4.)

man's best, most useful, and most wholesome animal friend. Let us see him, often and again—in the swift-footed flights of the charmed circle, in the bright aurora of the twentieth century, under our benign skies and suns, under our flag with the gleaming stars of States.

Have you ever stopped to think what would have become of Gen. Sheridan and our army that desperate day had Gen. Sheridan made the ride in an automobile? Could he have made it with a "busted" tire Could he have inspired the boys with courage anew with a machine instead of the black charger that, with foam on his flanks and nostrils red as blood, carried the courage of his great master into the hearts of the musketeers? An immortal poem was born that day that will go singing down the ages; not inspired by Gen. Sheridan, but by Gen. Sheridan and his horse.

It is not the war horse that Christian civilization of the twentieth century, now in its dawn, should care to exploit. It is the domestic horse. The horse of peace, the horse that carries his master, in the exhiliration of the wind, along pleasant valleys, by running brooks, and meadows green with verdure, by woods vocal with the song of birds, to make him forget his nervous worry over business cares and catch an appetite and the serene joy that awaits good digestion.

The Horse in Mythology.

Is it possible that a mere animal like the horse should have been a vital part of the creed that linked men and gods in the religion of the most poetic and accomplished of all the ancient peoples? The religions of ancient Greece and Rome have long since become extinct, but the poetry and literature of the age of mythology have enriched the literature and poetry of all living languages. The religion of these two, now dead, civilizations is the most poetic and irresistible of all the high-wrought witcheries of men or gods in the mystic domain of the supernatural. And if the horse is a vital element in the ministering power of the gods of mythology, it indicates that of all the animals in the animal kingdom the horse, in the conception of the pagan world, was endowed with a creative potency ranking with the superior gods.

We learn that the god Neptune controlled all the waters of the great ocean—the Mediterranean Sea being the only ocean the Greeks knew—and that he created the horse. Homer, in his Illiad, sings of Neptune thus: "He yokes to the chariot his swift steeds, with feet of brass and manes of gold, and himself (Neptune) clad in gold, drives over the waves."

Prof. Murray's Manual of Mythology, speaking of Neptune and his sea horses, says: "The sea rejoices and makes way for him. His horses speed lightly over the waves and never a drop of water touches the brazen axle."

In Greek statuary Aurora is represented as a spirited maiden with expansive wings, clad in flowing robes of white and purple, riding the Pegasus, and distilling through clouds of amber the morning dew. For the benefit of all horsemen who dote on pedigrees, I submit herewith the high-wrought pedigree of Pegasus:

When the cruel god Perseus cut off Medusa's head, as the mythical story runs, the blood sinking into the earth produced the winged horse Pegasus. Minerva, the Goddess of Wisdom, caught him wild and tamed him, and presented him to the Muses. And the fountain of Hippocrene, on the Muses' Mountain, Helicon, was opened by a kick of Pegasus' hoof. This seems like a large horse story, but it is as reliable as some of our modern tales. Minerva gave Pegasus a bridle of gold lace, and with his wings he soared the sky like a bird. In fact, he is the original first-class flier in the grand circuit of the skies. An agile youth, who came to the Court of the Gods, named Bellerophen, rode Pegasus into the upper air and with his spear killed the fiery dragon, Chimaera, as he was cavorting the sky.

Not only is the horse a foremost factor in the religions of ancient Greece and Rome, but he figures still more conspicuously in the religions and mythologies of ancient Persia and India. In the Vedic hymns of Persia, the most interesting and instructive of all the weird and mystic literature of that country, we gather a true idea of the religion of the ancient Persians and learn therefrom the most sublime conceptions of the Supreme Being. These hymns were written a thousand years before Christ. The Vedic theory of the creation is far more poetic than the Mosaic account. It attributes all created things to a single being—the Golden Child, "who established the earth and this heaven, who built the firmament of ether, measured the air, and set the sun on high, and who begot the bright and mighty waters." In the Vedic hymns, running through fifty pages of Prof. Timothy Wwight's great book, "The Ancient Classics," I find the horse is mentioned in the supernatural control of earth, air, and the heavens. Here is a specimen quotation:

> Oh Rudras, friends of the golden chariot, come hither for our welfare, possessed of good horses and chariots, penetrating the clouds, shaking down the rain from the sky; red horses and faultless, noble by birth, golden breasted. Oh, oh, Maruts, you have given us wealth of horses, chariots, and heroes; golden wealth.

In the wonderful religion of Buddha, the first great teacher and prophet of the Golden Rule, the horse has a conspicuous and ever-abiding place. According to Prof. Ephephanius Wilson, in his fascinating book, the "Life of Buddha," the great Buddhist prophet taught the perfect life of virtue, temperance, morality, peace, and brotherly love at least 800 years before Christ. In fact, Buddha is the first great philosopher of human destiny—immortality—as we now understand soul life. And after the lapse of over twenty-five centuries Buddhism still stands first among the four great religions in the number of its devotees. In the life of Buddha as translated from the Chinese into English by Prof. Samuel Beal, Buddha was the world's first great teacher of the true life. Like the only Christ, Buddha was sorely tempted to abandon the path of virtue and sobriety, but he was not tempted by a personal devil, but by the spirits of evil in the guise of bewitching nymphs and, according to all the books on Buddhism, it was the horse that carried Buddha away from temptation to a rarer air and the calm delights of flower-embowered gardens. The temptation of Buddha forms a most delicious chapter; first translated from the ancient Sanskrit language into Chinese by the great Chinese scholar, Dhar Maraksha, and from Chinese into English by Prof. Samuel Beal:

> Dancing women gathered about the Buddha; around his straight and handsome form. Their half-clad forms bent in ungainly attitudes; pillowed on their neighbor's lap, their hands and feet entwined together, their bodies lying in wild disorder; their hearts so light and gay, their forms so plump, their looks so bright. But the prince (Buddha) stood unmoved by his horse; his milk-white horse—unmoved. And now he said, "I leave this false society. I will mount my horse and ride swiftly to the deathless city. My heart is fixed beyond all change." The Devas gave spiritual strength, and the prince (Buddha) mounted the gallant steed, fitted with all his jeweled trappings for a rider.

All the above is supposed to have happened over 2,500 years ago. And yet what turf writer of today can give a more dramatic sketch of the high-mettled horse than this? Here let me point a potent moral to adorn this dizzy, divinized history of the escape from temptation of the world's first great prophet.

The Horse Saved Buddha.

Was it not the horse that saved Buddha, and carried him away from the environment of evil? Have we not quoted enough of the history of the pagan classics to prove that for a thousand years of the brightest and best civilization known to the pagan world the horse was the divinely equipped motor of supernatural power? And have we not shown that in the most witching civilization of the ancient Orient the horse was the chosen instrument of the first great prophet of moral ethics to escape from evil thoughts and evil ways into the rarer region of a divinely appointed life? And in view of all this, have we not the basis of true moral judgment in the claim that the horse, in the evolution of all civilizations, has been always regarded as more than an animal? And is he not indissolubly linked in mythology, poetry, and sculpture with the great prophets, heroes, and the divine idols of the world?

A Parting Word.

As a parting word, let me voice the universal opinion of the horsemen and breeders of the United States. They are not asking any advice or aid from the Federal Government. All they ask is to be allowed to do business free from the cruel handicap of restrictive and unjust legislation. Let us aim all present and future legislation against the reign of prize fighting and all other brutal and degrading games, and give to the horse and his master, man, a chance to elevate the spirit and wholesome moral tone of the outdoor sports and pastimes of the American people.

JOE MARKEY'S TRIBUTE TO BEACHEY.

Last Monday morning, when I opened my daily newspaper, the sad intelligence of Lincoln Beachey's fatal accident in San Francisco stared at me from the headlines. During the season of 1914 I became very well acquainted with the "air king" when he was making flights at the Iowa and Wisconsin state fairs. He was a thorough gentleman, modest, refined, quiet, and not at all spoiled by the fame that he had acquired. He sat with me and chatted between his flights at the places named, stating that he wanted to keep away from the mob of people who were ever following him. To him the hero-worship to which he was constantly subjected was most unpleasant, the women, particularly, showering him with their unwelcome attentions.

The first question everyone asked him almost invariably was, "Aren't you afraid to do those desperate things?" His stereotyped reply was: "If I were afraid I wouldn't be doing them."

Beachy had absolute confidence in himself and knew no such thing as fear. I recall one of his flights on a very windy day. It was his custom to pass through any bank of clouds accessible, and on this occasion he went out of sight behind a dark and angry looking black one. When he emerged I noted that the biplane was swerving from side to side, as if he had lost control of it. On reaching the ground I saw that he was shivering, and mistook it for nervousness. But he explained that he had struck a strata of fierce, cold wind and that the temperature must have been at least 45 degrees lower than on the ground.

Beachey was truly an artist with an air-ship, and not even the most daring Frenchmen could vie with him. While ordinary aviators have, of late, failed to attract any attention, Beachey's exhibitions always thrilled. He received $1,000 per day and was worth the money as an attraction.

Incidentally I may say that an article recently printed states that out of thirty-eight aviators who flew in Chicago during the big aerial tournament held on the Lake Front two years ago, only seven are now alive, and five of these retired before death took them. Lincoln Beachey was a nephew of Clem Beachey, Sr., and a cousin of Fred and the late Clem Beachey, Jr., all so well known to Review readers.—Horse Review.

Ben R., in the stable of Will DeRyder, is a full brother to the pacing mare Gracie R. that took a record of 2:10¼ at Milwaukee in 1910, being by Demonio and out of Hannah by Le Grand, second dam the great producer Hannah Price by Arthurton.

NOTES and NEWS

The Stanford-Occident Futurity No. 1 for foals of mares covered in 1914 closes Thursday, April first.

◈ ◈ ◈

Colleen, Homer Rutherford's Charley D.—Cricket pacer, unbelted a mile last week in 2:16, last half in 1:03¾ and the quarter in :30¼.

◈ ◈ ◈

In answer to a recent inquiry, Ava J. 2:28 by Zombro 2:11 is not registered unless in Vol. 20, not yet published. Her dam is Ventura by Secretary.

◈ ◈ ◈

A newcomer to the stable of Al Schwartz is the two-year-old chestnut filly by Wm. Harold, dam by Welcome, owned by L. A. Bangs of Alameda. She is a trotter and has some stake engagements.

◈ ◈ ◈

Henry Smith has recently received for training the bay horse Ulatis by Bon Voyage 2:08, dam by Demonio. He is the property of C. H. Uhl of Vacaville, owner also of the good pacer Solano Boy 2:07.

◈ ◈ ◈

Tim Sexton put in his customary appearance at Pleasanton Saturday for a few rides behind Future Tramp, and later in the day had the pleasure of seeing him trot a nice mile around seventeen for Henry Smith.

◈ ◈ ◈

The Montana trotters in the Childs stable are doing nicely, R. C. H. having gone the route a bit below twenty, while the brown gelding by Spokane, whose education is as yet not extensive, has turned a quarter in :32.

◈ ◈ ◈

William Duncan of Colusa has recently sent to Millard Sanders for development a five-year-old pacing gelding by Clarence Wilkes. The lad is a nice acting, pleasing going fellow and has had some previous handling, working last year in 2:18.

◈ ◈ ◈

Merry Widow 2:03¾ by Red Pac 2:16¾ has lost her foal to the cover of Joe Patchen II 2:03¼, foaling a dead colt on March tenth, some days in advance of her time. Her yearling by Vernon McKinney 2:01½ is growing nicely, and instead of being a born pacer as would naturally be expected has so far shown no inclination to do anything at all but trot.

◈ ◈ ◈

Frank Anderson of Portland, owner of Imbro 2:12½ and Jim Hill 2:09¼, the pair of pacers raced last year over northwestern tracks by Marvin Childs and present members of the Childs stable, arrived at Pleasanton Saturday night and has been one of the most interested of railbirds this week. He will spend quite a bit of his time in this vicinity for the next few months and will "be there with the bells on" when Starter Updegraff calls 'em in June.

◈ ◈ ◈

Peter McCormick 2:08¾ will probably be the heaviest staked trotter in the country this season, as he will be in all the main events for his kind here in San Francisco, and is being entered in all the Grand Circuit classics to which he is eligible. He is taking his work in great shape at Pleasanton at present, and if he stands up there is no trotter eligible to the 2:10 class that has any license to shut him out.

◈ ◈ ◈

In the name of Arden Farms, W. Averell Harriman, son of the late E. H. Harriman, has donated a gold trophy costing $500 to be given to the driver of the first horse that lowers the record for trotting or pacing on a half-mile track at Goshen, N. Y. The present record is 2:02¾. Uhlan set this mark for trotters at the Goshen meeting in 1911, and Directum I put it in the same notch for pacers on the same track two years later. Mr. Harriman, like his father, is a devoted lover of the light harness horse and a steadfast supporter of the meetings held at Goshen.—Horse World.

◈ ◈ ◈

Thirteen record trotters and ten pacers are working at the Overland, including Braden Direct p. 2:01½, Waynetta, Pass All 2:12½, Mary Louise 2:11¼ and a good field of green horses. At Pueblo, Dr. A. J. Monahan has seven green ones at work. W. W. Gilbert has Limited p. 2:11¼. At Greeley, A. L. Camp is training Espier p. 2:13¼, Lacey Hubbet 2:17¼, and the promising green horse King Rocket. Ray Luper is working Easterdale p. 2:20 and a green one. D. D. Luper expects to go through the Colorado circuit this year with Hallie Wilkes p. 2:14¾. At Fort Collins, Bert Harris has Hal Collins p. 2:12¼, and will take on some green ones. Russel & Haymaker have several young things that are going to be put into training for the circuit. At Loveland, Dr. Williamson has a Baron Direct and an Airdale that he is working. Longmont also has its share of track horses. David Eisele has Lewis E. p. 2:13¼. W. H. Rothrock has Montezuma p. 2:22¾ and W. H. Crandall has Aelse Weaver p. 2:24¾ and Tony C. p. 2:27. Other towns around the state are making quite a line up for a pretty good racing season.—Field and Farm.

◈ ◈ ◈

Entries for the class races at both meetings to be held in connection with the P.-P. I. E.—June 5 to 19 and October 30 to November 13—close NEXT THURSDAY, APRIL FIRST.

Remember that ten dollar payment next Thursday, April first, on two-year-olds entered in Breeders Futurity No. Thirteen. The two-year-old divisions will be raced this fall at the P.-P. I. E.

◈◈◈

G. P. Machado, who trains for George Giannini of the San Francisco Driving Club, is educating a nice going trotting mare of his own, an eight-year-old daughter of Nutwood Wilkes.

◈◈◈

The Petaluma Driving Club is making an effort to get control of the track at that city, in which case, if successful, they will proceed to put it in condition and hold a number of matinee and special events during the season.

◈◈◈

The passage of the pari-mutuel bill through both houses of the Arizona legislature recently made things look promising in that state until about the middle of this week, when Governor Hunt vetoed the proceedings. Better luck next time.

◈◈◈

P. J. Chalmers of Stockton, carrying an arm in a sling as a result of a kick from a gasoline mule, occupied a seat in the stand at Pleasanton last Saturday and watched his pacing mares Zorene 2:10¼ and Trix McAdrian 2:23¾ do some nice work for this season of the year, the former lass going the route in 2:13, with the last quarter in :31.

◈◈◈

Hi Hogoboom and Charley Johnson have each consigned some good racing and breeding material to the Woodland Stock Farm sale, to be held April 15. A number of other high class consignments are promised and buyers will find plenty there for them. Wm. Higginbottom will cry the sale, which means you will pay for what you get, all right.

◈◈◈

A recent letter from Will Durfee brings the pleasing information that Virginia Barnette is repeating and in a few days will be entirely recovered from her recent accident. This seems almost a little too good to be true, as trotters of the class of Virginia Barnette are usually very severe sufferers from slight accidents that would leave an ordinary plug absolutely unscathed. However, we never caught William in many mistakes, and here's hoping he is right this time, as usual.

◈◈◈

The Nevada Racing Commission has been duly organized and consists of "Charles Boots of Franktown, Nev.," chairman, L. Henderson of Elko and W. H. Moffat of Reno. The regulations under which racing is to be conducted, commencing at Reno some time in July, are largely those of the Kentucky Racing Commission, with the important exceptions that two-year-olds will not be allowed to race prior to May first of their year, and that entries will be received from all horses, whether recorded as thoroughbreds or not.

◈◈◈

E. M. Doyle of this city purchased last Saturday from Marvin Childs the four-year-old bay filly Valeen M. (2) 2:26, by Bonaday 2:11½, dam Diabella C. 2:23½ by Diablo 2:09¼, grandam Lady Lemo (dam of two) by Memo, sire of the dam of Charley D. 2:06¼, etc. This lass holds the Oregon half-mile track record for two-year-old trotters and was second in a number of two- and three-year-old races to that other good Bonaday trotter Bonnieola (3) 2:22. Mr. Doyle will race her in the matinees of the California Driving Club and may start her in some professional events as well, as she promises to make a right good trotter.

◈◈◈

Phil S. Kell, who for many years has published the Spirit of the West at Des Moines and built up that publication from nothing to a firmly established position, has contracted to sell the paper and give possession on April first. Mr. Kell's family have been residents of Palo Alto and San Jose for some time and he expects to join them early in May and spend the next several months in this section—the betting being odds on that he will decide to remain here and call it home, as have some twenty thousand other Iowans. He will be one of the eager spectators at the June meeting and California horsemen will extend him a cordial welcome and wish him no worse luck than long life in their midst.

◈◈◈

From present indications it looks like Charley DeRyder made a most excellent move last fall when he switched Zomblack over to the pace, as the black son of Zombro 2:11 and Madeline Marshall by Demonio is "looming large" as a green one at that way of going. Some days ago he worked a half with Frank Perry in 1:03¼, and on Tuesday morning of this week, in company with a runner, turned the Pleasanton track in 2:10, going to the half in 1:07 and to the three-quarters in 1:40. The last quarter in a flat two-minute gait looked as easy for him as the balance of the mile, and as he has a better chance than ever of staying sound his future looks bright. As a three-year-old he had a raft of speed at the trot, having worked the Libertyville track in 2:08¾, but in order to hold that way of going had to carry a considerable toe and lots of weight, resulting in leg trouble as a matter of course. DeRyder removed the surplus toe, grew him a fair heel, and a good rest did the balance of the trick. The lad has always wanted to pace and took to it like a duck to water. His legs have not suffered a particle since the switch, and if he comes on in the future like he has in the last few months he will be a whole horse as a pacer.

In making up your exposition program of entries next week don't overlook the fact that the Stanford-Occident Futurity No. 1 closes the same day, Thursday, April 1, and that a ten dollar payment is due on two-year-olds nominated in the Breeders Futurity No. 13.

◈◈◈

President Dan Hoffman of the California Driving Club visited Pleasanton last Saturday in company with Shorty Roberts of the Sea Breeze and Ernie Doyle. Friends "staked" Daniel to a mount or so during the morning's work and "the only" put in a great day, enjoying especially the ride behind Nuristo 2:10¼ in company with Charley Spencer and The Proof.

◈◈◈

Charley Spencer sprung a good looking pacer at Pleasanton last week in Mona Ansel, by Monacrat, dam Decoratia by Prince Ansel. The lad paced the big oval in 2:17¼ with the last quarter in :30¼ and Charley evidently has him at a point where he can rate him as he pleases as he stepped the first and last eighths in just the same notch—fifteen seconds flat.

◈◈◈

The San Francisco 2:07¾ yearlings at the recent sales in the east have made that family look pretty good on the market, with prices from $2,000 to $3,200, and at the Woodland Stock Farm sale next month Californians will have a chance to bid on a San Francisco mare that is bred right, being out of the dam of Bodaker 2:13. The lass is six years old, sound, a real trotter, and is consigned by E. A. Swaby of Dixon. Local San Franciscos are scarce and this one ought to be in demand.

◈◈◈

Come on, you matinee men, the season is here—in spots, anyway. Riverside "pulled a good one" on St. Patrick's day and Princess Louise trotted one heat for George Nugent in 2:10¾, six seconds faster than her winrace record. It's a half-mile track at that. Of course, this wouldn't be much of a mile for this season in a climatic paradise like Chicago, but it is fair for Southern California. Incidentally, Princess Louise looms up like a new 2:10 trotter for Del Coronado 2:09½.

◈◈◈

A report has been current this week that Colonel Jim Thompson has had the misfortune to lose by death the trotting mare Zombrene S., that had trialed last year in 2:16¾. The International 1:55 Stable at Pleasanton also had a very sick filly, their candidate for the two-year-old trots this season, and as Dr. Masoero held forth little hope for her the lass is probably gone by this time. There has been very little sickness among horses this winter, and both cases mentioned above could be traced to the often unavoidable shipping diseases.

◈◈◈

V. L. and Lawrence Shuler added a California trotter to their stable last week, purchasing from Henry Smith the bay gelding John Gwynne 2:11½, for which Colonel Kirkpatrick paid a couple of thousand dollars about two years ago. John Gwynne was a very consistent trotter the year he was raced, being second to Maymack in a number of heats and making but two or three breaks in his career. He has had a good rest and is big and husky, racing sound and possessed of a lot of speed. Mr. Shuler has worked him over a bit, very beneficially, and after coming through the stretch the other day in thirty-two seconds remarked that before long he could drive him a quarter "right fast." McMyrtle, his sire, is an excellently bred stallion, being a son of McKinney 2:11¼ and Myrtledale by Iran Alto 2:12¼, second dam Nettie Nutwood by Nutwood 2:18¾; his dam was a daughter of Secretary 28378, who was by Director out of a Volunteer mare, so that he carries some of the very best of trotting blood.

PLENTY OF RACING ON CANADIAN PRAIRIES.

With the Winnipeg exhibition canceled for 1915, considerable apprehension has been felt in some quarters concerning the course that would be taken by the prairie cities to the westward of the metropolis, and we take a great deal of satisfaction in circulating the information that racing in that section will be held as usual for a period of nine weeks, as follows:

Edmonton, May 22 to 25, W. J. Stark, Mgr.
Regina, June 23 to 25, J. C. Currie, Sec.
Calgary, June 30 to July 7, E. L. Richardson, Mgr.
Moosejaw, July 10, 12, 13, W. A. Munns, Sec.
Brandon, July 19 to 24, W. I. Smale, Mgr.
Regina, July 26 to 31, D. T. Elderkin, Mgr.
Saskatoon, Aug. 2 to 7, C. D. Fisher, Mgr.
Edmonton, Aug. 9 to 14, W. J. Stark, Mgr.
Red Deer, Aug. 17 to 20, Jas. Mann, Mgr.

Complete programs of both early and late closing purses will be put on at each of the above meetings, so that campaigning horsemen with good stables may be assured of one or two starts each week straight through the circuit, which is followed by almost all the major meetings on this side of the line, our Canadian cousins getting their racing almost finished when ours is scarcely well started. They always race under the most liberal plans, betting is good and the people are better, so "there's a reason" for the growing popularity of the prairie tracks with American horsemen.

Programs and full particulars may be obtained from any of the officials mentioned herein, or from E. L. Richardson, Circuit Secretary, Calgary.

ST. PATRICK'S DAY AT RIVERSIDE.

ROBERT A. SMITH, Correspondent.

Riverside, Cal., Mch. 17, 1915.

Whew! 2:10¾ by trotters in a race on a half-mile track in March! I will spell it, so you will know the figures don't lie—two ten and three-quarters. How many are there who will read this, ever saw a mile trotted that fast over a half-mile track at any time of the year? I am fully aware that faster miles have been trotted, but their infrequency is marked. I have been deeply interested in harness racing for years, have attended many half-mile track meetings, but I have never, heretofore, personally seen that fast a mile by a trotter on a twice-around.

Horsemen in attendance at the St. Patrick's day matinee given by the Riverside Driving Club at Riverside, Cal., stood aghast at the unexpected performance of the thirteen-year-old matron Princess Louise 2:16¼ by Del Coronado 2:09½, and the four-year-old debutante Ulo Tolus 2:29¼ by Pactolus 2:12¾, when they trotted the first heat in the free for all, Louise winning in 2:10¾. Almost all the trotters that have beaten that time on a small oval had previously acquired very much faster records on mile tracks, and only on two occasions last year was there trotted a faster mile under similar conditions, Henrietta C. 2:07¼ and Ilo Tolus 2:09 (full sister to the contestant in today's race) jointly holding the 1914 season's record of 2:09. I am of the opinion that today's performance constitutes a world's record for a thirteen-year-old trotter on a half-mile track.

Princess Louise and Ulo Tolus answered the marshal's call for the free for all trot. At the word Folk stepped his young mare away very fast around the turn, with Nugent trailing, these positions being maintained to the half in 1:04¾, the older mare's nose right up against Folk's back. Before the head of the stretch was reached, Nugent pulled out with a tremendous rush, winning the heat in 2:10¾; Folk realizing he was beaten eased up on his mare before reaching the wire. The tactics were reversed in the second heat when Folk nodded for the word, a length back, and dropping behind Louise, both loafed over to the half in 1:10½; on the turn the leader began stepping like a free-for-aller with the daughter of Pactolus "hot on her trail"; when they straightened into the stretch Folk pulled out and the battle was on, the Tolus mare gained inch by inch, got her nose to the leader's saddle, twenty-five yards from the wire, but the Princess would not be denied and won the heat and race in 2:15½, with the last half in 1:05.

In the 2:30 mixed three pacers and two trotters started, the result of the race indicating that the association was endeavoring to stage a novelty, two races in one, with the pacers in front and the trotters in the rear. After the "thrill" of the finish of the pacers, along came Ben Nutwood and Handsome Harry in a race on their own account. The pleadings and supplications of driver Armsted, in which he entreated Handsome Harry to "go on, Handsome," could be heard echoing through the grand stand, when Harry was doing his best on the back stretch. Jane Lou won the first heat, while G. H. Judd, of Klamath 2:07½ fame, kept Caroline Custer in the lead the next two, winning handily.

Hi Yu proved the best of the 2:25 class trotters, taking the lead at the word in each heat, although she gave all she had at the finish of the second heat when Larry K. came fast, Hi Yu jupst winning at the wire. In the special hobble race Judd put over another winner in the bay-mare Maidie by Silver Coin 2:10, beating Arlie L., The Pig and Nancy Lovelace in straight heats. The summary of the day:

2:30 mixed:

Caroline Custer, s m, p, by Ed Custer 2:12¾ (Judd)	2	1	1
Jane Lou, bl m, p, by Kinney Lou 2:07¾ (Gatch)	1	2	2
Sunny Jim, b g, p, by Zolock 2:05¼ (Gill)	3	3	3
Handsome Harry, b g, tr, by Potrero (Armstead)	5	5	4
Ben Nutwood, s g, tr (French)	4	4	dr

Time—2:24, 2:22, 2:26.

2:25 trot:

Hi Yu, b m by On Stanley (Dillon)	1	1
Larry K., b g by Larry McKinney (Nugent)	3	2
On Conn, b s by On Stanley (Padget)	2	3

Time—2:24, 2:22.

Free-for-all trot:

Princess Louise, b m by Del Coronado 2:09½ (Nugent)	1	1
Ulo Tolus, b m by Pactolus 2:12¾ (Folk)	2	2

Time—2:10¾, 2:15½.

Special hobbled pace:

Maidie, b m by Silver Coin 2:10 (Judd)	1	1
Arlie L., b g by Klatawah 2:05½ (Nugent)	2	2
The Pig, b m by Morris A (June)	3	3
Nancy Lovelace, bl m by Lovelace (Donohue)	4	4

Time—2:23, 2:20½.

Sweet Hallie (dam of Hallie's Star 2:24¾) has been booked to Joe Patchen II 2:03¼ by A. Edstrom of Fruitvale. Hallie's Star, now a racy looking five-year-old, is in the stable of Bert Webster at Pleasanton and Mr. Edstrom is much pleased with the way he is coming along. He is a different type from most of the Star Pointers in California—not so large or sluggish, as he is of medium size, clean built and snappy looking.

◈◈◈

Tango, the three-year-old son of Lijero and Paprika by Oro Belmont that Ed Parker is working at Pleasanton, keeps on improving right along and worked Tuesday in 2:18¼. Ed claimed last fall that this lad could 2:10 this season, and it looks quite like he might have been right.

◈◈◈

Entries for the class races at both meetings to be held in connection with the P.-P. I. E.—June 5 to 19 and October 30 to November 13—close NEXT THURSDAY, APRIL FIRST.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

ANIMAL LIFE ON THE MOJAVE DESERT.

(Concluded from last week.)

The next fellow to bring carefully and cautiously into line is Mr. Skunk. Like the above-mentioned animals, he is everywhere and is about as scarce as the wildcats and badgers, still there is a sufficient quantity of them out here for all possible needs, for there is no wildcat, however bad, possessed of the fearless impudence to be found in this insignificant looking little skunk. If he finds your camp in the night, the chances are about even that he will just walk into it and take possession as though he were your brother. He'll rummage over your things and eat what he likes the best. You'd better not raise a stink about it, either, even if you are the biggest, for if you do, you are sure to get beaten at your own game.

I think these skunks are a different species from the ones found along the coast counties, as they are much smaller and have more white on them. A full-grown one only weighs about a pound, although they seem to be considerably larger on account of their long hair. These skunks are the little spotted kind known as civit cats. The large black skunks with stripes down their backs are found on the desert only in a few localities.

I have several times found where some animal had killed and eaten a skunk on the desert. But the sign was always so old that I never could tell what had done it. But I think it had been a wildcat, for one time near Elizabeth Lake I found where a panther had eaten a skunk and if a panther-cat would eat a skunk I think it most likely a wildcat would, too.

And now I believe I am down to the jack-rabbit. I have never seen any place on the desert where there were no jack-rabbits. They can get along very nicely without water. In fact, the best and fattest ones are found away out where they do not get any water at all. Still they will certainly drink if they can get it, and have trails across the desert for many miles leading to their watering places.

Seven years ago this coming summer jack-rabbits suddenly appeared here by countless thousands. They remained here for five or six months and as mysteriously disappeared. Where did they come from? Where did they go to? are questions that have never been answered. I shall answer them in a word, and then make explanations. "They were born and died right here in this locality."

The year the jack-rabbits were so thick I had occasion to be out on the desert almost every day attending my sheep and a long trap line that I had out for coyotes. Jack-rabbits were quite plentiful, but not thick at all. But about the first of March I began to see little fellows. They grew with wonderful rapidity and in two or three weeks were big enough to fry.

I could not see that the old ones became any more plentiful, but the young ones seemed to come up with the weeds. There were all sizes and more and more of them every day.

Now it may be asked, why the coyotes (whose mercy and respect for helpless animal life is only paralleled by the average hunter) did not kill them all for fun. Well, I'll tell you why he did not do so.

Jack-rabbits do not dig holes in the ground for any purpose. But there is a big kangaroo rat out here all over the desert that digs holes large enough for a half-grown jack-rabbit to go into. The female jack-rabbit goes to within a few feet of one of these rat dens and digs out a shallow bed four or five inches deep at the foot of a sage bush with her nest facing the rat holes, and there gives birth to from two to four and five little ones at a time.

Now the little jack-rabbit is born with all his senses active. He is fully haired, has his eyes open and teeth cut, and when three hours old he is a very lively little rabbit. When an enemy comes along the old rabbit sits very quiet till she sees she has been discovered and then jumps and darts off to one side and every little rabbit goes down a rat hole. The coyote could easily dig them out, but he is so lazy that he would rather go hungry than do so; at any rate, they never do.

The little rabbit begins to forage for himself in a day or two, but, however badly he may be surprised, he never forgets the direction to the nearest rat den. By the time he is a month old he is such a big rabbit that he seems to think it would be a disgrace for him to go into a rat hole any more, and will not do it unless he is very closely pressed for his life.

By the middle of that summer the rabbits had collected along the Mojave river by the thousands. They had about finished up everything in the way of vegetation that a rabbit could eat, when a disease began to kill them off much faster than they had come. The complaint was very swift and deadly in its action and must have worked either on the heart or brain, as I have often seen a rabbit tumble over dead without a single kick. However, they would sometimes kick around considerably after falling before they died.

By the beginning of winter the rabbits were nearly all dead, and there are fewer rabbits here now than I ever saw on the desert.

The cottontails fared even worse. Before the rabbit plague came along it was an easy matter to take a gun and get a mess of cottontails any evening. But they seem to have been entirely exterminated. At any rate, I have never seen one since.

There are three distinct species of chipmunks in this locality, and I believe a variety or two. I am not sure that I know their correct scientific names, so rather than make a mistake, I shall simply describe their habits and colors.

The little fellow locally known as the cottontail chipmunk is perhaps the most common and inhabits a wider range of country than either of the others. In color, their backs are a grayish brown, changing to a reddish brown along the sides. The entire under part of the animal is a silvery white. There is a single white stripe along each side, but none on the back. The under side of the tail is also very white and as it is usually held up against the back it is very conspicuous, hence the name—cottontail chipmunk.

There is another one about the same size, but more chubby in form, that very closely resembles a common ground squirrel in color and general appearance, but their ears are very much shorter and the tail not quite so long, and, unlike the other chipmunks, they have no stripes. They are also pretty well distributed over the desert, but are not so common as the white tail species.

The next chipmunk is longer bodied than either of the others, is a light brown color all over, with the belly, breast and throat slightly the lightest. They have rather long tails with but little hair on them and do not hold them up as the others do. They are not very plentiful, and usually stay about mesquite thickets.

All three of the species are rather tame. Still they are very nervous and always seem to be slightly excited about something. Their nervous, watchful disposition is doubtless the result of their having been suddenly pounced upon by carnivorous feeders so long. For, unless they were ever on the alert for danger, they could not survive very long where they have so many enemies.

And now for the true rat and his family. I do not believe I know the whole family, for I occasionally see a new one. But I know there are ten different species at least here on the desert. I have spoiled many films trying to get good pictures of some of them, but can't get them to "show up" in a picture to amount to anything.

The kind of rats that live in cities and on ships are never seen out here. Time and evolution have adapted these fellows to the climate and surroundings in which they flourish, and there are rats, rats everywhere. No place is so barren or far from water but what there are rats. They will eat any kind of vegetation that grows here and thrive on it. They are a great nuisance to the miners and prospectors, and some kind of rat-traps have to be invented if one camps in the same place very long.

The largest rat on the desert is a big kangaroo, about half the size of a ground squirrel. They have very long tails with a bush of hair on the end of it, and a big, bewhiskered, ugly looking head. They are a dove or slate color with white stripes on their haunches and white bellies. When running they go by jumps, and if anything is after them they jump in a zigzag manner which makes it very difficult for anything to catch them. Still they are the principal food for the coyote.

When captured, they soon get tame, and although in their wild state they never get any water only when it rains, they will drink regularly if they can get it. But they do not drink in the manner that most animals do. When water is put into the cage the rat wets his paws in it and then licks them. This he keeps up until he gets enough. Contrary from the custom of any other rat that I ever experimented with, these fellows lie flat on their backs with their feet up while sleeping.

There are several smaller species of kangaroo rats out here. One that has a snow white bush on the end of its tail, and another that has a very black tail. There are also several species of mice here. One kind has a very long nose and small ears. These fellows can gnaw a hole into a box large enough for them to get through in short order. Then there is the common mouse with blue back and white belly, and a small mouse that is brown all over.

There is one species of the kangaroo rat that has a trait that is ludicrous in the extreme, and that is their manner of settling any difference that may arise between them over what they are eating. When one of them decides that another rat's manner of eating is not good form and that he is eating faster and more than any gentleman rat should, he quickly hops in front of the offender and kicks up a small dust. The offender understands at once that his manner of appropriating most of the food for himself has not been appreciated by the other rat, and that an immediate apology and satisfaction is demanded, whereupon they quickly assume positions about one foot apart and commence to jump straight up. They never jump at each other, never try to bite, scratch or kick each other, but continue to jump straight up as high and as fast as they can for perhaps eight or ten times, when one of them breaks and runs. The other rat always runs him for a short distance, but under no circumstances ever overtakes him. To do so, it seems, would be such an unpardonable act that no rat however low would be guilty of it. Evidently the rat that jumped the highest was undoubtedly right. The other was unquestionably wrong. And as there is no appeal taken on cases in rat land, the incident is closed.

GUNSHYNESS.

[By H. T. Payne.]

When the fall shooting season opens and the young sportsman takes his setter or pointer afield for the first time, he may be sadly disappointed, and annoyed to find that it is gunshy. But gunshyness in highly-bred puppies is not at all uncommon, nor should the handler be seriously worried over its appearance in his young dog.

As there are various degrees of gunshyness so also are there various causes for its existence. Generally it is the result of a highly-nervous development, often caused by too close interbreeding. Some times it is the result of some physical malady of which the puppy is suffering at the time. Often gunshyness has been caused by the pure thoughtlessness of the trainer in firing a heavy charge right over the puppy's head, this being the first time he ever heard the report of a gun. The unexpected report of a gun will startle anything, even the confirmed sportsman, should it be too near him. Is it strange, then, that a highly nervous puppy should be startled and badly scared when he hears for the first time this startling noise? I believe more puppies are made gunshy through such thoughtless practices than prove to be gunshy through other or natural causes. It is safe, then, to lay down this rule: Never fire the gun when close to your puppy until you are sure that he is not afraid of the report.

When you first take your puppy into the field, if you are not living where you have had an opportunity to get him used to the report before putting him on game, let him get as far away from you as possible, and while he is busy hunting, fire your gun. Notice the manner in which it attracts his attention. If he is startled in a way that indicates a nervous annoyance, even though very slightly, you must not discharge your gun close to him until all signs of fear have disappeared. If he goes on with his work oblivious to the noise, or throws his head and tail up as if anxious to learn the source and reason for it, just "give him the other barrel" with perfect confidence, but even then shoot two or three times with him reasonably close to you before shooting directly over him.

As there are many reasons for gunshyness so are there many cures and many procedures advocated. I knew one bad case of gunshyness that was promptly cured with a good dose of areca nut. The puppy was suffering from a bad case of worms. Naturally he was debilitated, and being of a high nervous temperament this physical derangement intensified his predisposition to nervous excitement. During a three-days hunt he was chained to the belt of his owner, but made no improvement. I saw that the puppy was suffering with worms and suggested a vermifuge. At first I was laughed at, but finally the medicine was given. He was given a couple of days' rest after this, and to the delight of his owner when taken into the field the morning of the third day after being freed from the worms, he showed no more fear of the gun than if he had been so deaf he couldn't hear the report.

Some puppies are actually afraid of the noise, but gunshyness is not always fear. This is often demonstrated in the dog's plainly-shown love for the gun, and his anxiety to go afield the moment he is shown one. I remember a case where a puppy would almost go into fits when a gun was fired near him, and while he knew the gun made the noise that so disturbed his nerves, the minute he recovered he would come to the gun in his owner's hands and lap it with his tongue. Cases of this kind are really pitiable ones, and the best treatment is to get them used to the gun when they are away from the excitement of the field, and when their nerves are in the most quiet condition possible. This is best done by firing the gun some distance away while they are resting quietly in the kennel or while they are feeding, coming closer each day until their nerves become used to it.

Other cases can be cured in the field, often in one day, by paying no attention to them. Let the dog lie down or hide as he pleases, and go on with your shooting the same as if you had no dog with you. He will be pretty sure to follow you up, getting closer and closer, and finally, becoming used to the noise, will begin to hunt some distance from you. Should he establish a point, go to him and flush his bird, but do not shoot at it unless he is behind you.

The habit which many have of chaining a gunshy dog to their belt and dragging him behind them all day is a bad one, and generally increases the trouble by leading the dog to believe that the irritating report of the gun is a part of his punishment for doing something which he cannot understand. Better leave

him in the shade of some bush until, believing himself deserted, he will crawl out and come sneaking after you.

There is one method of curing gunshyness that I have never known to fail, even in the most confirmed cases with old dogs. It is severe but may be resorted to when others fail. Shut your dog up in some isolated place where he will neither see any person or other dogs. Leave him there for twenty-four hours. Then take his food in one hand and a pistol with blank cartridges in the other. When you reach the door of his place of confinement, fire a shot. Open the door, reaching his food in first, and as you do so fire again. Most likely he will try to hide his head in the farthest corner of the room. If so, close the door and leave him, saying nothing to him, and be sure to carry his food away with you. Leave him alone for another twenty-four hours, and then go through the same performance. Let him have a smell of the food and place it in the middle of the room. If he comes toward it fire your pistol before he reaches it. If he runs back to hide pick up the food and walk out, leaving him for twelve hours more before trying again. Keep this up until he eats while you are firing the pistol over him. From two to four days of this treatment will be found sufficient. He must not be allowed to eat anything, except under the firing of the pistol for the next week. Finally give him nothing to eat for twenty-four hours. Then take him afield and his food with him. Set it down for him and commence firing your gun. If he should refuse to eat through fear of the gun, allow him nothing to eat until the next day and try him again. The second day's trial will rarely be found necessary. Of course you must be careful that your more tender-hearted wife is not slipping something for him to eat into his prison and thus defeating your purpose.

Because your puppy should be gunshy do not think him the less valuable. You are neither training a pit bull terrier nor a bear dog, but a mild dispositioned hunting companion; and the fact that he does not show reckless courage is nothing against him. Have patience and give him a little time. Many of our best field dogs were gunshy puppies.

ARE YOU SURE YOUR GUN FITS YOU?

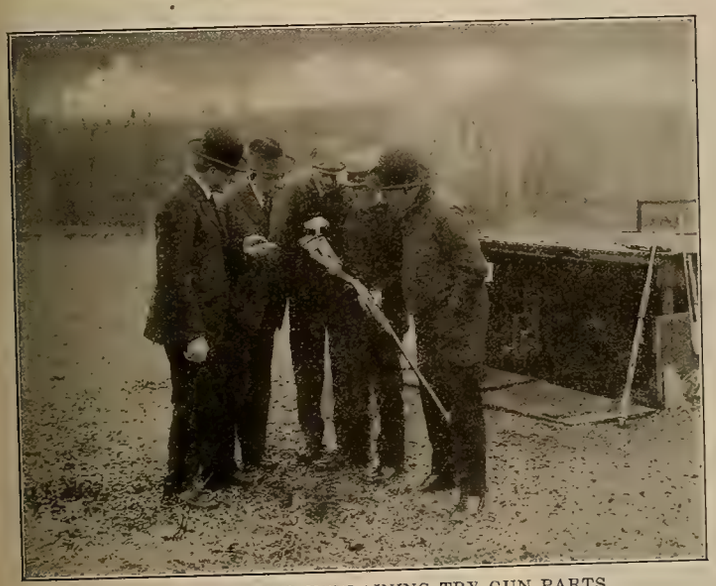
Realizing the importance of this question, Englishmen have had shooting schools for some time in which were to be found try-guns for fitting purposes, but we Americans have only recently considered the idea. In this country many a trapshooter has been able to break 75 to 85 out of 100 targets for many years, but there he stops. Nine out of ten chances his gun does not fit him.

American shooters have recently decided to make use of the try-gun. They think its use will decrease the number of "misfits." The great influx of men, and even the fair sex, into the Trapshooping Army has brought guns of all sizes and styles into play. John Brown has a gun, which seems to suit him; Bill Jones likes it and buys the same kind. Such purchasing has caused the "misfits."

Star baseball players have their bats and gloves made for their individual use. This is especially true of bats. They have their grip, manner of swing and other individualities noted or measured and the bat made accordingly. So it is with clothes, a 150-pound man couldn't wear the suit a 230-pound man could, and yet at the trapshooting club they often use the same size and style gun.

The first to take an active interest in the try-gun has been the Du Pont Powder Company. Just recently they called their shooter salesmen to the Wilmington office and had Jack Fanning, the world famous trapshooter, who has made a study of the try-gun, explain its use and value to them.

The instructions were given on the grounds of the Du Pont Trapshooting Club, and in the party were D. D. Gross, Kansas City, Mo.; Arthur Killam, St. Louis, Mo.; C. O. LeCompte, Asheville, N. C.; W. D. Standard, Chicago, Ill., and J. E. Dickey, Minneapolis, Minn. All are pictured in the illustrations herewith except Mr. Dickey.



Fanning explained the adjustability of the try-gun as to length of stock, cast-off and drop of comb and heel. After stating that the breadth, height and usual shooting position of the shooter governed his measurements, he took up separately the different parts of a gun that should fit the shooter. First, he measured the length of stock required by resting the butt of the gun in bend of the arm, finding at what length the forefinger comfortably reached the trigger. Then having the shooter take the gun in his natural shooting position, he studied carefully the position of the butt and the comb. He made any necessary adjustments until the butt finally fitted the shooter's shoulder and the heel had the correct drop.

The comb was a harder proposition. The shooter's eye had to be sighted, and attention paid to the way he cheeked the gun. Fanning adjusted the comb several times until it fitted snugly to the shooter's cheek, making sure that it was impossible for the shooter to hide his sighting eye behind the breech of the gun. To note these points, he stood in front of the shooter, making proper adjustments. He also observed whether or not the stock must be cast-off to permit easy sight down the rib. In adjusting for cast-off, he turned the stock to one side, and made a slight alteration in the setting of the comb.

After satisfying himself that the gun was a correct fit for the shooter, he locked the stock with its attached jam screws. This completed the fitting, which had been attentively observed, as the illustrations indicate.

After each of the salesmen had been fitted they shot over the traps, using the try-guns. Each on leaving the club took a try-gun with him.

On all future visits to clubs and other shooting affairs in their territories, these salesmen will be prepared to measure any one who contemplates buying a new gun, or who wants to know just why his old one is not breaking 90% or better.

JACK FANNING EXPLAINING TRY GUN PARTS.

JACK FANNING FITTING A SHOOTER.

CHINESE SHRIMP NETS AGAIN.

The proposed law to again allow the use of Chinese nets by shrimp fishermen, has aroused intense opposition from the ranks of the rod and reel men. After four years' disuse and prohibition of this destructive device, the rodsters are exceedingly averse to a recurrence of former conditions, which entailed the destruction daily of immense quantities of the fry of different food fishes as well as the young of the edible crabs. However that may be, the statement is made by Fish and Game Commission officials that the zone of operations of Chinese shrimp catchers will be confined to southern parts of San Francisco bay, an expanse of water where but few food fish spawn and where at the present time not more than half a dozen market fishing boats operate.

Their Guns Show It.—Let me see a man's rifle and I can tell whether he's a good shot or not. At least I can tell whether he's right in saying that he's a good shot.

No good shot ever keeps a rifle with a dirty or rusty barrel. On the other hand, a poor shot never knows that his rifle is shooting wild.

He just sets down the lucky hits to his credit and forgets all about the times he misses.—C. L. Gilman.

You will find trout creels increased in price this season. It's the war. Our willow baskets came mostly from France. There have been no shipments for this year's demand and the supply in this country is running low. Therefore shop early unless you have a friend from whom you can borrow.

Drink Jackson's Napa Soda.

Fish Lines

The outlook for a most excellent steelhead trout fishing season has not been brighter for many years past. The season will open Thursday, April 1. Plenty of rain and a heavy snowfall the past four months came along at a most favorable time for the trout anglers' opening day's operations.

At present the coast streams, within access of the local anglers' efforts, are running fairly high and clearing up nicely. As a matter of fact, some of the Marin county and San Mateo coast creeks are in shape for fly-fishing today.

Trout are reported to be plentiful in the rivers and creeks. The State Fish and Game Commission has, the past year, stocked the streams more plentifully than during any previous season. A report last week states that both the San Gregorio and Pescadero creeks, far up stream as well as in their tidal lagoons, are alive with trout. The same can be said of Purissima, La Honda and Waddell creeks.

The foregoing favorable indications, of course, apply to the coast waters, even as far south as Santa Barbara, where the headwaters of the Santa Inez are said to be fairly alive with trout. Never in many years years has such a bountiful crop of fish been seen. The heavy storms of last winter thoroughly flushed out and scoured every coast river and the upper tributaries, thus creating deep holes and pools, where the trout have multiplied and matured under the more favorable conditions.

As for the upper tributaries of the Sacramento and other rivers which are fed by the Sierra snows, it is doubtful if these streams will be in shape for several weeks. The warm days have melted the heavy snows on the higher ranges. The snow water has entirely changed conditions. The streams are roiled and high; just how discolored they are is shown by the condition of the upper bay waters.

"Fishing ought to be exceptionally good in all of the streams of Santa Clara county," stated County Fish and Game Warden I. L. Koppel in discussing prospects for the opening of the trout-fishing season. "Water conditions have been ideal for the past two years and all of the creeks have been heavily stocked with rainbow, steelhead and Eastern brook trout.

"Last season we planted 200,000 good-sized healthy fish and we have every reason to believe that most of them were put into the creeks in good condition. Most of the fry were of the steelhead variety, but there were a number of rainbow and about 20,000 Eastern brook trout. The Eastern brook trout do well here."

That anglers have a decided preference for particular fly patterns is not to be questioned—many a day's fine sport on a creek has been all the more pleasing by reason of the attraction of a favorite fly. However that may be, one can not go wrong early in the season on any of our Coast streams with a selection of the following flies: Black gnat, hare's ear quill, English royal coachman, yellow May, March brown, gray hackle and brown hackle. If these are not effective none will be.

If spoon fishing is in order the 00, silver or copper, or silver and copper, according to the sunshine and shade along the creek, will do the trick.

Bait conditions prevailing, the fat angle-worm is always in order. Better still is fresh steelhead roe. Prepared salmon roe is also O. K.; the latter comes in small tins and is rather sticky. To toughen the eggs and get rid of the viscid matter simply roll the eggs in corn starch and then you can handle them much more satisfactorily. Another good bait to have along is cooked shrimps. Take off the shell and just tip the end of your hook or fly.

At the Traps

Interstate Association Trophies, 1915—The halftone on this page is Plate No. 3, illustrating the $12 classification of trophies which can be selected by clubs holding registered tournaments this year, as follows:

C 41 Sterling Silver Traveling Set—Military Brush, Hat Brush, Cloth Brush and Comb—cased.

C 42 Sterling Silver Cigarette Case—Double Row.

C 43 Sterling Silver and Cut Glass Cocktail Shaker, 8½ inches high.

C 44 Sterling Silver Table Cigarette Box—50 Cigarettes.

C 45 Sterling Silver Bread Tray, 11¾ inches ling.

C 46 Sterling Silver Flower Vase, 12 inches high.

C 47 Sterling Silver Love Cup—on base, 6½ inches high.

C 48 Sterling Silver Water Pitcher, 9½ inches high.

C 49 Sterling Silver Bon-Bon Cake Basket, 7½ inches in diameter.

C 50 Sterling Silver Cut-Glass Decanter, 7¾ inches high.

C 51 Sterling Silver Dessert Forks—cased.

C 52 6 Sterling Silver Dessert Spoons—cased.

C 53 12 Sterling Silver Tea Spoons—cased.

C 54 Sterling Silver Flask with Cup—Leather-Covered, 7¾ inches high.

C 55 Sterling Silver Bowl, 9 inches in diameter.

Live Bird Notes.—At a recent meeting of the Californi Wing Shooting Club, the following officers were elected: W. W. Terrill, president; Captain A. W. DuBray, vice-president; C. C. Nauman, secretary-treasurer; Toney Prior, Clarence A. Haight and Ed L. Schultz, directors. The club will hold regular shoots the first Sunday of each month up to and including September.

The programme calls for a medal race at twelve birds, distance handicaps, three high gun trophies for the season, and also a club purse match at twelve birds, high guns, one money for every four entries, distance handicaps. The club members shoot under a sliding handicap system—straight scores put a contestant back a yard and two misses give him a yard nearer the traps at the next monthly shoot.

* * *

Golden Gate Shoot.—George Anderson of the San Jose Blue Rock Club won the Fred Gilbert cup trophy in the feature event of the shoot, March 21 at the West Alameda ground. His score of 98 out of 100 birds, shot from the 16-yard mark—24, 25, 24 and 25—is the top score so far in a Gilbert shoot held on the Coast. Toney Prior of this city was given a 22-yard handicap and could only land in second place with runs of 23, 23, 24 and 23, for a total of 93. A. G. Flickinger, the Vallejo crack shot, 20 yards, emerged from the fray with but 86 out of 100. He won the Gilbert shoot at San Jose a week previous, with a tie score of 93 and 92, after four shoot-off arguments. F. Downs of San Jose, 20 yards, ran four frames for 23, 23, 21 and 23—93 in all. Tom Wilks, who scored a straight 50 in the regular club schedule, could only get a total of 78 from the 18-yard peg. Dick Reed's 92 from 20 yards rise was a creditable showing.

The regular club program called for two 20 and a 10-bird shoot. G. Anderson, Edgar Forster and T. Wilks each broke 20 straight in the first event, the club trophy match. Toney Prior won the second 20-bird match, the challenge cup event. Dick Reed, a trade representative, and Wilks, a visiting shooter, also blotted out 20 clay pigeons. The third event was the "grub" shoot between General Lancaster's Uhlans and Colonel Haight's light infantry. The uhlan team won, the total scores, at ten birds per man, were 192 to 188. The scores for the day follow:

Club program—Event 1, cup trophy match, four classes, 20 birds in 10 bird frames. Event 2, challenge trophy match, 20 birds in 10 bird frames. Event 3, "grub" shoot—two teams, 10 birds per man:

The Golden Gaters' programme for this season calls for three regular events, a total of 50 targets. Event 1, 20 birds, class shooting, four cups for four classes—champion, 1st, 2nd and 3rd. Best five scores of the season to count. Event 2, 10 birds, grub shoot, between two teams. Event 3, 20 birds, challenge trophy, 16 yards, four classes, four cups. Winners of first shoot subject to immediate challenge, only two challenges for each shoot.

Runs of 15 and 10 straight will receive club gold or silver bars, provided the shooter declares his intention to shoot for bars.

A Du Pont silver spoon has been hung up for the novice shooter who shows greatest improvement during the season.

The club grounds will be open to shooters each Saturday and Sunday until September 19th. The regular club shoots will take place the third Sunday of each month.

Citrus Belt Puffs.—At the Venice grounds, March 6, forty-one shooters attended the Los Angeles Gun Club shoot. The scores follow:

Event No. 1—50 targets, distance handicap, for a gold watch:

Guy Holohan, 20 yards, broke 48; P. E. Peterson, 16 yards, 47; A. L. Tippitt, 17 yards, 43; H. Pfirrmann, 20 yards, 41; Geo. Melford, 16 yards, 41; S. R. Smith, 18 yards, 40; F. H. Mellus, 20 yards, 40; S. A. Bruner, 17 yards, 40; R. D. Gilbert, 16 yards, 39; S. C. Miller, 16 yards, 37; J. C. Thompson, 17 yards, 37; Wm. Pugh, 18 yards, 36.

Event No. 2—Doubles:

F. H. Mellus shot at 72, broke 64; C. E. Grot, 72—49; G. Holohan, 48—38; S. A. Bruner, 48—38; H. Pfirrman, 48—36; Wm. Pugh, 48—36; E. Hedderley, 48—31; Geo. Melford, 48—30; Capt. Du Bray, 24—16; S. C. Miller, 24—14; A. W. Bruner, 24—13.

Event No. 3—Tower shooting: E. Hedderley, 20 x 25, F. H. Mellus 16x25, Dr. W. R. Manning 10x25, G. Holohan 8x25, S. C. Miller 4x25.

Practice results:

C. M. Wood, shot at 200, broke 162; F. H. Nichols 200—159; F. A. Johnson 175—130; P. E. Peterson 150—116; S. C. Miller 150—81; J. S. Cumming 125—102; C. F. Nichols 125—102; H. M. Hauser 125—60; D. E. Llewellyn 100—85; Tom Bundy 100—76; A. W. Bruner 100—73; W. M. Claypool 100—63; L. E. Loomis 100—63; A. L. Tippitt 75—71; F. H. Mellus 75—69; S. R. Smith 75—65; Guy Holohan 75—65; E. FOR SALE

RACING AND BREEDING MATERIAL

from the establishment of the late

WENDELIN J. MILLER

of Chico, Cal.

The death of Mr. W. J. Miller causes to be put on the market the choice assortment of Broodmares, Youngsters and Race Winners with which he achieved such signal success in recent years, including

JOHN MALCOLM (2) 2:11½

stake winner, world's champion two-year-old pacing gelding (1913), by Dan Logan 2:07½, dam Susie Miller by Prince Ansel (2) 2:20½, etc. Now four years old and can show as much or more than any pacer in California. Prime for this year's races.

CAPITOLA (2) 2:17¾, (3) 2:14½

stake winner, fastest two-year-old pacing filly of 1912, public trial in 2:06½ as three-year-old, by Dan Logan, dam Lulu Mack by Arthur Wilkes, etc. A great race mare for her class.

BONDALEAN (2) 2:20½

winner of second money in two-year-old division, Breeders' Futurity, 1914, and absolutely the best one in sight for this year's three-year-old pacing stakes. Entered and paid up. Trialed in 2:15 last year. By The Bondsman, dam Katalina 2:11¼ by Tom Smith 2:13¼, etc. As great a youngster as the country affords today.

KATALINA 2:11¼

(dam of Bondalean (2) 2:20½) by Tom Smith 2:13¼, dam Kate Lumry 2:20½ (dam of 5 trotters including Baby Doll 2:10¼, Ella Mac 2:11½, etc.) by Shadeland Onward 2:18½. Katalina was a stake winner, a great aged trotter, and her first foal is a fast, standard performer. She breeds regularly and will become more famous as a producer than is her dam.

TWO-YEAR-OLD FILLY

by All Style 2:10, dam Katalina 2:11¼. Staked, paid up. Good prospect.

BAY FILLY, WEANLING

by The Proof (2) 2:29¾, dam Katalina 2:11¼. Nice individual and bred to make a fast mare.

LULU MACK

(dam of Capitola (3) 2:14½), by Arthur Wilkes, sire of Maymack 2:04½, etc., dam Lady Merrill by Tilton Almont, sire of the dam of Monte Carlo 2:07¼, etc. Good breeder and a proven producer.

BAY FILLY

three years old, sister to Capitola (3) 2:14½, never broken.

FIRST NATIONAL

bay colt, two years old, brother to Capitola (3) 2:14½. Staked, paid up. Fine youngster.

John Malcolm and Bondalean are in training at the State Fair Grounds, Sacramento, their workout days coming on Wednesdays and Saturdays. You can see them at any time and they show for exactly what they are—two of the best young pacers in the land to race in this and future seasons. Prices and particulars of all kind may be obtained upon application by mail or in person to either of the undersigned.

MRS. W. J. MILLER,
L. B. DANIELS, Chico, Cal.
State Fair Grounds, Sacramento, Cal.

Coast Breeders and Owners please note that I have changed the location of my

FOR SALE

Prince Arista

HIGH SCHOOL SADDLE HORSE

Just the horse for any lady or gentleman who desires a really high class saddler for park, road and show purposes. Brown gelding, hind ankles white, showy and nervy but perfectly behaved; smoothly made, substantial, sound, will carry weight. Goes five gaits perfectly, has a good range of high school tricks that he performs on the word, without forcing or prompting, and can be taught everything that any other horse ever learned. Excellently bred. Call at the farm and see him or write for pictures or particulars. None in California to approach him at the price. Address

H. S. DOWLING, Supt., Woodland, Cal.

FOR SALE.—Thoroughbred young stallion KING BRIGHT, 16 hands, weight 1150 lbs. Considered one of the handsomest types of thoroughbred in California. Sire Starbright (great stakewinner), dam Eleven Bells (winner of 87 races), by Imported Quicklime (second in English Derby). Won ½-mile (his first start), 123 lbs. up in :48 easily (only one month training) in Santa Rosa. Guaranteed perfectly sound. Fine disposition and magnificent individual. Excellent prospect for breeding and racing. Price very reasonable. J. P. ENGLISH,

446 South E. St., Santa Rosa, Cal.

FOR SALE—12 bore Purdy shot gun and case—extra barrels. Formerly property of the late Crittenden Robinson, champion wing shot of the world. Can be seen at Bekin's Storage Co., 12th and Mission Sts., San Francisco. Make offer.

Made in America

For 19 Years Throughout the Whole World Save-The-Horse Has Stood Up and "Made Good" Under Every Test.

H. FELD, Meats and Groceries, 1801 E. Prairie Ave., St. Louis, Mo., writes: Your Save The-Horse cannot be excelled for curb. Have also made several recommendations and your remedy did the work in every case. Some of the cases had been given up by veterinarians.

N. P. VERNON, Recorder's Office, Parish of Tangipa oa, Amite City, Ba., writes: I used Save-The-Horse with good results on several occasions; one in particular. A mare very lame with ring bone. I applied Save-The-Horse and she is sound.

Every bottle of Save-The-Horse is sold with signed contract-bond to return money if remedy fails on Ringbone—Thoropin—SPAVIN—or ANY Shoulder, Knee, Ankle, Hoof or Tendon di-ease.

$5. Druggists everywhere sell Save-The-Horse WITH CONTRACT, or we will send it by Parcel Post or Express paid.

OR write and we will send our — BOOK — Sample Contract and Advice — ALL FREE to (Horse Owners, Trainers and Managers—Only). Address

Offerings for Private Sale from the Stable of

WILLIAM G. DURFEE

of Prime Campaigners and Well Proven Prospects

READY TO RACE THIS YEAR

I have no objections to hard work or to driving an entry in every race of the day's program during the racing season, but daylight hours are limited, and neither physical possibility nor the judges will stand for me driving more than one horse in each race, so I am making this offering of tried and proven campaigners and well developed prospects for classes and coast futurities. I have too many horses already well developed for one man to train and race, with more coming on steadily that must be handled. Many of the individuals offered here are well known to you, and a trip here will give you full acquaintance with any others that may interest you. Every claim made for speed already shown will be fully substantiated, every horse is exactly as represented, and every price is based fairly on what long experience assures me is a conservative estimate of their actual earning capacity in competent hands. Look this list over, come and see them, and you will realize that you have never been afforded a better opportunity for a profitable investment in horseflesh for racing purposes.

All previous prices are invalidated—Quotations below are subject to change according to future conditions.

MISS QUEALY (2) 2:26¾

Full sister to MANRICO (3) 2:07¼, winner of Kentucky Futurity 1912, and holder of world's record for sixth heat. Seven years old, trained slightly as a three-year-old and showed half in 1:06 over a half-mile track; has been in training ninety days and can trot a half in 1:05; absolutely will not break, good gaited, sound, and a handsome individual. Can trot a two-minute gait and has every right to make a very fast, consistent, good mannered race mare. Price $1750.

ALARICH 2:11¼ (Breeder's mark 2:09), trotter, bay gelding with black points, 15.3, handsome, sound, fast and game; trialed at Santa Rosa last season in 2:06¾ and can do it again. Is a first class doer, can race twice a week and is eligible to the 2:13 class trots on mile tracks and to the 2:18 class on half-mile tracks; has shown well on the twice-arounds. Price, $650.00.

HELEN BELLE (2) 2:22½, breeder's record, bay filly, foaled 1912, good gaited, good headed, sound and extremely fast; was taken up absolutely green on Sept. 3 and has developed in a most satisfactory manner, taking her mark in December, since which time she has been an eighth in :16, half in 1:09. Sired by California's greatest sire of colt trotters, CARLOKIN 2:07½. First dam Carolyn C. by Axtell (3) 2:12 (a champion); second dam by Expedition, sire of Bon Voyage 2:08; third dam by Princeps (son of Woodford Mamb.); fourth dam by Hambletonian 10.

Carolyn C. had two minute speed. This great filly is entered and paid up in the Occident stake, the State Fair, P. C. T. H. B. A., and Oregon Futurities for 1915. The best buy in California at $1400.

NELLIE Mc,

black mare, trotter, eight years old, racing sound but is blemished; has always trained sound and I believe will continue to do so. Trialed at Sacramento in 2:10½ and has been a half lately in 1:03¾. Is a splendid mannered mare—anyone can drive her anywhere. She races first class, is fast, good headed, good gaited and dead game.

Sired by ZOLOCK 2:05¼, dam by Wilkes Moor, son of Guy Wilkes.

Stands about 15.3, is a round made extra good looking mare, weighs about 1140, has splendid legs and feet. She negotiates a half mile circle in A-1 style, should surely beat 2:10 this year. Does not pull a pound and can be placed anywhere. Eligible to any class. Price $1000.00.

CARLETA,

bay filly, two years old, by CARLOKIN, dam ALEXANDRIA, tr. 2:20, by Bon Voyage 2:08; second dam by Oakland Baron 2:09¼; third dam by Allandorf, etc.

This is a good trotter and should be prominent in her stake engagements. Is very handsome, good headed, sound and comes from familes noted for early speed. In training now and improving very fast; trialed recently, half mile in 1:14, eighth in :17¼.

She is entered and paid up to date in the following stakes: Panama-Pacific $3,000 for two-year-olds, Stanford, Occident, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. Price $1000.

OMAR, gelding,

trotter, trial 2:13¾, half in 1:05, eighths in :15; good headed, sound and can be depended upon. Is a beautifully gaited big horse and should prove useful to race over the twice arounds or for a matinee and road horse. He is fearless and is one of the most pleasant driving horses I have ever ridden behind. Stands slightly over 16 hands, weighs about 1200, is eight years old. Sired by DEL CORONADO 2:09½, dam Pineapple by Albion (son of General Benton). A present at $350.00.

CARLSCHEN (2) 2:23, breeder's record, brown gelding by CARLOKIN, dam BONNIE AILSIE 2:08½ (dam of Contention B. (3) 2:08¼) by Faustino, son of Sidney.

Trialed with a little work last year a half in 1:09, is extremely promising and looks to be as good a prospect as any of the colts racing last year in the two-year-old trots. Is engaged in several of the futurities including the P. C. T. H. B. A., Pleasanton and State Fair Futurities. Is a splendid type, beautifully gaited, good headed and has extreme speed. He does it right. Ready to show and can trot a half in 1:07. Price $800.00.

HERMES, brown colt,

two years old, by CARLOKIN, dam MISS QUEALY (full sister to Manrico 2:07¼).

This is one of the most promising trotters I have ever handled. Is an especially nice gaited colt, can show a 2:20 gait, is good headed and on the whole the most promising youngster I know of for the western stakes. Is also a show horse. Is entered and paid up in the Occident, Stanford, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. His dam is an extremely fast trotter, having shown a two minute gait in her three-year-old form, and his second dam produced two to hold world's records—Manrico and Don Pronto.

This youngster is spoken of as the most impressive colt trotter at Los Angeles. Price $1500.00.

JOHNNY DUGAN,

3-yr.-old breeder's record 2:16,

pacer, no straps, bay gelding four years old, straight and sound, trialed a half in 1:04 last year in his three-year-old form and could pace around 2:10 in June.

Sire, CARLOKIN 2:07½; dam Annabelle L. (full sister to Murray M. and Robert I. 2:08¾) by Hambletonian Wilkes; second dam Annabelle 2:27½ (dam of La Belle 2:16); third dam by Williamson's Belmont. A great buy at $350.00.

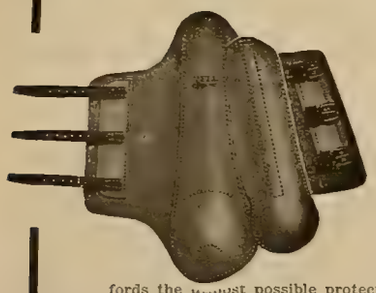
OLD FOLKS,

bay gelding, trotter, five years old, trialed as a two-year-old in 2:31½, as a three-year-old in 2:18½, and in his four-year-old form last May in 2:11, last half in 1:04. Is sound, good gaited, good headed, and should 2:08 this year. Comes from a family of good race horses on both sides—by DEL CORONADO 2:09½, dam IRAN BELLE, by Iran Alto 2:12¼; second dam ANNABELLE, etc. He stands A-1 with the railbirds around Los Angeles and is in training and ready to go on with and race this year. Price $1100.

NICOLA B. (2) 2:23¼

Winner two-year-old division Oregon Futurity, 1914.

Received slight injury just prior to going to the races in 1914, up to which time he was the most promising colt in my stable, working mile first part of June in 2:17, half in 1:06. Started twice, was once first, once second. Now in training and has brushed an eighth lately in :16; sound, grand individual, paid up in six western stakes and has every license to win. Son of Carlokin 2:07½ and Atherine 2:16¾, dam of Copa de Oro 2:01, Rags 2:09¼, etc. Price $2000.



AND ONE FOR THE $20,000 P.-P. I. E. TROTS — RAGS 2:09¼.

winner of the Breeder's and Oregon Futurities, the Stanford and the Occident stakes as a three-year-old, and the Governor's Stake, $5000, as a four-year-old — in all, beaten in but two out of eight starts, second in those two, and beaten only by 2:05 trotters. In my opinion as good a prospect for the big stakes as anyone has. He is a really great race horse, is racing sound, and has developed from an overgrown four-year-old into a sturdy, strong, exceptionally fine individual. Should be engaged in the Panama-Pacific $20,000 stakes, for which I already have entries. None better bred—by Del Coronado and out of the dam of Copa de Oro 1:59, etc. Price $2000.

In addition to the ones above mentioned I will offer to intending buyers JIM CRAM, three-year-old pacer (brother to Chango 2:12¼), the two-year-old pacer SANDY McNABB (staked), FIVE YEARLINGS and SIX TWO-YEAR-OLDS, most of which are in training and ready to show.

Prices and descriptions on application.

$5000 Guaranteed **$5000 Guaranteed**

The Stanford-Occident Futurity No. 1

(For foals of mares covered in 1914)

To Trot and Pace at Three Years Old.

$3000.00 for Trotting Foals **$2000 00 for Pacing Foals**

To be Given Under the Direction of the

California State Agricultural Society, 1918

Entries to Close April 1st, 1915

Money divided as follows:

TROTTING DIVISION	PACING DIVISION
$900.00 to 1st heat.	$600.00 to 1st heat.
$900.00 to 2nd heat.	$600.00 to 2nd heat.
$900.00 to 3rd heat.	$600.00 to 3rd heat.
$300.00 to horse standing highest in summary.	$200.00 to horse standing highest in summary.

ENTRANCE AND PAYMENTS—$5 to nominate mare on April 1st, 1915; when name, color, description of mare and stallion bred to must be given; $5 July 1st, 1915; $10 December 1st, 1915; $10 on yearlings April 1st, 1916; $10 on two-year-olds April 1st, 1917; $10 on three-year-olds April 1st, 1918.

STARTING PAYMENTS—$50 to start in pacing division; $100 to start in trotting division. All starting payments to be made ten days before the 1st day of the State Fair at which the race is to take place. Nominators when making payments to start must designate whether the horse is a trotter or pacer.

CONDITIONS.

The race in each division will be for three heats; if no horse wins two of the three heats a fourth heat must be raced by the heat winners to decide the winner of the race, all other horses to go to the barn.

Trotting Division Heat Purses $900. Total Purse $4000 00.

Pacing Division Heat Purses $600. Total Purse $2000.00.

Heat purses divided 50, 25, 15 and 10%; the extra $200 in pacing and $300 in trotting divisions goes to the winner of two heats.

Distance 100 yards. A distanced horse shall be entitled to money already won.

If a mare proves barren or slips or has a dead foal or twins, or if either the mare or the foal dies before December 1, 1915, her Nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment nor will any entry be liable for more than the amount paid in or contracted for. In entries, the name, color and pedigree or mare must be given; also the name of the horse to which she was bred in 1914.

Entries must be accompanied by the entrance fee.

Nominators are liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for $5000, the amount of the guarantee, only. Hobbles will be barred in trotting and pacing divisions.

Right reserved to declare off or re-open these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

There will be no more moneys in each division or heat than there are starters.

No horse shall receive more than one money in each heat.

Entries open to the world.

Other than exceptions made in this entry blank, rules of National Trotting Association to govern.

A. L. SCOTT, President. CHAS. W. PAINE, Secretary. Sacramento, Cal.

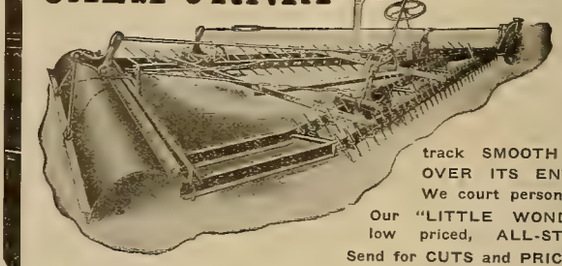
Peter The Great

is the world's foremost progenitor of extreme speed; sire of 30 in 2:10, etc.

HIS SON

PETER McKLYO 3, 2:12 1-2

will make the season of 1915 in the training stable of James Thompson at the San Jose Driving Park beginning March 15 and ending July 1.



PETER McKLYO (3) 2:12½, the only California-owned son of Peter the Great of an age permitting stud duty, is out of a great-bred young matron by Jay McGregor 2:07¼—Klyo (2) 2:29½; second dam Miss Spears 2:21¾ (dam of 6 including Shakespeare (3) 2:09¾); third dam Medium's Last (dam of 7 including Trampfast (2) 2:14¼); fourth dam Suzanne (dam of 1 and grandam of 10 including Susie J. 2:06½).

This colt is four years old, having obtained his record last season with a very limited amount of work. He came into my hands perfectly green in February, 1914, and developed speed so fast that I had to take his shoes off and jog him for two months barefooted. Being by Peter the Great, the sire of the century, and, as you will notice, out of a daughter of Jay McGregor, another wonderful family of horses, he is one of the best bred young horses in the world and I can truthfully say he is one of the very best individuals that I ever had the pleasure of looking at. He can trot a quarter in 30 seconds, and I am firmly of the opinion that he will trot a mile this fall in 2:06 or better.

Fee, $75 the season with return privilege. Mares pastured at usual rates and accorded best of care, but no responsibility assumed for accidents or escapes. Service fee and pasture bills must be paid before removal of mares. Address for all particulars

Clara Mac 2:04½ Sire of **Vera Hal 2:05**

Only stallion in California to sire a new 2:05 performer in 1914, and one of three stallions in U. S. to sire two new ones in 2:05 that season.

Also sire of Madam Mac (4) 2:10¼, trial 2:07; Eddy Mac (3) 2:29½, trial 2:13; Nellie Mac, trial 2:18 trotting, good for 2:10 this year, and numerous others with fast trials. In four show classes at Fresno his colts won three firsts, one second.

Son of McKINNEY 2:11¼ and the great brood mare EXPRESSIVE 2:12½ by ELECTIONEER 125. Ideal in color, size and conformation—seal brown, height 16½ hands, weight 1275 pounds. Permanently in the stud at my ranch three miles south of Selma, at $25 the season, usual return privilege, or $35 to insure. Good pasture for mares at $2 per month and best of care given. No responsibility assumed for accidents or escapes. Address for all particulars

J. H. NELSON, Selma, Cal.

WOODLAND STOCK FARM

INCORPORATED

Offers for Service for the Season of 1915

PRINCE ANSEL

CERT. 1062

2, 2:20½ A. T. R. 29220

Sire of

Prince Lot 2:07¾
Joseph Ansel (3) 2:12¾
Lottie Ansel (2) 2:14¼
Laura Rogers 2:11¼
Adansel (3) 2:14½
Arista Ansel (2) 2:18¾, etc.

And the dams of

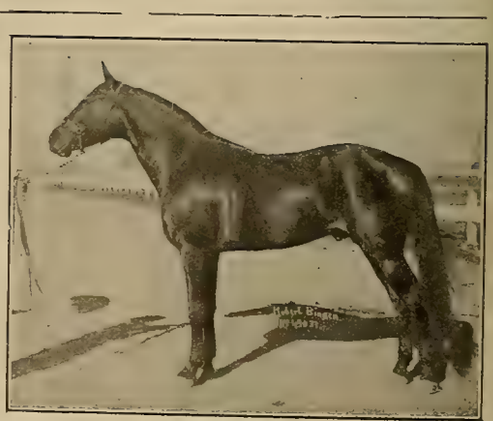
John Malcolm (2) 2:11½, etc.

PRINCE ANSEL is not only doing more than any other individual to perpetuate the fame of the great family of Dexter Prince, but he has few rivals in the land as a progenitor of futurity winning youngsters, as attested by the summaries of coast classics year by year. None more highly esteemed by horsemen in general. Fee, $50 with usual return privilege.

ROBERT BINGEN

CERT. 1061

2:11¼ A. T. R. 45033



Best Bred Son of

BINGEN 2:06 1-4

Sire of Uhlan 1:58; 14 in 2:10

First dam Episode 2:18 half sister to Peter the Great 2:07¼

Second dam Santos, dam of Peter the Great 2:07¼, J. Malcolm Forbes 2:08 etc

ROBERT BINGEN, in every way one of the most desirable horses ever offered for service in California, represents the families whose blood is most eagerly sought by successful breeders today—Bingen and Peter the Great. He is the only son of Bingen standing for service in California and his book is rapidly filling. Fee, $75 by the season.

True Kinney 2:12¼

The best young McKinney stallion in California—a colt trotter and a coming sire. His first foals are among the best on the farm and show for themselves. Terms on application—season limited.

ALL STALLIONS LICENSED PURE BRED

JOHN W. CONSIDINE, PRESIDENT

Mares sent to these stallions will be cared for at $5.00 per month on pasture; $10.00 per month in box stalls. Colts entered in all the Futurities, Brood Mares, Racing Prospects and Saddle Horses for sale at all times. Correspondence solicited, visitors cordially welcomed. Address HARRY DOWLING, Supt., Woodland, Cal.

COPA DE ORO 1:59
WINNING PERFORMANCE

DURFEE'S STALLIONS

CARLOKIN 2:07 1-2
EXHIBITION MILE 2:05 1-4

Champion Pacing Stallion of the West and Sire of a Champion

Reg. No. 52785. Licensed Pure Bred. Cert. No. 1037
Golden Bay. Height 15.3½. Weight 1160.

Sire of CONTENTION B. (2) 2:24¼, (3) 2:08¼, the latter mark a world's record when made, and but one-quarter of a second removed from present record for three-year-old pacing geldings. Public trial (3) 2:07¼. Also sire of

Chango p. (3).....2:12¼ De Ora (3) 2:17
2-yr.-old record 2:13½. 2-yr.-old record 2:27¼.
Trial (3) .....2:09 Gold Lily p. (2)....2:24½

Patrick de Oro p (3)2:22¼, trial (3) 2:08¼, ½-mi. track

Copa de Oro has been retired to the stud for but a very few years and these are from his first foals. Where can you find a stallion whose get have made an equal showing?

COPA DE ORO is the fastest son of Nutwood Wilkes 2:16½ (sire of 8 in 2:10); first dam Atherine 2:16¾ (great brood mare) by Patron 2:14¼, sire of the dams of 7 in 2:10; second dam Athene (dam of 2 trotters, etc.) by Harold 413, sire of Maud S. 2:08¾ and the dams of 5 in 2:10; third dam Minerva (great brood mare) by Pilot Jr. 12, sire of the dams of Maud S. 2:08¾ and 3 others in 2:10, etc. He is one of the handsomest horses in the world, as well as one of the fastest, and is undoubtedly the best bred of all extremely fast pacing sires. From the first I heralded him as the Coast's future great pacing sire, and the performances of his youngsters recorded above certainly show that I had most excellent grounds for that belief.

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred. Cert. No. 1038
Mahogany Bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

Ethel D. (3).....2:11 Helen Belle (2)....2:22½
Johnny Dugan p (3)2:16 Nicola B. (2).....2:23½
John Warwick (2) 2:17 Santiago (3) 2:24¼
The Lark (3).....2:18½ May Marian p (3)..2:24¼
Carl (2) .....2:19¾ Carlrich p (2) 2:24½
Miss Carlokin p ....2:20 El Carbine (2).....2:27½
Carsto (2) .....2:22½ Eileen C. (3) 2:29
Carlschen (2) .....2:23 Carlos (2) 2:29¼
Fulton G. (2).....2:30

CARLOKIN is the best bred son fo McKinney 2:11¼, foremost among the progenitors of 2:10 speed, being out of that sterling producing matron Carlotta Wilkes (dam of Inferlotta 2:04¾, Mary Dillon 2:06¼, Guy Borden 2:07¼, Carlokin 2:07½, and 6 others in 2:30) by Charley Wilkes 3653; second dam Aspasia (dam of 4) by Alcantara 2:23, sire of the dams of 20 in 2:10; third dam Miss Buchanan (dam of 1) by Clark Chief 89, sire of the dams of 2 in 2:10, etc. Carlokin was not only a fast and rugged campaigner, but, point for point, one of the most ideal individuals ever foaled. I chose him from among all the best horses of the country as a prospective great sire, and in 1913-1914 his get won more coast futurities than those of all other sires combined. What more could you ask of them?

FEE: $75 For the Season, Usual Return Privilege

I am especially well equipped for caring for mares at reasonable rates in any way that owners may desire. Every attention will be given mares in my charge, but no responsibility is assumed for accidents or escapes. Further particulars may be had by applying to W. G. DURFEE, 2019 So. Figueroa St., Los Angeles, Cal.

Pleasanton Driving Park

offers for service for the season of 1915 the following stallions:

Joe Patchen II 2:03¼

Licensed Pure Bred—Cert. No. 1128.
A. T. R. No. 47491
BEST MONEY WINNING PACER

By JOE PATCHEN 2:01¼, sire of Dan Patch 1:55¼ and 6 others in 2:10.

Dam, Bessie Bonehill 2:05¾ (dam of 2 in 2:10) by Empire Wilkes 2:29¼; second dam Arab Girl (dam of 7) by Crittenden 433, sire of the dams of 6 in 2:10.

Joe Patchen II comes from a long line of famous ancestors and is himself one of the best known and most popular pacers in America, with all the qualities of speed, stamina and individual excellence necessary to the making of a truly great horse—one of the kind you would expect to find after a glance over the array of famous performers owning allegiance to the families from which he comes. He is an excellent breeder, transmitting uniformly his own desirable characteristics and his few foals in California are promising to the highest degree.

Mahomet Watts 2:08¼

Licensed Pure Bred—Cert. No. 2312.
A. T. R. No. 51518.
AXWORTHY ELECTIONEER

By GEN. WATTS (3) 2:06¾, sire of three three-year-old trotters in 2:10.

Dam Alla P. 2:21¼ (dam of 3) by Palo Alto 2:08¾, sire of the dams of 2 in 2:10; second dam Lula Wilkes (dam of 5), by George Wilkes 2:22, sire of the dams of 15 in 2:10.

Mahomet Watts is not only the fastest performer credited to Gen. Watts (3) 2:06¾ (whose breeding on qualities have been prime factors in the rise of the great house of the Axworthys) but he springs on the maternal side from the most firmly established families of champion producers—those of Electioneer and George Wilkes. He is a pleasing individual of fine finish and extreme speed, having a three-year-old record of 2:10 and being timed separately in a race last year in 2:05¼, whose services should be most welcome to California breeders.

Fee for Joe Patchen II or Mahomet Watts, $100 with usual return privilege

Service fee refunded to owners of mares bred to Mahomet Watts proving not with foal.

Vernon McKinney 2:01½

Licensed Pure Bred—Cert. No. 1126.
A. T. R. No. 53803.
FASTEST OF THE McKINNEYS

By GUY McKINNEY 37625, son of McKinney 2:11¼, dam by Guy Wilkes.

Dam Maud Vernon by Mount Vernon 2:15¼, sire of the dam of Leata J. 2:03, etc.; second dam Mag by Gen. McClellan, sire of the dam of Mack Mack 2:08, etc.

No member of the McKinney family excells Vernon McKinney in point of speed or individual excellence. He is a horse of much substance — 16 hands, 1200 pounds — bred in lines of intense prolificacy and evidencing in every way his ability to "live up to his pedigree." No horse has greater natural speed or a more effortless way of going. He is a sure breeder and his youngsters are the readiest sellers of their age in California—a statement proven by recent sales and tentative offerings for the get of mares due to foal to him this year.

Zomblack 2:26, tr. 3, 2:08¾

Licensed Pure Bred—Cert. No. 1127.
A. T. R. No. 54955
BEST SON OF ZOMBRO

By ZOMBRO 2:11, sire of twenty and the dams of three in 2:10.

Dam, Madeline Marshall (dam of 2) by Demonio 2:11¼, sire of 7 and dam of 1 in 2:10; second dam Mamie Comet (dam of 3) by Nutwood 2:18¾, sire of 2 and dams of 21 in 2:10.

Zomblack is one of the handsomest horses ever foaled in California as well as one of the fastest. His extreme speed came to him early and naturally, and he is unexcelled in size and conformation — an ideal type of the American trotter in every important respect. He is intensely bred in speed producing lines and we have no hesitation in advancing the claim that he is the very best son of Zombro 2:11, in his turn the best son of McKinney. In every instance the families represented in his pedigree are breeding on most successfully.

Fee for Vernon McKinney or Zomblack, $50 with usual return privilege

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars
CHAS. L. DeRYDER, Superintendent PLEASANTON, CAL.

Mamie Alwin 2:12
Martin Carter (3) 2:29¼
Daughter of Chestnut Tom 2:15 by Nutwood Wilkes 2:16½

WORLD'S CHAMPION YEARLING TROTTING STALLION 1910
Unbeaten Two-Year-Old in 1911

Winner of California State Fair and Pacific Coast Breeders' Association Futurities in 1912. Record in Third Heat of a Winning Race.

Also holder of the World's Record of a Five-Heat Race by a 3-yr.-old Stallion

Limited number of approved mares at $100 the season.

WILBUR LOU was bred to seven (7) mares in 1912 and got seven (7) foals; six (6) were trained, on the property of John Christiansen, of San Francisco, which was said to be the fastest yearling on the Pacific Coast.

The five (5) owned by the Hemet Stock Farm showed as follows:

FIESTA LOU, record 2:25, half-mile track, ½ mile—1:08¾
SELMA PALEY, trotted ½ mile 1:13¾; one-eighth— :17¾
GOLDSMITH LOU " ¼ mile :35½
GERTRUDE RIVES " ¼ mile :36¾
BILLIE BOYD " ¼ mile :38

This includes the entire get of WILBUR LOU.

KINNEY de LOPEZ 2:23,

Son of KINNEY LOU 2:07¾ and BETSY DIRECT by Direct 2:05½

$50 THE SEASON

KINNEY DE LOPEZ is the sire of DON DE LOPEZ, trial one-half as a yearling 1:13¾, one-eighth 17½ seconds; could have trotted in standard time as a yearling. KINNEY DE LOPEZ is certain to sire early speed.

Terms: Cash at time of service with usual return privilege, or money refunded at our option. Excellent pasturage and best of care taken of mares, but no responsibility assumed for accidents or escapes.

BREED TO THE COAST'S CHAMPION CAMPAIGNER AND FUTURITY SIRE

JIM LOGAN 2:01¾

(3) 2:05½, world's record to 1912 and yet the fastest third heat ever paced by stallion of that age; (5) 2:04¼, (6) 2:03¼, (7) 2:02¾, (8) 2:01¾, race record for Pacific Coast.

Licensed Pure Bred—Cert. No. 1028.
All winning race records. Registry No. 44997.

Sire of MAXINE (3) 2:15 Winner Pacing Division Pacific Breeders Futurity 1914

Trial in 2:09, half in 1:01, quarter in :29 as a three-year-old.

Son of CHARLES DERBY 2:20, brother to Klatawah (3) 2:05½, etc., and sire of TEN in 2:10.

Dam, EFFIE LOGAN, California's greatest producer of extreme speed (dam of Jim Logan 2:01¾, Sir Albert S. 2:03¾, and Dan Logan 2:07½, sire of John Malcolm (2) 2:11½, champion two-year-old of 1913), by Durfee 11256; second dam Ripple, by Prompter 2305, sire of the dam of Gratt 2:02¼, etc.; third dam Grace (dam of Daedalion 2:08½, Creole 2:15 and Eagle 2:19½), by Buccaneer 2656, sire of the dams of 2 in 2:10; fourth dam Mary, great broodmare, by Flaxtail.

JIM LOGAN is not only a horse of most acceptable size and pleasing conformation, but is one of the most rugged campaigners ever raced. After acquiring a world's record as a three-year-old he reduced his record every year raced and is a sound horse today—no more eloquent testimony of his genuine natural qualities could be given. Of his very few living foals, every one trained has shown speed in convincing quantity, and the only one to be raced, Maxine (3) 2:15, began her career as a futurity winner. Could you ask more of a well bred horse than that he be a champion campaigner and transmit his qualities to his get?

In the stud, season of 1915, at Woodland Race Track

FEE: $50 for season, with usual return privilege, or $75 to insure living colt. Fees payable at time of service or before removal of mares. Excellent pasture at $5 per month, with best of care for mares, though no responsibility will be assumed for accidents or escapes. Call at race track, or address
J. ELMO MONTGOMERY, Davis, Cal.

THE FURNITURE CITY DRIVING CLUB
announces the following early closing purses for its

Grand Circuit Meeting AUGUST 9-14, 1915

NO. 1—2:08 CLASS, TROTTING - - -	$5000
NO. 2—2:14 CLASS, TROTTING - - -	$3000
NO. 3—2:08 CLASS, PACING - - -	$2000
NO. 4—2:12 CLASS, PACING - - -	$3000

CONDITIONS

ENTRIES CLOSE TUESDAY, APRIL 6

WHEN HORSES MUST BE NAMED.

The Furniture City Driving Club holds membership in The Grand Circuit, The National Trotting Association, and The American Trotting Association.

Rules of the American Trotting Association will govern except as noted herewith.

The above races will be mile heats, best 3 in 5, under the "OLD PLACING SYSTEM" as defined in Rules 155, 156, and 157.

Purses will be divided 50%, 25%, 15%, and 10%.

Horses may be declared out at any time and nominators are liable only for payments due before written notice of withdrawal is lodged with the Secretary.

Entrance is five per cent. (5%) of Purse and five per cent. additional from winners of each division of same, but where two or more horses are entered from the same stable in the same class, full entrance is charged on only one horse, and for each additional horse the entrance is 2½ per cent., but full five per cent. entrance is required from each starter.

ENTRANCE IS PAYABLE IN EASY INSTALLMENTS, VIZ.:

	APRIL 6	MAY 11	JUNE 15	JULY 27
Purse 1—	$50.00	$60.00	$65.00	$75.00
Additional Entries	25.00	30.00	30.00	40.00
Purses 2 and 4—	30.00	35.00	40.00	45.00
Additional Entries	15.00	20.00	20.00	20.00
Purse 3—	20.00	25.00	25.00	30.00
Additional Entries	10.00	10.00	15.00	15.00

A very complete program of class events for $1,000 purses will be announced about July 1, entries to close July 27. Horsemen are invited to suggest classes and every effort will be made to accommodate the greatest number possible—especially those having entries in the early closing events.

WHAT SOUSA SAYS OF TRAPSHOOTING

TRAP-SHOOTING.

A Panacea for all ills.

If the tired business man
wants to throw off his tiredness,
his business cares, and the general
blueness of life, let him take up
trap-shooting.

With the targets flying, life
assumes a roseate hue, and "all's
well with the world."

John Philip Sousa

"Every man should have an active, muscle building, fat destroying, lung-developing hobby." Mr. Sousa chose trapsooting. He did so because this thrilling, fascinating, invigorating sport trains the brain and develops brawn,—it's a man's sport and gives him a chance for "hob-nobbing" with the best of sportsmen.

OUR BOOKLETS TELL AN INTERESTING AND INSTRUCTIVE STORY OF TRAPSHOOTING'S PLEASURES. THEY ARE FREE. WRITE FOR THEM TODAY. DPT. 99-S

VICTORIES OF PARAMOUNT PARKER GUNS 1915

Look, Read, Remember!!!

At the Pinehurst Mid-Winter Handicap Shoot the four contestants making the highest scores in the preliminary event all shot Parker Guns.

RATHER STARTLING, ISN'T IT?

In the main event, the PINEHURST HANDICAP, Mr. S. A. Huntley, although placed further back than any other contestant, scored

95 out of 100 Targets at 23 Yards

and landed the Trophy. Furthermore Mr. Huntley was high over all for the entire tournament, and as usual shot his 34-inch barrel PARKER GUN.

In 1914 Parker Guns won **The Grand American Handicap, The National Championship** at single and double targets, the

FIRST and SECOND YEARLY AVERAGES

and made the best scores on the Pacific Coast.

Follow the pace set by the champions of America and for either single or double target shooting use

Long Tom Parker Guns

For game shooting afield, enhance the pleasure of the day's sport and improve your skill by shooting a small gauge PARKER GUN, pioneer makers of small bores in America. Instructive booklet on small bore guns sent free on request.

For further particulars regarding guns from 8 to 28 gauge, address,

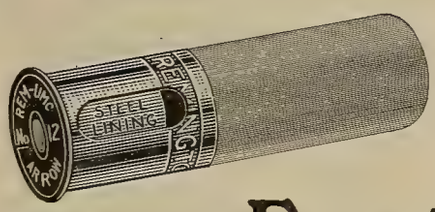
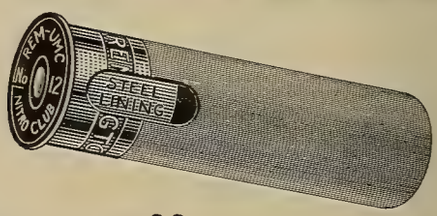
WINCHESTER



FACTORY LOADED SHOTSHELLS, "LEADER" AND "REPEATER"



The use of machinery has brought about invariable results in the loading of shotshells, impossible to obtain by hand-loading; as machines can be adjusted and timed so as to insure uniformity in the work. In the case of loading shotshells, this means exactly measuring the quantity of powder, seating the wads evenly and with uniform pressure, exactly measuring the quantity of shot, seating the top wad evenly, and crimping the shells uniformly and firmly. The hand cannot be so controlled. Machine loading has greatly raised the average of shooting and put it on a stable basis. Winchester Factory Loaded "Leader" and "Repeater" shells are loaded in this way; and another point is that there is a difference in machinery and in knowledge of such things. The Winchester plant, being the largest in the world devoted solely to the manufacture of guns and ammunition, has the most up-to-date equipment for such purposes, and also the best skill obtainable. What is the result of this? It is that, in buying Winchester Factory Loaded Shells, you are getting a perfected product, instead of something hap-hazard—and this is a case where it doesn't show on the outside. It shows when your shooting, though, and it will pay you to find this out. You can get Winchester Factory Loaded Shells of all dealers. They will prove to you that

VOLUME LXVI. No. 14. SAN FRANCISCO, SATURDAY, APRIL 3, 1915. Subscription—$3.00 Per Year

AUSTRALIA'S FASTEST STALLION,
DON PRONTO 2:02¼

Sailed Wednesday, March 31, on the S. S. Moana for his new home, the establishment of Dr. R. C. Simpson, Armidale, New South Wales. He is the fastest horse and one of the best bred ones so far exported to Australia or New Zealand. Charles A. Durfee in the cart.

A Prize Worth Striving For
The Hercules 1915 Century Trophy

THE man who wins one is classed among the first ranks of the trapshooting army, for a Hercules Trophy is recognized as a supreme award for skill. Hercules Trophies are always keenly competed for. To shoot for such a prize with

Infallible or E. C. Smokeless Shotgun Powders

is an advantage, for you can be sure of their absolute uniformity and dependability.

The trophies are heavy solid gold watch fobs. The design is handsomely wrought and it is the most beautiful trophy we ever offered.

The conditions governing the awards are the same as in previous years. Write for booklet describing them.

HERCULES POWDER CO.

WILMINGTON, DEL.

Mr. JOHN B. BURNHAM

Hand Trap Improves Field Shooting
Says John B. Burnham

JOHN B. BURNHAM, well known sportsman and President of the American Game Protection and Propagation Association, gives the following account of his experience with the Hand Trap:

"The use of the Du Pont Hand Trap has improved my trapshooting considerably and my field shooting wonderfully—the latter fully 100% and especially in snap shooting on partridge in thick cover."

Mr. Burnham's opinion is shared by an increasing number of hunters and trapshooters who are finding that the hand trap greatly improves their shooting. The seventy-yard straightaways, overheads, Jack-rabbits, skimmers and curvers are a real test of skill for even the most expert shooter.

The trap, when folded, can very handily be carried in a suit-case with targets and shells. It is of very strong and durable construction and weighs only six pounds complete. If your dealer can't supply, we will send postpaid for $4 00. Send for new booklet on Trapshooting and use of Hand Trap. Address Dept. 99-S.

The Year Book for 1914 is out.

◈ ◈ ◈

That Cleveland entry for the early closers looks like somebody would have some horseracing to do to get away with the money.

◈ ◈ ◈

Frank Malcolm made the trip from Fresno to Pleasanton last week to take a look at the horses which he has in training in the stable of Bert Webster.

◈ ◈ ◈

Paste this in your hat:—If you are the owner of a good mare and fail to breed her this season to some worthy stallion you are making a mistake that will mean money lost to you in the future.

◈ ◈ ◈

Albaloma heads the published entries for "The Ohio" 2:09 trot at Cleveland, and no fault will be found in this quarter if his name heads the summary as well. Even Mr. Borden could find no fault with such a course of procedure!

◈ ◈ ◈

The rains throughout California this week interrupted speed making and gave a rude jolt to the baseball season, but the agriculturists upon whose welfare the prosperity of the country depends are wearing happy smiles, so we should worry—not.

◈ ◈ ◈

During a recent visit in Colorado Fred Laub of Akron, O., who bred and owns the trotter Robert Milroi, purchased a full brother to the one time four-year-old champion pacer Braden Direct 2:01½, and also a brother to the good campaigner of some years back, Winfield Stratton 2:05¼.

◈ ◈ ◈

Knapsack McCarty has shipped from Terre Haute to the "historic" track at Goshen, New York, where he will be quartered in the Orange Hotel Stables. We take this from a reliable source, Genevieve, but that combination of Knap McCarty and the "Orange" stables sort of "sounds" to us.

◈ ◈ ◈

Notwithstanding the chaotic conditions existing in Europe, word comes from New York that President Tranter of the Fasig-Tipton Company is filling a Russian order for trotting and pacing stallions with records, while the same concern has "war orders" for several thousand head of the generally useful kind for field service.

Two dandy young Onward McGregors are reported this week, one a colt out of Gypsy C. by Nutwood Wilkes 2:16½, owned by Charles Cook of Irvington, and the other a filly from Martha S. 2:25 by Nutwood Wilkes 2:16½, grandam Primrose (dam of two) by Sidney 2:19¾, owned by Wm. E. Detels of Pleasanton. Both are staked and ought to make trotters.

◈ ◈ ◈

Montreal announces four early closers for the six days of racing to be given there in August, the King George, $5000, for 2:08 trotters, the Queen Mary, $5000, for 2:06 pacers, the Dominion of Canada, $3000, for 2:12 trotters, and the Greater Montreal, $3000, for 2:10 pacers. Entries close Wednesday, April 14, and the program is more fully reviewed elsewhere in this paper.

◈ ◈ ◈

Al Pennock and Harvey Ernest, who will give a couple of August meetings at the tracks at Cranwood and Rockport, Ohio, have hung up a thousand dollars for drivers only—including, of course, driver owners—to be divided $500, $300 and $200 among the three leading money winning reinsmen at the meetings. Rockport, Rockport,—the name sounds familiar. Anything extra for the judges?

◈ ◈ ◈

The board of appeals of the American Trotting Association will meet at the Auditorium Hotel, Chicago, on Tuesday, May 4, at 10 a. m., for the transaction of such business as may properly be presented to the board for its consideration. All new applications and written evidence must be received at the office of the American Trotting Association not later than April 10.

◈ ◈ ◈

Ester W. 2:06¼ by Director Moore's First 2:22½ has been bred to the fast California pacer Del Rey 2:03¾, now a member of Walter Cox's stable "way down east." Both mare and stallion are owned by Benton Pardee, Lock Haven, Pa., and the girl has a California brand as well as her mate, her dam, the triple producer Madame Arundel, having been bred at San Mateo by Wm. Corbitt over a score of years ago.

◈ ◈ ◈

Friends of Dan Misner—and there are a world of 'em—will be sorry to learn that he suffered quite a mishap last week at Pleasanton while cutting a mess of green feed for his horses. In some manner the sickle took the wrong slant, a nasty cut in the arm and a severed artery being the consequence. Mr. Misner lost quite a bit of blood before surgical aid reached him and ten stitches were required to close the wound properly, but last reports were that no serious effects were expected as a result of his hard luck.

◈ ◈ ◈

The Texas State Fair has announced that there will be no harness racing at this year's event at Dallas, but it is an odds on bet that the trotters and pacers will be back on the program in another year or so. This "balls things up" a bit for the windup of the Great Western Circuit, but clears the track for Phoenix to pull off the best meeting in her history in the time intervening between the close at Lexington and the opening of the fall meeting here at the P.-P. I. E., though her dates as at present announced are November 8 to 13.

◈ ◈ ◈

A. G. Ireland of Chicago, who with W. P. Leach of the Cleveland Leader owns the great pacer Doctor Burns Jr. 2:04¼, was a visitor in San Francisco for a couple of days the latter part of last week, coming up from Los Angeles to give the racing plant at the P.-P. I. E. the "once over" and to make a number of entries for the June meeting, for the speedy Doctor and the green trotting mare Bessie Custer. He was very much pleased with the general situation and stated that the "Los Angeles delegation," some forty strong, would move up in a bunch early in May and put the finishing touches to their entries over the track where they are to race. He reports the horses at the Angeltown track, both transients and regulars, to be coming along in great shape, and just naturally knows that some of the big winners are stabled in the barns there.

◈ ◈ ◈

Heralding the birth at the Morris ranch at Woodland of a Holstein calf whose dam and sire's dam averaged a production of 29,638 pounds of milk in a year, one of our country exchanges remarks: "Why is he not the most valuable Holstein ever chronicled, and you know prices on such animals sour into the five figure column occasionally." Would we poor horse folks see anything "sour" about a calf that sold in five figures? Nix! This "sour" milk breed is a new one, too, sort of a "Burbank," probably, though we have heard of some peculiar cases of an unnatural flow of the lacteal fluid, always explainable upon investigation. There was the cow in Texas who was very bob tailed and gave sour milk at night, owing to the unobstructed play of the sun's rays upon her udders, and also the famous bovine matron who, at the closing day of the street fair down at Mattawamkeag in Penobscot county, Maine, gave throughout the day a generous flow of buttermilk of a most palatable flavor, after proper chilling. The latter animal was the "cynosure of all eyes" and the cause of a great deal of scientific conjecture until the thrifty Yankee who owned her inadvertently remarked that he had let her go unmilked on that morning and the previous evening, and had then hauled her in from his place near Pattagumpus in the tonneau of a Ford automobile! All things are just simply simple when you understand 'em.

Frank Holloway (3) 2:24¼, now four years old and a member of Bob Sebastian's stable at Hemet, turned the two-lap track there recently in 2:15, with the last quarter in :32½.

◈ ◈ ◈

The Hemet Driving Club pulled off an "Easter Matinee" yesterday as a farewell to a number of Southern California horses who are soon to make the trip north for the exposition. Horsemen from nearby towns promised co-operation and a great day was expected.

◈ ◈ ◈

Peter McCormick, McCloskey, Mahomet Watts, Baby Doll, Alberta Dillon and Albaloma, all "California trained," are entered in "The Ohio" at Cleveland, while the Tavern "Steak" drew Laramie Lad, Major By By and Seneca Boy, and "The Edwards" includes Hal Boy, O. U. C., The Beaver, Walnut Grove and Zomblack.

◈ ◈ ◈

California horsemen who are booking for a trip down the big line are reminded that entries to Grand Rapids early closers must be made April 6th with Secretary Moone, 618 Ashton Bldg. The events are for 2:08 trotters, $5000, 2:14 trotters, $3000, 2:12 pacers, $3000, and 2:08 pacers $2000, one per cent to accompany the entry and the balance in instalments. Races are three in five under the old placing system and the program will be rounded out by a full offering of $1000 purses to close late in July.

◈ ◈ ◈

W. F. Whittier and a party of relatives and friends who for some days had been his guests in southern California returned to San Francisco early in the week, much pleased with the condition of affairs in the Hemet valley in general, and at Hemet Stock Farm in particular. The colt crop promises much and the horses in training are making excellent progress—Wilbur Lou (3) 2:10¼, Hemet (3) 2:08¼, Kinney de Lopez 2:23 and a number of youngsters. The yearlings just broken have been turned out to grow for a while, and the two-year-olds are getting theirs. Moderate work has been the rule to date but the entire stable will be well keyed up for the races when the season opens.

◈ ◈ ◈

Joe Lesh of Goshen, Ind., who as the former owner of Giftline 2:02¾, Online 2:04, Leone 2:07¼, Ontonian 2:07½ and other fast ones is well known to horsemen throughout the United States, will move to the track at North Randall, Ohio, about May first with four good prospects, best known of which is the mare Ecelear Kurtz that "came" so rapidly last fall and took a record of 2:10 at Lexington. The jawbone telegraph has sent out some great tales regarding this lass but we could talk about her more freely if we knew how to pronounce the forward division of her cognomen. Plans and specifications for the proper method of spitting this out without mutilation will be gratefully received—and don't all write at once.

◈ ◈ ◈

Thomas Grove of Ensenada, British Columbia, has been a recent visitor in California, taking occasion during his trip to revisit the establishment of Fred W. Wadham at Palm City. Some three years ago, on a former journey to this section, Mr. Grove, who is an extensive breeder of saddle horses, purchased from Mr. Wadham the bay stallion Enolo by Petigru 2:10½, dam the double producer of extreme speed, Juliet 2:13½ (dam of Irish 2:08½ and Hal McKinney 2:06½) by McKinney 2:11¼, grandam Katie by Crichton. Taken to the north country, Enolo was mated for the most part with native mares and Mr. Grove states that the venture has been most satisfactory, as he has gotten a goodly number of youngsters that are not only a great improvement over the foundation stock, but are fine types of the readily marketable riding horse.

◈ ◈ ◈

Parties in the market for either racing timber or breeding material should not overlook the offerings made by the estate of W. J. Miller of Chico, including such ready to race pacers as the world's champion John Malcolm (2) 2:11½ and Bondalean (2) 2:20½, both in training in the stable of Loren Daniels at Sacramento and both "ready for the fray" in 1915. Daniels states that the Dan Logan gelding can show as much or more than any western pacer, and Bondalean looks good for some of the best money in the events for three-year-old pacers. The matrons and youngsters are at the ranch near Chico, and include the producers Katalina 2:11¼ by Tom Smith 2:13¼ and Lulu Mack by Arthur Wilkes; the champion of 1912, Capitola, and a number of younger ones from these matrons, all staked and all right in every way.

◈ ◈ ◈

Will Durfee makes a number of price changes in his sale announcement this week, owing to the fact that the boys and girls he is offering to buyers are improving steadily and proving themselves worth more than the figures originally asked. As we have stated before, these horses ars not "has beens" or "going to be's," but are "is-ers" from the establishment from which in recent years have come the best winners on the Pacific coast. They are not culls, but are the "best in the barn," as Mr. Durfee makes no reservations of anything that is his personal property. Pick the best ones as you like and he will take a chance on "the leavings," so if you want a real stake colt or a good aged performer, "now am de time." The prices are growing, not coming down, and later on your "hindsight" will give you a bawling out for letting a bargain get by you.

Don Pronto 2:02¼

When the Moana of the Union S. S. line cleared for the antipodes Wednesday morning she carried as one of her most famous passengers the black pacing stallion Don Pronto 2:02¼, who goes to Australia to become a member of the establishment of Dr. R. C. Simpson of Armidale, New South Wales, one of the foremost of the admirers of the light harness horse in that portion of the world. With the Don as traveling companion extraordinary went Will Green, who is a familiar figure on almost all the larger circuits in the United States, and who has a curiosity to see "how they race 'em" in other countries.

It has been only a few weeks since we carried an account of the campaigns made by the redoubtable Don, but in order that our Australian friends may know just how good a horse they are getting, we take this occasion to go a bit further into detail concerning his career. He was foaled in 1907, bred by L. C. Webb of Mason, Michigan, and at an early meeting at Lexington in the summer of 1910 he was given a time record of 2:24¾, his half sister, Miss Quealey, a year younger, being marked in 2:26¾ at the trot on the same occasion. That fall he was brought to California by Wm. G. Durfee, and in the following season made his "professional debut" at Woodland, racing until the close of the Phoenix meeting, as follows:

Woodland, Cal., Aug. 11, 1911—2:20 pace, $500.

Time—2:06½, 2:06¾, 2:07¼, 2:07¼, 2:11¼.

Phoenix, Ariz., Nov. 8, 1911—2:12 pace, $3000.
Don Densmore, b h by Pactolus.....(Parker) 1-1-1
Branham Baughman, Blanche, Don Pronto, Teddy Bear and Fred Taylor finished as named.
Time—2:03¾, 2:03¼, 2:04¾.

Phoenix, Ariz., Nov. 11, 1911—2:09 pace, $1,500.
Branham Baughman, b h by Gambetta Wilkes .....(Geers) 1-1-1
Blanche, Fred Taylor, Francis J., Walter J., Don Pronto and Roy Wilkes finished as named.
Time—2:07, 2:07¼, 2:08½.

In 1912 Mr. Durfee went to the Grand Circuit with his stable, including Don Pronto and the younger son of Silurian, Manrico, both of whom were to achieve world's records before the season closed. Starting inauspiciously, the Don rounded into great shape toward the middle of the summer, and figured in some famous racing, repeatedly beating 2:04 and achieving the stallion crown for five-year-olds in a fight against time in 2:02¼ at Lexington, the quality of the fields against which he was pitted being readily recognized by an inspection of the season's summaries:

Grand Rapids, Mich., July 10, 1912—2:05 pace, $2,000.
C. The Limit, b h by Searchlight.....(Macey) 3-1-1-1
Zombrewer, gr m by Zombro.....(Snow) 1-2-2-2
Branham Baughman, Ginger, Peter the Second, Jim Logan, Don Pronto and Major Brino finished as named.
Time—2:04¼, 2:04¼, 2:06¼, 2:05¼.

Kalamazoo, Mich., July 18, 1912—2:05 pace, $1000.
Branham Baughman, br h by Gambetta Wilkes (Cox) 1-1
C. The Lunit, b h by Searchlight.....(Macey) 3-2
Don Pronto, bl h by The Director General....(Durfee) 2-4
Major Brino, Jim Logan and Ginger finished as named.
Time—2:04¼, 2:04¼.

Detroit, Mich., July 22, 1912—2:05 pace, $2,500.
Jim Logan, b h by Charles Derby (Montgomery) 2-1-1
C. The Limit, b h by Searchlight.....(Macey) 1-2-6
Branham Baughman, br h by Gambetta Wilkes .....(Cox) 3-3-2
Don Pronto, bl h by The Director General (Durfee) 5-9-3
Knight Onwardo, Peter the Second, Nutmoor, Heir at Law 1st, and Major Brino finished as named.
Time—2:03½, 2:03¾, 2:05.

Cleveland, Ohio, July 30, 1912—2:06 pace, $2000.
Braden Direct, bl h by Baron Direct.....(Egan) 9-1-1
Ginger, Branham Baughman, Gold Seal, Eddie Dillard, Edward B., Don Pronto, King Daphne, Heir at Law 1st, Judge Ward and Nutmoor finished as named.
Time—2:04½, 2:03¾, 2:05½.

Decatur, Ill., Aug. 7, 1912—2:06 pace, $700.
Ginger, b h by Angus M.....(Brown) 1-1-1
Sunny Jim, Billy M., Don Pronto and King Daphne finished as named.
Time—2:06¾, 2:06¼, 2:05½.

Syracuse, N. Y., Sept. 13, 1912—2:06 pace, $1,000.
Don Pronto, bl h by The Director General (Durfee) 1-5-1
Wy-Drad, bl h by The Director General
.....(Valentine) 5-1-2
Jones Gentry, Sadie Hal and Mansfield finished as named.
Time—2:05¼, 2:04¾, 2:03½.

Detroit, Mich., Sept. 16, 1912—2:05 pace, $2,000.
Branham Baughman, br h by Gambetta Wilkes (Cox) 1-1
Don Pronto, bl h by The Director General (Durfee) 2 2
Peter the Second, Heir at Law 1st and King Daphne finished as named.
Time—2:04½, 2:04¼.

Detroit, Mich., Sept. 20, 1912—2:06 pace, $1,000.
Don Pronto, bl h by The Director General (Durfee) 1-1
Longworth B., Walter Cochato, Babe, Sadie Hal, Sara Ann Patch and Ty Cobb finished as named.
Time—2:12¼, 2:11. (Rain.)

Columbus, Ohio, Sept. 26, 1912—2:05 pace, $1,200.
Branham Baughman, br h by Gambetta Wilkes .....(Cox) 2-1-1-1
Don Pronto, bl h by The Director General
.....(Durfee) 1-2-4-2
Peter the Second and Heir at Law 1st finished as named.
Time—2:03¾, 2:05½, 2:05¾, 2:04½.

Columbus, Ohio, Sept. 30, 1912—2:06 pace, $3,000.
Braden Direct, bl h by Baron Direct.....(Egan) 2-1-1-1
Don Pronto, bl h by The Director General (Durfee) 1-2-5-5
Branham Baughman, Sadie Hal and Longworth B. finished as named.
Time—2:05¼, 2:03¼, 2:03¾, 2:04.

Lexington, Ky., Oct. 8, 1912—2:05 pace, $3,000.
Braden Direct, bl c by Baron Direct.....(Egan) 1-1-1
Don Pronto, bl h by The Director General (Durfee) 2-2-4
Pickles, Branham Baughman and Knight Onwardo finished as named.
Time—2:02¾, 2:03¼, 2:03½.

Lexington, Ky., Oct. 16, 1912—Special, to beat 2:03½.
Don Pronto, bl h by The Director General (Durfee)..won

Time—	¼	½	¾	Mile
	:31¼	1:00¾	1:31½	2:02¼

For the two seasons just passed the black fellow has had very limited racing opportunities, as local fast classes have been few and far between and his campaigning has been confined to California and Arizona, the major portion of his efforts in that time being in the nature of "duels" with that other good free-for-aller, Jim Logan 2:01¾, there having been but one occasion in the two years when the speedy son of Charles Derby was not out against him. Their appearance has always been the signal for those in the stands to sit up and take notice, and they have never yet disappointed their friends by failing to step fast and gamely. First one would have the upper hand and then the other, the coast record getting bumped pretty severely by both. Honors in this respect are now about even, Jim holding the record of 2:01¾ and the Don being a bit the largest money winner. Their meetings have been great features with coast crowds, and it is a matter of general regret that the "matches"—for a number of their events assumed that aspect—are not to be continued during 1915. The summaries of their most recent campaigns are as follows:

Woodland, Cal., Aug. 23, 1913—Free-for-all pace, $500.
Jim Logan, b h by Charles Derby.....(Montgomery) 1-1
Don Pronto, bl h by The Director General (Durfee) 2-2
Dan Logan and Mike C. finished as named.
Time—2:02¾, 2:04¼.

Santa Rosa, Cal., Sept. 6, 1913—Free-for-all pace, $400.
Jim Logan, b h by Charles Derby.....(Montgomery) 1-1
Don Pronto, bl h by The Director General (Durfee) 2-2
Time—2:06, 2:04¼.

Sacramento, Cal., Sept. 20, 1913—Free-for-all pace, $500 added.
Don Pronto, bl h by The Director General (Durfee) 1-1
Jim Logan, b h by Charles Derby.....(Montgomery) 2-2
Time—2:02½, 2:02¾.

Phoenix, Ariz., Nov. 5, 1913—Free-for-all pace, $1000.
Leata J., b m by Royal McKinney.....(Childs) 2-1-1
Don Pronto, bl h by The Director General (Durfee) 1-2-3
Our Colonel, b h by Colonel Cochran.....(Jones) 3-3-2
Time—2:02¾, 2:04¾, 2:05¼.

Santa Rosa, Cal., Sept. 2, 1914—Free-for-all pace, $500.
Jim Logan, b h by Charles Derby....(Montgomery) 1-1
Don Pronto, bl h by The Director General (Durfee) 2-2
Time—2:02¼, 2:04¾.

Woodland, Cal., Sept. 10, 1914—Free-for-all pace, $500.
Jim Logan, b h by Charles Derby....(Montgomery) 1-1-1
Leata J., b m by Royal McKinney.....(Jones) 3-2-2
Don Pronto, bl h by The Director General (Durfee) 2 3 3
Time—2:01¾, 2:04½, 2:02½.

Sacramento, Cal., Sept. 19, 1914—Free-for-all pace, $1000.
Leata J., b m by Royal McKinney.....(Jones) 1-1-2
Jim Logan, b h by Charles Derby....(Montgomery) 3-2-1
Don Pronto, bl h by The Director General (Durfee) 2-3-3
Time—2:06, 2:03¾, 2:07

Phoenix, Ariz., Nov. 9, 1914—2:03 pace, $1000.
Don Pronto, bl h by The Director General (Durfee)1-1-1
Jim Logan, b h by Charles Derby.....(Montgomery)2-2-3
Don Densmore, b h by Pactolus.....(Breitenfield) 3-3-2
Time—2:05, 2:04½, 2:05¾.

Phoenix, Ariz., Nov. 14, 1914—Free-for-all pace, $2000.
Don Pronto, bl h by The Director General (Durfee) 1-1-1
Knight of Strathmore, ch h by Twelfth Night .....(Hawley) 2-2-3
Minnie Chimes, br m by Council Chimes (McVey) 4-4-2
Jim Logan and Don Densmore finished as named.
Time—2:05, 2:05¾, 2:05.

Owing to the fact that he has been raced continuously since colthood, Don Pronto has been given no opportunity of showing his merit in the stud, but as he has no hereditary faults and is possessed of an infusion of most potent blood there can be small question as to his future success as a sire. Not only does he come from families that are breeding on most impressively, but they are families in whi the trotting instinct predominates. His sire was T Director General 31738, one of the greatest sons Director 2:17, the dam of The Director General bei a daughter of William L. 4244, both lines being p ductive of champions. From Director a long line "fastest performers" of both gaits and all ages h descended, the principal contemporary lumina being the wonderful "little red horse" Directum 1:58, while from William L. came the great famili of the Axtells, the Axworthies, and others. T happiness of the Director—William L. cross is f ther exemplified by the success of Mainsheet 2:05, whom the latter's blood is intensified on the matern side, his dam being a daughter of Axtell (3) 2:: one-time champion three-year-old trotter and ev famous as a sire. Mainsheet is not only the faste trotting son of The Director General and his mo successful sire, having a present representation twelve trotters including the three-year-old Mainle 2:08¼, but he is the fastest performer of either ga or sex produced by a daughter of Axtell.

In the case of Don Don Pronto, the blood of t sire has been ably backed by that of the dam, Sil rian being a truly great mare both in point of bree ing and production. Considering first her bloc lines, she measures up to a very high standard excellence, being a daughter of Wilton 2:19¼, a sc of George Wilkes whose blood is welcomed in ar pedigree. Daughters of Wilton have produced a even dozen with records entitling them to membe ship in the 2:10 list, Don Pronto occupying two pos tions of distinction among them, being the fastest the lot and the only pacer, conclusive evidence the preponderance of trotting instinct in the lin It may be further noted that the fastest daughter Director, Dorothy Redmond 2:09, is out of a Wilto dam, and the Axworthy line is represented in th assemblage of the produce of Wilton's daughters b the four-year-old Lord Brussels, who trotted in 191 to a mark of 2:09¼. Silurian 2:25½, moreover, ha proven the true potency of her blood by producin "quality" to the cover of sires of different families— Don Pronto 2:02¼, a world's champion, to The D rector General; Miss Quealey (2) 2:26¾ and Mar rico (3) 2:07¼, futurity winner and holder of world's record, to Moko, and Allurian, a speed sire to Allerton 2:09¼.

Perhaps one of the most concise appreciations o the worth of Don Pronto appeared in a recent editio of the American Horse Breeder, foremost among ou extreme eastern contemporaries, their sketch sayin, in part:

"Briefly stated, the blood lines of Don Pronto ar as follows: Sire, The Director General, son o Director 2:17; he by Dictator (brother of the cham pion trotter Dexter 2:17¼), by Hambletonian 10 dam, Silurian 2:25½ (dam of the Kentucky futurity winner Manrico (3) 2:07¼ in a sixth heat), by Wil ton 2:19¼; second dam Silhouette (grandam of th Kentucky futurity winner Siliko (3) 2:11¼, etc.), by Hambrino 2:21¼; third dam Silverlock (dam of three trotters, three sires, three dams), by Mambrino Time

"In the male line of Don Pronto's family tree, these facts are significant: Director was a good colt trot ter in his day. His son Directum was the best col trotter of his time, taking a mark of 2:11¼ at three and at four becoming champion trotting stallion, with a record of 2:05¼. Back of all that comes Jay Eye See, by Dictator, who not only was the first 2:1 trotter, but the champion four-year-old, 2:19 being his record at that age. Furthermore, Dictator sired a champion trotting stallion in Phallas 2:13¾.

"What the female line of Don Pronto has given the turf already has been shown in bulk. His dam produced a Kentucky futurity winner in Manrico, a veritable whale among colt trotters, and Silicon 2:13½, sister of his dam, produced another Kentucky futurity winner in Siliko. The dam of these two great mares, Silhouette, numbers, among her foals, Silverone 2:19¾, who, as a three-year-old, was second to Patron when he put the record for that age at 2:19½, and it was the almost universal opinion of horsemen of that day that Silverone had more speed than any other trotter of her age, unsteadiness preventing her from making a better showing than she did.

"The Breeder, not fettered by prejudice or hidebound by reason of too close application to theories and the overlooking of obvious facts, frequently has called attention to the existence in the pedigrees of remarkably fast young trotters of the blood of horses which paced. Don Pronto is a fast pacer, and his turf career was a brilliant one. A study of his family chart (only a sketch of whose excellence has here been given) will convince even the skeptical that his possibilities as a sire were truly great, and that his sale to the foreigners means a distinct loss to this country."

These are words of high praise from an authoritative source, and are warmly seconded from many quarters. In short, Don Pronto is not only the fastest American light harness horse yet exported to Australia, but one of the best bred to be found in any section and withal a pleasing type of the trotter—one from whose future performance to harness or in the stud our breeders may confidentially expect the fame of our horses in the lands across the sea to be greatly enhanced. The value of an admixture of such blood to that already represented in the antipodes is not at this time to be estimated, and should the Don be blessed in his new home with a life free from accident or untoward illness he will exert an influence that will cause coming generations to accord him and his importer high place in public estimation. Success to them both.

CLEVELAND GRAND CIRCUIT ENTRIES.

The outlook for good racing in the east for the eason of 1915 is very promising indeed, judging by ne entries to the early closing events for the Cleve- nd meeting of the Grand Circuit. The major "fixed vents" received entries generously in excess of the umber made last year, while the Fasig, North Ran- all and Forest City sweepstakes for the juvenile otters were well patronized. The nominations to ne Ohio, the Edwards, and the Tavern "Steak" ppear below, and a goodly representation of horses wned or trained in California is in evidence:

The Ohio (Three Heats), 2:08 Class Trotting, $3,000.

Albaloma, br. g. by Almaden D.—Loma B., by Stam B. L. Borden, San Francisco, Cal.
Alberta Dillon, ch m. by Sidney Dillon—Miss Lamar- ne, by Lamartine. E. J. Rochon, Winnipeg, Manitoba.
Axtien, ch. h. by Axworthy—Protien, by Glenwold. Sam- el Harris, Plymouth, Ill.
Baby Doll, b. m. by Tom Smith—Kate Lumrey, by hadeland Onward. I. L. Borden, San Francisco, Cal.
Beirne Holt, blk. h. by Cochato—Belle Andrews, by illy Andrews. H. J. Schlesinger, Milwaukee, Wis.
Bright Axworthy, b. g. by Axworthy—Honor Bright, by ntonio. Thos. W. Murphy, Poughkeepsie, N. Y.
Dorsh Medium, blk. m. by Red Medium—Vicanora, by he Viceroy. E. F. Geers, Memphis, Tenn.
Gold Dollar, ch. g. by Pulsus—Daisy Golddust, by Em- rson Golddust. Gus. Macey, Huntsville, Ala.
J. Malcolm Forbes, bl. h. by Bingen—Santos, by Grand entinel. E. F. Geers, Memphis, Tenn.
King Clansman, br. h. by The Clansman—High Born ady, by Re-Election. Dick McMahon, Libertyville, Ill.
Lizzie Brown, b. m. by The Bondsman—Clyde, by Vilkes Boy. J. W. Davis, agent, Lexington, Ky.
Lulu Lumine, b. m. by Orator—Lumine, by Stately. hos. W. Murphy, Poughkeepsie, N. Y.
Mahomet Watts, b. h. by Gen. Watts—Alla P. by Palo lto. C. L. DeRyder, Pleasanton, Cal.
McCloskey, b. g. by Theodosius—Maggie C., by Odd ocks. Alonzo McDonald, Indianapolis, Ind.
Newzell, b. g. by Newleaf—Hazeletta, by Garnet Vilkes. Pastime Stable, Cleveland, Ohio.
Peter Johnson, b. h. by Gray Petrus—Sudena, by Max- orthy. Walter Cox, Dover, N. H.
Peter McCormick, br. h. by Peter the Great—Pearl ecil, by Cecil W. V. L. Shuler, Indianapolis, Ind.
Peter Scott, b. h. by Peter the Great—Jenny Scott, by Bryson. Thos. W. Murphy, Poughkeepsie, N. Y.
The Wanderer, b. g. by The Tramp—Maggie F., by oung Jim. Pastime Stable, Cleveland, Ohio.
Worthy Prince, b. h. by Prince McKinney—Nell Worthy, y Axworthy. Walter Cox, Dover, N. H.

The Tavern "Steak" (Three Heats), for Trotters That Never Beat 2:13¼ in a Race, $3,000.

Ames Albingen, b. h. by Albingen—Cacha, by Look Sir. J. Mooney, Toledo, Ohio.
Binola, b. m. by Bertini—Ban, by Bingara. Walter Cox, Dover, N. H.
Bordelon, b. h. by Bingara—Kishmena, by Kremlin. Hooper & Whitehead, Murfreesboro, Tenn.
Brooklyn Hall, b. g. by Brooklyn Chief—Belle Brandon, by Tom Hal Jr. G. R. Snedeker, Kirkwood, Del.
Colonel Cochran Jr., b. h. by Colonel Cochran—The Wild Rose, by Red Medium. Thos. W. Murphy, Pough- keepsie, N. Y.
Dick Watts, b. h. by General Watts—Sarah Hamlin, by Dare Devil. A. S. Rodney, Jersey City, N. J.
Eclear Kurts, b. m. by John R. Kurtz—Belle Line, by Dan Line. Jos. H. Lesh, Goshen, Ind.
Great Isle, b. h. by Peter the Great—Bell Isle, by Ac- ell. Thos. W. Murphy, Poughkeepsie, N. Y.
Helen Worthy, b. m. by Barongale—Lulu Worthy, by Axworthy. Thos. W. Murphy, Poughkeepsie, N. Y.
J. D. S., b. h. by Earl of Chatham—Fylie, by Sherman Wilkes. Jas. D. Sullivan, Stafford Springs, Conn.
June Red, b. m. by Red Medium—Rozel Maid by Rozel Russell. Dick McMahon, Libertyville, Ill.
Laramie Lad, b. g. by Master Bo. Alonzo McDonald, ndianapolis, Ind.
Lettie Lee, b. m. by Moko—Leetell, by Axtell. Ideal Stock Farm, East Aurora, N. Y.
Lilly the Great, b. m. by Peter the Great—Mary Louise, by J. J. Audubon. Earl F. Shropshire, Lexington, Ky.
Mainstep, blk. g. by Mainsheet—Julia Lee, by C. F. Clay. Walter Cox, Dover, N. H.
Major By By, ch. g. by Major Dillon—By By, by Nut- wood. Edward Peterson, Omaha, Neb.
Mary Warren, b. m. by Zombro—Rosa Bonheur, by Auctioneer. Kinwood Farm, Norristown, Pa.
Miss Directed, br. m. by Directwell—Vida M. by Prod- gal. David Shaw, Cleveland, Ohio.
Miss Rilda, b. m. by Peter the Great—Sis Directum, by Directum. J. O. McAllister, Lexington, Ky.
Mont Ferris, b. h. by Walnut Hall—Molesia, by Mobel. James Beli, Philadelphia, Pa.
Parisette, blk. m. by Bellini—Prelatress, by Ponce de Leon. Hillanddale Farm, Mamaroneck, N. Y.
Precious Cresceus, ch. g. by Cresceus—Mosella, by Har- old. H. H. Stokes, Urbana, O.
Princess Margrave, ro. m. by Margrave—Colored Girl, by American Boy. Ernest E. Schmidt, Chicago, Ill.
Princess Nelda, ro. m. by Prince McKinney—Nelda Worthy, by Axworthy. John Jarvis, Franklin, Mass.
Roy Miller, b. h. by Bingara—Mokoetta, by Moko. Jas. P. McNichol, Philadelphia, Pa.
Russian Dame, b. m. by George Muscovite—Exelma, by Expedition. E. F. Geers, Memphis, Tenn.
Sarah Douglass, ch. m. by Bob Douglas, dam by Chat- terton. C. L. Floyd, Memphis, Tenn.
Seneca Boy, ch. g. by King Entertainer—Seneca Maid, by John Adams. E. J. Rochon, Winnipeg, Manitoba.
Silver Bell, gr. m. by John R. Kurtz—Piper's Lady, by Silver Cloud. John Kenney, Ligonier, Ind.
Strafford, b. h. by Moko—Ruby, by Independence. J. V. Morris, Cleveland, O.
Sure Mike, br. h. by Peter W.—Barget, by H. W. Grady. Chet Kelly, West Liberty, Iowa.
Susie S., br. m. by Archdale. Thos. W. Murphy, Pough- keepsie, N. Y.
The Eno, ch. c. by The Native—Anna B., by John Bur- dine. C. L. Floyd, Memphis, Tenn.
The Guide, b. h. by Peter the Great—Ethel Vaughn, by Arion. E. F. Geers, Memphis, Tenn.
The Toddler, br. c. by Kentucky Todd—Belladi, by Che- halis. Harry C. Stinson, agent, North Randall, O.
Todd Temple, br. g. by Todd Mac—Lady Lake, by Tem- ple Bar. Jas. Westwater, Columbus, O.
Tom Patch, b. h. by Joe Patchen—Jane, by Poteen. W. H. Boyd, Toronto, Ontario.

The Edwards (Three Heats) 2:10 Class Pacing, $3,000.

Aconite, b. h. by Aquillin—Mattie S. Wilkes, by Sim- mons. Walter Cox, Dover, N. H.
Bonnie Boy, ro. g. by Bonnie—Sallie, by Warrior Gor- don. Guy M. Lee, Union City, Tenn.
Camelia, br. m. by Cummer—Veta S., by Sidney Prince. Walter Cox, Dover, N. H.
Derby Custer, ch. h. by Ed Custer. Thos. W. Murphy, Poughkeepsie, N. Y.
Hazel Armstrong, b. m. by Red Hal—Hazel D., by Com- mander. Lawler Bros., St. Mary's, O.
Hal Boy, b. g. by Hal B.—Altalena, by Altamont. Ed- ward Peterson, Omaha, Neb.
Hal Connor, br. h. by Argot Hal—Barbette, by Ten- nessee Wilkes. Abot H. Frank, Memphis, Tenn.
Hal Plex E., b. h. by Empire Hal, dam by Duplex. E. F. Geers, Memphis, Tenn.
Hal S., ro. g. by Hal Chaffin. Thos. W. Murphy, Poughkeepsie, N. Y.
Jean, b. m. by Flosko. Thos. W. Murphy, Poughkeep- sie, N. Y.
Lustrous McKinney, b. g. by McKinney—Splendor, by Stately. A. S. Rodney, Jersey City, N. J.
Major Ong, b. g. by Major Gantz—Bessie J., by Iowa Sentinel. Thos. W. Murphy, Poughkeepsie, N. Y.
Miss Miriam, rn. m. by Margin—Alsie Onward, by On- ward. Parker Bros., Niles, Mich.
O. U. C., b. g. by C. The Limit—Rosie Woodburn, by Easter Wilkes. S. S. Bailey, Pleasanton, Cal.
Patrick M., blk. g. by Norbells, dam by Gamester. H. H. Stokes, Urbana, O.
Periolat, b. h. by Klatawah. Frank Cairl, Monroe, Mich.
Prestolite, blk. m. by Don Gale. E. F. Geers, Memphis, Tenn.
Queen Abbess, br. m. by The Abbe—Queen Regent Ideal. Mambrino King. Ideal Stock Farm, East Aurora, N. Y.
Russell Boy, b. h., by Rustic Patenter—Maude F. by Vatican. W. A. McDaniel, agent, Jacksonville, Ill.
Symbol Meath, br. g. by Symbol McPhee—Thisby D., by Westmeath. C. B. Dillenbeck, El Dorado, Kas.
The Beaver, b. h. by Searchlight—Ripple, by Glenbrook. E. J. Rochon, Winnipeg, Manitoba.
Thistle Patch, blk. h. by Joe Patchen—Sarah Ann, by Thistle. W. L. Snow, Detroit, Mich.
Walnut Grove, blk. h. by Constantine—Lindis, by Jack- daw. A. F. Ruthven, agent, Kansas City, Mo.
Zomblack, bl. h. by Zombro—Madeline Marshall by Demonio. C. L. DeRyder, Pleasanton, Cal.

Two great young trotting fillies of considerable fame have died recently of pneumonia at widely separated points of the country, one in California and the other in Pennsylvania. The western filly was the two-year-old Fay Patch, one of the most highly prized babies ever foaled at the Savage establishment, being one of the first crop of youngsters by Dazzle Patch 2:09¾, dam Miss Flashlight (dam of Cory Kilvert 2:16½) by Baron Wilkes 2:18, grandam Vera by Stamboul 2:07½. She contracted lung trouble en route from Savage to Pleasanton, and though given every care and the best of veterinary attendance, succumbed after an illness of several days. She was extensively staked, her engagements including the two-year-old trot at the June meeting of the P.-P. I. E. The eastern miss was the champion filly Bessie Admiral (1) 2:28, whose performance over the half-mile track at Washington, Pa., last fall stands as the best record for fillies of her age and gait over a half-mile track. She was owned by H. S. Grayson, president of the fair association at Washington, and was a product of the McKennan Farm, being by High Admiral 2:07¾ and out of Bessie Braden by Arion 2:07¾, grandam Bessie Leach by Gambonito 2:19¼. She was very highly regarded for this year's two-year-old events, and was eligible to most of the major juvenile stakes.

GOOD EARLY CLOSING PURSES AT MONTREAL.

Some skepticism was expressed among horsemen some weeks ago as to the desirability of the action of the stewards of the Grand Circuit in allotting dates to Montreal, but the selection of Harry D. Shepard of Columbus as secretary, the manner in which the Dorval Jockey Club is making preparations for the staging of the meeting, and the generous program announced have combined to remove this sentiment entirely, and to substitute in its stead a feeling that the Canadian meeting will be a "ten strike."

Sixteen thousand dollars has been hung up for early closing events for which entry must be made on Wednesday, April fourteenth, the original payment required being but one-half of one per cent, with three payments of one per cent payable at thirty day intervals and the final payment of one and one-half per cent due only two days in advance of the meeting. The events are designated as the King George, $5000, for 2:08 trotters, the Queen Mary, $5000, for 2:06 pacers, the Dominion of Canada, $3000, for 2:12 trotters, and the Greater Montreal, $3000, for 2:10 pacers. Races are three in five, under a pleasing modification of the point system, and under a new departure in money division six horses may earn more than the amount paid in, only the first four horses being subject to a three per cent deduction, the fifth and sixth horses getting theirs without any frills. The details in full are presented on a business page and are well worth investigating, whether or not you plan to make entries.

Sixteen classes for thousand dollar purses to close later in the season will round out the program of events open to horses from this side the line, while two $500 purses, one for 2:18 trotters and one for 2:17 pacers, are announced for Canadian horses only, making the total offering for six days' racing the neat sum of $33,000.

In regard to "the going" at Montreal Mr. Shepard writes: "I am informed by Mr. Holman, the general manager, that he intends resoiling the track as soon as weather conditions will permit and he guarantees that he will have on an average as good a race course as the balance of tracks in membership with the Grand Circuit. I am also reliably informed that the track in its present condition is as good as Ft. Erie was in 1914. I also want to say that at the one-half mile track in Montreal last year the 2:10 pacing class was won in 2:10¼, 2:11¾, 2:11¾. The 2:15 trotting class was won in 2:15¼, 2:15¼, 2:14¼, which shows that the condition of both tracks must be good. So I feel I can assure an average good track to race on."

Correspondence concerning either the Montreal or Columbus meeting should be addressed to Mr. Shepard at 33 North High St., Columbus, Ohio.

Onward McGregor

Among the number of stallions whose services are offered this season to California brood mare owners, the youngster whose name appears above occupies two unique distinctions—he is the only son of Jay McGregor on the coast, and he is the only stallion in service in California whose sire and dam both have records faster than 2:10. Moreover, he lives up to his breeding by being a naturally fast trotter, an excellent type individually, and a promising "prospect" as a sire, the fact that mares bred to him last year are now being returned to his court speaking much for the satisfaction derived by his patrons from the initial mating.

From "both sides of the house," Onward McGregor comes from trotting families that have commanded respect for several generations. His sire, Jay McGregor 2:07¼, whose list of performers at the close of 1914 included eight trotters and one pacer with records faster than 2:10, traces through the parental line to Hambletonian 10 through Jaw Hawker 2:12¾, Jay Bird 5060 and George Wilkes 2:22, while his dam was the great brood mare Notre Dame (3) 2:23¾ by Robert McGregor 2:17½, whose daughters have produced over a dozen trotters and pacers, largely the former, with records from 2:04½ to 2:09¾. Jay Hawker's dam, Sorrento, produced also The Bondsman, which horse, bred to a daughter of Jay McGregor, begot the former champion three-year-old trotter Colorado E. 2:04¾. Notre Dame's dam, Christine 2:25½, produced six performers and was a daughter of Hambrino 2:21 and the old time matron Kate by Mambrino Foster. Daughters of Hambrino have given the trotting turf such good performers as Hawthorne 2:06¼, Argetta 2:08¼ and five others in 2:10, as well as Ed Winter 2:12¾, sire of Allen Winter 2:06½, winner of the $50,000 Derby at Readville, and Star Winter 2:05, the good campaigner now in the stable of Alonzo McDonald at Los Angeles.

Through his dam, Onward McGregor has a second "top cross" to Hambletonian 10 through Gordon, Onward and George Wilkes. Gordon, whose daughter Mary Gordon 2:09¾ to the cover of Jay McGregor produced two most excellent youngsters, Onward McGregor (3) 2:23¼ and Gordon McGregor, was a son of Onward and Camlet, the produce of the latter matron including two trotters, one dam, and three sires, two of the latter being progenitors of 2:10 speed in either the first or second generation. Camlet's sire was Hamlet 160, a son of Volunteer 55 that was most successful as a brood mare sire, twenty-three of his daughters having become producers, with the trotters evident in overwhelming majority. Through Nell, the dam of Mary Gordon, comes a cross to Young Octoroon, to the value of whose blood on the maternal side of a pedigree much respect is accorded by reason of the unparalleled success of Peter the Great 2:07¼ as a progenitor of extreme speed. The position occupied by the son of Comet's Morgan in the maternal pedigrees of Peter the Great and Onward McGregor is exactly the same.

In the hands of Bert Webster at Pleasanton, Onward McGregor has been one of the most popular of the junior sires, and his enterprising owner, Mr. John N. Colomb of San Francisco, is anxious that the youngsters from these matings "be given a chance," the proof of his proper interest in the future of his horse and his get being evidenced by the plan he has adopted of nominating all mares bred to the lad in both the State Fair and Breeders Futurities, the original payments being at his expense. Mr. Colomb believes that, given the horse, the "opportunity" can be created, and he has set about the task of getting the horse and the opportunity combined in a manner that promises well for the future.

THE MULE.

The mule, he is a funny sight,
He's made of ears and dynamite;
His heels are full of bricks and springs,
Tornadoes, battering rams, and things.
He's fat as any poisoned pup;
It's jest his meanness swells him up;
He's always scheming 'round to do
The thing you most don't want him to.
The mule, he lives on anything;
He's got a lovely voice to sing.
And when he lets it loose at noon,
It sounds like buzz saws out of tune.
He stands around with sleepy eye
And looks as if he'd like to die.
But when there's any dying done
It ain't the mule, I'll bet a bun.
Some folks don't treat mules with respect;
They say they ain't got no intellect;
That may be so, but if you've got
To go to heaven on the spot,
And want a way that doesn't fail,
Just pull the tassel on his tail,
The mule, he tends to his own biz;
He don't look loaded, but he is.

—Exchange.

Remember that entries to the Woodland Stock Farm sale close on Monday, April 5th—next Monday.

NOTES FROM MEMPHIS.

A Chicagoan reports that a visit to Memphis a few days ago found everything in fine condition. Mr. Geers has his usual large contingent of pupils, and it looks as if he would be able to cull from among them an extra good stable to take "down the line," despite the fact that this season Dudie Archdale 2:03¼ is to become a matron, while Anvil 2:02¾ and Etawah (4) 2:03¼ are both at Castleton Stud, Lexington, Ky., for service, and will not be raced, although they may be returned to training later on in order to give them chances for new records.

Probably the most notable horse in the stable is the pacing stallion Napoleon Direct 2:02¼, the leading money winner of his sex and gait of 1914. The son of Walter Direct p. 2:05¾ now resembles a draft horse more than anything else in appearance, so robust and powerful is he. At times last year his gait was criticised as being somewhat rough, but Mr. Geers has ironed out the riffles, and it is believed that he will be found much improved in this respect. Napoleon came so fast and dropped so far in his initial campaign that it is not strange he seemed at times unable to control his action. Last November he was close to two-minute form, and his admirers at the track have him tabbed as the first new 2:00 performer of 1915.

It will not surprise some people to learn that Guy Nella 2:07¾, the fast trotting mare that raced so well for Mr. Geers last summer, has been shifted to the pace, is being repeated at her new gait, and taking to it like a duck to water. Nella required a good deal of weight to balance her as a trotter, and showed a persistent liking for the pace all along. Now that she has been allowed to adopt that method of locomotion, she is enjoying life, and, it is likely, has a bright future before her in the pacing stakes. Another pacer in the stable that the railbirds favor is the young stallion Hal Connor 2:14¼, by Argot Hal 2:04¾, owned by A. H. Frank, of Memphis. He is also being staked, and his trainer has a very high opinion of him. The Chicago pacer, Hal Plex E. (4) 2:09½, has become a great favorite with Mr. Geers, who is staking him also. In appearance he is one of the most attractive horses at Memphis. Altogether, it looks as if the stable's pacing strength would be greater this year than for a considerable time past.

With Dudie Archdale, Anvil and Etawah absent from the trotting division, and Guy Nella transformed into a pacer, that side of the stable has a somewhat unfamiliar look just at present, but later on this complexion will be altered. Dorsh Medium 2:06¼, the Illinois mare, that did so well for Mr. Geers in 1913, but was used little last season, is in nice form and apt to give a brilliant account of herself. The Guide 2:07¼, still eligible to the 3:00 classes, and a prominent figure on the Big Ring for two years past, will make his third onslaught upon it, and the word is that this time he will prove the "bear-cat" that he has been claimed to be. J. Malcolm Forbes 2:08 is being entered in Geers' name, and will, if he comes up to expectations, do some starring on his own account. He accompanied the stable to Memphis last fall, has wintered excellently, and is a picture to look at. Practically nothing has been done with Sparkle Watts (2) 2:10¾ since she won the futurity at Lexington last October. She was so frail and slim it was decided to give her a complete rest during the winter and build her up physically. As a result it is now difficult to recognize the diminutive daughter of General Watts 2:06¾, for she appears to be just double in bulk what she then was. She will be in grand condition to start work on, and Mr. Geers is full of faith in her for the three-year-old futurities. For the two-year-old events he will make ready one of Mr. F. G. Jones' own breeding, by Anvil 2:02¾, out of Yo San trial 2:09, by Hershon 2:29¼. This is one of the biggest things of its age ever seen, standing a trifle over 16 hands—which is something rather surprising in view of the fact that its sire is not much more than a pony in size, while its dam is a good-sized, but by no means extra big mare. Another of the stable's colt trotters that is much commented upon is the Wisconsin colt Deroche (2) 2:22½, now three, by John A. McKerron 2:04½. This fellow's sensational speed, displayed last fall, was reported in the Review at that time. He is doing nicely and is one of his trainer's favorites. Also belonging to his owner, Paul C. Wilson, of Menomonie, Wis., is the four-year-old gelding Star Kay (3) 2:15¼, by Burning Star 2:14¼, brother of The Harvester 2:01. He was sick last fall after being sent to Geers, despite which he showed very well. Now he is in good shape and doing all that is asked of him in a satisfactory way. The green—or practically green—trotter upon which many of the stable's hopes will be staked, is the Galesburg, Ill., mare Russian Dame 2:24¼, by George Muscovite 2:08¼. All the occupants of the historic Knocker's Bench, at Memphis, take off their hats to this mare, and some of the eagle-eyed ones are already asserting that she will be the "great unbeaten" of 1915.

Among the other trainers at Memphis, John Dickerson, with the Hillanddale Farm stable, has a particularly nice lot that are all doing particularly well, though none have been stirred along much as yet. That he is well satisfied with them is apparent to the onlooker, which is a good sign, for "Johnny Dick" is not easily pleased. "Red" Gerrety is also happy with his lot from Harvest Farms, the property of H. J. Schlesinger, of Milwaukee. In especial is he gratified at the way in which Beirne Holt (4) 2:11¼ is training, indications being that he will do great things if all continues to go as well with him as thus far. "Red" has some "babies" that look good enough to eat. "Kentuck" Floyd's lot, as usual, is not large, but if it only contained one horse you could not get past it. That one is the old war-horse Omar 2:05¼, flourishing like a growing boy, and down in the books for the best campaign he has yet made.—Horse Review.

ON THE SELECTION OF NAMES.

Some years ago the British Jockey Club, which, as to turf matters, is a bulwark of dignity and conservatism, was very properly horrified at discovering that one of the entrants to a classic English race was named "Tommy Up a Pear Tree."

But, inasmuch as Tommy, pear tree and all, had been properly registered in the Stud Book, the Jockey Club stewards were powerless to prevent his starting, the most they got out of the incident being an opportunity—immediately seized upon—to command and entreat the owners of thoroughbreds not to let it happen again, adding the suggestion that there were plenty of good names to be had for the picking up.

Over on this side, we have had our own troubles about names in connection with harness racing. Back in 1882 the chestnut mare, Mohawk Maid, was, at the behest of a patent medicine proprietor, rechristened "Yellow Dock," and, under that euphonious cognomen, and in spite of it, took a race record of 2:20¾. Later, we saw a high-class pacer (record 2:01¾) bereft of his proper moniker and raced on the trot as Knox's Gelatine King—but, happily, not for long.

But, recalling these sad facts and likewise remembering the mania of our fellow countrymen for being up with the times, especially in horse nomenclature, we are not very hopeful for the future. Before the season ends, it is more than likely something akin to the subjoined summary may adorn the official parchments of the N. T. A. or the A. T. A.

September 16—Purse $300, 2:45 trot:

Dreadnaught	1	1	2	1
Submarine	2	3	1	2
Floating Mine	4	2	4	3
Shrapnel	3	5	3	4
Bomb Dropper	5	4	5	5
Neutral Zone	6	dis		
Watchful Waiting	7	dis		
Scrap of Paper	dis			

We rather expect to see the Floating Mine tag attached to a hopeful pacer wearing knee boots, toe weights and a gaiting pole. As for the others, heaven help them if Floating Mine blows up going around the first turn of some half-mile track—American Horse Breeder.

"PUREBRED" OR "THOROUGHBRED."

Again, in reply to a number of recent letters upon the subject, we repeat that the word "purebred" applies to all animals registered in reputable herd, flock and stud books; that the word "thoroughbred" can never be used with the sanction of informed breeders as applying to any pedigree, registered or recorded animal except the Thoroughbred horse, and in this case the first letter (T) must be capitalized, for the same sufficient reason that the first letter in the name of any distinctive breed is capitalized.

Thoroughbred is the recognized name of a breed of horses. It would be superfluous to refer to a recorded or eligible horse of this breed as "purebred," just as it would be redundant to say or write "purebred" Aberdeen-Angus or "purebred" Shorthorn. The name of the breed of an animal cannot properly be applied to it unless it be purebred; if it is not a purebred it is a scrub, grade or crossbred, and is always so differentiated by breeders and others who stand for the best usage of technical terms in conversation, addresses and literature.

Any animal is a purebred which has a registered pedigree in a recognized herd, flock or stud book, or is eligible to registry. According to the critical usage which obtains among all informed breeders, writers and educators, no animal is a "thoroughbred." It is simply a Hereford, a Clydesdale, a Shropshire, a Duroc-Jersey, a Guernsey, and so on through the entire list of breed names. When applied to a breed of horses the small "t" is capitalized.

It is permissible and proper in some instances to advertise or refer to purebred animals as "registered," "recorded" or "pedigreed" Galloways, Jerseys, Berkshires, Southdowns and the like, because not all purebred animals, eligible to registry, are recorded. Some breeders occasionally do not wish to incur the expense of regording eligible animals; having the pedigrees of the sires and dams of such animals they can easily prove their eligibility. But in most cases purebred animals that are worth raising are worth recording and are recorded. It is the existence of a small percentage of unregistered eligibles which prompts some breeders to use the words "recorded," "registered" or "pedigreed," in order to make their advertisements and announcements definite and explicit. Probably in some instances these terms are employed in the interest of euphony, to balance the lines on a letterhead or in an advertisement, to make it unmistakable that the animals advertised or described are recorded or to increase the psychological effect of their advertisements or business literature. There are legitimate tricks in all trades.—Breeders Gazette.

BILLY ANDREWS' STABLE IN GEORGIA.

Reports from Thomasville, Ga., where W. J. Andrews is preparing a big string of horses, are very encouraging. The weather has been splendid there and the thirty mark beaten by two members of the former Buffalo trainer's string. Honeysuckle 2:14¼, a seven-year-old sister to Honeymoon 2:09¾, by John A. McKerron, out of Rosa L., by Elyria, that was bred by Dan R. Hanna of Cleveland, holds the season's track record. Honeysuckle has stepped the Thomasville half-mile track in 2:27, quarter in 34 seconds. John R. Dillon 2:11¼, by Sidney Dillon, has been in 2:29½, while Hazel Laing 2:08¼, Newzel 2:05¼, Lee Axworthy (3) 2:08, The Wanderer 2:08¼ and Jack Murray (4) by John A. McKerron, dam Lea by Sidney, have been given from five to seven heats a week from 2:35 to 3:00.

The three-year-olds are getting about the same treatment, although Andrews is not giving them as many heats. Instead he brushes them more than the old-timers. He generally works the three-year-olds from 2:35 to 2:50. Jorrocks has been the fastest of any of this class, a mile in 2:31½ being the lowest notch the three-year-olds have traveled thus far.

Andrews is also giving the two-year-olds some stiff work. They get from four to six heats a week, but none has been strung. The best work for the babies so far follows:

Volga, sister to Peter Volo, in 2:34¼, quarter in 17½ seconds; Sister Hattie, by Peter the Great out of Hattie Lynwood, in 2:35½, eighth in 17¼ seconds; Peter Valpa, by Peter the Great, dam Valpa, in 2:38, eighth in 18 seconds; Marjorie, by Peter the Great, dam Maggie Onward 2:33½, eighth in 17; seconds; Great Minnie, by Peter the Great, dam Minnie P. Wilkes; Irish Voter, by John A. McKerron, dam Proxy Belle, in 2:41½; Fred Moran, by John A. McKerron, dam Sister Illetta, in 2:52.—Horse World.

PERCHERON SOCIETY'S PRIZES FOR 1915.

One of the important transactions at a recent meeting of the board of directors of the Percheron Society of America was the revision of the society's plan of awarding special premiums to Percheron horses at the various major fairs of the United States and Canada for the season of 1915, the California state fair being among the duly accredited list. Money prizes, never large, have been eliminated, and the following schedule of classes and awards was adopted:

Special A.—Stallion three years old or over, bred and owned by exhibitor, 1st prize, sterling silver medal; 2d prize, bronze medal; 3d prize, reserve ribbon.

Special B.—Stallion under three, bred and owned by exhibitor, 1st prize, sterling silver medal; 2d prize, bronze medal; 3d prize, reserve ribbon.

Special C.—Champion stallion, bred and owned by exhibitor. Open only to 1st and 2d prize winners in Specials A and B. Champion, sterling silver medal; Reserve Champion, bronze medal.

Special D.—Mare three years or over, bred and owned by exhibitor, 1st prize, sterling silver medal; 2d prize, bronze medal; 3d prize, reserve ribbon.

Special E.—Mare under three, bred and owned by exhibitor, 1st prize, sterling silver medal; 2d prize, bronze medal; 3d prize, reserve ribbon.

Special F.—Champion mare, bred and owned by exhibitor. Open only to 1st and 2d prize winners in Specials D and E. Champion, sterling silver medal; Reserve Champion, bronze medal.

Special G.—Get of stallion, four colts, either sex, get of same stallion; bred and owned by exhibitor, or shown with stallion; 1st prize, sterling silver medal; 2d prize, bronze medal; 3d prize, reserve ribbon.

Special H.—Produce of mare, two colts, either sex, American bred, produce of same mare, bred and owned by exhibitor, 1st prize, sterling silver medal; 2d prize, bronze medal; 3d prize, reserve ribbon.

Special I.—Champion stud, consisting of stallion and four mares, mares only to be bred and owned by exhibitor; 1st prize, Champion trophy of sterling silver; 2d prize, silver medal; 3d prize, reserve ribbon.

Special J.—Five stallions, owned by exhibitor, 1st prize, Champion trophy of sterling silver; 2d prize, silver medal; 3d prize, reserve ribbon.

Special K.—Best three mares, owned by exhibitor, 1st prize, Champion trophy of sterling silver; 2d prize, silver medal; 3d prize, reserve ribbon.

Special L.—Champion stallion, open class. Champion, sterling silver medal; Reserve Champion, bronze medal.

Special M.—Champion mare, open class. Champion, sterling silver medal; Reserve Champion, bronze medal.

Specials L and M are open only to the first and second prize winners in the regular open classes.

All animals competing for above prizes must be recorded in the Percheron Stud Book of America, and the owner must be a member of the Percheron Society of America. All animals competing must be regularly entered on the books of the Secretary of the Fair when he shows his stock and the correct name and number of each animal given. No medals or prizes will be sent forward until this information is received in proper form by the Secretary of the Percheron Society of America, and names and numbers of animals found correct, according to the records of his office. When such information is received at the Secretary's office, the medals will be properly engraved and forwarded to the owner.

THE TEN MILE PERFORMANCE OF STEEL GREY

Breeder and Sportsman:

On reading the article "A Visitor From Australia" in your issue of March 27, I thought the following might be of some interest to you and your readers:

When I was young—under twenty—I was often riding hunters and hacks in the horse shows in England. (One horse I rode was Banker, the heavyweight hunter that never was beaten, and was sold to Germany.) This was about 1879 or '80. At some of the shows in Lancashire, the principal one being at Pomona Gardens, Manchester, they used to have trotting races in the afternoons. The tracks could not have been more than a third of a mile around, and were turf tracks, not thrown up at the turns, part of them being used for the show ring, so the going was not particularly good. Just as in Australia today the races were all dashes, and all handicaps (some by distance and some by weight) on previous performances. Almost all of the horses were ridden. I do not think that time was taken into consideration very much.

There was a trotting track, devoted only to trotting races, at Abbey Hey, near Manchester, but it did not last very long and I never was there. Trotting was not popular in England at that time and it is not now. The owners of trotters were mostly "publicans and sinners" (the Bible), a publican in Britain being a man who keeps a public house, a species of saloon.

The best in England at that time was a grey mare called Steel Grey. She was bred by Mr. W. Lort somewhere in Wales, and was just a chance bred one. Mr. Lort was one of the best known dog judges of the day. The mare was only about 14 hands high. She was strongly made but not so blocky as a Hackney, and had a nice head and neck. She probably had some thoroughbred blood. She had a very rapid gait, not a long stride—it looked like a single-foot. She was always ridden by Andy McCann who weighed 154 pounds, and she never broke. She looked like a rapid fire gun in action, a piece of machinery.

It is a long time ago, and I was not a bit interested in trotters, but I am pretty sure that she trotted ten miles on a grass track, with 154 pounds on her back, in 27 minutes. This was a notable performance, and was for a wager against time.

I remember a curious animal that used to perform. She was a brown mare and looked like a small cart-horse. Her quarters were low, and she went with her head down. She could only go short distances but was a flyer for a limited period. She trotted with her fore legs and galloped with her hind legs. Her pilot always had a rough passage. As far as I remember, she was constantly being protested.

But—I just wanted to tell you about Steel Grey.

Very truly yours,

G. L. WARING.

Santa Monica, Cal.

THOROUGHBRED CROSSES THAT FAILED.

After C. J. Hamlin had purchased Chimes from Leland Stanford he ventured upon a little voyage of speculation. The master of Palo Alto Farm had been successful in building a trotting edifice on a thoroughbred foundation and the master of Village Farm decided to test the theory in his own way and for his own benefit. Chimes was a strongly built, brown stallion, born April 4, 1884, by Electioneer, dam Beautiful Bells, but he failed to trot to a fast record on account of a quarter crack. His record of 2:30¾ was made as a three-year-old. A boot protected from curious eyes the blemish and the peculiar action of the stallion, due to pain, caused Hon. J. C. Sibley and his friends to call him the lobster of the Beautiful Bells family. Mr. Sibley was at that time in partnership with his brother-in-law, Gen. Miller, and two of the brothers of Chimes were owned at Prospect Hill Stock Farm, Franklin, Pa. These were Electric Bell and Belsire. St. Bel, another brother, was owned by Miller and Sibley, but he died in 1894, and black rules surrounded his name in the elaborate catalogue of 1895. "St. Bel was by the greatest sire and out of the greatest dam of trotters. It cannot now be disputed that in the evolution of the trotter, the highest point yet reached is the production of the Electioneer-Beautiful Bells family." But the champion trotting stallion at one time was Palo Alto 2:08¾ by Electioneer, dam Dame Winnie, thoroughbred daughter of Planet by Revenue, by imp. Trustee. Waxana by General Benton out of Waxy, thoroughbred daughter of Lexington, was bred to Electioneer and produced Sunol, who trotted to a high wheel record of 2:08¼. The champion trotting stallion and the champion trotting mare made the thoroughbred speed sustaining theory look good even to Mr. Hamlin, and in the 1891 catalogue of Village Farm four thoroughbred mares appeared. Grace Norton by imp. Glenelg, dam Morlacchi by Lexington; Ina Blonde by Iroquois, dam Blondine by imp. Bonnie Scotland; Mary C. by Lyttleton, dam Lady Hawkins by Gilroy and Talluah by Planet, dam Mazurka by Planet. They failed to produce speed at the trot and Mr. Hamlin was glad to get rid of them.

I was at Palo Alto Stock Farm with William Russell Allen when he purchased Experta, bay filly (1888) by Electioneer, dam Esther by Express (son of Endorser and Nantura, dam of Longfellow); second dam Colisseum, carrying a double cross of imp. Glencoe, and Planetra, b. f. (1888), by Electioneer, dam Marshra by Planet (son of Revenue and Nina by Boston); second dam Vandalia by Vandal by imp. Glencoe. These two fillies carried thoroughbred lines which Gov. Stanford deemed the best for Electioneer, and the price on each was $5,000. At the same time and at the same figure Electrite, b. c. (1888), by Electioneer, dam Sprite, the famous trot producing daughter of Belmont and Waterwitch, was purchased and shipped to the Berkshire Hills. Planetra and Experta were keen disappointments at Allen Farm, where Lancelot, out of the dam of Electioneer, was owned, while Electrite was sold for $25,000. The plain statement is more forceful than pages of argument.

John H. Shults experimented somewhat largely with thoroughbred mares, but met with no success in breeding them to trotting stallions.—Hamilton Busby in the Horseman.

THE YEAR BOOK FOR 1914.

With the Racing Guide of the Horse Review and the Winrace and Eligibility Book of the National Trotting Association already some weeks on the market, the annual publication of the American Trotting Register Association, "Wallace's Year Book," is now coming from the printer and seeking its place in the horseman's library, in which it is practically a necessity. It contains as usual the official summaries of all trotting and pacing events of the season last passed, the performers under their sires and dams, the indexed roster of record horses of previous seasons, and the various other customary compilations, all made with the painstaking care that makes the Year Book the "court of last resort" in matters pertaining to the world of the trotter and pacer. The price for the new volume, Number Thirty, is $3.25 delivered, and orders made through this office will be promptly filled.

THE WOODLAND SALE.

The list of consignors to the sale to be held on Thursday, April 15, at the Woodland Stock Farm is assuming very satisfactory proportions, and the horses listed for Auctioneer William Higginbottom to dispose of are of a class of uniform excellence that should find new owners at a ready money figure. The farm itself, which is cutting down its horseflesh holdings to a scale that is commensurate with its grazing and feeding facilities, offers some exceptionally choice individuals of various ages and sexes, from brood mares of high degree, in some instances with foal, to promising yearlings, royally bred, nicely broken, generously staked and "ready to show."

E. A. Swaby of Dixon consigns two nice trotting mares, one a San Francisco, from Bodaker's dam, and the other a daughter of Nushagak, both sound, both trotters with some education and proven speed. Charles Johnson sends five fine youngsters by his great racing pacer, Airlie Demonio 2:05½, from excellent dams, and H. S. Hogoboom lists a number from his establishment, the home of Palo King. Other breeders make offerings of equal quality, and the event will be well worth attending. Entries must be made not later than Monday, April 5, to allow for cataloging and advertising, and patrons of the sale are assured the very best of services and treatment.

THE WINNING DRIVERS.

There are now three statistical publications intimately concerned with the doings of the trotter and pacer, the Year Book, the Review's Racing Guide, and the Winrace and Eligibility Book, and while all serve the same general field, each one presents some feature not included in either of the others. The Winrace and Eligibility Book, whose publication was necessitated by the rule abolishing the "marking" of non-race-winners insofar as classification is concerned, might well be expected to confine itself to that certain sphere, but it "sidesteps" its special purpose long enough to present a table which takes very little room, but whose preparation entailed considerable time and care—the roster of those drivers of trotters and pacers in the United States and Canada who drove winners in twenty or more events in the season of 1914, as follows:

Herman Tyson, Newark, Del.	46
Thomas W. Murphy, Poughkeepsie, N. Y.	42
A. B. Martin, Ticonderoga, N. Y.	39
Walter R. Cox, Dover, N. H.	34
Nat Ray, Toronto, Canada	34
Marvin Childs, Pleasanton, Cal.	32
Daniel Alleman, St. Paul, Minn.	30
John Case, Marlin, Texas	30
I. W. Pottle, Portland, Me.	27
E. F. Geers, Memphis, Tenn.	27
Frederick Jamison, Washington, Penn.	27
S. F. Palin, Russiaville, Ind.	26
William G. Durfee, Los Angeles, Cal.	25
C. E. Pitman, Trenton, N. J.	25
Benjamin White, East Aurora, N. Y.	25
B. W. Whitehead, Murfreesboro, Tenn.	25
Guy Rea, Lexington, Ky.	22
Henry Thomas, St. Joseph, Mo.	22
H. H. Stokes, Urbana, Ohio	21
W. E. Miller, Washington, D. C.	21
Edward Allen, Libertyville, Ill.	20
W. B. Beggs, Middletown, Del.	20
W. O. Foote, Bonham, Texas	20

MR. HARRISON LIKES THE TRUE KINNEYS.

Seattle, March 24, 1913.

Breeder and Sportsman:

When I returned from my visit to Lexington last April John W. Considine, the master of Woodland Stock Farm, requested me to visit his establishment. When I got there I found the center field full of newborn foals. After looking all the foals over I remarked to the Laird of Woodland that the foals by True Kinney looked the best to me, whereupon Mr. Considine said, "Well, C. A., you have always been boosting True Kinney. You bought him for me and you have been telling me ever since the day you bought him that True Kinney would be a speed sire. Now I want you to go out in that field and pick yourself out a True Kinney and accept it with my compliments." Well, I had my eye on a bay colt with black legs and a snip. This three days old baby had for a mother a very elegant young mare, named Princess Viola, so I said, "Oh, well, if you insist, I will just take that bay colt out of Princess Viola." Whereupon Mr. Considine said, "Now you own a True Kinney." I named the colt Kinney Benton; his dam is bred to be a brood mare, sired by Prince Ansel, second dam Viola by Gen. Benton, third dam a four time standard producer by Electioneer, fourth dam by Williamson's Belmont.

Well, Kinney Benton is now a yearling; is broken to harness and from what I hear he is a young star. Mr. Considine tells me he can show a 2:30 clip at the trot and is built like a lion. Now my friend Considine wants me to let this colt take a yearling record, but I guess I will wait a little while and see if Kinney Benton can win a two-year-old futurity for me. I am not surprised about this colt being good, for True Kinney was a real race horse and is one of the best bred sons of Kinney Lou. The men who bought True Kinney colts and fillies at the Pleasanton sale should be sure and give those foals a good chance and also keep up their stake engagements, as True Kinney by every rule of reason should be one of California's best sires. I think it is time for me to thank Mr. Considine for his gift to me of Kinney Benton. I may win those rich California stakes with him. Anyway I will keep on trying, as "it is better to have loved and lost than not to have loved at all." Yours truly,

C. A. HARRISON.

PROFITS FROM HORSE RAISING.

A man sold a team of five-year-old geldings the other day for $410. In commenting about them he said that these were a part of his regular annual sales, representing the surplus production of the farm. Of course the price was not always the same. Single geldings had been sold as high as $300 and as low as $150. Sometimes mares were sold if filly foals predominated for a season or two. Maybe only one animal might be spared one year and perhaps three or even four the next. But there are horses to sell from that farm every year, and $300 to $400 are the usual receipts. Seldom is one horse bought.

This farm's results bear conclusive evidence of the wise management of horses. It is obviously unnecessary to calculate that a depreciation of perhaps 10 per cent annually must be counted on farm work horses. Two or three good draft mares and their produce will do all the work on a quarter-section cornbelt farm and furnish in addition one or two horses for sale each year. Some counties are noted for this kind of enterprise. They are prosperous counties, and this is one factor contributing to the success of the farmers. Suppose one man has an average surplus of one $200 horse annually to sell, and his neighbor has annually to buy a $200 horse to replace one worn out. The difference between their receipts from horses is $400. That is a big item in most farm incomes.

Some men will still argue that horse breeding does not pay, and some men have a natural aversion to working young horses or mares with foals. Estimates counting extremely high costs would show very little profit from producing average horses. But good horsemen figure closely and cut down expenses while breeding a class of horses well above the average. They figure that horse-raising pays; their receipts from horses indicate that it pays, and best of all the prosperous appearance of their farms proves that it pays.

There is easy profit to be secured by using brood mares for farm work. There are always buyers for any surplus high-class horses produced. Even at lower prices than the reduced level ruling the past year, it would pay. The man who does not breed his mares if the market looks a little unfavorable cannot hope to have horses to sell when prices may swing back to a high level. The horse market is a fair barometer of general business conditions, because decreased traffic reduces the number of horses needed, and increased tonnage to be handled calls for more horses. Fluctuations in prices are therefore unavoidable, but the market cannot be quickly overstocked. Horses breed and develop too slowly for that. They are a comparatively dependable source of income.—Breeders Gazette.

Henry Thomas, who raced It Will Tell 2:07¼ and Homestake 2:08½ last season, will handle the horses of D. A. Dinnie of Minot this year, the stable including the good free-for-all pacer and speed sire Don Densmore 2:02¼, Flora Directum 2:11¼, Don B. 2:16¼, Don Conomore (3) 2:18¼, Loretta Todd 2:20¼, Lillian Green 2:24¼, Sadie Densmore (3) 2:24¼, and a pair of two-year-olds by Peter the Great.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

FISHING UP-STREAM WITH THE DRY FLY.

While I can hardly lay claim to being an upstream dry fly angler in the true sense, I will say that I do prefer fishing up-stream and to a certain degree fish with a dry fly, but not to the extreme practiced by the anglers of the British Isles.

The American angler would hardly be satisfied to sit by a pool and wait and watch for a natural fly to come floating down straem to be snapped up by a waiting trout, then search his book for an exact reproduction in feathers; nor would he be satisfied to stroll home with a couple or three brace of fish, if he could do better by slamming into them with flies that to some extent mimic the general run of bugs, or even the old stand-by Coachman. He is too energetic and perhaps a little too anxious to catch the limit. Yet I have noticed that most of our good fly fishermen who have had the opportunity to fish on the other side generally bring back a good deal of the dry-fly style and generally use dry-flies to an extent that brings them more sport and larger creels of larger fish.

There is a multitude of good enthusiastic sportsmen who would like to be good fly fishermen but from lack of a few pointers miss the sport they might have during a late summer outing because of the facts that the waters are low and the fish shy. Then is when an experienced fly fisherman with his far and fine methods is generally well rewarded.

I have asked a great many down-stream fly fishermen why they prefer it, and the only reason I ever heard was that it was easier, though there are pools and even streams that must be fished that way or not at all, and there have been exceptional cases on other streams where I have found it better, perhaps for some temporary reason.

Let us take a stream with a fall of a couple of hundred feet or so to the mile and with pools from twelve to twenty feet long and six to ten feet wide on a bright summer day and we will start up it.

There is a nice pool with three trout lying within a few feet of the lower end in the shallows; we are behind them and lower; and our chances are not nearly as great of their seeing us as if we were at the upper end.

There are bee ranches near, so we have put on an artificial one; there are alders along the banks, so we have also an alder fly in imitation of the real thing that is generally found on the trees; a light leader and a slender rod so that we can place our flies lightly on the water.

We drop our flies carefully fully three feet above the farthest trout, letting as little of the leader as possible rest on the water, drawing them fast enough to keep them on or near the surface and they come drifting down in a natural way.

The big one makes a slight move toward them but lets them go, the next one makes a dash, half changes his mind; makes another sweep and heads up stream. If he got that fly you certainly have him hooked and are pulling the hook into him instead of out of his mouth as you would if you had struck from the upper end of the pool and were drawing your flies up stream. Now if he is not too heavy, bring him down into the pool where you are and fight it out there; and you still have a chance at the larger one as all the commotion has been made behind him.

A point to be noticed here also is that you are bringing him to you with the stream; and he must come faster as every observant angler knows. As a consequence, the chances are less of his tearing off than if you towed him up stream perhaps with open mouth against the current. Another little point right here may not be amiss. I always break a fish's neck before I take him off the hook; it is more merciful; he does not mess up your basket as much and should you perchance lose your hold you can pick him up again. It is easily done by putting your forefinger in his mouth and prying his head back over the end of your thumb.

Pinch your fly well down in running it; this will save the appearance and it will also last longer.

Well, we have basketed that fish and we switch our flies easily in the air a few times, which makes them nearly or quite dry again, and we drop them up in front of that big fellow. If he has missed the other one or thinks at all, there has been so little fuss made near him that he thinks the other fellow got that bug and has gone down to the next pool to enjoy it, and he is not going to let another such chance go by; and you will be very sure to get a rise from him. Get him down out of the pool, too, if you can, for there may be still a larger one up in the deep water.

These are a few of my reasons for fishing up stream, and to a good many anglers they are nothing new. But, as I have said before, perhaps I have given a new idea or two to the enthusiastic but not always successful fisherman.

Drink Jackson's Napa Soda.

WHAT BECOMES OF THE SMALL TROUT.

The following statement may be taken by some as "nature faking" or be branded as an ordinary fish-snake story.

The observations were made by Fred D. Hoyt during two seasons of study and may be vouched for by authorities from the U. S. Biological Survey.

I am what is known among fishermen as a "crank," a "fishing fan"; and while I dearly love music, I would rather spend the day midst the pools, rocks and rapids of a good mountain stream, landing half a dozen trout with the expectation of that "always big one" getting away than tuck myself in a dress suit in a box at the grand opera for a month. Nature in the early spring mornings brings forth a harmony of color and tone that cannot be imitated or reproduced.

Our reports of the experts on the question of fish propagation and culture say that only a very small percentage of the natural spawn of fish ever reach that stage where it has a tail and can wiggle it. At the same time our fish hatcheries such as Sissons, Tahoe, Scott Creek and others, with their modern ways of incubation and protection of the spawn, have raised that percentage to the nineties. With their distributing car running to every part of the State they stock our streams with millions of trout, supposed to be old enough to take care of themselves.

What becomes of them, is the question. Not one-tenth are taken or destroyed by human agencies. If it were not for some other reason that these fish never reached the five-inch limit we would be able to dip them out of the stream by the bucket full to make room for the water. Now comes my idea as to where a great many go. Any man that goes fishing and gets fish gets wet, or at least will be in the water almost continually from the time he begins fishing until he has finished. He will observe the great number of striped water snakes wiggling their way from his advance, and likely will see one with a frog down its throat, the legs sticking out of the mouth, and knowing that they eat frogs, will so pass them by as one of the harmless variety of snakes.

It was my good fortune two years ago to see how this particular kind of snake works to get its living. It is well known by fishermen that the small fish, when disturbed in a pool by larger fish, make for the water running out into little shallow coves where the larger fish cannot follow. The snake knows this also, so while it stands no show of catching the small fry in the deep water it dives into the pool among the small fish, wiggling its way after them, in their frantic rush to the small, shallow cove, and drags its body across the opening, forming a perfect dam, and with a foot or more of length to spare to work with, picks them out and swallows them. Of course it is a very easy matter for the snake to catch the poor little fish penned up in water a few inches in circumference and a half-inch deep. I have seen them flop clear of the water onto the sand in their efforts to escape the lightning-like movements of that snake. From the stomach of one medium-sized garter snake I have taken one frog, five fish from one-half to one and a quarter inches in length, and quite a number of tadpoles, and have counted as many as seven snakes on a ten foot length of creek. I have never studied the question during the time the small trout are carrying their sack with them, but it would seem to me that if a snake can catch the small trout as easily as in the older stage, that it would require no work at all for them to get their fill when the trout are handicapped like a boy in a sack race.

Considering the hundreds of snakes which you will find along all our small trout streams, fishing in season and out every day in the week and Sundays, too, is there not quite a reason why our trout are not more numerous? Of course there are many more reasons why such a small percentage of the fish reach the age where they are fit for food and sport, but if the fish destroyed by the snake alone could be saved we would find fishing very much improved. As to the relief, the only way I can see is to kill as many as possible and while it may be slow work, every one you kill means room for one more fisherman on the stream. I would be glad for the greatest sport that can be indulged in by men, women and children, to hear from any one who has made any study along this line.

Under Sized Bass.—An odd case developed recently when Anton Petrick of Giant, a Greek fisherman, was arrested for shipping under-weight striped bass. The under weight fish were found stuffed inside larger fish in the box. The defendant was discharged by Judge Roth of Martinez, the complaint being faulty. Petrick was arrested two months ago on a similar charge and fined. Despite the efforts of Fish Commission deputies, there is, it is claimed, quite a traffic in small bass.

DEVASTATING THE FISHERIES OF SOUTHERN CALIFORNIA.

The Southern California Fish Dealers Association is demanding the throwing open of the Santa Catalina Fish Reservation to the market fishermen which, according to Dr. David Starr Jordan and other experts, means the ruin of the fisheries. Here is what Dr. Van Dyke says:

This is what I saw at Santa Catalina, when I came to the island:

A beautiful island, with high green hills, many-colored cliffs and canyons, and clean pebbly beaches, surrounded by the deep, pure, sapphire waters of the Pacific; a natural breeding place for the little fishes and the big fishes of the prolific sea.

A lovely crescent harbor, named Avalon, nestled among the hills, with a fair vale opening behind it, and trails zig-zagging up the slopes in every direction, among the oaks and laurels and wild lilacs; a natural play-ground for the people of Southern California and Arizona and New Mexico, who want salt breezes and a simple life and a little healthful sport on sea and shore.

A few hotels and a multitude of camps and bungalows and cottages and tenting-grounds arranged for the accommodation of the thousands of families who will flock hither in the summertime to have a great deal of fun for a very little money.

A tribe of boatmen, with launches and row-boats, well equipped with fishing tackle of the true sporting kind, light rods and slender lines, which teach the angler to match his skill against the strength of the fish and cultivate the spirit of sport in the men, women and children who visit this favored isle.

This is what I saw when I arrived at Catalina April 14, too early in the season for the best fishing, but at a good time to look over the lay-out and study the value of the island as a natural spawning ground of fish, and a natural outing-resort of folks.

This is what I saw two days later when a touch of early summer had made the opal sea smooth and still around the south end of the island and the air was warm and soft and filled with fragrance from the blossoming hills.

There were fifteen or twenty little launches floating along by Pebbly Beach and Seal Rock. In each launch there was an honest boatman earning a good day's living, and two or three people from the mainland—not millionaires, but just plain human people—out for a day's sport.

The water was full of little fishes, schools of sardines, and anchovies, and smelts, and tiny mackerel, millions of them, milling around and running up close to the shore. After them came the big fishes; silvery sea-bass; golden yellow-tail; gleaming, lance-like barracuda; the noble tribes of the deep. Each one of these fish was food for a family of folk; and the catching of one with light tackle was a sport calculated to develop the qualities of fair-play and patience and skill.

Into the midst of this goodly scene about the middle of the afternoon came the Spoilers of the Sea. Three snub-nosed, thick-set vessels, piled high with nets, owned by firms of fish dealers, manned by foreigners, came butting down the coast. They set their nets close to the shore and ran a quarter of a mile out to sea, sweeping in everything that come in their way. One of the boats must have scooped out a couple of tons of yellowtail and white sea bass, to be sold to the dealers at perhaps five or ten cents a pound, and to the people at twenty cents, thirty cents, whatever the dealers choose to ask for them.

Those were the fish that would have spawned around the kelp-beds and gravel-banks of Catalina that spring and summer, providing a new supply of food for millions of people. Those were the fish that would have given good sport to thousands of Californians seeking their recreation in this ideal island. Those were the fish upon whose continuance and propagation the living of the Catalina boatmen—three times as many as the foreign net-haulers—must depend.

What kind of a democracy is it that permits these Spoilers of the Sea to carry on their work of ruin?

An hour after the nets were hauled, there was not a fish, large or small, along the shore of the island. Those that were not caught were scared away. At the time of the present writing, three days later, they had not come back. Some year they will never come back; the spawning beds will be deserted; the Catalina fishing will be killed.

For what? Not to benefit the people at large, for they have to pay the market-man's price for sea food. Not to enrich even the foreign net-haulers, for they get only meagre wages. But simply to add to the profits of a few firms of fish-dealers, Spoilers of the Sea.

How long will California permit this wasteful work to go on? A bill is now before the legislature to protect the fish within the three-mile limit from this destructive netting. It is a bill in the interest of all the State. It is a bill to save one of the great assets of California. The sooner it is passed by the legislature and signed by the Governor, the better it will be for everybody.

Yes, it will be better even for the men with the nets. It will change them from Spoilers of the Sea, to legitimate fishermen.

Shore Fishing—Sea trout and red-finned perch can be caught from the Fort Point seawall and at the Point Cavallo kelp beds, near Fort Baker. Rock cod fishing will be in order pretty soon.

THE FEDERAL MIGRATORY BIRD LAW.

In view of the fact that there is evidence that not only the public, but, in many instances the press of the country also, is under the impression that the decision just rendered by Judge John C. Pollock of the Federal District Court at Topeka, Kansas, in which he holds the federal law for the protection of migratory birds to be unconstitutional, is the final adjudication on that statute, the following statement correcting this erroneous impression has been issued by President John B. Burnham of the American Game Protective Association:

"Conservationists need feel no alarm over the Kansas decision. The Supreme Court of the United States now has before it on appeal a case from Arkansas in which the constitutionality of the law will be finally passed upon. That case lacks certain important elements, favorable to the sustaining of the law, which the Kansas case, which will be incorporated with it, will provide. In a sense, then, Judge Pollock's decision is a welcome one to those who are working to avert the destruction of the wild life of the country.

"The Kansas decision is the third that has been rendered by federal judges on the law. In Arkansas, Judge Jacob C. Trieber on May 23, 1914, held the measure unconstitutional, while in South Dakota, Judge J. D. Elliot on April 18, 1914, held it constitutional. It is to be remembered that the law is in full force and effect and will doubtless be vigorously enforced by the United States Bureau of Biological Survey everywhere in the United States, with the exception of the jurisdictions of Judges Trieber and Pollock.

"The Solicitor General of the United States has asked the Supreme Court for an early consideration for the test case as is possible but it may be that it will not be reached before next fall. We are hoping to have it passed upon this spring.

"The federal law provides protection not only for game birds but for most of the country's most valuable song and insectivorous species as well."

AIREDALES.

The care of brood bitches and puppies at a Fresno kennels is described by the owner as follows:

"Without even intimating that we know all about this subject, we will tell how our bitches are cared for.

After the bitch is bred she is given each day sufficient exercise to keep her in good healthy condition. Sometimes she is hunted, she always is shown sufficient attention to cause her to think she is our real "pal." This we figure, impresses her future prize-winners (?) with certain desirable qualities.

She is given sufficient nourishing food to keep her in good condition and the quantity is increased gradually up to the time of whelping. Usually the day before the puppies come she will probably refuse all food, unless it may be some raw beef.

Some days before this time she is placed in her whelping quarters, that she may feel at home there. These are dry, airy and comfortable with a dirt floor. She digs out a bowl-shaped nest and is left entirely alone until the puppies are several hours old. A supply of drinking water is near by at all times. When she manifests a desire for food it is given in a more limited quantity than before, and if any tendency toward indigestion is shown she is given a charcoal, bismuth and pepsin tablet three times a day for a short time. Food gradually is increased in quantity as she improves and she is allowed out of her kennel quarters for a short time. Her breasts are closely watched to see that all are being relieved of their supply of milk.

Under our system of care and feeding we are not troubled with worms, otherwise she would be given something to free her from them before whelping, in fact she must be kept free from them.

When twenty-four hours old the puppies are carefully looked over and unless they are entirely too many, they are left alone for another day. Then any that appear under size or undesirable are consigned to the bucket. If there are more than we think she can handle well the extra ones are given to a foster-mother or destroyed.

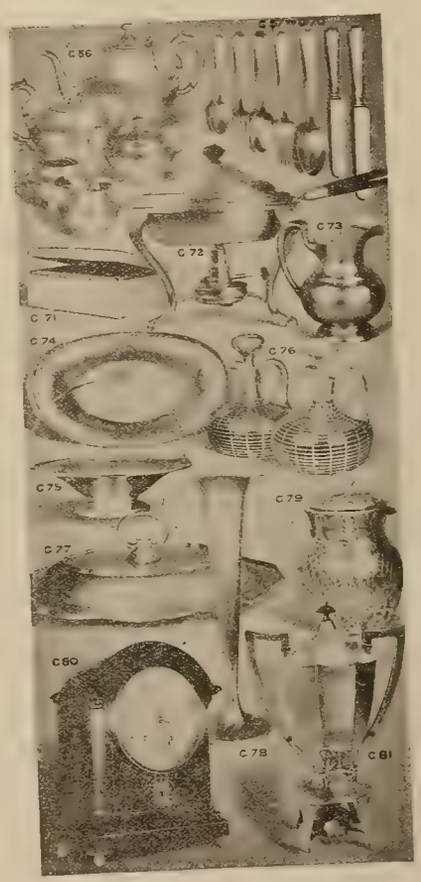
At this time their first bed is placed under them. A frame 2½x3 feet is made of 1x3 lumber. A gunny sack is ripped and tacked loosely to this frame, which is placed over the nest made by the mother; the gunny will fit down into it (if properly attached to the frame) and the puppies are replaced. When necessary this is removed and a clean one supplied. We have found this an extremely satisfactory arrangement.

When four days of age the tails are docked, removing about 40 per cent. We begin feeding when three and one-half to five weeks of age, depending upon quantity of milk furnished by the mother. They are ready for shipment at six to eight weeks. The e for long journeys are not shipped under eight weeks of age.

It should be borne in mind that if the mother, when nursing is allowed to get out of condition the effect will be seen at once on her family. Particularly is this true as to giving her food that is too laxative in nature. If this occurs the mother is given some boiled rice.

When four weeks of age, as a precaution, we treat them for worms. After they have attained some size we are not troubled with worms."

At the Traps



Interstate Association Tournaments—

May 11, 12, 13—The Interstate Association Tenth Southern Handicap Tournament, Memphis, Tenn., under the auspices of the Memphis Gun Club; $1,000 added money. Winner of first place in the Southern Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

June 15, 16, 17—The Interstate Association's Tenth Western Handicap Tournament, St. Louis, Mo., under the auspices of the Missouri Athletic Association Gun Club; $1,000 added money. Winner of first place in the Western Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

July 8, 9, 10—The Interstate Association's Tenth Pacific Coast Handicap Tournament, San Diego, Cal., under the auspices of the Pastime Gun Club; $1,000 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

August 16, 17, 18, 19, 20—The Interstate Association's Sixteenth Grand American Handicap Tournament, Chicago, Ill., under the auspices of the Chicago Association of Trap Shooters, $3,500 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

Registered Tournaments—Pacific States and Territories:

April 7—Utah State Sportsmen's Ass'n Tournament. A. R. Bain, Secretary, Ogden, Utah.

April 10, 11—Newman Blue Rock Club. E. R. Dixon. Secretary, Newman, Cal.

April 12—Owl Rod & Gun Club. Henry Garrison, Secretary, Modesto, Cal.

April 19—Capital City Rod and Gun Club. Mark Siddall. Secretary, Salem, Ore.

April 26, 27—Oregon State Tournament, under the auspices of the Portland Gun Club. J. A. Addleman, Secretary, Portland, Ore.

May 5—Utah State Sportsmen's Ass'n Tournament. A. R. Bain, Secretary, Springville, Utah.

May 12—"T. B." Trap and Gun Club. Lieut. Stephen W. Wallace, Secretary, Las Animas, Colo.

May 14—Pueblo Gun Club. F. S. Rainey, President. Pueblo, Colo.

May 18, 19—Washington State Tournament, under the auspices of the Seattle Trap Shooters Ass'n. Hugh Fleming, Secretary, Seattle Wash.

May 21, 22—Gem City Gun Club. Max Weick, Secretary, Laramie, Wyo.

May 26, 27—Delta County Gun Club. Nick Powell and R. A. King, Managers, Hotchkiss, Colo.

May 29, 30—Utah State Tournament, under the auspices of the Utah State Sportsmen's Ass'n. A. R. Bain, Secretary, Salt Lake City.

May 29, 30, 31—San Jose Blue Rock Club. O. N. Ford, Secretary, San Jose.

June 7, 8, 9—Sportsmen's Ass'n of the Northwest Tournament, under the auspices of the Portland Gun Club. J. A. Addleman, Secretary, Portland, Ore.

July 1, 2—Vancouver Gun Club. C. A. Porter, Secretary, Vancouver, Can.

July 1, 2, 3—Los Angeles Gun Club. Fred H. Teeple, Secretary, Venice, Cal.

July 5—Eureka Blue Rock Club. H. A. Hine, President. Eureka, Cal.

July 5—Sunrise Gun Club, H. S. Hill, Secretary, Sunrise, Wyo.

July 5—Holbrook Gun Club. J. S. Hulet, Secretary. Holbrook, Ariz.

July 10—Chehalis Rod and Gun Club. W. S. Short, Secretary, Chehalis, Wash.

July 12—Rawlins Rod and Gun Club. H. Breitenstein, Secretary, Rawlins, Wyo.

July 19, 20, 21, 22—Pacific Indians. F. C. Riehl, Secretary, Tacoma, Wash.

August 10—Medford Gun Club. Dr. E. R. Seely, President, Medford, Ore.

November 4—Williams Gun Club, F. E. Lowe, Secretary, Williams, Ariz.

November 5, 6, 7—Arizona State Tournament, under the auspices of the Tucson Blue Rock Gun Club. W. A. Julian, President, Tucson, Ariz.

Interstate Association Trophies, 1915—The half-tone on this page is Plate No. 4, illustrating the $25 classification of trophies which can be selected by clubs holding registered tournaments this year, as follows:

C 56 Silver-plated tea set—5 pieces.
C 57 12 Sterling silver table spoons—in case.
C 58 12 Sterling silver table forks—in case.
C 59 12 Sterling silver dessert knives and 6 tea spoons—in case.
C 60 12 Sterling silver table knives—in case.
C 61 12 Sterling silver tea spoons and 6 dessert spoons—in case.
C 62 12 Sterling silver tea spoons and 6 dessert forks—in case.
C 63 6 Sterling silver dessert spoons and 6 table spoons—in case.
C 64 6 Sterling silver dessert spoons and 6 table forks—in case.
C 65 6 Sterling silver dessert forks and 6 table forks—in case.
C 66 6 Sterling silver dessert forks and 6 table spoons—in case.
C 67 6 Sterling silver dessert spoons and 6 dessert knives—in case.
C 68 6 Sterling silver dessert spoons and 6 table knives—in case.
C 69 6 Sterling silver dessert forks and 6 dessert knives—in case.
C 70 6 Sterling silver dessert forks and 6 table knives—in case.
C 71 Sterling silver cigar box, 8¼ x 4¾ inches.
C 72 Silver-plated chafing dish—full size.
C 73 Sterling silver water pitcher, 7¼ inches high.
C 74 Sterling silver bread tray, 13¼ inches long.
C 75 Sterling silver cake or fruit basket, 10½ inches in diameter.
C 76 Sterling silver mounted on glass—pair decanters, 8¼ inches high.
C 77 Silver-plated double meat dish—2 dishes with lock top, 18 inches long.
C 78 Sterling silver flower vase, 18½ inches high.
C 79 Sterling silver and glass pitcher with cover, 9 inches high.
C 80 Clock—8 days—mahogany case, 13¼ inches high.
C 81 Silver-plated urn—full size.

* * *

An Army of Trap Shooters.—A revised gun club map of the United States just issued by the Du Pont Powder Company, showing the location of towns containing organized clubs, gives the total number of clubs up to November 15, 1914, as 3,221. It is estimated that the average membership of these clubs is fifty, making a total of 161,050 trapshooters belonging to clubs that shoot regularly.

There are probably still more trapshooters not members of organized clubs, mostly in farming sections.

The increasing popularity of the hand trap tends to swell the number of unorganized trapshooters.

The total of all classes is estimated at 400,000, probably more actual participants than can be found in any other American sport.

Trapshooting is undoubtedly growing rapidly and enthusiasts predict that the next annual map will show more than 4,000 clubs and that in 1915 the total number of trapshooters will grow to 500,000.

* * *

Citrus Belt Gilbert Shoot—H. E. Dickerman, of Chicago, won the Fred Gilbert cup at the Venice grounds of the Los Angeles Gun Club March 14. The top score was 95 out of 100 from the 20 yard mark. The scores follow:

Fred Gilbert shoot, 100 targets, distance handicap—H. E. Dickerman, 20 yards, broke 95, Mark Lane 17—94, Guy Holohan 21—90, L. M. Packard 20—89, P. E. Peterson 16—88, H. Pfirrmann 20—87, A. L. Tippitt 18—87, O. Evans 18—86, Fred Grewell 16—86, C. F. Nichols 16—85, F. H. Mellus 20—85, R. D. Gilbert 16—85, R. H. Bungay 20—85, C. D. Hagerman 18—83, Geo. Oliver 16—83, Geo. Melford 16—82, C. E. Groat 17—82, R. H. Smith 16—80, Mrs. C. E. Groat 16—80, Tom Bundy 16—79, S. C. Miller 16—79, S. R. Smith 18—79, H. T. Brown 16—78, Charles Moist 18—77, Wm. Pugh 18—77, C. W. Clement 16—76, F. A. Johnson 16—76, H. W. Cline 16—75, E. L. Hedderley 16—74.

Double targets—Guy Holohan, shot at 50, broke 47, H. Pfirrmann 50—44, C. W. Clement 48—43, F. H. Mellus 50—42, H. E. Dickerman 24—20, E. L. Hedderley 24—17, Geo. Oliver 24—16, Geo. Melford 24—13, Wm. Pugh 24—13, R. D. Gilbert 24—12, S. C. Miller 24—12.

Practice shooting—F. A. Johnson, shot at 300, broke 230, O. Council 150—117, G. Holohan 125—112, F. H. Nichols 100—83, C. E. Groat 100—83, Mrs. Johnson 100—55, M. D. Towne 50—23, B. G. Adams 75—35, H. Pfirrmann 50—40, Wm. Einfeldt 50—41, Tom Bundy 50—40, Geo. Oliver 50—39, H. W. Cline 50—38, Dr. Thomas 50—38, C. W. Clement 50—33, A. J. Keating 50—29, Ward Dawson 50—25, P. E. Peterson 25—24, F. H. Mellus 25—23, C. F. Nichols 25—22, R. H. Smith 25—21, Wm. Pugh 25—21, R. D. Gilbert 25—20, C. D. Hagerman 25—20, Geo. Milford 25—19, D. C. Miller 25—19, O. Evans 25—18, S. R. Smith 25—17, Mrs. Groat 25—17, Fred Grewell 25—16, J. McDuffie 25—16, E. L. Hedderley 25—15.

* * *

San Diego Traps—A recent shoot of the Pastime Gun Club was attended by Charley Budd. Archie Julian, a 17-year-old son of Charley Julian, won the

Dodds trophy in shooting off a 25 tie with J. F. Dodds and Foster Couts—24 to 22 and 22.

The total scores for the day follow: Dodds, shot at 100, broke 96, F. Couts 100—95, A. Julian 100—92, Ecker 100—91, C. Julian 100—90, Ervast 100—89, Knight 100—88, Merrill 100—86, Barber 100—81, McMurray 100—79, Parker 100—74, L. Couts 100—73, Halbritter 75—61, Kelly 75—61, Andrews 75—55, Dunn 75—51, Budd 50—45, Drummond 50—45, Grey 75—44, W. Wetzel 50—44, Myers 50—42, Newton 75—40, Grier 50—40, Sargent 50—38, Butler 50—37, Cameron 50—37, Sampelle 25—14, Kinney 25—13.

The scores during the Saturday powder burning were: Ervast, shot at 100, broke 96, Dodds 100—94, Barber 100—92, Hinckley 100—87, Kelly 100—86, Parker 100—85, Sargent 100—84, Walsh 100—82, Peacock 100—75, Halbritter 75—67, Andrews 25—21, Drummond 25—20, McAuliffe 25—18, Dr. McGee 25—12.

Double targets, 12 pairs: Kelley 18, Sargent 17, Millison 17, Barber 16, Peacock 13, Andrews 13.

* * *

Smelter Smoke.—With a perfect score of 25, L. F. Gemmett of Anaconda was high man in the shoot for the Twohy medal given by the Butte Rod and Gun Club March 26. C. L. Flanagan of Great Falls made the high run of the day, killing 53 birds without a miss. There were six events on the day's program. Thirty shooters took part.

The out of town marksmen included Charles Flanagan of Great Falls, Messrs. Owen J. and C. Darnutzer, Schultz, Bushnell, Magee and Gold of Twin Bridges; Clinger of London, Canada; Hasley, Bryan, Gemmett, McDermott and Hudson of Anaconda; Renfro and Kennett of Warm Springs; Lee Williams of Deer Lodge and James Talbot of Manhattan.

The next regular shoot will occur in Anaconda April 4. There will also be a shoot at Twin Bridges April 11.

* * *

Newman Tournament.—The fourth annual tourney of the Newman Blue Rock Club dates, Saturday and Sunday, April 10 and 11, should draw a good attendance. The program for the first day, $2.00 entrance and $12.50 added money each; and a merchandise shoot at 12 pairs, two prizes, entrance 50 cents. The same card of 10 events for the second day and a concluding 50 bird handicap shoot, entrance $2.50, money divided 50-30-20. Division of purses in the 20 bird events, Jack Rabbit system.

The shoot will be a registered affair under Interstate Association rules. Trophies donated by the Association will be awarded to first and second high amateur averages and long run of the tournament. Arrangements have been made to transport all shooters in attendance over to the Modesto shoot Monday forenoon free of charge.

* * *

Modesto Tournament.—The Owl Rod and Gun Club's ninth annual shoot is billed for Monday, April 12, under Interstate Association registered tournament rules. The schedule calls for nine events—eight at 20 targets each, entrance $2.00, $20 added in seven races and $10 for the last. Event 6, 40 targets, $4 entrance, for Interstate Association trophies to six high guns. The purses in all events, barring the trophy shoot, will be divided in four equal moneys, class shooting.

* * *

Garden City Traps.—George Anderson made the highest score at the shoot last Wednesday of the San Jose Blue Rock Club, breaking 95 out of a possible 100 birds. F. M. Lail, a local man, shot a perfect score in the handicap. Mr. Lail is the oldest blue rock shooter on the Pacific Coast,, having passed his 72nd birthday. E. W. Jack made his first 25 straight.

Guilbert and McCarthy are doing fine for two new shots. The next club shoot will be April 4.

The scores for the day were: George H. Anderson, 95—100; Ada Schilling, 91—100; O. N. Ford, 71—75; E. W. Jack, 68—75; F. M. Lail, 63—75; John Guilbert, 52—75; William McCarthy, 50—75.

George H. Anderson made the longest straight, breaking 48 without a miss.

* * *

Postponed Shoot For Sunday.—The Exposition City Gun Club opening shoot, dated for Easton, Sunday, March 28, was called off by reason of inclement weather and will be held tomorrow.

* * *

Live Bird Shoot.—The California Wing Shooting Club shoot for April will be held tomorrow at the Sobrante trap ground.

STEELHEAD SEASON OPEN.

The steelhead trout season, in the coast streams and creeks, opened Thursday, April 1. But so far as the angling sport figures, the season just opened, that is all. Up to a week previous the prospects for one of the best opening days for the trout fishermen in many years were propitious. The recent inclement weather developed conditions that will put on record, April 1, 1915, as one of the worst in many years.

Reports from all of the nearby fishing resorts were that the streams were bank high and muddy. This, and the cold weather, effectually put a damper on any fly-fishing indulgence for about a fortnight. Bait fishing, however, was and will be in vogue. Even this phase of the sport will be somewhat uncertain, as the full moon this week will enable the trout to feed at night; that is, what fish may be left in the streams, for almost certain it is that the large steelheads have gone out to saline waters during the recent freshets.

NEW FISH AND GAME DISTRICTS.

Redistricting of the State into 29 fish and game districts will be accomplished in Senate Bill 681, by Flint, as passed by the senate, and as it will undoubtedly be passed by the assembly, states the Sacramento Union. The bill represents the desires of the State Fish and Game Commission. Redistricting was found necessary by reason of a recent court decision which declared that one law could not be enacted to apply to a part of one district unless it applied to all of the district. Under the present law the State is divided into only six fish and game districts, but with many local conditions springing up and demanding legislation it is found necessary to so cut up the State that each section, with conditions demanding separate legislation, may fall into one district.

For the purpose of any general legislation which can apply to large territories of the State, four general districts are proposed in the bill. The remaining sections of the State are in turn split up into 25 smaller districts, thus furnishing the means for all of the legislation on fish and game subjects that may be demanded by sectional conditions.

The four large districts are in general defined as follows:

District 1—Siskiyou, Modoc, Lassen, Shasta, Tehama, Plumas, Butte, Yuba, Amador, Calaveras, Alpine, Tuolumne, Mariposa, Madera, Mono, Inyo, Tulare and Kings counties; with portions of Del Norte, Trinity, Sierra, Nevada, Placer, El Dorado, Sutter, Sacramento, San Joaquin, Stanislaus, Merced, Fresno and Kern counties.

District 2—Glenn, Lake and Napa counties; with portions of Mendocino, Sonoma, Marin, Solano, Yolo and Colusa counties.

District 3—Portions of Contra Costa, Alameda, San Francisco, San Mateo, Santa Clara, Santa Cruz, Monterey, San Luis Obispo, Kern, Fresno, Merced, Stanislaus, San Joaquin and San Benito counties.

District 4—Portions of San Bernardino, Imperial, San Diego, Riverside, Orange, Los Angeles, Ventura and Santa Barbara counties.

The smaller districts formed for the purpose of local legislation along specific lines peculiar to the district are as follows:

District 5—Ocean water between northerly boundary of the State and line extending west from Point St. George in Del Norte county, including all sloughs, streams and lagoons in the county except Smith river from its mouth to Bailey's riffle.

District 6—Ocean waters from Point St. George, Del Norte county, to line extending from Mussel point in Humboldt county, with streams, sloughs, etc., except Klamath river from mouth to mouth of Terwah creek.

District 7—Ocean waters from Mussel point, Humboldt county, to southern boundary line extended of Humboldt county, including waters of Mad river from its mouth to Carson's bridge, waters of Eel river and waters of Salt river as far as high tide line, excluding other sloughs, etc., in Humboldt county.

District 8.—Waters and tide lands to high water mark of Humboldt bay north of line running east apron at approach to south jetty at entrance of Humboldt bay, excluding rivers, etc., emptying into said bay.

District 9.—Waters and tide lands to high water mark of Humboldt bay lying south of line described in District 8, excluding rivers, etc., emptying into said bay.

District 10.—Ocean waters between south boundary line extended of Humboldt county and a line extending southwest from Point Santa Cruz, including waters of Tomales bay and excluding portions of Bolinas and San Francisco bays.

District 11.—Portions of waters and tide lands of San Francisco and Richardson bays to high water mark.

District 12.—Portions of San Francisco bay, together with the waters of San Leandro bay, Oakland creek or estuary, San Antonia creek in Alameda county, Raccoon straits, San Pablo bay, Carquinez straits, Suisun bay, Sacramento river between mouth and bridge at Colusa, main channels of Steamboat slough and Sutter slough, waters of New York slough and Broad slough, main channel of San Joaquin river from mouth to mouth boundary of San Joaquin county, main channel of Old river, area between main channels of San Joaquin and Old rivers.

District 13.—Portions of San Francisco bay.

District 14.—Waters of Scott creek in Santa Cruz county to a point six miles from its mouth.

District 15.—Portion of Monterey bay together with waters of San Lorenzo river and its tributaries.

District 16.—Central portions of Monterey bay.

District 17.—Southerly portion of Monterey bay, excluding all rivers, etc., emptying into Pacific ocean.

District 18.—Ocean waters between line extending west from Point Carmel and south bondary of San Luis Obispo county, excluding all rivers, etc.

District 19.—Ocean waters between north boundary of Santa Barbara county and southern boundary of State, including islands and adjacent waters belonging to State, exclusive of Santa Catalina island and State waters adjacent thereto; also exclusive of rivers, etc.

District 20.—Santa Catlina island, waters adjacent thereto.

District 21.—Portion of San Diego bay inside line from Point Loma to offshore end of San Diego breakwater.

District 22.—Salton sea and Colorado river.

District 23.—Lake Tahoe and Truckee river, including all streams flowing into said river and lake, and also all lands within the drainage basin of said lake and within the State.

District 24.—Portion of Cleveland national forest.

District 25.—Portions of San Benito and Monterey counties embraced within the Pinacles national monument.

District 26.—Portion of Trinity national forest.

District 27.—Big Basin in California redwood park, Santa Cruz county.

District 28.—Portion of Angeles national forest lying within San Bernardino county.

District 29.—Portion of Angeles national forest lying within San Bernardino and Los Angeles counties.

THE ANGLER.

The sky is overcast, a soft wind blows,
The bright cowslip lights the marsh's edge,
The Mayflies skim the stream that winding flows
Beside the bittern's rough nest in the sedge.

With rod and creel the fisher takes his way,
Beyond the smoke and noises of the town.
None plumb so deep as he the joys of earth,
Strolling the banks until the sun goes down.

Between those reedy banks with flags beset,
The twisting waters slide toward the sea—
Each flashing wave with iris gleams alight,
And dancing to its own blithe melody.

With all youth's ardor, all man's practised art,
He throws the supple line aslant the brook,
Where 'neath the drooping alders, in the cool,
Translucent shadows of a silent nook,

Lurks the sleek, spotted beauty of his choice.
Shyest and wisest of the finny host;
Sharp-eyed, suspicious, wary and alert—
A prize full worthy of an Angler's boast.

By many a patient wile he fills his creel,
And with the waning light goes whistling home.
Watching the birds fly up and darkening wheel,
Breathing the odors of the new-turned loam.

The poetry of Spring is in his heart,
It beats with fresh delight and careless mirth,
Of all the heirs of Nature, gay and free,
None plumb so deep as he the joys of earth.

Trade Tips

Rem-UMC Notes—Geo. Reddick, Omaha, Neb., won the Fred Gilbert trophy March 14, scoring 86 x 100 at the traps of the local gun club. S. A. Huntley and Henry McDonald, both of Omaha, were second and third respectively, scoring 84x100 and 81 x 100, all shooting Nitro Club shells. There were 34 enthusiasts present but, owing to the fact that only members of the local club could compete for the trophy, the visitors took part in a number of special matches.

At a two days' shoot held under theauspices of the Rodney (Ont.) Gun Club, S. G. Vance, of Tillsonburg, took first amateur average on both days, making the excellent scores of 98x100 and 188x200. He shot Nitro Club shells, as did H. O. Loane, of Chatham, who gave Vance a good fight, coming in second both days with 96x100 and 183x200.

O. Downs, of Pitman, tied with W. Armstrong, of Richwood, for the cup given by the Ewan (N. J.) Rod and Gun Club on March 13, each scoring 23x25. O. Downs won in the "miss and out" shoot off, using a Remington pump gun and Nitro Club shells. J. Tier, a local shooter, shooting UMC shells, won the day's shoot with 96x100.

* * *

Peters Points.—At the Fred Gilbert shoot of the Golden Gate Gun Club, Alameda, Cal., March 21, Geo. Anderson, of San Jose, Cal., was high amateur, breaking 98x100. High general average for the day was won by T. Wilkes, scoring 50x50. Both gentlemen used Peters Factory Loads.

At Cache Junction, Utah, March 14, O. C. Hillhouse tied for high professional, score 136x150, using Peters shells.

The Fred Gilbert shoot of the Eureka, Cal., Blue Rock Club was a tribute to Peters shells. H. A. Hine was high amateur, breaking 140x150; Ira Russ second, with 131; Dr. C. O. Falk third, with 131, and H. Kelley fourth, with 130. M. O. Feudner was high professional, breaking 141. Each of these gentlemen shot Peters shells, in fact, before the day had closed, every shooter on the grounds, numbering close to 30, was shooting the shells "with steel where steel belongs." The Gilbert cup was won by Roy Poland, who was credited with 87x100 targets.

At Bingham, Utah, February 22, high amateur average was won by Carl Nelson, 140x150, and O. C. Hillhouse was third professional, breaking 126x150. Both used Peters loads.

At Salem, Ore., February 21, H. E. Poston won high general average, 97x100, and Orvil Wilson, high amateur, 95x100, both using Peters Loads.

At Corvallis, Ore., February 22, the three high amateurs all used Peters Loads. Orvil Wilson first with 89; P. Young second 88, and Mark Siddall third 87, out of 100 targets. Jas. E. Reid was third professional, breaking 80.

The San Mateo county roads leading to the streams along the ocean shore were generally in poor condition for either machine or vehicle going. Thursday was a fair day and anglers who could reach the San Gregorio or Pescadero tidal lagoons probably landed a few fish.

THE FARM

TRAIN THE COW IN THE WAY SHE SHOULD GO.

It is a waste of time to try and build up a good dairy herd from scrub stock in these days of the all-ready finished product available. It is worse than a waste of time to spoil a good herd by bad handling; it requires only a few months' time to make confirmed kickers.

The calf, with a milk record behind it, and intended for dairy purposes, should be given the best of chances and handled from the start. My experience with breaking confirmed kickers is that when the habit is once formed, it is there to stay. We own one of this kind now, with a pound of butter per day record. We bought her cheap, because she endeavors to show the milker all the latest steps in the tango and high kicking.

The only chance for the milker is a small chute with bars well pinned, a good stout rope, buckled strap with ring around her leg and a snap on the rope fastened in ring and then to a stanchion. The cow must sit down when she attempts to kick, but she can do no damage to herself or to the milker. One of her heifer calves has been broken to milk and is as gentle as a kitten.

Good fences is another requisite in rearing faultless cows, and another is regular salting. A cow that jumps, kicks, creeps or chews the clothes off of your back will never sell for a fancy price if her faults are known. One of such can soon spoil a whole herd. Train a cow in the way she should go and when she gets old she will not depart from it unless kept in bad company.—Rural World.

NEW DEMAND FOR RAISINS.

It is an ill wind that blows no good, and the great war with its accompanying increase in the cost of living, promises to benefit one of California's greatest industries in an unexpected way.

The demand for wheat to make bread for the support of the gentlemen who are now killing each other on the plains of Europe, has given a boost to the price of that cereal in our own country that very materially affects the historic high cost of living. Bread, for many years past has been steadily decreasing in the size of its loaves while advancing in cost until it really seemed that it could not decrease much more and be anything left, for the money. The bakers are called upon to pay more for their flour, but the consumer will object to having his pound loaf cut down to eight ounces, so it is now proposed to increase the weight of the loaf by adding a plentiful supply of raisins, which weigh heavily, and add very greatly to the food value of the loaf. It is certainly a good way to make weight for it makes the bread better and adds largely to its food value.

It is not improbable that, once introduced, raisin bread will become popular, and even when "this cruel war is over" people who have become accustomed to it will still demand it, and a permanently increased market for our raisins will have been established.

Specialists of the department of agriculture have started a systematic campaign in many parts of the country looking to the elimination of roosters from poultry flocks during the season between May 1st and December 1st. There is an enormous loss in eggs as the result of the fertile egg, this loss being noted especially during the summer and fall months. Thus, for this reason, the department of agriculture recommends the sequestration of the rooster during the period. In Kentucky and Tennessee a "rooster day" is to be held on May 16th of the present year, when an effort will be made to buy up most of the roosters and send them to pot.

Would you throw away good fresh milk right from the cow? Guess you wouldn't, eh? Don't then, let the cows stand out in the cold, shivering, or don't run them with a dog, or "baste" them over the ribs with a milk stool if they don't stand just right. Because you are throwing away good milk when you do these things You will get less milk, anyhow.

HORSE OWNERS! USE GOMBAULT'S CAUSTIC BALSAM.

A safe, speedy and positive cure. The safest, Best BLISTER ever used. Removes all bunches from Horses. Impossible to produce scar or blemish. Send for descriptive circulars.

THE LAWRENCE-WILLIAMS CO., Cleveland, O.

FOR SALE

RACING AND BREEDING MATERIAL

from the establishment of the late

WENDELIN J. MILLER

of Chico, Cal.

The death of Mr. W. J. Miller causes to be put on the market the choice assortment of Broodmares, Youngsters and Race Winners with which he achieved such signal success in recent years, including

JOHN MALCOLM (2) 2:11½

stake winner, world's champion two-year-old pacing gelding (1913), by Dan Logan 2:07½, dam Susie Miller by Prince Ansel (2) 2:20½, etc. Now four years old and can show as much or more than any pacer in California. Prime for this year's races.

CAPITOLA (2) 2:17¾, (3) 2:14½

stake winner, fastest two-year-old pacing filly of 1912, public trial in 2:06½ as three-year-old, by Dan Logan, dam Lulu Mack by Arthur Wilkes, etc. A great race mare for her class.

BONDALEAN (2) 2:20½

winner of second money in two-year-old division, Breeders' Futurity, 1914, and absolutely the best one in sight for this year's three-year-old pacing stakes. Entered and paid up. Trialed in 2:15 last year. By The Bondsman, dam Katalina 2:11¼ by Tom Smith 2:13¼, etc. As great a youngster as the country affords today.

KATALINA 2:11¼

(dam of Bondalean (2) 2:20½) by Tom Smith 2:13¼, dam Kate Lumry 2:20½ (dam of 5 trotters including Baby Doll 2:10¼, Ella Mac 2:11½, etc.) by Shadeland Onward 2:18½. Katalina was a stake winner, a great aged trotter, and her first foal is a fast, standard performer. She breeds regularly and will become more famous as a producer than is her dam.

TWO-YEAR-OLD FILLY

by All Style 2:10, dam Katalina 2:11¼. Staked, paid up. Good prospect.

BAY FILLY, WEANLING

by The Proof (2) 2:29¾, dam Katalina 2:11¼. Nice individual and bred to make a fast mare.

LULU MACK

(dam of Capitola (3) 2:14½), by Arthur Wilkes, sire of Maymack 2:04½, etc., dam Lady Merrill by Tilton Almont, sire of the dam of Monte Carlo 2:07¼, etc. Good breeder and a proven producer.

BAY FILLY

three years old, sister to Capitola (3) 2:14½, never broken.

FIRST NATIONAL

bay colt, two years old, brother to Capitola (3) 2:14½. Staked, paid up. Fine youngster.

John Malcolm and Bondalean are in training at the State Fair Grounds, Sacramento, their workout days coming on Wednesdays and Saturdays. You can see them at any time and they show for exactly what they are—two of the best young pacers in the land to race in this and future seasons. Prices and particulars of all kind may be obtained upon application by mail or in person to either of the undersigned.

MRS. W. J. MILLER, Chico, Cal.

L. B. DANIELS, State Fair Grounds, Sacramento, Cal.

Offerings for Private Sale from the Stable of

WILLIAM G. DURFEE

of Prime Campaigners and Well Proven Prospects

READY TO RACE THIS YEAR

I have no objections to hard work or to driving an entry in every race of the day's program during the racing season, but daylight hours are limited, and neither physical possibility nor the judges will stand for me driving more than one horse in each race, so I am making this offering of tried and proven campaigners and well developed prospects for classes and coast futurities. I have too many horses already well developed for one man to train and race, with more coming on steadily that must be handled. Many of the individuals offered here are well known to you, and a trip here will give you full acquaintance with any others that may interest you. Every claim made for speed already shown will be fully substantiated, every horse is exactly as represented, and every price is based fairly on what long experience assures me is a conservative estimate of their actual earning capacity in competent hands. Look this list over, come and see them, and you will realize that you have never been afforded a better opportunity for a profitable investment in horseflesh for racing purposes.

All previous prices are invalidated—Quotations below are subject to change according to future conditions.

MISS QUEALY (2) 2:26¾

Full sister to MANRICO (3) 2:07¼, winner of Kentucky Futurity 1912, and holder of world's record for sixth heat. Seven years old, trained slightly as a three-year-old and showed half in 1:06 over a half-mile track; has been in training ninety days and recently worked a half in 1:04½; absolutely will not break, good gaited, sound, and a handsome individual. Can trot a two-minute gait and has every right to make a very fast, consistent, good mannered race mare. Price $1750.

ALARICH 2:11¼ (Breeder's mark 2:09),

trotter, bay gelding with black points, 15.3, handsome, sound, fast and game; trialed at Santa Rosa last season in 2:06¾ and can do it again. Is a first class doer, can race twice a week and is eligible to the 2:13 class trots on mile tracks and to the 2:18 class on half-mile tracks; has shown well on the twice-arounds. Price, $550.

HELEN BELLE (2) 2:22½, breeder's

record, bay filly, foaled 1912, good gaited, good headed, sound and extremely fast; was taken up absolutely green on Sept. 3 and has developed in a most satisfactory manner, taking her mark in December, since which time she has been an eighth in :16, half in 1:09. Sired by California's greatest sire of colt trotters, CARLOKIN 2:07½. First dam Carolyn C. by Axtell (3) 2:12 (a champion); second dam by Expedition, sire of Bon Voyage 2:08; third dam by Princeps (son of Woodford Mamb.); fourth dam by Hambletonian 10.

Carolyn C. had two minute speed. This great filly is entered and paid up in the Occident stake, the State Fair, P. C. T. H. B. A., and Oregon Futurities for 1915. The best buy in California at $1400.

NELLIE Mc,

black mare, trotter, eight years old, racing sound but is blemished; has always trained sound and I believe will continue to do so. Trialed at Sacramento in 2:10½ and has been a half lately in 1:03¾. Is a splendid mannered mare—anyone can drive her anywhere. She races first class, is fast, good headed, good gaited and dead game.

Sired by ZOLOCK 2:05¼, dam by Wilkes Moor, son of Guy Wilkes.

Stands about 15.3, is a round made extra good looking mare, weighs about 1140, has splendid legs and feet. She negotiates a half mile circle in A-1 style, should surely beat 2:10 this year. Does not pull a pound and can be placed anywhere. Eligible to any class. Price $1000.00.

CARLETA,

bay filly, two years old, by CARLOKIN, dam ALEXANDRIA, tr. 2:20, by Bon Voyage 2:08; second dam by Oakland Baron 2:09¼; third dam by Allandorf, etc.

This is a good trotter and should be prominent in her stake engagements. Is very handsome, good headed, sound and comes from familes noted for early speed. In training now and improving very fast; trialed recently, half mile in 1:11½, eighth in :16¾.

She is entered and paid up to date in the following stakes: Panama-Pacific $3,000 for two-year-olds, Stanford, Occident, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. Price $1200.

OMAR, gelding,

trotter, trial 2:13¾, half in 1:05, eighths in :15; good headed, sound and can be depended upon. Is a beautifully gaited big horse and should prove useful to race over the twice arounds or for a matinee and road horse. He is fearless and is one of the most pleasant driving horses I have ever ridden behind. Stands slightly over 16 hands, weighs about 1200, is eight years old. Sired by DEL CORONADO 2:09½, dam Pineapple by Albion (son of General Benton). A present at $350.00.

CARLSCHEN (2) 2:23, breeder's record,

brown gelding by CARLOKIN, dam BONNIE AILSIE 2:08½ (dam of Contention B. (3) 2:08¼) by Faustino, son of Sidney.

Trialed with a little work last year a half in 1:09, is extremely promising and looks to be as good a prospect as any of the colts racing last year in the two-year-old trots. Is engaged in several of the futurities including the P. C. T. H. B. A., Pleasanton and State Fair Futurities. Is a splendid type, beautifully gaited, good headed and has extreme speed. He does it right. Ready to show and trotted a half recently in 1:07. Price $800.00.

HERMES, brown colt,

two years old, by CARLOKIN, dam MISS QUEALY (full sister to Manrico 2:07¼).

This is one of the most promising trotters I have ever handled. Is an especially nice gaited colt, can show a 2:20 gait, is good headed and on the whole the most promising youngster I know of for the western stakes. Is also a show horse. Is entered and paid up in the Occident, Stanford, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. His dam is an extremely fast trotter, having shown a two minute gait in her three-year-old form, and his second dam produced two to hold world's records—Manrico and Don Pronto.

This youngster is spoken of as the most impressive colt trotter at Los Angeles. Trialed lately in 2:29, last eighth in :17½. Price $1500.00.

JOHNNY DUGAN,

3-yr.-old breeder's record 2:16,

pacer, no straps, bay gelding four years old, straight and sound, trialed a half in 1:04 last year in his three-year-old form and could pace around 2:10 in June.

Sire, CARLOKIN 2:07½; dam Annabelle L. (full sister to Murray M. and Robert I. 2:08¾) by Hambletonian Wilkes; second dam Annabelle 2:27½ (dam of La Belle 2:16); third dam by Williamson's Belmont. A great buy at $350.00.

OLD FOLKS,

bay gelding, trotter, five years old, trialed as a two-year-old in 2:31½, as a three-year-old in 2:18½, and in his four-year-old form last May in 2:11, last half in 1:04. Is sound, good gaited, good headed, and should 2:08 this year. Comes from a family of good race horses on both sides—by DEL CORONADO 2:09½, dam IRAN BELLE, by Iran Alto 2:12¼; second dam ANNABELLE, etc. He stands A-1 with the railbirds around Los Angeles and is in training and ready to go on with and race this year. Price $1250. Working beautifully.

NICOLA B. (2) 2:23¼

Winner two-year-old division Oregon Futurity, 1914.

Received slight injury just prior to going to the races in 1914, up to which time he was the most promising colt in my stable, working mile first part of June in 2:17, half in 1:06. Started twice, was once first, once second. Now in training and has brushed an eighth lately in :16; sound, grand individual, paid up in six western stakes and has every license to win. Son of Carlokin 2:07½ and Atherine 2:16¾, dam of Copa de Oro 2:01, Rags 2:09¼, etc. Price $2250. Getting better daily.

AND ONE FOR THE $20,000 P.-P. I. E. TROTS—RAGS 2:09¼.

winner of the Breeder's and Oregon Futurities, the Stanford and the Occident stakes as a three-year-old, and the Governor's Stake, $5000, as a four-year-old—in all, beaten in but two out of eight starts, second in those two, and beaten only by 2:05 trotters. In my opinion as good a prospect for the big stakes as anyone has. He is a really great race horse, is racing sound, and has developed from an overgrown four-year-old into a sturdy, strong, exceptionally fine individual. Should be engaged in the Panama-Pacific $20,000 stakes, for which I already have entries. None better bred—by Del Coronado and out of the dam of Copa de Oro 1:59, etc. Price $2000.

In addition to the ones above mentioned I will offer to intending buyers JIM CRAM, three-year-old pacer (brother to Chango 2:12¼), the two-year-old pacerSANDY McNABB (staked), FIVE YEARLINGS and SIX TWO-YEAR-OLDS, most of which are in training and ready to show.

Prices and descriptions on application.

WILLIAM G. DURFEE, 2019 S. Figueroa St., LOS ANGELES, CAL.

J. DAVID WEST

1265-1267 Golden Gate Ave., near Fillmore St. Phone Park 1253

WHOLESALE AND RETAIL

Peter The Great

Cal. State License Pure Bred 2339

Is the world's foremost progenitor of extreme speed; sire of 30 in 2:10, etc.

HIS SON

PETER McKLYO 3, 2:12 1-2

will make the season of 1915 in the training stable of James Thompson at the San Jose Driving Park beginning March 15 and ending July 1.

PETER McKLYO (3) 2:12½, the only California-owned son of Peter the Great of an age permitting stud duty, is out of a great-bred young matron by Jay McGregor 2:07¼—Klyo (2) 2:29½; second dam Miss Spears 2:21¾ (dam of 6 including Shakespeare (3) 2:09¾); third dam Medium's Last (dam of 7 including Trampfast (2) 2:14¼); fourth dam Suzanne (dam of 1 and grandam of 10 including Susie J. 2:06½).

This colt is four years old, having obtained his record last season with a very limited amount of work. He came into my hands perfectly green in February, 1914, and developed speed so fast that I had to take his shoes off and jog him for two months barefooted. Being by Peter the Great, the sire of the century, and, as you will notice, out of a daughter of Jay McGregor, another wonderful family of horses, he is one of the best bred young horses in the world and I can truthfully say he is one of the very best individuals that I ever had the pleasure of looking at. He can trot a quarter in 30 seconds, and I am firmly of the opinion that he will trot a mile this fall in 2:06 or better.

Fee, $75 the season with return privilege. Mares pastured at usual rates and accorded best of care, but no responsibility assumed for accidents or escapes. Service fee and pasture bills must be paid before removal of mares. Address for all particulars

L. H. TODHUNTER, Owner, Sacramento, Cal.

JAMES THOMPSON, San Jose Driving Park, San Jose, Cal

THE PROOF 2, 2:29¾

A. T. R. No. 51956
LICENSED PURE BRED CERTIFICATE No. 1029

From the family of Bingen 2:06¼, foremost among present day champions of all ages and gaits.

Son of **The Exponent 2:11¾** (by Bingen, dam Iva Dee by Onward 2:25¼), sire of 32 performers including The Temptress 2:08½, 6 three-year-olds, 20 two-year-olds and 1 yearling.

First dam **Chord 2:27** (dam of 4) by Wilkes Boy 2:24½, sire of 4 and the dams of 11 in 2:10; second dam **Sonata** (dam of 3) by Dictator 113, sire of 2 and the dams of 7 in 2:10; third dam **Cadenza** (dam of 2) by King Rene 1278, sire of the dams of 2 in 2:10; fourth dam **Virgie Wilkes** (dam of 4) by Geo. Wilkes 2:22, sire of the dams of 16 in 2:10.

In the stud, season of 1915, at Pleasanton Driving Park, at $50 the season with return privilege. We have colts in training to show his qualities as a sire. Grandsons of Bingen are siring champions such as Etawah 2:03½, Anna Bradford (3) 2:00¾, etc. Address for all particulars,

KEEFER & SPENCER, Pleasanton, Cal.

Derbertha Bells

Licensed Pure Bred, Cert. No. 1172.

NO. 60907 A. T. R. RULE 1.

DERBERTHA BELLS, foaled 1911, stands 15.3, weighs 1200 pounds, and is of magnificent conformation, style, trotting action and color; being a solid dark bay or brown with splendid mane and tail, massive well-formed limbs and feet, beautiful neck and head, fine, well set ear and eye as kindly as a fawn's and as courageous as a lion's. His breeding can only be hinted at here as he traces 20 times to Hambletonian 10—5 through Electioneer, 5 through George Wilkes, 4 through Strathmore and 4 through Abdallah 15 (the big four of the sons of Hambletonian), and twice through his daughters. This breeding is perfectly balanced by 18 crosses to Mamb. Chief 11—5 of these through his greatest son Mamb. Patchen 58 (leading progenitor of the dams of trotting sires), backed up by 2 crosses to Pilot Jr. 12, 4 to Black Hawk 5, 4 to Imp. Trustee and crosses to such other famous broodmare sires as American Star, The Moor, A. W. Richmond, Williamson's Belmont, etc.

I challenge any man to name a stallion with a broodmare inheritance approaching that of Derbertha Bells,—5 crosses to Green Mountain Maid (dam of 9 and Electioneer), 3 to Alma Mater (dam of 8 and 7 sires, including Alcyone and Alcantara), and 1 each to Miss Russell (dam of 7, including Maud S. 2:08¾ and 6 sires, including Nutwood), Dolly (dam of 4 and 5 sires, including Director, Onward and Thorndale), Beautiful Bells (dam of 11, including 4 world's champions and 10 sires) and Minnehaha (dam of 8 and 6 sires). These are pre-eminently the greatest mares of history in point of number of descendants in the standard list, besides 2 crosses to Bertha, the only mare with 2 in 2:04½, 5 in 2:10 and 13 in the list. Counting duplicates this pedigree contains the blood of 20 mares with an average of 9 performers each, and of the 14 mares appearing in the pedigree of two or more 2:10 trotters in 1910 this pedigree contains 8.

His disposition and deportment are in perfect harmony with his superlative breeding and conformation, all that could be desired. I own a yearling filly by him that stamps him as a sire of the first rank, and I invite the most critical inspection both of him and his get. He will be allowed a few choice mares at $25.00 the season with usual return privilege. Tabulated pedigree upon request.

J. W. PENDLETON, Owner,
1601 Seminary Ave., OAKLAND, CAL.

Grandly Bred A Colt Trotter A Proven Sire

Bon McKinney 51480

Cal. State License, Pure Bred No. 1213.

Three-year-old record 2:24½; trial (3) 2:15, 1:05.

Sire of

Bon Courage (2) 2:12¾ **Bon Bell (3) 2:17¾**

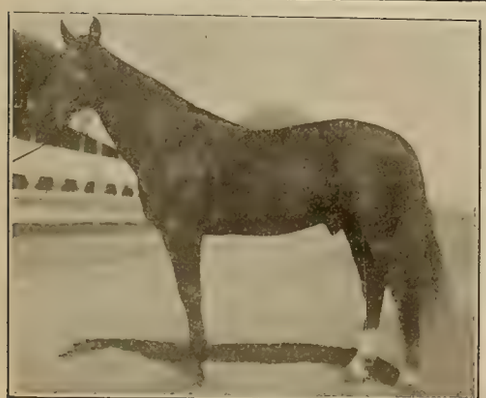
Son of **BON VOYAGE 2:08** and **DAPHNE McKINNEY** (dam of Frank N. 2:07¼, etc.), by McKinney 2:11¼; second dam La Moscovita (dam of Bon Guy (3) 2:11¾ and 2 others) by Guy Wilkes 2:15¼; third, fourth and fifth dams also in great brood mare list. Bay horse, in every respect a great individual, with substance, finish, and natural, frictionless trotting action. Very sure foal getter and a steadily rising young sire, his few foals possessing his most excellent qualities to a marked degree. Bon Courage was the only California bred three-year-old to win a heat from Esperanza in 1914.

In the stud, season of 1915, at the **Rush & Haile Ranch, Suisun, Cal.**, season closing August 1st. **Fee, $25 with return privilege,** payable cash at time of removal of mare. Good pasturage at $2.50 per month. For further particulars address

BEN F. RUSH, Suisun, Cal.

EXPRESSIVE MAC 2:25 1-2

A. T. R No. 41513 Licensed Pure Bred, Cert. No. 1041.



Clara Mac 2:04½ Sire of **Vera Hal 2:05**

Only stallion in California to sire a new 2:05 performer in 1914, and one of three stallions in U. S. to sire two new ones in 2:05 that season.

Also sire of Madam Mac (4) 2:10¼, trial 2:07; Eddy Mac (3) 2:29½, trial 2:13; Nellie Mac, trial 2:18 trotting, good for 2:10 this year, and numerous others with fast trials. In four show classes at Fresno his colts won three firsts, one second.

Son of **McKINNEY 2:11¼** and the great brood mare **EXPRESSIVE 2:12½** by **ELECTIONEER 125.** Ideal in color, size and conformation—seal brown, height 16½ hands, weight 1275 pounds. Permanently in the stud at my ranch three miles south of Selma, at **$25 the season,** usual return privilege, or **$35 to insure.** Good pasture for mares at $2 per month and best of care given. No responsibility assumed for accidents or escapes. Address for all particulars

J. H. NELSON, Selma, Cal.

WOODLAND STOCK FARM

INCORPORATED

Offers for Service for the Season of 1915

PRINCE ANSEL

CERT. 1062

2, 2:20½ A. T. R. 29220

Sire of

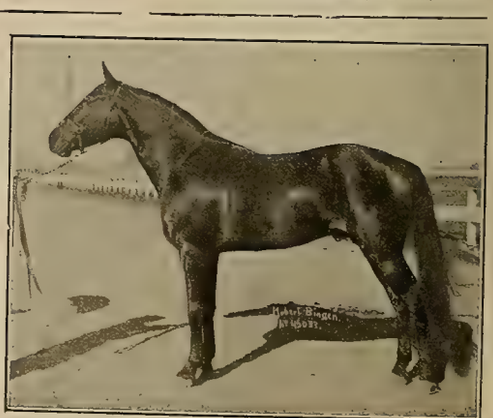
Prince Lot 2:07¾
Joseph Ansel (3) 2:12¾
Lottie Ansel (2) 2:14¼
Laura Rogers 2:11¼
Adansel (3) 2:14½
Arista Ansel (2) 2:18¼, etc.

And the dams of

John Malcolm (2) 2:11½, etc.

PRINCE ANSEL is not only doing more than any other individual to perpetuate the fame of the great family of **Dexter Prince,** but he has few rivals in the land as a progenitor of futurity winning youngsters, as attested by the summaries of coast classics year by year. None more highly esteemed by horsemen in general. **Fee, $50 with usual return privilege.**

ROBERT BINGEN



CERT. 1061

2:11¼ A. T. R. 45033

Best Bred Son of

BINGEN 2:06 1-4

Sire of **Uhlan 1:58;** 14 in 2:10
First dam **Episode 2:18** half sister to Peter the Great 2:07¾
Second dam **Santos,** dam of Peter the Great 2:07¼, J. Malcolm Forbes 2:08, etc.

ROBERT BINGEN, in every way one of the most desirable horses ever offered for service in California, represents the families whose blood is most eagerly sought by successful breeders today—Bingen and Peter the Great. He is the only son of Bingen standing for service in California and his book is rapidly filling. **Fee, $75 by the season.**

True Kinney 2:12¼

The best young McKinney stallion in California—a colt trotter and a coming sire. His first foals are among the best on the farm and show for themselves. Terms on application—season limited.

ALL STALLIONS LICENSED PURE BRED

JOHN W. CONSIDINE, PRESIDENT

Mares sent to these stallions will be cared for at $5.00 per month on pasture; $10.00 per month in box stalls. Colts entered in all the Futurities. Brood Mares, Racing Prospects and Saddle Horses for sale at all times. Correspondence solicited, visitors cordially welcomed. Address **HARRY DOWLING, Supt., Woodland, Cal.**

COPA DE ORO 1:59
WINNING PERFORMANCE

DURFEE'S STALLIONS

CARLOKIN 2:07 1-2
EXHIBITION MILE 2:05 1-4

Champion Pacing Stallion of the West and Sire of a Champion

Reg. No. 52785. Licensed Pure Bred. Cert. No. 1037

Golden Bay. Height 15.3½. Weight 1160.

Sire of CONTENTION B. (2) 2:24¼, (3) 2:08¼, the latter mark a world's record when made, and but one-quarter of a second removed from present record for three-year-old pacing geldings. Public trial (3) 2:07¼. Also sire of

Chango p. (3).....2:12¼	De Ora (3) 2:17
2-yr.-old record 2:13½.	2-yr.-old record 2:27¼.
Trial (3) 2:09	Gold Lily p. (2)....2:24½

Patrick de Oro p (3)2:22¼, trial (3) 2:08¾, ½-mi. track

Copa de Oro has been retired to the stud for but a very few years and these are from his first foals. Where can you find a stallion whose get have made an equal showing?

COPA DE ORO is the fastest son of Nutwood Wilkes 2:16½ (sire of 8 in 2:10); first dam Atherine 2:16¾ (great brood mare) by Patron 2:14¼, sire of the dams of 7 in 2:10; second dam Athene (dam of 2 trotters, etc.) by Harold 413, sire of Maud S. 2:08¾ and the dams of 5 in 2:10; third dam Minerva (great brood mare) by Pilot Jr. 12, sire of the dams of Maud S. 2:08¾ and 3 others in 2:10, etc. He is one of the handsomest horses in the world, as well as one of the fastest, and is undoubtedly the best bred of all extremely fast pacing sires. From the first I heralded him as the Coast's future great pacing sire, and the performances of his youngsters recorded above certainly show that I had most excellent grounds for that belief.

FEE: $75 For the Season, Usual Return Privilege

I am especially well equipped for caring for mares at reasonable rates in any way that owners may desire. Every attention will be given mares in my charge, but no responsibility is assumed for accidents or escapes. Further particulars may be had by applying to W. G. DURFEE, 2019 So. Figueroa St., Los Angeles, Cal.

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred. Cert. No. 1038

Mahogany Bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

Ethel D. (3).....2:11	Helen Belle (2)....2:22½
Johnny Dugan p (3)2:16	Nicola B. (2).....2:23½
John Warwick (2) 2:17	Santiago (3) 2:24¼
The Lark (3).....2:18½	May Marian p (3)..2:24¼
Carl (2) 2:19¾	Carlrich p (2) 2:24½
Miss Carlokin p 2:20	El Carbine (2).....2:27½
Carsto (2) 2:22½	Eileen C. (3) 2:29
Carlschen (2) 2:23	Carlos (2) 2:29¼
Fulton G. (2).....2:30	

CARLOKIN is the best bred son fo McKinney 2:11¼, foremost among the progenitors of 2:10 speed, being out of that sterling producing matron Carlotta Wilkes (dam of Inferlotta 2:04¾, Mary Dillon 2:06¼, Guy Borden 2:07¼, Carlokin 2:07½, and 6 others in 2:30) by Charley Wilkes 3653; second dam Aspasia (dam of 4) by Alcantara 2:23, sire of the dams of 20 in 2:10; third dam Miss Buchanan (dam of 1) by Clark Chief 89, sire of the dams of 2 in 2:10, etc. Carlokin was not only a fast and rugged campaigner, but, point for point, one of the most ideal individuals ever foaled. I chose him from among all the best horses of the country as a prospective great sire, and in 1913-1914 his get won more coast futurities than those of all other sires combined. What more could you ask of them?

FEE: $75 For the Season, Usual Return Privilege

Every attention will be given mares in my charge, but no responsibility is assumed for accidents or escapes. Address W. G. DURFEE, 2019 So. Figueroa St., Los Angeles, Cal.

Pleasanton Driving Park

offers for service for the season of 1915 the following stallions:

Joe Patchen II 2:03¼

Licensed Pure Bred—Cert. No. 1128.
A. T. R. No. 47491

BEST MONEY WINNING PACER

By JOE PATCHEN 2:01¼, sire of Dan Patch 1:55¼ and 6 others in 2:10.

Dam, Bessie Bonehill 2:05¾ (dam of 2 in 2:10) by Empire Wilkes 2:29¼; second dam Arab Girl (dam of 7) by Crittenden 433, sire of the dams of 6 in 2:10.

Joe Patchen II comes from a long line of famous ancestors and is himself one of the best known and most popular pacers in America, with all the qualities of speed, stamina and individual excellence necessary to the making of a truly great horse—one of the kind you would expect to find after a glance over the array of famous performers owning allegiance to the families from which he comes. He is an excellent breeder, transmitting uniformly his own desirable characteristics and his few foals in California are promising to the highest degree.

Mahomet Watts 2:08¼

Licensed Pure Bred—Cert. No. 2312.
A. T. R. No. 51518.

AXWORTHY ELECTIONEER

By GEN. WATTS (3) 2:06¾, sire of three three-year-old trotters in 2:10.

Dam Alla P. 2:21¼ (dam of 3) by Palo Alto 2:08¾, sire of the dams of 2 in 2:10; second dam Lula Wilkes (dam of 5), by George Wilkes 2:22, sire of the dams of 15 in 2:10.

Mahomet Watts is not only the fastest performer credited to Gen. Watts (3) 2:06¾ (whose breeding on qualities have been prime factors in the rise of the great house of the Axworthys) but he springs on the maternal side from the most firmly established families of champion producers—those of Electioneer and George Wilkes. He is a pleasing individual of fine finish and extreme speed, having a three-year-old record of 2:10 and being timed separately in a race last year in 2:05¼, whose services should be most welcome to California breeders.

Fee for Joe Patchen II or Mahomet Watts, $100 with usual return privilege

Service fee refunded to owners of mares bred to Mahomet Watts proving not with foal.

Vernon McKinney 2:01½

Licensed Pure Bred—Cert. No. 1126.
A. T. R. No. 53803.

FASTEST OF THE McKINNEYS

By GUY McKINNEY 37625, son of McKinney 2:11¼, dam by Guy Wilkes.

Dam Maud Vernon by Mount Vernon 2:15¼, sire of the dam of Leata J. 2:03, etc.; second dam Mag by Gen. McClellan, sire of the dam of Mack Mack 2:08, etc.

No member of the McKinney family excells Vernon McKinney in point of speed or individual excellence. He is a horse of much substance—16 hands, 1200 pounds—bred in lines of intense prolificacy and evidencing in every way his ability to "live up to his pedigree." No horse has greater natural speed or a more effortless way of going. He is a sure breeder and his youngsters are the readiest sellers of their age in California—a statement proven by recent sales and tentative offerings for the get of mares due to foal to him this year.

Zomblack 2:26, tr. 3, 2:08¾

Licensed Pure Bred—Cert. No. 1127.
A. T. R. No. 54955

BEST SON OF ZOMBRO

By ZOMBRO 2:11, sire of twenty and the dams of three in 2:10.

Dam, Madeline Marshall (dam of 2) by Demonio 2:11¼, sire of 7 and dam of 1 in 2:10; second dam Mamie Comet (dam of 3) by Nutwood 2:18¾, sire of 2 and dams of 21 in 2:10.

Zomblack is one of the handsomest horses ever foaled in California as well as one of the fastest. His extreme speed came to him early and naturally, and he is unexcelled in size and conformation—an ideal type of the American trotter in every important respect. He is intensely bred in speed producing lines and we have no hesitation in advancing the claim that he is the very best son of Zombro 2:11, in his turn the best son of McKinney. In every instance the families represented in his pedigree are breeding on most successfully.

Fee for Vernon McKinney or Zomblack, $50 with usual return privilege

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars CHAS. L. DeRYDER, Superintendent PLEASANTON, CAL.

The only son of Jay McGregor 2:07¼ on the Pacific Coast, and the only stallion in California whose sire and dam both have records faster than 2:10.

Onward McGregor

TROTTING RECORD (3) 2:23¼.
YEARLING TRIAL QUARTER IN :33.

Bay horse, black points. Height 16 hands, weight 1100 lbs. Licensed Non-Standard, Cert. No. 24.

First dam MARY GORDON 2:09¾ by GORDON 3127 (son of Onward 2:25¼); second dam Nell by Young Octoroon, sire of Shadow (dam of 4 and grandam of Peter the Great 2:07¼, J. Malcolm Forbes 2:08, etc.) Will make a limited season of 20 mares at Pleasanton Driving Park at $35 with usual return privilege. Every mare bred to him this year will be nominated in the Breeders and State Fair Futurities for foals of 1916 and first payment made by his owner. Address for all particulars

Son of KINNEY LOU 2:07¾ and BETSY DIRECT by Direct 2:05½

$50 THE SEASON

KINNEY DE LOPEZ is the sire of DON DE LOPEZ, trial one-half as a yearling 1:13¾, one-eighth 17½ seconds; could have trotted in standard time as a yearling. KINNEY DE LOPEZ is certain to sire early speed.

Terms: Cash at time of service with usual return privilege, or money refunded at our option. Excellent pasturage and best of care taken of mares, but no responsibility assumed for accidents or escapes.

BREED TO THE COAST'S CHAMPION CAMPAIGNER AND FUTURITY SIRE

JIM LOGAN 2:01¾

(3) 2:05½, world's record to 1912 and yet the fastest third heat ever paced by stallion of that age; (5) 2:04¼, (6) 2:03¼, (7) 2:02¾, (8) 2:01¾, race record for Pacific Coast.

Licensed Pure Bred—Cert. No. 1028.

All winning race records. Registry No. 44997.

Sire of MAXINE (3) 2:15 Winner Pacing Division Pacific Breeders Futurity 1914

Trial in 2:09, half in 1:01, quarter in :29 as a three-year-old.

Son of CHARLES DERBY 2:20, brother to Klatawah (3) 2:05½, etc., and sire of TEN in 2:10.

Dam, EFFIE LOGAN, California's greatest producer of extreme speed (dam of Jim Logan 2:01¾, Sir Albert S. 2:03¾, and Dan Logan 2:07½, sire of John Malcolm (2) 2:11½, champion two-year-old of 1913), by Durfee 11256; second dam Ripple, by Prompter 2305, sire of the dam of Gratt 2:02¼, etc.; third dam Grace (dam of Daedalion 2:08½, Creole 2:15 and Eagle 2:19½), by Buccaneer 2656, sire of the dams of 2 in 2:10; fourth dam Mary, great broodmare, by Flaxtail.

JIM LOGAN is not only a horse of most acceptable size and pleasing conformation, but is one of the most rugged campaigners ever raced. After acquiring a world's record as a three-year-old he reduced his record every year raced and is a sound horse today—no more eloquent testimony of his genuine natural qualities could be given. Of his very few living foals, every one trained has shown speed in convincing quantity, and the only one to be raced, Maxine (3) 2:15, began her career as a futurity winner. Could you ask more of a well bred horse than that he be a champion campaigner and transmit his qualities to his get?

In the stud, season of 1915, at Woodland Race Track

FEE: $50 for season, with usual return privilege, or $75 to insure living colt. Fees payable at time of service or before removal of mares. Excellent pasture at $5 per month, with best of care for mares, though no responsibility will be assumed for accidents or escapes. Call at race track, or address

Eight Class Races each week for $1,000, so arranged as to suit all record horses; so don't fail to arrange to be at Montreal and enter your horse in a Class Race each week. The Eastern end of the Grand Circuit will be easy picking, and good Tracks to race over.

MEMBERS OF THE GRAND CIRCUIT, ALSO THE AMERICAN AND NATIONAL TROTTING ASSOCIATION. NATIONAL ASSOCIATION RULES TO GOVERN.

CONDITIONS

ENTRIES WILL CLOSE WEDNESDAY, APRIL 14, 1915, 11 P. M., WHEN HORSES MUST BE NAMED.

Entrance is 5% of Purse and 3% deduced from the first four money winners. Any number of horses in the same stable or control may be named on payment of full entry on each horse. All races will be three in five (3 in 5), under the American rule number 153 Point System, but in no case shall a horse win first money unless he is a heat winner, and it is further provided that all horses not standing for money or being heat winners at the end of the third (3) heat shall go to the barn and be declared out. If at the end of the fifth (5) heat, heat winners standing tied as to points, they alone shall race a sixth heat to decide who is the winner, and in no case shall a non-heat winner have precedence over heat winners for a position in the race, even if they should have a less number of points—a Two Heat Winner has precedence over a One Heat Winner—5 to enter and 4 to start. All races will be contested under the rules of the National Trotting Association, except as otherwise provided. Nominations will be held for full amount of entrance unless written notice of withdrawal, accompanied by amount already due, is received by the Secretary on or before a date when a payment is due. Right reserved to declare any event off or reject any entry. Entries bearing postmark April 15 will be accepted.

TIME ALLOWANCES

Entries to the above named Early Closing Events are entitled to time allowances as have been granted by the National Trotting Association and the Grand Circuit, of which we are a member. Liberal Purses for class races will be announced later to suit everybody—National Association rules to govern. Address all inquiries and entries to

VICTORIES OF PARAMOUNT **PARKER GUNS 1915**

Look, Read, Remember!!!

At the Pinehurst Mid-Winter Handicap Shoot the four contestants making the highest scores in the preliminary event all shot Parker Guns.

RATHER STARTLING, ISN'T IT?

In the main event, the PINEHURST HANDICAP, Mr. S. A. Huntley, although placed further back than any other contestant, scored

95 out of 100 Targets at 23 Yards

and landed the Trophy. Furthermore Mr. Huntley was high over all for the entire tournament, and as usual shot his 34-inch barrel PARKER GUN.

In 1914 Parker Guns won **The Grand American Handicap, The National Championship** at single and double targets, the

FIRST and SECOND YEARLY AVERAGES

and made the best scores on the Pacific Coast.

Follow the pace set by the champions of America and for either single or double target shooting use

Long Tom Parker Guns

FOR SALE

Hallie D 2:08¼

by WALTER DIRECT 2:05¾, sire of Napoleon Direct 2:02½ (winner of $13,950 in 1914), The Assessor 2:04¼ (winner of $5,790 in 1914), Merry Direct 2:06¾ (1914), Walter Hal 2:04, Manitoba 2:04¾, Annie Laury 2:07¼, Hallie D. 2:08¼, Hallie Direct 2:09¾, etc.

First dam Hallie Dillard by Brown Hal 2:12½, sire of Star Pointer 1:59¼, twelve others in 2:10, and the dams of twelve in 2:10, including Flower Direct 2:01, Braden Direct 2:01½, etc.

Second dam Annie Pointer (dam of Hal Dillard 2:04¾, etc.) by John Dillard Jr., sire of the dams of two in 2:10.

As a five-year-old this mare was one of the best campaigners of the west, starting eighteen times, usually over half-mile tracks, often starting twice in a three or four day meeting. She was eight times first, twice second, five times third, once fourth and but twice unplaced. She took her record in the third heat of a winning race over the half-mile track at Eureka, Kansas (her second start in three days), equaling that mark at Muskogee and repeatedly beating 2:10 on two-lap tracks.

She is right in every way, better than a 2:05 pacer on a mile track and there are none better to take to the twice-arounds. Is bred to make a great pacer of speed after her racing days are over, as her blood inheritance from both sire and dam is proven beyond question by any number of fast performers. She is in excellent condition to prepare for a campaign in 1915, and can be seen at Salinas, in the care of Henry Helman. Address or call on for further particulars,

MODERN BREAKING

By W. A. BRUETTE

A revised edition of the latest Treatise on the Training of Setters and Pointers.

Price: Paper $1.00, Cloth $1.50. Sent Postpaid

THIS book enables anyone to do his own training and fully explains the methods employed by the most successful trainers in developing the setter and pointer. The important lessons are illustrated by photographs from life; nothing is left to guesswork. The entire subject is covered, from the selection, raising and development of puppies to the conditioning of dogs and their handling in the field. The amateur is told, in lucid language, how to make a dog a high-headed, stylish worker, stanch on his points, steady to shot and wing, and a prompt, tender retriever; all of this is accomplished by simple methods, some of them never before given to the public. The instructions for correcting the faults of bird dogs and keeping them up to their training are concise and easily understood. Every man who owns a bird dog or shoots in the field should read this book.

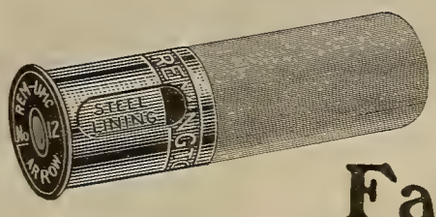
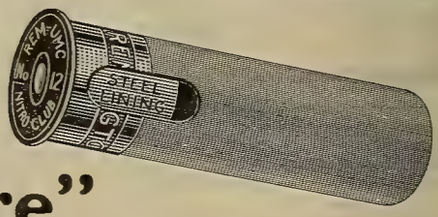
WINCHESTER



FACTORY LOADED SHOTSHELLS, "LEADER" AND "REPEATER"



The use of machinery has brought about invariable results in the loading of shotshells, impossible to obtain by hand-loading; as machines can be adjusted and timed so as to insure uniformity in the work. In the case of loading shotshells, this means exactly measuring the quantity of powder, seating the wads evenly and with uniform pressure, exactly measuring the quantity of shot, seating the top wad evenly, and crimping the shells uniformly and firmly. The hand cannot be so controlled. Machine loading has greatly raised the average of shooting and put it on a stable basis. Winchester Factory Loaded "Leader" and "Repeater" shells are loaded in this way; and another point is that there is a difference in machinery and in knowledge of such things. The Winchester plant, being the largest in the world devoted solely to the manufacture of guns and ammunition, has the most up-to-date equipment for such purposes, and also the best skill obtainable. What is the result of this? It is that, in buying Winchester Factory Loaded Shells, you are getting a perfected product, instead of something hap-hazard—and this is a case where it doesn't show on the outside. It shows when your shooting, though, and it will pay you to find this out. You can get Winchester Factory Loaded Shells of all dealers. They will prove to you that

FRED GILBERT

To My Fellow Trapshooters:

THERE was surely "some shooting" this week in the 700 Fred Gilbert Anniversary Shoots, and I am so full of appreciation of all the good wishes and hearty hand-clasps that I just can't express my feelings.

While we were all nominally celebrating my 20th Anniversary as a trapshooter, I feel that the real cause of the celebration was the wonderful progress of the sport of trapshooting, in which we have all had our part, and of which we are all justly proud.

I am sure I express the feeling of all of the pioneer trapshooters when I say that nothing pleases any of us more than to help fellow-sportsmen to greater proficiency and fullest enjoyment of "The Sport Alluring."

FRED GILBERT.

The Trap, when folded, can very handily be carried in a suitcase with targets and shells. It is of very strong and durable construction and weighs only six pounds complete. If your dealer can't supply, we will send postpaid for $4.00. Send for new booklet on trapshooting and use of Hand Trap. Address Dpt. 99-S

ZOMBLACK (2) 2:26.....C. L. DeRyder, Pleasanton

WOODLAND SALE NEXT THURSDAY.

Judging from the class of consignments received for the event, and the general interest that has been aroused therein throughout this section of the coast country, next Thursday's sale at Woodland Stock Farm should prove a great success from all viewpoints. The horses that are to go under the hammer cover the complete range from yearlings to brood mares, with green and record horses of both sexes and gaits ripe for campaigning present in goodly array. The mares offered by Woodland Stock Farm are of excellent breeding, some in foal and all useful, while the youngsters are the pick of the farm, stake prospects by True Kinney and Prince Ansel, out of such matrons as Ella J. (dam of San Felipe 2:09¼ and Honey Healey 2:08¼) by Bob Mason; Oniska (dam of San Francisco 2:07¾, etc.) by Nutwood Wilkes; Silver Haw (dam of Helen Stiles 2:06¼) by Silver Bow; Princess Viola by Prince Ansel; Eocita (sister to Montalvo 2:13¼) by Moko, dam Mendocita (dam of 4) by Mendocino, grandam Esther (dam of 4, two sires of 6, seven dams of 18) by Express. All of the yearlings are not only staked, paid up and thoroughly broken, but they are trotters of the first degree and will show their qualities at the sale.

E. A. Swaby of Dixon sends two good mares that are trotters in the making, one by Nushagak, dam by Antevolo, and the other by San Francisco 2:07¾ and out of Birdie, the dam of Bodaker. With San Francisco yearlings selling up to $3200, this mare, sound and right and at a nice age for service on track and stock farm, ought to set the bidders to "raising 'em" in good shape.

Airlie Demonio 2:05½ is not only the fastest son of Demonio but he is a great bred one and as game a pacer as ever was hooked up. He is one of the most popular horses at service in Yolo county, and Manager Dowling pleased the public fancy when he secured from Chas. Johnson a consignment of five young "Airlies," all from well bred mares, some registered and others eligible. There will be plenty of bidders for these.

Another famous farm represented is the establishment of J. W. Marshall at Dixon, from which have come so many great race winners in former years. Two fine matrons head the consignment, both proven producers of speed. Madeline Marshall by Demonio, dam Mamie Comet by Nutwood, is the dam of the colt trotters Zoblack (2) 2:24¼ and Zomblack (2) 2:26, the latter with a three-year-old trial at the trot of 2:08¾. Put to pacing last fall, he has developed a lot of whizz at that gait and is entered for the big stakes on the Grand Circuit. Twenty-Three Skidoo is the other matron, the dam of the pacer La Plata that has shown so well at San Jose for Jack Villar. She is by Nutwood Wilkes and out of that great daughter of Director, Twenty-Third, dam of the twenty-five-thousand-dollar trotter Sterling McKinney 2:06¼. They are fit for any farm, no matter how select.

Mr. Marshall also sends three fine youngsters bred in famous speed producing lines, a yearling filly and a two-year-old brown colt, by Palo King 2:28½ and Sirius Pointer 2:15, respectively, both out of the great Ramona (dam of Del Rey 2:03¾) by Demonio, grandam Corolla (dam of Ben F. 2:07¾) by Steinway. The other is a yearling colt by Montbaine, out of Madeline Marshall, and all three are the real "Marshall kind." Such well known horsemen as H. S. Hogoboom, Fred Jasper, Wilbur Smith and others are among the patrons of the event, and their consignments are in no manner behind the others mentioned in general quality.

The sale starts at ten in the morning and lunch will be served on the grounds at noon. In addition to the trotting bred horses, many work animals will be offered, and a deal of miscellaneous stock and farm equipment, so that Auctioneer Wm. Higginbottom has a busy day ahead of him. Don't miss this sale unless you just naturally don't care for bargains in high class horseflesh.

LESS TIME SUPPRESSION.

If we were called upon for an opinion as to the greatest evil that appears at any of the harness horse meetings of the United States, we would unhesitatingly name time suppression.

We have often made the statement that more direct injury has been inflicted upon the sport and its followers in one year through this practice than ringers have caused in all the history of the game. If one would attempt to recall the names of a number of ringers that ever reaped very great harvests, it would be difficult to name very many, but we can easily call to mind a formidable number of campaigners which, through the kindness of the timers, were able to year after year pull down substantial sums, to the detriment of owners and drivers who met them.

The last few years have seen a considerable abatement of this practice and the sharp lessons received by the offenders in some detected cases has had a very salutary effect, but we believe the greatest force ever brought to bear upon the abolishment of this evil will be found in the lowering of the Grand Circuit classes this season and the recognition accorded the fast performers.

Always before the mind of the trainers and owners of a promising half-mile track performer appeared the possibility of their charges developing Grand Circuit caliber and all sorts of schemes have been continually worked to prevent the acquiring of a record so fast as to bar entry to the great classics. Track associations and secretaries were continually solicited to protect horses from a fast record as a condition of entry and, with some associations seemingly always ready to do this, the lot of the track that tried to insist upon time as it was made has been a hard one. But as before stated, we believe that the coming season's racing on the half-mile tracks will be freer from this evil than ever before as the result of the new Grand Circuit practice, and feel that a great benefit to the game is certain to accrue.

With the classics for 2:08 and 2:09 trotters, there is no longer the fear before the owner of a good half-mile track trotter that his horse may be outclassed for the big rings in an effort to win a purse of from $300 to $1,000 on the twice arounds; with the C. of C. for the 2:06 class, there need be no longer such a continuous effort on the part of the manager of a fast pacer to keep his horse's record at about 2:14¼, a very favorite tab with a number of high class pacers of recent years. And we believe that the winrace rule of last year had a very beneficial effect and was largely accountable for the reduction of time suppression last season through the fact that a driver was enabled to make an honest effort to win without the fear that, if his horse was unable to last throughout the race, he would be burdened with such a record that his usefulness would be greatly reduced without any resulting compensation. It is not our desire to mention the names of any track associations, but we can easily recall a number last year where the time hung out differed so little from the time caught by the watches in the crowd that the old timers were absolutely surprised and remarks were freely made commenting favorably upon the managements.

The reasons for the lowering of the classes in the early closing events were such as seemed good to the Grand Circuit managers but from our standpoint a result will be obtained that certainly was not in their calculation, that of aiding very materially in putting an end to time suppression on the half-mile tracks.

It is our temperament to be optimistic on all matters but we strive not to be unduly so, and believe that we are not going beyond bounds in arriving at the conclusion that time suppression will be less in evidence in 1915 than ever before in the history of harness horse racing.—American Sportsman.

WITH JOHN McCLINTOCK'S THANKS.

Hesperia, Apr. 3, 1915.

The Breeder and Sportsman,

Gentlemen: Through the columns of your paper I desire to thank yourselves and all those kind friends and acquaintances who so generously contributed to the fund collected for my benefit and to express my sincere gratitude for the great help given me in this, my time of need.

I want to say to yourselves and all my other friends that the money you sent me will go a long way towards prolonging my life and I sincerely hope that none of my friends or any person in the world will be in my fix.

While I know I am only here for a short while, I wish every one in the world the greatest possible good luck and that they may never be in want.

Sincerely yours,

JOHN McCLINTOCK.

DISCONTINUANCE AT DALLAS.

Perhaps nothing in the way of recent news has been so great a surprise to horsemen as the announcement, which reached us last week just in time for publication, without comment, that the management of the Texas State Fair, at Dallas, had eliminated its speed department in toto, and that there would be no racing of any kind at the 1915 fair.

Nothing more entirely unexpected and, to the public at least, more unpleasant, could well have been given out. For years past the racing at Dallas has been the pre-eminent event of its kind in the great Southwest—and during the last four, owing to expansion in the speed department and the elevation of harness racing to the prime entertainment feature of the fair, it had attracted national attention. Upon the program $5,000 stakes and fixtures of slightly smaller value appeared regularly, which attracted to the Lone Star state the principal stables which had been making each season's history on the Grand and Great Western circuits. It was supposed that this feature of the fair was a permanent one. No whisper had reached the outside world to the contrary, and the announcement, coming as it did, among horsemen and in the turf world generally, has resembled the traditional bolt from a clear sky.

The causes of an action so surprising, so sweeping and so unprecedented must necessarily be, in large measure, occult. Various reasons are being advanced for what has been done at Dallas—none of which appears, on a prima facie basis, convincing. Perhaps the least convincing of all that have thus far reached our notice is one for whose authenticity we cannot vouch, but said to be official. It is, namely, that the directors have been forced to their decision because in the past six years the speed department of the fair has sustained a "net loss of over $100,000." We have referred to the reports of the meetings at Dallas held during this period (1909-1914, inclusive), as printed in the Year Books, and find that the total sum of money competed for in regular races there, exclusive of specials for records, and the like, foots up to but $123,650, all told. For this amount a total of no less than 719 trotters and pacers have competed. In former years a part of the program at Dallas has been for the runners, but this feature was eliminated some seasons ago when the anti-betting laws went into effect in Texas.

How there could be a "net loss" of "over $100,000" on $123,650 worth of races is something difficult to "figure out"—particularly when a total of 719 horses have paid starting fees to compete for that amount, while, manifestly, many hundreds of others have paid entrance fees and forfeits without starting—in 1914 alone a grand total of 732 entries were made to the Dallas harness races. There should, of course, be included in the cost of the racing program the expenses of advertising, salaries of officials, etc. But there should also be placed, as an offset, the major proportion of the gate and grand stand receipts paid by spectators. This latter item, we have reason to believe, those interested in curtailing or eliminating racing programs never take into their calculations at all—a proceeding utterly destitute of equity.

While we dislike to make the statement, many facts and figures coming to our notice during a long term of years have instructed us that the managers of most fairs depend upon the speed department to "pull them out of the hole" and "put over" their enterprise; but, at the same time, adopt a grudging attitude toward that very feature, from the financial standpoint. Not so very long ago the secretary of a prominent state fair complained to us that his speed department was "costing us too much." Upon inquiry, we found that his idea of "cost" was based exclusively upon the respective amounts paid in as entrance fees by the horsemen and that paid out to them as purse-winnings—and that nothing whatever was placed upon the credit side of the racing feature in the way of either gate receipts or grand stand admissions!

It is a very great rarity for a different attitude to be assumed. When it is, some very interesting facts are forthcoming. For instance, Race Secretary John A. King, of the New York State Fair, stated openly, over his own signature, in the Review of February 17 last, that "Our grand stand alone pays more than all the expenses incurred in the speed department." Now, if we compare the racing statistics at Syracuse and Dallas for 1914 we will find that the amounts competed for at both places were almost precisely similar. At the New York State Fair the program was worth $38,400, while at the Texas State Fair it was worth $38,600. However, at Syracuse there were only 12 races, but 63 starters, and but one week's racing; while at Dallas there were 29 races and 214 starters, and the racing extended over two weeks. We have no exact figures at hand for quotation, but according to report the attendance at Dallas last fall ran to 100,000 on the "big" day, while at Syracuse it was much less than half that much. In view of these things, the great discrepancy in the alleged net results, financially, at the two places, is inexplicable.

As a matter of fact, we do not believe any loss on the speed department at Dallas had anything to do with the action taken there. And we do believe that, instead of the racing there having caused a deficit, it has been a source of large profit to the enterprise. We predict, also, that the experiment of giving an exposition of the proportions which the Texas State Fair has assumed without a racing program will prove a failure and that the future will see the reinstatement of the speed department there with a prestige greater than ever.—Horse Review.

Entries for the Exposition Trots

April first was closing day for entries to the class races at the two big meetings to be held in June and November at the P.-P. I. E., and with but few exceptions the fields are generous in size and exceptionally high in class. Only five events at each meeting failed to receive sufficient patronage to justify them being declared closed, and these have been re-opened, to close on June 1, for fifty per cent of the original purse. Doubtless they will receive a more liberal entrance at that date, so that the original program may be given intact.

As our forms go to press fairly early in the week and recent eastern mails have been a bit uncertain, it is quite probable that more entries are on the way, and any arriving will be published next week. Here is the way the fields stand at present:

SUMMER MEETING—JUNE 5 to 19.

SATURDAY, JUNE 5.

No. 1—2:30 Class Trotting—$2000.

Golden State, b g by Stam B.—Zaya by Bay Bird. Blackwell & Hendrickson, Rocklin.
Major's By Guy, br h by Major Dillon—By Guy by Guy Wilkes. I. L. Borden, San Francisco.
Bon Cres, bl h by Bon Voyage—Kate Kopje by Cresceus. J. J. Campbell, Pasadena.
Blue Finch, br g by Spokane. Marvin Childs, Agt., Pleasanton.
Spriggan, b g by Baron McKinney—Helen Simmons by Simmons. V. K. Dunne, San Francisco.
Miss Quealey, b m by Moko—Silurian by Wilton. W. G. Durfee, Los Angeles.

Mirthful, b m by The Star of Patchen—Lizzie Belle Smith by Geo. Simmons. Thos. W. Murphy, Poughkeepsie.

The Woodland sale—next Thursday.

◈◈◈

Budd Doble ships to San Jose next week with nine horses from the Hemet Stock Farm.

◈◈◈

George Lowery, George Giannini and Dan Chapman of this city motored through the Dublin canyon to Pleasanton Monday to watch the workouts.

◈◈◈

Hugh Boyle has sent Ida M. 2:14 by Knight 2:22½, dam Kate H. by Nephew, to be bred to Onward McGregor (3) 2:23¼.

◈◈◈

W. C. Brown of Vancouver, B. C., has sent to Sutherland & Chadbourne at Pleasanton for training a nice two-year-old trotting filly by Nearest McKinney, out of a well bred dam.

◈◈◈

California horsemen all have a good word to say for the Alameda Butchers' Exchange picnic at Pleasanton July 4 and 5, owing to the nice program of harness races carded for the latter day.

◈◈◈

J. W. Marshall of Dixon has consigned two producing brood mares and three youngsters from "royal families" to the Woodland sale. Madeline Marshall, dam of R. J. MacKenzie's candidate for this year's pacing stakes, Zomblack, is in the list.

◈◈◈

Letter B. Jr. (dam of Cresto 2:12½) by Benton Boy has foaled a fine black filly by Tom Smith 2:13¼ and will be bred to Mahomet Watts 2:08¼. The little lady arrived on Easter Sunday and has been christened Easter Lilly.

◈◈◈

Loren Daniels, who since his return from the races last season has been quartered at the fair grounds at Sacramento, training the horses belonging to himself, Charley Silva and the estate of W. J. Miller of Chico, will take a stable of twelve head to the track at Woodland Stock Farm and there put the "finishing touches" to their preparation for the June meeting at the exposition and a campaign over northwestern tracks. This will make three first class stables in training at the Woodland track, all with extensive entries straight through the exposition programs.

◈◈◈

On our front page this week appears an excellent likeness of President Daniel E. Hoffman of the California Driving Club and the pair of trotting stallions with which he has cleaned up the classes for trotters to pole at the winter shows, Tom Smith 2:13¼ by McKinney 2:11¼ and Jonesie Mac by Carlokin 2:07½. The pair vary a bit in age, but mate nicely otherwise and make "a team as is a team" for road and show purposes. Dan is training Jonesie Mac for the late season in fun driving circles and the lad is making very nice progress, while Tom Smith may start a few times during the season himself, his owner declaring that he can hold his own with most of the matinee horses in his class for an occasional race.

F. W. Perkins of Willows, Cal., has sent to Pleasanton to be bred to The Proof (2) 2:29¾, the mare Rose Trix by Corbitt's Rose, dam Trix Marshall (dam of Mona Wilkes 2:03¼, Aerolite 2:06¾, Moortrix 2:07½ and four others) by Nutwood Wilkes. This is the dam of The Proof weanling that topped the Pleasanton sale in December for the age and was purchased by C. L. Crellin.

◈◈◈

Woodland Stock Farm is now the home of one of the real aristocrats of the junior delegation of trotters, Carrietta 2:18 by Directman having foaled a fine chestnut filly to the cover of Peter the Great 2:07¼. Great things are reasonably expected of the new baby, as Carrietta has produced four trotters, three of whom took track records as yearlings, each of them being the champion of his or her year, a record equaled by the produce of no other matron.

◈◈◈

M. L. J. 2:09½, the trotting son of Red Will 32948, that made a good campaign last year for Walter Breitenfield and wound up the season with two nice races in fast company at Phoenix, has been purchased by J. D. Callery, the traction magnate of Pittsburg, for matinee purposes. M. L. J. has the general characteristics of size, appearance and manners that are so prized in fun horses, and has the necessary punch at the end of the mile, judging by his Phoenix finishes.

◈◈◈

R. J. MacKenzie, whom business matters have kept "on the go" almost constantly throughout the season, arrived back on the coast Sunday and has been busily engaged this week visiting at Pleasanton Driving Park and entertaining numerous friends both at that place and here in the city. No man derives more genuine pleasure from the company of his horses than does Mr. MacKenzie, and as he has seen but little of them this year the present visit has been especially enjoyable.

◈◈◈

Martha Spy by The Spy, one of Mr. MacKenzie's most prized matrons, has foaled a spunky stud colt by Zomblack, the lad being the first one for that good son of Zombro and Madeline Marshall. Martha Spy is the dam of Anvilite, the MacKenzie entry for this season's two-year-old classics from coast to coast and about the best youngster ever seen at Pleasanton. His most recent work was a mile in 2:28 with the last quarter at a 2:08 gait, which even a knocker will admit is "passing fair" for early April.

◈◈◈

The Pleasanton birds are all a-twitter over a newcomer to Will DeRyder's stable—the two-year-old bay colt Electric Forbes by J. Malcolm Forbes 2:08, dam Allie Paine 2:18¼ by Rensslaer Wilkes 2:11¼, grandam Orphan Girl by Hope So. After Will had driven him from the establishment of his owner, L. M. Paine, at Cherrylands, Hayward, he was still so full of zip that he could hardly be unhitched, and the first time on the track showed a short brush at a forty gait. He is a big, husky fellow for his age, never handled save in breaking, and apparently a great prospect.

◈◈◈

Everybody knows that Lou Crellin is one of the most versatile men in the state, pretty handy and successful at 'most anything you care to mention, but the following item from the Pleasanton Times looks like he carried things to an extreme in endeavoring to be ultra-modern and at the same time following the tricks of a day gone by: "C. L. Crellin is going about this week with both hands tied up. On the one hand he had the thumb nail torn off in that new tractor which he recently purchased. On the other hand he has the flesh all torn off on account of lassoing an excited animal as it went by him. He threw the lasso and caught the animal. Unfortunately he attempted to hold it and the rope, slipping through his hands, tore the flesh from them." Notice two things—the gasoline mule must have been running, and the critter was successfully caught in the loop spread for it, and these were the two main considerations with Lou. Do you suppose he said "O. U. C." when somebody asked what the matter might be?

◈◈◈

California lost another good young trotter this week in Josephine Watts (3) 2:09½, the lass having been sold by Wm. G. Durfee and General C. C. Watts to Messrs. W. H. Hall and F. L. Stiles of Connecticut, whose "trotting horse interests" are united in the Clay-Cotton Stables, the name of which is an "out cross" of the business ventures of the gentlemen in question, Mr. Stiles being an extensive manufacturer of brick, while Mr. Hall's fancy runs to thread. They both have mutual interests in politics and horses, the partnership in the latter dating from days spent together in the legislative bodies of the Nutmeg state, and their latest acquisition is one of the best buys they have yet made. Josephine Watts, now four years of age, repeatedly showed 2:10 capacities as a three-year-old, and is good headed, good gaited and excellently bred, being by Gen. Watts 2:06¾ and out of the great brood mare Belle Andrews (dam of Silk Hat 2:09, etc.) by Billy Andrews 2:06¼, grandam Prospect Belle by Mambrino King. She will remain here until the eastern migration begins in June, when she will go to join the balance of the Clay-Cotton horses at Stafford Springs, Conn., in the hands of the well known eastern trainer Ed Gillis. Mr. Stiles, who is building a home in Pasadena and spends a great portion of his time in California, made the purchase in person, the price being the nice sum of $2500.

HEMET HORSES TO TRAIN AT SAN JOSE.

A recent letter from Budd Doble brings the welcome news that on next Monday, April 12th, he will ship north with nine horses that are to be raced this year by the Hemet Stock Farm, their present objective point being the driving park at San Jose, where training operations will continue until a few days prior to the June meeting here at the fair. The stable will include:

Wilbur Lou (3) 2:10¼, by Kinney Lou 2:07¾—Louise Carter (3) 2:24 (dam of three trotters) by Chestnut Tom 2:17¼, grandam Ingar (dam of five trotters, one pacer), by Director 2:17. Entered in the 2:10 trot, $20,000, and the 2:08 trot, $5,000, at the summer meeting, and the 2:10 trot, $20,000, the 2:08 trot, $5,000, and the 2:11 trot, $2,500, at the fall meeting. Champion yearling trotting stallion, 1910.

Hemet (3) 2:08¼, by Geo. W. McKinney 2:14¼—Lady Zombro 2:24¼ (dam of two trotters, two pacers) by Zombro 2:11, grandam Lady Woolsey (dam of three trotters, one pacer) by Woolsey 5337. Entered in the 2:06 pace, $20,000, and the 2:08 pace, $5,000, at the summer meeting, and the 2:06 pace, $20,000, and the 2:10 pace, $2,500, at the fall meeting. World's champion three-year-old pacing gelding, 1912.

Kinney de Lopez 2:23, by Kinney Lou 2:07¾—Betsey Direct 2:25¾ (dam of one trotter) by Direct 2:05½, grandam Kate Chapman (dam of two trotters) by Naubuc 504. Entered in the 2:20 and 2:18 trots, $2,000 each, at the summer meeting, and the 2:15 and 2:19 trots, $2,000 each, at the fall meeting.

Nealon (4), bay gelding pacer, by Nushagak 40448 (son of Allerton 2:09¼ and Eoka 2:16¾ by Sphinx 2:20½)—Nealy W. 2:27½ (dam of one pacer) by Geo. W. McKinney 2:14¼, grandam Lady Woolsey

Oro Lou (3), chestnut colt, pacer, by Kinney Lou 2:07¾—Zeta W. by Nutwood Wilkes 2:16½, grandam Zeta Carter (dam of Chestnut Tom 2:17¼) by Director 2:17. Entered in the three-year-old pace, $3,000, at the summer meeting, and the usual California futurities.

Sterling Lou (3), chestnut colt, trotter, by Kinney Lou 2:07¾—Louise Reed by Sterling McKinney 2:06¼, grandam Catinka 2:20½ (dam of two trotters) by Abbottsford 2:19½. Entered with Oro Lou, staked.

Dextro Lou (3), bay gelding, trotter, by Kinney Lou 2:07¾—Nealy W. 2:27½, as above. Staked.

Martin Lowe (3), brown gelding, pacer, by Kinney Lou 2:07¾—Lena Lowe 2:27½ by Geo. W. McKinney 2:14½, grandam Chestnutwood (dam of one trotter) by Judge Salisbury 5872. Staked.

Allie Lou (3), brown filly, two-year-old record 2:25, trotter, by Kinney Lou 2:07½—Lady Zombro 2:24¼, as above. Entered in the three-year-old trot at the June meeting, $5,000, and liberally staked.

This nice lot of youngsters and older campaigners will make quite an interesting addition to the colony at San Jose, and their coming will be warmly welcomed. Both Mr. and Mrs. Doble have a large circle of friends at the Santa Clara metropolis, and their sojourn there will doubtless be both pleasant and profitable.

ANGELENO FILES CLAIM ON EXPOSITION STAKES AND PURSES.

Los Angeles, April 3, 1915.

With all the cracks of the stables of Lon McDonald, Al Whitney, Will Durfee, Jim Stewart, Fred Ward and others headed for the Exposition track at San Francisco at a date set for early in May, affairs at Exposition Park are beginning to warm up in earnest and before leaving here, about all the fast birds will have had miles in 2:10, or thereabouts, some of them faster. Workout days draw good crowds regularly, and not for a long time has there been a keener interest displayed in the trotter and pacer by the local population. The track has been in Grand Circuit condition all winter, and the California brand of weather has kept the horses from east, north and west in the very best of shape.

There are candidates here for all the big stakes and purses at the exposition—not "cellar champions," but candidates for the position at the head of the summary, and whoever gets away with the coin is going to have company in his journeys from wire to wire. On the face of it, it looks from past performances as though Dr. Burns Jr. should have the edge over his field in the 2:06 pace, but there are others right here that will be "somewhere about" when the Doctor cashes—if he does cash. White Sox, the converted trotter that forced Clara Mac to her record last year, is working in great shape for Will Durfee, and Sam Watkins is making great headway with Little Bernice 2:06¼, who forced William to step to a world's record twice in succession at Peoria as a three-year-old. Margot Hal 2:04¼, in the McDonald stable, may also be seen in the same race, as she is eligible on time allowance and is showing well. Doctor Burns Jr., who carries a lot of wise money, never was better, to all appearances, and as the Doctor's best is "something awful" he is causing his rivals' owners some apprehension. Started seven times last season, three times over the half-mile tracks in Michigan and four times on the Grand Circuit, he was seven times second, forcing William to pace in 2:02 at their first meeting at Cleveland, in 2:05 at Detroit, and in 2:00½ and 2:02½ at Grand Rapids. At Kalamazoo he was second to Walter Cochato in the race in which that speedy sidewheeler got his present tag of 2:02¼ in the third heat, and was then laid away for 1915. He is working around 2:12 at present, and his owners, A. G. Ireland of Chicago and W. P. Leach of Cleveland, think so well of him that offers of ten thousand dollars are of no interest at all. Nor is this the whole local representation for the big pacing stake, as Jim Stewart and Homer Mac are evidently a pair that have never been strung out to their limit and nobody knows just how good they are. Homer is one of the iron kind, as he raced all summer and a good part of the winter and is today as fit as a fiddle. Just the other day he turned the full distance in 2:06 with the last half in 1:00½, which is "some" mile for this time of the year. Looks like Los Angeles had a real claim to some of that twenty thousand, doesn't it?

Don't overlook the fact, too, that we will be there with the bells on for the 2:10 trot, the colt stakes, and the class races. Durfee, Kirby and McDonald already have entries in the big trot that are doing everything asked from them, and June first may see another entry or so in the same event from this quarter. Will Durfee and Fred Ward will represent us in the colt stakes, and every stable that goes to the fair will have entries clear through the program.

You can make up your mind to this, folks—we don't intend to be mean, or hoggish, or anything of the kind, but we are simply going to have some of that money—the more the better. See you when we come up in May. —ANGELENO.

PACIFIC BREEDERS FUTURITY STAKE No. 13.

The following is a list of seventy-five fifth payments made in the Pacific Breeders Futurity Stake No. 13, for foals of 1913,—now two-year-olds. The two-year-old divisions of the stake are scheduled to take place at the fall meeting of the Panama-Pacific International Exposition, Oct. 30 to Nov. 13, the two-year-old trot on Tuesday, Nov. 2, and the two-year-old pace on Thursday, Nov. 11:

H. G. Angevine's br c Jake Logan by Nearest McKinney, dam Berta Logan by Bert Logan.
L. A. Bangs' ch f Queen Esther by Wm. Harold, dam Dolly B. by Welcome.
L. E. Barber's b c Jack McDonald by Bon McKinney, dam Jane McCrea by Nutwood Wilkes.
I. L. Borden's b f Cherry B. by Barney Barnato, dam Ella G. by Hambletonian Wilkes; b g Alexandro by Barney Barnato, dam Ramona by Prince Robert; rn f Alabama by Barney Barnato, dam Directola by Direct.
L. H. Brittain's b f Mono K. by Nutwood Demonio, dam Caromia King by Valencia King.
Chas. Butters' b f Jessie Butters by The Bondsman, dam Lottie Lynwood by Lynwood W.
J. J. Campbell's b c Baron C. McGregor by The Bondsman, dam Kate Kopje by Cresceus.
C. H. Chandler's b f Lou Mason by Gerald G., dam Lady Search by Searchlight.
S. Christenson's b c Natalday by Wilbur Lou, dam Ella J. by Bob Mason; b f by The Bondsman, dam Silver Haw by Silver Bow.
Cave J. Couts Jr.'s br f Miss Kenneth by Kenneth C., dam Black Bess by Bohida.
S. H. Cowell's b c Sacramento Boy by Henry Nutwood Jr., dam Charmion by Nutwood Wilkes.
G. Cuneo's rn c Bond Boy by The Bondsman, dam Provoline by Chas. Derby.
L. B. Daniels' b c Stanley Quinn by Dan Logan, dam Lady Arthur by Sir Vaux.
E. R. Dunn's b c The Puzzler by Cochato, dam Baroness Maid by Baron Wilkes; b f Virginia Humbug by Cochato, dam Fanny Wiggins by Wiggins.
W. G. Durfee's ch c by Manrico, dam My Irene S. by Petigru; b f by Carlokin, dam Alexandria by Bon Voyage; b f by Carlokin, dam Atherine by Patron; bl f by Manrico, dam Subito by Steinway; ch c by Manrico, dam Ophelia by Petigru; br c by Carlokin, dam Miss Queeley by Moko; br c by Manrico, dam Zephyr by Zombro; b c by Copa de Oro, dam Leonor McKay by McKinney.
W. W. Gallup's br f Sadie Spiers by Directum Spier, dam Maggie Hall by Moko.
E. A. Gammon's b f Miss Axworthy Dillon by Axworthy, dam Cleo Dillon by Sidney Dillon.
Hemet Stock Farm's bl c Don de Lopez by Kinney de Lopez, dam Eradiate by Geo. W. McKinney; b f Fiesta Lou by Wilbur Lou, dam Fiesta Queen by On Stanley; ch f Goldsmith Lou by Wilbur Lou, dam Little Louise by Boodle; ch f Gertrude Rives by Wilbur Lou, dam Nealy W. by Geo. W. McKinney; ch c Billy Boyd by Wilbur Lou, dam Lady Zombro by Zombro.
N. A. Holaday's b g Dictatus Jay by Alconda Jay, dam Dictatus Belle by Dictatus.
S. H. Hoy's b c Peter Pierre by The Bondsman, dam Burnside by Antrim.
Mrs. Mabel Lipson's ch c Stewart S. by Chestnut Tom, dam Myrtle Ragan by Col. K. R.
Leo Lynch's b c Dr. Dyer by Vernon McKinney, dam Reubic by Elyria.
J. S. Maben's bl c Apropos by Carlokin, dam Zomzar by Zombro; b f Maybine by El Carbine, dam Lillian Welborn by St. Vincent; b c Marssham by Donasham, dam Eugenia B. by Zombro.
R. J. MacKenzie's b c Anvilite by The Anvil, dam Martha Spy by The Spy.
Frank Malcolm's b f Miss Bond by The Bondsman, dam Miss Harris by Sidney Dillon; b c Fresno Bond by The Bondsman, dam Fresno Girl by Seymour Wilkes.
Chas. R. Marley's br f The Expense by The Proof, dam Nusta by Nushagak.
J. W. Marshall's br f Verna McKinney by Vernon McKinney, dam Ramona by Demonio.
Capt. C. P. McCan's br f Hazel Bond by The Bondsman, dam Hazel Patchen by The Patchen Boy.
Al McDonald's b c Surety by The Bondsman, dam Eva H. by Washington McKinney.
Josh Merrill's b f Kockalevitch Bond by The Bondsman, dam Miss Orlena by Ormonde.
Estate of W. J. Miller's b f by All Style, dam Katalena by Tom Smith; b c First National by Dan Logan, dam Lula Mc by Arthur Wilkes.
J. E. Montgomery's b f Carolyn by Lock Logan, dam Trilby Maid by Black Ralph Jr.
R. D. Morrison's b f Selma Paley by Wilbur Lou, dam Stambia by Stam B.
Nesmith & Sons' b f Clay Pointer by King Lilly Pointer, dam Bedelia Clay by Clay Edwin.
A. L. Scott's b f Lady Bondillon by The Bondsman, dam Weatewater by Sidney Dillon; b f Rosie Bond by The Bondsman, dam Rosie Woodburn by Easter W.
J. A. Scott's ch f Kitty Nearest Smith by Nearest, dam Lady Smith by Tom Smith.
W. L. Selman's br f Lelia Mack by Leland D., dam Bessie Mac by Herman.
M. Senter's bl c Sidney Borden by Guy Borden, dam Minnie Mc by Athadon Jr.
T. D. Sexton's br f Lucretia Bond by The Bondsman, dam Lucretia Alto by Nazote.
C. F. Silva's br c by Lijero, dam Queen S. by Sable Wilkes.
F. B. Stockdale's b f May May by Athasham, dam Guide Leetice by Calif. Guide.
Henry Struve's br c Ivan Jay by Alconda Jay, dam Ivoneer by Eugeneer.
Chas. H. Thomas' b f Donna de Lopez by Kinney de Lopez, dam Viola by Geo. W. McKinney.
L. H. Todhunter's bl f Jet Moko by Moko Hall, dam Osmuda by Bon Voyage.
Frank Trainor's b f Catherine T. by The Proof, dam Decoratio by Prince Ansel.
D. W. Wallis' ch f Patti C. by El Angelo, dam Mary W. by Dictatus; b f I. M. by El Angelo, dam Record Searcher by Searchlight.
Geo. L. Warlow's ch f Ludie McKinney by Stanford McKinney, dam Gadsky by Athablo.
Dr. E. J. Weldon's b c Ligeros by Lijero, dam Mater Expedio by Knight.
Chas. W. Winter's b c Alhambra Duke by Alhambra Prince, dam Ezelda W. by Del Coronado.
Fred Woodcock's br c Capt. Mack by The Bondsman, dam Bessie L. by Montana Director.
Woodland Stock Farm, Inc's b c Jim Hardman by Directum Spier, dam Ila Moko by Moko; ch f Sadie Ansel by Prince Ansel, dam Lauress by Mendocino; br c Joe Watkins by Kentucky Todd, dam Fair Recluse by Moko.
M. L. Woy's b f Lulu B. by The Bondsman, dam Loma B. by Stam B.

LANARK PARK STABLE AT PLEASANTON.

Another good bunch of trotters and pacers has been quartered at Pleasanton since last Saturday, when the well known San Joaquin trainer, M. Henry, arrived there with a number of well bred green ones from the establishment of R. S. Irvine—Lanark Park, midway between Riverbank and Modesto. Mr. Henry will not race until late, if at all this season, but will remain at Pleasanton until fall, and possibly through the winter, educating the boys and girls brought over from the valley, most of which have been jogged lightly through the winter, on the road or over the half-mile track at Lanark Park.

The "female persuasion" is largely in the majority, as six of the eight brought over for training purposes are mares. The only stallion is the three-year-old bay colt Lanark P., by Zorankin (2) 2:29¾, dam Bloom by Nushagak, and the geldings have but one representative, the five-year-old black fellow, Alick by Frank C. (son of Gossiper 2:14¾), dam Hulda Cropsey by Guide 2:16¼, grandam Alice R. (dam of three trotters, one sire, two dams, etc.) by Naubuc 504. Hulda Cropsey is a full sister to Cyrene 2:27½ (dam of Castanada 2:09¾) and is herself a proven speed producer, being the dam of Will Guthrie, that worked the Pleasanton track for Mr. Henry right at 2:07 prior to his sale to Tom Pollock of Flagstaff. Both Lanark P. and Alick are pacers, the former with two-year-old work in 2:28 to his credit, and the latter just broken last fall.

Two of the girls of the stable are just well broken pacers out of Hulda Cropsey, one California Poppy by Selah McKinney, and the other True by Bonnie Direct 2:05¼, sire of Bonalet (3) 2:09¼, etc. Forgetmenot, also a daughter of Bonnie Direct, is out of Thera by Albion, and while just broken last fall worked nicely at the trot in 2:28. Sonnatine, a seven-year-old chestnut trotting mare that worked last year in 2:22½, is a product of the Warlow establishment at Fresno, being by Stanford McKinney out of Sextette by Athablo 2:24½.

Two five-year-old mares that are closely related to some great performers are Alla Moscovita and Beretta Dee, both of whom ran out all winter and were taken up just prior to leaving home. The former is a trotter with earlier work in 2:32¼ as a two-year-old and 2:21½ as a four-year-old and is a daughter of Henry Helman's son of Jay Bird, Alconda Jay, and out of La Moscovita (dam of Bon Guy (3) 2:11¼, Yolanda 2:14¼ and Winnie Bond (2) 2:27) by Guy Wilkes. Beretta Dee, with a two-year-old pacing trial of 2:22¼, four-year-old 2:16½, is by Charley D. 2:06¼ and out of Beretta 2:22½ (sister to C. The Limit 2:03¼) by Searchlight 2:03¼, grandam Bertha (dam of thirteen performers, five in 2:10) by Alcantara 2:23. Both Alla Moscovita and Beretta Dee live up to their pedigrees as individuals, and promise to do so as performers.

In addition to the above mentioned horses, Mr. Henry brought from the ranch the brood mares Bloom by Nushagak, dam Redflower by Mayflower, and Beretta 2:22½, both with exceptionally nice foals at foot by The Bondsman. They will be bred to some of the stallions in service at Pleasanton before being returned home, though which ones has not yet been decided.

Colorado has many breeding ranches of great national prominence, where the standard bred horses are recognized as equal to those of any of our sister states. The larger ones are those of A. G. Gumaer of Florence, Doll Brothers of Gypsum, the MacRose Stock Farm of Littleton, A. L. Camp of Greeley, and O. H. Sholes of Holyoke, but there is scarcely any city or town but has one or more standard bred stallions or mares. The next great breed in Colorado is the thoroughbred; but in this blood we are somewhat lacking, and until very recently there were not many breeders. However, in the last two or three years quite a few thoroughbred stallions and mares have been purchased by Colorado horsemen. One of the finest types of the thoroughbred horse in America is owned at Rocky Ford, Fayette, the son of the great Ogden and Saratoga Belle, and this year some of his sons and daughters will be seen at our races. The great thoroughbred, Skillful, is owned at Greeley and Mrs. K. Williams of Hayden recently purchased the thoroughbred stallion Labold, so what we lack in quantity we make up in quality.—Field and Farm.

Drink Jackson's Napa Soda.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

CURIOUS ANIMAL WEAPONS.

Strictly speaking, the only weapons of vertebrates are teeth, claws, horns and spurs. Horns belong only to the ruminants, and the spur is an uncommon weapon. There are many animals in which teeth and claws are not suited to inflict injury, or in which the proper instincts and courage to use and develop them are absent, and these animals seem to be in a very defenceless state. In one sense they are defenceless, but they are in no worse position than the well-armed species, because they have either a protective coloring, or greater swiftness, or cunning to assist them in escaping from their enemies. And there are also many of these toothless and clawless species which have been provided with other organs and means of offence and defence out of Nature's curious armory.

There is a decided probability that such distinctive weapons as horns, spurs, tusks and spines would be far more common in Nature if the conditions of life always remained the same. But these things are perfected very slowly, and conditions are continually undergoing alteration. Climate, soil and vegetation vary; foes and rivals diminish or increase; the old disappear, and others with different weapons and a new strategy take their place. Just as a skilful man man can turn his implements into weapons, in case of unexpected attack, and for everything he possesses discovers a use never contemplated by its maker, so does Nature—only with an ingenuity exceeding that of man—use the means she has to meet all contingencies, and enable her creatures, seemingly so ill-provided, to maintain their fight for life. Natural selection can make a weapon of anything, and the mucous secretions which the largest species of wild llama "huanco" or "quanaco" discharges into the face of an adversary, and the pestilential drops peculiar to the skunk, are weapons that may be as effectual in defensive warfare as spines or fangs.

No more remarkable example of the adaption of structure to habit exists in the animal kingdom than that of the hairy armadillo (Dasyphus villosus), which is found in Argentina and other South American countries. This animal appears like a South American ant-eater saddled with a dish cover. Nevertheless, with the cunning which Nature has given it to supplement its deficiencies, it has discovered in its bony encumbrance a highly efficient weapon of offence. Most other toothless creatures hunt by daylight and are insectivorous, some feeding only on ants. They have unchangeable habits, very limited intelligence, and vanish before civilization. The hairy armadillo alone has struck out for itself. Like its fast disappearing congeners, it is an insect-eater still, but does not, like them, seek its food on the surface and in the ant-hill only. All kinds of insects are preyed upon, and by means of its keen scent it discovers worms and larvae several inches beneath the surface. Its method of taking worms and grubs resembles that of probing birds, for it throws up no earth, but forces its sharp snout and wedge-shaped head down to the required depth. While working, it probably moves round in a circle, for the hole which it makes is conical, although the head of the animal is flat. Where it has found a rich hunting-ground, the earth is marked by hundreds of these neat symmetrical bores. It is aslo an enemy to ground-nesting birds, being fond of eggs and fledglings. When unable to capture prey, it will feed on carrion as readily as a wild dog or vulture, returning night after night to the carcass of a horse or cow as long as the flesh lasts. Failing animal food, it subsists on vegetable diet, such as clover and grain.

It is, therefore, by no means strange that at all seasons, and even when other animals are starving, the hairy armadillo is always fat and vigorous. In the desert it is diurnal, but where man appears it becomes more and more nocturnal, and in populous districts does not go abroad until long after dark. Yet when a district becomes thickly settled it increases in numbers—so readily does it adapt itself to new conditions. It is not to be wondered at that the gauchos (natives) should make this species the hero of many of their fables, representing it as a versatile creature, exceedingly fertile in expedients, and duping its sworn friend, the fox, in various ways, just as "Brer Rabbit" serves the fox in our own stories.

The hairy armadillo will, no doubt, long survive all the other armadillos, and for this reason it will have an ever-increasing interest for the naturalist. An Argentine cattle-breeder has given the following account of an encounter he witnessed between an armadillo and a poisonous snake. While seated on a hillside he noticed a snake, about twenty inches in length, lying coiled up on a stone five or six yards beneath him. In a short time a hairy armadillo appeared trotting directly toward it. Apparently the snake perceived and feared its approach, for it quickly uncoiled itself and began gliding away. Instantly, the armadillo rushed at it, and having placed itself upon it, began swaying its body backward and forward with a regular sawing motion, thus lacerating its victim with the sharp, deep-cut edges of its bony covering. The snake struggled to free itself, biting savagely at its aggressor, for its head and neck were disengaged. Its bites, however, made no impression, and very soon its head dropped, and when its enemy removed its body, the snake was dead and very much mangled. The armadillo at once began its meal, taking the tail in its mouth and slowly progressing toward the head; but when about a third of the snake still remained it seemed satisfied, and, leaving that portion, trotted away.

Altogether, in its rapacious and varied habits this armadillo appears to have some points of resemblance with the European hedgehog; and, perhaps, like the little mammal it resembles, it is not harmed by venomous snakes.

Cats have been known to kill all the snakes they could find, purely for sport, as they have systematically refrained from eating them. They jump nimbly around and across their victim, occasionally dealing it a blow with their claws.

The enemies of the snake are legion. Burrowing owls feed largely on them; so do herons and storks, killing them with a blow of their javelin beaks, and swallowing them whole.

The sulphur tyrant-bird picks up the young snake by the tail, and, flying to a branch or stone, uses it like a flail until its life is battered out.

In arraying such a variety of enemies against the snake, Nature has made ample amends for having endowed it with deadly weapons. In addition, the power possessed by venomous snakes only seems to us disproportionate; it is not really so, except in occasional individual encounters. Venomous snakes are always greatly outnumbered by non-venomous ones in the same district. The greater activity of the latter accounts for more in the result than the deadly weapons of the former.

The large teguexin lizard, called "iguana" by South Americans, is the great snake-killer. Snakes have, in fact, no more formidable enemy, for he is quick to see, and swift to overtake them. He is practically invulnerable, and deals them sudden death with his powerful tail. The country people in Argentina say that dogs attacking the iguana are sometimes known to have their legs broken. A farmer relates that when riding after his cattle not a hundred miles from Buenos Ayres, having attached one end of his lasso to the saddle, he let the remainder drag along the ground. After a time he observed a large iguana apparently asleep in the sun, and although he rode very close to it, and did not move; but no sooner had he passed it than it raised its head, and fixed its attention upon the many feet of lasso slowly trailing along. Suddenly it rushed after the rope, and gave it a succession of violent blows with its tail. When the whole of the lasso, several yards of which had been pounded in vain, had been dragged past, the lizard, with uplifted head, continued gazing after it with the greatest astonishment. Never had such a wonderful snake crossed its path before!

The toad is a slow-moving creature that puts itself in the way of persecution; yet, strange to say, the acrid juice which it exudes when irritated is a surer protection to it than venomous fangs are to the deadliest snake. Toads are, in fact, with a very few exceptions, only attacked and devoured by snakes, lizards, and by their own venomous relative, Ceratophyrs ornata, the "escuerzo." It is possible that the cold, sluggish natures of all these creatures protect them against the toad's secretion, which would be poison to most warm-blooded animals, but it is not certain that all fish enjoy a like immunity, for some marine forms of life have been found dead very soon after swallowing a toad.

The country people in some parts of South America believe that the milky secretion exuded by the toad possesses wonderful curative properties. It is their invariable specific for shingles—a painful malady common among them—which is cured by the application of living toads to the inflamed part. Some physicians may laugh at this cure, but the medical profession has in past times laughed at other remedies used by the vulgar, which now have honorable places in the pharmacopœia. More than two hundred years ago—very ancient times for South America—the natives of Spanish descent known as "gauchos" were in the habit of taking the lining of the rhea's stomach, dried and powdered, for disorders of the digestion. This remedy is still popular. Science has now been converted to the layman's opinion, and the ostrich hunter now makes a double profit, one from the feathers, and the other from the dried stomachs, which he sells to the pharmacists of the capitals of the various South American countries.

The Ceratophrys ornata referred to as venomous, does not possess teeth specially adapted to inject poison into the veins, like those of a serpent. It is a curious creature, known as "escuerzo" in the vernacular, and, although beautiful in color, it is most unattractive in form. The skin is of a brilliant green, with chocolate-colored patches, oval in shape, and symmetrically disposed. The lips are bright yellow, the cavernous mouth pale flesh color, the throat and under-surface dull white. The body is lumpy, and about the size of a large man's fist. The eyes, placed on the summit of a disproportionately large head, are embedded in horn-like protuberances, capable of being elevated or depressed at pleasure. When this toad is undisturbed, the eyes, which are of a pale gold color, look out as from a couple of watch towers, but when touched on the head or menaced, the prominences sink down to a level with the head, closing the eyes completely, and giving the creature the appearance of being eyeless. The upper jaw is armed with minute teeth, and there are two teeth in the center of the lower jaw, the remaining portions of the jaw being armed with two very sharp-edged bony plates. In place of a tongue, it has a round muscular projection, with a rough flat disc the size of a fifty-cent piece.

This creature is common all over the vast treeless plains called pampas. In the breeding season both sexes congregate in pools, and anybody who has ever heard them cannot help remembering their extraordinary vocal powers, which they exercise at night. The performance in no way resembles the series of sounds uttered by most batrachians. The notes are long, as of a wind instrument, not unmelodious, and so powerful as to make themselves heard distinctly a mile off on still evenings. After the amorous period these toads retire to moist places and remain inactive, buried just deep enough to leave the broad green back on a level with the surface, and it is then far from easy to detect them. In this position they will wait for their prey—frogs, toads and birds. Often they capture and attempt to swallow things too large for them, a mistake made by snakes. In very wet seasons they sometimes come around houses and lie in wait for chickens or ducklings. In disposition they are fierce, savagely biting at anything that comes near them; and when they bite they hang on with the tenacity of a bull-dog, poisoning the blood with their glandular secretions. When teased, the escuerzo swells itself to such an extent that one expects to see it burst. It follows its tormentor about with slow, awkward leaps, the great mouth wide open, emitting incessantly a harsh, croaking sound.

Natives have been bitten by the escuerzo. In one case a gaucho sat down on the grass, and dropping his hand at his side, had it seized, and only freed himself by using his hunting knife to force open the toad's mouth. He washed and bandaged the wound, and no bad result followed; but the consequences may be different when the animal cannot be shaken off, for horses have been found dead with the vicious toad, also dead, having its jaws tightly closed, hanging on to the skin of the unfortunate quadrupeds. It is possible, of course, that Ceratophyrs ornata at times destroys itself in its savage attacks by an inability to let go at will.

PASSING OF THE SMOOTH FOX TERRIER.

The collapse of the smooth fox terrier as an important factor at dog shows in this country is one of the remarkable incidents in kennel world history. Since shows were first introduced to within four or five years ago this variety ranked as one of the leading, if not the leading, breed at all doggy gatherings. Now, and indeed for at least two years, its representation has been such as to warrant bench show committees seriously contemplating the reduction of the classification to a level of those breeds seldom represented by more than three or four specimens.

The curious phase of all this is that the individuality, the temperament and the appearance of the smooth fox terriers have not changed to the degree which would warrant such a complete collapse.

The reason is not due to the decadence of the dog itself, but to the fact that competition for something like the last ten years has been stunned. It is another case of one concern gobbling up everything in sight. In this instance it is the case of a large kennel monopolizing the prizes practically all over the country. The smaller concerns scattered over different points of the compass have become heartily sick of playing poor second fiddles at every minor show within reasonable haul of their quarters. They have either abandoned dog shows altogether or have taken up a breed competition which is not monopolized by one kennel.

Even if this policy of cleaning up all the prizes at practically every show east of the Rockies were desisted from, those who would return to the fold would be in a quandary to find suitable stud dogs. On this question, Fox Hills offers a communication in a New York daily, which reads as follows:

"I think it will be admitted by those who have kept in close touch with the smooth fox terrier that never since it first became popular here has it been in such a deplorable plight. While the causes are plain to those who look deeper than the surface, it is with a view to, if possible, restore things I write this.

"In England the breed is as strong numerically as ever and is especially rich in good bitches. Its dogs, however, by comparison, are much below the standard—so much so that breeders there have even resorted to a 'wire haired' infusion.

"Although always associated with the rougher coated variety, I have always more closely followed the effects of 'blood lines' in the smoother variety.

This for the reason that the 'smooth' in its relation to the 'wire' is as the thoroughbred to the hunter or hackney.

"Observation led me many years ago to the conclusion that continuous breeding of 'wire' to 'wire' led to the establishment of a common finish over the hips, a common quality, and shape of ears, and from these a tendency to commonness generally. In other words, the 'class,' 'quality,' smooth 'finish' over the hips intense character has to be obtained from the 'smooth.' For this reason I have always advocated a judicious infusion of certain smoother 'blood lines' for the purpose of producing the same high class character in 'wires' as is to be seen in the 'smooths.' I have never until now, however, considered a reversal of the order of things of the slightest benefit to the 'smooths.' My ideas on this have been the other way and rather acting as a taint than otherwise.

"Confining myself to the smooth variety in this country, the question presents itself, 'Where is there a dog with the right 'formation' and 'sufficiency' of bone which will transmit it without also transmitting common, uncharacteristic heads, coats of all lengths and textures but that desired and other objectionable features which have been handed down to him by an ancestor whose name appears far too frequently in ninety per cent of the smooths today?

"On the other hand, if one tries to avoid this particular ancestor and sticks to the 'line' type, character, 'top' and style, one is confronted with length of pastern, lightness of bone below the knee, apathetic ears, thin open coats and a tendency to oversize. Thus the 'smooth' breeder is between the devil and the deep sea.

"I know Loxenside Lake will be pointed out as an illustrious example of the 'wide' infusion, and, therefore, a solution of the problem. Of this I am skeptical, however, as the 'wide' infusion on him is, in my opinion, through an undesirable channel to that great 'wire' terrier, Sylvan Result. This channel to me could not possibly be a beneficial medium toward improving 'formation' of bone or texture of coat.

"The only means by which the 'wire-haired' infusion could benefit his smooth cousin would be to discover a 'wire' dog with smooth ancestors of undisputed merit running through his veins.

"There are plenty of 'wires' today with 'smooth' blood of a sort back of them. This was the case with the Duchess of Newcastle's earlier terriers, but the 'smooth' blood in them gave one the shudders. Some notable winning rough coated specimens from the Totteridge Kennels had a smooth infusion, but it was not the smooth blood calculated to be of any lasting value. Southboro Salex, high class and beautiful terrier as he was, cannot be regarded as a success at stud. He was out of a dam with what one might justly call common 'smooth' blood in her. And it is because common, second rate smooth blood has been resorted to, and not high class 'smooth' prize winners, that the majority of 'wire' breeders condemn 'smooth' blood.

"Yet of all the high class terriers I have known none has approached Raby Dazzler. In fact he is the only 'wire,' to my mind, who, given the correct coat for a 'smooth,' would stand out as a champion of champions.

"In other words he is an ideal 'smooth' with a wire haired jacket. This is what George Raper, Heywood Field and all old 'wire' enthusiasts have been looking for. And Dazzler gets this legitimately. His sire, Coltman Jack, is out of a bitch by the smooth dog Melford Rattler, not to be confused with Melford Terror, sire of Sabine Ruler. Dazzler's dam is out of a bitch also by Coltman Jack. Melford Rattler was out of Melford Molly, one of the most beautifully moulded bitches ever shown, and she in turn was out of Hunton Scoamke, herself a lovely model, and a matron justly entitled to rank among the greatest matrons of any time.

"It is through these two great bitches that, in my opinion, Raby Dazzler gets his 'super' formation of bone—for a 'wire'; his beautiful finish, top and 'poise' generally.

"His sire is by Sylvan Result, and his dam's sire is also by Sylvan Result. It is this which gives him 'the' expression and 'the' character.

"I have gone to this length because, in my opinion, Dazzler, of all 'wires,' seems by nature to have been selected as the salvation for smooth breeders, if it is intended by nature that the breed is to be restored by a 'wire.'

"That this is quite likely the success of the smooth puppy Ridgeway Envoy at New York may be taken as an omen. Envoy, I would point out, is by Dazzler's younger brother, Ridgeway Baffler.

"If 'smooth' breeders who read this question the advisability of breeding to either Dazzler, Baffler or Envoy, I can only say the results of such a union could not be worse than those resulting from a union with a smooth dog. Furthermore, the bitches from such a union should prove invaluable mates for a 'wire' dog if the breeder were not satisfied to continue further with it for producing 'smooths.' If he did continue, however, the most suitable sires should be found in a dog who in the direct male line went back to Visto."

—o—

Boston Terrier Brings $1,500.—E. R. Wilbur recently purchased the Boston terrier, Clifton Star, from George F. Parker for a price said to be $1,500. This is the largest figure that has been paid for a dog of this breed in some time.

—o—

Drink Jackson's Napa Soda.

NATIVE DOGS OF OTHER COUNTRIES.

The Dingo is a native of Australia, called the Warrigle in that country, and, like the aboriginal native, is almost extinct, except in the wild interior of the country. He was formerly a menace to the stock farmer, and so a poison bait and traps were set, and the government, too, made a crusade against him.

The Dingo, like most wild dogs, resembles the wolf—but it is said that he can be trained to docility, and then he will exhibit great affection and intelligence—even greater than the domestic breed.

Next we have the kangaroo dogs, bred from the collie crossed with other breeds, and this interbreeding has produced a very capable dog of a definite type.

The Kelpie is the Australian sheep dog, a useful fellow in which it is possible to take pride.

The gazelle hound is in Persia called the "slugi" or the "tazi," this word meaning Arabian; horses are termed tazi also. The slugi is valued by the Arab. He speaks of him as "el-hor," the noble, and he is regarded as a dog of high degree. He has always the freedom of the tent and lies at the feet of his master. The children love and decorate him with rows of shells, gay colored beads and ornaments and he wears a sacred talisman around his neck to ward off the evil spirits, of which there seem many in the land of myth and mystery. "Ah! he is a gentleman indeed; he has been brought up with a slugi," is one of the Arab proverbs.

The Rampoor hound is a native of northern India, powerful in build, large boned, very swift and useful in hunting the wild jackal and running down the big game in the wild regions of India.

French staghounds, "le chien de French-Comte," the Vendean hound, the griffon Nivernaise and "le chien de Gascogne," all belong to France, which has preserved the old traditions of the ancient chasse more than any other country of the world.

The Medalan is a Russian bear hound resembling the mastiff more than he does the Great Dane, and is a very powerful strong dog.

The Samoyede is a Siberian, and is courageous and faithful. He is a dependable character and has become the draught dog in the region where he lives.

The Podengo is a native of Spain and Portugal. He is good for field work, but has a surly and vicious temper.

The Phu Quoc dog is indigenous to the island of that name in the Indo-China Sea, and is rapidly becoming extinct. The type somewhat resembles the leggy smooth Chow, but he has a curious coat near his shoulders, the hair all pointing toward his head. They are intelligent, and this story is told of one, who when teased by a European dog seized his tormentor by the head and neck, dragged him to a nearby pond and held him under the water until life was ended.

Italy has a dog known as the Spinone and is considered an ancient dog. He runs with the guns. Some of these dogs were taken to France in the reign of Henry IV. of France and the cross breed became valuable.

Central Asia has the Lhassa terrier, which is not unlike the Maltese terrier, which has been badly cared for and the silky coat allowed to tangle and get yellow. They have the reputation of being taciturn, but when well bred and brought up are wonderfully wise and devoted.

The Komondor is the Hungarian sheep dog and guards the flocks on the broad plains of Hungary from the depredations of the hungry wolf. The dogs of the Abrussi in Italy might pass for the Komondor, they are so much alike.

—o—

British prejudice against Germany has been turned even against the kind of dog that bears "the unfortunate name of dachshund," complains a writer in the London Daily Mail, who says: "May I protest against the cruel and senseless manner in which some people are treating the unfortunate turnspit dogs because these poor dumb friends have been called by the German name of dachshund. These dogs, although very popular in Germany, are our old English turnspits, used in bygone days to turn, by means of a wheel, the roasting jack in the same way as the donkey at Carisbrooke Castle draws water from the well. On account of their name these dogs are now being treated not as enemy aliens to whom we are unpatriotically lenient, but most unjustly."

* * *

Andrew Albright, Jr., was not long in filling the vacancy in the Baughfell Kennels caused by selling Champion King Oorang to Mrs. Anita Baldwin, of Rancho Santa Anita. He has just imported Cyprus Cadet, winner of thirty first prizes at three shows in England, which has taken five firsts and reserve for challenge prize at Manchester, besides six firsts and special for best Airedale at Blackburn show and winner of championship certificates at Crufts and Birmingham under such judges at Holland Buckley, R. T. Baines and J. G. Horrocks.

* * *

A. J. Molera, owner of the El Sur Kennels of Monterey, will have a miniature dog show of his own, when he benches his entries at the Golden Gate show. Mr. Molera will show at least fifty or sixty dogs, it is reported, including French and English bulldogs, Scottish terriers, pointers, English setters, dachshunds, and deerhounds.

At the Traps

The Wizard of Spirit Lake.—"Shooters may come and shooters go, but Gilbert goes on forever," is a common expression in the trapshooting game. The man thus referred to is Fred Gilbert, popularly known everywhere as "The Wizard of Spirit Lake, Iowa," and unquestionably the greatest expert and most popular shooter who ever faced the traps.

Mr. Gilbert is particularly prominent in the public eye right now by reason of the Fred Gilbert Twentieth Anniversay Celebration, in which participated more than 500 gun clubs in all parts of the country. It is estimated that more than a million shots were fired by these gun clubs in Mr. Gilbert's honor—the greatest and grandest salute ever fired for any man. The Fred Gilbert celebration opened on March 13 and closed March 21, and in this period more than 10,000 trapshooters fired 100 shots each for the Fred Gilbert trophies, which were offered as prizes to the clubs holding shoots in honor of the "Wizard of Spirit Lake."

In the course of his career as a shooter Mr. Gilbert has shot at more than 200,000 targets in all parts of the United States and Canada, a record unapproached by any other shooter. To do this it has been necessary for him to shoot an average of from 15,000 to 20,000 targets a year. Nowadays a man who shoots 5000 targets a year feels that he has accomplished something quite out of the ordinary.

As a member of the victorious All-American team which invaded England, Ireland, Wales and portions of the Continent in 1901, Gilbert was ever the life of the party, and, more than any other man, was a factor in the successes that followed the invasion. In the seasons of 1901, 1902, 1903, 1904, 1905 and 1907 he won the high average from thousands of competors, a record never even approached by any other shooter, and one which is likely to stand for all time to come.

It was at Baltimore, in 1895, that Gilbert, then a youthful product of the Western prairies, first earned fame, when he outshot one of the greatest fields of live-bird shots ever assembled at any shoot. His wonderful skill, attained in hunting ducks and prairie chickens from boyhood, stood him in good stead and earned him recognition which is still his. Nor is he showing any signs of "going back," for in 1914 he shot at nearly 5000 targets for an average of nearly 93 per cent., which is "going some."

On March 17 Gilbert attended a large complimentary dinner in his honor at Wilmington, Del., which will always stand out as one of the eventful happenings of trapshooting history. The dinner was preceded by a Fred Gilbert shoot at the Du Pont Gun Club in the afternoon, which attracted a large field of gunners from all sections of the country.

Mr. Gilbert's records speak for themselves and attest his skill as the greatest marksman who ever shouldered a gun, and his thousands of friends throughout the shooting world proclaim him the most popular. In his own State of Iowa he is considered one of the leading citizens of the commonwealth, and everywhere unusual honor is accorded him. As one prominent shooter of that State aptly expressed himself, "Iowa has no prouder boast, no more popular toast, than Fred Gilbert, the Wizard of Spirit Lake."

Refusal of Entries.—Manager Elmer E. Shaner sends the following communication:

"We would be pleased to have you announce in the Trap Department of Breeder and Sportsman that The Interstate Association concedes the right of a club holding a registered tournament to refuse any entry in all events, if this right is reserved and so announced in the program, with the exception of entries for 'The Interstate Association's State amateur championship' at a State tournament. This particular event shall be open to all amateurs who are bona fide residents of the State in which the State tournament is held. All applications for registration of State tournaments have been approved with this distinct understanding."

* * *

Live Bird Shoot—At the California Wing Shooting Club's regular monthly shoot at Sobrante April 4, C. C. Nauman and W. W. Terrill, shooting from the extreme handicap distance of 33 yards rise, in the club medal trophy match, kept up their winning stride by again shooting straight scores of 12 birds each. Captain A. W. Du Bray, 29 yards, shooting with a 20-gauge gun, also dropped the full dozen birds, the first five with one barrel. Barney Worthen, 30 yards, his first appearance with the Wing Club cracks, also was in the full-score class. Ed L. Hoag, 31 yards, 11 birds (lost his last pigeon after having scored straight in the March medal match); Toney Prior, 31 yards, slipped his fourth bird and wound up with 11. Ted Riley's second bird also put him in the 11 hole, shooting from 28 yards rise. "Gilt Edge" Ruhstaller and Walsh were not in form, for both grassed every bird at the previous monthly match. Walsh lost three in a row Sunday.

Nauman then scored another straight at 33 yards rise in the club purse match, and so did Ruhstaller and Simson, both redeeming themselves at the 29-yard peg. The three high guns divided the purse. Captain Du Bray, 28 yards; Riley and Stelling, 29 yards each; Worthen, 30 yards, were all one bird shy of a perfect score. Worthen's last flyer slipped through the pattern of chilled shot.

n the two 6-bird matches at 30 yards distance winners were: Walsh, Ruhstaller and Prior; uman, Prior, Simson and Worthen. The attrac- ns of the trout streams accounted for a smaller ndance than usual. The scores follow:

Forenoon medal match, 12 white flyers, distance ndicap, high guns to win—

pt. A. W. Du Bray	29 yds.	11111 21212 22—12	
C. Nauman	33 "	21112 11111 22—12

Capitol City In Line Again.—Time was when Sacramento trap shooters kept two live clubs going. For several years past, however, the Capitol City sportsmen have indulged in trap shooting only in a desultory way. The recent organization of a new club will tend to put some ginger in the game up the river. The Sacramento Union gives the following account of a shoot held April 4:

Frank Newbert and Lee Gorman took high honors at the first regular shoot of the Big Time Gun Club at John Schenk's ranch, on the Fruitridge road, Sunday. Sixty shooters and a large number of their lady friends and wives turned out to participate in and witness the shooting.

Despite the fact that the club was only recently organized, there are 88 members enrolled at the present time. Two minor shoots were staged prior to the big meet last Sunday.

Frank Newbert took first honors in the single shooting, with 49 blue rocks broken out of a possible 50. Lee Gorman was the best in the doubles, breaking 22 out of a possible 24.

The officers and members of the club are as follows: Lee Gorman, president; H. F. Stober, secretary, and Monte Newbert, field captain; John Schenk, Dr. P. A. Webber, F. M. Newbert, L. S. Upson, J. W. Haley, W. J. Higgins, J. B. Brennan, Dr. W. W. Goode, Andy Just, F. J. Ruhstaller, Charles Mathews, A. D. Patterson, Charles De Boice, H. E. Odbert, F. P. Christophel, Dr. John L. White, J. M. Inman, Hal Stevens, J. Gusto, C. F. Adams, H. P. Tharp, Dr. J. H. Stineman, A. E. Pearson, C. O. Busick, Ed Pyburn, F. G. Egersdoff, Hugo Knapp, L. B. Stober, Fred C. Starr, Joe Carey, W. C. Thielan, A. E. Koletzke, H. F. Stober, D. M. Ruth, S. M. Skeels, W. E. Blair, Ralph Jost, Arthur Day, E. L. Soule, Gus Zinkgraf, William Dormody, Jerry Morrell, M. Priest, George Attucker, Ed Yardley, E. Raffetto, Charles Tuttle, George Newbert, Percy Bouhaure, W. W. Leeman, G. A. Macraue, D. J. Ruhstaller, Robert Schenk, Lew Schenk, Alvin Newbert, Lee Borland, Dr. C. A. Nahl, William Dreher, Frank Pagni, Fred Ferrier, O. Fritzache, Carl Stoner, George Chambers, W. Bates, Matt Speich, Dan P. Jones, Dan Tofft, George Little, Al Saunders, H. W. Newman, E. L. Ilgner, H. G. Trumpler, George Stall, Frank Stall, E. C. Pugh, A. La Bare, F. M. Newman, Charles Fleck, G. Faig, Ed Casper, Robert Bottoms, George Hinrichsen, E. L. Burst, J. C. Brown, Otto Klemmer.

* * *

Garden City Traps.—The following scores at singles were made at the San Jose Blue Rock Club shoot April 4:

Dr. A. M. Barker 80—100, G. H. Anderson 91—100, W. H. Cadwallader 91—100, Ray Hogg 88—100, A. F. Lewis 85—100, C. A. Argues 75—100, R. Chapman 72—100, C. H. Nash 71—75, J. T. Downs 70—75, W. J. McKagney 65—75.

Doubles—24 pair, 48—G. H. Anderson 41—48, A. F. Lewis 38—48, W. J. McKagney 29—48, R. Chapman 24—48, R. Hogg 24—48, C. A. Argues 24—48.

Standing of Class A on 150 shots: Dr. Barker 147—150, G. H. Anderson 142—150, Ada Schilling 140—150, Ray Hogg 129—150, A. F. Lewis 127—150.

Nash, Downs, McKagney and Cadwallader have not shot 150 up to date.

In Class B E. W. Jack is high. Score, 135—150.

Class C: Clem Arques, 120—150; H. H. Clark, 118—150.

* * *

Three Days Shooting.—The Newman Blue Rock Club two day registered tournament starts this morning and will continue tomorrow. The Owl Rod and Gun Club will begin operations at Modesto Monday morning, making three days in a row.

There will be a large crowd of valley shooters in attendance, reinforced by Stockton, Sacramento, San Francisco and San Jose trigger pullers. Both the Newman and Modesto shoots are always favorite gathering points for the gun bugs—both cities have a deserved reputation for hospitality and good sportsmanship.

Interstate Association Tournaments—

May 11, 12, 13—The Interstate Association Tenth Southern Handicap Tournament, Memphis, Tenn., under the auspices of the Memphis Gun Club; $1,000 added money. Winner of first place in the Southern Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

June 15, 16, 17—The Interstate Association's Tenth Western Handicap Tournament, St. Louis, Mo., under the auspices of the Missouri Athletic Association Gun Club; $1,000 added money. Winner of first place in the Western Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

July 8, 9, 10—The Interstate Association's Tenth Pacific Coast Handicap Tournament, San Diego, Cal., under the auspices of the Pastime Gun Club; $1,000 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

August 16, 17, 18, 19, 20—The Interstate Association's Sixteenth Grand American Handicap Tournament, Chicago, Ill., under the auspices of the Chicago Association of Trap Shooters, $3,500 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

Registered Tournaments—Pacific States and Territories:

April 7—Utah State Sportsmen's Ass'n Tournament, A. R. Bain, Secretary, Ogden, Utah.

April 10, 11—Newman Blue Rock Club, E. R. Dixon, Secretary, Newman, Cal.

April 12—Owl Rod & Gun Club, Henry Garrison, Secretary, Modesto, Cal.

April 19—Capital City Rod and Gun Club, Mark Siddall, Secretary, Salem, Ore.

April 26, 27—Oregon State Tournament, under the auspices of the Portland Gun Club, J. A. Addleman, Secretary, Portland, Ore.

April 28—"T. B." Trap and Gun Club, Lieut. Stephen W. Wallace, Secretary, Las Animas, Colo.

May 5—Utah State Sportsmen's Ass'n Tournament, A. R. Bain, Secretary, Springville, Utah.

May 14—Pueblo Gun Club, F. S. Rainey, President, Pueblo, Colo.

May 18, 19—Washington State Tournament, under the auspices of the Seattle Trap Shooters Ass'n, Hugh Fleming, Secretary, Seattle Wash.

May 26, 27—Delta County Gun Club, Nick Powell and R. A. King, Managers, Hotchkiss, Colo.

May 29, 30—Utah State Tournament, under the auspices of the Utah State Sportsmen's Ass'n, A. R. Bain, Secretary, Salt Lake City.

May 29, 30, 31—San Jose Blue Rock Club, O. N. Ford, Secretary, San Jose.

June 3, 4, 5—Annual Tournament of Rocky Mountain Interstate Sportsmen's Association, under auspices of Mile High Gun Club, Wm. M. Bowman, Secretary, Denver, Colo.

WOMEN ENJOY BREAKING BLUE ROCKS.

[By Harriet D. Hammond.]

The growth of trapshooting has been tremendous in the last few years, especially among the gentler sex. Women and young girls all over the country have found out for themselves the fascinations and delights of trapshooting, and since they have learned that it is not alone a sport for men they, too, enjoy breaking the elusive blue rocks, and many of them have become so expert that they are able to compete in tournaments and matches with the male experts of the sport.

There are few big trapshooting events scheduled now in which the women are not asked to participate, and the men are not only proud of them, but their hearts throb with delight when they realize that they have real comrades in their wives and daughters who are not only interested, but able to enter into their best loved sport.

At the celebrated Westy Hogan tournament, at Atlantic City last September, three squads of women from different parts of the United States shot through the ladies' event, and they received the heartiest of welcomes from the Westy Hogans and their friends. All the old shooters had a handshake for the women. They realize that the women do not delay the game and that a little touch of refinement will go a long way toward putting the sport where it belongs.

At the annual trapshooting tournament held in connection with the Sportsmen's Show, at Grand Central Palace, New York City, for the last two years, women have played a prominent part, and some of the more expert of them have displayed wonderful skill in the handling of the shotgun.

Aside from the fascinations of trapshooting, we must consider the great benefit it is to women and young girls. As a strengthener of muscles and a steadier of nerves it cannot be surpassed. It also causes women to lose all signs of timidity and makes them fully competent to take care of themselves under all circumstances.

The frail, delicate girl starts out with a little 20-gauge shotgun. At first the gun seems heavy, and she looks in perfect amazement at her chum, who can handle a 12-gauge. After a few weeks, her muscles become accustomed to their new work, and she is able to put her gun to her shoulder easily and gracefully, for she is no longer conscious of the weight of it. In six months' time she, too, asks to be promoted to the larger bore gun, and soon handles that as well as she did the little 20-gauge. The same little girl will tell you that since she has been shooting her chest has filled out and she is stronger than she has ever been and her appetite has improved wonderfully. Her dinner never tastes so good to her as after a shoot, and the best night's rest of the week comes after an afternoon at the traps. Most gun clubs are situated in the suburbs of towns, so that an afternoon at the club also means an afternoon in the pure, fresh country air, something that every one enjoys.

Home trapshooting has become almost as popular as shooting at gun clubs, and persons living in the country find it a splendid way of entertaining their friends. They select an open field for their shooting grounds, and the equipment consists simply of a hand trap and a barrel of blue rocks. The guests are invited to bring their guns and ammunition and spend an afternoon in the country. And, oh, the fun they do have—especially when there is some one in the party who is expert in handling the hand or joker trap, as it sometimes is called. At the call of "Pull" the targets appear at most surprising angles, and the shooters find it a never-ending source of pleasure and enjoyment to go after them. They feel puffed up, too, when they break them and count themselves "some shooters."

After the ammunition has become exhausted, the guests repair to the home of their host and hostess, where a most inviting supper awaits them, and to which they are able to do full justice. The chief topic of conversation at supper is the shoot and the splendid sport of shooting with the hand trap. The women of the party are just as enthusiastic as the men. They never seem to weary of the subject, and at the close of the evening, when they are about to depart, vote the afternoon's entertainment the "best ever."

Persons who have yachts and motorboats give trapshooting parties on the water in the summer time, to which they invite their friends. They seldom have any one decline their invitation, for these informal trapshooting parties are daily becoming more popular among the sport-loving people of America.

To the women who know nothing of the delights and benefits of trapshooting we would say: Don't miss one of the best opportunities of your lifetime for having real, genuine fun, but come out and let us who have tasted of this most enjoyable and beneficial sport initiate you into our clubs and show you what trapshooting is and how to enjoy the sport of sports for women.

FISH AND GAME INFORMATION.

The April number of "California Fish and Game," the new quarterly periodical of the California Fish and Game Commission, is just off the press. The object of this periodical is to bring accurate information concerning the wild life of this State to all those interested. Its motto is "Conservation through Education." Two numbers have already been issued and this third number, both in size, illustrations, and reading material, is the most attractive yet published. This publication has a particularly good field at the present time since there is no monthly sporting magazine west of the Rockies. California Fish and Game, however, is not a typical sporting magazine, for it does not publish the hunting and fishing stories which usually fill the pages of such magazines. On the contrary it seeks to publish only articles of scientific worth and such notes as will be not only interesting but of value to readers.

The April number contains a finely illustrated article by Barton Warren Evermann, director of the California Academy of Sciences, on "An Attempt to Save California Elk." Harold C. Bryant, game expert of the California Fish and Game Commission, contributes an article on "California's Fur-bearing Mammals." Dr. T. S. Palmer furnishes an article on "Wardens and Warden Work." Three shorter articles follow bearing on the titles "The Tennessee Possum has Arrived in California," by Joseph Grinnell, director of the California Museum of Vertebrate Zoology; "The Halibut Fishery of the Pacific Coast," by Edward P. Rankin, General Assistant, Scientific Department, U. S. S. Albatross; and "Public Fishing vs. Private Hunting," by F. M. Newbert, president California Fish and Game Commission. The periodical also contains shorter notes under the headings "Editorials," "Hatchery and Fishery Notes," "Conservation in Other States," "Life History Notes," and "Wild Life in Relation to Agriculture," which are of interest to the business man who has little time for longer articles. Complete and detailed reports of the work of the California Fish and Game Commission and the monthly expenditures are also to be found.

It is the desire of the California Fish and Game Commission to place this periodical in the hands of everyone interested in the conservation of California's wild life. California Fish and Game will be sent free to citizens of the State on application to the Fish and Game Commission.

TROUT SEASON OPENS.

The trout season opened in Marin county last Thursday, April 1, but strange to say but few of the old timers whipped the streams. Most of the anglers were school boys, who returned with fairly good strings. The streams were rather swollen, it having rained a few days before. The water was muddy in many places and the fish did not respond to the fly. Bait fishing was the rule.

Along the Paper Mill creek and Lagunitas the fishing was good, many of the early fishermen securing the limit. A few of the fishermen camped along the Ross Valley creek, securing several good sized steelhead.

For a short time it would not be a bad idea to try the tidal waters of Ross creek, near Kentfield, and also the Mill Valley creek, in the marsh sloughs below the junction. The report that steelhead were in the Rodeo lagoon, above Point Bonita, on the Marin ocean shore, tempted several local rodsters to try the tidewater Thursday.

THE FARM

One of the most important features of a home, from the standpoint of health, if for nothing else, is a fruit garden maintained for the purpose of supplying the family with fruits. Yet it is amazing that many persons, who have suitable situations and facilities for raising fruit, and who cannot purchase because of remoteness from markets, have not established home fruit gardens.

The inhabitants of this country are notably a fruit-loving and fruit-eating people. Nothwithstanding this, however, fruit culture has grown to be classed among specialties, and few persons who consume fruit are actually growers. The possibilities in fruit culture upon restricted areas have been generally overlooked with the result that many persons who own a suburban home, or a farm, look upon fruit as a luxury. A great deal of the land which is now practically wasted and entirely unremunerative can be made to produce fruits in sufficient quantity to give them a regular place upon the family bill-of-fare, and, at the same time, add greatly to the attractiveness of the table and the healthfulness of the diet.

With the growth of the commercial fruit interests of the United States, the home fruit garden has been overshadowed by the commercial orchard. While both the home garden and the orchard are essential to the good of the community, they bear different relations to the country as a whole. The home garden usually is a forerunner of commercial development, and even in those localities where climatic and soil conditions are adverse to conducting fruit growing on an extensive scale, the home fruit garden should be found.

The home production of fruit stimulates an interest and love for natural objects, which can only be acquired by that familiarity with them which comes through their culture. The cultivation of fruits teaches discrimination. If every purchaser were a good judge of the different kinds of fruits, the demands for fruits of high quality, to produce which is the ambition of every amateur as well as every professional fruit grower, would become a reality. The encouragement of the cultivation of fine fruits in the home garden will do much toward teaching buyers to discriminate between the good and the inferior varieties of fruit.

The interest of a fruit garden may be greatly enhanced by growing in them also plants not adapted naturally to the climatic region in which the garden is located.

Another scheme of special interest is the improvement of varieties by selection or by plant breeding. Ingenious gardeners can add to the interest also by grafting many varieties on one tree or by constructing arbors and summer houses with trees and vines.

FOR SALE

Hallie D 2:08¼

by WALTER DIRECT 2:05¾, sire of Napoleon Direct 2:02½ (winner of $13,950 in 1914), The Assessor 2:04¼ (winner of $5,790 in 1914), Merry Direct 2:06¾ (1914), Walter Hal 2:04, Manitoba 2:04¾, Annie Laury 2:07¼, Hallie D. 2:08¼, Hallie Direct 2:09¾, etc.

First dam Hallie Dillard by Brown Hal 2:12½, sire of Star Pointer 1:59¼, twelve others in 2:10, and the dams of twelve in 2:10, including Flower Direct 2:01, Braden Direct 2:01½, etc.

Second dam Annie Pointer (dam of Hal Dillard 2:04¾, etc.) by John Dillard Jr., sire of the dams of two in 2:10.

As a five-year-old this mare was one of the best campaigners of the west, starting eighteen times, usually over half-mile tracks, often starting twice in a three or four day meeting. She was eight times first, twice second, five times third, once fourth and but twice unplaced. She took her record in the third heat of a winning race over the half-mile track at Eureka, Kansas (her second start in three days), equaling that mark at Muskogee and repeatedly beating 2:10 on two-lap tracks.

She is right in every way, better than a 2:05 pacer on a mile track and there are none better to take to the twice-arounds. Is bred to make a great procer of speed after her racing days are over, as her blood inheritance from both sire and dam is proven beyond question by any number of fast performers. She is in excellent condition to prepare for a campaign in 1915, and can be seen at Salinas, in the care of Henry Helman. Address or call on for further particulars,

FRED W. KELLEY,

FOR SALE

RACING AND BREEDING MATERIAL

from the establishment of the late

WENDELIN J. MILLER

of Chico, Cal.

The death of Mr. W. J. Miller causes to be put on the market the choice assortment of Broodmares, Youngsters and Race Winners with which he achieved such signal success in recent years, including

JOHN MALCOLM (2) 2:11½

stake winner, world's champion two-year-old pacing gelding (1913), by Dan Logan 2:07½, dam Susie Miller by Prince Ansel (2) 2:20½, etc. Now four years old and can show as much or more than any pacer in California. Prime for this year's races.

CAPITOLA (2) 2:17¾, (3) 2:14½

stake winner, fastest two-year-old pacing filly of 1912, public trial in 2:06½ as three-year-old, by Dan Logan, dam Lulu Mack by Arthur Wilkes, etc. A great race mare for her class.

BONDALEAN (2) 2:20½

winner of second money in two-year-old division, Breeders' Futurity, 1914, and absolutely the best one in sight for this year's three-year-old pacing stakes. Entered and paid up. Trialed in 2:15 last year. By The Bondsman, dam Katalina 2:11¾ by Tom Smith 2:13¼, etc. As great a youngster as the country affords today.

KATALINA 2:11¼

(dam of Bondalean (2) 2:20½) by Tom Smith 2:13¼, dam Kate Lumry 2:20½ (dam of 5 trotters including Baby Doll 2:10¼, Ella Mac 2:11½, etc.) by Shadeland Onward 2:18½. Katalina was a stake winner, a great aged trotter, and her first foal is a fast, standard performer. She breeds regularly and will become more famous as a producer than is her dam.

TWO-YEAR-OLD FILLY

by All Style 2:10, dam Katalina 2:11¼. Staked, paid up. Good prospect.

BAY FILLY, WEANLING

by The Proof (2) 2:29¾, dam Katalina 2:11¼. Nice individual and bred to make a fast mare.

LULU MACK

(dam of Capitola (3) 2:14½), by Arthur Wilkes, sire of Maymack 2:04½, etc., dam Lady Merrill by Tilton Almont, sire of the dam of Monte Carlo 2:07¼, etc. Good breeder and a proven producer.

BAY FILLY

three years old, sister to Capitola (3) 2:14½, never broken.

FIRST NATIONAL

bay colt, two years old, brother to Capitola (3) 2:14½. Staked, paid up. Fine youngster.

John Malcolm and Bondalean are in training at the State Fair Grounds, Sacramento, their workout days coming on Wednesdays and Saturdays. You can see them at any time and they show for exactly what they are—two of the best young pacers in the land to race in this and future seasons. Prices and particulars of all kind may be obtained upon application by mail or in person to either of the undersigned.

Say, Can You "Figger"?

Try Your Brains on This One:

If a man owns thirteen brood mares and gets ten foals a year, and wins with **ONE** of them (**all he can drive in a race**) every Coast futurity, how long will it take him to go broke if he keeps on breeding, keeps on winning, and never sells anything?

The solution is so simple that it really doesn't require brains, does it? I breed horses, I race horses—and MY HORSES WIN RACES, but this is not all of the business. Sometimes I MUST SELL HORSES—hence the offerings below. I am not "culling my stable"—every horse I own, personally, can be bought for what he or she is actually worth on a money-earning basis. These are priced as fair samples. What I offer is "live stuff", in training, improving daily, ready for this year's campaign. Don't take my word for it—come to Los Angeles—see them work—drive them yourself. You cannot buy better ones at the price anywhere.

All previous prices are invalidated—Quotations below are subject to change according to future conditions.

MISS QUEALY (2) 2:26¾

Full sister to MANRICO (3) 2:07¼, winner of Kentucky Futurity 1912, and holder of world's record for sixth heat. Seven years old, trained slightly as a three-year-old and showed half in 1:06 over a half-mile track; has been in training ninety days and recently worked a half in 1:04½; absolutely will not break, good gaited, sound, and a handsome individual. Can trot a two-minute gait and has every right to make a very fast, consistent, good mannered race mare. Price $1750.

ALARICH 2:11¼ (Breeder's mark 2:09), trotter, bay gelding with black points, 15.3, handsome, sound, fast and game; trialed at Santa Rosa last season in 2:06¾ and can do it again. Is a first class doer, can race twice a week and is eligible to the 2:13 class trots on mile tracks and to the 2:18 class on half-mile tracks; has shown well on the twice-arounds. Price, $550.

HELEN BELLE (2) 2:22½, breeder's record, bay filly, foaled 1912, good gaited, good headed, sound and extremely fast; was taken up absolutely green on Sept. 3 and has developed in a most satisfactory manner, taking her mark in December, since which time she has been an eighth in :16, half in 1:09. Sired by California's greatest sire of colt trotters, CARLOKIN 2:07½. First dam Carolyn C. by Axtell (3) 2:12 (a champion); second dam by Expedition, sire of Bon Voyage 2:08; third dam by Princeps (son of Woodford Mamb.); fourth dam by Hambletonian 10.

Carolyn C. had two minute speed. This great filly is entered and paid up in the Occident stake, the State Fair, P. C. T. H. B. A., and Oregon Futurities for 1915. The best buy in California at $1400.

NELLIE Mc,

black mare, trotter, eight years old, racing sound but is blemished; has always trained sound and I believe will continue to do so. Trialed at Sacramento in 2:10½ and has been a half lately in 1:03¾. Is a splendid mannered mare—anyone can drive her anywhere. She races first class, is fast, good headed, good gaited and dead game.

Sired by ZOLOCK 2:05¼, dam by Wilkes Moor, son of Guy Wilkes.

Stands about 15.3, is a round made extra good looking mare, weighs about 1140, has splendid legs and feet. She negotiates a half mile circle in A-1 style, should surely beat 2:10 this year. Does not pull a pound and can be placed anywhere. Eligible to any class. Price $1000.00.

CARLETA,

bay filly, two years old, by CARLOKIN, dam ALEXANDRIA, tr. 2:20, by Bon Voyage 2:08; second dam by Oakland Baron 2:09¼; third dam by Allandorf, etc.

This is a good trotter and should be prominent in her stake engagements. Is very handsome, good headed, sound and comes from familes noted for early speed. In training now and improving very fast; trialed recently, half mile in 1:11½, eighth in :16¾.

She is entered and paid up to date in the following stakes: Panama-Pacific $3,000 for two-year-olds, Stanford, Occident, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. Price $1200.

OMAR, gelding,

trotter, trial 2:13¾, half in 1:05, eighths in :15; good headed, sound and can be depended upon. Is a beautifully gaited big horse and should prove useful to race over the twice arounds or for a matinee and road horse. He is fearless and is one of the most pleasant driving horses I have ever ridden behind. Stands slightly over 16 hands, weighs about 1200, is eight years old. Sired by DEL CORONADO 2:09½, dam Pineapple by Albion (son of General Benton). A present at $350.00.

CARLSCHEN (2) 2:23, breeder's record, brown gelding by CARLOKIN, dam BONNIE AILSIE 2:08½ (dam of Contention B. (3) 2:08¼) by Faustino, son of Sidney.

Trialed with a little work last year a half in 1:09, is extremely promising and looks to be as good a prospect as any of the colts racing last year in the two-year-old trots. Is engaged in several of the futurities including the P. C. T. H. B. A., Pleasanton and State Fair Futurities. Is a splendid type, beautifully gaited, good headed and has extreme speed. He does it right. Ready to show and trotted a half recently in 1:07. Price $800.00.

HERMES, brown colt,

two years old, by CARLOKIN, dam MISS QUEALY (full sister to Manrico 2:07¼).

This is one of the most promising trotters I have ever handled. Is an especially nice gaited colt, can show a 2:20 gait, is good headed and on the whole the most promising youngster I know of for the western stakes. Is also a show horse. Is entered and paid up in the Occident, Stanford, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. His dam is an extremely fast trotter, having shown a two minute gait in her three-year-old form, and his second dam produced two to hold world's records—Manrico and Don Pronto.

This youngster is spoken of as the most impressive colt trotter at Los Angeles. Trialed lately in 2:29, last eighth in :17½. Price $1500.00.

JOHNNY DUGAN,

3-yr.-old breeder's record 2:16,

pacer, no straps, bay gelding four years old, straight and sound, trialed a half in 1:04 last year in his three-year-old form and could pace around 2:10 in June.

Sire, CARLOKIN 2:07½; dam Annabelle L. (full sister to Murray M. and Robert L. 2:08¾) by Hambletonian Wilkes; second dam Annabelle 2:27½ (dam of La Belle 2:16); third dam by Williamson's Belmont. A great buy at $350.00.

OLD FOLKS,

bay gelding, trotter, five years old, trialed as a two-year-old in 2:31½, as a three-year-old in 2:18½, and in his four-year-old form last May in 2:11, last half in 1:04. Is sound, good gaited, good headed, and should 2:08 this year. Comes from a family of good race horses on both sides—by DEL CORONADO 2:09½, dam IRAN BELLE, by Iran Alto 2:12¼; second dam ANNABELLE, etc. He stands A-1 with the railbirds around Los Angeles and is in training and ready to go on with and race this year. Price $1250. Working beautifully.

NICOLA B. (2) 2:23¼

Winner two-year-old division Oregon Futurity, 1914.

Received slight injury just prior to going to the races in 1914, up to which time he was the most promising colt in my stable, working mile first part of June in 2:17, half in 1:06. Started twice, was once first, once second. Now in training and has brushed an eighth lately in :16; sound, grand individual, paid up in six western stakes and has every license to win. Son of Carlokin 2:07½ and Atherine 2:16¾, dam of Copa de Oro 2:01, Rags 2:09¼, etc. Price $2250. Getting better daily.

AND ONE FOR THE $20,000 P.-P. I. E. TROTS—RAGS 2:09¼, winner of the Breeder's and Oregon Futurities, the Stanford and the Occident stakes as a three-year-old, and the Governor's Stake, $5000, as a four-year-old—in all, beaten in but two out of eight starts, second in those two, and beaten only by 2:05 trotters. In my opinion as good a prospect for the big stakes as anyone has. He is a really great race horse, is racing sound, and has developed from an overgrown four-year-old into a sturdy, strong, exceptionally fine individual. Should be engaged in the Panama-Pacific $20,000 stakes, for which I already have entries. None better bred—by Del Coronado and out of the dam of Copa de Oro 1:59, etc. Price $2000.

In addition to the ones above mentioned I will offer to intending buyers JIM CRAM, three-year-old pacer (brother to Chango 2:12¼), the two-year-old pacer SANDY McNABB (staked), FIVE YEARLINGS and SIX TWO-YEAR-OLDS, most of which are in training and ready to show.

Prices and descriptions on application.

WILLIAM G. DURFEE, 2019 S. Figueroa St., LOS ANGELES, CAL.

COPA DE ORO 1:59
WINNING PERFORMANCE

○ DURFEE'S STALLIONS ○

CARLOKIN 2:07 1-2
EXHIBITION MILE 2:05 1-4

Champion Pacing Stallion of the West and Sire of a Champion

Reg. No. 52785. Licensed Pure Bred. Cert. No. 1037

Golden Bay. Height 15.3½. Weight 1160.

Sire of CONTENTION B. (2) 2:24¼, (3) 2:08¼, the latter mark a world's record when made, and but one-quarter of a second removed from present record for three-year-old pacing geldings. Public trial (3) 2:07¼. Also sire of

Chango p. (3).....2:12¼	De Ora (3) 2:17
2-yr.-old record 2:13½.	2-yr.-old record 2:27¼.
Trial (3) 2:09	Gold Lily p. (2)....2:24½

Patrick de Oro p (3)2:22¼, trial (3) 2:08¼, ½-mi. track

Copa de Oro has been retired to the stud for but a very few years and these are from his first foals. Where can you find a stallion whose get have made an equal showing?

COPA DE ORO is the fastest son of Nutwood Wilkes 2:16½ (sire of 8 in 2:10); first dam Atherine 2:16¾ (great brood mare) by Patron 2:14¼, sire of the dams of 7 in 2:10; second dam Athene (dam of 2 trotters, etc.) by Harold 413, sire of Maud S. 2:08¾ and the dams of 5 in 2:10; third dam Minerva (great brood mare) by Pilot Jr. 12, sire of the dams of Maud S. 2:08¾ and 3 others in 2:10, etc. He is one of the handsomest horses in the world, as well as one of the fastest, and is undoubtedly the best bred of all extremely fast pacing sires. From the first I heralded him as the Coast's future great pacing sire, and the performances of his youngsters recorded above certainly show that I had most excellent grounds for that belief.

FEE: $75 For the Season, Usual Return Privilege

I am especially well equipped for caring for mares at reasonable rates in any way that owners may desire. Every attention will be given mares in my charge, but no responsibility is assumed for accidents or escapes. Further particulars may be had by applying to W. G. DURFEE, 2019 So. Figueroa St., Los Angeles, Cal.

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred. Cert. No. 1038

Mahogany Bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

Ethel D. (3).....2:11	Helen Belle (2)....2:22½
Johnny Dugan p (3)2:16	Nicola B. (2).....2:23½
John Warwick (2) 2:17	Santiago (3) 2:24¼
The Lark (3).....2:18½	May Marian p (3)..2:24¼
Carl (2) 2:19¾	Carlrich p (2) 2:27½
Miss Carlokin p 2:20	El Carbine (2).....2:29
Carsto (2) 2:22½	Eileen C. (3) 2:29¼
Carlschen (2) 2:23	Carlos (2) 2:29¼
Fuiton G. (2).....2:30	

CARLOKIN is the best bred son fo McKinney 2:11¼, foremost among the progenitors of 2:10 speed, being out of that sterling producing matron Carlotta Wilkes (dam of Inferlotta 2:04¾, Mary Dillon 2:06¼, Guy Borden 2:07¼, Carlokin 2:07½, and 6 others in 2:30) by Charley Wilkes 3653; second dam Aspasia (dam of 4) by Alcantara 2:23, sire of the dams of 20 in 2:10; third dam Miss Buchanan (dam of 1) by Clark Chief 89, sire of the dams of 2 in 2:10, etc. Carlokin was not only a fast and rugged campaigner, but, point for point, one of the most ideal individuals ever foaled. I chose him from among all the best horses of the country as a prospective great sire, and in 1913-1914 his get won more coas: futurities than those of all other sires combined. What more could you ask of them?

FEE: $75 For the Season, Usual Return Privilege

W. G. DURFEE, 2019 So. Figueroa St., Los Angeles, Cal.

Pleasanton Driving Park

offers for service for the season of 1915 the following stallions:

Joe Patchen II 2:03¼

Licensed Pure Bred—Cert. No. 1128.
A. T. R. No. 47491

BEST MONEY WINNING PACER

By JOE PATCHEN 2:01¼, sire of Dan Patch 1:55¼ and 6 others in 2:10. Dam, Bessie Bonehill 2:05¾ (dam of 2 in 2:10) by Empire Wilkes 2:29¼; second dam Arab Girl (dam of 7) by Crittenden 433, sire of the dams of 6 in 2:10.

Joe Patchen II comes from a long line of famous ancestors and is himself one of the best known and most popular pacers in America, with all the qualities of speed, stamina and individual excellence necessary to the making of a truly great horse—one of the kind you would expect to find after a glance over the array of famous performers owning allegiance to the families from which he comes. He is an excellent breeder, transmitting uniformly his own desirable characteristics and his few foals in California are promising to the highest degree.

Mahomet Watts 2:08¼

Licensed Pure Bred—Cert. No. 2312.
A. T. R. No. 51518.

AXWORTHY ELECTIONEER

By GEN. WATTS (3) 2:06¾, sire of three three-year-old trotters in 2:10. Dam Alla P. 2:21¼ (dam of 3) by Palo Alto 2:08¾, sire of the dams of 2 in 2:10; second dam Lula Wilkes (dam of 5), by George Wilkes 2:22, sire of the dams of 15 in 2:10.

Mahomet Watts is not only the fastest performer credited to Gen. Watts (3) 2:06¾ (whose breeding on qualities have been prime factors in the rise of the great house of the Axworthys) but he springs on the maternal side from the most firmly established families of champion producers—those of Electioneer and George Wilkes. He is a pleasing individual of fine finish and extreme speed, having a three-year-old record of 2:10 and being timed separately in a race last year in 2:05¼, whose services should be most welcome to California breeders.

Fee for Joe Patchen II or Mahomet Watts, $100 with usual return privilege

Service fee refunded to owners of mares bred to Mahomet Watts proving not with foal.

Vernon McKinney 2:01½

Licensed Pure Bred—Cert. No. 1126.
A. T. R. No. 53803.

FASTEST OF THE McKINNEYS

By GUY McKINNEY 37625, son of McKinney 2:11¼, dam by Guy Wilkes. Dam Maud Vernon by Mount Vernon 2:15¼, sire of the dam of Leata J. 2:03, etc.; second dam Mag by Gen. McClellan, sire of the dam of Mack Mack 2:08, etc.

No member of the McKinney family excells Vernon McKinney in point of speed or individual excellence. He is a horse of much substance—16 hands, 1200 pounds—bred in lines of intense prolificacy and evidencing in every way his ability to "live up to his pedigree." No horse has greater natural speed or a more effortless way of going. He is a sure breeder and his youngsters are the readiest sellers of their age in California—a statement proven by recent sales and tentative offerings for the get of mares due to foal to him this year.

Zomblack 2:26, tr. 3, 2:08¾

Licensed Pure Bred—Cert. No. 1127.
A. T. R. No. 54955

BEST SON OF ZOMBRO

By ZOMBRO 2:11, sire of twenty and the dams of three in 2:10.

Dam, Madeline Marshall (dam of 2) by Demonio 2:11¼, sire of 7 and dam of 1 in 2:10; second dam Mamie Comet (dam of 3) by Nutwood 2:18¾, sire of 2 and dams of 21 in 2:10.

Zomblack is one of the handsomest horses ever foaled in California as well as one of the fastest. His extreme speed came to him early and naturally, and he is unexcelled in size and conformation—an ideal type of the American trotter in every important respect. He is intensely bred in speed producing lines and we have no hesitation in advancing the claim that he is the very best son of Zombro 2:11, in his turn the best son of McKinney. In every instance the families represented in his pedigree are breeding on most successfully.

Fee for Vernon McKinney or Zomblack, $50 with usual return privilege

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

WORLD'S CHAMPION YEARLING TROTTING STALLION 1910
Unbeaten Two-Year-Old in 1911

Winner of California State Fair and Pacific Coast Breeders' Association Futurities in 1912. Record in Third Heat of a Winning Race.

Also holder of the World's Record of a Five-Heat Race by a 3-yr.-old Stallion

Limited number of approved mares at $100 the season.

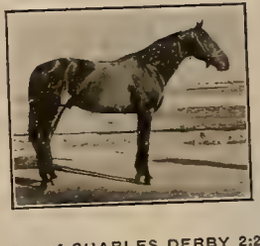
WILBUR LOU was bred to seven (7) mares in 1912 and got seven (7) foals; six (6) were trained, on the property of John Christiansen, of San Francisco, which was said to be the fastest yearling on the Pacific Coast.

The five (5) owned by the Hemet Stock Farm showed as follows:

FIESTA LOU, record 2:25,	half-mile track,	½ mile—1:08¾
SELMA PALEY, trotted	½ mile	1:13¾; one-eighth— :17¾
GOLDSMITH LOU "	¼ mile	:35½
GERTRUDE RIVES "	¼ mile	:36¾
BILLIE BOYD "	¼ mile	:38

This includes the entire get of WILBUR LOU.

KINNEY de LOPEZ 2:23.



Son of KINNEY LOU 2:07¾ and BETSY DIRECT by Direct 2:05½

$50 THE SEASON

KINNEY DE LOPEZ is the sire of DON DE LOPEZ, trial one-half as a yearling 1:13¾, one-eighth 17½ seconds; could have trotted in standard time as a yearling. KINNEY DE LOPEZ is certain to sire early speed.

Terms: Cash at time of service with usual return privilege, or money refunded at our option. Excellent pasturage and best of care taken of mares, but no responsibility assumed for accidents or escapes.

BREED TO THE COAST'S CHAMPION CAMPAIGNER AND FUTURITY SIRE

JIM LOGAN 2:01¾

(3) 2:05½, world's record to 1912 and yet the fastest third heat ever paced by stallion of that age; (5) 2:04¼, (6) 2:03¼, (7) 2:02¾, (8) 2:01¾, race record for Pacific Coast.

Licensed Pure Bred—Cert. No. 1028.

All winning race records. Registry No. 44997.

Sire of MAXINE (3) 2:15 Winner Pacing Division Pacific Breeders Futurity 1914

Trial in 2:09, half in 1:01, quarter in :29 as a three-year-old.

Son of CHARLES DERBY 2:20, brother to Klatawah (3) 2:05½, etc., and sire of TEN in 2:10.

Dam, EFFIE LOGAN, California's greatest producer of extreme speed (dam of Jim Logan 2:01¾, Sir Albert S. 2:03¾, and Dan Logan 2:07½, sire of John Malcolm (2) 2:11½, champion two-year-old of 1913), by Durfee 11256; second dam Ripple, by Prompter 2305, sire of the dam of Gratt 2:02¼, etc.; third dam Grace (dam of Daedalion 2:08½, Creole 2:15 and Eagle 2:19½), by Buccaneer 2656, sire of the dams of 2 in 2:10; fourth dam Mary, great broodmare, by Flaxtail.

JIM LOGAN is not only a horse of most acceptable size and pleasing conformation, but is one of the most rugged campaigners ever raced. After acquiring a world's record as a three-year-old he reduced his record every year raced and is a sound horse today—no more eloquent testimony of his genuine natural qualities could be given. Of his very few living foals, every one trained has shown speed in convincing quantity, and the only one to be raced, Maxine (3) 2:15, began her career as a futurity winner. Could you ask more of a well bred horse than that he be a champion campaigner and transmit his qualities to his get?

In the stud, season of 1915, at Woodland Race Track

FEE: $50 for season, with usual return privilege, or $75 to insure living colt. Fees payable at time of service or before removal of mares. Excellent pasture at $5 per month, with best of care for mares, though no responsibility will be assumed for accidents or escapes. Call at race track, or address

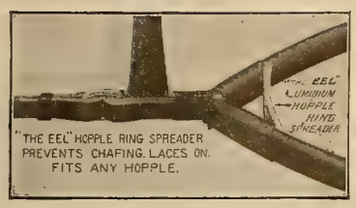
J. BIMO MONTGOMERY, Davis, Cal.

The only son of Jay McGregor 2:07¼ on the Pacific Coast, and the only stallion in California whose sire and dam both have records faster than 2:10.

Onward McGregor

TROTTING RECORD (3) 2:23¼.
YEARLING TRIAL QUARTER IN :33.

Bay horse, black points. Height 16 hands, weight 1100 lbs. Licensed Non-Standard, Cert. No. 24.



First dam MARY GORDON 2:09¾ by GORDON 3127 (son of Onward 2:25¼); second dam Nell by Young Octoroon, sire of Shadow (dam of 4 and grandam of Peter the Great 2:07¼, J. Malcolm Forbes 2:08, etc.) Will make a limited season of 20 mares at Pleasanton Driving Park at $35 with usual return privilege. Every mare bred to him this year will be nominated in the Breeders and State Fair Futurities for foals of 1916 and first payment made by his owner. Address for all particulars

THE PROOF 2, 2:29¾

A. T. R. No. 51956
LICENSED PURE BRED CERTIFICATE No. 1029

From the family of Bingen 2:06¼, foremost among present day champions of all ages and gaits.

Son of The Exponent 2:11¾ (by Bingen, dam Iva Dee by Onward 2:25¼), sire of 32 performers including The Temptress 2:08½, 6 three-year-olds, 20 two-year-olds and 1 yearling.

First dam Chord 2:27 (dam of 4) by Wilkes Boy 2:24½, sire of 4 and the dams of 11 in 2:10; second dam Sonata (dam of 3) by Dictator 113, sire of 2 and the dams of 7 in 2:10; third dam Cadenza (dam of 2) by King Rene 1278, sire of the dams of 2 in 2:10; fourth dam Virgie Wilkes (dam of 4) by Geo. Wilkes 2:22, sire of the dams of 16 in 2:10.

In the stud, season of 1915, at Pleasanton Driving Park, at $50 the season with return privilege. We have colts in training to show his qualities as a sire. Grandsons of Bingen are siring champions such as Etawah 2:03½, Anna Bradford (3) 2:00¾, etc. Address for all particulars,

KEEFER & SPENCER, Pleasanton, Cal.

Grandly Bred — A Colt Trotter — A Proven Sire

Bon McKinney 51480

Cal. State License, Pure Bred No. 1213.

Three-year-old record 2:24½; trial (3) 2:15, 1:05.

Sire of

Bon Courage (2) 2:12¾ — **Bon Bell (3) 2:17¾**

Son of BON VOYAGE 2:08 and DAPHNE McKINNEY (dam of Frank N. 2:07¼, etc.), by McKinney 2:11¼; second dam La Moscovita (dam of Bon Guy (3) 2:11¾ and 2 others) by Guy Wilkes 2:15¼; third, fourth and fifth dams also in great brood mare list. Bay horse, in every respect a great individual, with substance, finish, and natural, frictionless trotting action. Very sure foal getter and a steadily rising young sire, his few foals possessing his most excellent qualities to a marked degree. Bon Courage was the only California bred three-year-old to win a heat from Esperanza in 1914.

In the stud, season of 1915, at the Rush & Haile Ranch, Suisun, Cal., season closing August 1st. Fee, $25 with return privilege, payable cash at time of removal of mare. Good pasturage at $2.50 per month. For further particulars address

BEN F. RUSH, Suisun, Cal.

Derbertha Bells

Licensed Pure Bred, Cert. No. 1172.

NO. 60907 A. T. R. RULE 1.

DERBERTHA BELLS, foaled 1911, stands 15.3, weighs 1200 pounds, and is of magnificent conformation, style, trotting action and color; being a solid dark bay or brown with splendid mane and tail, massive well-formed limbs and feet, beautiful neck and head, fine, well set ear and eye as kindly as a fawn's and as courageous as a lion's. His breeding can only be hinted at here as he traces 20 times to Hambletonian 10—5 through Electioneer, 5 through George Wilkes, 4 through Strathmore a 4 through Abdallah 15 (the big four of the sons of Hambletonian), and twice throu his daughters. This breeding is perfectly balanced by 18 crosses to Mamb. Chief 11—5 these through his greatest son Mamb. Patchen 58 (leading progenitor of the dams trotting sires), backed up by 2 crosses to Pilot Jr. 12, 4 to Black Hawk 5, 4 to In Trustee and crosses to such other famous broodmare sires as American Star, T Moor, A. W. Richmond, Williamson's Belmont, etc.

I challenge any man to name a stallion with a broodmare inheritance approachi that of Derbertha Bells,—5 crosses to Green Mountain Maid (dam of 9 and Electio eer), 3 to Alma Mater (dam of 8 and 7 sires, including Alcyone and Alcantara), a 1 each to Miss Russell (dam of 7, including Maud S. 2:08¾ and 6 sires, including Nu wood), Dolly (dam of 4 and 5 sires, including Director, Onward and Thorndale), Bea tiful Bells (dam of 11, including 4 world's champions and 10 sires) and Minneha (dam of 8 and 6 sires). These are pre-eminently the greatest mares of history point of number of descendants in the standard list, besides 2 crosses to Bertha, t only mare with 2 in 2:04½, 5 in 2:10 and 13 in the list. Counting duplicates this pe gree contains the blood of 20 mares with an average of 9 performers each, and of t 14 mares appearing in the pedigree of two or more 2:10 trotters in 1910 this pedigr contains 8.

His disposition and deportment are in perfect harmony with his superlative bree ing and conformation, all that could be desired. I own a yearling filly by him th stamps him as a sire of the first rank, and I invite the most critical inspection bo of him and his get. He will be allowed a few choice mares at $25.00 the season wi usual return privilege. Tabulated pedigree upon request.

J. W. PENDLETON, Owner,
1601 Seminary Ave., OAKLAND, CAL.

Peter The Great

is the world's foremost progenitor of extreme speed; sire of 30 in 2:10, etc.

HIS SON

PETER McKLYO 3, 2:12 1-2

Cal. State License Pure Bred 2339

will make the season of 1915 in the training stable of James Thompson at the San Jo Driving Park beginning March 15 and ending July 1.

PETER McKLYO (3) 2:12½, the only California-owned son of Peter the Great an age permitting stud duty, is out of a great-bred young matron by Jay McGreg 2:07¼—Klyo (2) 2:29½; second dam Miss Spears 2:21¾ (dam of 6 including Shake peare (3) 2:09¾); third dam Medium's Last (dam of 7 including Trampfast (2:14¾); fourth dam Suzanne (dam of 1 and grandam of 10 including Susie J. 2:06½

This colt is four years old, having obtained his record last season with a very lim ited amount of work. He came into my hands perfectly green in February, 1914, ar developed speed so fast that I had to take his shoes off and jog him for two month barefooted. Being by Peter the Great, the sire of the century, and, as you will notic out of a daughter of Jay McGregor, another wonderful family of horses, he is one the best bred young horses in the world and I can truthfully say he is one of the ve best individuals that I ever had the pleasure of looking at. He can trot a quarter 30 seconds, and I am firmly of the opinion that he will trot a mile this fall in 2:06 better.

Fee, $75 the season with return privilege. Mares pastured at usual rates and ac corded best of care, but no responsibility assumed for accidents or escapes. Service f and pasture bills must be paid before removal of mares. Address for all particulars

L. H. TODHUNTER, Owner, Sacramento, Cal.
JAMES THOMPSON, San Jose Driving Park, San Jose, Ca

Offers for Service for the Season of 1915

PRINCE ANSEL

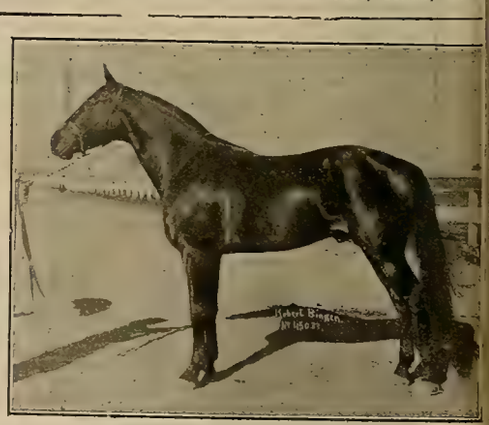
CERT. 1062

2, 2:20½ A. T. R. 29220

Sire of
Prince Lot 2:07¾
Joseph Ansel (3) 2:12¾
Lottie Ansel (2) 2:14¼
Laura Rogers 2:11¼
Adansel (3) 2:14½
Arista Ansel (2) 2:18¼, etc.
And the dams of
John Malcolm (2) 2:11½, etc.

PRINCE ANSEL is not only doing more than any other individual to perpetuate the fame of the great family of Dexter Prince, but he has few rivals in the land as a progenitor of futurity winning youngsters, as attested by the summaries of coast classics year by year. None more highly esteemed by horsemen in general. Fee, $50 with usual return privilege.

ROBERT BINGEN



CERT. 1061

2:11¼ A. T. R. 45033

Best Bred Son of

BINGEN 2:06 1-4

Sire of Uhlan 1:58; 14 in 2:10
First dam Episode 2:18 half sister to Peter the Great 2:07¼
Second dam Santos, dam of Peter the Great 2:07¼, J. Malcolm Forbes 2:08, etc.

ROBERT BINGEN, in every way one of the most desirable horses ever offered for service in California, represents the families whose blood is most eagerly sought by successful breeders today—Bingen and Peter the Great. He is the only son of gen standing for service in California and his book is rapidly filling. Fee, $75 the season.

True Kinney 2:12¼

The best young McKinney stallion in California—a colt trotter and a coming sire. His first foals are among the best on the farm and show for themselves. Terms on application—season limited.

Do Not Fail to Attend The GREAT COMBINATION SALE AT

WOODLAND STOCK FARM

THURSDAY, APRIL 15, 1915,

When a great array of most desirable horseflesh will be offered to the highest bidder. Look over these consignments carefully—they are merely "samples" of what is to go through the ring. Send for catalog containing full particulars.

Gladys May, b m by Nutwood Wilkes 2:16½; pacer, mile in 2:14, half 1:02½; 5-yr.-old.

Bay gelding by Prince Ansel (2) 2:20½, dam by Wayland W. 2:12½. Trotter and a good one. 3-yr.-old.

Bay mare by Lockheart 2:08½, dam by Constantine 2:12¾. 9-yr.-old.

Georgia Kalos 2:24¼, b m by Prince Ansel, dam Majella B. (great brood mare) by Nushagak. 7-yr.-old. Sound and good gaited, in foal to True Kinney 2:12¼

Ima Dudley 2:27½, b m by Prince Ansel, dam by Capt. Jones. Sound. In foal to Robert Bingen 2:11¼.

Black gelding, saddle horse, 15.2, sound and good, 3-yr.-old.

Bay stud colt by True Kinney 2:12¼, dam by Wayland W., a sure trot horse, good sized, good gaited and fast. True Kinney's first colt, yearling.

Two-year-old filly by Robert Bingen, not registered, but Walter Maben drove her a quarter in :44 as a yearling. She is out of a very good mare.

Yearling filly by Prince Ansel, dam Eocita by Moko. Come see a good one—staked.

Yearling by True Kinney, dam by Prince Ansel. Can show a thirty gait—staked.

Yearling by True Kinney, dam Ella J., dam of San Felipe 2:09¼, Honey Healey 2:08¼, etc. A sure trotter—quarter in :50.

Consignment of Charles Johnson

No. 1—Yearling filly by Airlie Demonio 2:05½, dam by Sutter 2:17½, second dam by Tilton Almont 2:26. Halter broken only.

No. 2—Airlie Ansel (eligible to registration), b f, 2-yr.-old, by Airlie Demonio 2:05½, dam Lady Ansel tr. (2) 2:28, by Prince Ansel (2) 2:20½, second dam Lady Carretta 2:20½ by Nutwood Wilkes 2:16½, third dam Abby Callendine (dam of Diawood 2:11 and 3 others) by Woodnut.

No. 3—Dinnie Airlie (registered), bl f by Airlie Demonio 2:05½, dam Dimontes (dam of Zorankin (2) 2:29¾) by Diablo 2:09¼, second dam Bessie Rankin 2:13 by Altamont 2:26¾. 4-yr.-old, pacer, nicely broken.

No. 4—Black filly, 3-yr.-old, full sister to No. 3, halter broken only.

No. 5—Airlie Boy, ch colt, 3-yr.-old, broken, by Airlie Demonio 2:05½, dam Trixy by Falrose 2:19, second dam Daisy by Nutwood Boy, third by Dietz' St. Clair, fourth by Peacock 2:22.

Consignment of E. A. Swaby

Roan mare, 6-yr.-old, by San Francisco 2:07¾, dam Birdie (dam of Bodaker 2:13) by Jay Bird 5060. Sound, and the making of a high class mare.

Gracie S. by Nushagak, dam by Antevolo; good gaited, sound, a sure trotter, worked Pleasanton track last season in 2:16.

CONSIGNMENT OF J. W. MARSHALL

Twenty-Three Skidoo, bl m, foaled 1906. Registered in Vol. 17, by Nutwood Wilkes 2:16½, dam Twenty-Third (dam of Sterling McKinney 2:06¼, that sold for $25,000) by Director 2:17; grandam Nettie Nutwood (dam of Hillsdale 2:17¾) by Nutwood 2:18¾. She is the dam of the pacer La Plata in Jack Villar's stable at San Jose, and the railbirds say this one can pace in 2:10 this season.

Madeline Marshall (dam of two) by Demonio 2:11¼, grandam Mamie Comet (dam of three) by Nutwood 2:18¾. She is due to foal in May to the cover of Robert Bingen 2:11¼, and is the dam of **Zomblack,** heralded as the best green pacer at Pleasanton—has worked that track this spring in 2:10. Both these mares are great producers of speed.

Brown Filly, foaled March 6, 1914, by Palo King 2:28½, first dam **Ramona** (dam of **Del Rey 2:03¾**) by Demonio 2:11¼, sire of 7 in 2:10; second dam Carolla (dam of Ben F. 2:07¾, etc.) by Steinway, sire of the dams of 5 in 2:10; third dam Lady Winkler by Signal. Entered in the State Agricultural Society's Futurity Stake No. 6 and the Breeder's Futurity Stake No. 14.

Brown Colt, two-year-old, by Sirius Pointer 2:15 (son of Star Pointer 1:59¼ and the great brood mare Trix Marshall, dam of 7, by Nutwood Wilkes 2:16½), first dam Ramona, as above. Bred to be a two-minute pacer.

Bay Colt, foaled Feb. 16, 1914, by Montbaine, first dam Madeline Marshall (dam of Zoblack (3) 2:24¼, trial (2) 2:18, and Zomblack (2) 2:26, tr. (3) 2:08¾ trotting) by Demonio; second dam Mamie Comet 2:23¾ (dam of Macleay (2) 2:22¼, Comet Wilkes 2:21 and Nutwood Demonio 2:11¼) by Nutwood 2:18¾; third dam Black Betty by Sportsman; fourth dam by St. Clair, sire of the dams of Manzanita (4) 2:16, Bonita 2:18½, Wildflower (2) 2:21, etc. Entered in Agricultural Society's Futurity No. 6 and Breeders Futurity No. 14.

EXCELLENT CONSIGNMENTS

H. S. Hogoboom, Woodland; Fred Jasper, Talmage; Wilbur Smith, Sacramento, and others.

H. S. DOWLING, Supt. **Woodland, Cal.**

WILLIAM HIGGINBOTTOM, Auctioneer.

FOR SALE OR TRADE

LUCRETIA BOND

Brown filly, foaled 1913, bred by Col. J. C. Kirkpatrick.

By THE BONDSMAN

Sire of Colorado E. (3) 2:04¾, Colonel Franklin 2:06¼, Lizzie Brown 2:07¼, The Plunger 2:07½, Creighton 2:08¼, Grace Bond (3) 2:09¼, Carmen McCan 2:09½ and 59 others in 2:30.

Dam, Lucretia 2:13½ (dam of five trotters), one of the best daughters of Electioneer 125.

A great trotting daughter of Nazote 33527 (brother to Azote 2:04¾).

Grandam, Lucyneer 2:27

LUCRETIA BOND

is one of the nicest fillies of her age in California in every way, and a natural trotter. Beautifully made, fine disposition, none better bred, and in her first pair of shoes has trotted quarters in 45 seconds. Offered for sale only because I am a matinee driver and prefer something of racing age. She is staked and paid up in the coast futurities. Price $400, or will trade for good matinee horse if mutually acceptable. She can be seen at Pleasanton, stable of H. G. Smith. Address for particulars:

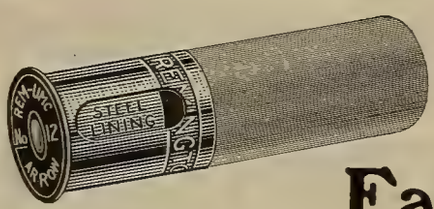
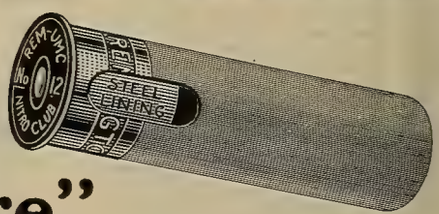
WINCHESTER

"LEADER" AND "REPEATER" FACTORY LOADED SHELLS



What determines superiority? Is it not the greatest achievement in any line of endeavor? If you agree in this definition, you must admit that Winchester Factory Loaded Shells proved their superiority over all others when they made the World's Long Run of 565 Straight—a record that has never been approached. It's all very well to say the *man* did it and that he might have done it with some other shells. There is at least a reasonable doubt about this. The fact remains that no other shells have accomplished it, in the gun of any man. This brings up the question of the fine points of shotgun shells. It is difficult to imagine how any shells can be better than the **W** brand. The greatest resources, the best materials and equipment and the most expert knowledge are utilized in their manufacture; and, to say the least, no more can be claimed for any shells. It's wisdom to use them, that's all. You are then sure you have the best in the market anyway.



W *SHELLS ARE OF PROVEN SUPERIORITY*

CHIEF BENDER

Chief Bender Endorses TRAPSHOOTING

ASIDE from the recreative aspect of trapshooting, the game has practical value. Chief Bender says in the Public Ledger of Philadelpia, March 21, 1915:

"Trapshooting alone will not make a pitcher, but the quick calculation of the angle of flight of the target, its elevation and the effect of wind in deflecting not only the target, but also the charge, are not without value to a moundsman.

The exercise you get in clay-bird shooting is not violent, yet it is not exactly of the mollycoddle kind, for the handling of a shotgun troughout a 100-bird program, taking the mild pounding of a like repetition of recoil, and the other activities of a half-day at the traps, are just about enough for the average man.

Besides keeping a fellow physically fit, trapshooting has irresistible fascination as a game. This is proved by the hundreds of thousands who regularly shoot at the traps and the representation of every walk of life among the shooters."

VICTORIES OF PARAMOUNT PARKER GUNS 1915

Look, Read, Remember!!!

At the Pinehurst Mid-Winter Handicap Shoot the four contestants making the highest scores in the preliminary event all shot Parker Guns.

RATHER STARTLING, ISN'T IT?

In the main event, the PINEHURST HANDICAP, Mr. S. A. Huntley, although placed further back than any other contestant, scored

95 out of 100 Targets at 23 Yards

and landed the Trophy. Furthermore Mr. Huntley was high over all for the entire tournament, and as usual shot his 32-inch barrel PARKER GUN.

In 1914 Parker Guns won **The Grand American Handicap, The National Championship** at single and double targets, the

FIRST and SECOND YEARLY AVERAGES

and made the best scores on the Pacific Coast.

Follow the pace set by the champions of America and for either single or double target shooting use

Cures the Horse and Himself Too

R. S. Steth, Holliday, Mo., Jan. 4, 1915, writes:

Holliday, Mo., Jan. 4, 1915.

Troy Chemical Co., Binghamton, N. Y.

Dear Sirs:—I want to thank you for what Save-The-Horse did for me. I cured my mare of a bog spavin. I thought that if it would cure a bog it ought to cure a bog on a man, so I gave it a trial. I had a very bad case of Varicose veins. Doctors told me the only help was to wear an elastic stocking; and one said that an operation was the only resort because it would break soon, and there would be a running sore. The veins were as large as a broom handle. I began using it on myself, and after six months, I could not tell which leg was affected. It was a permanent cure, and it has not come back in 9 months. I recommend it to anyone suffering from same.

Respt., R. S. STETH.

HALF BOTTLE CURES THREE YEAR OLD SPAVIN

Oak Ridge, Mo., 2-8-1915.

Troy Chemical Co., Binghamton, N. Y.

Gentlemen:—About six years ago I bought a bottle of Save-The-Horse spavin cure for a spavin about three years old. I had used several kinds of spavin cure, but he continued to get worse until he was practically worthless. I cured that horse with a half bottle of your remedy so he has not been lame since. I have used him for all kinds of work and driving. I was the first in this part of the Co. to use your remedy for spavin. Since then neighbors who have used it with satisfactory results in every case are: Robt. Crites, Oak Ridge, Mo.; Brown Clippard, Oak Ridge, Mo.; Albert Liddy, Oak Ridge, Mo.; Ory Kenison, Oak Ridge, Mo.; P. C. Fulbright, Jackson, Mo.

Yours truly

S. A. SMITH, R. F. D. No. 2.

TWO PERMANENT CURES—IT PAYS

Weston, Texas, 1-27-1915.

Troy Chemical Co., Binghamton, N. Y.

Sirs: I have neglected to write you. Better once than never. I want to praise Save-The-Horse above any liniment I have ever used. I cured my horse of bog spavin; sound and well. It is nearing two years and he has never lamed any yet. Last spring, I bought another bottle for my driving horse which had a bad ringbone; today he is sound and well.

I am, yours truly, E. A. CANDLE.

NOTHING EQUALS IT FOR HOOFS

Clark's Hill, Ind., 2-14-15.

Troy Chemical Co.,
Binghamton, N. Y.

I used Save-The-Horse on a case of Navicular disease; it did the work up right. I had tried everything I could think of, but your remedy did the work.

Yours, LLOYD STINGLEY.

McAllister, Wis., April 28, 1914.

Troy Chemical Co.,
Binghamton, N. Y.

Gentlemen: The mare that was bothered with coffin joint lameness is cured and we thank you for it, because it is Save-The-Horse that cured her. She works every day, and I will recommend it to anybody that has a lame horse.

Very much obliged to you.

Respectfully, ED. PETERSON.

Our 19 years' experience is in the directions with every bottle of Save-The-Horse—tells just HOW to treat every kind of lameness and complication. With this unrivalled remedy the way to accomplish results is made plain and clear for you—NOW—ready to cure your horse—AND THE CURE IS GUARANTEED!

WE ARE THE ORIGINATORS of the Plan of—Treating Horses Under Signed Contract to Return Money if Remedy Fails.

$5 with a binding contract to refund money or cure any case of BONE AND BOG SPAVIN, THOROUGHPIN, RINGBONE (except low), CURB, SPLINT, CAPPED HOCK, WIND PUFF, SHOE BOIL, BROKEN DOWN, INJURED TENDONS AND ALL OTHER LAMENESS. No scar or loss of hair. Horse works as usual.

SAVE-THE-HORSE is sold by Druggists and Dealers Everywhere or sent prepaid by

◈ ◈ ◈

Parties in the market for saddle horses or polo pony material should correspond with R. W. Scott of Bishop, California, who has a number of both classes for sale.

◈ ◈ ◈

The official organ of a prominent eastern church described Billy Sunday, the evangelist, as a "profane, bad tempered, unjust, harsh, boorish, shifty, shrewd, ungentlemanly, defective Christian." Wow! — All these things and yet "a Christian"! Not around a race track, Genevieve!

◈ ◈ ◈

George Ramage, H. E. Armstrong and perhaps one or two other members of the Pleasanton colony plan to ship to the middle west sometime in the next few weeks and get ready for a campaign down the lines in that section, probably starting in on the Cedar Valley Circuit.

◈ ◈ ◈

A. L. Nichols of Chico recently suffered the misfortune of losing by death the brood mare Silver Benton by Senator Boggs (sire of Geo. Woodward 2:07½), dam Silvia by Tom Benton. She was in foal to Woodland Stock Farm's good son of Bingen 2:06¼, Robert Bingen 2:11¼, and had been named in the Breeders Futurity for foals of this year.

◈ ◈ ◈

G. Cuneo of Oakland, breeder of the good pacing mare Gracie Pointer 2:07¾ by Star Pointer 1:59¼, dam Pavaline by Charles Derby 2:20, grandam Clementine by Yosemite, has another prospect that he regards highly as a candidate for future honors, the two-year-old gelding Bon Boy by The Bondsman out of Pavaline. The Boy is staked in the Breeders Futurity.

◈ ◈ ◈

C. A. Harrison has recently sent to John B. Stetson at Salem the youngster Kinney Benton that has been at Woodland Stock Farm, and the yearling filly Maggie Ansel by Prince Ansel, out of Maggie Hall by Moko, grandam Maggie Yeaser by Red Wilkes, recently presented to him by Mr. Considine. They arrived all O. K. and the Salem colony is "taking to 'em" very kindly.

◈ ◈ ◈

W. J. Miller of Seattle has Charley "Missoura" Guion preparing the three-year-old pacer Maud Bond by The Bondsman, dam Nusta 2:23½ by Nushagak, grandam Anselois by Prince Ansel (2) 2:20½, for her 1915 futurity engagements. According to northwestern reports she has "looks, lick and lots of it" and has wintered in great shape. She was bred by Charles Marley of Woodland and sold to Mr. Miller by C. A. Harrison.

◈ ◈ ◈

J. B. Collett of Bishop, one of Inyo county's steadfast friends of the trotter, has recently purchased from Geo. H. Parker of San Bernardino the young standard and registered stallion Zowood, by Zolock 2:05¼ (exported last winter to Russia), dam Iona W. by Nutwood Wilkes 2:16½, famous both as a sire of speed and of dams of fast performers. Zowood's grandam is a daughter of McKinney 2:11¼ and his third dam is the famous old matron Gipsey, dam of Delilah 2:06½, Gazelle G. 2:11½, etc. Mr. Collett will establish him in the stud at Bishop and he will no doubt be an improving element among his kind, in that locality.

Bob Smith of Los Angeles went east some days ago for a business and social visit at his old home in Philadelphia, promising to "cut it short" and return as early as possible to the Pacific coast. There is too much speed on tap here for Robert to be satisfied to stay away very long, unless campaigning, and as it is, when he returns he will find any number of his favorites stepping miles a whole lot nearer the two-minute mark than when he left here.

◈ ◈ ◈

Fun drivers of Ventura and Santa Barbara began the season Easter Sunday with a matinee at Santa Barbara, and for tomorrow the scene of battle shifts to Ventura, quite a number of Santa Barbara horses and horsemen being due to make the trip down. While the first contests failed to produce any miles in 2:10¾, like the St. Patrick's day matinee at Riverside, there were four heats in the 2:20 notch, which is pretty fair traveling for fun horses at this season.

◈ ◈ ◈

Nominators to Stake No. 14 of the series of futurities sponsored by the P. C. T. H. B. A. are reminded that on May first there will be due on these nominations a ten dollar payment. This date also marks the limit of the time allowed for substitution, and parties finding themselves possessed of nice foals of 1914 without engagements may secure entries in this event up to that time through Secretary Kelley, who has a small number of substitutions available.

◈ ◈ ◈

Lucretia Bond, the two-year-old filly by The Bondsman—Lucretia 2:13¼ advertised for sale by T. D. Sexton of Oakland, is certainly bred to be a trotter, and is one of the nicest little ladies imaginable in many ways. In her first pair of shoes she trotted quarters in :45, and she is paid up in a number of coast futurities, but Mr. Sexton prefers something that he can matinee at once and offers to trade for a good fun horse, or sell at a figure that is about one-fifth of what her breeder, the late Colonel Kirkpatrick, would have asked for her.

◈ ◈ ◈

To the entries for the 2:08 and 2:09 trots at the fall meeting of the P.-P. I. E., add that of the bay gelding Newzell 2:05¼ by New Leaf, dam Hezeletta by Garnet Wilkes, owned by H. K. Devereux and entered by the Pastime Stable. This is the Pastime Stable's only entry, but a recent letter from W. J. Andrews, written from his winter quarters at Thomasville, Ga., states that the various gentlemen who constitute the "strategy board" of the organization will all be here in person. Newzell's win-race record is 2:07½ and he has one second's allowance.

◈ ◈ ◈

Carlschen (2) 2:23, by Carlokin 2:07½—Bonnie Ailsie 2:08½ (dam of Contention B. (3) 2:08¼, etc.), worked the Los Angeles track for Will Durfee this week in 2:17¾ with a half in 1:06, and Hermes, the Carlokin—Miss Quealy two-year-old, went the route in 2:27, working a pair of sizzling eighths the same day in :16¼ each. These lads are well staked in coast futurities and are fair samples of the kind that Will is offering for sale—Carlschen at $800 and Hermes at $1500. Nicola B. (2) 2:23¼, winner of the junior division of last year's Oregon futurity and eligible to six three-year-old stakes for this season, continues "coming" so favorably that the price has been raised to $2500. Somebody can save himself a good beating by buying these youngsters.

◈ ◈ ◈

M. H. Reardon of Indianapolis recently sold to A. L. Thomas the trotting stallion Lad McKinney 2:16¾, by McKinney 2:11¼ and out of Our Lady by Nearest. Our Lady was bred by T. W. Barstow at San Jose, passing eventually to Dr. P. O. O'Rear (who made the trip to California to inspect McKinney when his purchase by H. B. Gentry was pending) and then to Mr. Gentry, who bred the trotter just sold. The Lad is credited with trotting a two-lap track last season in 2:10, and another McKinney—Our Lady product, Dr. O'Rear, is credited as "making good" very emphatically in the Hoosier state. The latter fellow is owned by "Genial Jim" Morrison of Shelbyville, who usually manages to have a good one or so somewhere about the place.

◈ ◈ ◈

Fleeta Dillon (2) 2:08¾, the fast but erratic daughter of Sidney Dillon who set the pacing record for fillies of her age at Lexington in 1909, has been turned over by V. L. Shuler, her owner, to her former tutor Millard Sanders, in the hope that that gentleman may be able to take some of the kinks out of her system and induce her to get her mind on her business of pacing—fast, willingly and regularly. She is undobtedly one of the fastest of the Sidney Dillons, but she has some very pronounced characteristics that are not exactly suited to the making of a real good race mare—or even a compatible wife, to say nothing of them being absolutely unbearable in a mother-in-law! After setting a world's record as a pacer she was put to trotting and made considerable speed at that gait, but was turned back to pacing on the theory that as it was more natural for her she would fret and fume much less. She has a raft of speed, and if Millard gets her to a point where she will score and stay cool she will be formidable in any kind of company, no matter how fast. Se was bred by Sterling R. Holt at Maywood Stock Farm, and is out of Lady Hilda Hills (dam of Seymour Dillon 2:20) by Wilkes Boy 2:24½, grandam Bonnie Belle (dam of five trotters) by Almont 33. She is entered in a number of class races at the exposition meetings, and may be named in the big pace June first, provided Millard "gets on the right side of her."

Moody Liggett shipped north from Hanford this week to race over the early circuit in western Canada, taking with him R. L. Friend's good pacing mare Soumise 2:10¾ by Billy Dunlap, and the green pacers Molly by Knox (entered at the P.-P. I. E. fall meeting) and Mandy S., the latter lass owned by Jolly Snider. Philip C. Byrne inherited Moody's homeguards, and that veteran trainer now has Joe Senter's trotting stallion; White Stockings, a youthful pacer the property of the owner of Molly, and George Senter's two-year-old pacer Sidney Borden by Guy Borden 2:07¼, staked in this year's futurities. They say this lad is a whole lot like his sire, and if that is the case he will be some horse, as Guy Borden looked like a regular champ.

◈ ◈ ◈

D. E. Hoffman's statement that Tom Smith 2:13¼ is still good enough to give some of the fun horses a race for first place, calls to mind the fact that his sister Vallejo Girl 2:10¼ will be raced in the northwest this year by Sheriff Donald McRae, her present owner, of Snohomish county, Washington. The Girl was a mighty consistent performer when she was five or six years old and went some nice races for Patsey Davey, taking her record Aug. 22, 1908, at Chico, where she beat Nogi in a closely contested event, trotting 2-1-1-1 in 2:16, 2:10¼, 2:10¼ and 2:11¾. As she has done no racing to entitle her to a time allowance she will have to start as a 2:11 trotter on the big rings, though the four second rule puts her in the 2:15 trots on the twice-arounds.

◈ ◈ ◈

Charley DeRyder was in the city from Pleasanton early in the week and reports that all the regulars at the MacKenzie plant are working in good shape. Recent workouts of some of the horses in the DeRyder and Webster stables are California B., trotter by Athasham, 2:17, last half in 1:05; San Felipe, 2:14, last quarter in :30; Mahomet Watts, 2:14, with the halves in 1:11 and 1:03; Sis Bodaker, trotter by Bodaker, 2:13½, last half in 1:05½; Madam Mac, 2:13, with the final quarter in :30; Maymack, 2:13, with the last half in 1:02, and the free-for-all pacers, Joe Patchen and Vernon McKinney, miles in 2:11, Joe stepping his last half in 1:01 and Vernon his final half in 1:03, with the quarter at a flat two-minute gait. Asa Pointer, the green pacer in Will DeRyder's string, is also "coming along," with a recent mile in 2:17, quarter in :30.

◈ ◈ ◈

Millard Sanders has been adding a bit of variety to the ordinary program at Pleasanton lately with the chestnut pacer Barney Oldfield, alias Jimmy Ray. "Jimmy" had a raft of speed and ambition, just a "leetle" too much for genuine comfort, and after being worked on unsuccessfully for some weeks to harness was rechristened Barney Oldfield and tried out as a "guideless wonder." He took to it like a duck to water and now nothing suits him better than to go it alone for a half or a mile, having negotiated the full route in 2:15. He does it on his own accord, without prompting of any kind, and stays right on the pole from wire to wire. He has the making of a very fast horse at this way of going, and possibly may work himself out of some of the habits that made him look like a practically hopeless case to harness.

◈ ◈ ◈

"Uncle Bob" Ellison, less widely but more formally known among horsemen throughout the land as Robert E., returned last week to his home in Lima, Ohio, after having spent the winter very pleasantly in California. For the last several weeks he had been at Pleasanton, where he threw in with Charley DeRyder on working the Mackenzie horses, being too thoroughly a horseman to enjoy complete idleness when he could ride daily behind well behaved trotters and pacers. Uncle Bob at one time or another during his stay was up behind almost all the MacKenzie "stand bys" for fast quarters and halves as well as a number of miles on the short side of twenty, his especial favorite being Vernon McKinney, whom he pronounces to be one of the best mannered horses he ever rode behind, as well as about the fastest, as the bay son of Guy McKinney can shade a two-minute clip at any part of the route. Mr. Ellison will be missed at Pleasanton, and we hope to have him back with us again before long.

◈ ◈ ◈

A recent letter from James M. Hazelton of Frankfort, Ind., who has in service the good son of Bingen 2:06¼, Border Knight 2:12¼, and the former California trotter and speed sire, Bon Voyage 2:08, states that the general outlook for the trotting industry in the central west is most excellent, and that mares from six states have been bred or are booked to his stallions for this season. Jim is very much elated over the sale of the filly Rose Knight at the Midwinter auction at Madison Square Garden, as the price paid for her by George Leavitt of Boston, $3,000, was one of the season's high water marks, and makes the Border Knight youngsters look like ready money to progressive breeders. Bon Voyage 2:08, never properly appreciated in California, has been a deservedly popular horse in Hazelton's management and is getting the patronage of some exceedingly choice mares. There are a number of his descendants here on the coast whose performances are increasing the local respect for him considerably, chief among them being the trotters Bon Cres (3) 2:10¼ and Harold C. 2:11¾, both in the stable of Sutherland & Chadbourne, both entered at the exposition trots, and both apparently quite a bit better than 2:10 trotters. Homer Rutherford's three-year-old trotter Geo. N. Patterson, by a son of Bon Voyage, is another good one for the family, as he is one of the most highly regarded youngsters at Pleasanton.

The Field for the 2:08 Trot

With the 2:08 purse failing to fill and re-opened to close June first for a purse of $2,500, the 2:08 trot, $5,000, becomes the feature race of the opening day of the Exposition trots on Saturday, June 5, in the point of money hung up. From the great array of trotters that are entered for the event it should also prove one of the most interesting races of the program, for never before has such a field of trotters faced a starter on the Pacific coast. As the main interest of horsemen in the west for the next sixty days will be "doping 'em out" for the exposition trots, we will from time to time present a little review of the fields of certain of the major events, starting the ball rolling with the race just mentioned, the 2:08 trot. Here they are, alphabetically, there being a possible field of eleven starters:

ALBALOMA 2:08¼: Bay gelding, foaled 1909, bred by L. H. Todhunter, Sacramento; entered by I. L. Borden; driven by John Quinn; son of Almaden D. 2:16¼ (sire of Dean Swift 2:08) and Loma B. by Stam B. 2:11¼, grandam Italia (dam of two trotters) by Sidney 2:19¾. Three-year-old record 2:11¼, four-year-old 2:09, five-year-old 2:08¼. Present record made Sept. 2, 1914, at Santa Rosa, when he defeated Rags, Vallejo King and Redeem in 2:08¼, 2:08¾ and 2:09. Started eight times in 1914, was five times first, once second, once third. His fastest performance was in the 2:07 trot at Phoenix, Nov. 13, when he trotted 2-2-4 to Maymack in 2:04½, 2:05¼, 2:05. In training at San Jose.

ALBERTA DILLON 2:10: Chestnut mare, foaled 1906, bred by Volney French, Montpelier, Ind.; entered by E. J. Rochon, Winnipeg; driven by W. W. Fleming; daughter of Sidney Dillon (sire of Lou Dillon 1:58½ and eleven others in 2:10) and Miss Lamartine (dam of two trotters) by Lamartine 2:27½, grandam Turkana by Mambrino Turk. Raced largely over half-mile tracks in the northwest, her best season being in 1913, her record being made that season at Salem, October 2, in the third heat of a winning five heat race, the fastest she has ever been in. In training at Pleasanton.

ELECTRIC PATCH (3) 2:09¼: Black horse, foaled 1911, bred by International 1:55 Horse Farm, M. W. Savage, Prop., Savage, Minn.; entered by International 1:55 Horse Farm; driven by Railey Macey; son of Dan Patch 1:55¼ (sire of seventeen pacers and one trotter in 2:10) and Zella Directum 2:27¼ (dam of one trotter, one pacer) by Directum 2:05¼, grandam Crescent 2:24¼ (dam of three trotters, including Gulvallis Directum 2:09¾) by Robert McGregor 2:17½. Time record of 2:29¼ as a two-year-old and 2:12 as a three-year-old. Started eight times in 1914, winning each start and never losing a heat. Has beaten 2:10 twice. Took record at Sedalia, Mo., Sept. 30, 1914, trotting his fastest race at that time, 2:09¼, 2:11. Trotted three heats at Springfield, Ill., in 2:09¾, 2:11¼, 2:11¾. In training at Pleasanton.

ESPERANZA (3) 2:09: Bay mare, foaled 1911, bred by Wm. G. Durfee, Los Angeles; owned by Clarence J. Berry, San Francisco; entered and trained by Wm. G. Durfee; daughter of Carlokin 2:07½ (his first 2:10 performer) and My Irene S. (2) 2:28¾ (dam of three trotters, one pacer) by Petigru 2:10½, grandam Johanna Treat 2:24¾ (dam of three trotters, one pacer, including Zulu Belle 2:06¼ and Del Coronedo 2:09½) by Thomas Rysdyk 10649. As two-year-old won junior divisions of State Fair and Oregon Futurities, and second money in Breeders Futurity and Clark-Canfield Stake, taking record of 2:14¼. Started in six races in 1914, winning each race, including every coast classic for three-year-old trotters. Has breeders record of 2:09 made against time on July 15 at Los Angeles, and a win-race record of 2:10¼ made in the second heat of the Stanford Stake, Sept. 19, Sacramento. Her fastest race was on Nov. 11 at Phoenix, when she was 2-2-1 in 2:10¼, 2:10½ and 2:11¼, topping the summary. In training at Los Angeles.

KID CUPID 2:08¾: Chestnut gelding, foaled 1906, bred by A. B. Spreckels, San Francisco; entered and trained by Loren B. Daniels, Sacramento; son of Cupid 2:18 and Zarina 2:13¼ by Dexter Prince 11363, grandam Miss Valensin (dam of two trotters, one pacer) by Valensin 2:23. Started in three races in 1912, once first, once second, once third, record 2:20¼ at Hemet; in 1913 was raced in central west by Keefer & Spencer, starting ten times, being three times first, twice second, once third, once fourth, getting record of 2:08¾ (losing performance) on Aug. 15 at Peoria, and win-race record of 2:10¼ on Oct. 3 at Decatur, this being really his best performance, second in 2:11½ and then winner in 2:12¾, 2:10½, 2:10¼. Last year raced on half-mile tracks largely, in stable of Loren B. Daniels, making sixteen starts, winning once, five times second, three times third. Is fast horse if Daniels can steady him. In training at Woodland.

MAHOMET WATTS 2:08¼: Bay horse, foaled 1909, bred by General C. C. Watts, Charleston, W. Va.; entered by R. J. MacKenzie, trained by Chas. L. DeRyder; son of Gen. Watts (3) 2:06¾ (sire of three trotters in 2:10) and Alla P. 2:21¼ (dam of four trotters) by Palo Alto 2:08¾, grandam Lula Wilkes (dam of five trotters) by George Wilkes 2:22. As a two-year-old, driven by Zach Chandler, won the junior division of the Horseman Futurity on Aug. 5, 1913, at Detroit, getting a record of 2:17½, and on Oct. 4 at Lexington was second in like division of the Kentucky Futurity in 2:14¾, 2:12½. As a three-year-old, still in Chandler's hands, was given time record of 2:10 on Aug. 14 at Lexington, was fourth in the Horseman Futurity at Detroit and behind the money in the Horse Review Futurity at Columbus. Was not raced at a four-year-old. Last year made two starts in the hands of W. L. Snow, winning the 2:18 trot on July 23 at Cleveland in 2:08¼, 2:09¾ and 2:11¾, finishing just behind the money in the M. & M. at Detroit. He was placed 4-4-4-2 in 2:06¼, 2:05½, 2:07½ and 2:09¼, being separately timed one heat in 2:05¼. In training at Pleasanton.

PASS ALL 2:12¼: Black horse, foaled 1907, bred by William Hardy, Birmingham, Ala.; entered and trained by E. A. Colburn, Denver, Colo.; son of Crystallion 2:08¾ and Miss Julia Deane by Guardsman 19355, grandam Nelly Riley (dam of four pacers) by Harkaway 2:28¼. Time record of 2:27½ at Lexington as a two-year-old. As a three-year-old made six starts in central west, being three times first, once second, and obtaining a record of 2:22½. As a four-year-old made eight starts, obtaining record of 2:17¼ and being but once unplaced, usually first or second. Was not raced as five-year-old. Four starts in 1913, record of 2:13¼, twice first, once third. Started but once in 1914, winning 2:12 trot at Denver on June 13, when he took his present record. Trained at Denver this winter, not yet brought to the coast.

PETER McCORMICK 2:08¾: Brown horse, foaled 1908, bred by H. K. Green, Mt. Sterling, Ky.; entered and driven by V. L. Shuler, Indianapolis, Ind.; son of Peter the Great 2:07¼ (sire of twenty-seven trotters and three pacers in 2:10) and Pearl Cecil by Cecil W. 2:28½, grandam Lilly Greene by Almont Archie 737. Was started twice as a three-year-old at Mt. Sterling and was once fourth, once second. In 1912 was taken to Indiana by Charley Bean and was purchased by V. L. Shuler after his race at Indianapolis. Made four starts on Grand Circuit, twice behind the money at Columbus, once behind at Lexington and once winner at Lexington, in the 2:14 trot where he obtained record of 2:11¾. Made fifteen starts that season, being eight times first and four times second. Made seven starts on Grand Circuit in 1913, winning at Pittsburg in 2:08¾, 2:10¼, 2:10½; second at Ft. Erie, winning third heat in 2:09½; third in Buckeye Stake at Columbus; fourth at Cleveland, second, third heat in 2:07¼; behind the money in Capital City Stake at Columbus and in the Walnut Hall Cup and Transylvania at Lexington, trotting third in the third and fourth heats of the latter event in 2:04¾ and 2:06¾. In 1914 was once behind money and once third at Detroit; fourth at Columbus to Etawah, Omar and Newzell in Capital City Stake, second the second heat in 2:05¼. Met with slight injury in this race and at Lexington was behind the money in two starts. Has had more racing experience in fast company than any other horse in this field, and will probably be favorite if he comes to the races "race sound." In training at Pleasanton.

RAGS 2:09¼: Brown gelding, foaled 1910, bred by Wm. G. Durfee, Los Angeles; entered and driven by Wm. G. Durfee; son of Del Coronado 2:09½ (sire of two trotters and four pacers in 2:10) and Atherine 2:16¾ (dam of two trotters and one pacer, including Copa de Oro 2:01) by Patron 2:14¼, grandam Athene (dam of two trotters) by Harold 410. Record of 2:12½ as a three-year-old, when he won the Breeders' and Oregon Futurities and the Stanford and Occident stakes. Made four starts as a four-year-old, second to Albaloma at Santa Rosa in 2:08¼ and 2:08¾, then third in 2:09; winner at Woodland in 2:12¼, 2:09¼, 2:11½; winner of Governor's Stake at Sacramento and second to Dean Swift in the mud at Salem. In training at Los Angeles.

DUCHESS 2:07¼: Roan mare, concerning whose breeding "authorities differ." Year Book claims pedigree untraced; Mr. McDonald gives her as "by Allerteen, son of Allerton"; Review Racing Guide gives her "foaled 1907, by Carl Scott 33260, dam Cecilian Kate (dam of Captain Welch 2:13¼) by Cecilian Prince 2:30, grandam Kate Thomas 2:24½ by G. See 3437; bred by Samuel De Bore, Napanee, Ind." The writer is inclined to think her either by Allerteen or Charley Hayt 2:06¼. She gained a record of 2:16¼ in 1912, when she made a campaign of nineteen starts, of which she won twelve, was five times second, once fourth and but once unplaced—her first start. Not raced in 1913. In 1914 won at Cleveland for Mr. McDonald, 4-1-1-1, in 2:12, 2:09¼, 2:08¾ and 2:09; fourth at Detroit, third at Grand Rapids; second at Springfield with Levi Turner driving, winning third and fastest heat of race in 2:08¼; at Dallas, with Lon McDonald again behind her, she was third to Margaret Druien and King Clansman in the 2:14 trot and second to Judson Girl in the 2:09 trot; at Phoenix was fourth in 2:16 trot and won 2:12 trot in 2:08½, 2:07¼ and 2:08, that being her best performance. In training at Los Angeles.

VALLEJO KING 2:10½: Black horse, foaled 1906, bred by Thomas Smith, Vallejo; entered by Thomas Smith; trained by Sutherland & Chadbourne; son of Gen. John B. Frisbie 41637 and Reinette by Dexter Prince 11362, grandam Clara B. by Nutwood 2:18¾. Record of 2:12¾ in 1913 in losing performance—once third, once fourth, once behind money, second to Maymack, one heat in 2:10¼. In 1914 was behind money at Salinas; at Santa Rosa was 3-3-2 in 2:08¼, 2:08¾, 2:09, and finished same way later in week in 2:10¼, 2:12, 2:10¼; at Woodland was 1-1-2 in 2:11¼, 2:10½, 2:10½, and at Sacramento was fourth in the summary. In training at Pleasanton.

VIRGINIA BARNETTE (3) 2:08¼: Bay mare, foaled 1911, bred by Capt. E. T. Barnette, Los Angeles; owned by Clarence J. Berry, San Francisco; entered and trained by Wm. G. Durfee; daughter of Moko 24457 (sire of nine trotters and two pacers in 2:10) and Zephyr 2:07½ (dam of two trotters) by Zombro 2:11, grandam Gazelle G. 2:11½ (dam of four trotters and one pacer, including Zolock 2:05¼) by Gossiper 2:14¾. Was given time record of 2:10 July 15, 1914, at Los Angeles, and on November 14 at Phoenix started in the free-for-all trot, her first and only race, beating Star Winter the first heat in 2:08¼ and finishing second the other two heats in 2:09½, 2:09¼. In training at Los Angeles.

WILBUR LOU (3) 2:10¼: Chestnut horse, foaled 1909, bred by Martin Carter, Irvington, Cal., foaled the property of W. F. Whittier, San Francisco; entered by Hemet Stock Farm; trained by Budd Doble; son of Kinney Lou 2:07¾ and Louise Carter (3) 2:24 (dam of three trotters) by Chestnut Tom 2:17¼, grandam Ingar (dam of five trotters, one pacer, including John A. McKerron 2:04½) by Director 2:17. Champion yearling trotting stallion 1910, record 2:19½ at Phoenix; winner of Breeders' and State Fair Futurities as a two-year-old; as three-year-old won State Fair and Breeders' Futurities and second money in Stanford Stakes. Not raced in 1913 and 1914. In training at San Jose.

SWINE BREEDERS MEET AT P.-P. I. E.

The annual meeting of the California Swine Breeders' Association, whose slogan "More and better hogs" is making the association a great factor in the advancement of the industry in the state, will be held on next Friday, April 23, in the Hall of Congresses in the Livestock Department at the grounds of the P.-P. I. E. The session will commence at nine o'clock in the morning and an interesting and instructive program has been arranged, including a talk on "Auction Sales and the Hog Business" by H. L. Thatcher, and an up-to-the-minute address on "Hog Cholera and Its Control" by Dr. Bert J. Cady of the United States Department of Agriculture.

The officers of the association are A. M. Henry, President, Farmington; J. K. Fraser, Vice-President, Denair, and J. I. Thompson, Secretary and Treasurer, Davis.

PROGRAM ANNOUNCED FOR EMPIRE CITY PARK.

The National Fair and Exposition Association, who have a ten years lease on Empire City Park and who operate the Greater New York Fair, have announced their early closing purses for the Grand Circuit meeting which will be held August 30 to September 4, 1915.

These early closing purses embrace six races for a total of $15,000, the entries to which will close on Monday, April 25. The Empire City Track is the sixth member in the Grand Circuit line, and follows the big meeting at Montreal and precedes the Charter Oak Park meeting at Hartford.

The races announced include "The Greater New York" purse for 2:08 trotters for $5,000; "The Manhattan" for 2:13 trotters; "The Knickerbocker" for 2:05 trotters; "The Broadway" for 2:08 pacers; "The Star Pointer" for 2:03 pacers, and the "Great Eastern Handicap" for trotters with records ranging from 2:01 to 2:25. All of these purses are of a uniform guaranteed value of $3,000 each, and the conditions are set forth in full on a business page of this paper.

This program compares favorably with that of any other point in the Grand Circuit, and the National Fair people intend to make the New York meeting one of the very greatest in the big line.

Several match races are now being negotiated for, among them a race between Directum I 1:58, the champion race horse pacer, and William 2:00, his greatest rival. Another race now in negotiation will be the bringing together of Peter Volo 2:03½, the champion two- and three-year-old trotting stallion, and Etawah 2:03½, the champion racing stallion. These races will attract a great deal of attention, and the one between Peter Volo and Etawah will be of especial interest as those two horses are now four and five years old respectively, and there is a great difference of opinion as to which is the greatest.

The management is also negotiating to secure the Horseman Futurity which is the largest guaranteed stake in the world for trotters, being worth $20,000, and embraces three races—the three-year-old trot, the three-year-old pace and the two-year-old trot, with entry list containing all the great young horses in the United States, and which are owned by the most prominent and influential men who follow the trotting horse sport.

Negotiations are also pending to secure the Matron Stake, as well as the Champion Stallion Stake. In fact, no stones will be left unturned to make the New York Grand Circuit meeting at Empire City Park one of the most attractive and highest class meetings in the Grand Circuit. A full program of late closing purses, each of the value of $1,000, will be announced later.

THE CASE OF THE BELGIAN HORSE.

My home is at Vladsloo, Belgium, three miles east of Dixmude and the Yser river. This river is the line on either side of which the battle has been raging in West Flanders ever since October 15, and from that date until recently I have been almost every other day on the battlefield along that river on the side of the Allies. It was on Oct. 10 that a large number of Belgian soldiers, horses and cannons came into that district, and after a few days reports were spread that Antwerp had fallen. We had not been informed of the Germans' being on their way toward West Flanders; neither did anybody in our country know of their plan to make their way to Calais. The railroad was used for military purposes only; no mail was carried or distributed; all telephones were stopped; no newspapers came; all kinds of rumors were spread.

Before the invasion of West Flanders we heard of the destruction of such valuable horses as Indigene du Fosteau, but reports were so conflicting that we did not know on which to rely. At that time we did not have as many horses as usual; our two fine driving horses had been requisitioned by the Belgian government when the war broke out, and paid for at near their value shortly afterward, leaving us 33 valuable stallions, of all ages, and some good mares. We sold 19 of the older horses, fearing that they would be stolen by the invaders, leaving the rest and 38 cattle.

On the west or German side of the river we have seen a few good teams of brood mares crossing into France, and I hope some more crossed on other bridges of that river; they were mostly prize-winning mares of great value. The greatest number of stallions and mares saved are in Holland, but I cannot give any approximate number. From the northern part of West Flanders, north of Bruges, I hope some horses were taken into Holland, as it is close by. I met some young men three miles north of Bruges who had left their homes on Oct. 14, leaving behind their good mares and everything on the farm. They said that the valuable brown bay stallion Laboureur, second at Brussels in 1914, had not yet moved on Oct. 13. The reason that so little has been saved west of the Yser is that the invaders came on from Ghent directly to Ostend and Dixmude, and as the Allies had placed themselves on the east side of the river the invaders formed a line on the west side. If there had been a battle where they fought trench by trench and village by village, then every farmer and breeder would have had a chance to save his valuable stock.

On Oct. 15 at 2 p. m. we learned that the invaders were ten miles east of Dixmude, and on the same day at 8 o'clock they came in contact with the Allies two miles east of Dixmude. I never saw more distress than I saw that afternoon; women with children on their arms and tears in their eyes were coming back and forth on the streets, not knowing what to do—whether to leave or to stay, or where to go. The poor laboring man whose wages were about 25 cents a day of course could not have much money, having to support a family. All he had was some common furniture, one or two goats and from a dozen to two dozen rabbits. He could take nothing with him. Farmers and breeders had sold scarcely anything since the war broke out, and if they left their homes they left all that they had, as there was no time to save anything. On Sunday, Oct. 18, we saw both big churches at Beerst and Keyem afire, and on that dark evening it made an immense blaze. On Oct. 20 at 11 a. m. the famous big church of Dixmude was shot afire, and as the wind came from the west several blocks of big houses east of the church, including the town hall, were burned.

We had a farm at Creken, 1½ miles east of Dixmude and the Yser river, having there always from 200 to 300 soldiers. When they came in from the battles that raged, usually in the morning and from dusk in the evening, we heard stories of manslaughter. On or about Oct. 23 the shells were falling a half-mile from our farm, and the Allies placed a battery of six cannons somewhat behind our farm. It was then time for us to leave the farm, for two days later the greater part of the house was blown to pieces by the shells, and within a week the barns were burned up, including all the feed. It was about the last days of October that in some parts along the Yser river the Allies feared the enemy's advance. One night 300 invading soldiers had order to jump into the river, which is at least 20 yards wide; 233 were shot before they reached the other side. The others were soon captured. Then bridges were laid under the water about 3 feet deep, and again they tried wading through, but without success.

The first week of November I received a special authorization from a Belgian officer to look on the battlefield for two cows that had gone astray from our farm, and, accompanied by a Belgian soldier, I was allowed to go as far as the river. It was a quiet, clear day. I heard no shooting except a few stray bullets whistling close to our ears. It was a terrible sight to look at both sides of the river; every building on either side for two or three miles was shot to pieces or burned. On the west side of the river the Allies had opened the dykes on the border of the river and inundated the other side. Every low pasture was under water, and the ditches, which are the only fences there, were largely swollen. But the shocking sight was that of fine horses and cattle lying dead. They were the pride of the country and the wealth of our breeders. Among them were a number of soldiers lying dead in the pastures or drowning in the water.

I was once at a distance of a half-mile when shrapnell repeatedly fell and burst above a large number of cattle and horses. Many of them were hit; the injuries received and the cracking noise of the explosions caused the wounded and scared animals to run as if wild, with their heads and tails up in the air. The noise of the shells whistling through the air can be heard at a distance of five miles.

A brother of mine lives at Furnes; we moved 25 stallions, including one of his, into France. They are now close to Calais. All are working on the farms, as the farmers are rather short of horses. I saw on the road near Furnes 100 horses going towards France; many of them were mares. South of Furnes towards Ypres many other roads lead into France, and over these there probably passed a number of horses. Taking into account the number of towns not occupied by the invaders, my estimate is that there are about 2,000 brood mares (all Belgians, as we have no other breed), not counting some coming two-year-old fillies and the weanling fillies, left in Belgium.

I learned recently from my brothers at Furnes, Belgium, and Calais, that they have met people from Eerneghem, 9 miles south of Ostend, who say the invaders constantly claim more horses, cattle and wheat. On Nov. 11 I went to Le Havre, where the Belgian Government was, and explained that our horses had been moved into France, and that our farms and feed had been burned. I had a special permission to deliver the stallions we had sold in July to Brown & Ayres, Hillsboro, O., and although they had bought a few mares from us not one was allowed to be shipped out.

The Belgians look forward to the day when our country will be freed from the enemy. When that day comes we shall try to reestablish our famous breed of horses. The refuges who left their homes are largely young men. They feared that Germany would enlist them in its army, and make them fight against the Russians. All of them know that the United States is endeavoring to feed their mothers, fathers, brothers and sisters who remained at home. But for such generosity many of them would starve. The Belgians never will forget what the United States has done for them. The situation of the Belgians is even more critical than has been reported. Although having here news from both sides people cannot realize what war is until they have been on the battlefield and seen what soldiers and refugees suffer. They would then appreciate the difference on coming to a country where there is peace and plenty.—E. H. Joye, in the Breeders Gazette.

DICK WILSON ARRIVES AT INDIANAPOLIS.

The string of trotters and pacers to be trained by the Rushville trainer, Dick Wilson, arrived at the Indianapolis track last week. There are thirteen in all and unless the "hoodoo man" follows the string, Richard will have some good bread winners next summer. The trotting mare, Henrietta 2:14¼, by Heliograph 2:12¼, is one of the crew that should make good. Last year this mare won several races over the half-mile tracks and trotted to her mark in the fourth heat of a winning race at Terre Haute. She has been halves in 1:05 and quarters in 31 seconds over the two lap courses and should be far better than a 2:10 trotter this year. Star Tramp (3) 2:18¼, the son of The Tramp, that a company of Rushville horsemen bought at the Cambridge City sale, is slated for a fast record. He worked several miles around 2:10 for Harrie Jones last year but was taken sick and did not get to the races. He is in fine form this spring and with good luck will be a hard trotter to beat. White Ball 2:12¼, and Black Ball 2:12¼, the two Portland, Ind., pacers, are thought to be good enough to get the money. The latter showed up exceptionally well in the few races that he went last summer and ought to improve enough to make him a valuable racing tool. Others in the stable are: Zulu Maid 2:16¼; Hazel Princeton 2:25; Sue Dillon, a green trotting mare by Sidney Dillon, that is thought to be high class; a green pacer, called Progress Regulator; a green pacer by Sidney Dillon; George Edwards, a green pacer by Fred Wilkes that was timed in 2:13¼ in a race last season; a green trotter by Sidney Dillon; a green pacer by Charley Hayt 2:06¼, and The Jester, a green trotter by The Exponent 2:11¾.

Wilson reports that the two Peter the Great stallions, Peter Pearl (4) 2:09¼, and Peter the Gay (2) 2:10¾, are doing a good business in the stud at Rushville. Both will be trained and raced late this season and Dick is of the opinion that he will be able to pull down some of the money with the pair. They are both classy acting trotters and, of course, both have shown that they possessed the real Peter the Great speed, as their records will prove.—Western Horseman.

Old Folks, Will Durfee's good young Del Coronado-Iran Belle trotter, waited until he had been entered at the P.-P. I. E. meeting and then was taken severely ill, making an awful effort to cash in. William and the vets pulled him through the crisis and he is apparently "coming alive" all right, but it came very nearly being a "dead heat." F. S. Whitney has also had a bit of constitutional trouble but is improving rapidly and will probably be ready to race when the season opens. Old Folks trialed on the trot as a four-year-old in 2:11 and was making considerable speed when taken sick.

Derbertha Bells

Some time ago, after a hurried inspection of a published roster of some hundreds of stallions standing for service in the United States and Canada, Joe Markey of the Horse Review put himself on record as follows: "There were stallions that I was not familiar with and knew nothing about aside from their records or registered standard numbers. It was really surprising to me to learn the high class pedigrees they carried, and I was struck by the fact that ten years or so ago such breeding could be found only on the best farms or in the great horse centers. There are hundreds of young horses that carry the blood of the great sires, of prominent colt trotters and of dams that are producers, and bred in the heighth of fashion. Breeders will make no mistake in patronizing them, and, as a matter of fact, it is these same young horses from which we may expect future progenitors of the type of Baron Wilkes 2:18, Allerton 2:09¼, Moko, Peter the Great 2:07¾, Axtell 2:12, Axworthy 2:15½, Walnut Hall 2:08¼, Bingen 2:06¼, etc. And when those breeders who are fortunate enough to secure a sire of such merit as those named, they will be richly rewarded for many years of breeding efforts. The tendency to breed only to the most noted sires constitutes a handicap. Give the young horses a chance, and by so doing save large stud fees and much other contingent expense."

These are sentiments that will meet with the heartiest approval of many breeders and stallion owners, for if only aged, proven sires are to be patronized there is small incentive to spend time and money in endeavoring to improve the already existing breed. No great sire of today is so well bred but that the potency of the speed inheritance of some of his sons surpasses that of himself, and it is to these younger sons that we naturally must look for greater prowess in the future. Every state in the union has large numbers of these youthful aristocrats, and California is no exception to the rule. There are any number of exceptionally high class, well bred youngsters whose services are available to brood mare owners. As an exemplification of Mr. Markey's description "young horses that carry the blood of the great sires, of prominent colt trotters, and of dams that are producers, bred in the heighth of fashion," take the stallion Derbertha Bells, owned by J. W. Pendleton of 1601 Seminary avenue, Oakland.

Here is an untried colt, four years of age, the product of the mingling of some of the greatest speed producing lines known to the world of the trotter—an intensification of proven potent blood that only a few years ago would have been an impossibility. He is himself by a young horse, from a young mare, but the strength of his breeding is not to be denied, and only by patronage can its worth be given due opportunity of demonstration. His sire, Derbertha Derby, is very closely bred to Charles Derby 2:20, whose get include ten with records from 2:01¾ to 2:09¼, both the sire and dam of Derbertha Derby being by the famous son of Steinway (3) 2:25¾ and Katie G. by Electioneer. Through both crosses, the Strathmore blood is stoutly reinforced by further direct traces to Hamiltonian 10 through the great brood mares Bertha, most wonderful in many ways of western matrons, and Ada F. by Antevolo 2:19½. Of the "ninety and nine" of Alcantara's daughters that have produced standard speed, Bertha stands pre-eminent, the dam of thirteen with records well within the limit, five of them below 2:10. Stellwell, sire of Derbertha Derby, is himself a sire of speed, and is a full brother to the great sextette, Don Derby 2:04½, Derbertha 2:07½, Diablo 2:09¼, Demonio 2:11¼, Ed Lafferty 2:16½ and Arner 2:17¾.

Through Beautiful Bertha, his dam, Derbertha Bells inherits new infusions of the blood of Electioneer and George Wilkes, well balanced by crosses to other most excellent sires. She is a daughter of Moormont and Abbie McNutward, both scions of royal houses when it comes to a matter of potency proven. Moormont is a speed siring son of Azmoor 2:20½, sire of Moortrix 2:07½, Betonica 2:09¼ and the dams of Nutmoor 2:05¼, Happy Dentist 2:05¾, Rowellan 2:09¾, etc., and through his dam, the triple producer Rosemont, he bears the envied cross to that queen of Palo Alto, Beautiful Bells. Through Abbie McNutward comes the blood of McKinney through Guy McKinney, sire of Vernon McKinney 2:01½, the fastest member of the entire line, Guy McKinney also providing an outlet to Guy Wilkes, another of the very great sons of George Wilkes. Lady Irene 2:14½ is a daughter of Diablo 2:09¼, and her dam, Geraldine 2:16½ by Mt. Vernon 2:15¼, produced that other whirlwind pacer of today, Leata J. 2:03.

With blood lines such as this available at a moderate price, Mr. Markey's advice to "give the youngsters a chance" seems to be well founded and aptly applicable to the California situation. Derbertha Bells is but four years old, but Mr. Pendleton has yearlings to show, and invites every investigation of both the stallion and his get.

Zombro Belle by Zombro, dam Belle Raymon (dam of Don Reginaldo 2:12¼) by Raymon has foaled a nice horse colt at Pleasanton, the youngster being by the great MacKenzie pacer Joe Patchen II 2:03¼.

DR. FARNUM DIES SUDDENLY.

Dr. C. E. Farnum, one of San Francisco's best known physicians and surgeons and a lifelong friend of the horse, died early Monday morning at St. Mary's Hospital in this city after an illness of a very few days with pneumonia. Only a very short time ago the Doctor was about his many affairs as usual, apparently in the very best of health and spirits, but broke rapidly under the attacks of the disease and for the last two or three days of his illness realized and stated to friends that his was a hopeless case.

Dr. Farnum was sixty years of age, a native Californian who had spent his entire life within hailing distance of the Golden Gate. He was educated in the public schools of this city, after which he determined upon the pursuit of the medical profession and entered Cooper Medical College, finishing his course with distinction and becoming Dr. Lane's right hand man in the conduct of that institution. He had, also, a very wide practice and attained first rank in his profession, his range of clients embracing all classes, the great and the lowly alike. Many of the city's less fortunate beings owe health and life to the freely tendered skill of Dr. Farnum, with no bills rendered.

From boyhood the Doctor had nurtured a deep and abiding affection for the horse, being sufficiently broad minded to see the merits of both trotter and thoroughbred, and for a period of over thirty years bred both at his Sacramento Valley Stock Farm, an efficiently appointed establishment of some four hundred acres between Marysville and Chico. His thoroughbreds were perhaps the most successful of his products, as he bred and raced a number of good runners in the days of the California tracks' activities. He looked forward eagerly to a revival of racing locally and was active in any movements in behalf of that object. He had given much thought to ways and means of re-establishing racing on a firm basis, and had drawn, and aided others to draw, a number of model bills whose purpose was the consummation of that much desired result. He was a profound thinker and intensely interested in the successful and scientific production of crops, both "on the hoof" and by soil tillage, being one of the first men to make a success, at least on this coast, of artificial impregnation, and known also as the author of a number of valuable articles and treatises on modern agriculture. He was a patron of the light harness futurities, and had nominations in this year's events at the P.-P. I. E.

Dr. Farnum was one of the most likeable and easily approachable of men, with a great capacity for work of his kind. He had resided for some time at 501 Devisadero street and is survived by his wife and one daughter, Miss Adaline R. Farnum. The funeral services were conducted Thursday afternoon from the chapel of Halsted Brothers, and were widely attended by numbers of both rich and poor who had been proud to call him "friend."

CALIFORNIA DRIVING CLUB MEETS.

Members of the California Driving Club met in regular session on the evening of Wednesday, April fourteenth, at their quarters in the Eagles Building on Golden Gate avenue, the principal business of the meeting being the nomination of officers for the ensuing year, the same to be voted upon next Wednesday evening. After the usual routine of business was disposed of, the following nominations were made:

For President—D. E. Hoffman.

For First Vice-President—J. A. McKerron, Luke Marisch and E. M. Doyle.

For Second Vice-President—Dr. I. B. Dalziel, J. M. Kidd, J. D. West.

For Treasurer—Al Hoffman.

For Secretary—F. W. Thompson.

For Board of Directors—J. A. McKerron, J. M. Kidd, Dr. I. B. Dalziel, J. V. Galindo, C. Becker, E. M. Doyle, Wm. Higginbottom, Dr. H. E. Allen, Dan Keating, and Jos. W. McTigue.

So well satisfied were all members with the conduct of the club's affairs in 1914 under the officers in power that season, that for the major positions of president, secretary and treasurer the nominations were unanimously declared closed after the names of the present incumbents had been introduced. From the nominees for the directorate, five will be chosen. While the by-laws do not call for the election of a starter, it was the concensus of opinion that a precedent established last season be adhered to, and Wm. Higginbottom was made sole nominee for that post. Two new members were elected, Mr. Claussen of this city and Mr. Tom Smith of Vallejo, and the courtesies of honorary membership were extended to representatives of the local press.

The officers of both the California and San Francisco Driving Clubs are working in unison to perfect an arrangement whereby the season's events will be raced over the P.-P. I. E. tracks, and the outlook for the success of the project is very good indeed. Between them, the two clubs have sufficient horses to stage a most attractive weekly or fortnightly program that would not only afford great sport for themselves but also provide most excellent and popular entertainment for the public, while the track will be just so much better in the fall for having been raced over throughout the summer.

All members are urged to be present at next Wednesday's meeting, when officers will be elected and installed and other matters of importance considered.

ENTRIES FOR DETROIT'S CLASSICS.

Merchants' & Manufacturers' Stake, 2:08 Trot, $10,000.

Albaloma 2:08¼, br h by Almaden D.—Loma B., by Stam B.; I. L. Borden, San Francisco.
Axtien 2:11¼, ch h by Axworthy—Protien, by Genwood; Samuel Harris, Plymouth, Ill.
Beirne Holt 2:11¼, blk h by Cochato—Belle Andrews, by Billy Andrews; H. J. Schlesinger, Milwaukee.
Bonington 2:06½, ch h by Bellini—Nettie King, by Mambrino King; John H. Dickerson, Memphis.
Bright Axworthy 2:08, b g by Axworthy—Honor Bright, by Antonio; Thomas W. Murphy, Poughkeepsie.
Brooklyn Hall 2:14½, b g by Brooklyn Chief—Belle Brandon, by Tom Hal Jr.; G. R. Snedeker, Kirkwood, Del.
Duchess 2:07¼, ro m by Alertene; A. McDonald, Los Angeles.
Gold Dollar 2:06¼, ch g by Pulsus—Daisy Golddust, by Emerson Golddust; Gus Macey, Huntsville, Ala.
Grand Marshall 2:07¾, blk g by Ess H. Kay—Klytia, by Prince Regent; W. L. Snow, Detroit.
Jack K. 2:14¼, ch g by Silverfinch—Bird, by Indianap; H. S. German, Carleton, Mich.
J. Malcolm Forbes 2:08½, blk h by Bingen—Santos, by Grand Sentinel; E. F. Geers, Memphis.
Junior Watts 2:11¼, b h by Gen. Watts—May Stewart, by San Meto; Guy Rea, Lexington.
King Clansman 2:06¾, br h by The Clansman—High Born Lady, by Re-Election; Dick McMahon, Libertyville.
Laramie Lad 2:09½, b g by Master Bo; A. McDonald, Los Angeles.
Lee Axworthy 2:08, b h by Guy Axworthy—Gaiety Lee, by Bingen; Pastime Stable, Cleveland.
Lucile Spier 2:07¾, b h by Directum Spier—Lucile, by Brummell; George W. Slaughter, Detroit.
Lusitania 2:19¼, blk m by Kinney Mac—Renie T.; J. Crouch & Son, Lafayette, Ind.
Mahomet Watts 2:08¼, b h by Gen. Watts—Alla P., by Palo Alto; Charles DeRyder, Pleasanton.
Margaret Parrish 2:06¼, b m by Vice Commodore—Lady Leyburn, by Arion; Thomas W. Murphy.
Miss Directed, br m by Directwell—Vida M., by Prodigal; Beau Ideal Stock Farm, West Park, O.
Miss Rilda 2:08½, b m by Peter the Great—Sis Directum, by Directum; J. O. McAllister, Lexington.
Pass All 2:12¼, blk h by Crystallion—Miss Julia Deane, by Guardsman; E. A. Colburn, Denver.
Peter McCormick 2:08¾, by Peter the Great—Pearl Cecil, by Cecil W.; V. L. Shuler, Indianapolis.
Peter Johnson 2:08, b h by Gray Petrus—Sudena, by Maxworthy; Walter R. Cox, Dover, N. H.
Peter Scott 2:07½, b h by Peter the Great—Jenney Scott, by Bryson; Thomas W. Murphy.
Reusens 2:07¼, ch g by Prince of India—Miss Sligo, by Sligo; Algot Johnson, Oacawana, N. Y.
The Guide 2:07½, b h by Peter the Great—Ethel Vaughan, by Arion; E. F. Geers.
Willgo 2:07¼, b g by Togo—Ruth Harfleur, by Alcantara; J. Crouch & Son.
Worthy Prince 2:11¼, b h by Prince McKinney—Nell Worth, by Axworthy; Walter R. Cox.

Chamber of Commerce, 2:07 Pace, $5,000.

Alcy E. 2:05½, b m by Alcymont—Equity Madam, by Equitywood; Dick McMahon.
Bessie Bee 2:06¼, b m by Star Onward—Agnes H. B., by Heretic's Harmony; Louis E. Bigler, Wadena, Ia.
Bud Elliott 2:08, br g by Prodigal—Evelyn MacKay, by Pegasus Dey; E. F. Geers.
Camelia 2:04½, br m by Cummer—Veta S., by Sidney Prince; Walter R. Cox.
Fred W. 2:08¾, b g by Modern Chimes—Nellie G., by Almont Brunswick; F. D. Weeks, Shirley ,Mass.
Hal Boy 2:06¾, b g by Hal B.—Altalena, by Altamont; Edward Peterson, Omaha.
Hal Plex E. 2:09½, b h by Empire Hal, dam by Duplex; E. F. Geers.
Hal S. 2:16¼, ro g by Hal Chaffin; Thomas W. Murphy.
Judge Ormonde 2:05¼, blk h by Ormonde—Hazel Banks; C. A. Valentine, Columbus.
Little Bernice 2:06¼, b m by Del Coronado—Pearl Pointer, by Sky Pointer; Sam Watkins, Los Angeles.
Lustrous McKinney 2:11¼, b g by McKinney—Splendor, by Stately; A. S. Rodney, Jersey City.
Major Ong 2:03½, b g by Major Gantz—Bessie B., by Iowa Sentinel; Thomas W. Murphy.
Miss Miriam 2:12¼, ro m by Margin—Alsie Onward, by Onward; Parker Bros., Niles, Mich.
O. U. C., b g by C. The Limit—Rosie Woodburn, by Easter Wilkes; S. S. Bailey, Pleasanton.
Peter Farren 2:10, b c by Peter the Great—Hawthorne, by Jay Bird; Thomas W. Murphy.
Patrick M. 2:11¼, blk g by Norbells, dam by Gamester; H. H. Stokes, Urbana, Ohio.
Periolat 2:05¼, b h by Klatawah—Emma Louise, by Noblesse; Frank Cairl, Monroe.
Queen Abbess 2:10¼, br m by The Abbe—Queen Regent Ideal, by Mambrino King; Ideal Stock Farm, East Aurora, N. Y.
Rastus 2:05¼, br g by Liberty Boy—Georgia Rose, by Grant's Abdallah; A. Frank, Kansas City.
Rose Equity 2:07¾, b m by Equity—Annie Rose, by Orphan Knight; H. C. Kibbee, Topeka, Kans.
Ruby K. 2:06¼, b m by Wilkie O'Neil—Temple Queen, by Temple Bar; Dempsey Bros., Highland Park.
Russell Boy 2:05½, b h by Rustic Patenter—Maud F., by Vatican; W. A. McDaniel, Jacksonville, Ill.
Single G. 2:07¼, b h by Anderson Wilkes—Little Gyp, by Shoo Fly Gyp; W. B. Barefoot, Cambridge City, Ind.
The Beaver 2:08¾, b h by Searchlight—Ripple, by Glenbrook; E. J. Rochon, Winnipeg, Man.
Thistle Patch, blk h by Joe Patchen—Sara Ann, by Thistle; W. L. Snow, Detroit.
Walnut Grove 2:05½, blk h by Constantine—Lindis, by Jackdaw; J. A. Young, Port Arthur, Texas.

Hotel Ponchartrain Stake, 2:12 Trot, $2,000.

Axtien, b h by Axworthy—Protien, by Glenwold; Samuel Harris.
Balala, b h by Bingara—Kalala, by Kremlin; A. S. Pratt, Barrenton, Mass.
Brooklyn Hall, b g by Brooklyn Chief—Belle Brandon, by Tom Hal Jr.; G. R. Snedeker.
Bordelon, b h by Bingara—Kishmena, by Kremlin; J. D. Hooper, Murfreesboro, Tenn.
Beirne Holt, blk h by Cochato—Bell Andrews, by Billy Andrews; H. J. Schlesinger.
Eclear Kurtz, b m by John R. Kurtz—Belle Line, by Donaline; Joseph H. Lesh, Goshen, Ind.
Great Isle, b h by Peter the Great—Belle Isle, by Actell; Thomas W. Murphy.
John Dillon, b h by Sidney Dillon—Miss Grattanwood, by Grattan Boy; W. A. Watson, Thomasville.
Louise Dillon, b m by Sidney Dillon—Dorathea Mac, by Great Heart; Beau Ideal Stock Farm.
McCloskey, br g by Theodosius—Maggie C., by Odd Socks; A. McDonald, Los Angeles.
Mainstep, blk g by Mainsheet—Julia Lee, by C. F. Clay; Walter R. Cox.
Marry Warren, b m by Zombro—Rosa Bonheur, by Auctioneer; Kinwood Farm, Norristown, Pa.
Mirthful, b m by Star of Patchen—Lizzie Belle Smith, by George Simmons; Thomas W. Murphy.
Russian Dame, b m by George Muscovite—Exelma, by Expedition; E. F. Geers.
Slip Past, br m by E. H. R.—Morriselle, by Morris H.; Walter Palmer, Ottawa, Ill.
Seneca Boy, ch g by King Entertainer—Seneca May, by John Adams; E. J. Rochon.
Sadie S., b m by Archdale; Thomas W. Murphy.
Todd Temple, br g by Todd Mack—Lady Lake, by Temple Bar; James Westwater, Columbus.
Worthy Prince, b h by Prince McKinney—Nell Worthy, by Axworthy; Walter E. Cox.
Kongo, b g by Moko, dam by Director; George D. Conner, Detroit.
June Red, b m by Red Medium—Rozel Maid, by Rozel Russell; Dick McMahon.
John Gwynne, b h by McMyrtle; V. L. Shuler.
Loe Blossom, b m by Lepide, dam by Harry Hontas; Edward Peterson.
Bertha Carey, b m by Zombro—Nell, by Bob Mason; R. J. MacKenzie.
Miss Alice McGregor, b m by Jay McGregor—Black Alice; J. O. McAllister.

Hotel Griswold Stake, 2:10 Pace, $2,000.

Alta Wood, gr m by Allanwood, dam by Alcryon; C. A. Valentine.
Aconite, b h by Aquilan—Mattie S. Wilkes, by Simmons; Walter R. Cox.
Billhurst, b h by Wilkeshurst—Mamie H., by Rayon; G. H. Etherington, Abilene, Kans.
B. M., b h by Peachdale; Walter R. Cox.
Bingen Pointer, b h by King Bingen; W. L. Snow, Detroit.
Derby Custer, ch h by Ed Custer; Thomas W. Murphy.
Dustless McKinney, b h by McKinney; Thomas W. Murphy.
Frayola, b h by Expedition, dam by Allerton; Arthur Heilmann, Madison, Wis.
Flay B., b m by Quaker K.—Babette, by Sir John; Frank A. Cares.
Hal Boy, b g by Hal B.—Altalena, by Altamont; Edward Peterson.
Hal Conner, br h by Argot Hal—Barbette, by Tennessee Wilkes; A. H. Frank, Memphis.
Jean, b m by Flosko; Thomas W. Murphy.
Lord Seymour, br h by Barongale—Caracas, by Bingen; Frank A. Cares.
Major Ong, b g by Major Gantz—Bessie J., by Iowa Sentinel; Thomas W. Murphy.
Present Queen, b m by Searchlight—Valentine Dillard, by Hal Dillard; J. O. McAllister.
Prestolite, blk. m. by Don Gale; E. F. Geers.
Rella E., b m by Searchlight—Kitty Arion; J. O. McAllister.
Ruby K., b m by Wilkie O'Neil—Temple Queen, by Temple Bar; Dempsey Bros.
Symbol Meath, b g by Symbol McPhee—Thisby D., by West Meath; C. B. Dillenback, Eldorado, Kans.
The Beaver, b h by Searchlight—Ripple, by Glenbrook; E. J. Rochon.
Walnut Grove, blk h. by Constantine—Lindis, by Jackdaw; J. A. Young.
Zomblack, bl h by Zombro—Madeline Marshall, by Demonio; R. J. MacKenzie.

DEATH OF C. H. NELSON.

The death of Charles Horace ("Hod") Nelson, Maine's first famous horseman, last week, at the Soldiers' Home at Togus, Me., to which he had been taken a short time before on account of the illness of Mrs. Nelson, revived many memories of the noted Pine Tree State Civil War veteran, breeder and developer and of his wonderful trotter, one time world's champion, Nelson 2:09, the "Northern King." The memory of Nelson, the true horseman, than whom there never lived a greater lover of man's noble friend, and of Nelson, the horse, will live long in the history of the race track, not only in his native state of Maine but throughout the country.

Columns and columns have been written about Nelson the man and Nelson, the Northern King. Here, however, mention will be made of two features of the history which appealed to the writer and as related by old-time Maine horsemen. The first is what may be characterized as "The breeding of Nelson 2:09, an accident."

Not having any old files of the horse papers available, we do not know whether or not these facts have been heretofore published but assume that they have been. After the war, in which Mr. Nelson proved to be a good and brave soldier, he resumed dealing in horses, which he bought in Maine and generally shipped to the late W. P. Balch of Boston. In one consignment Mr. Nelson shipped a mare which upon her arrival in Boston was in a bad way, being threatened with death. Mr. Balch, an astute trader, feared he would lose on the deal, informed Mr. Nelson of the illness of the mare and made a proposition to give Nelson a yearling colt in return for the mare, which had many good points appealing to Mr. Balch. Mr. Nelson accepted the proposition, Mr. Balch retained the mare, taking a chance on her recovery, and shipped to Mr. Nelson the colt, considered just an ordinary trotting bred youngster. He was by Tom Rolfe and was named Young Rolfe, later famous as the sire of Nelson 2:09, and as the head of Mr. Nelson's stock farm. But for the sickness of the mare Young Rolfe would probably not have gone to Maine.

Gretchen, dam of Nelson 2:09, and a daughter of the old Maine campaigner, Gideon 2:21½, was bought at an auction when the horses of Mrs. Nelson's father were dispersed. It is reported that Mr. Nelson tried to sell Gretchen to several horsemen for $250. She could not be sold for that price and later produced the Northern King, that first came into nation-wide prominence in the trotting world when he trotted in 2:26¾ as a three-year-old at the Maine State Fair in Lewiston.

The other "feature" to which we refer was Mr. Nelson's individuality. He had his good and bad qualities and it seems as if the latter predominated when he was before the public. Worst impressions of a person, it would seem, last longer than impressions gained from the good qualities. This appeared to be so with Mr. Nelson—a sharp trader, keen in his business dealings, a thorough horseman, knowing the business from A to Z, kind and considerate in his treatment of his horses; but on the other hand a very positive and quick-tempered man, these latter characteristics of his make-up often getting him into trouble. His intimate friends often attributed his poor health to his ending of the life of Nelson 2:09, by his own hand in his declining years.—Horseman.

WANTS TO BE A STARTER.

Editor The Horseman:—I would like to be a race starter. Will you kindly inform me what I have to do to become a licensed starter?—O. F. B.

The first thing to do, is to send $5 to W. H. Knight, secretary of the American Trotting Association, if you intend working west of Ohio, and the same amount to W. H. Gocher, secretary of the National Trotting Association, if you intend officiating in the east. Along with both of these applications you send references as to your ability from two or more secretaries of tracks. After you receive these licenses, then put your disposition into hard training, as your life troubles have just started. You must study to have an even disposition; don't get excited and at all times be impervious to comment, whether it is published in newspapers or handed to you in a loud voice from men on the tracks where you are starting. You cannot please everybody, so don't try; please yourself and you will be doing a good day's work.

In small towns where you are starting, your most trouble will be with that long, fluffy-haired guy, who hangs around the judge's stand along with a lot of others, who talk so loud. This guy's occupation is holding down the third chair in the town's local barber shop. He is a very prominent and important man in the town, as all the scandal of the village can be traced to him. He starts in at the end of each fair to save up his tips to spend at next year's fair. When this time comes around, he picks out a local horse to win a race, although the field may contain a number of others that have been winning right along, but he never figures that these outside horses have any chance, because the swipe on the local horse has told him that it could not be beaten. This same swipe has not been out of the village for years, but knows it all. When the day of the race comes, this great sporting barber puts on his yellow-tinted suit, glaring hat and red necktie and gathers his savings for a grand plunge on his favorite. He bets his entire savings of the year, about $1.40, on this race and loses, because the local horse was in pain at the first quarter, and by the time the race is ever he has not reached the flag. Then this plunging barber commences to salute you, with: "Rotten!" "Take him out!" "Who told you you were a starter?" and a lot of other pet names of his. If you are inexperienced you will answer him back, but if you have been over the jumps, you will let it pass.

You must always be prepared to answer questions, no matter on what subject. If a man loses his wife or children in the crowd on Big Thursday, you must know where they are. The condition of the weather next day must be known; no matter if the president, secretary and speed superintendent each arrange the classes differently, you must know which one will be adopted. If the track is in poor condition, it is your fault. If you score a field of horses twenty times and then let the horse off (that has been spoiling all your starts) on a break, you are rotten; you should have scored them twenty times more. If a crowd is on the track, you must do police duty and get them off. Don't forget to keep a memorandum of all lost children as you are expected to find the owners of those unclaimed.

Another important duty is to watch if the president of the association or any other officer, has a horse in a race or intends parading one before the stand during the meeting. If this happens you must make a special announcement, stating "that this was the greatest horse ever foaled, etc." Throw the bull even if you do get the "huff and mouth disease." This is what makes you a great starter in the eyes of the man who owns the horse; the postal authorities will not allow us to print what you are in other people's eyes.

If the vaudeville acts of some cheap saddle horse, parading in front of the stand, interferes with your starting the races, why cut out the races by all means, as you make yourself solid with the drivers of the racing horses. They don't see much of this kind of entertainment and enjoy it because they know that horses race better when cold, and the longer in the barn, the better they get. Another thing to remember is, never to turn down a swipe when he gives you a hard luck story, as many of these "poor" fellows depend on this form of graft for a living. Some swipes are too bashful to ask you, so don't insult them by free offerings.

If a trainer comes to you before a race and tells you that his horse is bad getting away, why hold the entire field until you get this one horse away to please the driver. The other drivers would rather score than have one of their fraternity dissatisfied. Always keep asking the officers of the association if your work is satisfactory, they enjoy telling you "yes," then you wonder why you are not engaged for another year. After you finish making six announcements of each heat to the grandstand and somebody in an automobile about one hundred yards down the stretch, who was not in range of your horn, may want another announcement for his special benefit, give it to him, it keeps your voice in practice.

You must always have a good memory and remember the names of everybody you meet; if you don't it will cause unpleasantness. Another thing to remember, always stop at once, what you are doing, to answer the questions of newspaper men; of course they are the most important people on the track and you are at their services at all times. If a driver wants to stay in the stable for an hour or so between heats, let him do it, he is more important than the waiting drivers, who are already out. You must be prepared to entertain all who have grouches against you at the hotel in the evening. Be a good fellow and spend your week's salary buying booze, it will make your head clearer in the morning, and makes your voice huskier.

Never leave the stand and go down on the track to look over a horse which the judges think is being tampered with, somebody may punch you in the jaw and still remain unknown. This accident happened to a prominent starter in the east last year. When a driver holds you against a fence and threatens all kinds of damages to you, don't answer back, as he may make good and spoil your posing ability in the afternoon; wait until you can slam him through the book of rules. It is safer, particularly when the railroad schedule of departing trains is conveniently arranged for a safe getaway.

There are a number of other points that would help you out some, but lack of space will not allow us to print them and as these are the most important, we hope they will help you out. While starting horses, remember this parody on a popular song: "I never raised my boy to be a starter."—Horseman.

SPEED ON TAP AT SANTA MARIA.

There is "kind of a feeling" that a half-mile track is not the fastest thing in the world, and also that the ring at Santa Maria is no "Phoenix footing," but from the way the several horses quartered there are working, one of two things is very evident—that that track is faster than credited, or that the local horses have speed to burn; maybe a little of both. W. L. Young with Ben Corbett Jr. by Ben Corbett, dam Miss Thompson by Thompson, and Robert Earl with R. W. went the route in company recently in 2:13 with the last half in 1:02, and from the reports by the underground wireless they are able to step that same track quite a bit faster. Garrett Blosser is working Pointer's Daughter 2:11¼ by Star Pointer 1:59¼, dam Banker's Daughter by Arthur Wilkes, and the girl is picking up her speed nicely, traveling miles lately in 2:20. Both Ben Corbett Jr. and Pointer's Daughter are entered at the fall meeting at San Francisco.

The Santa Maria horsemen will hold a matinee on May Day, with a pacing race in which R. W., Ben Corbett Jr. and Pope Hartford are entered, being scheduled as the main event. The Pope horse, who is owned by William Finley, has been going around 2:16 of late, with halves at a 2:10 gait, and a lively contest is expected.

QUARANTINE MODIFIED IN SEVEN STATES.

An order effective April fifth is the first of the various quarantine orders for foot-and-mouth disease which adds no new territory to the quarantined area and consists entirely of modifications because of improved conditions. In connection with the fact that for a brief time on April 1 there were no animals in the United States known to have the disease this is regarded as significant evidence of satisfactory progress in the campaign. It is also pointed out that Michigan, the state in which the epidemic started and which has suffered a loss of 7,799 animals, is believed to be entirely free from the disease. All territory in the state is now included in the restricted area, for which the regulations are the least stringent of any of the four classes in the quarantined area. No territory east of the Mississippi and north of the Tennessee-Virginia line is entirely free from quarantine regulations.

The new order known as Amendment No. 5 to B. A. I. Order 236, affects the quarantine regulations in the following particulars.

Illinois: All of the counties of Henry and Whiteside are now in the exposed area.

Indiana: Allen and Johnson counties, together with territory in St. Joseph county within five miles of infected premises, are modified area. Morgan are added to the restricted area.

Iowa: The counties of Cedar, Iowa, and Johnson are restricted area. Jones county is a modified area with the exception of Washington Township which is exposed.

Kentucky: Territory in Hardin, Jessamine, and Scott counties not within three miles of infected premises is made restricted area and territory in Woodford county within three miles of infected premises a modified area and not within three miles a restricted area.

Michigan: Berrien, Saginaw, and Tuscola counties are added to the rtsircted area.

Ohio: The following counties are added to the restricted area: Belmont, Champaign, Darke, Fayette, Franklin, Fulton, Hardin, Putnam, Shelby and Wyandot.

Pennsylvania: Indiana county is made an exposed area and Beaver county restricted area.

West Virginia: Ohio county is made exposed area; Brooke, Hancock, and Marshall counties restricted area.

The Park Amateur Driving Club at a recent meeting decided to disincorporate and reincorporate on a stockholding basis, in preference to the membership system now in effect, the reorganization and stock issue being based on the valuation of their property at current offers. This will allow those wishing to retire from the club to do so, and at the same time get value received for their interest in the club's holdings, which will be extensively improved after the reorganization is effected.

EASTER MATINEE AT SANTA BARBARA.

The first race meeting of the year on the local track, last Sunday afternoon, was productive of some exceptionally high-class sport, and while the people who availed themselves of the opportunity to witness it were not so many as expected, they made up in enthusiasm what the occasion lacked in numbers.

The program began with the 2:40 class, in which the contestants were Lady Cupid, owned by J. S. Keran of this city, and Santa Paula, a hoppled pacing mare, owned and driven by Jas. Gill of Oxnard. The first heat went to Santa Paula in 2:44, after the Cupid mare made a mistake on the back stretch, from which she had trouble in recovering. The Oxnard mare proved that she could do it again, by annexing the second heat and race, in the creditable time of 2:27. In this heat both horses were on their good behavior, and paced the mile without a break.

The feature race of the day was the free-for-all, which brought together a very well-balanced field of four pacers, consisting of Zomar, owned by Donlon Bros. of Oxnard; Sunshine, the property of Henry Delaney of Ventura, and the local horses—John Black, owned by C. C. Hickey, and Iris, owned by M. W. Beadle. This race was changed just before the start from best two out of three heats to best three out of five. Before the meet, Zomar seemed the choice, and this judgment was justified, for he got away on the pole and was never in difficulty, although Iris forced him to step a pretty good mile in 2:19¾. John Black was third, two lengths behind Iris, and Sunshine last, she making three breaks in the mile. The second heat started like the first, Zomar setting the pace and Iris forcing him out, until the last turn, where the Oxnard horse had a little trouble, causing a slight delay, just sufficient to lose the heat, John Black and Sunshine again finishing third and fourth, respectively, the time being 2:20.

Henry Delaney piloted Sunshine in the third heat, in place of William Cook, who drove her in the first two, and made a determined bid for the heat. They all went away fast, and going into the back stretch Iris decided it was his turn for an ascenscion, and accordingly made a break, Zomar and Sunshine both passing him. The mare gradually opened up the lead on the home stretch, she looked a safe winner. Zomar proved his gameness, however, by standing the hardest kind of a drive and just managing to land the heat at the wire in 2:19½. Sunshine was second, Iris third and John Black, who seemed short of work, last. The fourth and last heat was practically a duplicate of the third, Zomar again winning from Sunshine in the last stride in 2:20½. The uncertainty of this race kept the crowd in suspense during the entire afternoon, and the concensus of opinion was that it was a first class, clean-cut contest, and that the best horse won.

The program was concluded with the half mile running race, which was won by the favorite, Barney Mason, owned by O. T. Fitzpatrick of Saticoy; Frances Hogan second, Lady Suffragette third, Rival Stonia fourth and Queen Bess fifth. Time, 52 seconds.

The visitors from the south expressed themselves as being highly satisfied with the afternoon's racing, and arranged to hold a meet in Ventura on Sunday, April 18, at which time the horses from Santa Barbara will again try conclusions with those from that city, and doubtless many from here will make the trip to see them race.

The track yesterday was fair, although a little more time would have been beneficial, and taken altogether, the promoters, the members of the Santa Barbara Driving Club, feel that their efforts in putting on this meeting were well repaid.—Morning Press, Santa Barbara.

ROCKLIN DRIVING CLUB.

Members of the Rocklin Driving Club held their first meeting early in the month and elected the following gentlemen to pilot the club in its 1915 campaign: F. H. Metz, President; James Waddell, Vice-President; B. N. Scribner, Secretary; F. W. Quast, Treasurer, and W. E. Tuttle, H. Blackwell, S. Henderson, B. N. Scribner and F. H. Metz, Executive Committee. It is the intention of the new officers to make the Rocklin Driving Club one of the foremost of its kind in northern California, and a race meeting will be given every two weeks for the entire season, beginning on May Day.

The club boasts of having under the ownership of its members some of the best bred colts and racing stock in the country. Rocklin is the home of the good race horse and speed sire Stam B. 2:11¼—and, incidentally, the old fellow looks and acts like a two-year-old in spite of his twenty-three years—and there are many horses in the locality by the son of Stamboul 2:07½ and such other sires as Zombro 2:11, McKinney 2:11¼, The Bondsman, Charles Derby 2:20, Bon Voyage 2:08, etc. Members of the driving clubs at other points are invited to take part in any of the meetings of the Rocklin organization, which will reciprocate by sending its best horses to compete with those of their visitors on their native heath. Rocklin has one of the best two-lap tracks on the coast, and in the days gone by many famous races have been staged there between the history making trotters of the west.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

THE SORA RAIL.

[By Harold C. Bryant.]

The sora rail is one of the commonest of the rails in both fresh water and salt water marshes throughout the State of California. They are apparently more abundant during the summer and it is probable that many migrate farther to the south during the winter. At any rate it is a known fact that during the winter this bird is most abundant in Mexico and Central America.

The sora rail breeds from Southern Canada southward to Southern California, Utah, Colorado, Kansas, Illinois and New Jersey. It spends the winter season from Northern California, Illinois and South Carolina south through the West Indies and Central America, to northern South America.

This rail, hardly as large as a robin, may be readily distinguished by its short, chicken-like bill and black face and throat. Although possessing barred flanks, like the Virginia rail, the sora has a lead-colored breast instead of one of cinnamon color. The habits of these two rails are very much alike, however.

There are a number of recorded instances of the nesting of this species in California. The northernmost record is for Mad river, Humboldt county, and the southernmost for Escondido, San Diego county. This species breeds regularly at Lake Tahoe and probably at many other places in the State. The nest is usually placed in a fresh water marsh among tall grasses. Marsh grass is the principal structural constituent, and the nest is usually partly supported by surrounding grass stocks. Sometimes weeds or tules are used and the nest is often placed above water. From four to fifteen drab colored eggs, marked with reddish brown and purplish spots, are laid. The young, like those of other rails, are glossy black and are capable of taking care of themselves soon after they leave their shells.

The flight of the sora rail is usually low and is rarely extended to more than fifty or a hundred yards. Even in migrations this bird appears to fly close to the earth, for it is often found beneath telegraph wires where it has been killed by contact with them. Although not an easy flyer, this bird has strong legs and is able to run rapidly. Like the body of all rails that of the sora is very thin; hence it is able to pass readily between the reeds. The common expression, "As thin as a rail," has reference to these slender birds. The sora rail is said to answer a clapping of the hands with a mocking, cackling note, and the hunter oftentimes claps his hands in order to attract inquisitive rails within gunshot. Toward sunset the marshes often resound with the musical calls of the sora. Were it not for these calls, in fact, the birds would be seldom located, for it requires endless patience and keen eyes to discover their motionless forms even in places where one would suppose there was insufficient growth to conceal them.

Ranchers in mowing fields of alfalfa near a marsh often find that the sora rails will remain hidden in the unmowed hay until the last narrow strip is being cut, when a number of them make off to better cover.

The food consists mainly of insects, but snails and other aquatic creatures are taken. In the Eastern States the sora also feeds on wild rice. Practically all of the food is obtained in wet marshes.

In the East thousands of sora rails were formerly killed by sportsmen and market hunters. Even though very easy to shoot, this bird has always been highly prized by hunters because of its delicious flavor. In the West it is hardly abundant enough to make it a desirable game bird, nor have sportsmen as yet been driven to such "small game."

The ability of the sora rail to hide in very slight cover and the fact that it is not widely hunted in this State partly compensates for the ease with which it is killed. There is not sufficient data at hand to allow of a statement as to the exact status of this bird in California at the present time. It is probable, however, that this bird will continue to appear in numbers in our State unless some unforeseen circumstance intervenes. The federal migratory bird law protects all rails in this State until 1918. This will doubtless give the different species a fine chance to increase in numbers.

Sierra Trout Fishing.—Sportsmen in the mountain counties have learned that the season for trout fishing will not open until May 1 this year, because of the decision of the appellate court declaring the act creating districts unconstitutional. The fish and game commission has reported to inquirers in the mountain counties that the officials are operating under the laws enacted in 1911. The district measure was enacted in 1913. Therefore the open season for trout fishing will commence on the first of May this year.

ARID CALIFORNIA AND ITS WILD ANIMAL LIFE.

Following the account of "Animal Life on the Mojave Desert" which was given in these columns several weeks ago, we find a companion story by Frank Stephens, in a report to the State Fish and Game Commission, which applies particularly to the Colorado desert and, we take it, is of equal interest to the first mentioned narrative. Mr. Stephens' report follows:

Perhaps it may seem a little severe to term southwestern California arid, but the most distinctive character of the region I wish to indicate by this heading is its dryness as compared with the region west of the Sierra Nevadas and the mountains to the State line. While a large part of this region is arid, there are localities of greater or less extent scattered through it that are less arid, either from the presence of streams or springs that furnish water for irrigation or from a higher altitude causing a moister mountain climate. Animal life is more abundant and of greater variety in these less arid localities, but there is some life in all parts of this region. A greater proportion of it is nocturnal than in the western part of the State, and animals of nocturnal habits are more likely to be overlooked than those that are abroad in the daytime. This is the principal reason why so many people think that there is almost no animal life on the deserts. Really one does not see much life in traveling through this region, yet there is a far greater amount and variety there than a casual observer would think possible.

In a general way the southern part of this region is known as the Colorado desert. It is the lowest in altitude, the warmest, and averages the dryest; but it also contains the largest body of cultivated land, principally under irrigation from the Imperial canal.

North of the Colorado desert is the Mojave desert, a plain of higher altitude interspersed with low mountains, usually isolated or standing in small, irregular groups. Some of the northernmost of these mountains rise to a considerable height and carry small coniferous forests. A more or less connected range of low, barren mountains divides the Mojave desert from the Colorado.

In the strict sense of being a land without animal or vegetable life these are not desert, as there is everywhere some animal life, and shrubs and cactusses occur, albeit sparsely in places. But in the sense used by us "old desert rats," as the prospectors, cattlemen, frontiersmen and naturalists frequenting this region are often called, a desert means a land where springs and water holes are many miles apart and grass or other horse feed is very scanty or altogether lacking.

All animal life is dependent on vegetable life, hence when plants are few animal life is correspondingly scanty. But the plants of this region sprout their seeds quickly, grow rapidly and mature early when showers do come, and showers are quite likely to be heavy though brief. Then many annuals quickly appear that soon ripen a quantity of seeds that furnish food for many small animals and some birds. If the rains happen to come at short intervals and extend over several weeks, the desert becomes a brilliant flower garden. Then the desert is a paradise for botanists, entomologists and other naturalists. Plants and insects of many species appear, live a brief life and disappear, for years perhaps. This fullness of bloom happens but rarely, however. I have seen it at its best but twice in many years.

Deer are found only near the border of arid California, the deserts being unsuited to their wants. Formerly some burro deer lived along the Colorado river, but the settlers and prospectors have practically exterminated them there. Few California mule deer range down the eastern slopes of the mountains bordering the western side of the deserts.

I do not think that antelope were ever plentiful in this region, but I once saw four antelope where Carrizo creek opens out to the Colorado desert, and I have seen fresh tracks of antelope many times in the southern part of this desert. As near as I can learn no antelope has been seen in that part of the Colorado desert north of the Mexican boundary for seven or eight years. I am told that a few still survive near Lake Maquata in northeastern Lower California, and an occasional individual might wander north as far as the boundary. A small band of antelope still live in Antelope valley, which is the western end of the Mojave desert. This band is carefully protected, and is the only one I know of in southern California.

Bighorns (mountain sheep) still live in eastern California. The sub-species of the desert mountains is the Nelson bighorn. Recently (1912) Dr. Joseph Grinnell described a new race from the Sierra Nevadas as the Sierra Nevada bighorn. It is probable that the few bighorns living in the San Gabriel and San Bernardino mountains belong to the latter race, as Nelson bighorns prefer a warmer climate, being seldom found as high as 4,000 feet above sea level, while the Sierra Nevada bighorns live mostly above 8,000 feet altitude.

Among the rough and almost inaccessible canyons and spurs of the eastern slope of the coast range of mountains in San Diego and Riverside counties, and in the desert hills and low mountains of eastern Riverside, San Bernardino, Inyo and Imperial counties, Nelson bighorns occur in small bands or singly. There are few large bands left. Those remaining maintain a precarious existence by constant watchfulness. Their natural enemies aside from man are few. Cougars (mountain lions), that are so destructive to bighorn lambs in the Rocky Mountains, do not occur at all in most of this region, and are very rare along the Colorado river and on the eastern slope of the coast range. Nor do golden eagles do much harm to the lambs. Coyotes kill an occasional lamb or an isolated adult, but adult bighorns, especially if in a small band, are able to fight coyotes away. But bighorns cannot cope with man. Sportsmen do not kill many bighorns, but prospectors, ranchmen and Indians do kill many, in season and out of season, male and female. Most prospectors contend that they have the moral right to kill game for food whenever they have the opportunity. Travelers and outlying ranchmen pick them off occasionally; Mojave and other Indians kill some. Among them they make life exceedingly hazardous for bighorns. The frontier people particularly resent entire restriction of hunting. I believe that if a brief open season was allowed the closed season would be better respected, no more bighorns would be killed then than now, and it would be much easier to educate the people to respect the closed season. With all its destruction, I believe that bighorns are nearly holding their own, and if poaching was stopped their numbers would begin to increase slowly. There is a large area of rough hills and low mountains in southeastern California that is well adapted to the wants of bighorns, that can never be utilized for agricultural purposes for lack of water. Its principal value at present is as a prospecting ground for minerals. By thorough protection the number of bighorns in this region could be steadily increased, and ultimately this could be made a fine hunting ground.

The food of bighorns is of a coarse nature, mostly the leaves and twigs of shrubs, or a very coarse kind of desert grass called "gietta." Bighorns go to water nearly every day in warm weather; but if disturbed at the springs or if they become suspicious of the presence of man at the springs they may go without water for several days. At such times they eat the large cactus that grows in this region. The Indians tell me that they sometimes get in the habit of eating this cactus and then go without drinking for a long time in cool weather.

Six species of squirrels live in arid California, all being ground squirrels or chipmunks. Some of these squirrels are troublesome to farmers through their depredations on crops. No tree squirrels or flying squirrels live in this region as there are no extensive forests.

Formerly beavers were common along the Colorado river, but they have been trapped so relentlessly that they have become quite scarce. If they were thoroughly protected for a few years they would again become common. Notwithstanding the warm climate in which they live the fur of these beavers is fairly good because the water of the river remains cool most of the year.

Muskrats occur here and there along the Colorado river, but are not common. I am told that they have followed down the Imperial canal and have become quite troublesome by causing breaks in the canal. They are likely to always be troublesome in such canals as it is not practicable to entirely exterminate them. Their fur is poor.

Mice and rats, of many species, are the most abundant mammals of arid California. A locality must be barren indeed if mice are unable to find food in it, and the mice of this region are hardy. In favorable places they become very abundant, particularly pocket mice and pocket rats, which have developed the habit of storing food in the season when it is most abundant. The list of species of these two groups foots up thirty for arid California. Of course no one locality has half of them.

Desert jack rabbits are widely distributed, though sparsely in the more barren parts. Arizona cottontails are common in the Colorado river bottoms, and in various places where brush is plentiful enough to make sufficient cover. They are lacking in wide areas of the more barren parts of the region.

Desert wildcats (lynx, bobcats) are found along the Colorado river and along the old channels running from it into the Salton lake, and less commonly in brushy localities in the foothills and low mountains. They prey on rats, mice, cottontails, etc., and once in a while on poultry.

Yuma cougars (puma and mountain lion) are rare inhabitants of the Colorado river bottoms, not occurring west according to our present knowledge of their distribution. The Pacific cougar occurs in the foothills bordering the deserts on the west, but is becoming quite rare. They prey on squirrels, rats, mice, rabbits, and occasionally on hogs, fawns and bighorn lambs.

Coyotes are common everywhere in arid California. They prey on cottontails, jack rabbits, ground squirrels, rats and mice, and such insect life as grasshoppers and beetles. They catch a small amount of poultry at isolated ranches and the borders of settlements, but on the whole they do the farmer more good than harm, as they help to keep in check harmful insects, ground squirrels, gophers, etc. Cer-

ainly no bounty should be paid for the destruction f coyotes.

Foxes of two species live in this region. The desrt kit fox is a yellowish colored animal inhabiting he open desert. Its prey is almost entirely of rats nd mice. The Arizona gray fox is common in the imbered bottom lands along the Colorado. They re easily trapped.

Raccoons are abundant along the river and the old verflow channels in Imperial valley. They eat fish, rogs, bats, mice, fruits and seeds. Their fur is moderately good in winter.

A very few badgers are scattered through arid California.

Sonora otters are now rare along the Colorado river. Trappers look closely for their signs and occasionally get an otter there.

Arizona skunks are common along the river and the old channels. A few spotted skunks live in the same region.

Bats are more or less common in their season in arid California, and are abundant at times around water.

Altogether about 65 kinds of mammals are native to arid California.

Fish Lines

Fair and sunshiny days have improved trout fishing conditions materially. Indications for tomorrow's sport on the banks of the trout streams are good enough to tempt the week-end rodsters away this afternoon in force. Bear in mind, however, that the streams are all unusually high, and that bait fishing or the spinning spoon will get more fish than the fly. The upper reaches and headwaters of many of the creeks will be found reasonably clear and not overly deep. Some gymnastic ability is required to get rod and tackle properly at work in the brushy-grown pools of the up-canyon branches. The effort is worth trying, for it is surprising in what apparently unproductive holes a big, hungry trout is lying in wait for a fat angleworm. In such fishing territory whipping the water with a fly is out of the question.

* * *

The San Mateo coast creeks have been well patronized since the 1st and with general satisfaction to many local fishermen. Among the visitors to Purissima were Carl Sarcander and William Shepston for limit baskets. George Cutter caught three fine fish in the spray of the millwheel on the Nelson Ranch, one fish weighed 1½ pounds. Fred Kahn and Graham Ridley landed fifty fish Saturday and Sunday from the San Gregorio lagoon. These trout ran rather small in size. Frank Smith's Saturday visit was a limit trip.

Dr. Clyde Payne and August Krupps found limit fishing places in Purissima creek a week ago. Steve Hauser and a friend fished Higgins creek, above Halfmoon bay, and had a day's lucky sport. A. J. Stevenson and John Kronquist touched the upper La Honda, where good catches of eight-inch trout were made.

Returns from Santa Clara Valley creeks, since the opening day, indicate that the creeks are not all too high for good fishing. A large percentage of the San Jose rodsters are credited with full creels caught in different creeks, on bait or with the spinner, however. Amon gthe limit baskets reported were: James Payne, Mike Surlina and Al Bosquet, who fished the Guadalupe. Sam Wells, Ira Dick and Ed Armstrong of this city will try their luck on the creek tomorrow. The Llagas furnished a fine limit for George Diako. Hubert Boater and Howard Sheldon did as well in the Uvas. Ted Hansen and Roy Bettruci were well satisfied with their trip to the Almaden.

Santa Cruz streams were well up to the anticipations and catches of previous seasons. Good catches of 8 and 9-inch trout, including a half-pounder, were taken in the city limits by Police Chief Hannah, Eli Wilder and Douglas Wilder, where the creek crosses Mission street. The Zyante produced a number of good baskets, trout running from 8 to 10 inches. Dr. Earl Pomeroy and Mrs. Pomeroy, Mr. and Mrs. Stafford Keesling of San Jose and Walter R. Welch of Capitola caught limits the first day in Soquel creek, and also in Majors creek the next day. Mrs. Keesling captured an 11-pound steelhead—she jumped into water waist deep and made the big trout captive. Which all may not be orthodox angling, but it shows conclusively where the trout can be found, and that is the main point. Bear and Boulder creeks afforded good sport to Mrs. Norman Kooser, Mrs. Clara Staffler, William Clouette, Arthur Huddleson, Harold Huddleson, Lowell Rountree, Roy Sharpe and others. Aptos creek has also proven a good creek, the largest trout reported was a 4-pound fish, landed by S. Miller.

The Santa Cruz coast streams have also pielded good catches. At Swanton one youth landed a 15-inch trout among his limit catch.

Bait fishing efforts have been fairly well rewarded recently in the tide water of Paper Mill creek, near Point Reyes, which has produced a number of good baskets. The best catch was that of Alf Greenwald, who fished from the county road bridge and picked up a number of good-sized trout. Among the other lucky anglers were: Charley Breidenstein, Charles Gibb, Henry Miller, Charles Isaac, Baldo Ivancovich, Ed Murray, Will Eaton, Al Baker, Fred Tobelman, Mo Uri, Dr. T. L. Cranz and others.

A high northwest wind handicapped the sport a fortnight ago. During the past week conditions were better. Jim Andrews landed three dozen trout Thursday, a three-and-a-half-pounder being the prize beauty of the catch. Thursday morning's downpour last week was heavy and raised the creek a bit.

Farther upstream many trout have been taken daily. Most of the fish are small. Between Tocaloma and Garcia last Sunday Sam Wells caught twenty-two trout with a fly—not one of basketable size. Charles Ehrenberg fished from Camp Taylor down on Thursday for a nice basket of fair-sized trout. The creek in that section is very high.

The Lagunitas has been well fished since the opening day. While a number of large trout have been caught, the general average of size is small. Harry Gosliner, Arthur Perry, Fred Gantner, Vernon Shepard and others have been lucky on that creek.

Olema and Bolinas creeks have evidently had a recent run of trout from the ocean, a number of fish taken the past week being silvery as smelts and just in from the sea. These fish did not run over six inches, however.

Achille Roos, Dave Sachs, John Seibe, Dr. M. E. Simon and Dr. H. Lacosta have each had good fishing in Throckmorton lagoon on the ocean shore, near Tennessee cave.

The small creeks leading into the bay marshes of Marin county have yielded a number of anglers fine baskets of eight to ten inch trout. Herman Cohn and son landed sixty-one trout from the creek near Kentfield one day. Professor Fusier of Crockett tried Ignacio creek and picked up thirty trout, none under eleven inches. Ed Armstrong, the next day, took the 9 a. m. boat bound for Ignacio creek, but left the train near St. Vincent's Orphan Asylum and fished Miller creek near by. He returned at 5 o'clock with a nice basket.

Austin creek and its headwaters are now well worth a visit, according to O. O. Orr and Ralph Lacoste, who caught limits during a recent trip, Louis Gotthelf's limit catch from Russian Gulch creek is another index of possibilities up that way.

* * *

The Fish and Game Commission officials state that the amount received for fishing licenses last year was from $15,000 to $40,000 less than expected—a total of $85,000 only. In consequence deputy commissioners have been instructed to comb the fishing streams thoroughly and gather in the simoleons. Deputies report a large number of anglers of both sexes that are under 18 years of age. Rather odd, that.

* * *

Now that the weather conditions are tending towards bringing out insect life over and about the streams, it may be timely to suggest a few fly patterns that will be found good on all of the coast trout rivers and creeks. These tried and proven favorites are: Black gnat, hare's ear, quill, English royal coachman, yellow May, March brown, gray hackle and brown hackle. When these patterns will not lure the fish, it is nearly useless to try anything else. Many fishermen have other and favorite patterns—lures that are effective, too, but those given above are the standards. Some rodsters use a fly dressed upon a No. 10 hood, the sizes used by the majority are 12's and 14's; small though they be, these hooks will hold and land big trout, at least anything that is ordinarily found in the upper creeks at present.

* * *

While on the subject of trout flies it may be just as well to note that "eyed" flies are gaining more in favor every season. Snelled flies, that is, flies with a short gut tied to them, are gradually going into the discard. When changing patterns, the snell is more often than not dry, and because of this it may break before becoming properly soaked. Many flies are whipped off in this way and not a few are broken away by the first trout that seizes the fly. Then, again, the fly with its snell may have been made up for two or three years and the length of gut, of course, debilitated with age. Further, the loop in the snell adds a bit of unnecessary disturbance on the water in making the cast. The fisherman who has thoroughly familiarized himself with the use of eyed flies will never return to the snelled fly. The leader used for the eyed fly is always well soaked, when attached to the fly, which prevents breakage. If the leader should become weakened or worn, at the place of tying, the fly can easily be cut off and a new knot tied. The snelled flies are brittle and unreliable. Eyed fly patterns can be changed far more quickly.

* * *

Striped bass are running in Raccoon Straits and off Belvidere point—and have been in those bay waters for a week and more past. Good catches have also been made in the Tiburon lagoon. Among the fish caught have been a number ranging from 10 up to 18 pounds.

A number of bass fishermen tried the creek and bay water near Greenbrae Sunday. A few fish were taken, a 15-pounder being the heaviest. A howling nor'wester made fishing too uncomfortable that day, particularly for the men out in boats. The wind was so strong, anchors would not hold. Bass have been loafing in Corte Madera creek and about San Quentin Point for some time now.

The San Antoners out Sunday two weeks ago had the time of their lives—getting back to the arks and landing, near the railroad trestle. Several boats were nearly swamped and almost everybody out was drenched with spray.

A change in the striped bass law, if the bill which passed the Senate goes through, is that five bass a day may be taken by hook and line, providing they are not sold, "at any time of the year." This provision is supposed to apply to the closed season for net fishermen. The limit heretofore has been ten fish per day for the hook and line bass catchers.

Much complaint has been made for a long time past over the operations of a fleet of fishing boats in Petaluma creek. These net fishermen cleaned out the creek, it is claimed, of the striped bass, between the railroad bridge and the mouth of the creek. The boat fishermen were very systematic in their work, in both incoming and outgoing tides. There is a Sonoma county ordinance which prohibits net fishing in any of the creeks of the county. It was supposed that the mouth of Petaluma creek was at the drawbridge. Investigation was made by the Fish and Game Commission developed the fact that United States engineers consider the mouth of the creek to be way out at Beacon No. 6. The Commission officials referred the matter to District Attorney C. F. Lea, at Santa Rosa. The district attorney has put the matter up to "the constable at Petaluma." And there the matter rests for the present. If there was a State law prohibiting net fishing in the waters above referred to, the commission officials state prompt action would ensue.

WHEN THE SEASON OPENS.

[By Ike Walton, Jr.]

The afternoon and evening preceding Thursday, April 1 this year, was a busy period among the Waltonians and many were the scenes of unusual activity in anglers' homes. Dark and dusty closets and other places of concealment were ransacked, their contents pulled forth for close scrutiny, comparative and exhaustive tests made, inventory taken, every member of the family questioned and cross-questioned in regard to missing articles that had in all probability been impressed into service for general duty during the early gardening efforts of the family to beautify the back lot. Then the house finally quieted down and reposed in peaceful slumber, to awake soon after, for before the sun rose in the eastern sky, a long line of men stole out into the dim shadows of the morning light and silently made their respective ways to the agreed place of meeting. There was no need for a watchword or private signal of recognition, for nothing else but so important a mission could possibly attract the head of the house from his comfortable bed, for on that day the law of the State clearly stated that he could go "fishin'."

And the style of his "tackle" was various. The word tackle is here used in a collective sense, and includes rod, reel, line, leader and fly, as well as the various other impedimenta, but the purpose of this discussion will be to call attention to the rod and particularly the hand-made rod of the home-made variety, not the kind that is quickly cut from a convenient clump of bushes, but the kind that is made from split bamboo, wound with silk thread, carefully varnished and brought forth for use, a thing of beauty, as well as utility.

It was Leonard, the Isaak Walton of America, who set the standard of quality and style of decoration for the hand-made rod that is still the apex of perfection and the goal of ambition for every amateur rod maker, and the possession of a genuine Leonard has its equivalent in the ownership of a rare gem or painting, for they are alike the product of the master hand. Such of his own manufactured rods as are still in existence (for Leonard passed to the happy hunting grounds years ago), are beyond price and are rarely found outside the collection of men who, in their earlier days' pursuit of the game fish, have felt the thrill of the tightening line and bend of their favorite rod as a speckled or striped beauty struck the fly or spoon and opened the engagement with the full force of his untamed fury.

Our Eastern brother has undoubtedly carried the art of making his own rod to the highest degree of perfection, and although many Western men are equally capable, yet there is scarcely the incentive or competitive interest necessary to develop this form of accomplishment. Such incentive can be easily understood when it is known that in all the larger cities of the United States there are casting clubs (affiliations of a national organization, known as the National Association of Scientific Angling clubs), which have for their object the promotion of the higher and cleaner elements of the sport, the co-operation with legislative bodies in the protection of fish and game, and general benefits that such aggregations of men invariably provide. It is the force of these local organizations that has created the demand for a superior article in the form of our present day fishing rod.

Naturally there are many who can not afford an expenditure of $20 to $50 for a high grade article for use in club contests or for general utility. The consequence, with those who are fortunate enough to possess some mechanical skill and enough confidence to undertake so important a venture, is the home-made rod, superior in many instances to the one made in the factory, and woe unto him who ignorantly calls it a "fishin' pole," instead of fishing rod.

During the long Eastern winter evening, after the day's toil is over, it is truly an event to bring forth the materials previously selected for the occasion, cut and fit the cork grip to the handle section, set the ferules for the jointed rod, and with infinite

care, wind on the line guides and intermediate wrappings, testing the resiliancy and strength of first one, then the other sections as each nears completion. Throughout the entire operation there weaves a thread of adventure with dreams of future conquests that truly makes the home-made rod an intimate treasure. Nor does the member of one of these casting clubs stop with the one effort in rod building, for the demands of diversified events make it imperative that he possess the proper equipment to enable him to compete with his fellow club member, as well as a visiting club representative, in the matter of making high scores and establishing new records (see World Almanac for record performances at national meets of the N. A. S. A. C.).

A glance at the club rules relating to tackle and events reveals the information that there are three distinct classes of performance to be participated in and from two to three subdivisions to each of these general classes. It is not necessary that the member shall compete in all of the classes, but he may elect some one, two or even all, for his season's work and strive for the club award for each class on account of the highest season score and also a season award to the member attaining the highest season score in all events, the title accompanying the latter award being a degree of master.

As the requirements of the club rules are rigid, so in proportion must the contestant possess equipment upon which he can bestow his confidence while striving for honors. If he will become expert in the use of the trout fly, he must have a rod that means proficiency in the delicacy and accuracy event, the same rod being available for the dry fly contest, but for long distance casting, the heavy salmon type of rod must be used. In the bait casting division, the light and whippy rod is necessary to handle the quarter-ounce weight, a heavier and stiffer rod for the half-ounce weight, and a shorter and much stiffer rod for the half-ounce long distance cast.

In Coast cities, where surf fishing is possible, the deep sea style of rod, with its extreme weight and rigidity, is necessary to heave the six-ounce lead, and to land the big ones.

To the busy city man this form of recreation and relaxation is a necessity as well as a pleasure and on Saturday afternoons, during the summer months he will be seen at the club pool indulging in his favorite and oft times spirited contests, thus bringing him into closer proximity to nature than he could otherwise enjoy without the time and expense of a trip into the country itself.

It was after one of these trips into the country that a club man related his experiences to a friend of his who was a near-poet, and at the conclusion of the story, his friend was heard to say:

"The fisherman now doth wander forth
To see what he may find,
And from the tale he tells
Methinks, he wanders in his mind."

At the Traps

Golden Gaters.—The Golden Gate Gun Club's regular monthly shoot will take place tomorrow at the West Alameda station trap grounds.

* * *

Vallejo Gilbert Shoot.—A. G. Flickinger, shooting from the 22 yard mark, won the Fred Gilbert cup with a total of 69 out of 100, at the recent shoot of the Vallejo Gun Club.

* * *

Change of Dates.—Secretary E. Reed Shaner announces that the dates for the Los Angeles Gun Club's shoot at Venice have been set back to July 11, 12 and 13 instead of July 1, 2 and 3.

* * *

Passing of a Popular Shooter.—Arthur J. Webb, a member of the California Wing Shooting club and Golden Gate Gun Club, passed away April 7 in Oakland after a brief illness. Arty Webb was extremely popular with the trap shooting fraternity, a man of pleasing personality and a good sportsman. He was a clever and consistent trap shooter and always a reliable and high average contender, particularly when shooting with a team of fellow club members.

* * *

In the Citrus Belt.—The Los Angeles Gun Club last March shoot was held during a cloudy, rainy day with a heavy wind blowing over the Venice trap ground. Some good scores were shot, however, as follows:

G. J. Hoffman, of Oakland, Cal., shot at 850, broke 679; Leslie Simson, late of Johannesburg, South Africa, shot at 850, broke 675; O. H. Binns 200—160, F. A. Johnson 175—143, F. H. Nichols 175—140, C. C. Richards 150—90, G. L. Becker 100—95, Dr. S. B. Friend 100—77, E. W. Mueller 100—41, Leo Bergin 100—32, C. F. Nichols 75—64, A. H. McFarland 75—56, E. L. Hedderly 75—55, Tom Bundy 75—54, Mrs. C. E. Groat 50—40, H. P. Densel 50—36, C. E. Groat 50—33, M. D. Towne 50—33, M. Nordlinger 50—26, Miss Wheeler 50—18, F. H. Teeple 25—22, G. Bohn 25—15, C. Steel 25—12.

Tower shooting: Geo. J. Hoffmann 19x25, Leslie Simson 8x25, C. C. Richards 59x125, E. W. Mueller 21x50, Leo Bergin 4x50, E. L. Hedderly 52x75.

Double targets: Hoffmann 16x24, Simson 15x24, F. A. Johnson 12x24, G. L. Becker 12x16, A. H. McFarland 16x24, Tom Bundy 15x24, C. E. Groat 14x24.

Modesto Tournament.—The Owl Rod and Gun Club registered shoot Monday, April 12, was held under adverse weather conditions, a very high wind made shooting very difficult. Eight squads were on the firing line. The printed program called for nine events—200 singles. Event 6, for the Interstate Association trophies, was at 40 birds. The schedule was shot off in 20 bird sections.

Tony Prior, of San Francisco, and J. Plasket, of Modesto, were high amateurs, with 186 out of 200. Guy Lovelace, formerly of Los Angeles, and D. C. Wood, of Modesto, were next up with 183 each, Harry Ogelvie of Lindsay came next with 182.

Dick Reed led the "pros" with 188 out of 200, with Hugh Poston 179, Fred Willet 175, C. H. Knight 173, Lon Hawxhurst 171.

Dave Ruhstaller, of Sacramento, with 19 and 20—39 out of 40, was high gun in Events 6 and 7, announced to carry the Interstate trophies, J. Plasket 20 and 18—38, and D. C. Wood 19 and 19—38, were second high men; Toney Prior, Barney Worthen and Harry Ogelvie tied for third high with 37 each. The scores follow:

Events—	1	2	3	4	5	6	7	8	9	10	Ttl
Targets—	20	20	20	20	20	20	20	20	20	20	200

Interstate Association Tournaments—

May 11, 12, 13—The Interstate Association Tenth Southern Handicap Tournament, Memphis, Tenn., under the auspices of the Memphis Gun Club; $1,000 added money. Winner of first place in the Southern Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

June 15, 16, 17—The Interstate Association's Tenth Western Handicap Tournament, St. Louis, Mo., under the auspices of the Missouri Athletic Association Gun Club; $1,000 added money. Winner of first place in the Western Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

July 8, 9, 10—The Interstate Association's Tenth Pacific Coast Handicap Tournament, San Diego, Cal., under the auspices of the Pastime Gun Club; $1,000 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

August 16, 17, 18, 19, 20—The Interstate Association's Sixteenth Grand American Handicap Tournament, Chicago, Ill., under the auspices of the Chicago Association of Trap Shooters, $3,500 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

Registered Tournaments—Pacific States and Territories:

April 19—Capital City Rod and Gun Club, Mark Siddall, Secretary, Salem, Ore.

April 26, 27—Oregon State Tournament, under the auspices of the Portland Gun Club, J. A. Addleman, Secretary, Portland, Ore.

April 28—"T. B." Trap and Gun Club, Lieut. Stephen W. Wallace, Secretary, Las Animas, Colo.

May 5—Utah State Sportsmen's Ass'n Tournament, A. R. Bain, Secretary, Springville, Utah.

May 14—Pueblo Gun Club, F. S. Rainey, President, Pueblo, Colo.

May 18, 19—Washington State Tournament, under the auspices of the Seattle Trap Shooters Ass'n, Hugh Fleming, Secretary, Seattle Wash.

May 26, 27—Delta County Gun Club, Nick Powell and R. A. King, Managers, Hotchkiss, Colo.

May 29, 30—Utah State Tournament, under the auspices of the Utah State Sportsmen's Ass'n, A. R. Bain, Secretary, Salt Lake City.

May 29, 30, 31—San Jose Blue Rock Club, O. N. Ford, Secretary, San Jose.

June 3, 4, 5—Annual Tournament of Rocky Mountain Interstate Sportsmen's Association, under auspices of Mile High Gun Club, Wm. M. Bowman, Secretary, Denver, Colo.

June 7, 8, 9—Sportsmen's Ass'n of the Northwest Tournament, under the auspices of the Portland Gun Club, J. A. Addleman, Secretary, Portland, Ore.

July 1, 2—Vancouver Gun Club, C. A. Porter, Secretary, Vancouver, Can.

July 5—Eureka Blue Rock Club, H. A. Hine, President, Eureka, Cal.

July 5—Sunrise Gun Club, H. S. Hill, Secretary, Sunrise, Wyo.

July 5—Holbrook Gun Club, J. S. Hulet, Secretary, Holbrook, Ariz.

July 9, 10—Gem City Gun Club, Max Weick, Secretary, Laramie, Wyo.

July 10—Chehalis Rod and Gun Club, W. S. Short, Secretary, Chehalis, Wash.

July 12—Rawlins Rod and Gun Club, H. Breitenstein Secretary, Rawlins, Wyo.

July 12, 13, 14—Los Angeles Gun Club, Fred H. Teeple Secretary, Venice, Cal.

July 19, 20, 21, 22—Pacific Indians, F. C. Riehl, Secretary, Tacoma, Wash.

August 10—Medford Gun Club, Dr. E. R. Seely, President, Medford, Ore.

September 13, 14—Omaha Gun Club, R. D. Vaught, Secretary-Manager, Omaha, Neb.

November 4—Williams Gun Club, F. E. Lowe, Secretary, Williams, Ariz.

November 5, 6, 7—Arizona State Tournament, under the auspices of the Tucson Blue Rock Gun Club, W. A Julian, President, Tucson, Ariz.

—o—

Rem-U. M. C. Notes.—At the opening of the California trap shooting tournaments recently held at Newman and Modesto, Cal., some splendid scores were made, and shooters using Remington-UMC guns and Arrow factory loaded shells were found to be among the winners.

At Newman, R. C. Reed, with a Remington-UMC Pump gun and Arrow shells won the high professional average with a score of 380 x 400.

O. N. Ford made the same score and won the second amateur average with the same load.

R. C. Reed made the longest run of the tournament, breaking 107 targets straight.

At Modesto on April 12, R. C. Reed also captured first honors with a score of 188 x 200, and J. Plasket of Modesto tied for first amateur average with a score of 186 x 200. D. C. Wood, also of Modesto, won second average with a score of 183, also shooting Remington-UMC, Arrow shells, and Reed and Wood shooting Remington-UMC Pump guns.

It is an interesting fact that the Remington Pump and Auto guns seem to have been very popular with the trapshooters who took part in the Gilbert Cup shoots all over the country. The winners of the following shoots all used Remington guns: St. Cloud Minn., Medford, Okla., Billings, Mont., Terre Haute, Ind., Motley, Minn., Boone, Iowa, Pottsville, Pa., Hutchinson, Kas., and Reading, Pa.

Doings in Dogdom

The Panama-Pacific International Dog Show has received the official sanction of the National Dog Breeders' Association, and winning dogs will be awarded the five championship points of that organization.

In addition to giving its official sanction the National Dog Breeders' Association, through its secretary, W. V. N. Bay, has notified D. O. Lively, chief of the live stock exhibit of the Exposition, under whose jurisdiction the dog show will be held, that it will add the following prizes to those offered by the Exposition, and to be competed for by its members. (Entries by three or more members in each class required for competition.)

Two dollars for winner of first and $1 for second prize in all breed classes.

Twenty dollars for best in show, any breed or class.

Twenty dollars for best sporting dog, either sex.

Twenty dollars for the best non-sporting dog, either sex.

Twenty dollars for kennel of four of one breed, either sex, owned and entered by same exhibitor.

Twenty dollars for best brace (2) of one breed, either sex, owned and entered by same exhibitor.

Twenty dollars for largest entry of one breed by one exhibitor.

The association, though specifying that the additional prizes go to its members only, makes it easy for anybody to acquire membership, thus making its prizes practically free-for-all.

* * *

The 412-mile All-Alaska sweepstake race for dog teams was billed to start Wednesday last from Nome, when half a dozen teams, each made up of from ten to eighteen dogs, drawing a racing sled and driven by the most expert drivers in the North, were to set out on the eighty hours' grind over the snow trail from Nome to Candle and return.

The list of entries was not completed until late Monday night, but already four of the most widely-known drivers in Alaska had entered the race. These are A. A. (Scotty) Allan, who twice has driven the team owned jointly by himself and Mrs. Charles E. Darling of Berkeley, Cal., to victory; Leonard Seppala, Paul Kjegsted and Fred Ayer. John Johnson, whose team of Siberian wolves set the record of 74 hours, 14 minutes and 20 seconds in 1910, and won last year's race in 81 hours and 3 minutes, will not race this year, having taken his dogs to San Francisco last fall. Other drivers who have been developing racing dogs and carefully training them all winter, are expected to post the entry fee before the lists close at midnight.

The purse already amounted early this week to $2,000, that amount having been raised at the kirmiss held last Saturday night. This sum will be swelled considerably, it is expected, by a vaudeville performance given Tuesday night.

Present indications are against lowering the record set by Johnson five years ago. Light snow is falling, and this will have a tendency toward making a slow course.

THE FARM

A CONFESSION OF FAITH.

The Ford is my auto, I shall not want (another).
It maketh me to lie down beneath it; it soureth my soul.
It leadeth me into the paths of ridicule, for its name's sake.
Yea, though I ride through the valleys, I am towed up the hills.
I fear much evil for thy rods and thy engine discomfort me.
I anoint my tires with patches; thy radiator runneth over.
I prepare for blow-outs in the presence of mine enemies.
Surely if this follows me all the days of my life,
I will dwell in the bughouse forever and ever.

—Exchange.

—o—

Intensive vegetable gardening involves the use of the best seed; the application of more and better manure and fertilizer; always planting at the right time and in the right way; thorough tillage; irrigation; weeding and thinning as may be necessary; close planting; double-cropping, perhaps; successive planting; absolute control of insects and fungous enemies, and proper methods of harvesting and marketing—Market Growers' Journal.

The war has temporarily stopped the cotton industry in California. This industry in normal years brings in some $3,000,000 to Imperial valley growers, but this year they have been very heavy losers, and as a consequence no cotton will be planted there this season.

HORSE OWNERS! USE GOMBAULT'S CAUSTIC BALSAM.

A safe, speedy and positive cure. The safest, Best BLISTER ever used. Removes all bunches from Horses. Impossible to produce scar or blemish. Send for descriptive circulars.

FOR SALE

RACING AND BREEDING MATERIAL

from the establishment of the late

WENDELIN J. MILLER
of Chico, Cal.

The death of Mr. W. J. Miller causes to be put on the market the choice assortment of Broodmares, Youngsters and Race Winners with which he achieved such signal success in recent years, including

JOHN MALCOLM (2) 2:11½
stake winner, world's champion two-year-old pacing gelding (1913), by Dan Logan 2:07½, dam Susie Miller by Prince Ansel (2) 2:20½, etc. Now four years old and can show as much or more than any pacer in California. Prime for this year's races.

CAPITOLA (2) 2:17¾, (3) 2:14½
stake winner, fastest two-year-old pacing filly of 1912, public trial in 2:06½ as three-year-old, by Dan Logan, dam Lulu Mack by Arthur Wilkes, etc. A great race mare for her class.

BONDALEAN (2) 2:20½
winner of second money in two-year-old division, Breeders' Futurity, 1914, and absolutely the best one in sight for this year's three-year-old pacing stakes. Entered and paid up. Trialed in 2:15 last year. By The Bondsman, dam Katalina 2:11¼ by Tom Smith 2:13¼, etc. As great a youngster as the country affords today.

KATALINA 2:11¼
(dam of Bondalean (2) 2:20½) by Tom Smith 2:13¼, dam Kate Lumry 2:20½ (dam of 5 trotters including Baby Doll 2:10¼, Ella Mac 2:11½, etc.) by Shadeland Onward 2:18½. Katalina was a stake winner, a great aged trotter, and her first foal is a fast, standard performer. She breeds regularly and will become more famous as a producer than is her dam.

TWO-YEAR-OLD FILLY
by All Style 2:10, dam Katalina 2:11¼. Staked, paid up. Good prospect.

BAY FILLY, WEANLING
by The Proof (2) 2:29¾, dam Katalina 2:11¼. Nice individual and bred to make a fast mare.

LULU MACK
(dam of Capitola (3) 2:14½), by Arthur Wilkes, sire of Maymack 2:04½, etc., dam Lady Merrill by Tilton Almont, sire of the dam of Monte Carlo 2:07¼, etc. Good breeder and a proven producer.

BAY FILLY
three years old, sister to Capitola (3) 2:14½, never broken.

FIRST NATIONAL
bay colt, two years old, brother to Capitola (3) 2:14½. Staked, paid up. Fine youngster.

John Malcolm and Bondalean are in training at the State Fair Grounds, Sacramento, their workout days coming on Wednesdays and Saturdays. You can see them at any time and they show for exactly what they are—two of the best young pacers in the land to race in this and future seasons. Prices and particulars of all kind may be obtained upon application by mail or in person to either of the undersigned.

MRS. W. J. MILLER,
L. B. DANIELS, Chico, Cal.

Bruised Knee, Bog Spavin, Thoroughpin, Wind Puff
AND SIMILAR BLEMISHES ARE QUICKLY REDUCED WITH
ABSORBINE

It is powerfully penetrating, soothing, cooling and healing—strengthens and invigorates tired, lame muscles and tendons; stops lameness and allays pain; takes out soreness and inflammation; reduces swellings and soft bunches. It is mild in its action and pleasant to use.

ABSORBINE does not blister or remove the hair and horse can be used.

USE ABSORBINE to reduce Buesal Enlargements, Bog Spavins, Thoroughpins, Puffs, Shoe Boils, Capped Hocks, Swollen Glands, Infiltrated Parts, Thickened Tissues, Rheumatic Deposits, Enlarged Veins, Painful Swellings and Affections; to reduce any strain or lameness; to repair strained, ruptured tendons, ligaments or muscles; to strengthen any part that needs it.

SEND FOR FREE HORSE BOOK E

Your druggist can supply you with ABSORBINE, or I will send you a bottle postpaid for $2.00. Write me if you have a case requiring special directions or about which you should like information.

W. F. YOUNG, P. D. F., 54 Temple St., Springfield, Mass.

Say, Can You "Figger"?

Try Your Brains on This One:

If a man owns thirteen brood mares and gets ten foals a year, and wins with **ONE** of them (**all he can drive in a race**) every Coast futurity, how long will it take him to go broke if he keeps on breeding, keeps on winning, and never sells anything?

The solution is so simple that it really doesn't require brains, does it? I breed horses, I race horses—and MY HORSES WIN RACES, but this is not all of the business. Sometimes I MUST SELL HORSES—hence the offerings below. I am not "culling my stable"—every horse I own, personally, can be bought for what he or she is actually worth on a money-earning basis. These are priced as fair samples. What I offer is "live stuff", in training, improving daily, ready for this year's campaign. Don't take my word for it—come to Los Angeles—see them work—drive them yourself. You cannot buy better ones at the price anywhere.

All previous prices are invalidated—Quotations below are subject to change according to future conditions.

MISS QUEALY (2) 2:26¾
Full sister to MANRICO (3) 2:07¼, winner of Kentucky Futurity 1912, and holder of world's record for sixth heat. Seven years old, trained slightly as a three-year-old and showed half in 1:06 over a half-mile track; has been in training ninety days and recently worked a half in 1:04½; absolutely will not break, good gaited, sound, and a handsome individual. Can trot a two-minute gait and has every right to make a very fast, consistent, good mannered race mare. Price $1750.

ALARICH 2:11¼ (Breeder's mark 2:09), trotter, bay gelding with black points, 15.3, handsome, sound, fast and game; trialed at Santa Rosa last season in 2:06¾ and can do it again. Is a first class doer, can race twice a week and is eligible to the 2:13 class trots on mile tracks and to the 2:18 class on half-mile tracks; has shown well on the twice-arounds. Price, $550.

HELEN BELLE (2) 2:22½, breeder's record, bay filly, foaled 1912, good gaited, good headed, sound and extremely fast; was taken up absolutely green on Sept. 3 and has developed in a most satisfactory manner, taking her mark in December, since which time she has been an eighth in :16, half in 1:09. Sired by California's greatest sire of colt trotters, CARLOKIN 2:07½. First dam Carolyn C. by Axtell (3) 2:12 (a champion); second dam by Expedition, sire of Bon Voyage 2:08; third dam by Princeps (son of Woodford Mamb.); fourth dam by Hambletonian 10.
Carolyn C. had two minute speed. This great filly is entered and paid up in the Occident stake, the State Fair, P. C. T. H. B. A., and Oregon Futurities for 1915. The best buy in California at $1400.

NELLIE Mc,
black mare, trotter, eight years old, racing sound but is blemished; has always trained sound and I believe will continue to do so. Trialed at Sacramento in 2:10½ and has been a half lately in 1:03¾. Is a splendid mannered mare—anyone can drive her anywhere. She races first class, is fast, good headed, good gaited and dead game.
Sired by ZOLOCK 2:05½, dam by Wilkes Moor, son of Guy Wilkes.
Stands about 15.3, is a round made extra good looking mare, weighs about 1140, has splendid legs and feet. She negotiates a half mile circle in A-1 style, should surely beat 2:10 this year. Does not pull a pound and can be placed anywhere. Eligible to any class. Price $750.

CARLETA,
bay filly, two years old, by CARLOKIN, dam ALEXANDRIA, tr. 2:20, by Bon Voyage 2:08; second dam by Oakland Baron 2:09¼; third dam by Allandorf, etc.
This is a good trotter and should be prominent in her stake engagements. Is very handsome, good headed, sound and comes from familes noted for early speed. In training now and improving very fast; trialed recently, half mile in 1:11½, eighth in :16¾.
She is entered and paid up to date in the following stakes: Panama-Pacific $3,000 for two-year-olds, Stanford, Occident, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. Price $1200.

OMAR, gelding,
trotter, trial 2:13¾, half in 1:05, eighths in :15; good headed, sound and can be depended upon. Is a beautifully gaited big horse and should prove useful to race over the twice arounds or for a matinee and road horse. He is fearless and is one of the most pleasant driving horses I have ever ridden behind. Stands slightly over 16 hands, weighs about 1200, is eight years old. Sired by DEL CORONADO 2:09½, dam Pineapple by Albion (son of General Benton). A present at $350.00.

CARLSCHEN (2) 2:23, breeder's record, brown gelding by CARLOKIN, dam BONNIE AILSIE 2:08½ (dam of Contention B. (3) 2:08¼) by Faustino, son of Sidney.
Trialed with a little work last year a half in 1:09, is extremely promising and looks to be as good a prospect as any of the colts racing last year in the two-year-old trots. Is engaged in several of the futurities including the P. C. T. H. B. A., Pleasanton and State Fair Futurities. Is a splendid type, beautifully gaited, good headed and has extreme speed. He does it right. Worked recently in 2:17¾, half in 1:06. Sound, sold to close a partnership. The cheapest colt in the west at the price—$800.

HERMES, brown colt,
two years old, by CARLOKIN, dam MISS QUEALY (full sister to Manrico 2:07¼).
This is one of the most promising trotters I have ever handled. Is an especially nice gaited colt, can show a 2:20 gait, is good headed and on the whole the most promising youngster I know of for the western stakes. Is also a show horse. Is entered and paid up in the Occident, Stanford, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. His dam is an extremely fast trotter, having shown a two minute gait in her three-year-old form, and his second dam produced two to hold world's records—Manrico and Don Pronto.
This youngster is spoken of as the most impressive colt trotter at Los Angeles. Trialed lately in 2:27, and worked two eighths the same day in :16¼ each. Price $2000.

JOHNNY DUGAN,
3-yr.-old breeder's record 2:16,
pacer, no straps, bay gelding four years old, straight and sound, trialed a half in 1:04 last year in his three-year-old form and could pace around 2:10 in June.
Sire, CARLOKIN 2:07½; dam Annabelle L. (full sister to Murray M. and Robert I. 2:08¾) by Hambletonian Wilkes; second dam Annabelle 2:27½ (dam of La Belle 2:16); third dam by Williamson's Belmont. A great buy at $350.00.

OLD FOLKS,
bay gelding, trotter, five years old, trialed as a two-year-old in 2:31½, as a three-year-old in 2:18½, and in his four-year-old form last May in 2:11, last half in 1:04. Is sound, good gaited, good headed, and should 2:08 this year. Comes from a family of good race horses on both sides—by DEL CORONADO 2:09½; dam IRAN BELLE, by Iran Alto 2:12¼; second dam ANNABELLE, etc. He stands A-1 with the railbirds around Los Angeles and is in training and ready to go on with and race this year. Price $1250. Working beautifully.

NICOLA B. (2) 2:23¼
Winner two-year-old division Oregon Futurity, 1914.
Received slight injury just prior to going to the races in 1914, up to which time he was the most promising colt in my stable, working mile first part of June in 2:17, half in 1:06. Started twice, was once first, once second. Now in training and has brushed an eighth lately in :16; sound, grand individual, paid up in six western stakes and has every license to win. Son of Carlokin 2:07½ and Atherine 2:16¾, dam of Copa de Oro 2:01, Rags 2:09¼, etc. The price on this one is rising—now $2500. Getting better daily.

AND ONE FOR THE $20,000 P.-P. I. E. TROTS — RAGS 2:09¼.
winner of the Breeder's and Oregon Futurities, the Stanford and the Occident stakes as a three-year-old, and the Governor's Stake, $5000, as a four-year-old — in all, beaten in but two out of eight starts, second in those two, and beaten only by 2:05 trotters. In my opinion as good a prospect for the big stakes as anyone has. He is a really great race horse, is racing sound, and has developed from an overgrown four-year-old into a sturdy, strong, exceptionally fine individual. Should be engaged in the Panama-Pacific $20,000 stakes, for which I already have entries. None better bred—by Del Coronado and out of the dam of Copa de Oro 1:59, etc. Price $2000.

In addition to the ones above mentioned I will offer to intending buyers JIM CRAM, three-year-old pacer (brother to Chango 2:12¼), the two-year-old pacer SANDY McNABB (staked), FIVE YEARLINGS and SIX TWO-YEAR-OLDS, most of which are in training and ready to show.

Prices and descriptions on application.

WILLIAM G. DURFEE, 2019 S. Figueroa St., LOS ANGELES, CAL.

Western Canada Fair and Racing Circuit

Dates of Race Meets

Early closing events for Regina Turf Club close April 23rd, Regina Exhibition, May 1st, Moosejaw, Brandon and Saskatoon, May 15th. Other meets all purse events.

—NEW YORK'S— Grand Circuit Meeting

AUG. 30, 31, SEPT. 1, 2, 3, 4, 1915

EMPIRE CITY PARK — EARLY CLOSING PURSES

ENTRIES CLOSE MONDAY, APRIL 26, 1915.

No. 1	The Greater New York	2:08 Trot..	Purse	$5,000
2	The Manhattan	2:13 Trot..	"	2,000
3	The Knickerbocker	2:05 Trot..	"	2,000
4	The Broadway	2:08 Pace..	"	2,000
5	The Star Pointer	2:03 Pace..	"	2,000
6	The Great Eastern Handicap Trotters, 2:01 to 2:25		"	2,000

(Members—The Grand American Circuit—American Trotting Association.)

All races mile heats—best 3 in 5—races end with 5th heat unless horses be tied for first money, then such horses only shall race an additional heat—money divided 50-25-15 and 10 per cent. Entrance fee five per cent of purse—and five per cent deducted from money winners. Positions will be drawn and assigned horses night before race and so published in Race Program.

Liability of Nominator ceases when written notice declaring out is received by the Association provided all payments then due have been made. Entries in these events are entitled to all time allowances that may be granted by the revised rules of the Grand Circuit or parent associations but such allowances must be claimed when entry is made.

A horse distancing field or any part thereof entitled to one money only.

Payments will be due as follows:

	Apry. 26	May 26	June 26	July 26
No. 1 —Value $5,000	$25	$75	$75	$75
Nos. 2 to 6—Value $2,000	10	30	30	30

Make all checks for entrance money payable to the Yonkers National Bank, Yonkers, New York.

All purses guaranteed, and approved surety bond in the Equitable Surety Co. has been filed with the Grand Circuit for the protection of all persons making entries or racing horses at this meeting.

The Association reserves the right to refuse any entry and to declare off any race. Rules of American Trotting Association to govern, unless otherwise specified. Use official Entry Blanks which show all conditions and which will be supplied upon application to the Association.

J. H. CLARK, Secretary,
NATIONAL FAIR & EXPOSITION ASS'N, INC.,
City Office 107 West 41st St., New York, N. Y

Entries close Monday, April 26, 1915, when all horses must be named.

INFORMATION.

We follow the two weeks meeting at Montreal in the Grand Circuit, and precede the Charter Oak Park meeting at Hartford. Arrangements have been made for the prompt shipping of horses from Montreal to Empire City Park.

Late Closing Purses of value of $1,000 each to suit campaigning horses will be announced later—several startling specials will also be announced.

Empire City Park with its splendid mile and half mile tracks, stables and convenient facilities is now open to trainers who desire to locate them. Only $2.00 per month charged for each stall occupied.

$10 DUE ON YEARLINGS

SATURDAY, MAY 1st, 1915

Pacific Breeders Futurity Stake No. 14—$7,250

PACIFIC COAST TROTTING HORSE BREEDERS ASSOCIATION

For Foals of 1914 to Trot or Pace at Two and Three Years Old

$3800 FOR TROTTING FOALS $2500 FOR PACING FOALS $600 TO NOMINATORS OF DAMS OF WINNERS
$150 TO OWNERS OF STALLIONS

MONEY DIVIDED AS FOLLOWS:

$2500 for Three-Year-Old Trotters.	$1500 for Three-Year-Old Pacers.
200 to the Nominator of the Dam on whose Original Entry is named the Winner of the Three-Year-Old Trot.	200 to the Nominator of the Dam on whose Original Entry is named the Winner of the Three-Year-Old Pace.
1300 for Two-Year-Old Trotters.	1000 for Two-Year-Old Pacers.
100 to the Nominator of the Dam on whose Original Entry is named the Winner of the Two-Year-Old Trot.	100 to the Nominator of the Dam on whose Original Entry is named the Winner of the Two-Year-Old Pace.
100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when mare was bred.	100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when mare was bred.

$150 in Special Cash Prizes was paid to Stallion Owners in December, 1913.

ENTRANCE AND PAYMENTS—$2 to nominate mare on December 1, 1913, when name, color, description of mare and stallion bred to must be given; $5 May 1, 1914; $5 November 2, 1914; $10 ON YEARLINGS MAY 1, 1915; $10 on Two-Year-Olds March 1, 1916; $10 on Three-Year-Olds March 1, 1917.

STARTING PAYMENTS—$25 to start in the Two-Year-Old Pace; $35 to start in the Two-Year-Old Trot; $35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start as Two-Year-Olds are not barred from starting again in the Three-Year-Old divisions.

SUBSTITUTIONS.

If a mare proves barren or slips or has a dead foal or twins; or if either the mare or foal dies before May 1, 1916, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment nor will any entry be liable for more than amount paid in or contracted for.

E. P. HEALD, President

F. W. KELLEY, Secretary,
Post Office Drawer 447, San Francisco, Cal.

You can prevent this loathsome disease from running through your stable and cure all the colts suffering with it when you begin the treatment. No matter how young, SPOHN'S is safe to use on any colt. It is wonderful how it prevents all distempers, no matter how colts or horses at any age are "exposed." All good druggists and dealers in goods houses and manufacturers sell SPOHN'S at 50c and $1.00 a bottle; $5 and $10 per dozen. All druggists and dealers and manufacturers.

SPOHN MEDICAL CO.,
Chemists, Goshen, Ind.

COPA DE ORO 1:59
WINNING PERFORMANCE

DURFEE'S STALLIONS

CARLOKIN 2:07 1-2
EXHIBITION MILE 2:05 1-4

Champion Pacing Stallion of the West and Sire of a Champion

Reg. No. 52785. Licensed Pure Bred. Cert. No. 1037

Golden Bay. Height 15.3½. Weight 1160.

Sire of CONTENTION B. (2) 2:24¼, (3) 2:08¼, the latter mark a world's record when made, and but one-quarter of a second removed from present record for three-year-old pacing geldings. Public trial (3) 2:07¼. Also sire of

Chango p. (3).....2:12¼	De Ora (3) 2:17
2-yr.-old record 2:13½.	2-yr.-old record 2:27¼.
Trial (3) 2:09	Gold Lily p. (2)....2:24½

Patrick de Oro p (3)2:22¼, trial (3) 2:08¼, ½-mi. track

Copa de Oro has been retired to the stud for but a very few years and these are from his first foals. Where can you find a stallion whose get have made an equal showing?

COPA DE ORO is the fastest son of Nutwood Wilkes 2:16½ (sire of 8 in 2:10); first dam Atherine 2:16¾ (great brood mare) by Patron 2:14¼, sire of the dams of 7 in 2:10; second dam Athene (dam of 2 trotters, etc.) by Harold 413, sire of Maud S. 2:08¾ and the dams of 5 in 2:10; third dam Minerva (great brood mare) by Pilot Jr. 12, sire of the dams of Maud S. 2:08¾ and 3 others in 2:10, etc. He is one of the handsomest horses in the world, as well as one of the fastest, and is undoubtedly the best bred of all extremely fast pacing sires. From the first I heralded him as the Coast's future great pacing sire, and the performances of his youngsters recorded above certainly show that I had most excellent grounds for that belief.

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred. Cert. No. 1038

Mahogany Bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

Ethel D. (3).....2:11	Helen Belle (2)....2:22½
Johnny Dugan p (3)2:16	Nicola B. (2).....2:23½
John Warwick (2) 2:17	Santiago (3) 2:24¼
The Lark (3).....2:18½	May Marian p (3)..2:24¼
Carl (2) 2:19¾	Carlrich p (2) 2:24½
Miss Carlokin p 2:20	El Carbine (2).....2:27½
Carsto (2) 2:22½	Eileen C. (3) 2:29
Carlschen (2) 2:23	Carlos (2) 2:29¼
Fuiton G. (2).....2:30	

CARLOKIN is the best bred son fo McKinney 2:11¼, foremost among the progenitors of 2:10 speed, being out of that sterling producing matron Carlotta Wilkes (dam of Inferlotta 2:04¾, Mary Dillon 2:06¼, Guy Borden 2:07¼, Carlokin 2:07½, and 6 others in 2:30) by Charley Wilkes 3653; second dam Aspasia (dam of 4) by Alcantara 2:23, sire of the dams of 20 in 2:10; third dam Miss Buchanan (dam of 1) by Clark Chief 89, sire of the dams of 2 in 2:10, etc. Carlokin was not only a fast and rugged campaigner, but, point for point, one of the most ideal individuals ever foaled. I chose him from among all the best horses of the country as a prospective great sire, and in 1913-1914 his get won more coast futurities than those of all other sires combined. What more could you ask of them?

FEE: $75 For the Season, Usual Return Privilege

I am especially well equipped for caring for mares at reasonable rates in any way that owners may desire. Every attention will be given mares in my charge, but no responsibility is assumed for accidents or escapes. Further particulars may be had by applying to W. G. DURFEE, 2019 So. Figueroa St., Los Angeles, Cal.

Pleasanton Driving Park

offers for service for the season of 1915 the following stallions:

Joe Patchen II 2:03¼

Licensed Pure Bred—Cert. No. 1128.
A. T. R. No. 47491

BEST MONEY WINNING PACER

By JOE PATCHEN 2:01¼, sire of Dan Patch 1:55¼ and 6 others in 2:10.

Dam, Bessie Bonehill 2:05¾ (dam of 2 in 2:10) by Empire Wilkes 2:29¼; second dam Arab Girl (dam of 7) by Crittenden 433, sire of the dams of 6 in 2:10.

Joe Patchen II comes from a long line of famous ancestors and is himself one of the best known and most popular pacers in America, with all the qualities of speed, stamina and individual excellence necessary to the making of a truly great horse—one of the kind you would expect to find after a glance over the array of famous performers owning allegiance to the families from which he comes. He is an excellent breeder, transmitting uniformly his own desirable characteristics and his few foals in California are promising to the highest degree.

Fee for Joe Patchen II or Mahomet Watts, $100 with usual return privilege

Service fee refunded to owners of mares bred to Mahomet Watts proving not with foal.

Mahomet Watts 2:08¼

Licensed Pure Bred—Cert. No. 2312.
A. T. R. No. 51518.

AXWORTHY ELECTIONEER

By GEN. WATTS (3) 2:06¾, sire of three three-year-old trotters in 2:10.

Dam Alla P. 2:21¼ (dam of 3) by Palo Alto 2:08¾, sire of the dams of 2 in 2:10; second dam Lula Wilkes (dam of 5), by George Wilkes 2:22, sire of the dams of 15 in 2:10.

Mahomet Watts is not only the fastest performer credited to Gen. Watts (3) 2:06¾ (whose breeding on qualities have been prime factors in the rise of the great house of the Axworthys) but he springs on the maternal side from the most firmly established families of champion producers—those of Electioneer and George Wilkes. He is a pleasing individual of fine finish and extreme speed, having a three-year-old record of 2:10 and being timed separately in a race last year in 2:05¼, whose services should be most welcome to California breeders.

Vernon McKinney 2:01½

Licensed Pure Bred—Cert. No. 1126.
A. T. R. No. 53803.

FASTEST OF THE McKINNEYS

By GUY McKINNEY 37625, son of McKinney 2:11¼, dam by Guy Wilkes.

Dam Maud Vernon by Mount Vernon 2:15¼, sire of the dam of Leata J. 2:03, etc.; second dam Mag by Gen. McClellan, sire of the dam of Mack Mack 2:08, etc.

No member of the McKinney family excells Vernon McKinney in point of speed or individual excellence. He is a horse of much substance—16 hands, 1200 pounds—bred in lines of intense prolificacy and evidencing in every way his ability to "live up to his pedigree." No horse has greater natural speed or a more effortless way of going. He is a sure breeder and his youngsters are the readiest sellers of their age in California—a statement proven by recent sales and tentative offerings for the get of mares due to foal to him this year.

Zomblack 2:26, tr. 3, 2:08¾

Licensed Pure Bred—Cert. No. 1127.
A. T. R. No. 54955

BEST SON OF ZOMBRO

By ZOMBRO 2:11, sire of twenty and the dams of three in 2:10.

Dam, Madeline Marshall (dam of 2) by Demonio 2:11¼, sire of 7 and dam of 1 in 2:10; second dam Mamie Comet (dam of 3) by Nutwood 2:18¾, sire of 2 and dams of 21 in 2:10.

Zomblack is one of the handsomest horses ever foaled in California as well as one of the fastest. His extreme speed came to him early and naturally, and he is unexcelled in size and conformation—an ideal type of the American trotter in every important respect. He is intensely bred in speed producing lines and we have no hesitation in advancing the claim that he is the very best son of Zombro 2:11, in his turn the best son of McKinney. In every instance the families represented in his pedigree are breeding on most successfully.

Fee for Vernon McKinney or Zomblack, $50 with usual return privilege

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars
CHAS. L. DeRYDER, Superintendent PLEASANTON, CAL.

HEMET STOCK FARM Hemet, California

Dam LOUISE CARTER 3, 2:24

Dam of
Wilbur Lou (3) 2:10¼
Mamie Alwin 2:12
Marlin Carter (3) 2:29¼

Daughter of Chestnut Tom 2:15 by Nutwood Wilkes 2:16½

WORLD'S CHAMPION YEARLING TROTTING STALLION 1910
Unbeaten Two-Year-Old in 1911

Winner of California State Fair and Pacific Coast Breeders' Association Futurities in 1912. Record in Third Heat of a Winning Race.

Also holder of the World's Record of a Five-Heat Race by a 3-yr.-old Stallion

Limited number of approved mares at $100 the season.

WILBUR LOU was bred to seven (7) mares in 1912 and got seven (7) foals; six (6) were trained, on the property of John Christiansen, of San Francisco, which was said to be the fastest yearling on the Pacific Coast.

The five (5) owned by the Hemet Stock Farm showed as follows:

FIESTA LOU, record 2:25,	half-mile track,	½ mile—1:08¾
SELMA PALEY, trotted	½ mile	1:13¾; one-eighth— :17¾
GOLDSMITH LOU	¼ mile	:35½
GERTRUDE RIVES	¼ mile	:36¾
BILLIE BOYD	¼ mile	:38

This includes the entire get of WILBUR LOU.

KINNEY de LOPEZ 2:23,

Son of KINNEY LOU 2:07¾ and BETSY DIRECT by Direct 2:05½

$50 THE SEASON

KINNEY DE LOPEZ is the sire of DON DE LOPEZ, trial one-half as a yearling 1:13¾, one-eighth 17½ seconds; could have trotted in standard time as a yearling. KINNEY DE LOPEZ is certain to sire early speed.

Terms: Cash at time of service with usual return privilege, or money refunded at our option. Excellent pasturage and best of care taken of mares, but no responsibility assumed for accidents or escapes.

BREED TO THE COAST'S CHAMPION CAMPAIGNER AND FUTURITY SIRE

JIM LOGAN 2:01¾

(3) 2:05½, world's record to 1912 and yet the fastest third heat ever paced by stallion of that age; (5) 2:04¼, (6) 2:03¼, (7) 2:02¾, (8) 2:01¾, race record for Pacific Coast.

Licensed Pure Bred—Cert. No. 1028.

All winning race records. Registry No. 44997.

Sire of MAXINE (3) 2:15 Winner Pacing Division Pacific Breeders Futurity 1914

Trial in 2:09, half in 1:01, quarter in :29 as a three-year-old.

Son of CHARLES DERBY 2:20, brother to Klatawah (3) 2:05½, etc., and sire of TEN in 2:10.

Dam, EFFIE LOGAN, California's greatest producer of extreme speed (dam of Jim Logan 2:01¾, Sir Albert S. 2:03¾, and Dan Logan 2:07½, sire of John Malcolm (2) 2:11½, champion two-year-old of 1913), by Durfee 11256; second dam Ripple, by Prompter 2305, sire of the dam of Gratt 2:02¼, etc.; third dam Grace (dam of Daedalion 2:08½, Creole 2:15 and Eagle 2:19½), by Buccaneer 2656, sire of the dams of 2 in 2:10; fourth dam Mary, great broodmare, by Flaxtail.

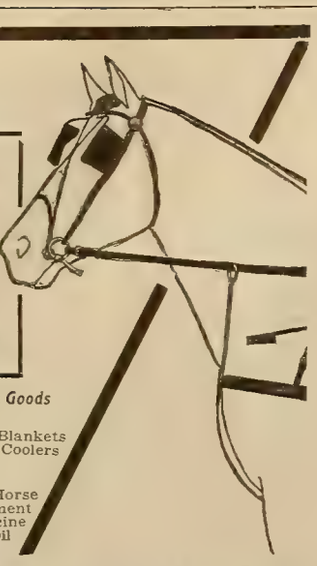
JIM LOGAN is not only a horse of most acceptable size and pleasing conformation, but is one of the most rugged campaigners ever raced. After acquiring a world's record as a three-year-old he reduced his record every year raced and is a sound horse today—no more eloquent testimony of his genuine natural qualities could be given. Of his very few living foals, every one trained has shown speed in convincing quantity, and the only one to be raced, Maxine (3) 2:15, began her career as a futurity winner. Could you ask more of a well bred horse than that he be a champion campaigner and transmit his qualities to his get?

In the stud, season of 1915, at Woodland Race Track

FEE: $50 for season, with usual return privilege, or $75 to insure living colt. Fees payable at time of service or before removal of mares. Excellent pasture at $5 per month, with best of care for mares, though no responsibility will be assumed for accidents or escapes. Call at race track, or address
J. ELMO MONTGOMERY, Davis, Cal.

The only son of Jay McGregor 2:07¼ on the Pacific Coast, and the only stallion in California whose sire and dam both have records faster than 2:10.

Onward McGregor



TROTTING RECORD (3) 2:23¼.
YEARLING TRIAL QUARTER IN :33.

Bay horse, black points. Height 16 hands, weight 1100 lbs. Licensed Non-Standard, Cert. No. 24.

First dam MARY GORDON 2:09¾ by GORDON 3127 (son of Onward 2:25¼); second dam Nell by Young Octoroon, sire of Shadow (dam of 4 and grandam of Peter the Great 2:07¼. J. Malcolm Forbes 2:08, etc.) Will make a limited season of 20 mares at Pleasanton Driving Park at $35 with usual return privilege. Every mare bred to him this year will be nominated in the Breeders and State Fair Futurities for foals of 1916 and first payment made by his owner. Address for all particulars

—Racing Harness—

A HARNESS with two styles of hitches—the two minute attachment for racing, and the breast collar and traces for jogging and training.—Another famous Sell Brand product.

Made from genuine old-fashioned, slow-tanned Hollinger Oak Leather, without exception the finest harness leather produced in this country, reinforced with Indian tanned rawhide. Hand cut, hand finished. No other racing harness at anywhere near its price can equal this in quality. It is indeed a masterpiece of harness-making. If it wasn't the BEST of its kind, I wouldn't be backing it with my name and reputation.

Write for price and full information, or come and see it. **SEND FOR CATALOG**

THE PROOF 2, 2:29¾

A. T. R. No. 51956
LICENSED PURE BRED
CERTIFICATE No. 1029

From the family of Bingen 2:06¼, foremost among present day champions of all ages and gaits.

Son of **The Exponent 2:11¾** (by Bingen, dam Iva Dee by Onward 2:25¼), sire of 32 performers including The Temptress 2:08½, 6 three-year-olds, 20 two-year-olds and 1 yearling.

First dam **Chord 2:27** (dam of 4) by Wilkes Boy 2:24½, sire of 4 and the dams of 11 in 2:10; second dam **Sonata** (dam of 3) by Dictator 113, sire of 2 and the dams of 7 in 2:10; third dam **Cadenza** (dam of 2) by King Rene 1278, sire of the dams of 2 in 2:10; fourth dam **Virgie Wilkes** (dam of 4) by Geo. Wilkes 2:22, sire of the dams of 16 in 2:10.

In the stud, season of 1915, at Pleasanton Driving Park, at $50 the season with return privilege. We have colts in training to show his qualities as a sire. Grandsons of Bingen are siring champions such as Etawah 2:03½, Anna Bradford (3) 2:00¾, etc. Address for all particulars,

KEEFER & SPENCER, Pleasanton, Cal.

Grandly Bred A Colt Trotter A Proven Sire

Bon McKinney 51480

Cal. State License. Pure Bred No. 1213.

Three-year-old record 2:24½; trial (3) 2:15, 1:05.

Sire of

Bon Courage (2) 2:12¾ **Bon Bell (3) 2:17¾**

Son of **BON VOYAGE 2:08** and **DAPHNE McKINNEY** (dam of Frank N. 2:07¾, etc.), by McKinney 2:11¼; second dam La Moscovita (dam of Bon Guy (3) 2:11¾ and 2 others) by Guy Wilkes 2:15¼; third, fourth and fifth dams also in great brood mare list. Bay horse, in every respect a great individual, with substance, finish, and natural, frictionless trotting action. Very sure foal getter and a steadily rising young sire, his few foals possessing his most excellent qualities to a marked degree. Bon Courage was the only California bred three-year-old to win a heat from Esperanza in 1914.

In the stud, season of 1915, at the **Rush & Haile Ranch, Suisun, Cal.**, season closing August 1st. **Fee, $25 with return privilege,** payable cash at time of removal of mare. Good pasturage at $2.50 per month. For further particulars address

BEN F. RUSH, Suisun, Cal.

Derbertha Bells

Licensed Pure Bred, Cert. No. 1172.

NO. 60907 A. T. R. RULE 1.

DERBERTHA BELLS, foaled 1911, stands 15.3, weighs 1200 pounds, and is of magnificent conformation, style, trotting action and color; being a solid dark bay or brown with splendid mane and tail, massive well-formed limbs and feet, beautiful neck and head, fine, well set ear and eye as kindly as a fawn's and as courageous as a lion's. His breeding can only be hinted at here as he traces 20 times to Hambletonian 10—5 through Electioneer, 5 through George Wilkes, 4 through Strathmore and 4 through Abdallah 15 (the big four of the sons of Hambletonian), and twice through his daughters. This breeding is perfectly balanced by 18 crosses to Mamb. Chief 11—5 of these through his greatest son Mamb. Patchen 58 (leading progenitor of the dams of trotting sires), backed up by 2 crosses to Pilot Jr. 12, 4 to Black Hawk 5, 4 to Imp. Trustee and crosses to such other famous broodmare sires as American Star, The Moor, A. W. Richmond, Williamson's Belmont, etc.

I challenge any man to name a stallion with a broodmare inheritance approaching that of Derbertha Bells,—5 crosses to Green Mountain Maid (dam of 9 and Electioneer), 3 to Alma Mater (dam of 8 and 7 sires, including Alcyone and Alcantara), and 1 each to Miss Russell (dam of 7, including Maud S. 2:08¾ and 6 sires, including Nutwood), Dolly (dam of 4 and 5 sires, including Director, Onward and Thorndale), Beautiful Bells (dam of 11, including 4 world's champions and 10 sires) and Minnehaha (dam of 8 and 6 sires). These are pre-eminently the greatest mares of history in point of number of descendants in the standard list, besides 2 crosses to Bertha, the only mare with 2 in 2:04½, 5 in 2:10 and 13 in the list. Counting duplicates this pedigree contains the blood of 20 mares with an average of 9 performers each, and of the 14 mares appearing in the pedigree of two or more 2:10 trotters in 1910 this pedigree contains 8.

His disposition and deportment are in perfect harmony with his superlative breeding and conformation, all that could be desired. I own a yearling filly by him that stamps him as a sire of the first rank, and I invite the most critical inspection both of him and his get. He will be allowed a few choice mares at $25.00 the season with usual return privilege. Tabulated pedigree upon request.

J. W. PENDLETON, Owner,
1601 Seminary Ave., OAKLAND, CAL.

Peter The Great

is the world's foremost progenitor of extreme speed; sire of 30 in 2:10, etc.

HIS SON

PETER McKLYO 3, 2:12 1-2

Cal. State License Pure Bred 2339

will make the season of 1915 in the training stable of James Thompson at the **San Jose Driving Park** beginning March 15 and ending July 1.

PETER McKLYO (3) 2:12½, the only California-owned son of Peter the Great of an age permitting stud duty, is out of a great-bred young matron by Jay McGregor 2:07¼—Klyo (2) 2:29½; second dam Miss Spears 2:21¾ (dam of 6 including Shakespeare (3) 2:09¾); third dam Medium's Last (dam of 7 including Trampfast (2) 2:14¼); fourth dam Suzanne (dam of 1 and grandam of 10 including Susie J. 2:06½).

This colt is four years old, having obtained his record last season with a very limited amount of work. He came into my hands perfectly green in February, 1914, and developed speed so fast that I had to take his shoes off and jog him for two months barefooted. Being by Peter the Great, the sire of the century, and, as you will notice, out of a daughter of Jay McGregor, another wonderful family of horses, he is one of the best bred young horses in the world and I can truthfully say he is one of the very best individuals that I ever had the pleasure of looking at. He can trot a quarter in 30 seconds, and I am firmly of the opinion that he will trot a mile this fall in 2:06 or better.

Fee, $75 the season with return privilege. Mares pastured at usual rates and accorded best of care, but no responsibility assumed for accidents or escapes. Service fee and pasture bills must be paid before removal of mares. Address for all particulars

L. H. TODHUNTER, Owner, Sacramento, Cal. JAMES THOMPSON, San Jose Driving Park, San Jose, Cal.

EXPRESSIVE MAC 2:25 1-2

A. T. R. No. 41513 Licensed Pure Bred, Cert. No. 1041.

Clara Mac 2:04½ Sire of **Vera Hal 2:05**

Only stallion in California to sire a new 2:05 performer in 1914, and one of three stallions in U. S. to sire two new ones in 2:05 that season.

Also sire of Madam Mac (4) 2:10¼, trial 2:07; Eddy Mac (3) 2:29½, trial 2:13; Nellie Mac, trial 2:18 trotting, good for 2:10 this year, and numerous others with fast trials. In four show classes at Fresno his colts won three firsts, one second.

Son of **McKINNEY 2:11¼** and the great brood mare **EXPRESSIVE 2:12½** by **ELECTIONEER 125.** Ideal in color, size and conformation—seal brown, height 16½ hands, weight 1275 pounds. Permanently in the stud at my ranch three miles south of Selma, at **$25 the season,** usual return privilege, or **$35 to insure.** Good pasture for mares at $2 per month and best of care given. No responsibility assumed for accidents or escapes. Address for all particulars

J. H. NELSON, Selma, Cal.

WOODLAND STOCK FARM

INCORPORATED

Offers for Service for the Season of 1915

PRINCE ANSEL

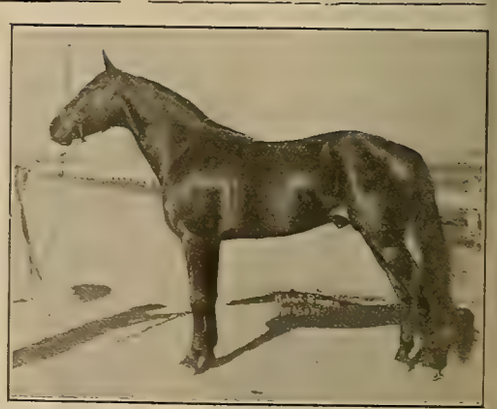
CERT. 1062

2, 2:20½ A. T. R. 29220

Sire of
Prince Lot 2:07¾
Joseph Ansel (3) 2:12¾
Lottie Ansel (2) 2:14¼
Laura Rogers 2:11¼
Adansel (3) 2:14½
Arista Ansel (2) 2:18¼, etc.
And the dams of
John Malcolm (2) 2:11½, etc.

PRINCE ANSEL is not only doing more than any other individual to perpetuate the fame of the great family of **Dexter Prince,** but he has few rivals in the land as a progenitor of futurity winning youngsters, as attested by the summaries of coast classics year by year. None more highly esteemed by horsemen in general. **Fee, $50 with usual return privilege.**

ROBERT BINGEN



CERT. 1061

2:11¼ A. T. R. 45033

Best Bred Son of

BINGEN 2:06 1-4

Sire of **Uhlan 1:58;** 14 in 2:10
First dam **Episode 2:18** half sister to Peter the Great 2:07¼
Second dam **Santos,** dam of Peter the Great 2:07¼, J. Malcolm Forbes 2:08, etc.

ROBERT BINGEN, in every way one of the most desirable horses ever offered for service in California, represents the families whose blood is most eagerly sought by successful breeders today—Bingen and Peter the Great. He is the only son of Bingen standing for service in California and his book is rapidly filling. **Fee, $75 by the season.**

True Kinney 2:12¼

The best young McKinney stallion in California—a colt trotter and a coming sire. His first foals are among the best on the farm and show for themselves. Terms on application—season limited.

FOR SALE OR TRADE

LUCRETIA BOND

Brown filly, foaled 1913, bred by Col. J. C. Kirkpatrick.

By THE BONDSMAN

Sire of Colorado E. (3) 2:04¾, Colonel Franklin 2:06¼, Lizzie Brown 2:07¼, The Plunger 2:07½, Creighton 2:08¼, Grace Bond (3) 2:09¼, Carmen McCan 2:09½ and 59 others in 2:30.

Dam, Lucretia 2:13½ A great trotting daughter of Nazote 33527 (brother to Azote 2:04¾).

Grandam, Lucyneer 2:27 (dam of five trotters), one of the best daughters of Electioneer 125.

LUCRETIA BOND is one of the nicest fillies of her age in California in every way, and a natural trotter. Beautifully made, fine disposition, none better bred, and in her first pair of shoes has trotted quarters in 45 seconds. Offered for sale only because I am a matinee driver and prefer something of racing age. She is staked and paid up in the coast futurities. Price $400, or will trade for good matinee horse if mutually acceptable. She can be seen at Pleasanton, stable of H. G. Smith. Address for particulars:

TIMOTHY D. SEXTON 2608 Market St. OAKLAND, CAL.

Held Out Because of a Ruptured Tendon

THOUSANDS of races have been won by inferior horses simply because the horses that rightfully should have won were held out because of ruptured or sprained tendons. There's many a horse today pulling delivery wagons, suffering with limb diseases, whose place should be on the race track winning big purses for their owners. And they would be, if their owners would only give them proper treatment with

The Only Spavin Remedy in the

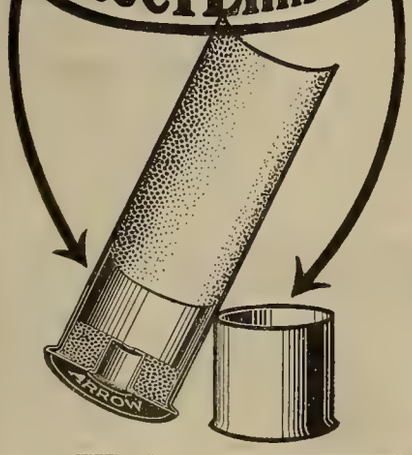
WINCHESTER

"LEADER" AND "REPEATER" FACTORY LOADED SHELLS



What determines superiority? Is it not the greatest achievement in any line of endeavor? If you agree in this definition, you must admit that Winchester Factory Loaded Shells proved their superiority over all others when they made the World's Long Run of 565 Straight—a record that has never been approached. It's all very well to say the *man* did it and that he might have done it with some other shells. There is at least a reasonable doubt about this. The fact remains that no other shells have accomplished it, in the gun of any man. This brings up the question of the fine points of shotgun shells. It is difficult to imagine how any shells can be better than the **W** brand. The greatest resources, the best materials and equipment and the most expert knowledge are utilized in their manufacture; and, to say the least, no more can be claimed for any shells. It's wisdom to use them, that's all. You are then sure you have the best in the market anyway.

W *SHELLS ARE OF PROVEN SUPERIORITY*

W

Here's the Steel Lining

¶ It grips the powder charge and puts all the punch back of the shot.
¶ It gets the load to the target quicker.
¶ It protects gun and shooter.

—AND IT'S FOUND ONLY IN—

Remington UMC Speed Shells

The Remington-UMC Steel Lining is one of those simple but fundamental discoveries that come along now and again, and revolutionize standards all along the line.

Practically every sportsman has seen the Remington-UMC "Speed Shells" at work in his own gun or in that of his shooting partner or his rival, in the field or at the traps.

Why the steel lining acts as it does is partly inherent in the very nature of smokeless powder and its peculiar method of exploding; and partly due to the basic Laws of Motion.

You know how it works out in practice, at traps or in the field—the shot thrown faster, getting quicker to the marks; a shorter lead on your bird; an easier feeling about angles—less guess-work on the quartering bird or the "oncomer."

Whatever make of gun a man shoots, whether a Remington-UMC or some other standard arm, he is more than likely to shoot one or the other of these Remington-UMC Shells—the "Arrow" or the "Nitro Club" (or in the black powder, the old reliable "New Club").

Many a dealer sells nothing else in Shot Shells—has no demand for anything else.

SAN JACINTO
Winner Futurity No. 1, 1913, P.C.G.S.H.A. Winner Junior Championship and Sweepstakes, Cal. State Fair 1914.

HIGHLAND LUCIA
Winner Futurity No. 2, 1914, P.C.G.S.H.A. First in 3-yro. Mare and All Age Mare Combination Classes, State Fair, 1914.

EDITH ADAMS
Thirteen firsts in thirteen shows, 1914, including Grand Championship, three gaited saddlers.

AND NUMEROUS OTHER PRIZE WINNING THREE AND FIVE GAITED SADDLE HORSES.

The Farm's Brood Mares

include such well known individuals as Thelma H. by Gloster Denmark; Levia (from the famous Castleman Farm in Kentucky) by Blue Grass Hambletonian; Lizzie Cromwell (dam of The Moor, sold for $7,500) by Harrison Chief, being the famous show mare bred and exhibited by Gen. J. B. Castleman, winner at Madison Square Garden and other great shows; Leonora (dam of San Jacinto, winner of the first saddle horse futurity) by Dick Taylor; The Matron (best obtainable type of the saddle horse brood mare) by Wilson's King, and others of a similar degree of excellence.

Here are some of our recent importations from Missouri:

King of the Highlands, chestnut stallion (7) by Judge Collins, dam Flora W. by Greatland; a magnificent type, 16 hands, 1200 pounds, wonderful in action for both carriage and lightness of gait.

Jurist, red chestnut colt (3) by Bourbon's Best, dam by Chester Dare; all style and action, pleasing in every way.

Confidence, chestnut gelding (4) by Rex Chief A., dam by Charles Reade. Rex Chief A. is the sire of Lee Chief, Missouri's champion junior mare, 1914, recently sold for $2,500, and Confidence lacks in no way in the general quality that won Lee Chief her fame.

Helen Idlewood, black mare (7), one of the best daughters of Rex McDonald; can trot or singlefoot better than a three-minute gait and was a good prize winner last year in select company.

Roya McDonald, a five-year-old daughter of Rex McDonald; a grand mare in every way.

Comedian (3) by Rex McDonald; a good winner in 1914, two-year-old stallion classes.

Tourist Peavine, a grandly bred yearling colt, a coming champion from champion families.

LOVERS OF THE SADDLE HORSE

are cordially invited to visit Sierra Vista Stock Farm, whether on a buying trip or merely sightseeing. They will be welcomed at all times and will find the journey well worth while. We have for sale at all times grand individuals of all ages and sexes, competently broken and trained, faultless in manners and disposition, suitable for park and show ring. Correspondence is solicited from interested parties.

SPOHN'S DISTEMPER COMPOUND TRADE MARK

WORMS

"Wormy," that's what the matter of 'em. Stomach and intestinal worms. Nearly as bad as distemper. Cost you too much to feed 'em. Look bad—are bad. Don't physic 'em to death. Spohn's Compound will remove the worms, improve the appetite, and tone 'em up all round, and don't "physic." Acts on glands and blood. Full directions with each bottle, and sold by all druggists.

SPOHN MEDICAL CO.,
Chemists, Goshen, Ind.

The Year Book For 1914

VOLUME 30

Will be ready about March 10. Will contain over 900 pages, with same tables as heretofore.

Price $3.00 f. o. b. Chicago

If desired sent prepaid remit 25 cents additional. Please make all remittances by draft on New York or Chicago, or money order.

American Trotting Register Association

137 SOUTH ASHLAND BOULEVARD, CHICAGO, ILL.

We have on hand a copy of Vol. 8, for 1892.

Pedigrees Tabulated

Typewritten, Suitable For Framing

Registration Standard-Bred Horses Attended to

Stallion Horses

with picture of the horse and terms on first page; complete tabulated pedigree on the two inside pages and description on back page

Stallion Cards

two sides, size 3¼ x 6¼, to fit envelop

Stallion Cards for Posting

size, one-half sheet, 14x22; size one-third sheet, 11x14

Stallion Service Books, $1.00

STALLIONS ADVERTISED.

ON McKINNEY (3) 2:24¼.....Ben F. Rush, Suisun
ARLOKIN 2:07½.....W. G. Durfee, Los Angeles
OPA DE ORO 1:59.....W. G. Durfee, Los Angeles
DERBERTHA BELLS.....J. W. Pendleton, Oakland
EXPRESSIVE MAC 2:25½.....J. H. Nelson, Selma
IM LOGAN 2:01¾.....J. Elmo Montgomery, Woodland
OE PATCHEN II 2:03¾.....C. L. DeRyder, Pleasanton
KINNEY DE LOPEZ 2:23.....Hemet Stock Farm, Hemet
MAHOMET WATTS 2:08¼....C. L. DeRyder, Pleasanton
ONWARD McGREGOR (3) 2:23¼..B. Webster, Pleasanton
PETER McKLYO (3) 2:12½.....Jas. Thompson, San Jose
PRINCE ANSEL (2) 2:20½.....Harry Dowling, Woodland
ROBERT BINGEN 2:11¼.....Harry Dowling, Woodland
THE PROOF (2) 2:29¾....Keefer & Spencer, Pleasanton
VERNON McKINNEY 2:01½..C. L. DeRyder, Pleasanton
WILBUR LOU (3) 2:10¼.....Hemet Stock Farm, Hemet
ZOMBLACK (2) 2:26.....C. L. DeRyder, Pleasanton

Breeders having nominations in the Pleasanton Futurity are reminded that there will be a payment due on the same on May first.

◈◈◈

Elmo Montgomery has Effie Logan at Woodland, looking much younger than she really is, and will breed her to Robert Bingen 2:11¼.

◈◈◈

Harvey Skaggs of Portland has taken Dean Swift 2:08 to Edmonton for another campaign over the prairie tracks. He is entered in the fall meeting at the exposition.

◈◈◈

Expressive Mac 2:25½ had served thirty-one mares up to April 18th. Pretty good for one stud horse at this season in any year, let alone a "dry one" in the breeding business.

◈◈◈

Anvilite, the Anvil—Martha Spy two-year-old in the MacKenzie stable, went the route lately in 2:25¾, last half in 1:10 and the quarter in :32½. What price against him in the two-year-old trot in June?

◈◈◈

Peter McCormick 2:08¾—not only in a race but in a recent workout at Pleasanton. It sure knocks the tar out of these eastern horses to cross the mountains, eh? Fleeta Dillon is beating 2:10, too, so there's another good one plumb, teetotaciously sp'iled by the ship.

◈◈◈

Tom Corbett of this city, one of the best known men in general sport circles on the Pacific Coast, died last Friday at his home here after an illness of nine days from heart disease. The funeral services were held Sunday morning and were widely attended by men and women from all walks of life.

◈◈◈

Cleo Dillon (3) 2:13¼, winner of the three-year-old trotting division of the Breeders' Futurity at Chico in 1908, has been sent by her owner, E. A. Gammon of Hood, Cal., to Woodland to be bred to Prince Ansel (2) 2:20½. She is suckling a fine stake prospect by L. H. Todhunter's good son of Peter the Great 2:07¼—Peter McKlyo (3) 2:12½.

◈◈◈

G. D. Armstead, proprietor of the Hotel Reynolds at Riverside and one of the good friends of the light harness game at that point, has the pacing mare Petty McKinney in training in the stable of O. E. Folk and recently jogged her a half in 1:03 for his own pleasure and "just to see how she did it." That Riverside track is a bear, and you will doubtless note some horses there of exactly that same class.

◈◈◈

General C. C. Watts of Charleston, W. Va., was among the visitors in the city last week, also making a trip to Pleasanton as the guest of Mr. and Mrs. Charley DeRyder to see his horses Mahomet Watts 2:08¼ and Twinkling Dan 2:06¼, with whose performances he is much pleased. The General was enthusiastic in expressing his regard for the work done at Pleasanton by Mr. MacKenzie, and also derived a great deal of pleasure from his visits at the exposition, which, of course, included trips to the livestock department and the race track. All met with his hearty approval and he prophesies a great success for the harness meetings in June and November.

Teddy Bear's mile Sunday in 2:08¾ makes him look like a pretty fair pacer for this year's 2:08 class—and Potrero Boy was right there, with John Malcolm in the immediate vicinity.

◈◈◈

Tom Gahagan, the syndicate turf writer, writes from Detroit that he expects to arrive in San Francisco early in May and commence his duties in connection with wising up the easterners on horses, horsemen and horse races at the exposition.

◈◈◈

Carey Montgomery has a new race horse at his ranch near Davis, a stud colt by Jim Logan 2:01¾ out of Lela H. L. 2:24¼ (dam of Kinney H. 2:22) by Nutwood Wilkes 2:16½, grandam Liska 2:28¼ (dam of six) by Electioneer 125. The mare will be bred this season to Jim Logan 2:01¾. The blood of Nutwood Wilkes and Charles Derby has been crossed very successfully in the past, and Carey expects a "real hoss" from these matings.

◈◈◈

Tom McInerney, one of the best known caretakers on the coast, on the staff at Woodland Stock Farm last fall and employed more recently at the P.-P. I. E., has been confined at the Lane Hospital, this city, for some time with a badly crushed foot, the result of Tom's getting tangled up in the path of a motor truck while at work. The lanky lad is still wearing a plaster cast and will not be out ofthe hospital for a few days, but has come around in nice shape and expects to be a "husky" again in a few weeks.

◈◈◈

Just before Dr. Farnum's death, Geo. L. Brown of Ferndale had negotiated for a young thoroughbred stallion, which he took possession of reently and removed to his home, where he will be in service and also be raced a bit locally. He is a good colt and a well bred fellow and should be popular in his new home, as he is a son of Marse Abe and Tollytot by St. Carlo, with the next several dams by Rutherford, Woodburn, Ringgold, Cook's Whip and Duke of Bedford, respectively.

◈◈◈

Business kept Charley DeRyder in the city parts of several days of late, the journey back and forth between Pleasanton and Oakland being made on each occasion by means of the big Lozier car, with Mrs. DeRyder as companion, mechanician and speed gauge. Charley watches the road and his better half keeps her eye on the indicator; whenever it registers over eighty miles she nudges Charley in the ribs and that worthy takes back to a more dignified and less hurried gait in the neighborhood of only sixty or seventy miles "per."

◈◈◈

J. W. Pendleton of Oakland reports that on April 15 Abbie McNutward by Guy McKinney foaled a slashing big black colt by Derbertha Bells that would be a credit to any parentage, the young fellow being christened Bertrey Bells in honor of Beautiful Bells and Bertha, to the latter of which he traces three times. On April 18 Beautiful Bertha by Moormont also foaled a black colt, this one by Rapallo and named Louniska Berbells, a combination of the names of four of the great matrons that appear in his pedigree—Lou Milton, Oniska, Bertha and Beautiful Bells. Both youngsters are staked in the coast futurities and will go to some first class speed factory when the proper time arrives.

◈◈◈

Wednesday night's meeting of the California Driving Club witnessed little business save the payment of bills and the election and installation of officers, no definite plan of racing for the season being adopted, though it is probable that the two clubs will alternate in the use of the P.-P. I. E. track for their weekly events. Pressure of business caused some changes in the ticket voted on from the original nominations, the following gentlemen being selected to guide the destinies of the club for the ensuing year: President, D. E. Hoffman; Vice-President, E. M. Doyle; Second Vice-President, Joe Kidd; Treasurer, Al Hoffman; Secretary, Luke Marisch; Starter, Wm. Higginbottom; Board of Directors, J. A. McKerron, I. B. Dalziel, J. V. Galindo, D. Keating, Fred Thompson.

◈◈◈

R. D. Mayes of Dixon, who was the best buyer at the Woodland sale, is a young gentleman who is well known in other branches of sport and whose advent into the trotting game is warmly welcomed. For some time he was a generous patron of the manufacturers of autos, having owned a number of high priced racing cars, but his inclinations ran to a sport in which there was less element of risk to the spectators and he decided on the trotter. Madeline Marshall, for which he topped the sale, is a grand type of brood mare, for a newcomer to the game to purchase—a fine individual, a proven producer, in foal to Robert Bingen 2:11¼—and her fame will doubtless be enhanced this year through the performance of the good horse Zomblack. The True Kinney—Ella J. yearling for which he paid $300 is also the right kind and has shown some very convincing speed. He started in trotting for Harry Dowling and had negotiated eighths in 24 seconds, when he rolled over into a pace, and came very fast at that gait, stepping an eighth the only time he was given his own way about it in 19 seconds. Mr. Mayes can afford to indulge his tastes for any branch of sport he fancies, and we hope that in his new venture he will not only meet with financial success but derive a great deal of personal satisfaction and pleasure from the same.

The half-mile heat races on the May Day program at Dixon have from five to eight entries. Some time, folks, some time.

◈◈◈

They are preparing for a great day at Dixon next Saturday at the annual May Day celebration, and as usual the horse races will play a big part, the entries being as follows: 2:20 trot—Healaini, Gracie S., Verne Antie, Future Tramp, and an unnamed trotter from Loren Daniels' stable; 2:20 pace—Sad Sam, John Mc., Palitia, Lottie D., Marie, Louvre, Donald and Oro Mo; free-for-all—Della H., Alton S., Vera Hal, Star Tilden and Teddy Bear, in addition to which there will be a relay race with four entries of three horses each. The usual crowd from this city and other bay points will be on deck, as May Day at Dixon is an honored institution regardless of what other attractions may be holding forth.

◈◈◈

Two years ago this fall at Santa Rosa a mighty good looking green pacer won a heat from Guy Borden, breaking into the records officially as "Booze, b. g. 2:07¼," no information being forthcoming as to his pedigree. He has always been too good to have been one of the "Topsey" kind that "just grew," and the writer did a little "sleuthing" at Sacramento and can offer the following as authentic: "Booze, b. g. 2:07¼, by Dupe, dam by Bay Bird 8874, grandam by Knight 2:22½." This makes another 2:10 performer to be credited with All Style 2:10 to daughters of Bay Bird, but it is not probable that Dupe's 2:10 list will grow much. That boy was, or rather is, a son of Stanton Wilkes 2:10½ (to which horse Booze has sometimes been credited, erroneously), but as a stallion was such a mean horse to handle that he was castrated and is, according to Sacramento report, at present a member of a four or six horse freight team there in the valley.

◈◈◈

A camel, according to the popular idea, is not an animal that is given greatly to levity or to vocal expressions of hilarity, but if a certain member of the tribe could have been at Woodland last Thursday, he (or maybe it is a she) would undoubtedly have burst into a ribald cachinnation that would have made the rollicking laughter of a coyote resemble the dead march. The ship of the desert referred to is the long suffering beast upon which "Wee Willie" Van Atta, the three hundred and sixty pound runt of the San Francisco Association of David Harums, made his recent memorable cruise of the Streets of Cairo on the Joy Zone. It was a stormy voyage for the old craft and she staggered in the trough of the big seas under her heavy deck load and threatened to burst her seams at any moment. However, port was made at last and the cargo discharged, only for the owners to discover that the hump was on the wrong side of the vertebra—a grievous damage that caused her to be laid away in the estuary for several days, for who, pray tell, would cruise on a ship of the desert minus a hurricane deck? And now we come to the point that would have been a graphic portrayal for the "Rejuvenation of Aunt Mary" could she (or maybe it was a he) have been there to take it in. Be it known that Bill has reformed and retired from active service in the marts of trade—horse trade—only buying one when the opportunity is just naturally too good to let pass, and he was in attendance at the Woodland sale in a purely social way, not in the least professionally, or what John Splann might term "horsedealerologically." Manager Dowling, to afford his crowd some amusement along with their bargains, had arranged with the dusky vaquero, Jesse Stahl, for a bit of broncho twisting in which Bill took a lively interest, being himself an equestrian of some accomplishments—as witness his dare-devil performance at the Streets of Cairo. Jesse and a chestnut work horse that evidently had taken the Keeley against being ridden had all the track and were putting up a nice performance, vociferously advised by Bill, who occupied most of the draw gate. Suddenly something happened—Jesse's spurs came together in mid air rather than safely under his bronc's ribs, and the glad spring sunshine glinted merrily on the soles of his number tens as he plowed a furrow in the good footing of the track. Jesse quit riding but the bronc didn't quit pitching—not him. He picked out Bill as his meat and made for him like a submarine after a merchantman. Bill didn't run—he simply pushed the self starter, threw in the high gear and left there, with the bronc camping right on his heels like a lead-horse. When Bill dodged the bronc dodged, and just as something serious seemed inevitable Bill let out another burst of speed and made the office door. Fortunately it was open or the carpenters would have had a job of repairs next day, for the impact of the Weighty William against a closed door would have taken it off the hinges or knocked the blamed shack over. There is a story that is a classic around the local yards concerning the historic occasion upon which Fred Lowery inveigled Bill into trying to milk a cross-grained cow over at the ranch behind Alameda, but if both events could be staged over Bill would simply pass himself in his last Thursday's form. If anyone wants to bet you that a real fat man can't run fast, just rustle around and make a little gathering composed of yourself, your betting friend, a stakeholder, Bill, a coon named Jesse Stahl and a certain mild-eyed chestnut gelding with collar galls on his shoulders. Then bet your money wide open, without a copper from soda to hock and call the turn for the works! You needn't even be bothered about splits!

Sierra Vista Stock Farm

Some seven or eight years ago there came to Southern California perforce of circumstances a young gentleman of moderate means and uncertain health, Revel Lindsay English by name, previously a musician by profession and a horseman by inclination. California, with her customary disdain of conventionalities and precedents in some modes of procedure, set about a transformation that has resulted in restoring the gentleman to the best of health and giving to the coast a successful professional horseman and an accomplished amateur musician—a "reversal of form" with a vengeance.

Near Chino, San Bernardino county, thirty miles east of Los Angeles, Mr. English obtained a tract of some thirteen hundred acres, embracing land admirably adapted for both farming and grazing, designating it, in honor of its scenic setting, the Sierra Vista Stock Farm. Draft horses, trotters, saddlers, registered Holstein cattle and other livestock have been produced with profit, but it is for the saddle horse that Mr. English has the greatest love and natural adaptability, and it is in the breeding of this family that he has met with the greatest success. Prior to his migration to the west, he had purchased in Missouri the stallion Highland Squirrel King, one of the "show me" state's very best representatives of the famous family of the Denmarks, and with this son of Forest King and a select band of brood mares he began the operations that have stamped him as the most successful breeder of the gaited saddler on the Pacific coast.

Mr. English chose most wisely in his foundation stock, the animals selected being not only prize winners in their own right, but of such potency of blood that a reproduction of prize winners has followed as a natural course. Highland Squirrel King, in the eight years that he has been under the present ownership, has never been unplaced in a show class, winning the blue in eighty-three out of ninety-one shows, one of the signal victories of last season for himself and his clan being at Sacramento in the event for stallions and four of their get.

In 1913 there was staged at Sacramento the first futurity ever given for saddle horses, officially known as Futurity No. One of the Pacific Coast Gaited Saddle Horse Association, the winner being returned in Mr. English's chestnut colt San Jacinto by Highland Squirrel King, the lad following up this showing by winning the junior championship and sweepstakes at the state fair in 1914. The farm also won the futurity last year with the undefeated Highland Lucia, also winner at the state fair of the classes for three-year-old mares and combination mares of any age. The farm's premier is also the sire of the three gaited mare Edith Adams shown thirteen times in 1914, and thirteen times awarded the blue. For this year's futurity Mr. English is fitting the three-year-old colt Del Monte Denmark by Prince Arthur, and will also show, from the produce of Sierra Vista Farm, the two-year-olds Hazel Simmons, Bellmarillis and Rey El Sierra Vista, rounding out his stable with recruits from a great band of saddlers recently acquired. Encouraged by his former successes and confident concerning the future popularity of the gaited saddler on the coast, Mr. English made a spring trip to the central west and brought back with him a number of exceptionally choice animals, his selections including the following:

Roya McDonald, five-year-old mare by Rex McDonald;

King of the Highlands, seven-year-old chestnut stallion by Judge Collins, carrying the blood of Black Squirrel, Black Eagle, Dave Akin, Messenger Chief, Denmark, etc.; a magnificent big fellow, sixteen hands, twelve hundred pounds, with the lightest of action and great style, a representative type;

Jurist, three-year-old colt by Bourbon's Best, tracing on his sire's side to Bourbon Chief, Latham's Denmark, Imp. Bellfounder and Indian Chief, while his first three dams are daughters of Chester Dare, Coleman's Eureka and Black Squirrel, respectively, his fourth dam being the famous old-time mare Drue Allen by Star Denmark; a red chestnut fellow, all style and action; first in weanling and yearling classes, Kentucky State Fair, and never beaten in the show ring.

Tourist Peavine, yearling colt by Dr. Hockaday, best bred son of Rex Peavine, sire of the world's champion mare Hazel Dawn; Tourist Pearvine's dam is Queen Polly (sister to Forest King, sire of Highland Squirrel King), so the youngster carries a great infusion of famous blood, tracing to such sires as Rex Peavine, Rex McDonald, Peavine 85, Squirrel King, Artist, Montrose, Gray Eagle and Black Hawk;

Confidence, four-year-old chestnut gelding by Rex Chief A. (sire of Lee Chief, Missouri's champion junior mare, 1914, recently sold for $2,500), dam by the Morgan stallion Charles Reade;

Helen Idlewood, seven-year-old black mare, one of the best ever bred in Missouri; by Rex McDonald, dam Ruby Cason by Ernest B., can trot or single-foot faster than a three-minute-gait and was a most consistent winner in the hottest kind of company in 1914.

L. S. Rollins, formerly of Missouri, who has been with Sierra Vista farm "off and on" during the greater part of its existence, accompanied Mr. English on his buying trip and returned with the new purchases to assist in preparing all the Sierra Vista entrants for the exposition shows and coast fairs. The farm drew thirty-five firsts (including three- and five-gaited championships), five seconds and three thirds out of forty-one shows at the California State Fair in 1914, a wonderful record which Messrs. English and Rollins hope to equal or eclipse at the P.-P. I. E. Whether or not they do either, it is a safe prophecy that California's reputation as a producer of gaited saddlers will be ably sustained at their hands, no matter what kind of hot company is afforded by the visitors.

The matrons at Sierra Vista have been selected with much care and thought, as the performances of their produce amply attest, and include such well known individuals as Thelma H. by Gloster Denmark; Levia (from Gen. J. B. Castleman's establishment in Kentucky) by Blue Grass Hambletonian; Leonora (dam of the futurity winner San Jacinto) by Dick Taylor; Lizzie Cromwell (dam of The Moor, sold for $7,500, and Del Monte Denmark, Mr. English's candidate for this season's futurity) by Harrison Chief, this being the famous show mare bred and exhibited with such success by Gen. Castleman at Madison Square Garden and other eastern shows; also the aristocratic lady recently purchased in Missouri, The Matron by Wilson's King. The Matron is pronounced by competent judges to be the ideal type of a saddle horse brood mare, and considerable elation is felt at her new home over the fact that on April 12th she foaled a beautiful filly by Grand McDonald.

In the few years of its existence, Sierra Vista Stock Farm has become the west's leading establishment of its kind, and its continued success is, by the enterprise and intelligent endeavor of its proprietor, amply assured. The gaited saddler is rapidly rising in favor, and from Sierra Vista in future years will come not only large numbers of the best saddlers in daily use in the city parks, but the winners of show classes not only at home but abroad. Practically every class of horses has shown improvement when transplanted and further developed in a California environment, and with eastern prize winners to build on it does not seem that it would be asking too much of Mr. English in requesting that he make good for us on the foregoing prediction. This much is certain—that if he does fail to substantiate our claims it will not be for want of trying, and trying constantly and well.

DOWN IN THE BLUE GRASS.

The sale of McGrathiana Farm, which took place last week to C. B. Shaffer of Chicago, will, in all likelihood, result in establishing one of the most important studs of light harness horses in Kentucky, as the new owner of this famous estate is determined to have the best that is obtainable, and, in addition to beautifying the place, building elaborate improvements and making it in every way a thoroughly appointed nursery for the light harness horse, every effort will be made to collect the best stallions and mares that money can buy.

McGrathiana, next to Woodburn, is the most noted farm in Kentucky where thoroughbreds of great capacity have been produced. It was founded many years ago by Price McGrath and continued by his successor, Milton Young, through a period covering considerably over a quarter of a century. Here it was that Hanover was brought, after his racing career was over, and here the famous son of Hindoo and Bourbon Belle, by Bonnie Scotland, became as famous as a sire as he was as a race horse. For several years it has been used for farming purposes, and, as much of the soil has been turned over and the land replenished, it is today in prime condition for the purpose for which it is intended. Mr. Shaffer has recently bought Bergen 2:06¾, by Bingara, out of Russia by Kremlin 2:07¾, a cross that has produced Baden 2:05¼ and several others of real racing ability.

Mr. Shaffer has, within the last six months, bought several high-class broodmares, and has in training at the Lexington track in the stable of J. O. McAllister, Miss Rilda 2:08½, a candidate for the rich prizes of the year; Richman (2) 2:08¾, the champion two-year-old pacing gelding; Sis Bingen, by Bingen, out of Sis Directum by Directum 2:05¼, a filly which, in her yearling form, was one of the real stars of the Lexington track. Miss Rilda, a mare of great speed and last autumn up to a mile in 2:07, is by Peter the Great and represents the very best type of this extraordinary tribe. Sis Bingen is an exquisitely turned filly, and is probably the fastest trotter of her age sired by the greatest of modern progenitors.

McGrathiana Farm is about four miles from Lexington, on the Newtown pike, and contains a little over eight hundred acres. It lies in the richest section of the Blue Grass region, much of it being land that has no superior, either for grazing or farming purposes. While it has, in the past, been noted as a nursery for the thoroughbred, it now takes its place as a breeding farm for trotters. The former owner of McGrathiana, Milton Young, dealt extensively in thoroughbreds, and nowhere was there to be found a shrewder horseman than he, a better judge of individuality, or one whose influence was more widely felt in the affairs of the running turf. The farm's recent owners, the Beasley brothers, priced it a few months ago to one of the most extensive breeders of thoroughbreds in this country, and had the negotiations then pending resulted in a sale, it would now be the home of the famous stallions Colin, Disguise and Ultimus, for the prospective buyer was at that time none other than Price McKinney, the namesake of its founder, Price McGrath, and the most extensive purchaser at the closing out sale of the estate of the late James R. Keene. With the exception of Castelton, it has been the most noted breeding establishment for thoroughbreds in this state, since the days in which Woodburn sent forth many of the greatest race horses ever foaled.

After a lapse of years, in which the farm has been used for the production of tobacco and other products, it will take its place as an establishment from which may come colt trotters of early and extreme speed, and great race horses at maturity. If the present plans of the new owner are carried out, McGrathiana will soon become one of the most beautiful estates in Kentucky, rivaling, perhaps, in this respect, Walnut Hall and Elmendorf. Mr. Shaffer, no matter what results may follow his breeding ventures, will never have cause to regret the purchase of this noted farm, for while he paid a liberal price for its broad acres, its value will be enhanced as the years go by, as nowhere in America can there be found more productive soil than in this favored section.

At Curles Neck Farm, several foals by the champion, The Harvester 2:01, have arrived, as well as a few by other stallions, and the number exceeds that of the youngsters reported by the majority of Kentucky establishments of the same size. The Harvester colts and fillies are nine in number, up to April 3, and include a bay colt, out of Queensland 2:19¼ by Bingen 2:06¼; a black colt out of Gazeta 2:06 by Admiral Dewey 2:04¾, the property of Andrew W. Smith of New York; a bay filly out of Baroness Jay 2:20¼ by Jay McGregor 2:07¼; a bay filly out of Gertrude Dillon 2:10½ by Sidney Dillon; a bay filly out of Violette A. (4) 2:18¼ by Red Medium; a bay filly out of Bernice R. 2:07¼ by Dexter Prince; a bay colt out of Zarrine (4) 2:07¼ by Silent Brook 2:16½; a roan filly out of Baroness Evelyn (3) 2:12¾ by Baron Review 2:21¼. Caracas, by Bingen, has foaled a bay colt by Justice Brooke (3) 2:08½, Baroness Virginia (3) 2:08¼, a bay colt by Silent Brigade (2) 2:10¾, and Nonnie Moko by Moko, a black filly by Silent Brigade.

The Kentucky-bred foals by The Harvester are invariably a fine looking lot, and it will be interesting to watch the careers of the colts and fillies from Virginia and the Blue Grass, and to compare their merits. Edward A. Tipton, the manager of Curles Neck Farm, has had many years of experience as an executive, as well as a buyer of blood stock, and no one knows more than he of the best manner of caring for and rearing young foals. He was responsible for much of the success of the breeding ventures of the late Marcus Daly, having purchased a great number of thoroughbred and trotting mares and stallions for Bitter Root Farm. Virginia has produced many very high-class race horses, particularly runners, and with the opportunities afforded at the superb estate on the James, the results should be all that are anticipated. While Kentucky is somewhat jealous of her reputation as a nursery for trotters, so great have been the successes in less favored sections, that surely her mother state, Virginia, should be but little behind in the production of trotters of great merit, especially in view of the fact that at the home of the champion stallion there is a band of mares equal to any in the land.

One of the most phenomenal youngsters at the Lexington track is a yearling filly by The Northern Man 2:06½, out of Mary Louise 2:27, by J. J. Audubon 2:19, and consequently a half sister to the champion three-year-old pacer Anna Bradford 2:00¾. Although this filly has but just begun to take her first lessons in active training, she shows more speed than did her famous half sister at the same age, and it is more than likely that, if all goes well with her, she will add to the reputation of her dam's family, as well as bring her sire, The Northern Man, even more prominently before the public than he is at this time. In view of the fact that Anna Bradford is by Todd Mac 2:07¾, a son of Todd, it is but natural that her half sister, by another son of this most extraordinary sire, should be a speed marvel, and, as The Northern Man was one of the most remarkable trotters ever seen, and one whose record was made under adverse circumstances, his yearling filly has, by inheritance, a right to equal, even if she does not surpass the performances of last year's champion three-year-old pacer.

One of the very best two-year-olds at the track is a bay filly by Morgan Axworthy 2:17, out of Miss Minnegarode, owned and trained by Mike Bowerman. This is the filly that attracted considerable attention last summer by her action, speed and conformation, and that was bought by her present owner from C. C. Harris, the well-known dealer in saddle horses and trotters. The daughter of Morgan Axworthy has already been a quarter in 34½ seconds, and so easily did she accomplish this that her trainer, whose experience covers a period of forty years, is convinced that he has in his possession the greatest natural trotter he has ever driven. This is an extremely well-built mare, a faultlessly gaited one, and Mike Bower-

n is confident that within a month she will be up a quarter very close to 32 seconds. This young re is probably the equal of any trotter of her age the Lexington track, for she has speed in abundce, a smooth way of going, and, although she was ven comparatively little work as a yearling, is sily the equal of any of the others of her division o were put to more severe tests last year.—Horse eeder.

THE WOODLAND SALE.

Good weather graced the date set for the sale at oodland Stock Farm, April fifteenth, and a good owd from the country surrounding that point and om other cities and towns within easy access by il was on hand to bid on the various offerings and joy the social features of the day. Some time fore midday Auctioneer William Higginbottom gan knocking down harness, implements, work ock and mules, finding new owners for everything fair prices, calling a halt about 11:45 for lunch. any of the parties of farmers and their families d come well fortified against the coming of the on hour with generously filled baskets, but such recautions were unnecessary, as Mr. and Mrs. owling—particularly Mrs. Dowling—had prepared abundance of lunch for all comers. Hearty appetes did full justice to the same, and early in the ternoon the sale of the trotting stock was begun.

The first animal offered was the yearling colt by rue Kinney 2:12¼, out of Ella J. (dam of San Felipe :08¼ and Honey Healey 2:08¼) and the crowd liked he way he acted and the price ran readily to $300, which figure he was knocked down to R. D. Mayes Dixon, the young gentleman who proved the sale's est patron. The balance of the Woodland consignent sold readily at more moderate figures but at rices very consistent for the general state of the arket. The J. W. Marshall mares and youngsters old readily, the brood mare Madeline Marshall by emonio, in foal to Robert Bingen, topping the sale t $310 and going to the same Dixon gentleman who ad purchased the True Kinney yearling, R. D. ayes. Charley Silva paid $105 and would apparntly have stood for more for the Montbaine yearling ut of Madeline Marshall, and had no reluctance bout going to $160 for the Palo King yearling out f Ramona, the dam of Del Rey 2:03¾. He was ffered a hundred dollar profit on the latter lass by hone on the part of a non-attendant at the sale but was a case of "nothing stirring." The Johnson ffering by Airlie Demonio went without delay, and he roan San Francisco—Birdie mare, consigned by . A. Swaby of Dixon, went to the third best figure f the day.

Cows and hogs were the red hot offerings of the ay and a nice bunch of each was disposed of at xcellent prices, Woodland Stock Farm's own conignment selling especially well. Thanks to the fforts of Manager Dowling and Auctioneer Higginottom everything went along smoothly and steadily, he crowd was well fed and well entertained, both uyers and consignees hitting the home trail in the fternoon with airs of satisfaction. Following are he prices and buyers of the trotting stock:

Bay Colt (yearling) by True Kinney 2:12¼—Ella J. by Bob Mason. R. D. Mayles, Davis.....$300.00
Bay Colt (yearling) by Bonaday 2:11¼—Oniska by Nutwood Wilkes. J. E. Montgomery, Davis..... 110.00
Bay Colt (yearling) by True Kinney 2:12¼—Elizabeth C. by Wayland W. A. R. Heddings, Woodland 40.00
Bay Gelding (3) by Prince Ansel—Elizabeth C. by Wayland W. F. Clark, Woodland..... 36.00
Elizabeth C., b m by Lockheart 2:08½, dam by Adrian Wilkes. Howard Duncan, Woodland..... 92.50
Princess Mamie 2:27½, b m (9) by Prince Ansel (2) 2:20½—Mamie Martin by Nushagak. H. A. Hershey, Woodland 80.00
Decoratio, b m (9) by Prince Ansel (2) 2:20½—Majella B. 2:24¾ by Nushagak. J. E. Montgomery, Davis 80.00
Georgia K. 2:24¼, b m (7) by Prince Ansel (2) 2:20½—Majella B. 2:24¾ by Nushagak. E. O. Johnston, Oakland 60.00
Tiena, b m (4) by Prince Ansel (2) 2:20½—Steina by Steinmont. E. O. Johnston, Oakland..... 75.00
Anjella 2:27½, b m (8) by Prince Ansel (2) 2:20½—Majella B. 2:24¾ by Nushagak. J. E. Montgomery, Davis 110.00
Ima Dudley 2:27½, b m (7) by Prince Ansel (2) 2:20½—Ima Jones by Capt. Jones. E. L. Smith Woodland 72.50
Majella B. 2:24¾, br m (aged) by Nushagak—Theo by Le Grand. A. Proctor, Woodland..... 52.50
Chestnut Mare (5) by Nutwood Wilkes 2:16½, dam by Knight 2:22½. E. L. Smith, Woodland..... 32.00
Bay Filly (2), breeding not established. W. Hennigan, Woodland 29.00
Black Gelding (3) by El Zombro—Anselois by Prince Ansel (2) 2:20½. S. A. Woodruff, Sacramento 57.50
Twenty-Three Skidoo, bl m (8) by Nutwood Wilkes 2:16½—Twenty-Third by Director 2:17. A. L. Bracken, Davis 102.50
Brown Filly (yearling) by Palo King 2:28½—Ramona by Demonio 2:11¼. Chas. F. Silva, Sacramento 160.00
Brown Gelding (2) by Sirius Pointer 2:15—Ramona by Demonio 2:11¼. K. E. Giguerre, Cashville... 75.00
Bay Colt (yearling) by Montbaine—Madeline Marshall by Demonio 2:11¼. C. F. Silva, Sacramento 105.00
Madeline Marshall, ch m (13) by Demonio 2:11¼—Mamie Comet 2:23¼ by Nutwood 2:18¾. R. D. Mayes, Davis 310.00
Brown Filly (yearling) by Airlie Demonio 2:05½, dam by Sutter 2:17½. Howard Duncan, Woodland 25.00
Dimie Airlie, bl f (4) by Airlie Demonio 2:05½—Dimontes by Diablo 2:09¼. Hughes Bros., Woodland 100.00
Black Filly (3) by Airlie Demonio 2:05½—Dimontes by Diablo 2:03¾ R. G. Luncford, Woodland.... 35.00
Airlie Boy, ch c (3) by Airlie Demonio 2:05½—Trixy by Falrose 2:19. Howard Duncan, Woodland 100.00
Roan Mare (6) by San Francisco 2:07¾—Birdie by Jay Bird 5060. H. S. Dowling, Woodland..... 190.00
Bay Gelding (2) by Palo King 2:28½, dam by Kinney Rose. W. Hennigan, Woodland..... 31.00

First Matinee at Sacramento

GEORGE WOODWARD (S. H. Cowell) winning from NIFTY (C. F. Silva) and JIM DONELLY (Will Ivey).

With a nice card of five events, a made to order afternoon and a goodly number of ardent admirers of the light harness horse seated in the grandstand or comfortably disposed on the lawn between the track and the stand, the members of the Sacramento Driving Club ushered in the fun season Sunday at the Capital City. While the crowd could have been larger without taxing the seating capacities of the amphitheatres in any way, they made up in quality what was lacking in quantity, as both the ladies and gentlemen in attendance not only knew most of the competing horses, but could call the drivers by their first names. The kids were there in force, too, including the enthusiastic "futurity prospects" of the Silva family and the country's youngest owner of a stake winner, Miss Maxine Montgomery, the diminutive lassie who shows in the entries as the proud possessor of Maxine (3) 2:15, and while the elders enjoyed the track events and passed critical judgment on the various entrants and their teamsters, the juvenile contingent pulled off their own "matinee" on the close cropped but abundant turf, keeping a sufficiently close eye on the track proceedings to know when to cheer a clever drive or a brisk finish.

Frank Ruhstaller with Moko Hall 2:11¼ by Walnut Hall 2:08¼ and Will Ivey with the three-year-old black filly Tennie Hall by Moko Hall, out of Tennie by Temescal, made up the field for the first event, staged as an opportunity for showing the speed-siring qualities of the Ruhstaller stallion. Sometimes these well planned things go wrong, but not in this case, as the lady made an excellent showing and trotted two nice miles in 2:24½ and 2:23. In the second quarter of each mile Tennie was a bit unsteady, but trotted fast after settling. She is a nice filly in every way and a good prospect as a trotter at this date.

Harry Cowell annexed another victory with that ideal old matinee warrior, George Woodward, defeating Charley Silva with Nifty and Will Ivey with Jim Donnelley, leading the way to the wire by a comfortable margin in each heat. Nifty looks a bit fat yet and Charley had to "ask it of him" in the second heat to keep the Lijero gelding from nipping the place.

The third race was for juvenile trotters and brought out a field of three young things: Sister Patrice, black filly (3) by Lijero 2:15½—Camille by Wildnut, driven by Frank Wright; Banostine, brown filly (3) by Lijero 2:15½—Mater Expedio by Knight 2:22½, driven by Dr. E. J. Weldon, and Lista, bay filly (4) by Henry Nutwood—Two Minutes by Wildnut, driven by Harry Cowell. All three trotted nicely for their initial appearance in public competition, Dr. Weldon's filly having the speed of the party. Sister Patrice was unsteady in unaccustomed hands, but her second heat was a very nice one, she making a good drive after a disastrous "jimtown" early in the mile.

Christmas Wilkes by Marvin Wilkes, Yewl by Dan Logan and Colonel Mazuma by Demonio, piloted respectively by Chris Jorgensen, Dr. Weldon and Mr. Cowell, formed the field for the mixed class, Chris' trotter winning the first heat handily in 2:17½ with Colonel Mazuma second. Walter Tryon succeeded Mr. Cowell to the mount behind Yewl in the second heat, and with Christmas Wilked opened up a fair lead in the first half. Christmas made an ascension before heading into the back stretch and occupied plenty of track in the performance, Yewl also leaving her feet and the Colonel going away to the front for a lead of several lengths. It looked like nobody but Dr. Weldon, but Tryon got the Dan Logan filly on her feet and set sail for the wire, outfooting the Colonel in the stretch for a nice win in 2:18¾, about as fast as she has ever traveled. After this performance the other two were drawn, leaving Yewl an undisputed winner.

The main feature of the afternoon's card was, of course, the free-for-all pace, with three starters, including the ever popular and reliable Teddy Bear 2:05, with Owner Silva in the sulky; John Malcolm (2) 2:11½, former world's champion as a two-year-old, driven by Wilbur Smith, and the full brother to Airlie Demonio 2:05½—Potrero Boy, piloted by Loren Daniels. It had been currently circulated throughout the crowd that the trio would work at least one mile below 2:10, and the spectators were not disappointed in that respect, the 2:10 keg being tapped for a generous draught. Teddy on the pole went away with John Malcolm and opened up a fair lead early in the game, Daniels setting sail from the half for the speedy pair in front of him, collaring the Chico horse in the stretch and forcing Teddy out in 2:11½. These tactics were repeated with emphasis in the second heat, Teddy and John going to the half in 1:04½, with the Boy further back than before. Down the back stretch Daniels began advancing the spark, overhauling John past the three-quarters and collaring the redoubtable Teddy a hundred yards from the wire. It looked like the Boy for a moment or so, but Teddy came on for a win, much to the satisfaction of the crowd. Potrero Boy paced his last half in about 1:03 and acted throughout the race like a mighty high class green pacer—just like he could have turned the full route over that track, that day, in 2:07½ or better.

F. E. Wright officiated as starter, with Messrs. C. S. Pike, I. Cristie and Ray Dittus as judges and timers. The summaries follow:

No. 1—Special Trot.
Tennie Hall, bl f (3) by Moko Hall.....(Ivey) 1 1
Moko Hall, bl h by Walnut Hall.....(Ruhstaller) 2 2
Time—2:24½, 2:23.

No. 2—Special Pace.
Geo. Woodward, b g by Senator Boggs....(Cowell) 1 1
Nifty, ch g by The Tidal Wave.....(Silva) 2 2
Jim Donnelley, b g by Lijero.....(Ivey) 3 3
Time—2:13¾, 2:17¼.

No. 3—Juvenile Trot.
Banostine, br f (3) by Lijero.....(Weldon) 1 1
Sister Patrice, bl f (3) by Lijero.....(Wright) 3 2
Lista, b f (4) by Henry Nutwood.....(Cowell) 2 3
Time—2:36½, 2:37.

No. 4—Special Mixed.
Yewl, br m by Dan Logan.....(Cowell, Tryon) 3 1
Christmas Wilkes, br g by Marvin Wilkes .....(Jorgensen) 1 3
Colonel Mazuma, br g by Demonio.....(Weldon) 2 2
Time—2:17½, 2:18¾.

No. 5—Free-for-all Pace.
Teddy Bear, b h by Del Coronado.....(Silva) 1 1
Potrero Boy, b g by Demonio.....(Daniels) 2 2
John Malcolm, br g by Dan Logan.....(Smith) 3 3
Time—2:11½, 2:08¾.

SADDLE HORSE BREEDERS MEET.

A well attended meeting of the American Saddle Horse Breeders' Association at Louisville re-elected the old officers. Gen. Castleman had not yet returned from his Florida winter home and Judge Thurman presided. A decrease of about 300 registrations for the year was reported. The plan proposed by the stake committee, whereby fair associations would be asked to give one-half the stakes, was approved. The division of money is to be 40, 30, 20 and 10 per cent to the winners. The committee on increase of capital stock was instructed to take steps to provide for such increase. At a board meeting it was decided not to recommend judges for the Panama-Pacific exposition. An advisory committee of the association, selected by Chief Lively, had submitted a list of names, but on account of lack of agreement between Kentucky and Missouri exhibitors Mr. Lively asked the association to name judges outside these two states. This the board declined to do.—Breeders' Gazette.

The attorney general has decided that pari-mutuel betting on horse races is illegal under the laws of Colorado, and writing on this subject Jack Sproule says: "Personally I am not in favor of betting in any form at county or state fairs. I would rather enter my horses at a fair where the management does not allow betting. I have entered horses in the speed and show ring at a number of fairs where they did not pay their purses or premiums in full. Those fairs without a single exception allowed gambling on their grounds. There is no difference in losing money whether on a faro bank, roulette wheel, or a horse race. It makes no difference whether it is a table in the rear end of a saloon used for playing poker where the dealer takes out ten per cent or a roulette wheel which can be controlled by electricity in the back parlor of a hotel, or a squeeze spindle or a large wheel controlled by a spring or a brake on a state or county fair grounds, or a pari-mutuel machine at a race meeting. They are all gambling devices and ought not to be allowed on the grounds of a state or county fair. The owner of the pari-mutuel machine takes out ten per cent of all moneys bet. Any school boy will tell you that ten per cent taken out of a man's bank roll four or six times a day will soon deplete it."—Field and Farm.

In and Out Among the Tules

Woodland and Sacramento are two of my regular "ports of call" that I had, up to last week, not visited since the time of the year arrived for "letting 'em down" toward the 2:10 mark, but a few days spent in that vicinity quite recently were sufficient to convince both myself and other visitors that the Sacramento valley has its usual amount of speed on tap for the season of 1915.

The Woodland sale was in progress when E. O. Johnson and I landed at the farm, after a nice ride out from the Byrns behind "Shank's ponies," and while the regulars of the training camp had all been laid away earlier in the day in order to clear decks for the sale, Hi Hogoboom was entertaining such members of the crowd as were not interested in work stock, mules, implements, etc., with a pair of yearling trotters by Palo King, both from Iran Alto mares, grandams by McKinney. How those little scamps can step! They can fairly run away at it, and if any of those $2000 to $32000 yearlings down east can show more lick right now than this pair they are sure trotters. All of Hi's stuff looks and works good and he ought to get a cut of money again this year when he goes to the races. Little Express (2) 2:20, winner of the junior pacing division of the Breeders Futurity last year, is growing into a husky lass and has worked around 2:22 this season. Enchilada 2:18¼, the pacer by Palite and out of the same dam as Ed Parker's good three-year-old trotter at Pleasanton, Paprika by Oro Belmont, has gone the route a bit better than his record time, with a half in 1:04, and the stable's other sidewheeler, Marlin by Dialect—Maud Wilkes by Clarence Wilkes, entered in the big pace at the exposition, has had a mile in 2:16½, half in 1:05. A four-year-old trotting sister to Alto Express turned the trick in 2:24 Friday, and Woodland King, the three-year-old fellow, has not yet been asked to beat 2:30. Hi has a new trotter out in the little home pasture that he is mighty proud of, a foal by Robert Bingen 2:11¼ out of Beautiful Bird (dam of Alto Express 2:22¼) by Nutwood Wilkes 2:16½, grandam Expressive (3) 2:12½ (dam of Atlantic Express (3) 2:08¼, Esther Bells 2:08¼ and four other trotters) by Electioneer. As Robert Bingen is a son of the great family founder, Bingen 2:06¼, and Episode 2:18 by Ambassador, grandam Santos, the dam of Peter the Great 2:07¼, etc., the newcomer is one of the best bred babies of this year's crop.

Dick Johnson is a newcomer to the Woodland track (for this season, that is), having recently moved up from Dunnigan with the horses belonging to R. L. Ogden of that place, all of them in nice shape after a winter's jogging on the roads around home. Dick is training four head, including a rugged six-year-old bay mare by Stanford 2:23½ (son of Juanito by Tilton Almont, dam by Director 2:17) out of a daughter of Alexander Button 2:26½, grandam by St. Clair. This is a nice going girl with some former education, having worked in 2:18 with quarters in :30 for Hi Hogoboom. The other mare of the same age is a trotter by Iran Alto 2:12¼, out of Yolo Girl by Lynwood W., grandam by Montana Wilkes, and while not yet asked to go the full distance in any kind of time has brushed quarters in :33 and eighths in :16. The other members of the stable are out of the same dam as the trotting mare, one a four-year-old pacing filly by Dan Logan and the other a trotting filly a year younger by Palo King 2:28½, both just beginning their track education. Dick also brought Yolo Girl up with him and will breed her to Prince Ansel.

There is a new institution at the Woodland track known as the Logan-Montgomery Trust Company, Jim Logan 2:01¾, president, Dan Logan 2:07¼, vice-president, and J. Elmo and Carey Montgomery, managing directors. The avowed purpose of the organization is the development of sufficient speed to clean up the free-for-all, 2:08 and 2:09 paces, and probably some other classes, and the concern will "disincorporate" before the racing season opens, Dan Logan being under lease to Warren Pugh of Davis, and entered against his brother in a few events. For the present, however, they are taking their work together and make a great pair of pacers for the railbirds to watch. Jim has a remarkably clean set of legs for a horse that has been through the mill, and while Dan's underpinning is a bit knobby in spots he is standing up in great shape and promises to be as fast as ever—which would mean a 2:03 pacer. The brothers so far have worked in company in 2:12¾, 1:03, :29, so they both have the necessary whizz.

Elmo's fastest rides for the full route have been behind the Sacramento pacer Booze 2:07¼, that fellow having worked nicely in 2:11, 1:03, :30½, and beginning to look like real good goods. Maxine, winner of the senior pacing division of the Breeders' Futurity last year, is making a fine mare, free-legged, and so far has negotiated her best mile in 2:14½, 1:04, :30½. She will do to watch at any and all times. Lock Logan pulled Tenessee Bill Morrison and a cart in 2:16½, 1:04½, :31 Saturday morning, and Carolyn, his only foal, now two years old, has had an easy heat in 2:37¼ with the quarter in :33¼. Elmo has but one trotter in the string, Senator Ben Rush's three-year-old filly Winnie Bond by The Bondsman—La Moscovita by Guy Wilkes that took a two-year-old record of 2:27, and she is coming along steadily, with work to her credit in 2:23½, 1:10, :33½. As her engagements come late in the fall she has a lot of time to make speed, and her owner and trainer think her able to furnish some pretty hot competition when the time comes.

"Doc" Herspring has been trying to get Little Lucille (3) 2:09 in shape to race this year, but while he has done wonders with her legs the result is still in doubt. She has been doing very well and is one of the nicest things imaginable in very many ways but is a bit lame at present going slow, though she dosen't show it when moving along at a thirty gait or better, which she does handily. Her owner insists that she isn't "just right" without a little limp, but the canny David will believe she will do to race if he gets her there, not otherwise. If she does stand up for him she will be mighty useful, but the odds are against her. Don Rosine is coming along for everything asked of him and D. F. waxes enthusiastic whenever chance conversation brings up Richmond Rankin, his young trotter by Zorankin (2) 2:29¾, dam Edna Richmond by Richmond Chief 2:11, etc.

Harry Dowling is about the busiest man in Yolo county, as in addition to the general business of Woodland Stock Farm he is doing the training "single handed" and his horses are all coming along in great shape, especially those to be raced at the early meeting at the exposition. Lottie Ansel, who was such a good two-year-old trotter in 1912, has matured into a very nice mare indeed, and is doing some good work, having been a number of miles below 2:20, with halves in 1:07 and quarters in :33. Robert Bingen, raced last year at the pace, is trotting just as if that was all he ever knew and has a bold way of going and a stride that is reminiscent of the "old hoss." One of the nicest workouts I have seen this year was a mile a few seconds on the fast side of 2:20 between Robert Bingen, Enchilada, and the Logan brothers, with the half in 1:05 and the final quarter in :31. Coming up the stretch the pacers seemed fairly sizzling, but Robert was going along unconcernedly, covering a lot of ground with apparently little effort and covering it fast, as the windup of a final quarter in :31 "in these diggings" is generally right at a two-minute shot.

Josie Ansel, the green pacing mare by Prince Ansel (2) 2:20½ and out of Josie D. by Nutwood Wilkes 2:16½, still occupies just as high a place in Harry's estimation as she did at my former visits, and he has some justification for his faith in her by reason of her work in both this and previous seasons. Last year she traveled some very fast fractional parts of the mile, and in her work this spring has gone halves in 1:05½, with quarters in :31½ and miles in corresponding time for the season. She has lots of nerve and power and ought to give a pretty good account of herself. Clara Mac, last year's sensation, looks just like the same tough nut and is being fitted for the free-for-alls. Miles in 2:15 to 2:17 are coming her way pretty regularly, and she has tramped some merry halves between four and five and quarters from :31 to :32. She is rugged and hearty and shows no signs of deterioration from her last year's hard racing. Clara Mac, Lottie and Josie Ansel and the Bingen horse are all entered at the exposition meetings.

Last fall when the Considine mares were shipped home from the Blue Grass, Harry told me that he did not believe Miss Faribault to be with foal, and that if he proved right she would make a great mare to race later on. I had never seen her to know her, and when I asked one of the boys Friday what a very pleasing looking bay mare might be I was a bit surprised to learn that she was the sister of Ortolan Axworthy (3) 2:07½, one of the real cracks of last year's three-year-old brigade—not that I was surprised to find her a high class trotter, far from it; she had simply slipped my memory and I had forgotten Harry's prediction. He has been taking things easy with her, as she is not entered in the early events, but while he has only asked her for a mile in 2:26 she has traveled a half in 1:09 and quarters below :32. The three-year-old trotters and Ruth Ansel are working easily between 2:30 and 2:35, about the same time catching the pacer of the same age, Prince Majella. The two-year-olds are all doing nicely, with lots of time to get ready for the November stakes, and Harry has some yearlings that look like the real article.

In spite of the speed uncorked on the track by the various members of the local stables, not the least interesting places about the farm, to me at least, were the infield where the mares and idle youngsters were grazing on tall green barley, and the smaller paddocks where matrons with new born foals were grazing or lounging in the shade. Carrietta and her filly by Peter the Great took quite a bit of my time, and in the same paddock Ila Moko and the double producer of 2:10 trotting speed, Ella J., were looking zealously to the welfare of two-day-old babies by Prince Ansel. (Yes, Genevieve, I looked in the chicken yard, too; they are growing right along, but this awful war is going to cause some hard times for 'em a little later on!).

I "had a hunch" Thursday morning when starting up the valley that Sunday might be matinee day at Sacramento, and if I could have gotten a ticket on it it would have cashed, as the club there pulled off a good card, causing Saturday to be a quiet day, most of the horses that were ordinarily due for a workout at the week-end being carried over to start in Sunday's program.

The Silva-Daniels combination was busily engaged in getting odds and ends together in preparation for "getaway day" on Monday or Tuesday of this week as they decided a change to Woodland would be beneficial on account of the superior condition of the footing at the Yolo metropolis, and moved there with their entire training stable, including Teddy Bear 2:05, Nifty 2:07¾, Oro Mo 2:09¼, Kid Cupid 2:08¾, Potrero Boy, the full brother to Airlie Demonic 2:05½, Bondalean (2) 2:21¾, John Malcolm (2) 2:11½, Columbia T. (2) 2:22½, Eloise Dell 2:26, the two-year-old filly by Teddy Bear, out of Economizer the two-year-old colt by Lijero 2:15½ out of the dam of Teddy Bear, and Wilbur Smith's four-year-old trotting gelding by Montbaine, from a mare by Lock heart. Nearest Alto McKinney, the trotting gelding that has been very highly regarded for some time has just had a severe attrack of lung trouble and probably was not in condition to ship with the balance of the stable, though he was improving rapidly Sunday.

All the record members of the stable have been given some pretty stiff work, and the two-year-olds are showing nicely, the trotter having been a mile in 2:40, with quarters in :36½, and the pacer having brushed quarters near :31. Smith's trotter is handling himself nicely around 2:20, and the stable's green pacer, Potrero Boy, looks a whole lot like a real horse. The three-cornered workout Sunday between this lad, John Malcolm and Teddy Bear was their fastest one so far, and the brother to Airlie Demonio made an excellent showing. He covers a lot of territory at a stride and seems about right in manners and race sense, as he can be rated nicely and has a good head. From his performance Sunday I would not be surprised to see him get a faster record than his game brother. Kid Cupid has made but one or two breaks this season and has all his former speed. John Malcolm, the one-time two-year-old champion, can show a mighty hot clip, and Daniels sees hard work ahead for the three-year-old pacer that beats the other lad belonging to Mrs. W. J. Miller, Bondalean.

Chris Jorgensen is taking the wire edge off a few broncs, as usual, and handling a couple of outside trotters, Christmas Wilkes, owned by Paul Simms of Freeport and a green mare by a son of Zombro owned by B. McGinty of Reno. Chris had his plans all laid to return to Denmark and open a training stable in Copenhagen, but the war has knocked these arrangements "galley-west" and he will probably compromise by moving in the near future to Reno, where he has a number of friends and the promise of a few trotters right off the reel.

Ike Harlan is making nice headway with three young things from the mare that has already raised him the trotters Prince Alto 2:23 and Ben Alto 2:29½—Rita R. by Diawood, dam Lady Thorn by Billy Thornhill. Two are trotters, a three-year-old filly and a gelding a year younger, both by Montbaine, and the other is the four-year-old filly Frankie Logan by Dan Logan, a handy green pacer that is learning rapidly. The Montbaine youngsters are all inclined to trot, which is not surprising, as that horse is not only very strongly trotting bred but is a good gaited natural trotter. He is back at the Sacramento track now, doing stud service in the hands of Wm. Sloane and getting a number of mares. His heels, which looked hopeless when last I saw him some two years ago, show a great improvement and Sloane is thinking of giving him some work at the trot, as he deserves a fair kind of a record.

One of the new faces at Sacramento, to me at least, was that of S. R. Gilbert, a native Kentuckian who has arrived in a good California haven by way of the northwest, having but recently been a resident of the Willamette Valley. Mr. Gilbert has a genuine Oregon pacer in the brown gelding Budweiser, by Hal B. 2:04¼ and out of Vevo (dam of Ella Erickson 2:14¼ and Olga S. 2:14½) by Altamont. For the first crosses the breeding is the same as that of Hal Boy 2:06¼ but from there back there is a bit of a difference, Budweiser's grandam being Nell (dam of Lady Daphne 2:21¼) by Duroc Prince, sire of the dams of Freddie C. 2:07 and Lord Lovelace 2:07½, while Hal Boy's grandam is Laska by Rockwood. "Bud" has the distinction, enjoyed by but few horses, of having cleaned up on Hal Boy at one time in a matinee at Portland before the little pacer came under his present ownership, but whether he will develop the Boy's present sizzle remains to be seen. He is bigger than the Childs horse, a nice turned, well behaved fellow, and has worked the Sacramento track for Sam in 2:19½ with a half in 1:05½.

Loupie Crillo, formerly Col. Jim Thompson's right hand man, is taking care of three youngsters belonging to Dr. E. J. Weldon, the Doctor giving them a good deal of their faster work in person. The baby

f the bunch is a two-year-old colt by Lijero, out of a McKinney mare, that can go out and imitate a trotter. Both the others are three-year-olds, and were iloted by the Doctor in Sunday's matinee, the rotter, Banostine by Lijero, out of the dam of Expeio 2:09¼, winning the juvenile trot in time considrably slower than she is capable of, as she has worked right around 2:20. The pacer, Colonel Maguma, brother to Normono 2:14¾, did about his best work Sunday, finishing second two heats in 2:17½, 2:18¾, and behaving very nicely throughout the race.

Walter Tryon has the Cowell horses and one or wo others as usual, and that they are just about 'ready" whenever wanted was pretty well proven Sunday by their performances in the matinee. George Woodward pulled Mr. Cowell to the front just as in days gone by when he was under instead of over the en year mark. Lista, the four-year-old filly by Henry Nutwood, out of Two Minutes by Wildnut, had never beaten 2:40 prior to Sunday's tryout and Mr. Cowell was content to "buggy-ride" second and third n 2:36½ and 2:37, without making any demands upon her. Yewl, the four-year-old green filly by Dan Logan, dam by Falrose, is a very nice prospect and prior to Sunday had worked in 2:20½, half in 1:05½ and quarter in :31½, but went this a bit better in her races. Just a trifle strange to Mr. Cowell, she was taken in hand by Walter in the next heat, pacing the mile in 2:18¾ after a standstill break early in the heat for which she could scarcely be justly blamed. She goes free-legged and looks to be a right good prospect. Walter also has another green pacer in Dixon Boy (3) by The Patchen Boy (3) 2:10¾, dam by Diablo, grandam Trix Marshall, that has worked the Sacramento track in 2:20½, and a good looking green trotter belonging to Wm. J. Irvine of Sacramento—a black gelding by McKenna 2:17½ out of a McKinney mare. Panama 2:10¼ was making speed steadily until a few days ago when he contracted a bit of lameness from hitting some bad footing in the stretch—nothing serious but enough to keep him out of the June races.

Will Ivey has his string in the usual good shape, one of the nice pair of trotters in the stable being the Ruhstaller filly Tennie Hall and her sire Moko Hall 2:11¼. Tennie is only a three-year-old but has been working this season along with her dad, Frank Ruhstaller usually teaming the latter, their best work to date being miles in 2:20, halves in 1:08 and some nicely trotted eighths at a two-minute clip. Jim Donnelly, Frank Wright's pacer by Lijero, is traveling miles around 2:17 with halves as fast as 1:06, and D. D. McDonald's Golden Baron gelding, Donald, has gone the route in 2:12½, 1:04 and :30½. This lad looks like the real candy and is entered well at the P.-P. I. E. Frances Zombro by Zombro, Mr. McDonald's trotting mare, is working nicely around eighteen, and her two-year-old filly by Sonoma King is just getting nicely broken. Sister Patrice, the three-year-old Lijero—Camille filly owned by Frank Wright and Dr. White, is developing into a nice trotter, and Will's own colt, Legeros, is just beating forty comfortably, having no early engagements. Ivey is just breaking for George Heilbron a great looking yearling filly by Lijero, out of Califa by Silver Bow, a full sister to the good youngster that died about a year ago after showing very great promise. This lassie is well staked, and here's hoping for better luck than the other one experienced.

Frank Howland has the green pacer Pedro by Loring that has had previous work around 2:23, and a pair of well bred and highly promising green trotters, one a mare by Golden Baron out of a Nutwood Wilkes dam, and the other the two-year-old filly Jet Moko by Moko Hall, dam Osmuda by Bon Voyage 2:08, grandam Loma B. (dam of Albaloma 2:08¼, etc.) by Stam B. 2:11¼. This lass belongs to L. H. Todhunter and is generously staked. She hasn't had much asked of her so far but has a good way of going and has brushed quarters in forty seconds. Frank has a combination stable, as he is also training a couple of thoroughbreds owned by Angus Ross of Sacramento. George Van Gordon of Concord is also stabled in the same barn with four runners, recently arrived from Juarez, one or two of them winners at good prices during the winter meeting at the Mexican town.

Speaking of the thoroughbreds, on which family of the race horse my "technical education" is sadly deficient, have never seen a bunch that I liked better than those from the Nevada Stock Farm, handled through the winter at Sacramento by George Strate. I was at the state fair grounds track just after they landed there last November and when their kindergarten lessons were just starting. They have grown like a debt at compound interest and have learned just as fast as they have grown, as I have never seen a nicer behaved lot of youngsters. They are chock full of race and there isn't a one that can't mock a runner to perfection, and out of the number I saw breezed Saturday there never was a moment that they were not on their good behavior. George has added a couple to the original string—a fine big two-year-old colt Mata Osos by Bearcatcher—Lady Atheling by Imp. Atheling, owned by Mayor Christie of Emeryville, and the roan mare Tillie Wolforth, from the farm at Reno. Tillie has the brackets to her credit in previous seasons but has had the reputation of being a hard one to shoo around the course. Saturday, however, she went the route slow, fast, and "middlin'" as unconcerned as could be, so she is evidently learning something. George expects to ship to Denver shortly, and the tops of the stable will go farther east for their stake engagements. Their behavior would make 'em worth a ticket wherever I chanced to strike 'em. [N.]

BRISK MATINEE AT VENTURA.

Two races made up the card for the Seaside Driving Club matinee at Ventura, Sunday, and what the program lacked in quantity it furnished in quality. From the time the horses turned to score for the first heat of the free-for-all until the finish of the last heat of the special race for named horses, the issue was always in doubt, and the excitement increased as the races progressed.

The first race called was the free-for-all, and brought out the four pacers John Black, b. g. by Abscota, owned by C. C. Hickey; Zomar, ch. h by Zolock, owned by Donlon Bros.; Hal Wood, br. g. by Hal B., owned by Thos. McCormick, and Sunshine, b. m. by Longworth, owned by Henry Delaney. Owing to the fact that Zomar had won his last two starts and against the same field, the crowd seemed to favor him for the race, and the rugged son of Zolock 2:05¼ made good by winning the second, third and fourth heats, after dropping the first one to Sunshine.

Hal Wood drew the pole and led to the half in 1:07, followed by Sunshine, Zomar and John Black, about a length apart and in the order named. At this point they looked like a procession, but going into the back stretch Delaney brought Sunshine up with a rush, getting the pole on the third turn, and from there on was never in danger. Zomar finished second, Hal Wood third, John Black last in 2:19½.

In the second heat Sunshine went away in the lead, but Zomar was out to win and forced her to pace to the half in 1:06. This clip was too fast, however, and at the five-eighths post the mare had enough, Zomar winning in 2:19¼, Sunshine second, John Black third and Hal Wood last.

In the third heat they took their time, pacing the first half in 1:13, and no one seemed to care to force matters. At the half Zomar led, John Black second, Hal Wood third and Sunshine fourth, and in this order they finished in the slow time of 2:22½. Zomar and John Black brushed down the stretch in :16½, the only fast part of the mile. Sunshine was never extended this heat and it was a foregone conclusion with the spectators that there would be something doing the fourth heat, and no one was disappointed.

They got away to a perfect start. Sunshine, immediately going to the front, opened up a lead of at least four lengths, followed by Hal Wood, Zomar and John Black. Gradually the field closed up, Zomar and John Black passing Hal Wood and gaining on Sunshine. When they reached the back stretch, going around the second time, Sunshine led by two lengths but was evidently weakening for at this point Delaney resorted to the whip, and, from there on, drove as if for his life. They hit the head of the home stretch with Zomar's nose at Sunshine's wheel, and from there to the wire both Delaney and Joe Donlon threw away their lines and depended entirely upon the whip, of which they are both past masters. All down the stretch Zomar gained by inches, and although Delaney drove the mare desperately the stallion managed to get his nose in front in the last thirty feet and won by about two feet, after one of the hardest fought finishes ever seen on a race track in this section. The time for the heat was 2:19¼.

In the special race for named horses there were three entries — Santa Paula, b. m by Longworth, owned by Jas. Gill; Zombroso, br. h. by Zombro, owned by Jas. Leonard, and Lady Cupid, b. m. by Cupid, owned by J. S. Keran. Zombroso is a trotter and the two mares hoppled pacers. In the first heat Lady Cupid, on the pole, and Santa Paula went to the half in 1:08¼, with Zombroso about three lengths behind. At the three-quarters Delaney took the lead with Santa Paula and from there to the wire was never headed, although Lady Cupid fought every foot of the way and finished at Santa Paula's wheel, with Zombroso three lengths farther back. Time, 2:19¼. The second heat was similar to the first, except that Zombroso fought it out with Santa Paula in the place of Lady Cupid, Santa Paula winning by half a length, with Lady Cupid two lengths behind Zombroso. Time, 2:21.

The third heat was a duplicate of the second, but Santa Paula won with less effort in 2:22, with Zombroso second and Lady Cupid third. Both Santa Paula and Lady Cupid furnished a surprise in this race, as neither of them has distinguished herself in the past as a reliable race horse. Sunday, however, they both paced three good miles without a mistake, and their race furnished some of the best sport of the afternoon.

The judges and timers were Thos. Rice, Oxnard; Thos. Clark, Nordhoff; W. A. Bonestel and Wm. McGlinchy, Ventura, and M. W. Beadle, Santa Barbara.

Between the heats of the races about twenty members of the recently organized "Westerners" gave a drill on horseback in the track centerfield, under the direction of their commanding officer, Major Driffell of Oxnard. This organization of horsemen has about forty-five members in Ventura, Oxnard and surrounding country and they seem to be getting a good deal of enjoyment out of it.

The attendance was disappointing in numbers but very appreciative and seemed to leave well satisfied with the afternoon's sport.—["BARBARIAN."]

Little Express (2) 2:20

SOME UNUSUAL HISTORY OF A FUTURITY WINNER.

Last summer at Salinas when Hi Hogoboom of Woodland piloted Little Express to the top of the summary in the two-year-old pacing division of the Breeders Futurity, with a second heat in 2:20 and a third heat in 2:22, Elmo Montgomery having won the first heat in 2:21¾ with Bondalean, there was established a rather unusual record—perhaps a world's record. Not that the time was so especially fast, as the two-year-old pacing division of the same classic has witnessed the breaking of marks for the age in time perilously near 2:10, but there were some very unusual other features surrounding the performance that are worthy of note. The writer is not just now awakening to the circumstances alluded to, but has been holding up the tale until a picture of the lass could be secured to adorn it. This having been

LITTLE EXPRESS (2) 2:20.

accomplished on a recent trip to the home of Palo King, it appears herewith and the delayed story runneth thusly:

Some seventeen or eighteen years ago Mr. Hogoboom purchased the mare Rosa by Guy Wilkes 2:15¼, dam by Del Sur 2:24, grandam Blanche (dam of Hazel Wilkes 2:11¼, Una Wilkes 2:15, etc.) by Arthurton 365, the girl being a product of the establishment of William Corbitt. This mare he bred to Waldstein 2:22½, then owned by him, securing a filly foal known afterwards as Walda. Walda in turn was stinted to Diablo 2:09¼, then standing for service at Woodland, a filly foal again resulting, christened Diawalda.

Now to get the other side of the house, one day, now some years past, Hi purchased from the Palo Alto Stock Farm the mare Beautiful Bird by Nutwood Wilkes 2:16½, out of that great daughter of Electioneer, Expressive (3) 2:12½, famous both as a race mare and a producer. At the time he had under lease the stallion Iran Alto 2:12¼, a son of Palo Alto 2:08¾ and Elaine 2:20 by Messenger Duroc, grandam the immortal Green Mountain Maid, and to this horse he bred his Palo Alto purchase. As luck would have it the resultant foal was of the male persuasion, and Hi set about the task of developing him as a trotter, giving him a record of 2:22¼ over the "bull ring" at Scio, Oregon, in 1912. During the previous season he had mated the "ultimate results" of both lines of breeding just gone over, Alto Express and Diawalda, the foal being Little Express, trained by her owner-breeder and driven out by him to a futurity winning performance. Moreover, Hi has his plans all laid to snare the three-year-old division as well, and then go on and breed a still better one.

Condensed the situation is this:—Mr. Hogoboom won the futurity with a filly of his own breeding, trained and driven by himself, whose dam and grandam he himself bred, whose third dam he owned, and whose sire he not only bred and owned but trained and drove to his record. The situation is a remarkable one, and if it does not stand as a world's record both Mr. Hogoboom and the writer would be glad to hear from the breeder-owner-trainer who can "go him one better."

Keefer & Spencer have apparently begun manufacturing speed in earnest with their trotters at Pleasanton, as last week Charley worked Bonnie Ansel, their candidate for the big Panama-Pacific stake, in 2:14½, with the last half in 1:03 and the final quarter in :29½, while The Proof worked the route a quarter of a second faster than Bonnie Ansel and did his last half nicely in 1:02¾. He is a real trot horse, and the only ones of his foals ever trained, both two-year-old fillies, are coming right along with the good ones of any country, The Expense having trotted recently in 2:33½, last quarter in :36½, and Catherine T. in 2:40, with the quarter in :37. If jinxes will stay away from the stable The Proof ought to be a member of the 2:10 list and also have a place in the great table of sires before the season of 1915 closes.

THE ETIQUETTE OF OWNERSHIP.

Editor "The Horseman":

Having recently retired from the pulpit of a prominent church, and having accumulated considerable money, I would like to engage in some mild sport such as racing horses and would be willing to peel off several layers of my bank-roll to become the owner of a racing stable. Would appreciate any information you can give me on the subject. Yours, etc.,

E. SAYE MARQUE.

We hesitate to give you any information on this very delicate subject, but as you insist we will oblige. The first thing to do is to discard those saintly raiments which you are accustomed to wearing and purchase some suits in decided plaids and of variegated colors, the more colors the better. Have hats, shoes and other apparel to correspond. Then buy yourself several glittering rocks, one for the tie and the balance for your fingers, crowd on all you can. By the way, when we mention "rocks," we mean diamonds. If you cannot afford real diamonds, you can procure a choice collection of imitations for about five dollars. These answer the purpose very well to look at, but it is slightly inconvenient to own this kind, if your horse happens to lose a number of races and you are caught in a town, financially embarrassed, as the brother of your mother or father, commonly called "your uncle," who runs the only pawn shop in town, will not come across as liberally as he would for the real stuff. By the way, don't forget a cane, as that gives you an additional air of prosperity, and, at the same time, is good to use to exercise your knowledge of the horse by poking every one you can see in the ribs.

Now that you have your outfit ready for the track, it is time to buy your horses. Pick out some friend that says he knows all about horses, as you find that kind more easily and their knowledge will help you along. The horses can be picked out in various ways. Many prefer to answer small ads in newspapers, that offer very fast horses for little money, just because the owner is going abroad and would rather secure a good home for the animal than a good price. This kind of a dealer is truthful and always delivers the horse you buy, his love for the animal is heart-breaking. He will always give you a bargain, as he will sell you a $100 horse for $500 and then feel that he is being robbed.

If you happen to think that the auction sales would be a better place to secure your racing stable, you are right, because it is your money and you can do as you please with mazuma so hard earned as yours. When you bid on a horse at one of these sales and he is knocked down to you, look him over carefully after the sale, never before; if the hoofs are not perfectly smooth, or he holds his tail crooked, or appears too quiet, reject him, all these are good excuses. After you reject the horse, find the man who consigned him to the sale, and say that you will take the horse if he will knock off $50 from the sale price. This idea hits the owner in the right spot as they all like to be "bushed." Don't work it more than once on the same man, or else your racing plans may be somewhat delayed. We will say now that you have secured your horses and are ready to send them to be trained.

You are recommended to several good trainers, but while preparing to make terms, you may run across one who tells you about all the horses he has driven to records, and how much money he had won for their owners, but these same owners proved dogs, because they took the horses away from him and gave them to somebody else. Engage this fellow at once, particularly if he offers you a price of $20 or $35 a monthe to train each horse, as the animal is sure to get plenty to eat and good attention. This fellow will employ the best of swipes, the kind that work so hard that they need stimulants and who always carry alkali breaths. Don't hire the trainer who asks you from $45 to $60 a month to train, as he will become rich off you in a short time, as the profit at this price is tremendous, as it is said that these high priced (?) trainers clear all this amount, except the street car fare from boarding house to track. Some of them may even save the carfare by driving to and from the house with your horse. Before we go further would say that we advise you not to pay more than $100 or $150 for any horse, as history shows that many big money winners have been bought for that amount and even less—just look at the famous horses that have pulled delivery wagons and run mail routes. Yours has just as much chance, in fact the same chance as you have of making another fortune in the race horse game.

Be very liberal with this treasure of a trainer of yours, buy him all the sulkies, carts and boots that he wants, because he will need some of them for the next man he works for, after you get tired of paying bills. Another thing, whenever he wants an advance of $50 or $100, give it to him, as he will soon owe you money, and that is an easy way of paying bills. Get the horses to him as early in the spring as you can, because he is a slow conditioner and it will be late in the fall before he will be able to race them. The longer you stand for a touch, the longer the horses will be in getting to the races. The shoeing bills will also be rather large as your trainer will have a hard time balancing the horses.

While the horses are being trained always be prepared to hand the swipes a "case note" every time you see them; it keeps their breath sweet and they work that much harder (?), then again it is charitable, because that may be all the money they are liable to get for their work. You know the trainer and his family must live, if they did not he would not be strong enough to work you and the horses.

You have been a good angel for a number of months now and have been patient as your horses gradually developed speed (?) and showed their ribs at the same time. You are ready to have your ambition as the owner of a racing horse gratified. Your trainer gives you a list of places to enter and you do. Shipping day arrives which proves very expensive, with new blankets, coolers, harness and a million other articles to buy, not taking into consideration the cost of satin coat, cap, gloves and trousers of the driver, which you presented to him, after several broad hints were dropped. Your shipping bills right now are heavy also, but you feel that this is last expense, as your horses are now on their way to win themselves out.

The horses arrived safely at point of their first start; several shoes were pulled and some had to be moved, but that was easy, as on Tuesday your great trainer tells you the money will be coming in, because if you win the race you will get half of $300, which looks big to you, and you figure that with four horses each winning that amount you will have $600, and ten times $600 makes $6,000. Of course you may expect to win every race you start in, considering the quality of the horses and the quality of the driver.

Your race is on today so put on your noisiest clothes and all the rocks, take your cane and maybe a pair of field glasses strung over your shoulder and make the effect more startling. Go to the secretary and loan him fifteen dollars, ask him what time your race starts, and if it comes first or second on the program. Say "good afternoon" to the officials in the judges' stand and you can shake hands with them if they will stand for it. Then go down on the track and parade before the grandstand until your horse comes out. Go up and examine him carefully. You don't know anything about a horse, but the people in the stand don't know that and your bluff goes. The trainer is the only happy man in your outfit, as he knows he got his from you.

After your horse has jumped around and spoiled several scores, and the word is given with him away back and on a run, you look up at the starter with daggers in your eyes and remark to anybody around you how rotten that starter is. This is one play you should not miss. By this time you happen to remember that you have a horse in the race. You look at the leading horses on the back stretch, but your horse is not in that bunch, then you allow your eyes to wander backwards, but he is not in that tier, then slowly the bright and conspicuous colors in the race catch your eye and you realize that that outfit of yours is trailing behind the field, with horse and driver in dire distress. They pass the stand for the first start with S. O. S. in evidence and the horse letting out wind like a locomotive exhaust. When your horse reaches the three-quarter pole, your driver wakes up and commences to hand your horse a bunch of long oats and drives it to a break, and in this run he is just in time to keep that nasty man with the red flag from flirting with him. In the meantime you have forgotten to use your field glasses.

As soon as the driver salutes the judges, you must run to your horse, giving the crowd a good view of your rocks. Get the driver to tell you why he did not win. He has forgotten what the number of the excuse is, as he left Murray Howe's great volume at home, and so claims a foul, and you both visit the stand. He does the talking, while you nonchalantly lean on the rail right back of him so that the judges will be impressed with your rocks. When the driver refers to you, as seeing the whole foul, shake your head and look wise.

The swipes by this time have taken the horse to the barn, but they have over-stimulated and have a hard time navigating around the horse. In the meantime you and driver have endeavored to become chummy with the real owners and drivers on the track, your driver innocently flicking the dust with the end of his whip and looking wise. The horse comes out for the next heat, and introduces some more high school stunts that nearly upset other horses in the race, and this time the flag man saw him first and waved the danger signal right in his very face, so insulting both driver and horse that neither would start again. Your personal appeal to those hard-faced robbers (?) in the stand had no effect as the rocks showed them you could afford to lose.

This same treatment accorded you at each track would be too much for your bland disposition and after many weeks you will wake up and realize that your old way of getting the money was easier, and the nearest auction to your last race will ge the outfit and you in your truthful (?) way will write out the "owner's statements" for each horse, stating in each case "that you believe they can beat 2:10 if given a chance, and that you are selling only because your health will not permit you to continue racing." But do not state that the only unhealthy parts about you are your nerves and your pocketbook.

We generally charge money for this advice, but as members of your profession have done so much to improve racing and breeding conditions, we can not make our hearts so hard, as to add to the cost of your racing experience.—W. H. Shields, in The Horseman.

ENTRIES IN STANFORD-OCCIDENT FUTURITY No. 1.

(Closed April 1, 1915.

I. L. Borden's foal by Ed McKinney, dam Ramona by Prince Robert; foal by Ed McKinney, dam Hester McKinney by McKinney; foal by Ed McKinney, dam Cleopatra by Zolock; foal by Ed McKinney, dam Directola by Direct; foal by Ed McKinney, dam Miss Nutwood by Nutwood Wilkes; foal by Ed McKinney, dam Ella G. by Hambletonian Wilkes; foal by Ed McKinney, dam Maude Adams by Cresco Wilkes; foal by Ed McKinney, dam Dolly B. by Welcome; foal by Iran Alto, dam Carrie B. by Alex. Button; foal by Ed McKinney, dam Alta Monterey by Monterey; foal by Major's By Guy, dam C. D. K.

W. R. Zibbell's foal by Best Policy, dam Kate Lumrey by Shadeland Onward.

CLEVELAND FOLKS TURN "CRACKERS."

Charles and Mrs. Tanner returned home yesterday from a winter spent in Thomasville, Ga. Both the great trainer and his wife were enthusiastic about Thomasville, saying that they enjoyed every minute of their stay there.

"We're Crackers now," said Doc last night. "Regular Georgia Crackers."

The reason for this is that Doc has about closed a deal for one of the famous old mansions in Thomasville that has about fifteen acres adjoining it. It is an attractive place, surrounded by roses, wistaria, jonquils and many more of the flowers that abound in that climate. The place is on the road from the city to the race track.

"We would not have come north so soon," said Mr. Tanner, "but business forced us to come home.

"Everything in Thomasville is looking at its best after a splendid winter of rather cool weather such as it was here today. Members of the Pastime stable are enjoying themselves and they have a right to feel proud of the stable which W. J. Andrews is training for them.

"Every horse in the string is training and while Andrews has not beaten 2:30 with the colts they are doing splendidly and look very promising.

"Honeysuckle 2:14½, the seven-year-old daughter of John A. McKerron, that Mr. Devereux gave to Mrs. Andrews, is showing great form and it would not be surprising if Billy entered her a few places this season. Honeysuckle has trotted in 2:19, quarter in 32 seconds, eighth in 16 seconds, thus far.

"Lee Axworthy has not beaten 2:35, but he is in excellent condition. Mr. Devereux expects to ship some of his colts to Lexington about May 1 where they will be turned out. Charley Mitchell may be turned out there also. Billy Andrews probably will ship direct to North Randall about May 10 if the weather up here is favorable."

Doc Tanner is the third Cleveland horseman to purchase a winter home in Thomasville. Billy Andrews, trainer of the Pastime stable horses, located there last year. During the winter Mr. Devereux bought a big estate and now Tanner has become a regular in the Thomasville colony.—Plaindealer, Apr. 16.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

MATERNAL DUTY AND INFLUENCE.

About this time of the year breeders are occupied with visionary champions for future dog shows. Maybe they are already toddling around, maybe they are not yet out of the nest, or maybe they are expected shortly. Whatever happens to be the exact stage, there are some things in connection with the upbringing of puppies which have not occurred to breeders of limited experience, as well as to those who have been breeding dogs over an extended period.

Among these is the treatment of the mother according to her ideas of maternal duties, also according to the maternal affection displayed, so the breeder should utilize it. Perhaps a better way to put the matter would be to say that maternal influence has as much to do with the mental moulding of puppies as it has in the case of human beings.

First, however, comes the question of maternal duties—that is, from the time of birth to the time when nature steps in and cuts off the mother's supply of milk.

During the first three days after the event let the mother do exactly as she pleases. Do not interfere with her in the slightest or attempt to handle the arrivals. If the mother's manner displays disapproval, let her have her new born to herself.

At the end of three days the bitch's ideas of maternal duties will have disclosed themselves. She will do one of two things—either stick like wax to her young or come out for a breath of fresh air at her master's invitation. Whether she refuses to budge or not she should be taken out and given a few minutes in the open. This she should have three times a day.

As a rule the mother who wants to remain with her puppies grows tired of her care in about ten days or a fortnight and neglects them thereafter. On the other hand, the mother who is ready to go out in the early steps of maternity is invariably fully alive to her duties and her affection for her little ones is more than skin deep.

The writer has heard owners denounce bitches because they left their puppies, to "gad about," as it were. They have gone so far as to give orders to keep the bitch shut up with her litter—a grave and thoughtless mistake.

Such a mother has the true maternal instinct. She knows better than her master when her puppies need nourishment, when they require sleep and how long they should sleep.

By all means let the mother have all the freedom she is willing to enjoy. She will ask to be taken back at the proper time.

The writer has been led to the conclusion that during the first two weeks a bitch lets her puppies suckle about daylight, again after her breakfast and a constitutional, and about every two hours to nine or ten o'clock at night. When the puppies are about three weeks old the mealtime is extended to about every three hours, and at a month this becomes extended to every four hours during the day.

In order to lessen the burden of the mother, the writer always provides the bitch with an extra box, so that she can always be away from her puppies when she feels like it. This is done by taking two sides in a corner of the kennel and two boxes at right angles to the sides, so as to form a miniature yard. One box which is for the puppies faces the yard—at least the entrance does—while the entrance to the other box faces in the opposite direction to the yard; the latter is two or three feet square, according to the length of the boxes. The box, which has its entrance opening away from the yard, should be of a height to enable the bitch to hop comfortably over. Thus, the puppies can come out and flop around without losing their bearings and without annoying their mother.

Without going into the details of feeding, either the mother or the puppies, the maternal "duties" may be accepted as ended and the maternal "influence" as begun. This can be encouraged with appreciable effect until the youngsters are five or six months of age. As has been expressed before, this is assuming the mother to be temperamentally fitted.

To allow puppies to continue close association with their mother means that the writer advocates that puppies need never be weaned in the accepted sense. This can be brought about by providing the mother with a box, the top of which is the entrance and not too high to prevent the mother from jumping up and into it. If the mother is not particularly active she can be taken away at night with one puppy as a sleeping companion.

At all events, let the mother spend the better part of the day with her youngsters. If the latter are getting plenty of good grub at regular intervals be particular in keeping the mother away for not less than two hours after she herself has been fed.

If the puppies are high spirited, impatient of restraint and grab you in temper, do not be hasty and cuff them, at least until they are about four months old. Then and not until then, is it advisable to check them. One or two sharp raps with a thin twig at the right moment will have a beneficial effect.

It is a delight to follow the mental changes undergone by puppies. Up to about three or four months they are boisterous tomboys, full of the devil and too busily engaged in various games of the rough and tumble order to brook interruption. The mother, too, if she be with them, is busy teaching them how to wrestle and spar, and to fight as well. If a youngster shows a disinclination to scrap she will torment it and badger it until in sheer exasperation it will turn passionately on her and bite her until she can be heard to whine with pain. At the same time, however, she is by degrees curbing their impulses. When they go what she thinks is beyond the limit she lets them know, and it is far better that she should do the correcting at this stage than we humans.

At about four months a change in demeanor will be noticed. The puppy begins to realize there are things to be observed and lived up to; then the master should begin to insinuate firmness, in a joking way. Pursue this policy for a month or two and the mother's influence can be dispensed with. Its beneficent effect will endure, however, to the end.

With such perfect understanding established, the mother, as a rule, is proud that her master should know of her bairns, and the master, if he is what the writer has in his mind's eye, will instinctively reward the confidence with sympathy. He will tell the mother what beautiful puppies she has, and so play his part in the compact as to lead the mother to believe that he—the master—is also proud of her newly acquired offspring. This fills the mother's cup of contentment to the brim. Her mental anxiety is reduced to a maximum, thus the youngsters are given a chance to thrive in their helpless suckling days. It is a beginning which means incalculable benefit for the future.

In the meantime, what of the mother? From two to three weeks prior to the expected "arrivals" her meals should be of the sloppy order—i. e., plenty of good soup, with the meat and toasted stale bread, and milk to drink. This should help to bring the mother's supply of milk to the best quality when the time comes. Three or four days before the "event" a good dose of castor oil and salad oil—half and half—should make the internal arrangements as clean as a new pin. Three or four hours after the puppies are born, or rather when after the mother has had a good rest following her labors, offer her some gruel made from well cooked oatmeal and milk. Let her have nothing but this for the first three days. After this discreetly add a meal of good, well skimmed soup, and meat. Do not gorge the mother.

The strain of keeping her puppies at top notch will not begin until they are about a fortnight of age. From that period until the youngsters are "rising" five weeks is the time when the mother's powers are most severely tested. At this stage she requires all the good nourishing food—meat, chiefly meat—she can get. It is as well, too, to be present when she returns to her offspring, so that one may discover whether she gives up her meals to her youngsters. Should she do so either keep her from them for about an hour after she has been fed or give her a duplicate meal for herself; but in either event keep her from her young.

At about four weeks the puppies will be ready to lap themselves. Pure milk, the richer the better—scalded is essential—in small quantities should be offered. One may add that a bitch's milk is much richer than that of a cow, and for this reason a third of cream to two-thirds of pure milk. None nearly approaches the quality of that obtained from the mother. In fact, goat's milk is said by the English authority, Mr. A. J. Sewell, to be the best substitute for the bitch's milk.

At about six weeks the puppies can be given, in addition to the milk, any of the prepared foods given to infants. In course of time, at about two months after birth, say, meat cooked or raw can be introduced. Stale bread baked in the oven with a little beef or mutton dripping on it should be given as an intermediate meal. It makes the little "beggars" chew and so keeps the gastric juices on the hop, as it were.

From now on there need be no change in the diet. Puppies up to four months should be fed four times a day, then three times a day until they have almost reached maturity. After they are nine or ten weeks of age, it is best to feed the youngsters separately. If a table, high box or stand of any sort is placed handy two or more puppies can be fed in separate dishes. By doing this one knows each youngster gets his share, and at the same time puppies fed separately are not so liable to bolt their food.

A hard bone, such as one from a beef rib, or a marrow bone, helps the youngsters in their teething days.

When spring has set in, and thereafter, buttermilk or sour milk, once a week, should be given. Breeders should make a point of this.

If something approaching this system is followed out, and the youngsters have liberty, fresh air and clean, warm, dry sleeping quarters, there should be nothing wrong constitutionally when they have reached maturity.

SCOTH TERRIERS ON THE DECLINE.

According to one of the best known English authorities on dogs, there has been a persistent decline in the registration of Scottish terriers since 1906, and consequently there is a feeling of uneasiness among the fanciers of this breed. In 1906 there were 1,032 Scottish terriers registered in the Stud Book, but in the following year they dropped to 879. The retrogression has proceeded steadily until last year the total was but 600. During all these years there was a gradual diminution in the number of dogs registered except in 1913, when there was an increase of five. One of the reasons assigned for the falling off of interest in the Scottie is that the fanciers are going in stronger for the Sealyhams and West Highland white terriers.

Just as an inkling of how the West Highlanders have come to the fore in the last few years it may be noted that in 1907, when they first received classification, there were but 141, while last year they went up to 631, and Sealyhams were not far behind, with 491. The Cairns are also coming in for favor, as may be seen by the fact that last year there were 200. The Scotties, however, do not seem to be centered in one or two kennels, for in the last year no less than sixteen different owners won challenge certificates.

So much for statistics. What about the dog himself? Mr. McCandlish, who is more capable than most men of reducing his ideal to black and white, has a most interesting retrospect in the Kennel Gazette, which has its lights and shades. On the whole, he is satisfied with the breed, his fly in the amber being that no one is breeding good enough terriers. This he attributes to placing excessive importance upon two points—shortness of back and size. Breeders, arguing that short backs are essential to success, and that a big terrier has no chance, place these features before everything else in selecting sires and dams, often using terriers which have nothing else to recommend them. Mr. McCandlish declares that he likes a small, big boned dog and a short, well coupled body as well as any one; but where most of the present day winners fail is that they have not enough bone, rib and quarters for their size, and, while bodies are short, they are not the right sort of bodies. "The dog has become so contracted that there is no neck, the shoulders are straight and stiff, the hind legs are narrow and high, and there is no liberty of movement. We can never hope to breed good Scotch terriers from stock like this, and we must realize our misdoings and go back to pick up the dropped threads. We must find terriers with good necks and forehands, with good wide hindquarters and muscular thighs, and even if they are a bit long cast or a shade too big we must start with what we can get that is anatomically correctly put together, and gradually breed such animals to size and body length."

This seems to be good, sound common sense. One of the curiosities of breeding is that our best specimens oftener than not come from at least one parent that, considered scientifically in the light of the accepted standard, by no means approaches perfection. The same phenomenon is noticeable in pigeons, numbers of the leading winners coming from only what are known as good stock birds. Only experience can enable a breeder to tell the sort of bitch that is likely to throw good puppies, but when he knows his business he will be able to see at a glance. Of course, I take it that she should possess no glaring defects or weakness, and her ancestry must bear examination. These are commonplaces. My own observation has given me a distinct leaning toward a bitch on the robust side, and I note that Mr. Holland Buckley in his recent monograph, "The Scottish Terrier," plumps for a "doggy" bitch, which amounts to the same thing. "The most strikingly successful results," he says, "so far as I have seen, have all, or nearly all, come from the masculine type of bitch."

It is only right to say that this is in opposition to the view of an astute breeder who is quoted by Mr. Buckley as preferring a feminine looking bitch. A perusal of this little book serves as a useful reminder of the difficulties through which Scottish terrier breeders have passed before finally producing what the author stoutly declares is the most perfect terrier on the Kennel Club list. In the early days of the breed, which do not date so very far back, owners were dealing with entirely unknown quantities, no such things as pedigrees or records existing. While the pedigrees in one line seem to have been preserved with care, others more obscure or doubtful have had to be introduced. In spite of the many changes that have taken place within the last twenty years Mr. Buckley inclines to the belief that the breed type has been pretty generally adhered to.

A practical note to those who wish to keep their terriers in good trim. Seldom wash, for washing softens the coat. Brushing and combing every day will keep them clean and get away the old coat, which, if allowed to remain, makes a dog look woolly and untidy, without any shape. Fuller's earth well brushed in will do a lot for the appearance of the coat.

Drink Jackson's Napa Soda.

LEGAL REASONS FOR DOG LICENSE TAX.

There are many dog owners who question the right to tax their pets when the owner of a cat is not obliged to pay a similar tax. An impression has been held by a host of dog lovers that the basic reason for licensing a dog was that the tag attached to his collar served as a means of ientification in case he went astray. There are a lot of persons now who wonder why under the present regulation whereby a dog must be kept muzzled and leashed there is any reason for such a law. According to an opinion handed down by the Supreme Court of the United States dogs are considered property, and it is on this basis that the right to impose a license tax is established.

The following by Judge Brown referring to dogs and the constitutionality of imposing a license fee on them should prove of interest to dog fanciers:

"They are peculiar in the fact that they differ among themselves more widely than any other class of animals, and can hardly be said to have a characteristic common to the entire race. While the higher breeds rank among the noblest representatives of the animal kingdom and are justly esteemed for their intelligence, sagacity, fidelity, watchfulness, affection, and, above all, for their natural companionship with man, others are afflicted with such serious infirmities or temper as to be little better than a public nuisance.

"As it is practically impossible by statute to distinguish the different breeds, or between the valuable and the worthless, such legislation as has been enacted upon the subject, though nominally including the whole canine race, is really directed against the latter class, and is based upon the theory that the owner of a really valuable dog will feel sufficient interest in him to comply with any reasonable regulation designed to distinguish him from the common herd. Acting upon the principle that there is only a qualified property in them, and that, while private interests require that the valuable ones shall be protected and public interest demands that the worthless shall be exterminated, they have, from time immemorial, been considered as holding their lives at the will of the Legislature, and properly falling within the police power of the several states.

"Although dogs are ordinarily harmless, they preserve some of their hereditary wolfish instincts, which occasionally break forth in the destruction of sheep and other helpless animals. Others, too small to attack these animals, are simply vicious, noisy and pestilent. As their depredations are often committed at night it is usually impossible to identify the dog or fix the liability upon the owner, who, moreover, is likely to be pecuniarily irresponsible. In short, the damages are usually such as are beyond the reach of judicial process, and legislation of a drastic nature is necessary to protect persons and property from destruction and annoyance. Such legislation is clearly within the police power of the State. It ordinarily takes the form of a license tax and the identification of the dog by a collar and tag, upon which the name of the owner is sometimes required to be engraved, but other remedies are not uncommon."

DOINGS IN DOGDOM.

The Golden Gate Kennel Club, which stages its show at Dreamland Rink May 18, 19 and 20, is expecting a large number of entries including good strings from the East. The entries are now being made at the club's headquarters, 528 Market street.

The judges will be Theodore Offerman of New York; Charles R. Wood of Philadelphia; Daniel T. Ritchey of New York; Charles G. Hopton, of Hamilton, Mass., and J. A. Lawrence, of San Francisco.

The Golden Gate officers just elected for the year are: Irving C. Ackerman, president; J. A. Folger, vice-president; Alex Wolfen, secretary, and Benjamin I. Block, superintendent. The bench show committee is composed of Messrs. Ackerman, Folger and Wolfen.

After the three day session at Dreamland, the circuit moves to San Mateo, where the San Mateo Kennel Club will stage an open air show on May 22. The San Jose Kennel Club shows on May 25 and 26, and immediately afterwards the San Rafael Kennel Club will hold its annual spring exhibition.

* * *

Charles Heffernan of Stockton is receiving the condolences of his friends over the loss of his good Airedale terrier, Oorang's Queen. The great terrier was killed by an automobile. Heffernan purchased the dog on the other side only a few months ago and paid a big price for her. Queen was winner in England of 121 first prizes and 14 times was awarded best in show. The dog was never shown on this continent. Heffernan has, however, several puppies from Queen which are sired by Champion Flornell Oorang. They are now two months old and should be rounded into nice shape for the Panama-Pacific show in the late fall.

* * *

The health of puppies and mother depends much on the mental repose of the latter. To possess this, she must have perfect reliance and confidence in whoever cares for her. She must feel assured in herself that the approaching footsteps are no menace to her newly born; that there is no ground for alarm. Further, that the outstretched hand is in the light of a shield, not an uplifted club about to strike.

AMERICA'S FOREMOST HUNTRESS.

Accompanied by her husband, two Indian guides, a horse-wrangler and a cook, Mrs. Frederick K. Burnham, America's foremost huntswoman, stalked big game for fifty-four days in a section of this great American continent that is absolutely unsurveyed, uncharted and unexplored; in fact, the far corners of this vast no man's land have never been penetrated even by the hardy North American Indians. And Mrs. Burnham brought back as her spoils of this chase a record string of trophies, among which was the largest moose killed in Alaska during the season.

Day after day and week after week this doughty little woman, clad in the costume of man, with mackinaw, high boots and trousers, and accompanied by only an Indian guide, "mushed" over this rugged country, wallowing through snow waist deep at times, in search of "big heads" and grizzlies, braving perils that have made many a sturdy trail-blazer falter and turn back.

This was Mrs. Burnham's second excursion into the heart of North America's big game country. But this time she went farther and risked more than ever before—for she was ambitious to establish a record, to land the best string of trophies that have ever been brought out of the North.

"I did not go into the big game country to slaughter wantonly," said Mrs. Burnham. "I was looking for prize specimens—trophies that would excel anything ever bagged before. There were days when we rode and walked mile after mile, seeing countless animals, yet never taking a shot because none of them came up to the standard I was seeking. When we were hunting caribou my guide said to me repeatedly, 'Aren't you ever going to shoot one?' This was after we had passed several herds. 'I don't know,' I replied; 'perhaps not. I won't kill any unless I can get a record head.'"

The heart of the big game country of America is situated in the far interior of Southeastern Alaska and Northwestern British Columbia. It is a rugged, snow-clad country, bleak and desolate, yet with a fascinating grandeur which holds forth an irresistible allure to the hunter. It is a land not only of snow and ice, but also of deep, dank forests and massive mountain peaks with intersecting saw-tooth ranges of solid rock that rise sheer and steep to insurmountable heights. A strange scenic medley, indeed, is this land that has played hide and seek with civilization ever since the world began. Here the wild game of the country found an unmolested habitat until the inroads of the dauntless American huntress and her daring husband blazed a trail that will no doubt be followed in time by all the country's big game hunters.

"It was a dangerous, yet wonderful trip into these Canadian wilds," said Mrs. Burnham. "We outfitted at Wrangle, Alaska, and then portaged up the Stikine river to Telegraph Creek, crossing the panhandle of Southeastern Alaska completely. From Telegraph creek we packed into the territory contiguous to the headwaters of the Killichoa river in British Columbia. Here we discovered that we were all strangers in a strange land. Even the Indians didn't know the country; they all confessed that they had never been there before. This added a new peril to our lot—the danger of getting lost and perishing in this unknown land. The trip overland with the pack-trains was most strenuous . We traveled six days through the sheep country, making only 'one night stands'—that is, just camping for a single night in a place.

"When we struck the territory in the vicinity of the headwaters of the Killichoa—the country never before trod by white man—we discovered that it fairly teemed with game. Here we pitched camp (although we did not stay for more than six days in any one spot) and the hunting really began. Here I was to spend some of the happiest times of my life; to have adventures that would send the blood tingling through me; and, most of all, to bring down with my own rifle a record string of big game trophies."

WHY DO ALL BIRDS GO AWAY?

Although North American birds living in the colder part of the continent return south for the winter, there is no similar movement of birds from the colder to the warmer parts of South America, according to a bulletin (No. 185) of the U. S. Department of Agriculture. If the birds in North America did not go south during the winter, they would perish. Also, if the birds remained in the South later than spring, there would be overcrowding, so they are drawn northward again by the enormous summer supply of bird food. In South America, on the contrary, there are almost no migratory land birds, because the south temperature latitudes, on account of their small area, offer no such inducements to the feathered inhabitants of the limitless forests along the Amazon.

The new pamphlet, which is entitled "Bird Migration," gives much information regarding the habits of the migratory birds of North America. The fact that the routes of migration are long and complex does not mean that these routes were so in the beginning, says the bulletin. In the early ages, flight was probably short, easily accomplished, and comparatively free from danger. Each lengthening of the course was adopted permanently only after experience through many generations had proved its advantages.

There are some who argue that love of birthplace is the impulse which causes spring migration, and these call attention to the seeming impatience of the earliest arrivals. Ducks and geese push northward with the beginnings of open water so early, so far, and so fast that many are caught by late storms and wander disconsolately over frozen ponds and rivers, preferring to risk starvation rather than to retreat. The purple martins often arrive at their nesting boxes so prematurely that the cozy home becomes a tomb if a sleet storm sweeps their winged food from the air. The bluebird's cheery warble we welcome as a harbinger of spring, often only to find later a lifeless body in some shed or outbuilding where the bird sought shelter rather than return to the sunny land so recently left.

As a matter of fact, however, only a small percentage of birds exhibit these preseasonal migration propensities. The great majority remain in the security of their winter homes until spring is so far advanced that the journey can be made easily and with comparatively slight danger; and they reach the nesting spot when a food supply is assured and all the conditions of weather and vegetation are favorable for beginning immediately the rearing of a family.

It may be safely stated that the weather in the winter home has nothing to do with starting birds on the spring migration, except in the case of a few, like some of the ducks and geese, which press northward as fast as open water appears. There is no appreciable change in temperature to warn the hundred or more species of our birds which visit South America in winter that it is time to migrate. It must be a force from within, a physiological change warning them of the approach of the breeding season, that impels them to spread their wings for the long flight.

Some birds migrate by day, but most of them seek the cover of darkness. Day migrants include ducks and geese (which also migrate by night), hawks, swallows, the nighthawk and the chimney swift. The last two, combining business and pleasure, catch their morning or evening meal during a zigzag flight that tends in the desired direction. The daily advance of such migrants covers only a few miles, and when a large body of water is encountered they pass around rather than across it. The night migrants include all the great family of warblers, the thrushes, flycatchers, vireos, orioles, tanagers, shore birds, and most of the sparrows. They usually begin their flight soon after dark and end it before dawn, and go farther before than after midnight.

During migration birds are peculiarly liable to destruction by striking high objects. The Washington Monument, at the National Capital, has witnessed the death of many little migrants; on a single morning in the spring of 1902 nearly 150 lifeless bodies were strewn around its base. As long as the torch in the Statue of Liberty in New York harbor was kept lighted the sacrifice of bird life it caused was enormous, even reaching a maximum of 700 birds in a month.

AFOUL OF GAME LAW.

The State game wardens in the northern portion of California are having a world of trouble in enforcing the trout laws, it is reported. For the first time in many years the mountain streams have run down and are alive with big trout hungry for the fly. This proves irresistible for the small boy, who goes out at every opportunity for a day's fishing.

If it were the youngsters alone who were violating the law designed to protect the spawning fish, they could be easily dealt with, but the trouble is that the grown folks as well are taking a chance to surreptitiously obtain a supply of trout, and this is keeping the wardens busy day and night. Warden Courtright of Modoc county arrested Fred Rider last month for violating the fish law. On searching him he found some fine rainbow trout secreted in his coat pocket.

At Truckee a number of prominent families had trout on their tables that were taken out of Independence lake before the season opened. Deputy Commissioner Mandeville, who has charge of that district, found some of the heads and tails of the trout and started an investigation that lasted day and night, with the result that he was getting so close to many prominent individuals that they considered it best to leave the city for a time.

The claim is made that a great many of the mountain town's aristocracy are included among the violators, who knowingly purchased the fish unlawfully captured, and arrests may follow when the warden has completed his investigations. It is pretty well known that a certain market fisherman took the fish to Truckee via Hobart Mills, and as soon as sufficient evidence can be acquired he will be arrested.

Game Laws Stand Till August.—Changes that may be made in the fish and game laws by the present Legislature will not go into effect until ninety days after the adjournment of the session.

This means that the present laws, even if modified, will be in effect until some time in August. Several open seasons will be changed by laws now before the Legislature, if passed.

Sportsmen Form Association.—The Los Gatos Fish and Game Protective Association was organized recently at Los Gatos, with several well-known business men as sponsors: J. M. Sullivan, president; K. H. Erickson, secretary and treasurer; board of directors, S. D. Balch, F. W. Knowles, E. G. Angell, C. C. Snydam and J. D. Shore.

At the Traps

Golden Gaters' Shoot.—The Golden Gate Gun Club's regular monthly blue rock shoot at West Alameda station last Sunday afternoon drew an attendance of fifty shotgun sportsmen. The card for the day called for a total of 50 birds in three events—two 20 bird and a 10 bird match. The 20 bird events were shot in 10 bird sections.

Barney Worthen, J. F. Dodds and Dick Reed were high guns for the day, with totals of 48 out of 50 each. "Pop" Merrill and Toney Prior were next up with 47 breaks each. Dodds, Putzar and Reed with 19 each were high men in the cup race, event one. Worthen scored a straight 20 in event two, the challenge cup match. Nine shooters each scored 19 birds in this contest. Eight trigger pullers lined up straight runs of 10 in the third event. The scores follow:

Events—	1			2			3	Ttl
Targets—	10	10	Ttl	10	10	Ttl	10	50
B. H. Worthen	9	9	18	10	10	20	10	48
J. F. Dodds	10	9	19	9	10	19	10	48
Dick Reed*	9	10	19	10	9	19	10	48
"Pop" Merrill	9	9	18	9	10	19	10	47
Toney Prior	10	8	18	9	10	19	10	47
Tom Wilkes	9	8	17	9	10	19	9	45

Moraga Gun Club.—C. A. ("Pop") Merrill, one of California's veteran shooters, has recently organized a new gun club at Moraga. On May 9 a tournament will be held and several beautiful cups will be placed in competition. This will be a bird handicap event and all shooters will be placed on an equal basis.

An inviting luncheon will be served free to all participants and a good time is assured every one. It is the desire to make this official opening shoot a memorable one, so make your arrangements to be there.

The club ground is situated in the beautiful Moraga valley on the Oakland and Antioch line, a picturesque twenty minutes' ride from Oakland. The automobile roads are in splendid condition and it is a scenic drive via the Tunnel road.

This is a chance to spend a real old-fashioned picnic day and also participate in a blue rock shoot over a good trap with a perfect background. The grounds will be open every Sunday except the third (Sunday) of each month and Mr. Merrill will be on hand to take care of you, so come on and try the traps before the big shoot comes off. Shells can be purchased on the grounds.

Those desiring to participate on May 9, kindly notify C. A. Merrill at 343 Thirteenth street, Oakland, as soon as possible in order to be listed for a program and further information which will follow.

* * *

Southern Handicap.—The Interstate Association's tenth Southern Handicap will come off at Memphis, Tenn., May 11, 12 and 13. There will be $1000, or more, added money. Practice day, May 10, the card will be five 20 bird events, Rose system.

First day, ten 15 bird events, Squier money back system, special event at 25 doubles.

Second day, five 20 target events, Squier money back system. Event 6, Preliminary Handicap, 100 targets, high guns, three high guns, Interstate trophies.

Third day, five 20 target events, Squier money back system. Event 6, Southern Handicap, 100 targets, high guns, $100, or more, guaranteed to winner, three Interstate Association trophies to three highest scores.

The Columbus Cup for high average in all events on the program—three wins for permanent ownership.

* * *

Tomorrow's Powder Puffs.—The Exposition City Gun Club members and visiting shooters will practically open the Easton trap grounds tomorrow for the club blue rock season. Inclement weather and Easter Sunday caused a postponement of the club's initial 1915 shoot previously.

Interstate Association Tournaments—

May 11, 12, 13—The Interstate Association Tenth Southern Handicap Tournament, Memphis, Tenn., under the auspices of the Memphis Gun Club; $1,000 added money. September 13, 14—Omaha Gun Club, R. D. Vaught, Secretary-Manager, Omaha, Neb.

November 4—Williams Gun Club, F. E. Lowe, Secretary, Williams, Ariz.

INTERNATIONAL SHOOTING TOURNAMENT.

Marksmen of California, and of the whole Pacific Slope, are jubilant over the decision of the Exposition authorities to permit the use of the telescope sight in the big international Panama-Pacific shooting tournament to be held on the Shell Mound range from August 8 to September 26. Whether the telescope sight would or would not be permitted was a mooted question all over the country. This decision means that some of the greatest marksmen of the country will attend the tournament. Some of the leading marksmen of the bay district are practicing daily for the big shoot, the most important shooting tournament in the history of this country. There will be matches for soldiers, sailors, recruits and veterans, cadets, students of academies and colleges, indoor and outdoor contests, natural and artificial light, rifles, pistol and revolver shooting.

The tournament will be inaugurated by a brilliant military demonstration, in which civic bodies will participate. The officers in charge predict that fully 40,000 men will be in line on that occasion. Many shooting societies from all sections of the country will be represented.

TRADE NOTES.

A Pacific Coast Squad Record.

At Newman, Cal., April 10-11, registered tournament a Pacific Coast five man squad record was established when Toney Prior, Fred K. Burnham, Chas. H. Knight, D. J. Ruhstaller and M. F. Leffler made the consecutive scores of 97, 98 and 99, losing only six targets out of a possible three hundred. Four of the squad used the famous Red W. "Leader" loaded shells and two used Winchester repeating shotguns—"the kind the champions use." Four of the squad won individual long run gold trophies, each man using the Red W. brand.

Mr. Toney Prior of San Francisco won the first leg on the "Season Interstate Official Average," at Newman, Cal., April 10, by breaking 195 targets out of 200. Mr. Prior also tied for amateur high average at Modesto on April 12, scoring 186x200. This famous trapshot uses Winchester factory loaded "Leader" shells, "the Red W. brand."

New Booklet on Hand Trap.

The latest practical device for throwing clay targets is the hand trap. It is gaining in favor every day being used both by, trapshooters and field sportsmen.

The Du Pont Company has issued an interesting booklet on its use and value. It describes the hand trap in detail, also the many pleasures derived from its use.

The company will furnish a copy of this book on request.

Rem U. M. C. Notes.

The Ottawa (Can.) five man team won the team shoot held under the auspices of the Lachine (Que.) Gun Club, April 2. Shooting at 25 birds per man, the Ottawa team using Nitro Club shells, scored 114x125. Montreal was a close second with 113x125.

Warranted to give satisfaction.

CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

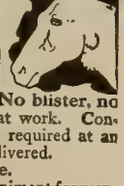
As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio

Care and Training of Trotters and Pacers....

Price $1.00 Second Edition Revised and Enlarged.



The first book on its subject printed in over 20 yrs. Previous works belong to the high wheel sulky era.

THIS book enables anyone to do his own care-taking and training until it is time to send the colt to a professional trainer. It explains why promising speed prospects should be handled professionally after a certain period. It covers the intricate details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented; nothing is left to guess work. The entire field is covered in lucid language. The instructions are concise and easily understood. Every man who owns a trotting or pacing colt should read this book. The work contains 160 pages, is handsomely bound in cloth, is clearly printed, is handsomely illustrated and contains no advertisements—it is not a catch penny publication that looks big in the advertisement and is disappointing when received. The work is as modern as a 42-centimeter gun. Both theoretical and practical views are outlined and compared. The book incorporates the views of such authorities as Thomas W. Murphy, Walter R. Cox, Ed Geers and others. Many professional trainers have purchased the book and have found it interesting. Despite the war over 300 copies have been sold in Europe and Australia. The titles of the chapters are: The suckling colt; The weanling colt; Making speed with yearlings; Preparing for the two-year-old futurities; Three-year-olds; Six principal defects in gait, shoeing colts; Shoeing of 101 famous colts of the past four years; Types of shoes illustrated; and Miscellany. This last chapter is full of many useful and valuable hints, too numerous to mention here, such as why horses should have water before hay, and hay before grain. Send us your dollar now. This book contains hints you can make use of at once. If you forget you may regret

WENDELIN J. MILLER
of Chico, Cal.

The death of Mr. W. J. Miller causes to be put on the market the choice assortment of Broodmares, Youngsters and Race Winners with which he achieved such signal success in recent years, including

JOHN MALCOLM (2) 2:11½
stake winner, world's champion two-year-old pacing gelding (1913), by Dan Logan 2:07½, dam Susie Miller by Prince Ansel (2) 2:20½, etc. Now four years old and can show as much or more than any pacer in California. Prime for this year's races.

CAPITOLA (2) 2:17¾, (3) 2:14½
stake winner, fastest two-year-old pacing filly of 1912, public trial in 2:06½ as three-year-old, by Dan Logan, dam Lulu Mack by Arthur Wilkes, etc. A great race mare for her class.

BONDALEAN (2) 2:20½
winner of second money in two-year-old division, Breeders' Futurity, 1914, and absolutely the best one in sight for this year's three-year-old pacing stakes. Entered and paid up. Trialed in 2:15 last year. By The Bondsman, dam Katalina 2:11¼ by Tom Smith 2:13¾, etc. As great a youngster as the country affords today.

KATALINA 2:11¼
(dam of Bondalean (2) 2:20½) by Tom Smith 2:13¼, dam Kate Lumry 2:20½ (dam of 5 trotters including Baby Doll 2:10¼, Ella Mac 2:11½, etc.) by Shadeland Onward 2:18½. Katalina was a stake winner, a great aged trotter, and her first foal is a fast, standard performer. She breeds regularly and will become more famous as a producer than is her dam.

TWO-YEAR-OLD FILLY
by All Style 2:10, dam Katalina 2:11¼. Staked, paid up. Good prospect.

BAY FILLY, WEANLING
by The Proof (2) 2:29¾, dam Katalina 2:11¼. Nice individual and bred to make a fast mare.

LULU MACK
(dam of Capitola (3) 2:14½), by Arthur Wilkes, sire of Maymack 2:04½, etc., dam Lady Merrill by Tilton Almont, sire of the dam of Monte Carlo 2:07¼, etc. Good breeder and a proven producer.

BAY FILLY
three years old, sister to Capitola (3) 2:14½, never broken.

FIRST NATIONAL
bay colt, two years old, brother to Capitola (3) 2:14½. Staked, paid up. Fine youngster.

John Malcolm and Bondalean are in training at the State Fair Grounds, Sacramento, their workout days coming on Wednesdays and Saturdays. You can see them at any time and they show for exactly what they are—two of the best young pacers in the land to race in this and future seasons. Prices and particulars of all kind may be obtained upon application by mail or in person to either of the undersigned.

MRS. W. J. MILLER,
L. B. DANIELS, Chico, Cal.

Bishop, Cal.

SUDAN GRASS. - FREE SAMPLE. Reliable Seed

Full Information and Lowest Possible Prices.
C. ULLERY, Lubbock, Texas.

Say, Can You "Figger"?

Try Your Brains on This One:

If a man owns thirteen brood mares and gets ten foals a year, and wins with **ONE** of them (**all he can drive in a race**) every Coast futurity, how long will it take him to go broke if he keeps on breeding, keeps on winning, and never sells anything?

The solution is so simple that it really doesn't require brains, does it? I breed horses, I race horses—and MY HORSES WIN RACES, but this is not all of the business. Sometimes I MUST SELL HORSES—hence the offerings below. I am not "culling my stable"—every horse I own, personally, can be bought for what he or she is actually worth on a money-earning basis. These are priced as fair samples. What I offer is "live stuff", in training, improving daily, ready for this year's campaign. Don't take my word for it—come to Los Angeles—see them work—drive them yourself. You cannot buy better ones at the price anywhere.

All previous prices are invalidated—Quotations below are subject to change according to future conditions.

MISS QUEALY (2) 2:26¾
Full sister to MANRICO (3) 2:07¼, winner of Kentucky Futurity 1912, and holder of world's record for sixth heat. Seven years old, trained slightly as a three-year-old and showed half in 1:06 over a half-mile track; has been in training ninety days and recently worked a half in 1:04½; absolutely will not break, good gaited, sound, and a handsome individual. Can trot a two-minute gait and has every right to make a very fast, consistent, good mannered race mare. Price $1750.

ALARICH 2:11¼ (Breeder's mark 2:09), trotter, bay gelding with black points, 15.3, handsome, sound, fast and game; trialed at Santa Rosa last season in 2:06¾ and can do it again. Is a first class doer, can race twice a week and is eligible to the 2:13 class trots on mile tracks and to the 2:18 class on half-mile tracks; has shown well on the twice-arounds. Price, $550.

HELEN BELLE (2) 2:22½, breeder's record, bay filly, foaled 1912, good gaited, good headed, sound and extremely fast; was taken up absolutely green on Sept. 3 and has developed in a most satisfactory manner, taking her mark in December, since which time she has been an eighth in :16, half in 1:09. Sired by California's greatest sire of colt trotters, CARLOKIN 2:07½. First dam Carolyn C. by Axtell (3) 2:12 (a champion); second dam by Expedition, sire of Bon Voyage 2:08; third dam by Princeps (son of Woodford Mamb.); fourth dam by Hambletonian 10.
Carolyn C. had two minute speed. This great filly is entered and paid up in the Occident stake, the State Fair, P. C. T. H. B. A., and Oregon Futurities for 1915. The best buy in California at $1400.

NELLIE Mc,
black mare, trotter, eight years old, racing sound but is blemished; has always trained sound and I believe will continue to do so. Trialed at Sacramento in 2:10½ and has been a half lately in 1:03¾. Is a splendid mannered mare—anyone can drive her anywhere. She races first class, is fast, good headed, good gaited and dead game.
Sired by ZOLOCK 2:05¼, dam by Wilkes Moor, son of Guy Wilkes.
Stands about 15.3, is a round made extra good looking mare, weighs about 1140, has splendid legs and feet. She negotiates a half mile circle in A-1 style, should surely beat 2:10 this year. Does not pull a pound and can be placed anywhere. Eligible to any class. Price $750.

CARLETA,
bay filly, two years old, by CARLOKIN, dam ALEXANDRIA, tr. 2:20, by Bon Voyage 2:08; second dam by Oakland Baron 2:09¼; third dam by Allandorf, etc.
This is a good trotter and should be prominent in her stake engagements. Is very handsome, good headed, sound and comes from families noted for early speed. In training now and improving very fast; trialed recently, half mile in 1:11½, eighth in :16¾.
She is entered and paid up to date in the following stakes: Panama-Pacific $3,000 for two-year-olds, Stanford, Occident, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. Price $1200.

O M A R, gelding,
trotter, trial 2:13¾, half in 1:05, eighths in :15; good headed, sound and can be depended upon. Is a beautifully gaited big horse and should prove useful to race over the twice arounds or for a matinee and road horse. He is fearless and is one of the most pleasant driving horses I have ever ridden behind. Stands slightly over 16 hands, weighs about 1200, is eight years old. Sired by DEL CORONADO 2:09½, dam Pineapple by Albion (son of General Benton). A present at $350.00.

CARLSCHEN (2) 2:23, breeder's record, brown gelding by CARLOKIN, dam BONNIE AILSIE 2:08½ (dam of Contention B. (3) 2:08¼) by Faustino, son of Sidney.
Trialed with a little work last year a half in 1:09, is extremely promising and looks to be as good a prospect as any of the colts racing last year in the two-year-old trots. Is engaged in several of the futurities including the P. C. T. H. B. A., Pleasanton and State Fair Futurities. Is a splendid type, beautifully gaited, good headed and has extreme speed. He does it right. Worked recently in 2:17¾, half in 1:06. Sound, sold to close a partnership. The cheapest colt in the west at the price—$800.

HERMES, brown colt,
two years old, by CARLOKIN, dam MISS QUEALY (full sister to Manrico 2:07¼).
This is one of the most promising trotters I have ever handled. Is an especially nice gaited colt, can show a 2:20 gait, is good headed and on the whole the most promising youngster I know of for the western stakes. Is also a show horse. Is entered and paid up in the Occident, Stanford, State Fair, P. C. T. H. B. A. and Pleasanton Futurities. His dam is an extremely fast trotter, having shown a two minute gait in her three-year-old form, and his second dam produced two to hold world's records—Manrico and Don Pronto.
This youngster is spoken of as the most impressive colt trotter at Los Angeles. Trialed lately in 2:27, and worked two eighths the same day in :16¼ each. Price $2000.

JOHNNY DUGAN,
3-yr.-old breeder's record 2:16,
pacer, no straps, bay gelding four years old, straight and sound, trialed a half in 1:04 last year in his three-year-old form and could pace around 2:10 in June.
Sire, CARLOKIN 2:07½; dam Annabelle L. (full sister to Murray M. and Robert L. 2:08¾) by Hambletonian Wilkes; second dam Annabelle 2:27½ (dam of La Belle 2:16); third dam by Williamson's Belmont. A great buy at $350.00.

OLD FOLKS,
bay gelding, trotter, five years old, trialed as a two-year-old in 2:31½, as a three-year-old in 2:18½, and in his four-year-old form last May in 2:11, last half in 1:04. Is sound, good gaited, good headed, and should 2:08 this year. Comes from a family of good race horses on both sides—by DEL CORONADO 2:09½, dam IRAN BELLE, by Iran Alto 2:12¼; second dam ANNABELLE, etc. He stands A-1 with the railbirds around Los Angeles and is in training and ready to go on with and race this year. Price $1250. Working beautifully.

NICOLA B. (2) 2:23¼
Winner two-year-old division Oregon Futurity, 1914.
Received slight injury just prior to going to the races in 1914, up to which time he was the most promising colt in my stable, working mile first part of June in 2:17, half in 1:06. Started twice, was once first, once second. Now in training and has brushed an eighth lately in :16; sound, grand individual, paid up in six western stakes and has every license to win. Son of Carlokin 2:07½ and Atherine 2:16¾, dam of Copa de Oro 2:01, Rags 2:09¼, etc. The price on this one is rising—now $2500. Getting better daily.

AND ONE FOR THE $20,000 P.-P. I. E. TROTS—RAGS 2:09¼, winner of the Breeder's and Oregon Futurities, the Stanford and the Occident stakes as a three-year-old, and the Governor's Stake, $5000, as a four-year-old—in all, beaten in but two out of eight starts, second in those two, and beaten only by 2:05 trotters. In my opinion as good a prospect for the big stakes as anyone has. He is a really great race horse, is racing sound, and has developed from an overgrown four-year-old into a sturdy, strong, exceptionally fine individual. Should be engaged in the Panama-Pacific $20,000 stakes, for which I already have entries. None better bred—by Del Coronado and out of the dam of Copa de Oro 1:59, etc. Price $2000.

In addition to the ones above mentioned I will offer to intending buyers JIM CRAM, three-year-old pacer (brother to Chango 2:12¼), the two-year-old pacer SANDY McNABB (staked), FIVE YEARLINGS and SIX TWO-YEAR-OLDS, most of which are in training and ready to show.

Prices and descriptions on application.

WILLIAM G. DURFEE, 2019 S. Figueroa St., LOS ANGELES, CAL.

COPA DE ORO 1:59
WINNING PERFORMANCE

DURFEE'S STALLIONS

CARLOKIN 2:07 1-2
EXHIBITION MILE 2:05 1-4

Champion Pacing Stallion of the West and Sire of a Champion

Reg. No. 52785. Licensed Pure Bred. Cert. No. 1037

Golden Bay. Height 15.3½. Weight 1160.

Sire of CONTENTION B. (2) 2:24¼, (3) 2:08¼, the latter mark a world's record when made, and but one-quarter of a second removed from present record for three-year-old pacing geldings. Public trial (3) 2:07¼. Also sire of

Chango p. (3).....2:12¼	De Ora (3) 2:17
2-yr.-old record 2:13½.	2-yr.-old record 2:27¼.
Trial (3) 2:09	Gold Lily p. (2)....2:24½

Patrick de Oro p (3)2:22¼, trial (3) 2:08¼, ½-mi. track

Copa de Oro has been retired to the stud for but a very few years and these are from his first foals. Where can you find a stallion whose get have made an equal showing?

COPA DE ORO is the fastest son of Nutwood Wilkes 2:16½ (sire of 8 in 2:10); first dam Atherine 2:16¾ (great brood mare) by Patron 2:14¼, sire of the dams of 7 in 2:10; second dam Athene (dam of 2 trotters, etc.) by Harold 413, sire of Maud S. 2:08¾ and the dams of 5 in 2:10; third dam Minerva (great brood mare) by Pilot Jr. 12, sire of the dams of Maud S. 2:08¾ and 3 others in 2:10, etc. He is one of the handsomest horses in the world, as well as one of the fastest, and is undoubtedly the best bred of all extremely fast pacing sires. From the first I heralded him as the Coast's future great pacing sire, and the performances of his youngsters recorded above certainly show that I had most excellent grounds for that belief.

FEE: $75 For the Season, Usual Return Privilege

I am especially well equipped for caring for mares at reasonable rates in any way that owners may desire. Every attention will be given mares in my charge, but no responsibility is assumed for accidents or escapes. Further particulars may be had by applying to W. G. DURFEE, 2019 So. Figueroa St., Los Angeles, Cal.

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred. Cert. No. 1038

Mahogany Bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

Ethel D. (3).....2:11	Helen Belle (2)....2:22½
Johnny Dugan p (3)2:16	Nicola B. (2).....2:23½
John Warwick (2) 2:17	Santiago (3) 2:24¼
The Lark (3).....2:18½	May Marian p (3)..2:24¼
Carl (2) 2:19¾	Carlrich p (2) 2:24½
Miss Carlokin p 2:20	El Carbine (2).....2:27½
Carsto (2) 2:22½	Eileen C. (3) 2:29
Carlschen (2) 2:23	Carlos (2) 2:29¼
Fulton G. (2).....2:30	

CARLOKIN is the best bred son fo McKinney 2:11¼, foremost among the progenitors of 2:10 speed, being out of that sterling producing matron Carlotta Wilkes (dam of Inferlotta 2:04¾, Mary Dillon 2:06¼, Guy Borden 2:07¼, Carlokin 2:07½, and 6 others in 2:30) by Charley Wilkes 3653; second dam Aspasia (dam of 4) by Alcantara 2:23, sire of the dams of 20 in 2:10; third dam Miss Buchanan (dam of 1) by Clark Chief 89, sire of the dams of 2 in 2:10, etc. Carlokin was not only a fast and rugged campaigner, but, point for point, one of the most ideal individuals ever foaled. I chose him from among all the best horses of the country as a prospective great sire, and in 1913-1914 his get won more coast futurities than those of all other sires combined. What more could you ask of them?

FEE: $75 For the Season, Usual Return Privilege

Every attention will be given mares in my charge, but no responsibility is assumed for accidents or escapes. Further particulars may be had by applying to W. G. DURFEE, 2019 So. Figueroa St., Los Angeles, Cal.

Pleasanton Driving Park

offers for service for the season of 1915 the following stallions:

Joe Patchen II 2:03¼

Licensed Pure Bred—Cert. No. 1128.
A. T. R. No. 47491

BEST MONEY WINNING PACER

By JOE PATCHEN 2:01¼, sire of Dan Patch 1:55¼ and 6 others in 2:10. Dam, Bessie Bonehill 2:05¾ (dam of 2 in 2:10) by Empire Wilkes 2:29¼; second dam Arab Girl (dam of 7) by Crittenden 433, sire of the dams of 6 in 2:10.

Joe Patchen II comes from a long line of famous ancestors and is himself one of the best known and most popular pacers in America, with all the qualities of speed, stamina and individual excellence necessary to the making of a truly great horse—one of the kind you would expect to find after a glance over the array of famous performers owning allegiance to the families from which he comes. He is an excellent breeder, transmitting uniformly his own desirable characteristics and his few foals in California are promising to the highest degree.

Mahomet Watts 2:08¼

Licensed Pure Bred—Cert. No. 2312.
A. T. R. No. 51518.

AXWORTHY ELECTIONEER

By GEN. WATTS (3) 2:06¾, sire of three three-year-old trotters in 2:10. Dam Alla P. 2:21¼ (dam of 3) by Palo Alto 2:08¾, sire of the dams of 2 in 2:10; second dam Lula Wilkes (dam of 5), by George Wilkes 2:22, sire of the dams of 15 in 2:10.

Mahomet Watts is not only the fastest performer credited to Gen. Watts (3) 2:06¾ (whose breeding on qualities have been prime factors in the rise of the great house of the Axworthys) but he springs on the maternal side from the most firmly established families of champion producers—those of Electioneer and George Wilkes. He is a pleasing individual of fine finish and extreme speed, having a three-year-old record of 2:10 and being timed separately in a race last year in 2:05¾, whose services should be most welcome to California breeders.

Fee for Joe Patchen II or Mahomet Watts, $100 with usual return privilege

Service fee refunded to owners of mares bred to Mahomet Watts proving not with foal.

Vernon McKinney 2:01½

Licensed Pure Bred—Cert. No. 1126.
A. T. R. No. 53803.

FASTEST OF THE McKINNEYS

By GUY McKINNEY 37625, son of McKinney 2:11¼, dam by Guy Wilkes. Dam Maud Vernon by Mount Vernon 2:15¼, sire of the dam of Leata J. 2:03, etc.; second dam Mag by Gen. McClellan, sire of the dam of Mack Mack 2:08, etc.

No member of the McKinney family excells Vernon McKinney in point of speed or individual excellence. He is a horse of much substance—16 hands, 1200 pounds—bred in lines of intense prolificacy and evidencing in every way his ability to "live up to his pedigree." No horse has greater natural speed or a more effortless way of going. He is a sure breeder and his youngsters are the readiest sellers of their age in California—a statement proven by recent sales and tentative offerings for the get of mares due to foal to him this year.

Zomblack 2:26, tr. 3, 2:08¾

Licensed Pure Bred—Cert. No. 1127.
A. T. R. No. 54955

BEST SON OF ZOMBRO

By ZOMBRO 2:11, sire of twenty and the dams of three in 2:10.

Dam, Madeline Marshall (dam of 2) by Demonio 2:11¾, sire of 7 and dam of 1 in 2:10; second dam Mamie Comet (dam of 3) by Nutwood 2:18¾, sire of 2 and dams of 21 in 2:10.

Zomblack is one of the handsomest horses ever foaled in California as well as one of the fastest. His extreme speed came to him early and naturally, and he is unexcelled in size and conformation—an ideal type of the American trotter in every important respect. He is intensely bred in speed producing lines and we have no hesitation in advancing the claim that he is the very best son of Zombro 2:11, in his turn the best son of McKinney. In every instance the families represented in his pedigree are breeding on most successfully.

Fee for Vernon McKinney or Zomblack, $50 with usual return privilege

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

CHAS. L. DeRYDER, Superintendent PLEASANTON, CAL.

WORLD'S CHAMPION YEARLING TROTTING STALLION 1910
Unbeaten Two-Year-Old in 1911

Winner of California State Fair and Pacific Coast Breeders' Association Futurities in 1912. Record in Third Heat of a Winning Race.

Also holder of the World's Record of a Five-Heat Race by a 3-yr.-old Stallion

Limited number of approved mares at $100 the season.

WILBUR LOU was bred to seven (7) mares in 1912 and got seven (7) foals; six (6) were trained, on the property of John Christiansen, of San Francisco, which was said to be the fastest yearling on the Pacific Coast.

The five (5) owned by the Hemet Stock Farm showed as follows:

FIESTA LOU, record 2:25,	half-mile track,	½ mile—1:08¾	
SELMA PALEY, trotted	½ mile 1:13¾;	one-eighth—	:17¾
GOLDSMITH LOU	"	¼ mile	:35½
GERTRUDE RIVES	"	¼ mile	:36¾
BILLIE BOYD	"	¼ mile	:38

This includes the entire get of WILBUR LOU.

KINNEY de LOPEZ 2:23,

Son of KINNEY LOU 2:07¾ and BETSY DIRECT by Direct 2:05½

$50 THE SEASON

KINNEY DE LOPEZ is the sire of DON DE LOPEZ, trial one-half as a yearling 1:13¾, one-eighth 17½ seconds; could have trotted in standard time as a yearling. KINNEY DE LOPEZ is certain to sire early speed.

Terms: Cash at time of service with usual return privilege, or money refunded at our option. Excellent pasturage and best of care taken of mares, but no responsibility assumed for accidents or escapes.

The only son of Jay McGregor 2:07¼ on the Pacific Coast, and the only stallion in California whose sire and dam both have records faster than 2:10.

Onward McGregor

TROTTING RECORD (3) 2:23¼.
YEARLING TRIAL QUARTER IN :33.

Bay horse, black points. Height 16 hands, weight 1100 lbs. Licensed Non-Standard, Cert. No. 24.

First dam MARY GORDON 2:09¾ by GORDON 3127 (son of Onward 2:25¼); second dam Nell by Young Octoroon, sire of Shadow (dam of 4 and grandam of Peter the Great 2:07¼. J. Malcolm Forbes 2:08, etc.) Will make a limited season of 20 mares at Pleasanton Driving Park at $35 with usual return privilege. Every mare bred to him this year will be nominated in the Breeders and State Fair Futurities for foals of 1916 and first payment made by his owner. Address for all particulars

BERT WEBSTER, Manager,
Pleasanton, Cal.

BREED TO THE COAST'S CHAMPION CAMPAIGNER AND FUTURITY SIRE

JIM LOGAN 2:01¾

(3) 2:05½, world's record to 1912 and yet the fastest third heat ever paced by stallion of that age; (5) 2:04¼, (6) 2:03¼, (7) 2:02¾, (8) 2:01¾, race record for Pacific Coast.

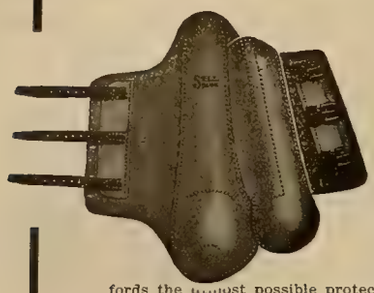
Licensed Pure Bred—Cert. No. 1028.
Registry No. 44997.

All winning race records.

Sire of MAXINE (3) 2:15 Winner Pacing Division Pacific Breeders Futurity 1914

Trial in 2:09, half in 1:01, quarter in :29 as a three-year-old.

Son of CHARLES DERBY 2:20, brother to Klatawah (3) 2:05½, etc., and sire of TEN in 2:10.



Dam, EFFIE LOGAN, California's greatest producer of extreme speed (dam of Jim Logan 2:01¾, Sir Albert S. 2:03¾, and Dan Logan 2:07½, sire of John Malcolm (2) 2:11½, champion two-year-old of 1913), by Durfee 11256; second dam Ripple, by Prompter 2305, sire of the dam of Gratt 2:02¼, etc.; third dam Grace (dam of Daedalion 2:08½, Creole 2:15 and Eagle 2:19½), by Buccaneer 2656, sire of the dams of 2 in 2:10; fourth dam Mary, great broodmare, by Flaxtall.

JIM LOGAN is not only a horse of most acceptable size and pleasing conformation, but is one of the most rugged campaigners ever raced. After acquiring a world's record as a three-year-old he reduced his record every year raced and is a sound horse today—no more eloquent testimony of his genuine natural qualities could be given. Of his very few living foals, every one trained has shown speed in convincing quantity, and the only one to be raced, Maxine (3) 2:15, began her career as a futurity winner. Could you ask more of a well bred horse than that he be a champion campaigner and transmit his qualities to his get?

In the stud, season of 1915, at Woodland Race Track

FEE: $50 for season, with usual return privilege, or $75 to insure living colt. Fees payable at time of service or before removal of mares. Excellent pasture at $5 per month, with best of care for mares, though no responsibility will be assumed for accidents or escapes. Call at race track, or address

THE PROOF 2, 2:29¾

A. T. R. No. 51956
LICENSED PURE BRED CERTIFICATE No. 1029

From the family of Bingen 2:06¼, foremost among present day champions of all ages and gaits.

Son of The Exponent 2:11¾ (by Bingen, dam Iva Dee by Onward 2:25¼), sire of 32 performers including The Temptress 2:08½, 6 three-year-olds, 20 two-year-olds and 1 yearling.

First dam Chord 2:27 (dam of 4) by Wilkes Boy 2:24½, sire of 4 and the dams of 11 in 2:10; second dam Sonata (dam of 3) by Dictator 113, sire of 2 and the dams of 7 in 2:10; third dam Cadenza (dam of 2) by King Rene 1278, sire of the dams of 2 in 2:10; fourth dam Virgie Wilkes (dam of 4) by Geo. Wilkes 2:22, sire of the dams of 16 in 2:10.

In the stud, season of 1915, at Pleasanton Driving Park, at $50 the season with return privilege. We have colts in training to show his qualities as a sire. Grandsons of Bingen are siring champions such as Etawah 2:03½, Anna Bradford (3) 2:00¾, etc. Address for all particulars,

KEEFER & SPENCER, Pleasanton, Cal.

Grandly Bred A Colt Trotter A Proven Sire

Bon McKinney 51480

Cal. State License. Pure Bred No. 1213.

Three-year-old record 2:24½; trial (3) 2:15, 1:05.

Sire of

Bon Courage (2) 2:12¾ **Bon Bell (3) 2:17¾**

Son of BON VOYAGE 2:08 and DAPHNE McKINNEY (dam of Frank N. 2:07¼, etc.), by McKinney 2:11¼; second dam La Moscovita (dam of Bon Guy (3) 2:11¾ and 2 others) by Guy Wilkes 2:15¼; third, fourth and fifth dams also in great brood mare list. Bay horse, in every respect a great individual, with substance, finish, and natural, frictionless trotting action. Very sure foal getter and a steadily rising young sire, his few foals possessing his most excellent qualities to a marked degree. Bon Courage was the only California bred three-year-old to win a heat from Esperanza in 1914.

In the stud, season of 1915, at the Rush & Haile Ranch, Suisun, Cal., season closing August 1st. Fee, $25 with return privilege, payable cash at time of removal of mare. Good pasturage at $2.50 per month. For further particulars address

BEN F. RUSH, Suisun, Cal.

Derbertha Bells

Licensed Pure Bred, Cert. No. 1172.

NO. 60907 A. T. R. RULE 1.

DERBERTHA BELLS, foaled 1911, stands 15.3, weighs 1200 pounds, and is of magnificent conformation, style, trotting action and color; being a solid dark bay or brown with splendid mane and tail, massive well-formed limbs and feet, beautiful neck and head, fine, well set ear and eye as kindly as a fawn's and as courageous as a lion's. His breeding can only be hinted at here as he traces 20 times to Hambletonian 10—5 through Electioneer, 5 through George Wilkes, 4 through Strathmore and 4 through Abdallah 15 (the big four of the sons of Hambletonian), and twice through his daughters. This breeding is perfectly balanced by 18 crosses to Mamb. Chief 11—5 of these through his greatest son Mamb. Patchen 58 (leading progenitor of the dams of trotting sires), backed up by 2 crosses to Pilot Jr. 12, 4 to Black Hawk 5, 4 to Imp. Trustee and crosses to such other famous broodmare sires as American Star, The Moor, A. W. Richmond, Williamson's Belmont, etc.

I challenge any man to name a stallion with a broodmare inheritance approaching that of Derbertha Bells,—5 crosses to Green Mountain Maid (dam of 9 and Electioneer), 3 to Alma Mater (dam of 8 and 7 sires, including Alcyone and Alcantara), and 1 each to Miss Russell (dam of 7, including Maud S. 2:08¾ and 6 sires, including Nutwood), Dolly (dam of 4 and 5 sires, including Director, Onward and Thorndale), Beautiful Bells (dam of 11, including 4 world's champions and 10 sires) and Minnehaha (dam of 8 and 6 sires). These are pre-eminently the greatest mares of history in point of number of descendants in the standard list, besides 2 crosses to Bertha, the only mare with 2 in 2:04½, 5 in 2:10 and 13 in the list. Counting duplicates this pedigree contains the blood of 20 mares with an average of 9 performers each, and of the 14 mares appearing in the pedigree of two or more 2:10 trotters in 1910 this pedigree contains 8.

His disposition and deportment are in perfect harmony with his superlative breeding and conformation, all that could be desired. I own a yearling filly by him that stamps him as a sire of the first rank, and I invite the most critical inspection both of him and his get. He will be allowed a few choice mares at $25.00 the season with usual return privilege. Tabulated pedigree upon request.

J. W. PENDLETON, Owner,
1601 Seminary Ave., OAKLAND, CAL.

Peter The Great

Is the world's foremost progenitor of extreme speed; sire of 30 in 2:10, etc.

HIS SON

PETER McKLYO 3, 2:12 1-2

Cal. State License Pure Bred 2339

will make the season of 1915 in the training stable of James Thompson at the San Jose Driving Park beginning March 15 and ending July 1.

PETER McKLYO (3) 2:12½, the only California-owned son of Peter the Great of an age permitting stud duty, is out of a great-bred young matron by Jay McGregor 2:07¼—Klyo (2) 2:29½; second dam Miss Spears 2:21¾ (dam of 6 including Shakespeare (3) 2:09¾); third dam Medium's Last (dam of 7 including Trampfast (2) 2:14¼); fourth dam Suzanne (dam of 1 and grandam of 10 including Susie J. 2:06½).

This colt is four years old, having obtained his record last season with a very limited amount of work. He came into my hands perfectly green in February, 1914, and developed speed so fast that I had to take his shoes off and jog him for two months barefooted. Being by Peter the Great, the sire of the century, and, as you will notice, out of a daughter of Jay McGregor, another wonderful family of horses, he is one of the best bred young horses in the world and I can truthfully say he is one of the very best individuals that I ever had the pleasure of looking at. He can trot a quarter in 30 seconds, and I am firmly of the opinion that he will trot a mile this fall in 2:06 or better.

Fee, $75 the season with return privilege. Mares pastured at usual rates and accorded best of care, but no responsibility assumed for accidents or escapes. Service fee and pasture bills must be paid before removal of mares. Address for all particulars

L. H. TODHUNTER, Owner, Sacramento, Cal.

JAMES THOMPSON, San Jose Driving Park, San Jose, Cal.

EXPRESSIVE MAC 2:25 1-2

A. T. R No. 41513 Licensed Pure Bred, Cert. No. 1041.

Clara Mac 2:04½ Sire of **Vera Hal 2:05**

Only stallion in California to sire a new 2:05 performer in 1914, and one of three stallions in U. S. to sire two new ones in 2:05 that season.

Also sire of Madam Mac (4) 2:10¼, trial 2:07; Eddy Mac (3) 2:29½, trial 2:13; Nellie Mac, trial 2:18 trotting, good for 2:10 this year, and numerous others with fast trials. In four show classes at Fresno his colts won three firsts, one second.

Son of McKINNEY 2:11¼ and the great brood mare EXPRESSIVE 2:12½ by ELECTIONEER 125. Ideal in color, size and conformation—seal brown, height 16½ hands, weight 1275 pounds. Permanently in the stud at my ranch three miles south of Selma, at $25 the season, usual return privilege, or $35 to insure. Good pasture for mares at $2 per month and best of care given. No responsibility assumed for accidents or escapes. Address for all particulars

J. H. NELSON, Selma, Cal.

WOODLAND STOCK FARM

INCORPORATED

Offers for Service for the Season of 1915

PRINCE ANSEL

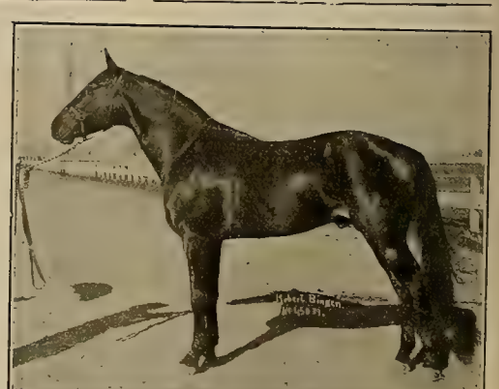
CERT. 1062

2, 2:20½ A. T. R. 29220

Sire of
Prince Lot 2:07¾
Joseph Ansel (3) 2:12¾
Lottie Ansel (2) 2:14¼
Laura Rogers 2:11¼
Adansel (3) 2:14½
Arista Ansel (2) 2:18¼, etc.
And the dams of
John Malcolm (2) 2:11½, etc.

PRINCE ANSEL is not only doing more than any other individual to perpetuate the fame of the great family of Dexter Prince, but he has few rivals in the land as a progenitor of futurity winning youngsters, as attested by the summaries of coast classics year by year. None more highly esteemed by horsemen in general. Fee, $50 with usual return privilege.

ROBERT BINGEN



CERT. 1061

2:11¼ A. T. R. 45033

Best Bred Son of

BINGEN 2:06 1-4

Sire of Uhlan 1:58; 14 in 2:10
First dam Episode 2:18 half sister to Peter the Great 2:07¾
Second dam Santos, dam of Peter the Great 2:07¾, J. Malcolm Forbes 2:08, etc.

ROBERT BINGEN, in every way one of the most desirable horses ever offered for service in California, represents the families whose blood is most eagerly sought by successful breeders today—Bingen and Peter the Great. He is the only son of Bingen standing for service in California and his book is rapidly filling. Fee, $75 by the season.

True Kinney 2:12¼

The best young McKinney stallion in California—a colt trotter and a coming sire. His first foals are among the best on the farm and show for themselves. Terms on application—season limited.

ALL STALLIONS LICENSED PURE BRED

VICTORIES OF PARAMOUNT **PARKER GUNS 1915**

Look, Read, Remember!!!

At the Pinehurst Mid-Winter Handicap Shoot the four contestants making the highest scores in the preliminary event all shot Parker Guns.

RATHER STARTLING, ISN'T IT?

In the main event, the PINEHURST HANDICAP, Mr. S. A. Huntley, although placed further back than any other contestant, scored

95 out of 100 Targets at 23 Yards

and landed the Trophy. Furthermore Mr. Huntley was high over all for the entire tournament, and as usual shot his 34-inch barrel PARKER GUN.

In 1914 Parker Guns won **The Grand American Handicap, The National Championship** at single and double targets, the

FIRST and SECOND YEARLY AVERAGES

and made the best scores on the Pacific Coast.

Follow the pace set by the champions of America and for either single or double target shooting use

Long Tom Parker Guns

For game shooting afield, enhance the pleasure of the day's sport and improve your skill by shooting a small gauge PARKER GUN, pioneer makers of small bores in America. Instructive booklet on small bore guns sent free on request.

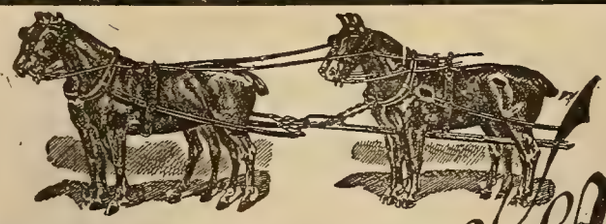
CHIEF BENDER

Chief Bender Endorses TRAPSHOOTING

ASIDE from the recreative aspect of trapshooting, the game has practical value. Chief Bender says in the Public Ledger of Philadelpia, March 21, 1915:

"Trapshooting alone will not make a pitcher, but the quick calculation of the angle of flight of the target, its elevation and the effect of wind in deflecting not only the target, but also the charge, are not without value to a moundsman.

The exercise you get in clay-bird shooting is not violent, yet it is not exactly of the mollycoddle kind, for the handling of a shotgun troughout a 100-bird program, taking the mild pounding of a like repetition of recoil, and the other activities of a half-day at the traps, are just about enough for the average man.



Besides keeping a fellow physically fit, trapshooting has irresistible fascination as a game. This is proved by the hundreds of thousands who regularly shoot at the traps and the representation of every walk of life among the shooters."

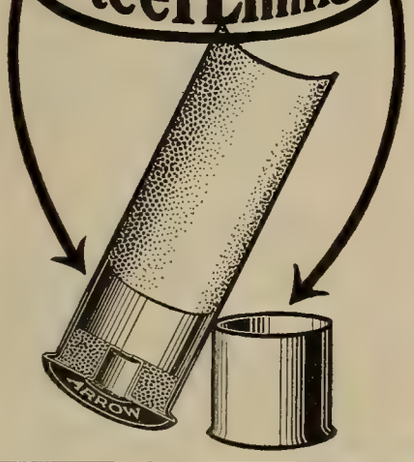
WINCHESTER

"LEADER" AND "REPEATER" FACTORY LOADED SHELLS

What determines superiority? Is it not the greatest achievement in any line of endeavor? If you agree in this definition, you must admit that Winchester Factory Loaded Shells proved their superiority over all others when they made the World's Long Run of 565 Straight—a record that has never been approached. It's all very well to say the *man* did it and that he might have done it with some other shells. There is at least a reasonable doubt about this. The fact remains that no other shells have accomplished it, in the gun of any man. This brings up the question of the fine points of shotgun shells. It is difficult to imagine how any shells can be better than the **W** brand. The greatest resources, the best materials and equipment and the most expert knowledge are utilized in their manufacture; and, to say the least, no more can be claimed for any shells. It's wisdom to use them, that's all. You are then sure you have the best in the market anyway.



W *SHELLS ARE OF PROVEN SUPERIORITY*

W

Here's the Steel Lining

¶ It grips the powder charge and puts all the punch back of the shot.
¶ It gets the load to the target quicker.
¶ It protects gun and shooter.

—AND IT'S FOUND ONLY IN—

Remington UMC Speed Shells

The Remington-UMC Steel Lining is one of those simple but fundamental discoveries that come along now and again, and revolutionize standards all along the line.

Practically every sportsman has seen the Remington-UMC "Speed Shells" at work in his own gun or in that of his shooting partner or his rival, in the field or at the traps.

Why the steel lining acts as it does is partly inherent in the very nature of smokeless powder and its peculiar method of exploding; and partly due to the basic Laws of Motion.

You know how it works out in practice, at traps or in the field—the shot thrown faster, getting quicker to the marks; a shorter lead on your bird; an easier feeling about angles—less guess-work on the quartering bird or the "on-comer."

Whatever make of gun a man shoots, whether a Remington-UMC or some other standard arm, he is more than likely to shoot one or the other of these Remington-UMC Shells—the "Arrow" or the "Nitro Club" (or in the black powder, the old reliable "New Club").

Many a dealer sells nothing else in Shot Shells—has no demand for anything else.

Highland Squirrel King

Pacific Coast's Premier Sire of Gaited Saddle Horses

SAN JACINTO SIRE OF **HIGHLAND LUCIA**

Winner Futurity No. 1, 1913, P.C.G.S.H.A. Winner Junior Championship and Sweepstakes, Cal. State Fair 1914.

Winner Futurity No. 2, 1914, P.C.G.S.H.A. First in 3-yro. Mare and All Age Mare Combination Classes, State Fair, 1914.

EDITH ADAMS

Thirteen firsts in thirteen shows, 1914, including Grand Championship, three gaited saddlers.

AND NUMEROUS OTHER PRIZE WINNING THREE AND FIVE GAITED SADDLE HORSES.

The Farm's Brood Mares

include such well known individuals as Thelma H. by Gloster Denmark; Levia (from the famous Castleman Farm in Kentucky) by Blue Grass Hambletonian; Lizzie Cromwell (dam of The Moor, sold for $7,500) by Harrison Chief, being the famous show mare bred and exhibited by Gen. J. B. Castleman, winner at Madison Square Garden and other great shows; Leonora (dam of San Jacinto, winner of the first saddle horse futurity) by Dick Taylor; The Matron (best obtainable type of the saddle horse brood mare) by Wilson's King, and others of a similar degree of excellence.

Here are some of our recent importations from Missouri:

King of the Highlands, chestnut stallion (7) by Judge Collins, dam Flora W. by Greatland; a magnificent type, 16 hands, 1200 pounds, wonderful in action for both carriage and lightness of gait.

Jurist, red chestnut colt (3) by Bourbon's Best, dam by Chester Dare; all style and action, pleasing in every way.

Confidence, chestnut gelding (4) by Rex Chief A., dam by Charles Reade. Rex Chief A. is the sire of Lee Chief, Missouri's champion junior mare, 1914, recently sold for $2,500, and Confidence lacks in no way in the general quality that won Lee Chief her fame.

Helen Idlewood, black mare (7), one of the best daughters of Rex McDonald; can trot or singlefoot better than a three-minute gait and was a good prize winner last year in select company.

Roya McDonald, a five-year-old daughter of Rex McDonald; a grand mare in every way.

Comedian (3) by Rex McDonald; a good winner in 1914, two-year-old stallion classes.

Tourist Peavine, a grandly bred yearling colt, a coming champion from champion families.

LOVERS OF THE SADDLE HORSE

are cordially invited to visit Sierra Vista Stock Farm, whether on a buying trip or merely sightseeing. They will be welcomed at all times and will find the journey well worth while. We have for sale at all times grand individuals of all ages and sexes, competently broken and trained, faultless in manners and disposition, suitable for park and show ring. Correspondence is solicited from interested parties.

YOU CAN'T CUT OUT A BOG SPAVIN or THOROUGHPIN

BUT YOU CAN REDUCE THEM WITH

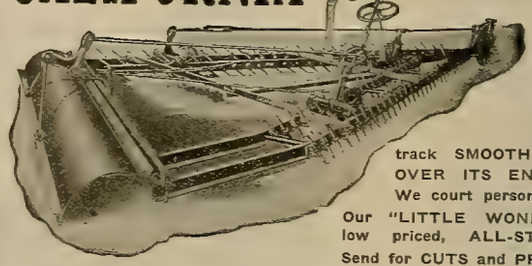
ABSORBINE

without laying up your horse. Does not blister or remove the hair.

ABSORBINE penetrates quickly and is healing, cooling and soothing—strengthens and invigorates tired, lame muscles and tendons—allays pain and inflammation—reduces soreness and lameness.

ABSORBINE is purely herbal, and safe to use anywhere. In addition to being an effective liniment, it is a powerful antiseptic and germicide. Therefore, **ABSORBINE** applied to a sore or wound, kills the germs, makes the wound aseptically clean and promotes rapid healing. Effective in Poll Evil, Quitter, Sores, lacerations, Bruises, Cuts or Speed Cracks.

Mr. Fred White, Box 676, Payne, Ohio, writes: "I purchased a bottle of your **ABSORBINE** and used it as you directed. The puff all disappeared before I had the bottle quite all used up."



SEND FOR FREE HORSE BOOK F

which gives valuable information about the care of horses and cattle. It is well worth having and is yours for the asking without expense or obligation.

Workouts begin next week at the P.-P. I. E. track.

◈◈◈

Extend the glad hand to the new association at maha, as it ought to prove a winner from the first ore.

◈◈◈

Will DeRyder worked Dicto and Spriggan Saturday orning for the edification of Messrs. J. F. Dunne, eorge Lowery and Dan Chapman, the pacer going e route in 2:10½ and the trotter in 2:13½, nicely.

◈◈◈

A. Edstrom of Fruitvale joined the railbirds at leasanton Saturday and watched the numerous orkouts, including that of his own Star Pointer—weet Hallie pacer, Hallie's Star 2:24¾, the lad orking several nice miles for Bert Webster with e fastest one in 2:21, last half in 1:06½.

◈◈◈

Thomas E. Newton, vice-president of the Detroit riving Club and owner of Thistle Patch and Grand Marshal, leaves on May 1 for San Francisco, via the anal. With Mrs. Newton he expects to enjoy the air and see the races there in the early part of une.—Trotter and Pacer.

◈◈◈

Mary Gordon 2:09¾ (dam of Onward McGregor 3) 2:23½) foaled on Wednesday of last week a fine illy by Vernon McKinney 2:01½ and will be bred ack to that good sire. There is a standing offer of 250 for this foal, made some months back, but Owner Colomb simply wears a smile and keeps going.

◈◈◈

Jim McGuire, who has but one "wing" but nevertheless can pilot a pacer as well as the next one, s putting San Jacinto 2:05½ in shape at Riverside or the big pacing stakes here at the exposition, and he wireless reports concerning the speed the pair are making are highly flattering.

◈◈◈

George Ramage with the green trotting mare Clara Mills by Lecco 2:09¾, dam by Sidney Dillon; Budd Davis with May Davis 2:08¼ by Borado, and H. E. Armstrong with Hal J. 2:09½ by Hal B. 2:04¼, and The Empress 2:16 by Stellwell, shipped from Pleasanton some days ago for West Liberty, Iowa, to get ready for the Cedar Valley Circuit, which opens June first. This bunch will levy some assessments on the secretaries this summer unless something goes radically wrong.

◈◈◈

Mr. Joseph Errington purchased two mares at the DeRyder sale last December, one Grace Nutkin by Jonesie Mac, dam Lady Rhea 2:26½ by Iran Alto, and the other a daughter of Searchlight. Both were bred in 1914 but neither were thought by Mr. Errington to be with foal when purchased. By a peculiar coincidence both were carrying a colt and both foaled the same day last week, Grace Nutkin to Onward McGregor (3) 2:23¼ and the Searchlight mare to Vernon McKinney 2:01½.

◈◈◈

J. W. Kinnucan of Santa Rosa reports the recent arrival of two fine foals by Guy Carlton 2:30, full brother to Guy Borden 2:07¼. One is a filly foaled April 15 out of Sonoma K. by Don Sonoma, grandam a result of the Electioneer-thoroughbred cross, and the other is a colt out of Jennie McGregor by Gossiper 2:14¾, sire of the dams of Zolock 2:05¼, Zephyr 2:07¼, etc., grandam by General Dana, great grandam by General McClellan, sire of the dam of Mack Mack 2:08.

Horsemen at Hanford staged a nice matinee card on Sunday afternoon, April 18, a pacing race with the best time 2:25, a trot won in 2:40, and a half mile heat race for colts in which the winning youngster made his best circuit in 1:25. Everything went smoothly and a good crowd was on hand to enjoy the occasion.

◈◈◈

A. Ottinger and Hugh Boyle of the San Francisco Driving Club "dropped in" at Pleasanton Driving Park early Saturday morning, Hugh to see his mare Ida M. 2:14 and "Ot" to ride some nice miles from 2:10½ to 2:20 behind the various members of his string that Al Schwartz is fitting for the season's campaign.

◈◈◈

Visiting horsemen or members of the "resident colonies" who have a preference for the great Sell line of boots, harness, and horse goods in general will find everything their requirements demand at the establishment of J. David West, 1265-1267 Golden Gate avenue, this city. "Everything for the horse" is the motto lived up to by Mr. West.

◈◈◈

Don't overlook that ten dollar payment due today on yearlings named in Stake No. 14 of the P. C. T. H. B. A., and remember also that a few substitutions—for which this is the last call—are available. Payments made or substitutions claimed bearing postmarks prior to noon Monday are legal under the rules.

◈◈◈

Joe MacGregor, p. 2:14½, is now owned in the east. He was purchased last week by Mr. Crowston, of Markdale, from Vance Overland, of Orangeville. Joe was campaigned very successfully through Western Canada in 1913 by Jim Stewart, the trainer and driver of Homer Mac 2:06¼. Joe has been a hard luck horse all his life, and while he has been a mile in 2:07 something always turned up to keep him from the races.—Canadian Sportsman.

◈◈◈

The R. S. Irvine mares recently brought to Pleasanton with the Lanark Park training string by Mr. Henry have lately been stinted to stallions in service at Pleasanton Driving Park. Bloom by Nushagak, grandam Redflower by Mayflower, has been served by Keefer & Spencer's son of The Exponent, The Proof (2) 2:29¾, and Beretta 2:22½, the full sister to C. The Limit 2:03¼, has been mated to Joe Patchen II 2:03¼. Both crosses ought to be productive of speed in generous quantities.

◈◈◈

The park commissioners put four inches of top dressing on the track at the Stadium in Golden Gate Park during the winter and the local teamsters who have quarters in the McKinney and Park Amateur stables are beginning to ride some nice miles. Hugh Boyle has worked Edith Light in 2:16, with a half in 1:06, and Zorankin, for which he paid all of one hundred bucks in December, has been a lap and a third in 2:21, 1:05½, :30¼. Vera Hal 2:05, who starts today at Dixon, worked before leaving home in 2:16 with halves in 1:02 for Harold Cohen, and Doc Martin has had a ride in 2:22, half in 1:05½, with the pacing filly Greatness. Muggins and Matawan have carried Frank Burton and Hans Frellson over the route in 2:19, and Brutus, Pointer Belle and Silkworthy are all working from 2:20 to 2:22. Bodaker, S. Christenson's "old reliable," came in early in the week from the Suisun Stock Farm and will be gotten ready for another round with the fun horses.

◈◈◈

The K. T. H. B. A. directors met last Monday, and placed the program for the 1915 meeting in the hands of Ed A. Tipton. While it is sure that the progressive spirit that pervades his actions generally will cause many innovations, the one of the most material benefit will be a great reduction in the initial payment of the fixed events. Where usually this payment has been 1 per cent, it is almost an assured fact that this year it will only be one-fourth of 1 per cent. Last year in the two-year-old Lexington stake the first payment was $20, whereas this year it will only be $5. This plan will enable an owner with two or more good colts to enter them all, and have time to sample them before any heavy payment falls due. It is well known to trainers that it is not always the colt that shows best early that is the best in midsummer, so this will preclude the mistake that is so often made, of leaving out the best one because it was a little slow coming to its speed.—Horseman.

◈◈◈

S. Christenson of this city had a generous addition to his holdings in horseflesh during the month of April, by reason of the arrival of two well-bred foals. The first one to arrive was a brown colt by The Bondsman out of the old queen of the Speedway, Reina Directum 2:12½ by Rey Direct 2:10, grandam Stemwinder 2:31 (dam of Directum 2:05¼, etc.) by Venture 320, and in honor of the fact that his appearance was made on April 8, the birth anniversary of the King of Belgium, he has been christened King Albert. "Chris" claims that if the lad is as game a trotter as King Albert is as a man, he will be perfectly satisfied. The other one is a bay colt, also by The Bondsman, foaled April 16, out of Sandriana by Lynwood W. 2:20½, grandam Perza (dam of June Pointer 2:10¼, etc.) by Allie Wilkes 2:15, grandam the great brood mare Anglia by George Wilkes. Reina Directum has been booked to Mahomet Watts 2:08¼, and Sandriana to L. H. Todhunter's good young son of Peter the Great 2:07¼, Peter McKlyo (3) 2:12½.

A WORD TO EXPOSITION ENTRANTS.

The track and stables at the P.-P. I. E. are now in readiness for the proper care of horses in training, and horsemen who have entries at the June meeting are invited to take up quarters there as soon as they desire, with the assurances from the exposition people of the very best treatment in every way, good stables, good water, good feed and a good track to continue making speed over.

There will be no charge for stalls during the meeting for entered horses, or for such horses arriving not to exceed fifteen days in advance of the meeting. Otherwise, stall rent is $2.50 per month or fractional parts thereof. Stall reservations should be made at once or at least well in advance of shipping, and in case of an unexpected number of reservations being made for non-entered horses and the stabling capacity being insufficient to accommodate all comers, preference will, of course, be given entered horses. Such a contingency is hardly probable, as there are generous accommodations, but it is suggested that locally owned, non-entered horses that do not ship east immediately after the meeting be left in their regular quarters insofar as is practicable.

Horses shipping in on any route will be spotted for unloading right at the exposition grounds at a slight excess charge for terminal handling, the yards at the livestock department being right at the barns, so no roading through the city is necessary. Owners, trainers and caretakers regularly employed will be accorded regular admission privileges, and excellent facilities for board are afforded within the grounds, right at the track. Comfortable, well ventilated sleeping quarters, unfurnished, are available in every barn immediately adjacent to one's stalls.

The water is excellent, the feed the best obtainable and properly priced, everything possible has been done to guard the health and comfort of both man and horse, and the polo contingent have been warm in their praise of the plant from all viewpoints. A blacksmith shop is conveniently located inside the livestock colony, manned by D. D. Hanks and competent track smiths, both Mr. Hanks and his first assistant, Jack Tolliver, being well known to coast horsemen.

Recent visitors to the track which W. P. Maxwell has completed after almost every kind of adverse circumstance that could make an appearance had been overcome, are finding high favor with it and express the opinion that the footing will prove both safe and fast. Water, men and teams, with the proper appliances, are at hand, and Mr. Maxwell guarantees that the work of keeping up the track will be performed daily and competently — which means that horsemen will have no complaint to make on that score. A number of stables are due in a day or so, and from now on the fun will be fast and furious.

Come when you wish — IT'S READY.

Will Ivey made the move to the track at Woodland when the Silva horses left Sacramento, so there are more horses in training at the Considine plant than for some seasons.

◈◈◈

Will Duncan of Colusa was a visitor at Pleasanton Saturday, coming down to see Millard Sanders work his big chestnut pacer William G. by Clarence Wilkes 2:28¼, dam Wax by Senator Boggs, sire of George Woodward 2:07½. The lad is coming along nicely and Mr. Duncan went home well pleased.

◈◈◈

A well attended meeting of the San Francisco Driving Club was held Tuesday evening at Mission Hall, the principal object of the gathering being to consider ways and means of arranging joint matinees with the members of the California Driving Club throughout the season at the P.-P. I. E. track. It was the sentiment of all present that every effort be made to reconcile the differences between the two clubs, and a committee of five was appointed to confer with the representatives of the other organization with this end in view. The directors of the California Club met Thursday night, and before many days roll around it is quite probable that plans acceptable to all parties will have been drawn to govern this season's sport, in which all will participate—which is right, proper, and most welcome.

◈◈◈

Russell Gray, the colored trainer at Hanford who had a good deal to do with the making of last season's pacing queen, Clara Mac 2:04½, has about the largest stable in training at the Kings County Fair Grounds and the railbirds are according them a whole lot of respect. Russell's favorite pacer, Harry Mac, is by Expressive Mac 2:25½, out of a mare by Sidney Arnett, grandam by Dictator, and is making speed like another Clara Mac, as in mid-April he traveled two laps on the Hanford oval in 2:23, the last half in 1:04, stepping the first quarter of the last half in :30, then easing up around the turn and coming the final eighth in :15. A little bay pacer by Robert Lee is also coming on fast, as he has negotiated a mile in 2:21, with the half in 1:09. King Policy, the chestnut trotter by Best Policy, looks like a real trot horse and has worked in 2:23, 1:08. Ira Mac, by Expressive Mac, has gone the route in 2:29 with the final eighth in :17, and another trotter in the stable, a snappy little fellow by Robert Direct, has trialed in the same notch. In all, Russell has nine head in training, all looking good and making speed regularly, so that he looks forward to racing a bit this season when the time rolls around.

On the Fence at Pleasanton

While the Pleasanton colony has had a number of rather cool days of late there has been nothing of a nature that would interfere with the successful manufacture of speed, and in reality the brand of weather dealt them by the dispenser of sunshine and shadow has been beneficial in this respect—the conditions have been very similar to those that exist here at the Golden Gate where they will have to race, and the more nearly identical the atmospheric conditions of the two points are, the better the horses will stand the change to the seaside.

Practically every day is workout day except Sunday, and there is always something going on for the numerous visitors to enjoy. The track has been in fine shape at all times, faster probably than at any time in its history owing to the constant attention that is accorded it, and there is no track in the land where there is so much speed on tap at this season. Los Angeles trotters and pacers may be traveling equally as fast—or perhaps faster if some of the wireless reports are to be relied upon—but there are not so many of them in the city of the angels as there are at the old reliable speed nursery in the Livermore valley. The Angelenos, for the most part, are due to arrive at the exposition track here in the city tomorrow or Monday, and while a number of the Pleasanton trainers will follow them quickly the greater portion of them are reluctant to pull up stakes and "leave their happy home" until a bit later in the month.

Peter McCormick 2:08¾ holds the season record at Pleasanton for either gait, with a recent mile in 2:08½, instead of 2:08¾ as reported in last week's paper. Mr. Shuler decided that both he and Peter had a plentiful supply of miles from 2:11 to 2:15 under their belt, and, with Gen. C. C. Watts and a number of other visitors "on the rail," let the big son of Peter the Great go up to the half in 1:05, well out from the pole as usual. They both liked it so well that they decided to trot the next quarter, stepping it in :30¾, and from there home Shuler was constantly talking the horse back and they went under the wire in a jog. Peter's hind pasterns are better than at any time in the last two years, and if he stands up on them he is a real trotter for his class. John Gwynne, Shuler's California purchase, has gone the route in 2:14½, 1:06, :31½ and is sufficiently well thought of to be provided with some eastern engagements.

Next to the McCormick horse, Maymack is the boss of the barnyard among the trotters, having had one workout in 2:10, and the world's champion three-heat mare has every indication of being faster than ever before. Age and the right kind of treatment have served to mellow her disposition and improve her manners, though she is yet, and always will be, an "individualist" of the extreme type. She is one of the original "queer geniuses" of the world among her kind, but, queer or not queer, if she hits the right track and the right company on the right day in 1915, Volume 31 of the Year Book will continue her name among performers with reduced records. DeRyder has had a couple of other rides in the 2:10 notch, one behind Zomblack, who is standing up fine under his work at the pace, and the other behind Joe Patchen II. Vernon McKinney is knocking at the same door, having gone the route in 2:11, and Miss Perfection, probably his entry for the big trot, is working like a clock. In company with Marvin Child's pacer, Jim Hill, she had a nice work Saturday, stepping her fastest mile in 2:13, :31, :15, and her behavior is just about right. Anvilite took the circuit in 2:24 and continues to loom as one of the best two-year-old trotters seen on the coast in a month of Sundays. S. Christenson was among Saturday's flock of railbirds and was pleased mightily with the performance of Sis Bodaker, DeRyder's green trotting filly by Bodaker 2:13, Chris' favorite warrior. Sis is not entered this year and Charley is merely sampling her for future stake material, but she worked a mighty nice mile with Pedlar Direct, Mr. A. W. Longley's Baron Direct pacer in Bert Webster's stable, in 2:17½, 1:06½, :32.

Railey Macey and his assistants are giving the International Farm's string some pretty fair work now, generally working in pairs. About all the aged members of the stable have had miles in 2:15 or perilously close to that figure, and the youngsters are showing a good deal of sizzle in their brushes. Electric Patch, the four-year-old trotter, is one of the favorites with the railbirds, and the whole bunch have good heads and clean gait. Macey will have them ripe by June and isn't worrying about the turns at the exposition track, as he hasn't a knee knocker in the lot.

Barney Barnes is traveling around fifteen with both Strathtell and College Gent and the fact that some of the horses he is entered against are working a bit faster than he is at present bothers him not a whit. Both the big black fellow and the rugged bay lad are tough nuts and have their speed with them most of the time, so they will be ready. Will Fleming's Canadians are going along about the same and have stood the change from Winnipeg very nicely. With one exception they are a nice mannered lot—The Badger. This boy has a "leaning" for the variety stage that evidences itself on occasions, but Fleming will eventually get him smoothed out in this respect. He has plenty of whizz, and Barney, who raced him a bit last year, is authority for the statement that he can "go both ends of the mile" without showing any strain of hound in his pedigree.

Grattan Boy's appearance continues to improve and while Harry Bell has not yet forsaken a comfortable cart to hitch to a sulky, he has gone the route in 2:15, 1:05, :31, and will be named in the big trots when they close June first unless something unusual happens to him. He is tough as a green hide or he would never have survived some of his former deals in any kind of shape. His last owners "bought him to race" and didn't fall much short of living up to their purpose, as in one week on the ice in the winter of 1913-14 he started in nineteen heats, which is "racing some."

Ed Parker's three-year-old trotter Tango has paired Grattan Boy in a number of miles, though not in the Boy's heat in 2:15. Last week the pair took on one mile in 2:25 with the half in 1:08, and then went a little deeper into the speed keg for a shot in 2:17½, 1:06, :31¾. In another mile Tango traveled the latter half in 1:04¼, :31¼ and hasn't done anything yet to cause the railbirds to alter the good opinion they had of him all season. Ed is also working Charley McCarty's Nutwood Wilkes trotter, George Hammett, that worked this track last year below 2:09, and has been the route recently with him in 2:18¼ with a half in five, while with the two-year-old Bon McKinney trotter owned by Geo. Barber of Milpitas he has been a quarter in :39¼.

Homer Rutherford has been a mile in 2:12 with Colleen, the Charley D.—Cricket mare, with a half in 1:02 and a quarter in :30. He is trying a new rig on her in the way of a bit recently devised by A. F. Ruthven, and she acted very nicely with it the first time out. It is ingenious and simple, not cumbersome, and admits of quite a bit of leeway in its rigging according to the individual requirements of the horse upon which it is in use, and will be given a tryout by other local trainers. The "bunch" have tied a name to it of their own devising—"Ruthven's Alligator Derrick"—but its officially registered identity is "Ruthven's Panama Controller" and patent has been applied for. George N. Patterson, the three-year-old trotter, has been in 2:14½, 1:05¼, :30¾, and the yearling colt by The Bondsman, Sequoia, out of the same mare, trotted an eighth in :20 before being sent home to grow into a real horse.

With the departure of George Ramage for a campaign in the Mississippi valley country, Al McDonald fell heir to S. B. Wright's sister to Sonoma Girl 2:04¼, Grace Fowler, and has made the circuit with her in 2:27¼ with a quarter in :34 at the trot. Al's pacer by The Bondsman has also been in about the same notch, and the trotter Bert Kelley is taking his work like he would stand up and race. He has had no fast miles, one heat in 2:24 being about his best effort to date, but he has negotiated a half in 1:09 and brushed a quarter in :31, so that he has the speed that made him look formidable before the hoodoo man got in his work on him.

Frank Goulart of Decoto is one of the new arrivals at the local track, coming up a few days ago with J. C. Simpson 2:12½ by San Meto 2:13¼ (sire of Abe J. 2:10, sire of William (4) 2:00), dam Babbie (dam of Virginia Todd (3) 2:25¼) by Cadet, and the green pacers DeCoto Boy and a gelding by Aerolite 2:06¼ out of Cricket 2:10. They have been well wintered and jogged and are making speed pretty regularly, though not entered in the early events. G. P. Machado, who is giving the prep to the horses of President George Giannini of the San Francisco Driving Club, will evidently have them ready for the word, as Graham Bellini is up to a mile in 2:16, and one of Saturday's best workouts was that of Bradmont in 2:11½. He is a much improved horse over last season, as he is eating better and carrying more flesh; it might be a good thing to remember, too, that this son of Alto Leyburn has no winrace record. Ella M. R. (2) 2:16¾ accumulated a good deal of real fat during her long let up and it has been slow in coming off. She has been let down carefully and has had enough brushing to show that she retains her speed as of yore, and has gone the full route in 2:20.

Millard Sanders has a nice pupil in the big chestnut pacer William G. by Clarence Wilkes, owned by Will Duncan of Colusa. Duncan wintered him at Sacramento and sent him to Sanders a few weeks ago, since when he has worked in 2:18, with a half Saturday in 1:03½ and the final quarter in :31. He is a big-gaited, free legged fellow and by fall has a chance to become a very fast horse. Fleeta Dillon has traveled in 2:10 for Sanders free legged, and it was something of a surprise to see her sporting a pair of panties of the Indiana variety. She evidently feels the unaccustomed underwear a bit, as she has the brand on her now just the same as ordinary folks. W. E. Detels' Nutwood Wilkes mare, on which Harry Doty worked a decided improvement before she went to Sanders, is up to a mile in 2:15, while Peter Howard's young trotter has traveled in the same notch, with a quarter in :31.

Keefer & Spencer have three trotters that are demanding considerable respect from the railbirds, all due to start in June—The Proof, Bonnie Ansel and The Expense. The son of The Exponent worked Saturday to a seventy-pound cart in 2:12, 2:13¾ and 2:14, finishing the latter portion of the first two miles at a merry clip, going away the first quarter of the final one in :32 and up to the half in 1:07½, acting nicely at all portions of every mile and responding well to Charley's lessons in rating. The big Prince Ansel mare wound up her Friday's lesson with three miles in 2:12¾, 2:15, 2:16, and The Expense trotted in 2:29¾, repeating in 2:31 with the last half in 1:11. Other members of the stable are working well, also, and Nick Hauberlach's husky Alcona Wilkes pacer has turned the trick in 2:18¼.

Will DeRyder has his outfit pretty well keyed up and can show considerable speed for the railbirds. Dicto, last season's matinee pacer here at the Stadium, tramped a mile Saturday in 2:10½ with the last quarter in :31, and Spriggan, the Baron McKinney—Helen Simmons trotter, turned the full distance nicely in 2:13½, breezing through the stretch in :31¾. Asa Pointer is "picking it up" every week, his last lesson being in 2:12½, last quarter in :30, and the Demonio pacer, Ben R., has gone the route a second slower, with the last end in the same rate. Will likes the J. Malcolm Forbes—Allie Payne two-year-old trotter very much indeed, though he has not yet commenced "juning" him any, of course, and the J. O. Johnston Copa de Oro 2:01 three-year-old has pulled him a mile to cart in 2:25, with the half in 1:09.

Al Ruthven threatens to be right there or thereabouts when they cut the money in the 2:06 pace and other events both east and west, and if his pair of pacers keep on coming like they are at present someone is going to have to travel "right peart" (as they say in Missouri) to keep Al's threat from being made good. Walnut Grove is pacing around 2:11, with halves in 1:03¾ and quarters in :31, and Rose Equity apparently lost no speed by reason of her rest, as she has tripped the light fantastic at Pleasanton in 2:12½, 1:04¼, :30½. The Constantine horse has in previous seasons had a bit of trouble with one front leg but is taking his work so far as sound as a nut, and if he continues to remain this way he will command attention in almost any company. Miss Johnson, the old original meal ticket, has had a few miles around 2:20, with halves in 1:06, and the three-year-old pacer G. C. W. has a mile to his credit in 2:28, 1:11½. Little Grove, the two-year-old trotter, is doing 2:30, with halves in 1:13, quarters in :36, and Grover E., the yearling by Walnut Grove—Rose Equity, is trotting so far instead of pacing, as would naturally be expected.

Henry Smith, in preparation for the May Day program at Dixon, tried out a number of his stable on the half-mile track Saturday, one of the nicest performances being that of Future Tramp, who tramped a half on the trot in 1:06½. The balance of the Dixon entries all work the two-lap very well and Henry is doubtless adding largely to the gaiety of the occasion at the valley town today.

Frank and Marvin Childs are pairing O. U. C. and Hal Boy in their work and the pacers are knocking at the door of the 2:10 list right along, with plenty of miles in 2:11 or a bit slower, with brushes occasionally at a two-minute shot. Frank hasn't let Bon Guy down very far as yet but the lad is working nicely, and the chestnut mare from Arizona, Loe Blossom, continues to make Frank think he will have a look-in at some of the money in the big stake. She is working smoothly around 2:12 at present and looks fine.

Marvin's pacers are all working not far from ten, Imbro having set the pattern with a circuit in 2:10½, 1:03½, :31, with Jim Hill crowding him for the season's stable record with a mile in 2:11¾, 1:03, :30½. Lizzie Dillon has come fast and steadily and has yanked Marvin over the course in 2:12, 1:02½, :30, and Sirius Pointer has paraded in 2:13, with a half in 1:03 and a quarter in :31. Major By By has not been asked for any great amount of speed yet, but the Montana trotters, R. C. H. and Blue Finch, are crowding the 2:15 mark, with quarters at a 2:08 gait or better, and both look to be the makings of real good race horses. The "miracle trotter" of the stable right now, however, is the ten-year-old Nebraska gelding Tom Smith, given up as a practically hopeless case a year or so ago and apparently well along the road to soundness by virtue of the use of a formula of Mr. Childs, Senior's, devising. The old fellow has the steam of a pacer in his brushes and on Saturday worked for Marvin in 2:13, 1:04½, :31½. He is entered in the twelve trot at the exposition and if he stands up till June first may possibly be named in the big stake.

Bert Webster is riding some pleasant miles behind various members of his stable, the fastest one being negotiated by the yearling champion, Frank Perry. This boy with the hard luck history worked last week in 2:13½, half in 1:03½, repeating in 2:13 with the half in 1:01½. Madam Mac, the Expressive Mac five-year-old that achieved a losing performance tag of 2:10¼ at Detroit last season, has also circled the big oval in 2:13½, half in 1:05, and Pedlar Direct has paced in 2:17½, 1:06. The trotter California B. has worked in 2:17, half in 1:04½ on the big track, and has made it once around on the small one in 1:05½, being given that tryout just to see how he took to the short turns. He evidently liked 'em. Bert's young stake pacers are oil in de can, apparently, as the two-year-old Fresno Bond by The Bondsman—Fresno Girl is showing in 2:34, 1:11, :32, while Rodney Patchen, a year older, by Joe Patchen II—Miss Harris, has "turned a furrow" in 2:22 with the

.lf in eight. The two-year-old Vernon McKinney—
·ssie M. gelding, purchased some time since by
W. Longley from H. E. Armstrong, has not yet
·en ironed off in front, but has gone quarters in
rty seconds.

With but few exceptions, the horses in the stable
Al Schwartz are beating 2:15 and doing it nicely.
s usual, Mr. Ottinger spent Saturday at Pleasanton
id he and Al worked Dick W. and Zulu Belle a
ımber of heats, the fastest one in 2:10½, 1:05,
)0½. Copper the Ore made the circuit at the trot
. 2:18, and the admiral of the "Big Three" line
loted Agnes Carter a very pleasing mile in 2:16½.
t. Patrick, with whom Jimmy Ryan plans to grab
›me of the matinee trots, is moving along around
›eventeen, and Al has just split the difference be-
›veen ten and twenty with his own trotting mare
.iss San Francisco, formerly Soreta, with a half in
:05½ and a quarter in 32 seconds. Baby Gommet,
›e Prince McKinney—Arawanna B. pacer owned by
'. Gommet of this city, is also working in 2:15, with
›alves in 1:03½ and quarters in :31, and the pacers
[omburg Belle and William Tell are working in
›airteen, four and thirty-one. As Al's horses are all
›cally owned he will move down to the exposition
:ack early in the coming week, so the owners can
›njoy watching them work and some of them can
›in in the training.

Sutherland & Chadbourne have plenty of work
head of them at the exposition as almost all of
heir owners were generous patrons of the entry
st, but the writer missed connection with the de-
·ails of the stable's work. Quite a number of brisk
rushes were noticed, however, by both the trotters
nd pacers, and this combination will have to be
gured with on the money cutting unless there are
ome phenoms that have been overlooked in some of
he classes. They have some pacing timber about
's "good as the next one's," and their trotters have
.one of them been strung to the limit by several
econds.

There is a pair of faces at Pleasanton, recently
.rrived, that have a "familiar" appearance at a
light distance, closer investigation revealing them
›o be the countenances of none other than Charles
A. Durfee and English Jack, survivors of many a
tard fought battle. Charley "took the pledge" last
all after he sold Zulu Belle, and a winter's idleness
aused him to take two other things—fifteen pounds
›f excess meat and a high class case of fidgets. A
ew days ago Jack warmed him up and he jogged
›retty sound so the pair went to Pleasanton and
Charley hung out his sign. The excess around the
vaist is about gone and Durfee Senior feels much
nore at home back in the accustomed harness. He
lready has a pair of entrants for the big stakes,
Wm. T. Sesnon's big Zombro gelding San Felipe
:09¼ for the 2:10 trot and Twinkling Dan 2:06¼,
›wned by Gen. C. C. Watts, for the 2:06 pace, both
›f which are working nicely. The Dan Patch horse
has not yet been let down fast, but on Saturday San
Felipe got a healthy work, his fastest mile being in
2:14, with the half in 1:03½ and the quarter in :31.
Mr. Durfee also has the matinee trotter Horseshoe
Boy, owned by A. S. Hanks, the Oakland farrier, and
›efore the season is well along will probably have
all the horses he needs to keep him in trim. So far
as keeping the horses in trim—just leave that to
him, and Jack.

"JUST ONE MARE."

So many times small breeders are heard to say: "Oh, well, what's the use? I have two or three mares that I breed, but what chance have I with fellows like so-and-so, with a whole bunch of mares?" The fact is that any number of the best performers at both gaits have been the result of the operations of the "small breeder," and under the above caption our old friend Columbus, of the Horse Review, cites some remarkable examples of the success achieved by owners of but one mare in a limited section, as follows:

Yes, "Just one mare"! One brood mare, providing she is high-class, is sufficient to bring fame, and even a degree of prosperity, to any breeder of light harness horses. The very fact that men owning but one good mare have achieved success not obtained by other men owning a large number of brood mares, should of itself be sufficient encouragement to the so-called small breeder of trotters to continue his efforts. When judiciously mated, the one mare usually brings success. Confining our remarks to trotters bred in what is commonly referred to as the Missouri Valley country, or that section with which we are most familiar, we wish to present the results obtained by owners of "just one mare."

It is universally conceded that Dudie Archdale 2:03¼, during her turf career, was the most perfect race trotter that has so far been produced by any breeder of light harness horses, and yet this superior race mare was bred by G. S. Harris, at that time residing at Hooper, Neb., who owned but the one mare, Dudie Egmont 2:13¾, by Egmont Chief 2:24¼.

The beautiful and very successful trotting mare, Penisa Maid 2:04¼, the sensation of 1909, and the fastest race trotter yet bred in Iowa, was bred by Wilson Mettler, of Charles City, Ia., who assures us that he owned but the one mare, Seneca Maid 2:20, dam of Penisa Maid, at the time the latter mare was bred and foaled.

Snyder McGregor 2:05¼, holder with Oro 2:05¼ of the Kansas state record for native-bred trotters, was bred by Cale Osborne, of Frankfort, Kan., owner of but the one mare, Mag Osborne, by Mambrino George 2:30. Snyder McGregor, judging by his performance in the Transylvania of 1904, when he finished five times third to Sweee Marie and Tiverton, was the most sensational trotter yet bred in Kansas.

Tempus Fugit 2:07¼, fastest trotting gelding yet bred in Nebraska, was bred by W. O. Wheedon, of Lincoln, who owned at the time but the one mare, Altamont, by Almont Aberdeen 2:22½. Tempus Fugit was one of the successful race trotters of 1907.

Tommy Horn 2:04½, holder with Etawah of the race record for a fourth heat, and holder of the seventh-heat race record, was bred by J. A. Osner of Denver, Colo., owner at the time of only the mare Altrene, by Athol Wilkes, p., 2:12½. Tommy Horn, by a wide margin, is the fastest trotter yet bred in Colorado.

Walter E. 2:10, the first Missouri-bred 2:10 trotter, and one of the greatest race trotters ever bred in the Missouri Valley, was bred by William Taylor, of Maitland, whose only brood mare at the time was Old Morgan, dam of Walter E.

Right Guard 2:09¾ and Ramey Constantine 2:10, the only two 2:10 trotters ever bred at St. Joseph, Mo., were bred by M. J. Traynor and Judge H. M. Ramey, owners at the time of but one mare.

Golddust Maid 2:07¼, the greatest race trotter among Kansas-bred trotting mares, was bred by John Biggs, of Garden City, owner at the time of only the one mare, Mamie S., by Bobby Golddust.

Lady Grattan 2:08¾ was bred by Ryan Tucker, of Fort Worth, Tex., whose only mare at the time was Lady Downing 2:14¼, by Herschel 2:29¼, the dam of Lady Grattan.

Mabel Onward 2:09¼ was bred by L. E. Doty, of David City, Neb., whose only mare was her dam, Sentinel Belle, by Grand Sentinel 2:27¼.

Askey 2:08¼, the first Kansas-bred 2:10 trotter, was bred by Henry Bruce, of Howard, whose only mare was Strange Girl, by Strangemore 9401.

Jimmy Ferry 2:09¼, the first Colorado-bred trotter to beat 2:10, was bred by C. J. Stoddard, of Denver, whose only mare at the time was his dam, Silver Queen, by Bacchus 2357.

And these are not all, for the list might be extended considerably, but enough has been written to prove that the owner of "just one mare," providing she is a good one, has a mighty good chance to raise a very fast trotter.

THE PROGRAM AT SALEM.

With our own state fair apparently out of the running for the season and with very little racing in California aside from the meetings at the exposition, the announcement of a generous program of harness horse events at Salem for the six days of September 27 to October 2 inclusive will be heartily welcomed by coast horsemen. With the exception of the 2:30 trot and the 2:25 pace, entries to the class races close on June first with Secretary W. Al Jones, entrance fee being three per cent payable in three equal instalments, with seven per cent additional from money winners. We bespeak a generous patronage for the following list of events:

MONDAY, SEPTEMBER 27.

2-Year-Old Trot, two in three	$ 300.00
2:10 Pace, Capital City Purse, three heats	700.00
2:25 Trot, three heats	600.00
1 mile handicap dash for trotters and pacers	500.00
Great Western Relay Race, two miles per day for six days	1,500.00

TUESDAY, SEPTEMBER 28.

2:15 Trot, three heats	700.00
2:18 Pace, three heats	700.00
3-Year-Old Trot, Oregon Futurity No. 5 (closed), 2nd Day Relay.	2,000.00

WEDNESDAY, SEPTEMBER 29.

3-Year-Old-Pace, Oregon Futurity No. 5 (closed)	1,500.00
2:30 Trot, three heats	500.00
2:08 Pace, Greater Oregon Purse, three in five, 3rd Day Relay.	2,000.00

THURSDAY, SEPTEMBER 30.

2:20 Pace, three heats	700.00
2:12 Trot, Lewis and Clark Purse, three in five	2,000.00
2:15 Pace, State Fair Purse, three heats, 4th Day Relay.	700.00

FRIDAY, OCTOBER 1.

Free-for-all Pace, Oregon Manufacturers Purse, three in five	700.00
2:20 Trot, Editors' Purse, three heats	700.00
2-Year-Old Pace, two in three, 5th Day Relay.	300.00

SATURDAY, OCTOBER 2.

2:12 Pace, three heats	700.00
2:09 Trot, Shriners Purse, three heats	700.00
2:25 Pace, three heats, 6th and Final Day Relay.	500.00

Anselot, Verbena Ansel and Anselila, a trio of yearlings by Prince Ansel (2) 2:20½ bred and owned by Woodland Farm, Woodland, Cal., and now in Hunter Moody's stable at Lexington, Ky., have trotted quarters in 40 seconds with eighths in 19. Suldine (1) 2:24¾, the champion yearling trotting colt of 1914 and also the property of J. W. Considine, has already been a mile in 2:42, last quarter in 36 seconds—American Sportsman.

A Son of Peter the Great

For many years California "had it over" her sister states, to use a plebeian but forceful expression, in a number of ways in the trotting horse breeding industry, one of the chief ones being that it was the home of the world's foremost progenitor of 2:10 speed, McKinney 2:11¼. Year after year the son of Alcyone occupied a unique position among sires, and not until a few seasons ago was his standing threatened through the performances of the get of Peter the Great 2:07¼. This year he has had to yield to the family of the premier of Patchen Wilkes Farm in point of number of 2:10 performers in the first generation, at least, the figures standing thirty for Peter the Great and twenty-six for McKinney.

As would naturally be expected, California has a generous supply of McKinney blood in her contemporary sires and dams, but has never had access until quite recently to stallions carrying the blood of Peter the Great, save by the expensive course of shipping mares to Kentucky, a method that has been practiced by a few of our breeders in previous seasons. There are now a number of youngsters of this line owned in the state, but the only one of age permitting stud duty is the four-year-old Peter McKlyo (3) 2:12½, purchased as a yearling for L. H. Todhunter of Sacramento by James Thompson of the same city, the gentleman who may safely lay claim to being the first ardent and unalterable booster for Peter the Great on this coast.

Colonel Jim selected Peter McKlyo from a goodly lot of yearlings at Patchen Wilkes Farm, choosing wisely and well for these three cardinal points—blood inheritance, natural speed, and individual excellence. Considering first the breeding of this youngster, there are a number of points "on the surface" that appeal at once to studious breeders. He is by the leading sire of 2:10 speed at the trot, only three of Peter the Great's thirty performers of this class being pacers; both first and second dams were "developed" to a point of taking standard records at the trot; his first four dams are producers of standard speed; the sire of his dam is a fast racing trotter and a great sire, and the sires of the first, second and third dams are progenitors of 2:10 speed through their daughters.

Here, in brief, is the maternal line: First dam Klyo (2) 2:29½, by Jay McGregor 2:07½ (sire of seven trotters and one pacer in 2:10, and the dam of Colorado E. (3) 2:04¾, one time world's champion trotter for his age and ousted from that position by a son of Peter the Great); second dam Miss Spears 2:21¾ (dam of seven including Shakespeare (3) 2:09¾) by Lakewood 17082; third dam Medium's Last (dam of six trotters, one pacer) by Happy Medium 400 (sire of Nancy Hanks 2:04 and the dams of Admiral Dewey 2:04¾, Lord Roberts 2:07¼, Arthur J. 2:07½, Bonnie Ailsie 2:08½ and Tregantle 2:09¼); fourth dam Susanne (dam of one and grandam of ten, including Susie J. 2:06¼) by Countersign 885.

It is also of interest to note that Jay McGregor, sire of the dam of Peter McKlyo, is a son of Jay Bird 5060, and that the dam of the fastest of the get of Peter the Great 2:07¼, Roxie Allerton, dam of Peter Stevens 2:02¼, is also by a son of Jay Bird—Allerton 2:09¼. A daughter of Jay Bird also produced the fast three-year-old pacer Peter Farren (3) 2:10 to the cover of Peter the Great, so the potency of the cross is amply substantiated. Twenty-three sons of Peter the Great have become sires of speed, four of them sires of 2:10 speed, and of these just mentioned three are represented by three-year-olds with records from 2:05¾ to 2:08¾.

Individually, Peter McKlyo is a magnificent young horse, and he has natural speed in most pronounced quantities. Mr. Thompson took him last February and the lad made speed so fast that "Genial James" couldn't trust himself on the track with him and pulled his shoes and returned to a daily jog. At the state fair last year he trotted two public trials, the first in 2:15 and the second in 2:12½, his trainer at present predicting his ability to trot much faster this fall.

Peter McKlyo is in service at the driving park at San Jose and is getting a very nice class of mares for his initial season, mares previously bred to him having been limited to a few belonging to friends of his owner. A number of these have foaled safely and their owners are more than pleased with the qualities imparted to his get by this young sire.

GRAND RAPIDS' EARLY CLOSING ENTRIES.

The Furniture Manufacturers, 2:08 Trot, $5,000.

Albaloma, Axtien, Beirne Holt, Bonington, Bright Axworthy, Dorsh Medium, Duchess, J. Malcolm Forbes, Junior Watts, King Clansman, Lucile Spier, Lulu Luminc, Mahomet Watts, Pass All, Peter McCormick, Peter Scott, Reusens, Wilgo, Worthy Prince.

The Grand Rapids Railway, 2:14 Trot, $3,000.

Binola, Bordelon, Eclear Kurtz, Great Isle, June Red, Laramie Lad, Lettie Lee, Loe Blossom, Lusitania, McCloskey, Margaret Parrish, Mirthful, Miss Directed, Miss Perfection, Miss Rilda, Montferris, Peter Johnson, Peter Scott, Russian Dame, Seneca Boy, The Guide, Todd Temple.

The Comstock, 2:12 Pace, $3,000.

Altawood, Bill Hurst, Bingen Pointer, Budd Elliott, Camelia, Clara Walker, Derby Custer, Hal Boy, Hal Plex E., Hal S., Jean, Judge Ormonde, Lillian T., Lustrous McKinney, Miss Miriam, Nelly Temple, O. U. C., Pat Carmody, Peter Farren, Queen Abbess, Thistle Patch, Zomblack.

The Longworth B., 2:08 Pace, $2,000.

Aconite, Bessie Bee, B. M., Fred W., Guy Nella, Imbro, Major Ong, Peter Farren, Prestolite, Rose Equity, Russel Boy, Single G., The Beaver, Walnut Grove.

LIVELY DOINGS AT BAKERSFIELD.

Bakersfield, April 27, 1915.

Breeder and Sportsman:—

I am going to drop you a few lines in order that you may know that the people of this county are making themselves active in sporting affairs generally and horse racing in particular.

Something over a year ago the Kern County Fair Association purchased one hundred and six acres of land on the edge of the city limits of this city, for which we paid $23,000, and immediately began preparing a race track for automobile racing and succeeded in building what is conceded the fastest dirt track in the world. Our track holds four world's records, the five, ten, twenty and twenty-five mile records. At the time of the first events given at the opening, when the track was somewhat heavy, Barney Oldfield succeeded in breaking the mile record, covering the distance in forty-five and two-fifths seconds. Since that time the track has become settled and much faster than theretofore. Only recently Barney informed one of our directors that he had no doubt that he could go once around the track in forty-one or forty-two seconds, which would be a considerable reduction of the present world's record.

After we got the automobile track in condition, we built a one-half mile track in the center and about a year ago we gave several days' automobile and horse racing. The latter drew many more spectators than the former, the gates taking in something like $2500 the first day. We are improving the grounds as rapidly as possible and only recently put in ten additional box stalls and will soon follow it up with many more. We expect to have one of the finest and most attractive racing plants in the State, having expended on our two tracks upwards of $46,000 and have a grand stand that cost us $12,000 that will seat 9,000 people, and shall endeavor in time to hold an annual fair.

People hereabouts take a very great interest in racing of all kinds and particularly that of horses. At present there are twelve runners domiciled on the track and in training and perhaps that many more on the outside. Almost every Sunday a racing programme is carried off and they are largely attended, much larger really than the class of racing justifies, which only tends to show the interest that the people take in such events.

We are giving a three days meeting beginning April 30 and continuing until May 2. The first day will be devoted to horse racing, the second to automobile racing and the third to horse racing. We are giving a free-for-all, mixed events for pacers and trotters, one-half mile heats. Advices from Ventura and Hanford inform us that there will be horses from each place to participate in the event, the purse being $400. In addition to the above, there will be four running events, arranged to suit different classes of horses that will participate. On the second of May there will be other horse races, the outline of which plans have not been agreed upon as yet. There will be quite a number of gallopers here from Hanford, Tulare, Porterville and other outlying points.

There are a great many trotters in this county and also a great number of runners, and inasmuch as there is a great deal of interest taken in such events, the future bids fair to see such events well and liberally patronized. JOSEPH H. TAM.

HUMANE EXHIBIT DEDICATED AT P.-P. I. E.

Pleasing and enjoyable were the exercises held in front of the building of the San Francisco Society for the Prevention of Cruelty to Animals at the Panama-Pacific International Exposition grounds on the afternoon of Saturday, April 17, 1915, when the exhibit of the society was formally dedicated and a commemorative bronze medal was presented to the organization by the Fair directors in honor of its participation in the exposition.

The attendance compared favorably with that of the more pretentious state and foreign dedications and exceeded the most optimistic expectations. The visitors remained interested throughout the program and at the close of the exercises crowded into the building and spent the remainder of the afternoon inspecting the exhibit.

Two pretty incidents which found high favor with the spectators were the liberation of pigeons and toy balloons from a hidden blind on the roof and the brilliant exhibition of King Pharoh, the educated horse from Toyland.

President Partridge of the society acted as chairman of the day and called attention to the fact that the exercises celebrated not only the formal opening of the exhibit, but the 47th anniversary of the society as well, the following day (Sunday) being the date of the society's organization forty-seven years previous.

D. O. Lively, chief of the department of livestock of the exposition, the one man, outside the immediate officers of the society, to whom credit is due for the society's participation in the exposition, presented the bronze medal in behalf of the exposition directors. In introducing the speaker President Partridge stated that both Mr. and Mrs. Lively were members of the society, as well as President Moore and other members of the exposition board.

Mr. Lively stated that it gratified one of his ambitions to be able to see the society represented at the exposition, particularly by an exhibit so comprehensive and thorough as the one it had assembled. He stated his belief that the display would do a world of good, not only in helping the work of the local society, but in spreading broadcast a knowledge of its objects, causing people to realize the importance of humane work who probably never had thought of it before. He said reports had reached him from distant parts of the world, in letters and by other means, from people who had already visited the exposition commenting on the excellent character of the society's exhibit and the good it would do. The privilege of presenting the medal on behalf of the exposition he considered a higher honor and greater pleasure, owing to the character of the society's work and the merit of the organization itself, than if he had been called upon to perform a like service for any one of the thousands of other participants.

President Partridge accepted the medal for the society and placed it in the safekeeping of Treasurer J. S. Hutchinson, mentioning the fact that Mr. Hutchinson founded the society in 1868 and ever since has been its treasurer and faithful director.

Following Mr. Lively, a representative of the Mayor spoke briefly.

John A. Percy, counsel for the society who has been of great assistance to it in legislative matters, was then introduced and gave a brief history of the origin and development of humane work, dwelling particularly on the growth and activity of the San Francisco society. Mr. Percy's remarks were received attentively, many in the audience probably obtaining their first clear understanding of the extent of the humane movement.

As Mr. Percy finished his remarks, a tug of a silken cord in the hands of Baby Floy McCurrie sent fifty or more balloons bearing the flags of all nations and a flock of pigeons, symbolizing peace, soaring into the sky.

Dr. Boyd from Toyland introduced King Pharoh, the horse who has never known the touch of a whip, and for nearly an hour the spectators were amused and delighted by King Pharoh's wonderful exhibition of intelligence. After the knowing horse had demonstrated again and again his ability to spell, add, subtract, pick out colors, and perform similar feats, and had been petted and fondled by the children, he was borne away in state in the society's ambulance to his quarters on the Zone, and the crowd flocked into the building to inspect the exhibits.

RACING ON THE CANADIAN PRAIRIE.

Every year the prairie cities of our sister country to the north of us furnish opportunity for several weeks of racing under the most acceptable conditions, and every season sees numbers of American trotters and pacers make the tour of the circuit, generally winning a goodly percentage of the money hung up and returning to the good old U. S. A. later in the season, more than satisfied with their campaign and loud in their praises of the treatment accorded them. All winter rumors were rife that the war had killed the game there for 1915, but weeks ago all doubts were removed and already a number of stables from the coast have shipped to Edmonton to be ready for the opening of the season the latter part of May. For the benefit of others who may be contemplating a journey to those hospitable sections we take pleasure in presenting herewith a synopsis of the opportunities offered:

Edmonton, Alberta, May 22, 24, 25—Entries close May 20; purses uniformly $250; No. 1, 2:18 pace or 2:13 trot; No. 2, 2:35 pace or 2:30 trot; No. 6, 2:09 pace or 2:04 trot; No. 7, 2:25 pace or 2:20 trot; No. 12, 2:14 pace or 2:09 trot; No. 13, 2:20 trot; eleven events for runners; W. J. Stark, Manager.

Regina, Sask., June 23 to 25—Entries closed April 23, six events of $500 each; six events for runners; J. C. Currie, Secretary.

Calgary, Alberta, June 30 to July 7—Entries close June 20; No. 1, 2:09 pace or 2:04 trot, $700; No. 2, 2:15 pace or 2:10 trot, $700; No. 9, 2:30 pace or 2:25 trot, for 3- and 4-year-olds, northwestern horses, $500; No. 10, 2:17 trot, $600; No. 16, 2:22 pace or 2:17 trot, $600; No. 17, 2:25 trot, $500; No. 24, 2:14 trot, $500; No. 25, 2:12 pace or 2:07 trot, $600; No. 30, 2:18 pace or 2:13 trot, $500; No. 31, 2:30 pace or 2:25 trot, $600; 26 events for runners; E. L. Richardson, Manager.

Moose Jaw, Sask., July 10, 12, 13.—To close May 15, No. 1, 2:12 pace, $1000; No. 7, 2:25 pace, $1000; No. 12, 2:25 trot, $1000; to close July 6, No. 2, 2:35 pace, $500; No. 3, free-for-all, half mile heats, $300; No. 6, 2:18 trot, $500; No. 8, free-for-all, mile heats, $500; No. 11, 2:16 pace, $500; trotters allowed 5 seconds in pacing events; six events for runners; W. A. Munns, Secretary.

Brandon, Man., July 19 to 23—To close May 15, No. 5, 2:20 trot, $800; No. 6, 2:09 pace or 2:04 trot, $800; No. 10, 2:30 pace or 2:25 trot, $800; No. 11, 2:15 pace or 2:10 trot, $800; to close July 9, No. 1, 2:20 pace or 2:15 trot, $800; No. 2, 2:12 pace or 2:07 trot, $800; No. 7, three-year-old pace, $300; No. 12, three-year-old trot, $300; No. 15, 2:25 pace or 2:20 trot, $600; No. 16, free-for-all, $600; eight events for runners; W. I. Smale, Manager.

Regina, Sask., July 26 to 31—To close May 1, No. 1, 2:30 trot, $800; No. 2, 2:25 pace, $800; No. 5, 2:15 trot, $800; No. 6, 2:15 pace, $800; No. 10, 2:20 trot, $800; No. 11, 2:10 pace, $800; to close July 15, No. 7, three-year-old trot or pace, $300; No. 14, 2:25 trot, $400; No. 15, 2:20 pace, $400; eight events for runners; D. T. Elderkin, Manager.

Saskatoon, Sask., Aug. 3 to 6—To close May 15, No. 1, 2:30 trot, $500; No. 6, 2:17 trot, $500; No. 11, 2:25 pace or 2:20 trot, $500; No. 16, 2:20 pace or 2:15 trot, $500; to close July 26, No. 2, 2:22 pace or 2:17 trot, $300; No. 7, 2:15 pace or 2:10 trot, $300; No. 2, 2:22 trot, $300; No. 17, 2:09 pace, $300; twelve events for runners; H. W. Plant, Secretary.

Edmonton, Alberta, Aug. 9 to 14—Entries close Aug 7; No. 1, 2:25 trot, $600; No. 2, 2:14 pace or 2:09 trot, $600; No. 7, 2:09 pace or 2:04 trot, $600; No. 8, 2:30 pace or 2:25 trot, $600; No. 9, three-year-old pace or trot, $300; No. 14, 2:18 pace or 2:23 trot, $1000; No. 15, 2:20 trot, $600; No. 20, 2:14 trot, $600; No. 21, 2:25 pace or 2:20 trot, $600; No. 26, free-for-all, trot or pace, $600; No. 27, 2:30 pace or 2:25 trot, for 3- and 4-year-olds, $400; twenty events for runners; W. J. Stark, Manager.

Red Deer, Alberta, Aug. 17 to 20—Apply for program to Jas. Mann, Secretary.

We have at this office a number of circuit booklets and entry blanks not yet distributed, or same may be obtained upon application to secretaries of the various associations as given above.

DURFEE'S CONSIGNMENT TO CHICAGO.

Owing to the fact that adverse racing conditions here on the coast are exerting a "bear influence" on the trotting horse market and very few really desirable horses are changing hands at any kind of a price, Wm. G. Durfee of Los Angeles has consigned an even half dozen good racing prospects to the Chicago sale to be held May 11 to 13, in the hope that they will find a readier sale in that section where there is more racing in a month than in California in an entire season.

The consignment is headed by that ever-contending trotter, Alarich 2:09, trial 2:06¾, whose win-race record is 2:11¾ and who should prove a most useful horse in his class over tracks of either size, as he is a good going, clean gaited fellow and well educated. Nellie Mac, an eight-year-old daughter of Zolock 2:05¼, and the Del Coronado gelding Omar, of the same age, are the other trotters of the consignment, both out of good dams, both eligible to the green classes and both well along in their developed speed. The mare worked at Sacramento in 2:10¼ and has recently shown much faster, while the gelding has gone the route only a few seconds removed from the 2:10 circle, with short brushes at a two-minute gait.

The four-year-old Johnny Dugan, with a breeder's mark of 2:16 as a three-year-old, heads the pacing contingent and is a free-legged fellow, sound and straight, that should find no difficulties in pacing below ten this season, as he could pace a half in 1:04 last year. He is a Carlokin, from a producing dam, and Carlokins are pretty good horses for any one to own, if the summaries of the coast futurities of recent years are sound guides. The other side-wheelers are the youngsters Jim Cram and Sandy McNabb, both right all around, the former being a brother to Chango (3) 2:12¼, the son of Copa de Oro 2:01 that won the Oregon and State Fair pacing futurities and the three-year-old pace at Phoenix last year. The easterners needn't be afraid to grab any of this bunch, and westerners are reminded that in spite of this draft on his stable, Mr. Durfee still offers at private sale and proper prices some thirty head of individuals of proven quality and the highest promise.

PARK AMATEUR DRIVING CLUB REORGANIZES.

Members of the Park Amateur Driving Club met Tuesday evening at the Palace Hotel and effected a complete reorganization on a new basis, having dis-incorporated previously, and being reincorporated as a regular stock concern. The present valuation of the club's holdings and the number of memberships in force were the basis of the stock issue, there being forty-three shares uttered at a par value of $100 each. Under the new charter stock may be held in blocks of any size, each share carrying a vote, as in any ordinary corporation.

The following officers were elected: President, J. A. McKerron; Vice-President, I. L. Borden; Treasurer, Thomas Bannon; Secretary, F. W. Thompson; Directors, J. A. McKerron, F. W. Thompson, I. L. Borden, S. Christenson, Captain Matson, Thomas Bannon, H. M. Ladd, Joseph Perry, J. J. Gethin, I. B. Dalziel and D. E. Hoffman.

A COMPLIMENT TO MR. CONSIDINE.

John W. Considine, the Pacific coast theatrical magnate and owner of Woodland Stock Farm, Woodland, Cal., the home of Prince Ansel (2) 2:20½, the sire of some very successful campaigners, has at present ten head of very high-class youngsters in Hunter Moody's stable at Lexington which are well engaged in the rich futurities. Among the Considine holdings at Lexington which strike one as destined to play prominent parts in later events are, Verbena Ansel out of Verbena Mc. by Directum Spier 2:11¼; Anseila, out of Ila Moko by Moko; Ansel's Bonnie, out of Woodland Bonnie Derby by Charles Derby 2:20; Edna Ansel, out of Edna Saunders, a sister of Adlon (3) 2:07¾ by Axworthy (3) 2:15½; Anselot, a full brother of Prince Lot 2:07¾, and Lottie Ansel (2) 2:14¼, the champion of her year on the coast; Lord Ansel, out of Lauress (dam of Laura Rodgers 2:11¼) by Mendocino 2:19½; Alma Ansel, out of Alma McGregor (2) 2:24½ by Jay McGregor 2:07¼, grandam Alma Vista 2:20¼ (dam of Alma Forbes (1) 2:24¾, (3) 2:10¼, etc.) by Direct 2:05½, third dam Eastmorn (the dam of four, including Alceste 2:07¼ and Justo 2:08¼) by Baron Wilkes 2:18; the above are by Prince Ansel (2) 2:20½. Mr. Considine also owns Suldine (1) 2:24¾, the champion yearling colt trotter of 1914; a half brother of the latter also, and a two-year-old by Peter the Great 2:07¼ out of Miss Faribault (2) 2:26¾, the full sister of Ortolan Axworthy (3) 2:07½. Mr. Considine has shown the most admirable degree of sportsmanship in having so many youngsters in training in these parts and likewise nominating them in the various rich futurities, as his time is practically all spent in the extreme west and under the circumstances he is denied the pleasure of watching his property in this section develop. To have one or more of the above mentioned colts or fillies prove successful in the futurities would in reality be very beneficial to the whole trotting game in this section, and encourage many other western breeders to take active parts in the juvenile classes.—American Sportsman.

Drink Jackson's Napa Soda.

A VISIT TO CURLES NECK FARM.

When Mr. C. K. G. Billings purchased Curles Neck Farm, about three years ago, many of his friends wondered why he did not locate in the Blue Grass region of Kentucky, where he could raise horses where the services of the champion trotting stallion, The Harvester 2:01, would be accessible to the owners of the best mares in that region.

I was fortunate on the occasion of my recent visit to Richmond, Va., in being the guest of Mr. and Mrs. S. E. Earing of Montezuma Farm on an automobile trip down to Mr. Billings' magnificent estate.

Curles Neck is situated about 14 miles southeast of Richmond, a city of 160,000 people and one of the most important cities of the South—on the north shore of the historic and romantic James river, and after an all too brief visit I came away with an entirely different picture of Curles Neck and the object of its purchase in my mind.

On an elevation overlooking the river stands Mr. Billings' residence, an old, colonial, red brick building that has been remodeled and beautified to suit a man of his means and taste, and a few yards below it moored at her dock lay the Vanadis, Mr. Billings' yacht, one of the most expensive and luxurious boats afloat. So, without asking any questions I had the key. The purchase of this old plantation permits the millionaire horseman to enjoy both of his hobbies—his horses and his yacht. He can stroll down the front walk from his country residence to the yacht and out the back door to his horse stables and elegant mile track.

The farm comprises 5,000 acres, 4,000 acres being in grass or cultivation and the other thousand acres being a game preserve and at the present time 1,000 acres have been sown to blue grass. Mr. Billings has been very liberal in his expenditures, not only on the farm, but on the roads leading to it. I was told that he had built many miles of graveled and clay roads in the last two or three years and presented them to the county. It would be impossible to get over the place in a day or even two days without the aid of a flying machine, in fact, if I was going to offer the slightest criticism, I would probably say it was too big.

The first building we came to after coming up through the long driveway that leads from the main road to the farm, was one of the large new brood mare barns, in which Mr. Earing and myself discovered several of our old friends, Larry Murphy, the man in charge of the broodmares and colts, being one of them, and Lou Dillon, the queen of the trotting turf, was the first matron to catch our eyes. Lou will produce to The Harvester about May 1st.

Yo San, the brown mare that trotted in 2:07 for Mr. F. G. Jones several years ago, has a beautiful Harvester filly by her side—foaled about the first of March. Caracas, one of the recent purchases, is nursing a filly a few weeks old sired by Dromore Farm's Justice Brooke 2:08¼. There are about 50 broodmares at Curles Neck, 42 of them being the property of Mr. Billings. The others are owned by his friends.

We were very sorry to find Thad Logan very sick with pneumonia—contracted while attending the March sale in New York. Thad's sickness, I am happy to say, has passed the critical stage but it will be several weeks before he will be sufficiently recovered to resume his duties.

Ed. Bush, whose stage name is "Dutch," took the blanket off from the champion and stated that on March 20 he weighed 1215 pounds. He is, it is unnecessary to state, the picture of robust health, his coat shining like polished ebony.

Uhlan 1:58, the champion trotting gelding, had just been shipped to Oyster Bay together with 14 others that will be used by Mr. Billings and his friends this spring under saddle.

There are about a dozen head in the training stable proper, six of them youngsters by different sires, three colts and three fillies. The stable, by the way, is a model of completeness, being equipped with everything that a trainer could ask for or money buy. In the second story of this building, which is of brick, is the boys' dormitory, large airy rooms, hot and cold water, shower baths, electric lights and plenty of good literature scattered around. Talk about a "place to flop." One look at that "apartment house" and you want to join the "groomsters' union."

A short distance from the training stable is a large brick building used for a garage and horseshoeing shop, the last named establishment being in charge of Mr. B. Verlander, an experienced shoer formerly of Richmond.

A little farther on and we come to the colt stables and covered track combined. The track is about 20 feet wide and it is about a quarter of a mile around it, and in the "centerfield" are 80 box stalls for the youngsters. A few steps from this building is the mile track, complete in every detail, a regular grand circuit outfit all but the grand stand. And if all of the tracks on the big ring are as good on race day this summer as this track was late in March, I am sure there will be no cause for complaint on the part of the drivers that race over them.

All of the buildings with the exception of the brick house and brick stables are painted a dark green with white trimmings. The fences are made of very light post and rail—being portable—and are also painted green. The long graveled drive-ways are kept in perfect condition; everything harmonizes. There seems to be nothing lacking on this vast estate and as we bade the faithful band of boys adieu and turned back towards the city I could sense, in a measure, the deep obligations the residents of that section of Old Virginia must feel towards the man who has come among them and with a lavish hand is spending vast sums of money in improvements which, while it enhances the value of his own vast holdings, increases the valuation of the adjoining properties as well.—James Clark, in the Horse World.

AMERICAN THOROUGHBREDS MAKE GOOD IN AUSTRALIA.

That American thoroughbred horses can win in any country was again demonstrated in Australia recently, when a son of Planudes won a race in Sydney. In speaking of the victory the Winner, the official sporting paper, says: "Yankee York just got home in the Gosford Handicap, one mile, defeating the unlucky Kirribilli, with Breeza Maid at her heels. The winner is small, but a great finisher. He is by the American sire Planudes, which is now at the stud in Victoria. Yankee York was imported to Australia before his father."

Yankee York is not the only American horse to win in far-off Australia. For the first time on record a horse bred in America has won the Australian Cup. Thoroughbreds from Australia, such as Darebin and Sir Modred, have done stud duty in this country, but it is of recent years that Australia has received an accession of blood from this country. Messrs. A. and G. Tye, proprietors of the Blackwood Park stud, Ferntree Gully, had the foresight to realize that the breaking up of famous breeding establishments in the United States presented a big opportunity for enterprising Australians. They sent Mr. Andrew Robertson across to make purchases on their behalf, and as a result there are two stallions of rare breeding—Mazagan and The Scribe—available at Ferntree Gully. Mr. Robertson brought with him some racing stock also. The Messrs. Tye, who do not race on their own account, gave Lempriere and other horses to train at Mentone. Robertson, formerly a trainer of trotters, has adapted himself quickly to the preparation of gallopers. His success with Lempriere in the cup race speaks well for American thoroughbred blood.—Thoroughbred Record.

John A. McKerron was a visitor in Woodland Wednesday, making the trip to the Yolo metropolis to measure a number of the equine ladies and gentlemen for custom made furnishings in the way of boots and other trappings, to be manufactured at his establishment here in the city and proudly aired by his customers at the fashion parade and speed contests at the P.-P. I. E.

RACING DATES

For the convenience of horsemen we have prepared the following schedule of racing dates so far announced of especial interest to followers of the western circuits and the major lines of the east. Cut out this schedule for future reference:

CALIFORNIA MEETINGS.

SAN FRANCISCO, P.-P. I. E.	June 5-19
SAN FRANCISCO P.-P. I. E.	Oct. 30—Nov. 13
FERNDALE	Sept. 6-10
FRESNO	
HANFORD	Oct. 5-9
RIVERSIDE	

NORTH PACIFIC FAIR and RACING ASS'N.

PORTLAND, OREGON	Beginning Aug. 2
SEATTLE, WASH.	Beginning. Aug. 9
VANCOUVER, B. C.	Beginning Aug. 13
CHEHALIS-CENTRALIA, WASH.,	Beginning Aug. 23
VANCOUVER, WASH.	Beginning Sept. 6
SPOKANE, WASH.	Beginning Sept. 13
HELENA, MONT.	Beginning Sept. 20
WALLA WALLA, WASH.	Beginning Sept. 20
VICTORIA, B. C.	Beginning Sept. 20
SALT LAKE CITY, UTAH.	Beginning Sept. 27
MISSOULA, MONT.	Beginning Sept. 28
SALEM, OREGON	Beginning Sept. 27
NORTH YAKIMA, WASH.	Beginning Oct. 4

WESTERN CANADA CIRCUIT.

EDMONTON, ALB.	May 22-25
REGINA, SASK.	June 23-25
CALGARY, ALB.	June 30—July 7
MOOSEJAW, SASK.	July 10-13
BRANDON, MAN.	July 19-24
REGINA, SASK.	July 26-31
SASKATOON, SASK.	Aug. 2-7
EDMONTON, ALB.	Aug. 9-14
RED DEER, ALB.	Aug. 17-20

GREAT WESTERN CIRCUIT.

CLEVELAND (North Randall), O.	July 19-24
DETROIT, MICH.	July 26-31
PEORIA, ILL.	Aug. 2-7
BURLINGTON, IA.	Aug. 9-14
GALESBURG, ILL.	Aug. 16-21
DUBUQUE, IA.	Aug. 23-28
DES MOINES, IA.	Aug. 30—Sept. 3
HAMLINE, MINN.	Sept. 6-11
MILWAUKEE, WIS.	Sept. 13-18
SPRINGFIELD, ILL.	Sept. 20-25
SEDALIA, MO.	Sept. 27—Oct. 2
MUSKOGEE, OKLA.	Oct 4-9
PHOENIX, ARIZ.	Nov. 8-30

GRAND CIRCUIT.

CLEVELAND (North Randall), O.	July 19-24
DETROIT, MICH.	July 26-31
KALAMAZOO, MICH.	August 2-7
GRAND RAPIDS, MICH.	Aug. 9-14
MONTREAL, ONT.	Aug. 16-28
NEW YORK (Empire City), N. Y.,	August 30—September 4
HARTFORD, CONN.	September 6-11
SYRACUSE, N. Y.	September 13-18
COLUMBUS, O.	September 20—October 2
LEXINGTON, KY.	October 4-16

IN THE UPPER SACRAMENTO.

Willows, Cal., April 26, 1915.

Breeder and Sportsman:—

I was in Marysville not long ago, for a few minutes only, and saw some of the best looking horses in America. Mr. Cooper of Yuba City has two gray pacers by Sir John S. 2:04½ out of a mare by Moses S. 2:19½ that can pace some and are fit for a show ring right now. Mr. Tucker of Oroville has a bay pacer that is a fine one and exceptionally good gaited, also a three-year-old by The Bondsman that will make anyone think they have been to a race if they get up against him. Also a Mr. Foster or Sawyer has a fine stable of five head, the handsomest three-year-old of the lot being a full brother to Sir John S.; he is a show horse, belonging to Mr. Vance, and is just getting well broken. I was not there long enough to gather many particulars, and one trainer's name has slipped my mind, but hope he won't feel "slighted."

In regard to the Rose Trix foal by The Proof bringing the highest price of the December sale for the age, I will say that her yearling by The Bondsman brought the top price of Chas. DeRyder's sale for all ages in April, 1914, at Pleasanton, and she should have a foal at almost any time now by Onward McGregor.

Dr. J. Randolph was buried here on the eleventh of the month and is sadly missed. He was a pioneer doctor here and owned one of the greatest green pacers in the world, Marlin by Dialect, dam by Clarence Wilkes.

They have some good horses in and around Red Bluff but are doing nothing with their track. Mr. Diggs is making a season with his Guy McKinney stallion, McAdrian 45391, and Mr. Morgan is doing a nice business with his pacer by Direct Robert, dam by Oseto 2:13½. John Andrews is on deck with his stallion North California 50141 by Altamont 3600, dam by William L., and never has to take him from his farm. So far as Glenn county is concerned, I do not believe there is a standard bred stallion in service there.

The racing association at Anderson met and reorganized recently and elected new officers as follows: J. J. Murray, president; H. H. Burbank, treasurer; Will Fairbanks, secretary, and Jack Mirandette, Captain Fairbanks, John Murray, George I. Stevenson and Andrew Wills, directors. They are having the track put in shape and plan to have a day's racing on May sixth, in which I will probably take part. I drive the best four-year-old in these parts of the hardpan, a sixteen hand buckskin by Hazelnut 2:25½ (son of Neernut and Hazelwood by Silkwood), out of Garra Patta by Pittock, second dam by Sidnator, third dam by Sterling, etc. His legs are somewhat crooked, caused by the cracks in our hardpan when the water evaporates, as he reaches out so far to cross them! I drive him from here to Anderson and beat the train, but not the Shasta. Nuf ced.

F. W. PERKINS.

THE LATEST FROM OMAHA.

In response to call of interested horsemen, a meeting was held last night in room 1402, Woodmen of the World building, with a bunch of lovers of the horse racing game in attendance. Enthusiasm ran high and in a very short time, among other things, the following matters were decided:

Omaha will enter the Nebraska Speedway Association.

Omaha will offer purses of $500, all other towns in the association offering only $400 purses.

The Omaha meet will be held August 5, 6 and 7, and will include trotting, harness and running races to the number of sixteen events.

Ed Peterson, grain man, was elected president of the Omaha association, and O. M. Smith was elected secretary.

The Omaha Automobile Speedway Association will at once begin the building of a half-mile track inside the auto speedway, and will erect stables, grandstand, etc., the total cost of which will amount to $100,000.

N. J. Ronin of Fremont, well known horseman, attended and assisted in the details of organizing.

Other towns in the Nebraska Speedway Association are Fremont, Beatrice, Kearney, West Point, Takamah and Wahoo.

Another meeting of the Omaha association will be held in the near future for the purpose of selecting a board of directors.—Omaha Daily.

KENTUCKY FUTURITY ENTRIES.

Eight hundred and fifty mares were nominated in the $21,000 Kentucky futurity for foals of 1915, entries to which closed April 1, according to an announcement by the Kentucky Trotting Horse Breeders' Association.

Walnut Hall Farm of the late L. V. Harkness heads the list with eighty-two mares nominated. The Patchen Wilkes Stock Farm of Kentucky comes second with eighty and the Allen farm of Pittsfield, Mass., is third with thirty. The Hudson River Stock Farm of Poughkeepsie, N. Y., is fourth with twenty-three, while C. K. G. Billings' Curles Neck farm in Virginia is fifty with twenty.

Entries were received from thirty states, the District of Columbia and Canada. Kentucky heads the list with 319, New York is second with 118, Massachusetts third with sixty-eight, Pennsylvania fourth with fifty-six and Ohio fifth with fifty nominations.

GETTING ON THEIR NERVES.

Do you know that many wealthy men get keyed up to concert pitch when their horses are racing?—men that speculate imperturbably in thousands, in other lines, but lose their nerve when they have horses in tight races.

I could cite numerous examples to authenticate my statement, but will confine myself to only a few striking instances. The late C. W. Marks, of Chicago, had made a fortune in the shoe business, and all his life had dearly loved the harness race horses. He was a charitable old bachelor, with very few relations and certainly did not need to worry about keeping the wolf from his door. The ownership of Joe Patchen 2:01¼ made Mr. Marks' name known throughout the racing world, and not only was "old Joe" a real asset in a publicity way, but the astute Yankee had taken advantage of the fact by naming a shoe—not a horseshoe!—after him. The "Joe Patchen shoe" hold readily, and Mr. Marks from it alone added greatly to his large fortune. When, finally, he parted with the great horse we all said that he was, after all, a cold-blooded old fellow and devoid of sentiment. I went to dinner with him one evening soon after, and got up sufficient nerve to ask him just why he sold Joe; stating that people thought it was not the action of a "good sport," in view of the prominence that the horse had given him.

"I know just what you mean," said Mr. Marks, "for some of my most intimate friends have made the same observation. And I'll tell you why I sold Joe. He got on my nerves! When he was racing I was strung up all the while, became very nervous, and I just couldn't bear to think of anything happening to him. It wasn't the money, you understand, but the feeling that if anything did happen I wanted someone else to be responsible. I know that I cannot make it clear to you, but that is the way I felt.

"The last few times the horse raced for me I was a nervous wreck, and, as I am getting old, I couldn't stand it. So I sold him."

Despite Mr. Marks' evident conscientious confession, it was difficult for me to appreciate his mental attitude. Just the same, I would like to take a crack at the proposition in order to ascertain how it would affect me!

* * *

The late Howard Ford, of New York, provides another example. He came from a very wealthy family, but, through choice or otherwise, went to Arizona after his college days and became a ranchman. Now, a quarter of a century ago, an Arizona ranchman was not one who could "get by" without being game to the core, and a real man among the pioneer element whose law was largely based upon "beating the other fellow to the draw."

I have been informed that Mr. Ford, as an Arizonian, was highly successful, making a lot of money and holding his own in a country that was not a likely place for a quitter. So it's certain that he was game. Yet, one day, when Lord Allen (2) 2:11 was racing in a colt race at Pittsburgh, I thought that the then-master of historic Stony Ford Farm was about to collapse. Mr. C. W. Lasell, with Nowaday Girl (2) 2:14¾ gave Lord Allen a real battle in the first heat, and, chancing to look into the adjacent box where Mr. Ford was seated, I noted that he had fallen back in his chair and was gasping for breath. Being well acquainted with him, I went over and touched him on the shoulder, and then he greeted me in a tremulous way. "Did Lord Allen win?" he asked, and when I replied that he did, Mr. Ford gathered himself together, but was still very nervous. Presently he had completely recovered and was himself again; but he told me that the contest had strangely affected him.

* * *

I can tell you the story of one of the coolest men I ever knew, but since he is alive, I cannot, for reasons of etiquette, mention his name. It was after one of the hardest-fought and most brilliant Transylvanias that the incident occurred. His entry was beaten after a tight fit and five awful heats, and next morning, when I went down to breakfast, I found him pacing the lobby of the old Phoenix Hotel in Lexington. He invited me to have breakfast with him, and stated that he was going to take the first train back home.

"But," I remarked, "you said you were booked to stay here for the entire meeting."

"I was," he returned, "but I got an awful jolt yesterday, and I simply have to get away from here. I spent a sleepless night, and I am going home to rest and try to forget."

"Did you bet much on your horse?" I inquired. He replied: "I didn't bet a penny. It was seeing him beaten after such a struggle that got me so worked up. I had my mind set on winning the race, and I never had anything occur to so upset me."

This gentleman, as I well knew, had acquired a great fortune, largely in speculation on the stock market, and had repeatedly taken chances in enormous deals, so it was not that he wasn't game—but simply sentimental.

I recall a westerner who had several large gambling houses in Colorado and Montana, and was racing a horse at St. Joseph, Mo., years ago. His driver wasn't the best in the land, and on this particular occasion was seen at his worst, losing a race that he could have won easily had he displayed any sort of judgment. All afternoon I sat with the owner, and he became so worked up and nervous that, but for his importunities, I would have sought other company. Before his horse was finally defeated he had me about as nearly "all in" as himself—talking, gesticulating, and acting like a candidate for an insane asylum.

"What's the difference?" I said to him after the race. "You haven't lost much—and I presume that the old percentage will come along, just the same."

I was properly rebuked when he turned upon me angrily and remarked:

"Lost much, h—! I lost a horse race, and that's what hurts!"

* * *

A Teutonic friend of mine owned a mare who was racing on the Illinois Valley Circuit, and a right good old campaigner she was, despite two faults, breaking and pulling. When a race was split up, she would be found fighting for the last heat, and the pool tickets, providing, as is always the case, that she didn't outclass some good-gaited, steady one who got the coin and was ready to be tucked away in bed before she had settled down. Well, she won a heat, then lost a couple of others, and took the fourth. By this time she was thinking of her ancestors, who were said to be more or less inclined to cheat, and so made up her mind that she would spill the beans, and be just as cranky as she could—mean old thing. At any rate, she lost the fifth and sixth heats, and my German friend was not at all jubilant. It's a sort of self-constituted office that the poor newspaper man assumes, but always he is the one to offer first aid to the injured, the bearer of soothing ointment and lint to those who are bruised, distressed and troubled. I had been on duty all afternoon and walked 'steen miles up and down the stretch during the progress of the race, my perturbed friend leaning on me. The day was warm, and over in a near-by corn field you could hear the blades cracking as the great cereal was being heated in the process of its unfolding and struggle to reach maturity. Once more we tramped from the mare's quarters to the stretch, and while I was myself physically a trifle (?) torrid, my friend from over there where they are putting up that awful scrap was blowing and puffing like an over-worked steam engine. I knew instinctively that he was going to win, and with all the fervor that I could muster, so admonished him, but with little success. The old girl was getting tired and that meant that she would be less erratic, also I realized that she was a Marathon lady, and that the others were by now pretty well strung. She went away flat, led to the half, but very shortly made one of her regulation aerial flights, dropping several lengths astern of the field.

"I'm going," exclaimed her owner, with anguish in his voice.

I grasped his arm to detain him, and while he struggled he managed to say: "I got heart troubles, and I can't stand this sort of thing."

Fearing that he might drop over, I started to leave the stretch with him towing me. When we had reached the shade of the stand I looked around and saw that the mare had settled, was trotting at a good clip and fast overhauling her field. I so informed the sufferer, but it was not till he heard the shouts of the crowd, "She's got 'em!" that he looked trackward. The mare entered the short stretch four lengths to the good and won pulled up, and then it was that I received a deadening blow on my shoulder and another in my short ribs. My breath was taken away momentarily, but I could see a dancing figure before me and hear it enthusiastically exclaim, "I told you dot der mare would win all der time!"

It came to me then that there was a vast difference in the effect that winning or losing has upon weak hearts.

* * *

But there is yet an analysis that must be made in order to appreciate the fact that one can become used to losing, and doing so without a qualm, whereas a few victories makes him super-sensitive.

The late August Uihlein, of Milwaukee, who was one of the largest brewers in this country, also one of the greatest failures as a breeder (he bred on a colossal scale), that the industry ever knew, may be cited. I suppose that the genial Teuton had bred at least two thousand standard-bred horses, but with scarcely a glint of success. Only a few of his raising ever won a race, the best of them being Don Labor 2:05¼, practically the only one above the ordinary from this immense number.

Mr. Uihlein was the fortunate purchaser of The Harvester 2:01 when that colt was sold at Madison Square Garden as an unbroken two-year-old, and it is gratifying to be able to say that the subsequent (and present) world's champion stallion repaid him for many previous disappointments. Time and again I had seen Mr. Uihlein's horses beaten and he simply took it as a matter of course, never saying a word to indicate whether he cared or not. In fact, he used to joke when one got the flag, and if they got in the money he seemed well pleased. But with The Harvester it was a totally different matter. In him he had a winner and his whole heart was in the horse.

With a party of friends and relatives he came to Columbus to see him race in the first futurity in which he started. Just before the first heat he sent for me in order to inquire whether or not there was a chance for defeat. I assured him that his colt would win easily and not to worry, but he seemed a trifle excited and requested that I stay with him during the race.

Mr. Geers drew the first heat rather fine with the colt, The Leading Lady being a ripping second. From the angle from which he viewed the heat, Mr. Uihlein thought his colt had lost, and with extreme sadness so advised his friends. I hastened to assure him that such was not the case, but it was not till the announcement was made that he was able to collect himself.

"Will you do me a favor?" he asked. "Go down and tell Mr. Geers that it doesn't make any difference to me how close a heat is, only that I had an uncle who died of heart disease."

Mr. Geers had a hearty laugh when I gave him the message. "Tell Mr. Uihlein not to worry, for the only way that The Harvester could lose this race would be if he had an attack of heart disease, or I had one." Chuckling and lighting a cigar he added, "Both of us are feeling mighty fine today."

The following week at Columbus, Mr. Uihlein and his friends returned to witness The Harvester's efforts in the Review futurity, but on this occasion he was so thoroughly confident that he figured his colt as being able to defeat any trotter then racing. Mr. John C. Bauer, publisher of the Review, was on hand and, as has been the practice with all Review events, brought with him the real money to pay out when the winners were decided. After the race I went to Mr. Uihlein and requested that he come over into our box and get his money. "No, no," he said, "give it to Mr. Geers."

"Nothing doing," I told him. "Mr. Geers wants you to collect it." "Very well," he replied, and when Mr. Bauer handed him $3,500 in new, crisp bills, he was momentarily nonplussed. To a man of his wealth, that sum was only a trifle, and a draft or cheque would have meant nothing at all; but the actual cash, won by a horse owned by him, and in his presence, was a far different matter. He sent for his Columbus agent and ordered him to send the money to Milwaukee by express.

Mr. Uihlein, as I pointed out previously, was a good loser, and a game man, but the prospect of having a winner beaten unnerved him.—Marque, Horse Review.

TACOMA HORSE LOVERS ORGANIZE.

A well attended meeting of lovers of both riding and driving horses was held in Tacoma on April 14, resulting in the formation of the Tacoma Riding and Driving Association, with officers as follows: Mr. L. Hyke, president; Mr. La Monte, vice-president; Miss Gladys Flemming, secretary; Mr. A. M. Button, treasurer, and Mr. T. A. Yowell, superintendent of speed. A membership committee was appointed at once and a vigorous campaign for the enrollment of five hundred members is now being conducted with most gratifying success.

Mr. Huntamer has secured an franchise on Thompson avenue for a speedway for horses only, and has given the Tacoma Riding and Driving Association the right to use the same for holding their matinees, which will take place at least every two weeks during the summer. Visiting horsemen from all parts of the country are invited to join in the Association's affairs at any time they chance to be in Tacoma, and a notification of their presence to Miss Flemming, 2306 South Yakima avenue, or to any of the other officers, will assure them of royal entertainment.

A NEW TRACK AT OMAHA.

For many years the Douglas County Agricultural Society has been without a fair grounds. It has given a small county fair in connection with the street carnival during the "Aksarben" celebration at Omaha each fall. Now it proposes to take its place with the other county societies of the country and give a real fair. With an adjacent population of 200,000 there is no reason why the venture should not be a great success. A plot of ground has been leased for five years near the Omaha Country Club and Krug Park, between Omaha and Benson. A half-mile race track will be built and once more the lovers of the horse in Douglas County will be able to enjoy their sport. James Walsh of Benson is president of the association. Mr. Agee of Waterloo is vice-president, John F. McArdle of South Omaha is secretary and Louis Henderson of Omaha treasurer. The dates for 1915 will be announced in the near future. Omaha used to be a great racing town and several world's records were made over the several courses in that city, but in the past twenty years only one or two meetings have been held. Several western trainers can doubtless be induced to make the new fair grounds their winter quarters if a good track is built and proper stabling constructed. A driving club may be organized to give a summer meeting and to put on the racing program for the fall fair.—Horse Review.

GET ONE OF THE BOOKS—FREE.

"Wouldn't be without it," is a common phrase used among horse owners when speaking of ABSORBINE. ABSORBINE is a thorough antiseptic and germicide, safe and pleasant to use. Does not blister or remove the hair and horse may be used during treatment. It is also an economical liniment as but a few drops are required at an application.

The following letter was received from Mr. Wm. Forcier of Willmar, Minnesota: "In regard to your ABSORBINE for horses. I have used two bottles of it on my mare which the veterinary at Willmar told me that I might as well kill as it would never heal up. He said that she had an open joint and it could not be cured, but I purchased one bottle of ABSORBINE of our druggist and used it and when I had used one bottle I thought it best to get another, and the two bottles of ABSORBINE cured her and now she is as well as ever, and I would not be without ABSORBINE as long as I am a horse owner."

Write for detailed instructions for treating your particular case. You will derive equally good results. Horse book free on request.

ABSORBINE $2.00 a bottle at druggists or sent direct, all charges prepaid, upon receipt of price.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

ALL ALASKA SWEEPSTAKES.

[By Mrs. C. E. Darling.]

This race is run each year in April under auspices of the Nome Kennel Club, which was organized in 1908 by Albert Fink, who was the first president. It had from the beginning the enthusiastic support of all the dog lovers in the community, who very early perceived that not only was the club furnishing a clean, wholesome and thoroughly characteristic sport for the North, but that it was also improving the breed of dogs that are used so extensively in the development of the country.

Previous to the advent of dog racing in Nome, any dog that could stand on four legs and had strength enough to pull, was apt to be pressed into service, but since the races have become a recognized feature of the life there, a certain pride has manifested itself in dog drivers who aim to use only the dogs that are really fitted for the work. This is true even indifferent handling of their ill-fed, over-worked beasts of burden.

Now they, too, are in line for the "better dog" movement inaugurated by the Nome Kennel Club, and in one of the recent races there was a team of Eskimo dogs driven by an Eskimo who showed an intelligent understanding of the accepted fact that care and kindness given his dogs bring the quickest and surest return to dog users.

After the departure of the last boat in autumn, when the ice becomes solid on Bering Sea and the gray twilight of the northern winter settles down, not to be lifted until the long days of sunshine come in May, there is the awakening of intense interest in this unique sport.

Even in November the prospective entries, men and dogs, begin to train for the event, though, as a matter of fact, the men who go into it are usually those who are never altogether out of training. Their days are spent in work that hardens the muscles, followed by evenings devoted to indoor baseball, basketball, running races and, in fact, every conceivable exercise that will give strength and suppleness.

Smoking and drinking have no place in their routine, and a rigid diet is observed.

The dogs, which are carefully selected for speed and endurance, are fed upon the most nourishing foods and are driven daily increasing distances, until a little spin of a hundred miles or so at a time is a mere nothing.

If, as Mark Twain asserts, "it is difference of opinion that makes horse racing," it is the very widest difference of opinion that has made these Alaskan races such a thrilling, absorbing study and diversion to the ice bound dwellers on Bering Sea, for every man, woman and child on Seward Peninsula has an opinion to be verified as to the merits of the two types of dogs used in the contests.

The Siberians, generally and erroneously called in the papers Siberian wolfhounds, are suggestive of neither hounds nor wolves. On the contrary, they show strong traces of the fox, and have pointed noses, thick hair, prick ears and bushy tails curled over their backs.

The Alaskans, merely a comprehensive name used for convenience, and to distinguish them from the distinct Siberian type, may be pointers, setters, St. Bernards, collies, Airedales or what not, with frequently a pronounced timber wolf strain inherited from McKenzie river huskie or Eskimo ancestor.

Each type has its stanch supporters and admirers, and for good cause. The Siberians are wonderfully even and steady in their work, gentle, tireless and requiring but little food, and but little time in which to digest it; while the Alaskans, though needing longer rests and more frequent feeding, show at times almost incredible bursts of speed that belie apparent weariness.

Irish, one of the Allan and Darling leaders, can pace a mile in three minutes, and Spot, one of the fleetest members of the same kennel, has trotted four miles in little more than thirteen minutes after having led his team thirty miles over a bad trail. There are several others that "Scotty" Allan has trained that boast their fifteen to sixteen miles an hour in short dashes.

The Alaskans seem to manifest, besides, a pride that speaks of forefathers bred and broken to field work, and a responsive intelligence that many of the native dogs apparently lack.

The number of dogs driven in a team is entirely optional with the driver, and varies according to his idea of how many can be used to advantage—it being a nice point in the sport to select enough to keep up to the required standard of speed and endurance, yet not enough to embarrass himself with too many for good team work. This year the teams ranged from ten to eighteen dogs each.

That there shall be no cruelty to dogs that might become, by chance, lame or exhausted, or in any manner a detriment, an invariable rule of the Nome Kennel Club makes it necessary to return with every dog, alive or dead, with which the team started. In this way it is to every driver's advantage to keep his dogs in the best of condition that he may not be obliged to carry a dead or disabled dog on his sled.

The drivers, also, can use their own discretion about the number and length of the stops to be made—only one being obligatory at Candle, 204 miles from Nome, and the end of the first half of the race. Here the teams are examined and checked up by judges appointed by the club.

Not the least scientific feature of the race is the ability of the driver to realize exactly how much rest he can afford to take himself and give his dogs, without the unnecessary loss of a moment.

The stops are made at villages, camps and relay stations, and here food for all of the contestants is distributed by commissary teams furnished by the Nome Kennel Club. This food is put up in hermetically sealed tins, enough in each tin for one feeding; and each dog's allowance is wrapped separately in a piece of muslin, so that there is no loss of time in dividing it into proper portions.

Throughout the year the dogs are fed on rolled oats, dried salmon and the flesh of the white whale, which is oily and full of nutriment, with sufficient bones to keep them in condition. But during the races their food consists of chopped beef and mutton mixed with eggs and cooked. Then it is frozen to be kept as long as may be necessary.

The only equipment carried on the light racing sleds, which are made of hickory and lashed with reindeer sinews or walrus hide, is an assortment of furs and water boots for the men, and certain extra comforts for the dogs in the way of tiny canton flannel moccasins as a protection for the feet in case of icy trails; green veils for the eyes, if the sun is too strong, and blankets.

In every resting place the dogs are considered first and no man thinks of himself till his dogs are rubbed with alcohol, fed and bedded. In case of any stiffness, hot antiphlogistic applications are used. Many of the drivers sleep on the floors with their dogs, or at least share their bunks with the leader of the team.

It should be understood that, as the dogs are not driven with reins, but by spoken orders, the leader of the team must understand all that is said to him and guide the others according to directions. An excellent leader is, therefore, an absolute necessity, and in most teams there will be found several dogs capable of filling that important post.

A driver rarely sits in the sled during the race, but runs behind, pushing as hard as possible and jumping on and off the projecting runners from time to time to rest.

The trail for the most part lies along a telephone line, so that news of the progress of the teams is constant. One learns of the condition of the men and dogs at every station, and bulletins are posted at all public places in Nome—in restaurants, clubs and along the streets.

Sometimes, despite months of ceaseless training and marvelous dogs, the "luck of the trail" may be against a man, and a broken sled runner, losing the trail, or some other slight or serious accident may turn an anticipated and deserved victory into defeat, quite out of any human reckoning.

Out of the seven races that have already taken place, the Siberians driven by John Johnson have won two, making in 1910 the record time over the 408 mile course—a little more than 74 hours—while the Alaskans have been victors in five of the events, three of these falling to A. A. ("Scotty") Allan, who in this year's contest, as usual, drove the Allan and Darling team.

The winning of this race, unique in its dangers and unparalleled conditions, is a great achievement, and the losing is a great one, too, for

"There's honor and praise awaiting
And whether they win or fail,
They're heroes all in the eyes of the North
For their pluck on the Arctic Trail!"

A summary of the 1915 race is the following:

Nome, Wednesday, April 14.—Five teams, driven by the most expert drivers in the North, got away at 9 o'clock this morning in the 408-mile All-Alaska Sweepstake dog race over the snow trail from Nome to Candle and return. Every man, woman and child in Nome was out to cheer the drivers as they crossed the starting line, and until the 80-hour journey is finished the progress of the racers will be the sole topic in this camp.

The five starters were A. A. (Scotty) Allan, driving the team of 16 Malamutes owned jointly by himself and Mrs. Charles E. Darling of Berkeley, Cal.; Alex Holmson, driving Siberian dogs owned by Dr. Kittilsen; Paul Kjegstad, driving his own "bird" dogs; Leonard Seppala, driving his own Siberians, and Eskimo John, a native driver, who is piloting the team entered by the Council Kennel Club. Fred Ayer's team of fast fox-hounds, which were looked upon as likely winners, became sick yesterday and were withdrawn.

Two hours after the teams left Nome they passed Cape Nome, with Kjegstad in the lead, but when Solomon, 32 miles from Nome, was reached "Scotty" Allan was in front with the others in close pursuit. Allan's time to Solomon was 3 hours and 41 minutes, 28 minutes slower than his time last year when he led into the first checking station.

Allan did not stop to rest at Solomon, but pressed on toward Timber, 64 miles from Nome, with Holmson, Eskimo John and Kjegstad in close pursuit. Their time to Solomon was: Holmson, 4 hours, 7 minutes; Eskimo John, 4 hours and 8 minutes, and Kjegstad, 4 hours and 13 minutes. Kjegstad was the only one of the four to stop for rest, taking five minutes at Safety, 21 miles from Nome.

Nome, April 25.—Over the heaviest trail in years, at Solomon, 32 miles from Nome, Allan had passed the others, but was being hard pressed by Paul Kjegstad.

Seppala's team jumped into the lead late today and entered Gold Run, 182 miles from Nome, 1 hour and 14 minutes ahead of the Allan-Darling team.

Seppala's time was 28 hours and 41 minutes, 5 hours faster than any previous time to Gold Run. He stopped only 7 minutes to change his leader and then started ahead through the snow for Candle, 24 miles away, the turning point in the 408 mile race. Allan rested his dogs 20 minutes and then started out after Seppala.

Eskimo John, driving the Council Kennel Club's team, dropped into fourth place between Haven and Gold Run, Paul Kjegstad's "bird" dogs beating the native driver into that station by 22 minutes. Alex Holmson, driving Doctor Kittilsen's team of eighteen Siberians, was only two minutes behind the Eskimo. The dogs and drivers are all in excellent condition.

Nome, April 16.—With the leaders less than 100 miles from the finish line at Nome, the race tonight developed into a contest of skill between Seppala and Allan and of endurance between Seppala's 16 Siberians and the Allan-Darling team of 16 bred Malamutes.

At 7:15 tonight Seppala, who is leading, drove into Council, 85 miles from Nome, having driven a total of 327 miles in 58 hours and 15 minutes. At that hour Allan was 40 minutes out from Boston Roadhouse, 20 miles farther from Nome. Allan was in the lead when Boston was reached at 2:17 p. m. Seppala arrived there 33 minutes later, but instead of resting his dogs as Allan did, he took to the trail again after a stop of only 20 minutes.

Allan paid no attention to Seppala's haste for several hours, but when the time passed that Seppala should have arrived at Council, Allan became suspicious that his rival was camping just outside that station to mislead his opponents concerning the condition of his dogs. Allan immediately put his team into harness and started off at full speed toward Council. He believed the four hours' rest given his dogs at Boston would enable him to outdistance Seppala on the last 85 miles of the trail.

Eskimo John, driving the Council Kennel Club's team, is in third place, and has been driving hard to overcome Allan's three hour lead. The Eskimo arrived at Boston at 5:30 p. m., his time for the 305 miles being 56 hours and 30 minutes. At the last report he was giving his dogs a much-needed rest.

Paul Kjegstad's team is running a poor fourth, while Dr. Kittilsen's 18 Siberians appear hopelessly out of the race. Kjegstad arrived at Telephone Creek, fifteen miles beyond Boston, at 5:40 tonight. His time for 290 miles was 56 hours and 40 minutes.

Alex Holmson, driving Dr. Kittilsen's team, arrived at Camp Haven, 24 miles behind Kjegstad, at 4:30 p. m., with eight of his dogs down. After resting 2 hours he started again, carrying the used-up dogs on his sled. This puts a heavy burden on the 10 strong Siberians left in his team.

Nome, April 17.—Seppala won late today the 408-mile All-Alaska Sweepstake dog team race, which started at 9 o'clock last Wednesday morning. His time for the course was 78 hours 44 minutes and 37 seconds, 4 hours 30 minutes and 17 seconds slower than the record established by John Johnson's Siberian team in 1910.

When Seppala's footsore dogs limped across the line in their quaint-looking little moccasins which Seppala had fitted to their feet to protect them from the rough snow trail, "Scotty" Allan was just passing Fort Davis, five miles out from Nome, with the Allan-Darling team.

Eskimo John was approaching Safety Roadhouse, 21 miles away, and will finish third.

Besides winning a purse of $3,000, Seppala captured the most highly prized honors in Alaska sporting circles, the title of foremost dogmusher in the North.

Despite a heavy snowstorm, every man, woman and child able to be outdoors lined Front street and cheered wildly as Seppala drove toward the finish line in front of the Board of Trade Saloon, where his wife, who was elected queen of the Sweepstakes at the carnival last Saturday night, was waiting to greet him.

At 1:45 o'clock this afternoon Seppala's team passed Cape Nome, 13 miles from the finish. Allan passed Cape Nome one hour behind Seppala, who had gained 15 minutes in 19 miles. The Eskimo passed Solomon, 32 miles from Nome, at 1:45 p. m.

When only 32 miles from the finish line Seppala and his team were leading Allan by only 35 minutes.

Seppala passed Solomon, 32 miles out, having covered 380 miles in 73 hours and 25 minutes. Forty-five minutes behind Seppala, Allan drove his Malamutes into Solomon and prepared for the dash to Nome; still hopeful that his speedy dogs would overtake the short lead held by Seppala's Siberians. Seppala's dogs began suffering from sore feet before he reached Council last night and he had to lay over there seven hours to give his dogs a rest.

Allan would have been well ahead of Seppala had his dogs not run off the trail last night, setting him back four hours. Allan left Council, 85 miles from Nome, at 10:30 o'clock last night.

He had gone only a short distance toward Timber, 21 miles away, when one of his leaders, which was running loose ahead, turned off onto a miner's trail, where the Nome trail crosses Fox river. A light snow was falling, obscuring the trail, and when Allan's team turned up the false trail after the loose dog, Allan did not notice that they were off the right track.

After going a short distance up the river, Allan started to turn back, but the loose leader, also realizing that he was on the wrong trail, started to take a short cut and became lost.

Allan tied his team to a tree and set out after the loose dog, which circled around and headed back toward Council. Allan returned for his team and then followed the runaway back to the station he had left at 10:30 o'clock, arriving there at 12:36 o'clock this morning.

The runaway dog was waiting for him. During this manoeuver Allan traveled 25 miles and wasted four hours. His dogs were tired and he rested until daylight, leaving soon after Seppala resumed the journey toward Nome.

Eskimo John, the native driver handling the Council Kennel Club's team, is still running third, an hour and a half behind Allan. Paul Kjegstad's team of 16 "bird" dogs is several miles behind the Eskimo, while Alex Holmson, driving Dr. Kittilsen's team of 18 Siberians, 8 of which are so badly used up that they cannot travel, and must be carried on the sled, is out of the race. At the last report Holmson was resting at Boston Roadhouse, 107 miles from Nome.

FISH AND GAME LAW VIOLATORS ARRESTED.

Fish and Game Commission officials are no respecters of persons when it comes to making arrests and conducting prosecutions for violations of State fish and game laws. John Robbins, a special Deputy Fish and Game Commissioner, was arrested recently at Redding on a charge of killing a deer in Mill Creek canyon, Tehama county. Robbins was fined $150 by Judge E. F. Lennon, with the alternative of 150 days in jail. Habeas corpus proceedings were instituted by Robbins' attorney on technical points of procedure at the time of sentence by the trial judge.

Another special Deputy Commissioner, R. W. Robbins, was arrested by Deputy Commissioner M. S. Clarke on a charge of fishing without a license. The accused deputy was relieved of his badge and credentials and the case was set to come up at Almaden, Santa Clara county.

Justice of the Peace William H. Skinner of White Oak township, El Dorado county, was arrested by Game Warden Euell Gray of Placerville, and convicted on a charge of having quail in his possession during close season. Gray, while escorting a game law violator to the judge's court, overtook the judge on the road, and was astonished to see part of a dead quail protruding from a sack in the judge's possession, it is claimed. The party proceeded to Judge Skinner's office, where Gray's prisoner, a Greek, was fined $25 for a game law misdemeanor. Gray went to Placerville the following day and swore out a warrant for the judge. For some reason or other the case was postponed until last month. Judge Skinner, in acknowledging the corn, offered the explanation that he had found the dead quail by the roadside and was taking the bird home for his cat. Judge Clarke Howard of Placerville imposed a fine of $25, which was paid.

A total amount of $6,327 has been collected for fish and game law violations in this State for the quarter ending March 31. It is a noticeable fact that arrests on these charges are diminishing throughout the State. Evidently the fish and game laws are becoming better understood and more respected.

In the San Francisco district during January there were 63 arrests and $840 in fines collected; 32 arrests and $455 collected in February; 41 arrests and $880 in March—a total of 136 arrests and $2,175 for this district.

For the Sacramento district January had 13 arrests and $195 in fines paid; February, 27 arrests, $770; March, 16 arrests, $365—56 arrests, $1,330. Los Angeles district: January, 12 arrests, $142; February, 7 arrests, $100; March, 30 arrests, $2,580 paid in fines—49 arrests, $2,822. Fresno district: January, 6 arrests, $75; February, 11 arrests, $235; March, 11 arrests, $175.

The Merced county supervisors recently passed a new ordinance regulating fishing in the county, to replace the old measure. The new one prohibits seining for striped bass, black bass, salmon, perch, catfish and crappie at all times, and prohibits the seining of any fish in the months of June and July except with a dip net.

* * *

Shore fishing for sea trout, capazoni and rock cod is improving daily. Hugh Copeland landed a dozen fine fish at Fort Point a week ago. One capazoni weighed three pounds. "Kelp cod" have been caught plentifully in the bay off Yellow Bluff and Point Cavalho recently.

Big catches of rock cod were made along the Marin shore, near Point Blunt, last Sunday.

Drink Jackson's Napa Soda.

Fish Lines

Fly fishing conditions should be much improved in the near-by trout streams from now on, weather conditions having been conducive for the appearance of insect life about the creeks and the waters getting lower daily. Most of the resorts within easy reach of this city have been pretty well gone over, however, and there is now an aggravating absence of large-sized trout, according to many anglers' experiences.

The open season for the Sierra streams will commence today. High and roilly water, however, will not offer any fishing other than with bait.

What the prospects for Truckee river fishing are for the coming season is a matter closely followed by rodsters, who are awaiting the annual trip to that grand trout water. A recent report from R. J. Little states that "flies will not be in much demand near Boca on the opening day. The river is high and roilly, and there is still plenty of snow on the mountains."

Klamath river fishing, it is believed, will start from May 1 to 6 for the big steelhead trout for which the river is famous. Al M. Cummings and wife are now at the Hot Springs resort and will soon be joined by a number of local fishermen.

The headwaters of the Garcia river were prospected recently by Dr. Henry Abrams and party. Trout were fairly plentiful, but the streams were too high for the best results with fly hooks. From now on the sport in that section should improve. The roads to the Ornbaun valley section, via Cloverdale, are in fine shape for machine travel.

Pieta and Big Sulphur creeks are also recommended for a trial now by anglers who know these streams. The roads in that district are also in good condition for auto trips. The creeks in the upper district of Napa valley are beginning to show evidence of depletion. The trout campaign in that district has been a strenuous one. Near Duncan's Mills the creek in Freezeout gulch is panning out well. W. Foreman's visit was repaid with a pleasing basket of fish.

Steelhead trout from five to seven pounds in weight, besides catches of smaller fish, were made a week ago by Salmon Creek Rod and Gun Club members in the lagoon and holes of Salmon creek, above Bodega bay. Ned Bosqui, David Hearfield, Harold Hearfield, Nat Boas, Frank Engstrom, Baron Hoxie and James Maynard were some of the rodsters.

Not for several years past has trout fishing been so good on Coyote creek, at Gilroy Hot Springs, as it is at present. Every angler who has tried the creek has returned with creels containing from thirty fish to the limit number, trout running from seven to nine inches in size. Among the many rodsters who have fished the Coyote, since the opening day, were: Lieutenant-Colonel A. W. Yates, W. J. McDonald, Peter Cupich, Walter Talcott, C. Forbes, C. C. Morehouse, Anthony Serpa and W. H. Cameron. Colonel Yates and McDonald fished Dexter creek, a confluent of the Coyote, one day with great luck. Four steelhead trout averaging two pounds each were part of the catch. Fly-fishing conditions on the Coyote will be good about the middle of May.

G. W. Fisher, H. Mooney, Al Tallant and Peter Peterson made up the first party on the Little Sur, in Monterey county this season. They found the roads very bad. The stream was well stocked with small fish. The largest trout caught was a 6-pounder, taken in the lagoon. Dave Sachs recently tried the upper waters of Carmel river. Small trout and poor roads for machine going were the unappealing conditions found.

The Llagas river produced limit baskets on a Thursday trip for Dr. J. H. Conroy and Dr. Rader—good-sized fish the catches happened to be. The Santa Clara and Santa Cruz streams are generally well stocked with trout, it is said.

* * *

The California Anglers' Association members held an enjoyable whist seance at the club rooms Wednesday evening, April 21. These gatherings are gaining in popularity. Arrangements for the association annual banquet is in the hands of a committee composed of Dr. L. T. Cranz, George Wentworth, Lloyd Spence, Harry Thomson and Milton Frankenburg.

* * *

Another shift in the scene of striped bass activities developed last week, when a number of bass chasers connected with the fish in various parts of Petaluma creek. One boat operating near the "red barn" landed four fish, another boat's crew caught three bass. In fact, nearly every fisherman on the creek, above Black Point, caught a bass or more, the fish averaging five and six pounds, a 12-pound bass being the heaviest taken. From Schultz sloughup to Petaluma, a number of bass were also caught, fish running from 7 to 11½ pounds. "Bullheads" were the killing baits used. Franklin brothers returned to their ark in the San Antone with a 10 and a 14-pound bass.

Near the mouth of the creek, usually called "Asylum" creek, where it joins Napa creek, the striped fish were plentiful last Sunday. One 12-pound fish was landed by William Wheeler, who used a small dead trout for bait. A Napa fisherman made a catch of five fine bass. Several rodsters who had been fishing farther up Napa creek for steelhead trout, joined in the raid on the bass. They fished with trout tackle and hooked on to bass, but were soon cleaned out, as the trout lines were not long enough to play the big fish.

Reports from Wingo during the week indicate that striped bass are running again. Sunday every fisherman in that section was successful in getting fish. Charles Urfer tried Appleby bay, down the creek about twelve miles from Wingo, a favorite spot with the bass fishermen. Four fish, scaling 8, 10, 12 and 14 pounds, was his catch.

At the Traps

American Championship.—All the noted amateur target shooters of the country, including Woolfolk Henderson of Lexington, Ky., winner of the national amateur championship and the G. A. N. handicap of last year, will be seen in action at the tenth annual competition for the clay target amateur championship of America, held at Travers Island, yesterday and today. The New York Athletic Club is in charge.

Two hundred targets will be shot at each day, the contest on April 30 being in the nature of a preliminary run for honors, with five trophies for the several events. Today will be the day for the decision of the amateur championship, and there will be ten trophies to be shot for, including the chief honor. Today also the interclub five-men team race will be shot. This will be under novel arrangements, for instead of naming a team of five men who will be compelled to represent the clubs which may enter, the clubs will have the privilege of selecting the scores the five highest made by members as the team score and the award will be made on that selection.

Philadelphia, Boston, Baltimore, Wilmington, Pittsburg and Chicago are expected to have teams in competition for this prize under these unusual conditions. There will be a suitable gold medal for each member of the team. There are to be special prizes for the longest continuous run at the traps in the two days, for the highest average and for the high scores at each of the four traps.

Shooting at all the events will be allowed at 16 yards, any standard load allowed. As shooting is to begin each day at 8:30, the club has decided to extend to all entrants the courtesies of the clubhouse during the two days' meeting.

* * *

Sacramento Notes.—The members of the Big Time Gun Club have been divided into five classes, and will begin shooting for valuable prizes offered by the Dupont and Hercules Powder Companies.

Owing to the rapid increase in the membership of the club it has been necessary to install a new trap. There are two of the latest model Legget professional traps for the use of the members at the Schenck ranch now. The membership has reached 111. Application has been made for entrance into the California-Nevada Trap Shooters' Association.

The winner in each of the five classes mentioned will be awarded a silver spoon.

Arrangements have been made to have automobile service from the end of the Traction street car service to Schenck's ranch for the accommodation of the shooters. With the completion of the big new shed, there is plenty of room for all members and their friends at the grounds.

The feature of last Sunday's shoot was the performance of several of the women scatter-gun experts. Miss Lillian Stroud made a remarkable run of 16 straight.

A 25-bird shoot was the card at the last meet. Ten squads shot for prizes. The first five squad winners: First squad, E. L. Ilger, 24 birds; second squad, Monte Newbert, 23 birds; third squad, George Newbert and H. E. Odbert tied with 22 birds; Ralph Jose with 20, and W. C. Thielan with 18, took fourth and fifth places. The next shoot will be May 2.

* * *

Salinas Shoot.—The Rodeo Gun Club has selected Sunday, May 2, as the date of its big bluerock shoot, and appointed committees to make the needed arrangements. There will also be a barbecue. Sportsmen are expected from San Francisco, San Jose and other cities.

* * *

In the Contra Costa Hills.—The recently organized Moraga Gun Club will hold a tournament May 9, on the new grounds in Moraga valley, twenty-five minutes' ride from Oakland. Three fine cup prizes will be hung up for winning shots, and a luncheon will be served gratis to shooters participating. Fred Parrish is secretary of the new club. Entries can be made with "Pop" Merrill at 343 Thirteenth street, Oakland.

* * *

May Blossom Shoot.—Ray Hogg, the San Jose shotgun expert, announces a merchandise trap shoot at Saratoga during the blossom carnival, Saturday, May 1.

* * *

Pajaro Valley Birds.—The Hollister Gun Club opened the season Sunday. The officers of the Salinas Valley Club are: Russel Jarvis, president; Charles M. McKee, secretary; W. F. Shaw and R. L. Townsend, financial committee. The club has a membership of twenty-five shooters.

Shoot In the Rain.—Exposition City Gun Club members, two squads of them, all duck hunters and used to rainy weather conditions, turned out Sunday to smash clay pigeons during the club monthly shoot at the Easton trap grounds. The club schedule gave each man 100 birds to shoot at from the sixteen-yard mark.

Fred Stall of Winnemucca and J. F. Dodds of Imperial, visiting trigger pullers, divided high-gun honors with 89 out of 100 birds each. E. Hoelle was high average among the club shooters with the good score of 85. Dick Reed, the professional, led the bunch, however, with a total of 93 kills. He also broke a 20 and 15 straight, the only other clean score shot during the day was by Stall.

Stall snuffed out 20 birds in the double shoot at twelve pairs, following the club events. The other scores were: Hoag 19, Brickell 15, Swenson 15, Straessler 13, Landry 12, Forestier 7. Scores in the regular club matches follow:

Events—	1	2	3	4	5	Ttl
Birds—	25	20	20	20	15	100
R. C. Reed	23	18	20	17	15	93
J. F. Dodds	23	17	17	18	14	89
Fred Stall	21	17	17	20	14	89
E. Hoelle	21	16	17	18	13	85
H. Brickell	21	16	15	18	14	84
W. A. Landry	17	18	17	18	14	84

* * *

Smelter Smoke.—Charles Flanagan, the well known professional shot of Great Falls, carried off the honors of the day at the shoot of the local club, at the recent Twin Bridges, Idaho, shoot. He also made a run of 67 without a miss. Twenty-seven shooters took part in six events. Butte was represented by the following shooters: Smith, Weatherwax, Poore, Allen, Pritchett, Goddard and Willoughby.

* * *

Stockton Traps.—M. Leffler was high gun at the Mineral Baths shoot last Sunday, where a good crowd saw him average 96%. The scores follow:

Birds—	10	15	25	Pct.
M. Leffler	10	15	23	96
H. Balkwill	9	14	22	90
J. Enos	10	11	24	90
Y. S. Johnson	10	11	23	88
George Ellis	9	13	21	86
W. Grimsley	8	14	18	80
J. Linabary	4	13	21	76
F. Garrow	8	12	18	76

E. Dunkum	7	11	..	..
C. Rothenbush	..	..	18	..
C. McIntire	..	..	12	..

* * *

Santa Crusans Smash Clays.—O. Nutter won the medal Sunday at the Harmony Gun Club's monthly shoot held at Capitola. His score was 23. Captain Eunis won the medal on doubles with a score of 8.

The scores were (15-bird practice): Eunis 14, Lent 13, Nutter 13, Van Olinder 11, O'Connor 10, Blodgett 12, Cunison 10, Jordan 11, Hoig 12, Gross 8.

Club shoot (25 birds): Eunis 21, Lent 21, Nutter 23, Van Olinder 17, O'Connor 15, Blodgett 19, Cunison 18, Jordan 20, Hoig 20, Gross 12.

Shoot at five pair, doubles: Eunis 8, Lent 7, Nutter 7, Hoig 7, Blodgett 6, Van Olinder 4, O'Connor 3, Cunison 5, Jordan 5, Gross 4, Coon 6.

* * *

Garden City Powder Puffs.—The San Jose Blue Club tourney will be attended by several of the Golden Gate Gun Club expert. The Garden City club will hold a three-day registered tournament, under Interstate Association rules, next month. One of the feature events of the shoot will be a three-man team match between Golden Gate Gun Club and San Jose Blue Rock Club teams. Toney Prior, Barney Worthen and Emil Hoelle will comprise the local trio of clay pigeon smashers.

O. N. Ford shot in first place in the weekly shoot of the San Jose Blue Rock Club this week. Mrs. Ada Schilling broke on less clay, scoring 92 out of a possible 100. She made the last 25 straight. All members of the local club will go to Saratoga today to shoot at the festival.

Score: O. N. Ford 93—100, Ada Schilling 92—100, E. W. Jack 91—100, C. R. Arques 80—100, John Gulbert 75—100, O. A. Smith 75—100.

* * *

Good Time Shoot.—At Martinez, a week ago, a team of Alhambra Gun Club members—Fred K. Burnham, Sheriff Veale, Deputy Sheriff Veale, Harold Havens and Fred Webster, defeated the Family Club team—H. Brickell, W. A. Landry, J. W. Dorsey, W. B. Sanborn, H. O. Harrison, S. Splivalo, J. R. Miller and "Duke" Orndorff—by a margin of about 55 birds. Each contestant shot at 100 birds. The battle in the Contra Costa hills took place at F. K. Burnham's Spring Hill farm. The shoot was well attended, and those present were royally entertained.

* * *

Venice Traps.—Aprill 11 was a beautiful day. The opening of the Coast League ball season, trout fishing and a merchandise shoot at the Long Beach Gun Club kept the Los Angeles Gun Club attendance down. Quite a little practice work was indulged in, however, by those present. The scores made follow: D. E. Llewellyn shot at 125, broke 88; C. E. Groat, 125—85; C. H. Richards, 125—73; H. Cline, 125—61; F. M. Young, 175—39; F. H. Nichols, 100—72; B. G. Adams, 100—64; M. T. Tungate, 75—53; F. E. Buckingham, 75—52; S. Isaacs, 75—44; Mrs. C. E. Groat, 50—39; F. H. Teeple, Jr., 50—38; M. D. Towne, 50—31; S. A. Bruner, 50—48; Dr. Thomas, 50—41; F. H. Teeple, Sr., 25—19.

* * *

Live Bird Session.—The California Wing Shooting Club live bird shoot for May is scheduled for the Sobrante grounds tomorrow.

* * *

Trapshooting at Night.—Wilmington will be the scene of extensive experiments in the line of trapshooting at night in the near future. The plan will not be tested until the weather conditions become more favorable, which will probably be very shortly. All the local sportsmen are heartily in favor of the idea and will give their undivided support to make the plan a success.

The man who on account of business finds it inconvenient to take time to shoot during the week will soon be able to enjoy his favorite sport without interfering with his business. Many men will be able to witness contests in the "sport alluring" who never before saw the clay saucer fly. A good wholesome recreation will be afforded the sporting population of Wilmington on the fast approaching warm summer evenings.

The idea, according to the DuPont Magazine, is not altogether new, having been tried on December 12 at Salem, N. J., by the members of the Salem Yacht, Gun and Rod Club. A tournament was staged on that night in which about fifty shooters participated. Some very high scores were made, the highest of which was made by Neaf Apgar, who broke 47 out of 50. Twelve shooters broke over 40 out of 50 birds.

By the simple but efficient lighting system the birds are as visible as in broad daylight. The darker the night the plainer the targets appear. Several expert shots say they experience no difficulty in seeing the birds and state further that the brightness of the light does not affect their aim.

The lights are in three positions: (1) Each gunner has a light directly above and in back of him. These lights do not illuminate the target but are solely for the purpose of giving the shooter light by which to adjust his gun. (2) Lights thrown out from the trap house and expressly for target illumination. (3) Reinforcement lights situated on the balcony of the club house complete the illumination. The light is thrown out from this position by huge 18-inch reflectors. The current used is taken directly from the regular city current with the aid of a stepdown transformer which brings the voltage to 110 on an alternating current. Ordinary methods of installation and No. 6 copper wire are used. The lamps are of the 1000 watt variety. This system gives sufficient light for the purpose.

Interstate Association Tournaments—

May 11, 12, 13—The Interstate Association Tenth Southern Handicap Tournament, Memphis, Tenn., under the auspices of the Memphis Gun Club; $1,000 added money. Winner of first place in the Southern Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

June 15, 16, 17—The Interstate Association's Tenth Western Handicap Tournament, St. Louis, Mo., under the auspices of the Missouri Athletic Association Gun Club; $1,000 added money. Winner of first place in the Western Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

July 8, 9, 10—The Interstate Association's Tenth Pacific Coast Handicap Tournament, San Diego, Cal., under the auspices of the Pastime Gun Club; $1,000 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

August 16, 17, 18, 19, 20—The Interstate Association's Sixteenth Grand American Handicap Tournament, Chicago, Ill., under the auspices of the Chicago Association of Trap Shooters, $3,500 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

Registered Tournaments—Pacific States and Territories:

April 26, 27—Oregon State Tournament, under the auspices of the Portland Gun Club, J. A. Addleman, Secretary, Portland, Ore.

April 28—"T. B." Trap and Gun Club, Lieut. Stephen W. Wallace, Secretary, Las Animas, Colo.

May 5—Utah State Sportsmen's Ass'n Tournament, A. R. Bain, Secretary, Springville, Utah.

May 14—Pueblo Gun Club, F. S. Rainey, President, Pueblo, Colo.

May 18, 19—Washington State Tournament, under the auspices of the Seattle Trap Shooters Ass'n, Hugh Fleming, Secretary, Seattle Wash.

May 26, 27—Delta County Gun Club, Nick Powell and R. A. King, Managers, Hotchkiss, Colo.

May 29, 30—Utah State Tournament, under the auspices of the Utah State Sportsmen's Ass'n, A. R. Bain, Secretary, Salt Lake City.

May 29, 30, 31—San Jose Blue Rock Club, O. N. Ford, Secretary, San Jose.

June 3, 4, 5—Annual Tournament of Rocky Mountain Interstate Sportsmen's Association, under auspices of Mile High Gun Club, Wm. M. Bowman, Secretary, Denver, Colo.

June 7, 8, 9—Sportsmen's Ass'n of the Northwest Tournament, under the auspices of the Portland Gun Club, J. A. Addleman, Secretary, Portland, Ore.

July 1, 2—Vancouver Gun Club, C. A. Porter, Secretary, Vancouver, Can.

July 5—Eureka Blue Rock Club, H. A. Hine, President, Eureka, Cal.

July 5—Sunrise Gun Club, H. S. Hill, Secretary, Sunrise, Wyo.

July 5—Holbrook Gun Club, J. S. Hulet, Secretary, Holbrook, Ariz.

July 9, 10—Gem City Gun Club, Max Weick, Secretary, Laramie, Wyo.

July 10—Chehalis Rod and Gun Club, W. S. Short, Secretary, Chehalis, Wash.

July 12—Rawlins Rod and Gun Club, H. Breitenstein, Secretary, Rawlins, Wyo.

July 12, 13, 14—Los Angeles Gun Club, Fred H. Teeple, Secretary, Venice, Cal.

July 19, 20, 21, 22—Pacific Indians, F. C. Riehl, Secretary, Tacoma, Wash.

August 10—Medford Gun Club, Dr. E. R. Seely, President, Medford, Ore.

September 13, 14—Omaha Gun Club, R. D. Vaught, Sec'retary-Manager, Omaha, Neb.

November 4—Williams Gun Club, F. E. Lowe, Secretary, Williams, Ariz.

November 5, 6, 7—Arizona State Tournament, under the auspices of the Tucson Blue Rock Gun Club, W. A. Julian, President, Tucson, Ariz.

TRADE NOTES.

Rem-UMC Notes.

Mrs. Carl J. Schilling, one of the best known shooters in this country, has been doing some remarkable shooting. At Newman, Cal., on April 10 and 11, shooting a Remington pump gun and Arrow shells, she scored 345x400. The next day at Modesto, Cal., she again made an excellent score of 176x200, using the same shooting combination.

The three high guns at the shoot of the Spokane (Wash.) Gun Club, April 11, all used Nitro Club shells. Al Sullivan, the winner, scored 90x100 shooting a Remington pump gun. Bert Brown and E. Tiffney tied for second place with scores of 89x100.

S. A. Huntley, of Omaha, Neb., won the two day shoot of the Exeter (Neb.) Gun Club, April 14-15. On the first day he beat a field of 35 shooters with a score of 96x100, while the second day saw him leading an even larger field with 145x150. He shot Nitro Club shells in all the events. The last day he also won the 25 target Sliding Handicap race, scoring 25x25, and finishing from 22 yards.

Peters Points.

At the tournament at Pomeroy, Wash., April 18, Lee Matlock and Jim Spence tied for the gold watch trophy 91 ex 100, Matlock won in the shoot-off. W. J. Houser and Jones, shooting Peters shells, tied for second place, 90 ex 100. Houser, won, shooting Peters. Jim Spence made the long run of the shoot, using Peters. Gus Peret, the professional, was high over all, with no handicap, breaking 92 ex 100. Each of the gentlemen mentioned above used Peters Loads, the kind with "steel where steel belongs."

High general average at the Newman, Cal., registered shoot, was won by Mr. Harry Ogelvie of Lindsay, Cal., score 382 ex 400. Mr. L. S. Hawxhurst was third professional, 369 ex 400, both using Peters Loads.

THE FARM

DISEASE OF BEETS CONTROLLED BY CROP ROTATION.

To be rid of the disease known as "crown-gall" the sugar beet farmer has simply to adopt a system of wise crop rotation, planting oats, corn, kafir, milo, or sorghum in the infested field. Even a beet field badly infested with the crown-gall may be freed by the growing of some one of these crops in that field for two or more years before returning to sugar beets.

The above advice is contained in a new professional paper, Bulletin No. 203, of the United States Department of Agriculture, entitled "Field Studies of the Crown-Gall of Sugar Beets." This disease has increased rapidly in recent years and is still on the increase. In many localities where only a small number of cases were observed a few years ago there are now thousands of beets affected with the disease every year, especially if a beet crop has been followed by a beet crop for several years in the same field. The disease has been observed in practically all beet-growing States, from Michigan and Ohio to Montana, Idaho, Utah and Colorado.

Beets have "tumors" and "tuberculosis.

The disease assumes two kinds of forms which scientists have termed "tumors" and "tuberculosis." A protuberance like a wart appears at any point from the top of the beet to the extreme tip of the root, but generally only near the surface of the ground. Observers in former years looked upon the warts or galls as curiosities. Later when the destructive effects of these growths were learned, measures were at once sought for their prevention.

Both kinds of the disease usually manifest themselves at first with a smooth exterior but if the beet has "tuberculosis" the protuberances finally become very rough, cracked and dark, decay sets in and the beet itself rots. The tumor variety of gall remains quite smooth and does not usually decay; however, it lowers the quality of the roots. The growths do not usually appear on the beet until it is one-quarter to one-half grown; that is, until mid-summer. From that time on they may appear at any time until the beet is harvested.

Mechanical injuries to plants offer favorable seats for the infection, and are usually more numerous near the ends of the rows where they are produced by the horse and cultivator in turning. As far as the size of the beet is concerned the galls do not seem to have any marked effect upon it, consequently the tonnage or yield per acre does not seem to be particularly affected by the disease in case it is the tumor type of disease. If the beet roots have decayed as a result of the tuberculosis infection the tonnage will of course be less.

The principal objection to both diseases is that they reduce the sugar content and the purity of the roots. The protuberances themselves are low in purity and therefore detrimental in the milling processes.

—o—

A cozy summer veranda may be covered with grape vines, thus securing the double advantage of a cool, shady nook during summer and a supply of fruit in autumn. The vines may be utilized as a cover for walks and drives or as a canopy over small outbuildings.

There are many ways in which the home fruit garden may be made a place of beauty as well as use, but it is for its use that it should be established primarily. Grow tree fruits, if you have room; grow bush fruits and grapes, if space is comparatively limited; grow a few strawberries on lots where the other things would crowd. No place need be without home-grown fruits of some kind. The man or woman who does not make the attempt is missing one of the delights of life and is not doing his duty to his family and his community—Coleman's Rural World.

Cussing the Rules of Racing

is a favorite pastime of a good many people in the harness horse game, the fault finders sometimes having a real grievance and sometimes not. I lose more money by adhering to the rules than any trainer on the coast, and

Here is the reason:

You, Mr. Race-Goer, can recall days on certain California tracks when

Durfee Horses

WON EVERY RACE ON THE CARD. But for the rules, you would have seen DURFEE HORSES win first and second in every race; but for the rules you would have seen DURFEE HORSES one-two-three in a few races, and you might have seen DURFEE HORSES win all the money in certain events. I had the goods and

I still have them

but so long as I can race but one to a class, what earthly use can all of them be to me? In other hands they would be dividend paying stock, and I offer you anything I own at a price based fairly on his or her earning capacity. I make no reserve on any horse my personal property—take the one in any class that suits you best and I will race the "leavin's." I will sell any part of a collection of thirty head, every one as represented, including proven race horses good in their class, the best racing prospects on this coast, matinee horses, stallions, brood mares, stake colts that can show, all bred in the purple.

See them at Los Angeles or San Francisco, write me for any desired particulars.

William G. Durfee

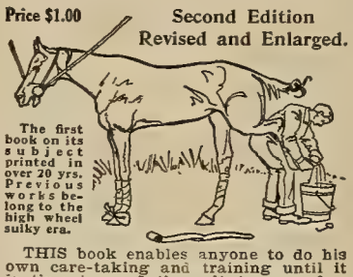
MODERN BREAKING
By W. A. BRUETTE
A revised edition of the latest Treatise on the Training of Setters and Pointers.



THIS book enables anyone to do his own training and fully explains the methods employed by the most successful trainers in developing the setter and pointer. The important lessons are illustrated by photographs from life; nothing is left to guesswork. The entire subject is covered, from the selection, raising and development of puppies to the conditioning of dogs and their handling in the field. The amateur is told, in lucid language, how to make a dog a high-headed, stylish worker, stanch on his points, steady to shot and wing, and a prompt, tender retriever; all of this is accomplished by simple methods, some of them never before given to the public. The instructions for correcting the faults of bird dogs and keeping them up to their training are concise and easily understood. Every man who owns a bird dog or shoots in the field should read this book.

Care and Training of Trotters and Pacers....

Price $1.00 Second Edition Revised and Enlarged.

The first book on its subject printed in over 20 yrs. Previous works belong to the high wheel sulky era.

THIS book enables anyone to do his own care-taking and training until it is time to send the colt to a professional trainer. It explains why promising speed prospects should be handled professionally after a certain period. It covers the intricate details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented; nothing is left to guess work. The entire field is covered in lucid language. The instructions are concise and easily understood. Every man who owns a trotting or pacing colt should read this book. The work contains 160 pages, is handsomely bound in cloth, is clearly printed, is handsomely illustrated and contains no advertisements—it is not a catch penny publication that looks big in the advertisement and is disappointing when received. The work is as modern as a 42-centimeter gun. Both theoretical and practical views are outlined and compared. The book incorporates the views of such authorities as Thomas W. Murphy, Walter R. Cox, Ed Geers and others. Many professional trainers have purchased the book and have found it interesting. Despite the war over 300 copies have been sold in Europe and Australia. The titles of the chapters are: The suckling colt; The weanling colt; Making speed with yearlings; Preparing for the two-year-old futurities; Three-year-olds; Six principal defects in gait, shoeing colts; Shoeing of 101 famous colts of the past four years; Types of shoes illustrated; and Miscellany. This last chapter is full of many useful and valuable hints, too numerous to mention here, such as why horses should have water before hay, and hay before grain. Send us your dollar now. This book contains hints you can make use of at once. If you forget you may regret

RACING AND BREEDING MATERIAL

from the establishment of the late

WENDELIN J. MILLER
of Chico, Cal.

The death of Mr. W. J. Miller causes to be put on the market the choice assortment of Broodmares, Youngsters and Race Winners with which he achieved such signal success in recent years, including

JOHN MALCOLM (2) 2:11½ stake winner, world's champion two-year-old pacing gelding (1913), by Dan Logan 2:07½, dam Susie Miller by Prince Ansel (2) 2:20½, etc. Now four years old and can show as much or more than any pacer in California. Prime for this year's races.

CAPITOLA (2) 2:17¾, (3) 2:14½ stake winner, fastest two-year-old pacing filly of 1912, public trial in 2:06½ as three-year-old, by Dan Logan, dam Lulu Mack by Arthur Wilkes, etc. A great race mare for her class.

BONDALEAN (2) 2:20½ winner of second money in two-year-old division, Breeders' Futurity, 1914, and absolutely the best one in sight for this year's three-year-old pacing stakes. Entered and paid up. Trialed in 2:15 last year. By The Bondsman, dam Katalina 2:11¼ by Tom Smith 2:13¼, etc. As great a youngster as the country affords today.

KATALINA 2:11¼ (dam of Bondalean (2) 2:20½) by Tom Smith 2:13¼, dam Kate Lumry 2:20½ (dam of 5 trotters including Baby Doll 2:10¼, Ella Mac 2:11½, etc.) by Shadeland Onward 2:18½. Katalina was a stake winner, a great aged trotter, and her first foal is a fast, standard performer. She breeds regularly and will become more famous as a producer than is her dam.

TWO-YEAR-OLD FILLY by All Style 2:10, dam Katalina 2:11¼. Staked, paid up. Good prospect.

BAY FILLY, WEANLING by The Proof (2) 2:23¾, dam Katalina 2:11¼. Nice individual and bred to make a fast mare.

LULU MACK (dam of Capitola (3) 2:14½), by Arthur Wilkes, sire of Maymack 2:04½, etc., dam Lady Merrill by Tilton Almont, sire of the dam of Monte Carlo 2:07¾, etc. Good breeder and a proven producer.

BAY FILLY three years old, sister to Capitola (3) 2:14½, never broken.

FIRST NATIONAL bay colt, two years old, brother to Capitola (3) 2:14½. Staked, paid up. Fine youngster.

John Malcolm and Bondalean are in training at the Woodland Stock Farm, Woodland, Cal., their workout days coming on Wednesdays and Saturdays. You can see them at any time and they show for exactly what they are—two of the best young pacers in the land to race in this and future seasons. Prices and particulars of all kind may be obtained upon application by mail or in person to either of the undersigned.

Patrick de Oro p (3)2:22¼, trial (3) 2:08¼, ½-mi. track

Copa de Oro has been retired to the stud for but a very few years and these are from his first foals. Where can you find a stallion whose get have made an equal showing?

COPA DE ORO is the fastest son of Nutwood Wilkes 2:16½ (sire of 8 in 2:10); first dam Atherine 2:16¾ (great brood mare) by Patron 2:14¼, sire of the dams of 7 in 2:10; second dam Athene (dam of 2 trotters, etc.) by Harold 413, sire of Maud S. 2:08¾ and the dams of 5 in 2:10; third dam Minerva (great brood mare) by Pilot Jr. 12, sire of the dams of Maud S. 2:08¾ and 3 others in 2:10, etc. He is one of the handsomest horses in the world, as well as one of the fastest, and is undoubtedly the best bred of all extremely fast pacing sires. From the first I heralded him as the Coast's future great pacing sire, and the performances of his youngsters recorded above certainly show that I had most excellent grounds for that belief.

FEE: $75 For the Season, Usual Return Privilege

I am especially well equipped for caring for mares at reasonable rates in any way that owners may desire. Every attention will be given mares in my charge, but no responsibility is assumed for accidents or escapes. Further particulars may be had by applying to W. G. DURFEE, 2019 So. Figueroa St., Los Angeles, Cal.

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred. Cert. No. 1038

Mahogany Bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

Ethel D. (3).....2:11 — Helen Belle (2)....2:22½
Johnny Dugan p (3)2:16 — Nicola B. (2).....2:23½
John Warwick (2) 2:17 — Santiago (3) 2:24¼
The Lark (3).....2:18½ — May Marian p (3)..2:24¼
Carl (2) .....2:19¾ — Carlrich p (2) 2:24½
Miss Carlokin p ....2:20 — El Carbine (2).....2:27½
Carsto (2) .....2:22½ — Eileen C. (3) 2:29
Carlschen (2) .....2:23 — Carlos (2) 2:29¼
Fulton G. (2).....2:30

CARLOKIN is the best bred son fo McKinney 2:11¼, foremost among the progenitors of 2:10 speed, being out of that sterling producing matron Carlotta Wilkes (dam of Inferlotta 2:04¾, Mary Dillon 2:06¼, Guy Borden 2:07¼, Carlokin 2:07½, and 6 others in 2:30) by Charley Wilkes 3653; second dam Aspasia (dam of 4) by Alcantara 2:23, sire of the dams of 20 in 2:10; third dam Miss Buchanan (dam of 1) by Clark Chief 89, sire of the dams of 2 in 2:10, etc. Carlokin was not only a fast and rugged campaigner, but, point for point, one of the most ideal individuals ever foaled. I chose him from among all the best horses of the country as a prospective great sire, and in 1913-1914 his get won more coast futurities than those of all other sires combined. What more could you ask of them?

FEE: $75 For the Season, Usual Return Privilege

Every attention will be given mares in my charge, but no responsibility is assumed for accidents or escapes. Further particulars may be had by applying to W. G. DURFEE, 2019 So. Figueroa St., Los Angeles, Cal.

SAVE-THE-HORSE

(Trade Mark Registered.)

Used by America's Most Famous Reinsmen

Cures the Horse and Himself Too

R. S. Steth, Holliday, Mo., Jan. 4, 1915, writes:

Holliday, Mo., Jan. 4, 1915.

Troy Chemical Co., Binghamton, N. Y.

Dear Sirs:—I want to thank you for what Save-The-Horse did for me. I cured my mare of a bog spavin. I thought that if it would cure a bog it ought to cure a bog on a man, so I gave it a trial. I had a very bad case of Varicose veins. Doctors told me the only help was to wear an elastic stocking; and one said that an operation was the only resort because it would break soon, and there would be a running sore. The veins were as large as a broom handle. I began using it on myself, and after six months, I could not tell which leg was affected. It was a permanent cure, and it has not come back in 9 months. I recommend it to anyone suffering from same.

Respt., R. S. STETH.

Throughout the Whole World Save-The-Horse has Stood Up and "MADE GOOD" Under Every Test.

Save-The-Horse does not blister;
Does not discolor or destroy the hair nor leave a scar;
THE RESULT IS PERMANENT.

$5 EVERY BOTTLE IS SOLD with a binding contract to refund money or cure any case of BONE AND BOG SPAVIN, THOROUGHPIN, RINGBONE (except low), CURB, SPLINT, CAPPED HOCK, WIND PUFF, SHOE BOIL, BROKEN DOWN, INJURED TENDONS and OTHER LAMENESS. No blistering or loss of hair. Horse works as usual.

TROY CHEMICAL CO., Binghamton, N. Y.

D. E. NEWELL, Agent, 80 Bayo Vista Ave., OAKLAND, CAL.

SAVE-THE-HORSE is sold with Contract by Druggists and Dealers Everywhere

WORLD'S CHAMPION YEARLING TROTTING STALLION 1910
Unbeaten Two-Year-Old in 1911

Winner of California State Fair and Pacific Coast Breeders' Association Futurities in 1912. Record in Third Heat of a Winning Race.

Also holder of the World's Record of a Five-Heat Race by a 3-yr.-old Stallion

Limited number of approved mares at $100 the season.

WILBUR LOU was bred to seven (7) mares in 1912 and got seven (7) foals; six (6) were trained, on the property of John Christiansen, of San Francisco, which was said to be the fastest yearling on the Pacific Coast.

The five (5) owned by the Hemet Stock Farm showed as follows:

FIESTA LOU, record 2:25, half-mile track, ½ mile—1:08¾
SELMA PALEY, trotted ½ mile 1:13¾; one-eighth— :17¾
GOLDSMITH LOU " ¼ mile :35½
GERTRUDE RIVES " ¼ mile :36¾
BILLIE BOYD " ¼ mile :38

This includes the entire get of WILBUR LOU.

KINNEY de LOPEZ 2:23,

Son of KINNEY LOU 2:07¾ and BETSY DIRECT by Direct 2:05½

$50 THE SEASON

KINNEY DE LOPEZ is the sire of DON DE LOPEZ, trial one-half as a yearling 1:13¾, one-eighth 17½ seconds; could have trotted in standard time as a yearling. KINNEY DE LOPEZ is certain to sire early speed.

Terms: Cash at time of service with usual return privilege, or money refunded at our option. Excellent pasturage and best of care taken of mares, but no responsibility assumed for accidents or escapes.

BREED TO THE COAST'S CHAMPION CAMPAIGNER AND FUTURITY SIRE

JIM LOGAN 2:01¾

(3) 2:05½, world's record to 1912 and yet the fastest third heat ever paced by stallion of that age; (5) 2:04¼, (6) 2:03¼, (7) 2:02¾, (8) 2:01¾, race record for Pacific Coast.

Licensed Pure Bred—Cert. No. 1028.

All winning race records. Registry No. 44997.

Sire of MAXINE (3) 2:15 Winner Pacing Division Pacific Breeders Futurity 1914

Trial in 2:09, half in 1:01, quarter in :29 as a three-year-old.

Son of CHARLES DERBY 2:20, brother to Klatawah (3) 2:05½, etc., and sire of TEN in 2:10.

Dam, EFFIE LOGAN, California's greatest producer of extreme speed (dam of Jim Logan 2:01¾, Sir Albert S. 2:03¾, and Dan Logan 2:07½, sire of John Malcolm (2) 2:11½, champion two-year-old of 1913), by Durfee 11256; second dam Ripple, by Prompter 2305, sire of the dam of Gratt 2:02¼, etc.; third dam Grace (dam of Daedalion 2:08½, Creole 2:15 and Eagle 2:19½), by Buccaneer 2656, sire of the dams of 2 in 2:10; fourth dam Mary, great broodmare, by Flaxtail.

JIM LOGAN is not only a horse of most acceptable size and pleasing conformation, but is one of the most rugged campaigners ever raced. After acquiring a world's record as a three-year-old he reduced his record every year raced and is a sound horse today—no more eloquent testimony of his genuine natural qualities could be given. Of his very few living foals, every one trained has shown speed in convincing quantity, and the only one to be raced, Maxine (3) 2:15, began her career as a futurity winner. Could you ask more of a well bred horse than that he be a champion campaigner and transmit his qualities to his get?

In the stud, season of 1915, at Woodland Race Track

FEE: $50 for season, with usual return privilege, or $75 to insure living colt. Fees payable at time of service or before removal of mares. Excellent pasture at $5 per month, with best of care for mares, though no responsibility will be assumed for accidents or escapes. Call at race track, or address

J. BIMO MONTGOMERY, Davis, Cal.

The only son of Jay McGregor 2:07¼ on the Pacific Coast, and the only stallion in California whose sire and dam both have records faster than 2:10.

Onward McGregor

TROTTING RECORD (3) 2:23¼.
YEARLING TRIAL QUARTER IN :33.

Bay horse, black points. Height 16 hands, weight 1100 lbs. Licensed Non-Standard, Cert. No. 24.

First dam MARY GORDON 2:09¾ by GORDON 3127 (son of Onward 2:25¼); second dam Nell by Young Octoroon, sire of Shadow (dam of 4 and grandam of Peter the Great 2:07¼, J. Malcolm Forbes 2:08, etc.) Will make a limited season of 20 mares at Pleasanton Driving Park at $35 with usual return privilege. Every mare bred to him this year will be nominated in the Breeders and State Fair Futurities for foals of 1916 and first payment made by his owner. Address for all particulars

THE PROOF 2, 2:29¾

A. T. R. No. 51956
LICENSED PURE BRED CERTIFICATE No. 1029

From the family of Bingen 2:06¼, foremost among present day champions of all ages and gaits.

Son of **The Exponent 2:11¾** (by Bingen, dam Iva Dee by Onward 2:25¼), sire of 32 performers including The Temptress 2:08½, 6 three-year-olds, 20 two-year-olds and 1 yearling.

First dam **Chord 2:27** (dam of 4) by Wilkes Boy 2:24½, sire of 4 and the dams of 11 in 2:10; second dam **Sonata** (dam of 3) by Dictator 113, sire of 2 and the dams of 7 in 2:10; third dam **Cadenza** (dam of 2) by King Rene 1278, sire of the dams of 2 in 2:10; fourth dam **Virgie Wilkes** (dam of 4) by Geo. Wilkes 2:22, sire of the dams of 16 in 2:10.

In the stud, season of 1915, at Pleasanton Driving Park, at $50 the season with return privilege. We have colts in training to show his qualities as a sire. Grandsons of Bingen are siring champions such as Etawah 2:03½, Anna Bradford (3) 2:00¾, etc. Address for all particulars,

KEEFER & SPENCER, Pleasanton, Cal.

Grandly Bred A Colt Trotter A Proven Sire

Bon McKinney 51480

Cal. State License, Pure Bred No. 1213.
Three-year-old record 2:24½; trial (3) 2:15, 1:05.
Sire of
Bon Courage (2) 2:12¾ **Bon Bell (3) 2:17¾**

Son of **BON VOYAGE 2:08** and **DAPHNE McKINNEY** (dam of Frank N. 2:07¼, etc.), by McKinney 2:11¼; second dam La Moscovita (dam of Bon Guy (3) 2:11¾ and 2 others) by Guy Wilkes 2:15¼; third, fourth and fifth dams also in great brood mare list. Bay horse, in every respect a great individual, with substance, finish, and natural, frictionless trotting action. Very sure foal getter and a steadily rising young sire, his few foals possessing his most excellent qualities to a marked degree. Bon Courage was the only California bred three-year-old to win a heat from Esperanza in 1914.

In the stud, season of 1915, at the **Rush & Haile Ranch, Suisun, Cal.**, season closing August 1st. **Fee, $25 with return privilege**, payable cash at time of removal of mare. Good pasturage at $2.50 per month. For further particulars address

BEN F. RUSH, Suisun, Cal.

Derbertha Bells

Licensed Pure Bred, Cert. No. 1172.
NO. 60907 A. T. R. RULE 1.

DERBERTHA BELLS, foaled 1911, stands 15.3, weighs 1200 pounds, and is of magnificent conformation, style, trotting action and color; being a solid dark bay or brown with splendid mane and tail, massive well-formed limbs and feet, beautiful neck and head, fine, well set ear and eye as kindly as a fawn's and as courageous as a lion's. His breeding can only be hinted at here as he traces 20 times to Hambletonian 10—5 through Electioneer, 5 through George Wilkes, 4 through Strathmore and 4 through Abdallah 15 (the big four of the sons of Hambletonian), and twice through his daughters. This breeding is perfectly balanced by 18 crosses to Mamb. Chief 11—5 of these through his greatest son Mamb. Patchen 58 (leading progenitor of the dams of trotting sires), backed up by 2 crosses to Pilot Jr. 12, 4 to Black Hawk 5, 4 to Imp. Trustee and crosses to such other famous broodmare sires as American Star, The Moor, A. W. Richmond, Williamson's Belmont, etc.

I challenge any man to name a stallion with a broodmare inheritance approaching that of Derbertha Bells,—5 crosses to Green Mountain Maid (dam of 9 and Electioneer), 3 to Alma Mater (dam of 8 and 7 sires, including Alcyone and Alcantara), and 1 each to Miss Russell (dam of 7, including Maud S. 2:08¾ and 6 sires, including Nutwood), Dolly (dam of 4 and 5 sires, including Director, Onward and Thorndale), Beautiful Bells (dam of 11, including 4 world's champions and 10 sires) and Minnehaha (dam of 8 and 6 sires). These are pre-eminently the greatest mares of history in point of number of descendants in the standard list, besides 2 crosses to Bertha, the only mare with 2 in 2:04½, 5 in 2:10 and 13 in the list. Counting duplicates this pedigree contains the blood of 20 mares with an average of 9 performers each, and of the 14 mares appearing in the pedigree of two or more 2:10 trotters in 1910 this pedigree contains 8.

His disposition and deportment are in perfect harmony with his superlative breeding and conformation, all that could be desired. I own a yearling filly by him that stamps him as a sire of the first rank, and I invite the most critical inspection both of him and his get. He will be allowed a few choice mares at $25.00 the season with usual return privilege. Tabulated pedigree upon request.

J. W. PENDLETON, Owner,
1601 Seminary Ave., OAKLAND, CAL.

Peter The Great

Is the world's foremost progenitor of extreme speed; sire of 30 in 2:10, etc.

HIS SON

PETER McKLYO 3, 2:12 1-2

Cal. State License Pure Bred 2339

will make the season of 1915 in the training stable of James Thompson at the **San Jose Driving Park** beginning March 15 and ending July 1.

PETER McKLYO (3) 2:12½, the only California-owned son of Peter the Great of an age permitting stud duty, is out of a great-bred young matron by Jay McGregor 2:07¼—Klyo (2) 2:29½; second dam Miss Spears 2:21¾ (dam of 6 including Shakespeare (3) 2:09¾); third dam Medium's Last (dam of 7 including Trampfast (2) 2:14¼); fourth dam Suzanne (dam of 1 and grandam of 10 including Susie J. 2:06½).

This colt is four years old, having obtained his record last season with a very limited amount of work. He came into my hands perfectly green in February, 1914, and developed speed so fast that I had to take his shoes off and jog him for two months barefooted. Being by Peter the Great, the sire of the century, and, as you will notice, out of a daughter of Jay McGregor, another wonderful family of horses, he is one of the best bred young horses in the world and I can truthfully say he is one of the very best individuals that I ever had the pleasure of looking at. He can trot a quarter in 30 seconds, and I am firmly of the opinion that he will trot a mile this fall in 2:06 or better.

Fee, $75 the season with return privilege. Mares pastured at usual rates and accorded best of care, but no responsibility assumed for accidents or escapes. Service fee and pasture bills must be paid before removal of mares. Address for all particulars

L. H. TODHUNTER, Owner, Sacramento, Cal.
JAMES THOMPSON, San Jose Driving Park, San Jose, Cal.

EXPRESSIVE MAC 2:25 1-2

A. T. R. No. 41513 Licensed Pure Bred, Cert. No. 1041.
Clara Mac 2:04½ Sire of **Vera Hal 2:05**

Only stallion in California to sire a new 2:05 performer in 1914, and one of three stallions in U. S. to sire two new ones in 2:05 that season.

Also sire of Madam Mac (4) 2:10¼, trial 2:07; Eddy Mac (3) 2:29½, trial 2:13; Nellie Mac, trial 2:18 trotting, good for 2:10 this year, and numerous others with fast trials. In four show classes at Fresno his colts won three firsts, one second.

Son of **McKINNEY 2:11¼** and the great brood mare **EXPRESSIVE 2:12½** by **ELECTIONEER 125**. Ideal in color, size and conformation—seal brown, height 16½ hands, weight 1275 pounds. Permanently in the stud at my ranch three miles south of Selma, at **$25 the season**, usual return privilege, or **$35 to insure**. Good pasture for mares at $2 per month and best of care given. No responsibility assumed for accidents or escapes. Address for all particulars

J. H. NELSON, Selma, Cal.

WOODLAND STOCK FARM

INCORPORATED

Offers for Service for the Season of 1915

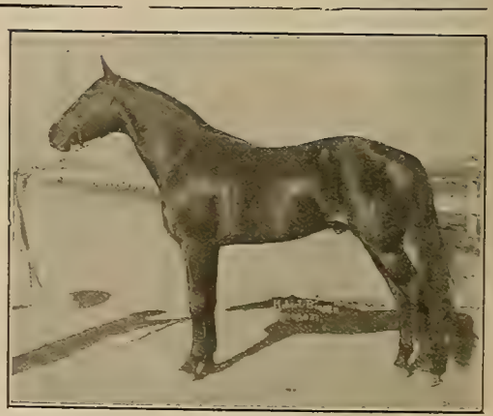
PRINCE ANSEL

CERT. 1062

2, 2:20½ A. T. R. 29220

Sire of
Prince Lot 2:07¾
Joseph Ansel (3) 2:12¾
Lottie Ansel (2) 2:14¼
Laura Rogers 2:11¾
Adansel (3) 2:14½
Arista Ansel (2) 2:18¼, etc.
And the dams of
John Malcolm (2) 2:11½, etc.

PRINCE ANSEL is not only doing more than any other individual to perpetuate the fame of the great family of **Dexter Prince**, but he has few rivals in the land as a progenitor of futurity winning youngsters, as attested by the summaries of coast classics year by year. None more highly esteemed by horsemen in general. **Fee, $50 with usual return privilege.**



ROBERT BINGEN

CERT. 1061

2:11¼ A. T. R. 45033

Best Bred Son of
BINGEN 2:06 1-4

Sire of **Uhlan 1:58**; 14 in 2:10
First dam **Episode 2:18** half sister to Peter the Great 2:07¼
Second dam **Santos**, dam of Peter the Great 2:07¼, J. Malcolm Forbes 2:08, etc.

ROBERT BINGEN, in every way one of the most desirable horses ever offered for service in California, represents the families whose blood is most eagerly sought by successful breeders today—Bingen and Peter the Great. He is the only son of Bingen standing for service in California and his book is rapidly filling. **Fee, $75 by the season.**

True Kinney 2:12¼

The best young McKinney stallion in California—a colt trotter and a coming sire. His first foals are among the best on the farm and show for themselves. Terms on application—season limited.

TRAINING DISTEMPER...

Ever hear of this? Yes, of course you did, but under a different name. You have seen it in cases where the horse was "overtrained," worked a little too fast and regular. The nervous system gets the shock, after the voluntary muscular system has been taxed too heavily. The trouble starts in the mucous surfaces, and the digestive apparatus, too, must then be impaired. He begins to cough when the glands are materially affected.

"SPOHN'S"

Is your true salvation. It restores the appetite and normal functions of the whole system. The action in such cases is remarkably rapid and sure for recovery when you use this remedy according to instructions with each bottle. Only 50c and $1 a bottle; $5 and $10 a dozen. Sold by all druggists, horse goods houses, or express prepaid by manufacturers.

SPOHN MEDICAL CO., Chemists and Bacteriologists, Goshen, Ind.

Held Out Because of a Ruptured Tendon

THOUSANDS of races have been won by inferior horses simply because the horses that rightfully should have won were held out because of ruptured or sprained tendons. There's many a horse today pulling delivery wagons, suffering with limb diseases, whose place should be on the race track winning big purses for their owners. And they would be, if their owners would only give them proper treatment with

The Only Spavin Remedy in the

Mack's SPAVIN $1000 REMEDY

World Sold Under a $1000 Bond

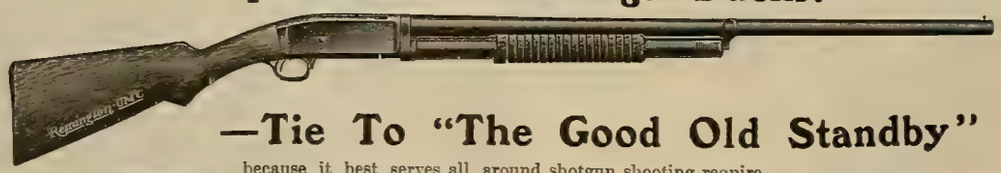
WINCHESTER

"LEADER" AND "REPEATER" FACTORY LOADED SHELLS

THE REASON WHY IT PAYS TO SHOOT THEM



Every man likes to get the most for his money. Now, in the case of shotshells this means the most uniformity, the greatest velocity and penetration, the most even spread and the most sureness and quickness of fire. What is the best means of discovering these qualities in shotshells? Is it not by noting their general performance at the traps, where large quantities are used? You agree. Well, then, how about the records made by Winchester Factory Loaded Shells? Chief of these is the World's Long Run of 565 Straight; the winning of eleven out of fifteen season's averages—a weighty argument—; the highest average for a season's shooting made by any shooter; professional and amateur championships several times; and high averages too numerous to mention. There's no getting away from facts like these. They are superior to talks on theory of construction, etc. If you believe in practical demonstration and act according to your belief, then you'll shoot Winchester Factory Loaded Shells. They are sold by all dealers.

because it best serves all around shotgun shooting requirements in this country, no gun is more popular with American sportsmen than this highly perfected Remington model.

This general popularity, proven over and over again every day in every community could only result from real merit.

You will find in the Remington Pump the beauty of line and finish and finely adjusted balance that delight sportsmen. Then, too, you will find that you can load it—even as a single-loader almost unconsciously, and the ease of action will be a pleasant surprise to you.

You will appreciate these other big Remington-UMC features—Solid Breech—Hammerless—Bottom Ejection—Take Down—all told about in a Pump Gun booklet which is yours for the asking.

VOLUME LXVI. No. 19. SAN FRANCISCO, SATURDAY, MAY 8, 1915. Subscription—$3.00 Per Year

First Lessons in Grazing
CARRIETTA 2:18
the only mare to produce three yearling trotters
with standard records, and her filly foal
by Peter the Great 2:07¼.

$5,000.00 Guaranteed | $3,000 TO FIVE-GAITED DIVISION :: $2,000 TO THREE-GAITED DIVISION | **$5,000.00 Guaranteed**

THE CALIFORNIA STATE FAIR GAITED SADDLE HORSE FUTURITY No. 2.

FOR FOALS OF 1915. **OPEN TO THE WORLD**

ENTRIES TO CLOSE JUNE 1st, 1915

The produce of any mare bred in 1914 to a stallion registered in either the American or Pacific Coast Gaited Saddle Horse Association.
To be given under the direction of the California State Agricultural Society and to be shown as weanlings, yearlings, two-year-olds and three-year-olds.

ENTRANCE and PAYMENTS:

MARES.—Mares to be nominated by June 1, 1915, when a payment of $2 must be made. Each mare's name, color and the name of the horse to which she was bred in 1914 must accompany the entry fee.
On July 1, 1915, the color and sex of the foal to be given and an additional payment of $3 must be made.
On February 1, 1916, a payment of $10 will be due on yearlings.
On February 1, 1917, a payment of $15 will be due on two-year-olds.
On February 1, 1918, a payment of $25 will be due on three-year-olds.

CONDITIONS:

ENTRIES TO CLOSE JUNE 1st, 1915.

Every foal of 1915 produced by a mare nominated herein is eligible to compete in all four classes of this stake by its owner making payments as herein provided in the division in which it is entered. Winners will not be barred.

All nominations and payments must be made to the Secretary of the California State Agricultural Society, at his office in Sacramento.

Nominators must designate when making starting or show payments whether the horse is five or three gaited.

STARTING AND SHOW PAYMENTS

On the first day of August each year the following payments will be due:

	Five-gaited	Three-gaited
On weanlings, to be shown in 1915	$10.00	$ 5.00
On yearlings, to be shown in 1916	15.00	10.00
On two-year-olds, to be shown in 1917	25.00	10.00
On three-year-olds, to be shown in 1918	40.00	15.00

CLASSIFICATION and DIVISION of MONEY AS FOLLOWS:

Stallion, mare or gelding	Five-gaited	Three-gaited	To sire of first money winner in each division	To dam of first money winner in each division
Weanlings, 1915	$ 300.00	$200.00	$10.00	$10.00
Yearlings, 1916	500.00	300.00	15.00	15.00
Two-year-olds, 1917	800.00	500.00	25.00	25.00
Three-year-olds, 1918	1200.00	800.00	50.00	50.00

The amount contested for shall be divided into six moneys as follows:

To the winner	35 per cent
To the second colt	20 per cent
To the third colt	15 per cent
To the fourth colt	12½ per cent
To the fifth colt	10 per cent
To the sixth colt	7½ per cent

MANNER OF SHOWING:—Weanlings, yearlings and two-year-olds shall be shown to halter and three-year-olds under saddle.

The right is reserved to declare the stake off prior to August 1st, 1915, if same does not fill satisfactorily upon the refunding of all entries received.
In case a mare fails to produce a colt, produces a dead coalt or foals twins, or her colt dies, the right to substitute by the owner another colt from a mare bred to a registered stallion is reserved on or before January 1st, 1916.
In case a nominated colt is dropped out, and later his owner desires to re-enter same, this may be done upon a payment of all sums which should have been paid had the entry been kept good and $25 additional.
The Board of Directors of the California State Agricultural Society reserves the right to interpret and determine all questions affecting this stake.

VICTORIES OF PARAMOUNT PARKER GUNS 1915

Look, Read, Remember!!!

At the Pinehurst Mid-Winter Handicap Shoot the four contestants making the highest scores in the preliminary event all shot Parker Guns.

RATHER STARTLING, ISN'T IT?

In the main event, the PINEHURST HANDICAP, Mr. S. A. Huntley, although placed further back than any other contestant, scored

95 out of 100 Targets at 23 Yards

and landed the Trophy. Furthermore Mr. Huntley was high over all for the entire tournament and as usual shot his 34-inch barrel PARKER GUN.

In 1914 Parker Guns won **The Grand American Handicap, The National Championship** at single and double targets, the

FIRST and SECOND YEARLY AVERAGES

and made the best scores on the Pacific Coast.

Follow the pace set by the champions of America and for either single or double target shooting use

Long Tom Parker Guns

For game shooting afield, enhance the pleasure of the day's sport and improve your skill by shooting a small gauge PARKER GUN, pioneer makers of small bores in America. Instructive booklet on small bore guns sent free on request.

JOHN W. VOGELSANG.

John W. Vogelsang, well and widely known among light harness turfmen on the eastern side of the Rockies, died at the Central Hospital in Oakland last Friday morning. He returned to his family in that city from St. Louis on February 12 in a serious condition from heart trouble and though the medical men pronounced his case hopeless, from the start, he fought off the grim reaper for several weeks after they had given him up.

Born in Hanover, Ohio, in 1850, of stout German stock that had settled there in the eighteenth century, Mr. Vogelsang was a keen and devoted lover of the American trotter from his youth up. His early life was passed in the troubles and turmoil of the civil war, but as he came to manhood he had a keen eye for gait and from that was enabled to secure more than one prize among the stock bred in his own section. As his business affairs prospered he acquired later on several good campaigners that were prominent in the circuits of the middle states. He was also able to pick a competent trainer for his select stable in the late A. N. Smeall, a veterinary surgeon of Lima, Ohio, who handled for him such consistent race winners as Plush, Orphan Boy, Little Ida and the pacing mare Toledo Girl. About the year 1888 he sold Plush to A. H. Moore of Philadelphia for a good long price and she went into the hands of the master reinsman James H. Goldsmith, who took her through the Grand Circuit.

After that Mr. Vogelsang took up turf journalism and represented at different times the American Horse Breeder of Boston and the Horse Review of Chicago, visiting most of the important meetings in his section and as far south as Lexington, in their interests. He did good service for the New York Trotting Association during 1901 and 1902 when brilliant programmes were conducted at Brighton Beach track on Long Island. Then he gave his attention to the manufacture of wood fibre plaster and wall board of that material, forming a connection with the Pittsburgh Plate Glass Company which kept him in St. Louis for several years.

He came to California in 1911 and through his energy a company was organized and a model factory was equipped at Emeryville with machinery of improved type that he had patented. Even this did not entirely wean him from his love for a good trotter and he had the handsome gelding Champ C. while in St. Louis, using him on the road there for several years.

Though perhaps not so well known to the horsemen of the Pacific slope, Mr. Vogelsang had a host of friends in the middle and eastern states who will join with the Breeder and Sportsman in extending sympathy to his wife, and son, Earl C. Vogelsang, whose loving care made his last hours as comfortable as human hands could do. By his own request his body was cremated and services were held last Monday at the columbarium in Mountain View Cemetery, Oakland, where his ashes will be kept in the land of his adoption, that he learned to love so well.

—o—

Gerhardt Wempe of this city has his favorite mare Plumada by Advertiser, dam Plotina by Dexter Prince, at San Jose to be bred to Peter McKlyo (3) 2:12½. Mr. Wempe's other matron, Belle Alwin by Lord Alwin—Belle W. is at Pleasanton and has been bred to Zomblack (3) 2:26.

The brand of weather lately handed out to the Pacific coast is something we could have gotten along without, but——

◈◈◈

Any seasoned sport will admit that a long and uninterrupted run of good luck is neither healthy nor natural, however, so we will be all the better a bit later.

◈◈◈

Lest we forget!

◈◈◈

Our "esteemed contemptuary," the Horse Review, in its benighted ignorance of truly decent climatic conditions, is liable to draw a few comparisons in support of its theory that the northwestern hamlets of the grand old state of Illinois are situated in a "climatic paradise" of such mellifluence as to "arouse the envy of California!"

◈◈◈

Yes, Genevieve, that's just what we think, too—"The nerve of some people's children!"

◈◈◈

Can you imagine Chicago folks traveling south for seventy minutes on May Day and seeing M. & M. candidates trot halves in 1:03, and three-year-old trotters reel off miles in 2:20½, 1:08, :32¾, :15¾?

◈◈◈

Or, maybe, go east for a couple of hours' ride and see free-for-all pacers step two lap tracks in 1:01¼?

◈◈◈

Or 2:20 pacers go halves in 1:03 over the same dirt?

◈◈◈

Or 2:20 trotters go the short route in 1:05?

◈◈◈

Or folks sitting around on the lap of good old Mother Earth, with long, green grass for cushions, eating picnic dinners of fried chicken and all those things?

◈◈◈

Splash! The Review outfit has "done fell in the lake!"

◈◈◈

Speaking of speed, however, we overlooked a bet. Clara Mac worked the Woodland track last week in 2:09, with the last half in 1:00½ and the quarter in :29!

◈◈◈

While Robert Bingen worked in 2:12½ and Lottie Ansel went the route in 2:13, with the half in four and the quarter in thirty-one seconds.

◈◈◈

If horses like these could only have been wintered in that "climatic paradise" place they might really have been up to something by now!

◈◈◈

You bet they might—a mile in forty, maybe.

◈◈◈

Not changing the subject at all, Joe McGuire is the first of the harness horse delegation to occupy quarters at the exposition track.

◈◈◈

Al Schwartz ran him a close race, and probably there are a number of other trainers there by the time you read this. A little sunshine early in the week will bring a bunch of them.

◈◈◈

Just how fast that exposition track will be on June 19 is arousing quite a bit of discussion. One local horseman has laid seventy-five bucks that the 2:06 pacers beat 2:04 in at least one heat. How about the free-for-allers?

◈◈◈

Parties who have been bewailing the futility of The Hague as a peace maker are reminded that while there is life there is hope. Sure there is. The California and San Francisco Driving Clubs have even suspended hostilities and signed the treaty of peace!

◈◈◈

And as for miracles—the woods are full of 'em! If skeptical, ask one Adolph Ottinger to have a drink.

◈◈◈

By the way, did you notice that Lon Daniels "Durfeeized" the May Day program at Dixon? He did—won all three races.

◈◈◈

Ain't it a shame he didn't have a string for the relay race?

◈◈◈

Joe Ryan of Sonoma, who "likes horses because he likes 'em," has picked out this summer as his banner year for having a good time, and with Jim Sterling to help him is getting ready quite a string for both the amateur and professional events. Kate Dillon, by Sidney Dillon out of Katy Darling (dam of Emmeline Dillon 2:18¼) by John L. is entered in the 2:20 driving club trot at the exposition and is beating 2:20 in her work on a half mile track, with halves in six and better, and Joe's pacer for the same class, amateur, is the black horse Silver Voyage by Bon Voyage 2:08, out of the great brood mare The Silver Belle by Silver Bow. He is also working a number of other horses, including Le Donna, pacer, by Nushagak; the filly Lady Stillwell by Stillwell, dam by Nutwood, and the trotter Titanic by Tom Smith 2:13¼, out of Lilly Dale. A few weeks ago he broke for O. J. Maffei of Sonoma the filly Bondsmaid, by The Bondsman, and she is acting so much like a real trotter and coming so steadily that she may be a starter in some of the late events. Sonoma has a good half mile track and could accommodate more horses and horsemen nicely.

King Daphne 2:04½, Sidney Goldman's former favorite, purchased last fall by Billy Moore of Marion, Ohio, is now at Columbus in the hands of Trainer Dan Lake

◈◈◈

The success attending the May Day races at Dixon makes a rosy outlook for the Alameda butchers' day at Pleasanton on July fifth, when over five times as much money will be hung up for the trotters and pacers.

◈◈◈

W. F. Whittier of the Hemet Stock Farm is spending several days at his "retreat" on the McCloud river, where he recuperates from the strain and worry of business affairs by getting right close to nature and putting in a good deal of his time whipping the waters of the neighboring streams for trout.

◈◈◈

For the feature event of the initial program of the San Francisco-California Driving Club there will be a match race between George Woodward 2:07½, driven by S. H. Cowell of the Sacramento club, and Dick W. 2:06¼, driven by A. Ottinger of the local organization. They are both beating 2:10 in their work at present.

◈◈◈

The popularity achieved by the gaited saddle horse futurities has prompted the California State Agricultural Society to announce event number two of their series, the total sums distributed under its conditions reaching the tidy figure of five thousand dollars. The awards are for both three- and five-gaited horses from weanlings to three-year-olds inclusive, full particulars being published elsewhere in this issue.

◈◈◈

Every breeder of trotters should write the Horseman, Chicago, for full particulars as to the $20,000 futurity which closes June first. Entrance fee and pre-starting payments are most liberal and there are some two score ways of earning money in the stake. Under one novel provision for trotting colts on half mile tracks, it is possible for coast horsemen to win money without leaving the state, and again we suggest that you will find it worth while to investigate the conditions fully and make entrance.

◈◈◈

Adolph Ottinger, foremost among San Francisco's fun drivers and patrons of the trotting horse, is spending a few days in Portland. Very appropriately, "Ot" made the trip "on the water wagon," and that expression goes both ways from the jack. The Rose City is one water wagon, and "Ot" has been "riding the sprinkler" figuratively for three weeks or more and doing a good job at it. Nobody knows what caused his defection from the Highball Circuit, but the general supposition is that he simply got mid-April tangled up some way with New Year.

◈◈◈

In some incomprehensible manner the report was circulated in some quarters that there had been sickness and even death among the horses recently quartered in the stables of the livestock department at the P.-P. I. E., rumors that were doubly injurious because without foundation whatsoever. The editor of this paper had occasion to pay frequent visits to the livestock department during the stay of the polo contingent, and never failed to make inquiries covering this particular point. In no instance was there any variation in the answer—the health of the ponies was most satisfactory, and owners, trainers and caretakers had a good word ready for the convenience, comfort and sanitary condition of their quarters. Few stock farms or permanently established racing plants can boast of stabling facilities the equal of those at the exposition, and just why or how rumors like the above should be circulated, and especially believed, is hard to understand. Do not be alarmed by such canards, nor postpone coming to the P.-P. I. E. track on that account. Everything there is ready and right.

—o—

MEETING AT WOODLAND NEXT SATURDAY.

The first regular meeting of the season on the coast is announced for next Saturday, May 15, to be held at the track at Woodland Stock Farm under the management of Harry Dowling. The farm has a number of youngsters they wish to mark before the campaigning stable leaves for the exposition, and a number of the home trainers will also take advantage of the occasion to provide their juvenile trotters and pacers with the credentials necessary for their debut in the select company represented in the Year Book, the day's activities being scheduled to begin at ten o'clock in the morning.

The principal drawing card of the occasion will be a free-for-all pace, and while the entries have not reached us we can at least risk a pretty fair guess on the field—Clara Mac 2:04½, Jim Logan 2:01¾, Dan Logan 2:07¼, Teddy Bear 2:05, Vera Hal 2:05 and possibly Donald and Potrero Boy. The other events have not yet been announced, but with the members of the training stables of Woodland Stock Farm, Charley Silva, Elmo and Carey Montgomery, Will Ivey and Hi Hogoboom all right on deck in racing trim there are plenty of horses on hand to provide a most entertaining day's sport. It will be an excellent opportunity to get a line on some of the candidates for the big money at the exposition, as well as on quite a bit of futurity timber, and lovers of the game will find the trip to the Yolo county capital well worth while. The track has been in fine shape all season, the horses are all well along in their work, and there will no doubt be some pretty merry heats at both gaits.

Prune Belt Speed Merchants

Four times this winter has your humble servant put a camera in his pocket and journeyed down the Peninsula to snare a few pictures of the horses in training at San Jose Driving Park, and four times has he returned to San Francisco with all his "cartridges" unfired, for the weather man simply will not stand for it, apparently. Once it rained so hard that I never left the station; the next time there was a tule fog that would have done credit to that dear old London; then again it was just ordinarily cloudy and unpleasant, and last Friday and Saturday—I'll tell you about them. Friday morning, hovering in the shelter of Johnny Quinn's doorway I spied a glittering expanse of white high on the mountains some twenty miles away around the Lick Observatory and demanded to know "whattell" it was, when up spoke L. B. Taylor—who was a bit further under shelter than I was. Said that worthy: "I haven't seen any here for so blamed long that I am not sure what they call it, but back in York state where I spent the winter it would be s-n-o-u-g-h, snow!"

Friday was a day for jogging, slow work, and indoor racing of the gabble-gabble circuit and not much speed was made save over the tracks of the latter organization, but Saturday, while no day for a camera man, was very pleasant again and the postponed week end workouts were duly pulled off in comfort.

John Quinn, as was naturally to be expected, has about as much speed on tap as anyone in California with the trotters that Mr. Borden is staking down the big line—Albaloma 2:08¼ and Baby Doll 2:10¼, both of whom are in the very best of condition. Albaloma is a remarkable individual for a horse that has raced regularly since his three-year-old form, and is going to be a tough nut for some folks to crack before he is laid away in winter quarters again. On Wednesday he went the route in 2:13½, and Saturday morning stepped the final half of a mile in 2:15 in 1:03, :31¾, while the Tom Smith mare, who had a workout in 2:16 earlier in the week, turned the trick in 2:17¾, 1:03¾, :31¾. She is a high class trotter and her legs are standing the fast work wonderfully well. Helen Mac, the sister to Clara Mac 2:04½, is still working on the trot and doing very nicely at that gait, with a mile in 2:28 so far, the half in 1:12 and the quarter in :35. She is a much more pleasing individual than her fast sister, and has shown no inclination to do anything but trot since her trainer switched her over. The other Expressive Mac trotting mare out of Miss Idaho 2:09¼ by Nutwood Wilkes 2:16½ is working just "outside the list," with a mile in 2:30½ and quarters in :35.

John's favorite among the green trotters is the lad purchased last fall from C. D. King, the bay stallion Major's By Guy 2:19¼ (breeder's record) by Major Dillon 2:18½, dam By Guy (dam of F. S. Whitney 2:09¾, etc.) by Guy Wilkes. He is a nice mannered, good gaited fellow, and has made speed steadily this year, having worked in 2:16, 1:06, :31½—fast enough to be pretty fair evidence of his quality.

Sir Guy Dillon, the brother to Guy Borden 2:07¼, had a Hoosier trick played on him Friday morning, when John and Matt Zahner added pajamas to his previously not extensive wardrobe, and the latter gentleman threw a few slow miles into him to see how he liked 'em. He registered no objections and proceeded to cut out the singlefoot that has previously been his failing. He has worked in 2:25 free legged, with quarters in :33, and if he speeds up in the new rigging as nicely as he worked Friday he ought to make considerable speed before fall, as he is a rugged fellow with plenty of punch and whizz. Loch Lomond 2:09¾, the Zolock—Daisy McKinney pacer, has been up about thirty days and is coming to his speed readily, with a recent mile in 2:32 and a quarter in :34. He, too, has had his underpinning adorned with the fore-and-aft rigging and is improving right along. A three-year-old Guy McKinney gelding, taken up at the same time, worked Saturday in 2:45, and the stable's main dependence for the three-year-old pacing events, Sheldon B., has gone the route recently in 2:24, 1:08, :33. He is entered in the Panama-Pacific June stakes as well as the usual coast classics and is by Barney Barnato 2:19½, sire of Mr. Borden's good three-year-old pacer of 1914, Alto Barnato (3) 2:12¼. John is going easy with the balance of his youngsters, and they have all made a good growth and a bit of speed during the winter.

Ben Walker has made two additions to his stable since my last visit, the pacing mare Elinora S. by Searchlight and the bay trotting lass Dione II by Cupid 2:18, out of Dione 2:07¼ (dam of Bernice R. 2:07¼) by Eros 2:29½. This girl has all the speed that her breeding would indicate and she also has all the sizzle and spunk that characterized other members of the family, the latter inclinations having acted as a drawback in her previous history. Being especially fond of her, Mr. Cowell took her to the ranch at Santa Cruz and used her for some months to saddle before sending her to Ben to train, the girl responding very nicely to this course of treatment. As she is well hardened from her winter at the ranch and has two-minute speed on tap at any time, Ben has put in most of his time educating her on the stretch, scoring in company, teaching her manners and endeavoring to cure her of "speed craziness." He is progressing famously with her and can rate her nicely. Let her continue to come along as she is at present and she will be dangerous in any ordinary company—and perhaps some of the extraordinary kind. Kinneysham has gotten along to a mile in 2:16¼, and the younger pacer, Mountain D. by Charley D. 2:06¼, out of Mountain Maiden (the dam of Tom Carneal 2:08½, etc.) by Cresco, has made a number of circuits in 2:15, with quarters close to a two-minute clip. He is making a fine big fellow and Ben has worked a number of great improvements both in his physical condition and his behavior in and out of the barn. Ben's string is entered at the June meeting and he sends out warning that he will be "there or thereabouts" in at least some of his starts.

It looks good to see T. W. Barstow back in the sulky in the old familiar place, he having moved to the track only a short time ago with three head of very promising prospects. Evergreen Maid by Nearest McKinney 2:13¼, dam by Monterey 2:09¼, grandam Leapyear 2:26¾ (dam of Yosemite 2:19¼) by Tempest 1881, turned the San Jose track to cart in 2:29½ the first time she ever saw it, and is making speed regularly now, while the free legged pacer All McKinney by Nearest McKinney, dam Mrs. Weller by McKinney 2:11¼, grandam Much Better 2:07¼ by Charles Derby 2:20, worked last year in 2:11¼. Mr. Barstow's especial pride, however, is the seven-year-old trotter The Demon by Nearest McKinney, out of Aunt Joe by Iran Alto, grandam Rose McKinney 2:29 (dam of Almaden D. 2:16¼, sire of Dean Swift 2:08, Albaloma 2:08¼, etc.) by McKinney. This lad has a two-year-old record of 2:29¾ and was offered for sale by his owner during the past winter very reasonably. Since taking him up this spring Mr. Barstow has taken a few samples that have raised the price considerably, as he has brushed eighths in fifteen seconds and is training in the nicest kind of way.

Lou Taylor,who "came home" from Pleasanton some weeks ago, is taking things easy with his stable as he has no early engagements for any of them. The big Copa de Oro mare that came to Lou some weeks ago carried a lot of fat that has been slow in coming off and as a consequence she has made speed in a similar manner, a mile in 2:36 being her best effort to date. Lou's trotting filly Luana by Kinney Lou 2:07¾ has had a mile in 2:20¼, with quarters in :34, and the four-year-old pacer Honey Boy, by Kinney Lou and out of the great old matron Carrie B. 2:18 (dam of Lovelock 2:05½, Ray O' Light (3) 2:08½, etc.) by Alexander Button, worked nicely Saturday in 2:19½, 1:07¾, :32¾. He is a nice going, sound, good mannered youngster and promises to make the third 2:10 performer for his dam.

E. R. Dunn's Cochato youngsters continue in high favor with the San Jose railbirds, the filly being especially well regarded. I don't fancy Ed's name for her, Virginia Humbug, but I do like her way of going and have a good deal of respect for her pedigree—dam by Baron Wilkes, grandam by Dexter Prince, a maternal line that nicks well with the Bingen blood. She is a great young trotter and has worked recently in 2:35, with quarters in thirty-six seconds. The pacer, The Puzzler, was castrated some weeks ago and has rounded to very nicely and improved in manners and general behavior. He has not been steamed up much since his alteration, but is beginning to make a bit of speed now and has gone the route a bit better than three minutes.

Happy Dentist 2:05¾ is back again in his old happy home at San Jose, Jimmie Ryan having brought the matinee king pin down from Pleasanton some two or three weeks ago to join his other matinee pacer, Rosie O., in Jack Villar's stable. Happy is taking things easy as all he requires is a bit of legging ug, and the Rosie O. filly, pacing free legged as is befitting a future matinee queen, has shown Jack a mile this spring in 2:26, with a number of quarters at a two-ten gait. She is quite a girl, and if she matures as she shows promise of doing, Ryan will have several handshakes with himself in the future. Princess B., that repeated for Jack last season in 2:15, has gotten along to a mile in 2:19, and F. M. Price's pacer, Kinmont by Kinney G. 2:24½—Fairmont by Monterey, won a bet for his trainer the other day by working in 2:16. The lad was castrated just before my visit and was doing very nicely in spite of the uncertain weather. About two weeks ago Jack received for developing a couple of prospects owned by Ed Darling of Santa Cruz, one a trotting filly by Kinney de Lopez that worked a quarter last year in :33, and the other a nice four-year-old lass by W. T. Sesnon's good trotter, San Felipe 2:09¼, out of a mare by Diamond Mac 2:15¼. He also expected to receive early this week a Star Pointer pacer with a reputed former trial of 2:12, so he has a pretty good stable for the season. Lady Arabella, his Alta Vela—Ida Bell trotting mare, is working as fine as a fiddle, Wednesday's workout being 2:17, 2:16 and 2:15. She is eligible to the green classes and ought to make some one a good mare to race and matinee. In addition to his training duties Jack is also superintending the working of the track, with the result that the local colony of horses and horsemen have never enjoyed better footing than at present.

W. L. Humfreville has been on the shelf with rheumatism for a good portion of the last several weeks with the result that his horses with the exception of one green pacer, have had only light exercise of late. Some time ago he turned over to William Cecil the chestnut mare Lady Steinway by Bonnie Steinway 2:06¼, dam Old Nell by Jim Mulvenna 2:27¾, and though she was broken only in December or January she has come to her speed fast and is well regarded by Mr. Cecil, a mile Saturday in 2:29 being about her best showing to this time. The Prince McKinney—Lady San Jose three-year-old filly in Cecil's stable, owned by S. Sagadria, is only just broken but has been a quarter in forty seconds. The Angevine youngsters had a bit of cough along with several others for a short time but are working nicely and their trainer looks forward to making someone do some hustling to beat them when the futurities are trotted in November. Loma Logan, the three-year-old by Prince McKinney, has made the circuit in 2:37 with quarters in :36, but Cecil is inclined to be a bit partial to the two-year-old by Nearest McKinney, called Jake Logan. Cecil developed John A. McKerron at the Carter establishment and drove him to his three-year-old record of 2:12½ at Louisville in 1898 in the race with Cuprum and Charley Herr which stood as the fastest four heat event for three-year-old trotters to that time, and states confidently that Jake is a better trot-horse than John, at the same age. He has not asked much of him to date, as his engagements are all late ones, but the sturdy lad has trotted quarters handily in :38. Jack Tolliver, the shoer, still has D. D. Hanks' three-year-old by The Bondsman, Bon McKenna, and has moved him along for a mile in 2:38, with a quarter in thirty-seven seconds. He, too, had a touch of distemper but came out of it nicely.

J. M. McKiernan is quartered at the driving park with a pair of likely pacers, one of them the horse raced a year or so ago by Joe Twohig, Welcome Jr. 2:12½ by Welcome 2:10¼, dam by Adnon. The other lad is the green gelding Casey Jones by a son of Welcome, entered in two of the pacing classes for amateur drivers at the June meeting at the exposition and looking pretty formidable at this time. He is a rangy, free going fellow with a world of whizz, and paced a quarter last year over the San Jose track just slower than twenty-eight seconds, which is "pretty worse" for a starter. He looks hard as nails and Mac will let somebody hear from him before the season is over.

The horses from Hemet Stock Farm make quite an addition to the San Jose colony and are quartered just inside the grounds. Owing to the inclemency of the weather since their arrival not many of them have been asked to step very fast as yet, though all can show a pretty good lick. Mr. Doble has been a bit under the weather of late owing to a cold, and as both Wilbur Lou and Kinney de Lopez are his especial charges they have had only a few miles around 2:22. With the balance of the stable, however, Trainer A. L. Blackwell is going right ahead and making a bit of speed. Hemet, the farm's entry in the big pace and a number of class events, has turned the San Jose track in 2:15, 1:03½, :30½, :14¾ and is husky and hearty as can be. The short turn at the exposition track is not liable to bother him to any extent, as he has had all his training over the two-lap track at Hemet, where he has on various occasions paced quarters at a two-minute clip.

Five youngsters, all liberally staked in the customary coast classics and some of them named in the Panama-Pacific stakes and the eastern futurities, were brought up along with the farm's candidates for the big money at the fair, all of them by Mr. Doble's old campaigner Kinney Lou 2:07¾. They are a nice turned, good gaited lot with both speed and manners, all of them working at present in 2:25 or faster, which is a nice showing for a bunch of three-year-olds at this season. Oro Lou, out of Zeta W. by Nutwood Wilkes, entered in the three-year-old pace at the exposition, is moving along in 2:19, 1:07½, :16, and Sterling Lou, out of Louise Reed by Sterling McKinney 2:06¼, also entered at the big fair, is trotting in 2:25, with halves in 1:08½. Dextro Lou, trotter, out of Nealy W. 2:27½ by Geo. W. McKinney 2:14½, and Martin Lowe, pacer, out of Lena Lowe 2:25½ by George W. McKinney, are both turning halves in 1:09 with miles around 2:24 and doing it very nicely. My favorite of the "younguns," however, is Allie Lou (2) 2:25, out of Lady Zombro 2:24¼ by Zombro 2:11, the matron that has produced to date the pacers Hemet 2:08¼ and Frank H. Holloway (3) 2:24¼ and the trotters Miss Gailey 2:11½ and Allie Lou. Miss Gailey was both fast and game as a three-year-old but very uncertain in her behavior, while her half-sister, at the same age, seems possessed of her good traits and unhampered by her bad ones, as she acted like a perfect little lady all the time that I saw her on the track. She is entered in the five thousand dollar trot for her age at the P.-P. I. E. and is getting up quite a head of steam in anticipation of the event, working last week in 2:20½, 1:08, :32¾, :15¾, which is about as much

whizz as any of the entrants have developed that I know of.

Colonel Jim Thompson, who came down to San Jose from his accustomed haunts in the Sacramento Valley some weeks ago with quite a stable, is one of the original busy men of the local colony, as in addition to giving kindergarten lessons to a number of youngsters and preparing a few older ones for late racing he has the book of L. H. Todhunter's young son of Peter the Great, Peter McKlyo (3) 2:12½, to look after. Much to Jim's gratification this lad is getting a fair share of the mares that are being bred this season, and the nice feature is that they are mares of a high degree of excellence, owned by gentlemen who want horses to race and will give their colts every chance to show their worth. I had not seen Peter since shortly after he landed at the Todhunter ranch as a yearling, and he is maturing into a fine type of the standard bred horse and apparently knows nothing but trot—something that he proved he could do in a very convincing way at the last state fair. He is taking his work nicely and Jim figures him as a 2:06 trotter this fall. Among the other members of the stable raced in former years I noticed Sweet Adena 2:26¾, matinee record 2:16, by Zombro 2:11, out of the double producer Norta K. by Del Norte 2:08; Guacho by Nobage 48390 (a son of Bon Voyage 2:08 and Loma B., the dam of Albaloma 2:08¼), out of Zombelle by Zombro 2:11, and the bay mare Sweet Bow (2) 2:17½ by Bon Voyage and out of the dam of Hymettus 2:07¼, etc. All three are trotters, and the last named one a futurity winner of high quality; she has been in the breeding ranks of the Todhunter establishment of late years, but is yet a young mare, eight years of age, and acts like she would develop a good deal of speed as a "comeback." None of the stable has been moved up to any extent, owing to general conditions and the fact that they are not in the early stakes.

When it comes to futurity timber for this fall's events, Thompson is "there with both feet," as he has three three-year-old fillies by the sire of futurity winners, The Bondsman, as follows: Honeyback, out of Lottie Lynwood, the full sister to Sonoma Girl 2:04¼; Ruby Bond, out of Dowina by Bon Voyage 2:08, and Janet Bondsman, out of the futurity winner Sweet Bow. All of them can show trot and they are certainly bred right to make "that kind." Another candidate for this year's stakes, of the two-year-old division, is the brown colt Natal Day, owned by S. Christenson, that worked Saturday at the trot in 2:37 with the last quarter in thirty-seven seconds. This lad is by Wilbur Lou (3) 2:10¼ and out of that double producer of 2:10 speed at the trot, Ella J. by Bob Mason 2:27¼.

Jim's genuine, double barreled, copper riveted, dyed in the wool trotters, however, from all present indications, are the youngsters he bred in Kentucky and brought out last fall, now yearlings. Two of them, the fillies, one by The Northern Man 2:06½ (sire of Richman (2) 2:09¾, who ousted John Malcolm (2) 2:11½ from the pacing championship for two-year-old geldings) out of Lilly Young by McKinney 2:11¼, and the other by Tregantle 2:09¼ (sire of Brace Girdle 2:04¾ and three others in 2:10) out of Queen by Dictator Wilkes, have been broken and turned out on pasture for a while in the infield. Both are nice made lassies and could show a lot of natural lick, but their performances were all overshadowed Saturday when Jim hooked Bon Watts for the fourth time and brought him alongside of Sweet Adena for a little brush. The little rascal can run away trotting right off the reel. He ought to trot if breeding counts, as he is by General Watts (3) 2:06¾, sire of three three-year-old trotters in 2:10, out of Pesteria by Bon Voyage 2:08, second dam Perza (dam of two) by Allie Wilkes 2:15, third dam Anglia (dam of four) by George Wilkes 2:22, fourth dam Kitty Patchen (dam of two, including the great sire Patchen Wilkes) by Mambrino Patchen 58, fifth dam Betty Brown (dam of three, including that other good sire, Wilkes Boy) by Mambrino Patchen 58, sixth dam Pickles by Mambrino Chief 11. It would make a nice tabulation, putting in all performers, but I don't hanker for the job at the prevailing market price.—[N.]

FIVE EVENTS IN RIVERSIDE MATINEE.

A number of interested horsemen of Riverside and San Bernardino counties saw James McGuire drive San Jacinto past Petty McKinney and win the free-for-all pace after Petty McKinney had the event almost won at a recent matinee at Riverside. The results of the races follow:

2:35 mixed—First, Fritz the Dutch, owned and driven by Charles June; second, Black Bess, Donahue, driver; third, Joe Brazil, Baker driver; time, 2:33.

2:20 mixed—First, Dee Sherrill, owned and driven by Charles June; second, Maddie, owned and driven by Judd; time, 2:21.

Free-for-all pace—First, San Jacinto, owned by Dr. Arnold, driven by J. McGuire; second, Petty McKinney, owned by G. D. Armstead, driven by O. E. Folk; time, 2:16.

2:20 pace—First, Caroline Custer, owned and driven by Judd; second, Arlie L., owned by C. Dobro, driven by George Nugent; third, Jane Lou, owned and driven by Gatch; time, 2:22½.

2:30 trot—First, Ben Nutwood, owned and driven by Gowell; Lena W., owned by W. P. Walker, driven by Baker, and Sleepy Jim, owned and driven by A. E. Heller, tied for second; time, 2:21.—Exchange.

Those Free-For-All Pacers

Five weeks from today the greatest field of pacers that ever met this side of the Rockies will face Starter O. P. Updegraff in the free-for-all at the exposition track. Among them are some of the very best campaigners in the land, wintered in California and keyed up to the highest condition for this event. There are thirteen entries and every horse entered was named because the owner believed he had a chance to win. How fast will they go, and can you pick the winner? Here are a few points concerning each one's previous racing history:

CLARA MAC 2:04½, brown mare, foaled 1908, by Expressive Mac 2:25½, dam Clara by Howard St. Clair 2:18, grandam Nelly Bly by Apex 2:26; bred by Fred Gibson, Armona, Cal. Clara Mac was raced in 1914 over California tracks by W. W. Gallup of Hardwick, Cal., and later by Woodland Stock Farm. Out of eight starts was seven times first, once third. Her fastest race was at Sacramento on September 19 in the 2:20 pace, when she defeated White Sox, Oro Mo, Pegasus, Zoetrix, Fire Cracker and Colleen, winning the first and third heats in 2:05¾, 2:04½, White Sox taking the second in 2:06¼. Was "made" on a half mile track. Entered by Woodland Stock Farm; trained at Woodland by Harry Dowling.

COLLEGE GENT 2:06½, black horse, foaled 1908, by Kentucky Patterson 32074, dam Belle H. by Senator Crisp 42650, grandam Nanna by Compromise; bred by F. S. Heard, Haines, Oregon. Raced over northwestern tracks since a three-year-old and has never been outside the money in any event. Won eleven races out of eleven starts in 1913 and in 1914 was six times first, once second and five times third out of twelve starts. Fastest race was last fall at North Yakima where he finished 2-1-2 in 2:05, 2:06½, 2:06¼, Ovieda winning the first and Hal Boy the last heat. Has raced a great deal on the twice arounds. Entered by Joseph Carson, Winnipeg; trained at Pleasanton by Barney Barnes.

DAN LOGAN 2:07¼, bay horse, foaled 1905, by Charles Derby 2:20, dam Effie Logan (dam of 3 in 2:10) by Durfee 11256, grandam Ripple by Prompter 2305; bred by E. A. McInerney, Davis, Cal. Raced over northwestern circuits in 1914 by L. B. Daniels with only moderate success, largely due to change of climate. He is believed by many to be as fast a horse as Jim Logan 2:01¾, and at Woodland, 1913, he was a "slap-up" third to Jim Logan and Don Pronto in 2:02¾, 2:04¼. Entered by Warren Pugh, Davis, Cal.; trained at Woodland by Carey Montgomery.

DR. BURNS, JR. 2:04¼, bay horse, foaled 1905, by Dr. Burns, son of Arsaces 6506, dam Topsey by Jesse Pennington, grandam Mary Ann by J. C. Patchen; bred by A. Robley & Son, Eldred, Ill. Hailed by many horsemen as the bear cat of the exposition meeting. Has been raced four seasons, paced half mile track in 2:10 in his second race. Has been a consistent winner to last season, when he was seven times second in seven starts, three times on the twice arounds to Flower Direct 2:01 and Billy M. 2:03¾. At Cleveland he was 2-5 to William in 2:02, 2:02¾; at Detroit, 4-2-2 to the same horse in 2:04¾, 2:05, 2:05¼; at Grand Rapids tried him another whirl and finished 2-4-2 in 2:00½, 2:00, 2:02½; at Kalamazoo forced Walter Cochato to pace in 2:06¼, 2:04¼, 2:02¼ and was then carried over for the big stakes here at the exposition. Entered by Ireland & Leach, Chicago; trained at Los Angeles by Al Whitney.

HOMER MAC 2:06¾, bay horse, foaled 1908, by Petigru 2:10¼, dam Eagletta 2:11½ by Ketchum 2:16¼, grandam Lady Mac by McKinney 2:11¼; bred by C. E. Smith, Los Angeles. Began racing as a four-year-old, taking his record that season at Phoenix, defeating Zulu Belle and Loch Lomond in 2:07½, 2:06¾, 2:10. Raced almost entirely on Canadian half mile tracks. Last season paced in 2:10 at various times and on the ice in the winter was a good winner in record time. In all has raced in 39 events on dirt tracks—16 firsts, 11 seconds, but seven times unplaced. Entered by J. W. McClain, Los Angeles; trained at Los Angeles by James Stewart.

JIM LOGAN 2:01¾, bay horse, foaled 1906, full brother to Dan Logan, as above. Holder of coast record for pacing stallions; joint holder with Klatawah (3) 2:05½ of world's record as a three-year-old, taking record in third heat of winning race; raced every year since two-year-old except 1910; records (5) 2:05¼, (6) 2:03¼, (7) 2:02¾, (8) 2:01¾. Has figured in 21 races, 12 times first, 5 seconds, 1 third, 1 fourth, twice unplaced, on Grand Circuit, 1912; has won 17 heats in 2:06 or better, 5 below 2:04, and forced Don Pronto to pace in 2:02½, 2:02¾ at Sacramento, 1913; fastest performance last season at Woodland in 2:01¾, 2:04½, 2:03½, defeating Leata J. and Don Pronto. Entered by J. E. Montgomery, Davis; trained at Woodland by J. E. Montgomery.

JOE PATCHEN II 2:03¼, bay horse, foaled 1905, by Joe Patchen 2:01¼, dam Bessie Bonehill 2:05¾ by Empire Wilkes 2:29¼, grandam Arab Girl by Crittenden; bred by H. S. Osborne, Pittsfield, Mass. Is the leader of all pacers for amount won in single season, $28,000 in 1912, when he won 15 out of 16 races, being once second, and paced one exhibition mile at Los Angeles in 2:00¾ in an effort to beat 2:00¼. Made one start and one win in 1913. In 1914 was "off" and started once at Columbus, distanced in 2:02. In races has paced over 20 winning heats in 2:06 or better. Entered by R. J. MacKenzie, Pleasanton; trained at Pleasanton by C. L. DeRyder.

LEATA J. 2:03, bay mare, foaled 1908, by Royal McKinney 2:29¾, dam Geraldine 2:16¾ by Mt. Vernon 2:15¼, grandam Edith C. by Gen. McClellan 143; bred by J. N. Jones, Stockton, Cal. Raced on the Grand and Great Western Circuits by Frank Childs in 1913, being eight times first, four times second out of 13 starts, a good many of them against Frank Bogash Jr., taking record in third heat of a winning race with this lad at Kalamazoo, split heats, average time for the five heats being just below 2:05. Started in but two regular events in 1914, winning free-for-all at Sacramento, pacing fastest heat in 2:03¾, and standing second in the summary in the race at Woodland in which Jim Logan set coast record. Has paced ten winning heats below 2:06. Entered by J. N. Jones and trained by him at Stockton.

LITTLE BERNICE 2:06¼, bay mare, foaled 1910, by Del Coronado 2:09½, dam Pearl Pointer by Sky Pointer 34567, grandam Pearl M. by Ottoman 15000; bred by J. H. Williams, Los Angeles. Record of 2:09¼ as a three-year-old, when she made 15 starts, winning 6, second 7, and but twice behind the money, campaigned by Charley Atkinson. Was second to William in three races, forcing him to pace two record heats in 2:05¼, 2:05 at Peoria after having been second to Empire Direct in a split-heat race only two days before. Taken east in 1914 by Arlie Frost but was not good most of the time. Was five times unplaced, once fourth, and at Pittsburg won second, fifth and sixth heats in 2:06¼, 2:08, 2:10, Don Patch and Sellers D. being the other heat winners. Entered by Samuel Watkins, Los Angeles; trained at Los Angeles by Charley Atkinson and owner.

MARGOT HAL 2:04¼, bay mare, foaled 1908, by Argot Hal 2:07½ (p. 2:04¾), dam Mary Campbell by Tennessee Wilkes 2:27, grandam Chestnut Belle by Brown Trigham; bred by S. Walton, Falls Mills, Va. Raced on the Grand Circuit in 1913 by Alonzo McDonald—six firsts, one second, one third, one fourth. Took record in winning race at Columbus, winning second, third and fifth heats in 2:04¼, 2:05¾, 2:05¾, later in the same meeting winning a straight heat race and pacing two heats below 2:06. Met with injury and was started but twice late in season of 1914, fourth at Dallas to Earl Jr. and unplaced at Phoenix in race in which King Couchman took his present record, 2:02¾. Entered by Alonzo McDonald, Indianapolis, and trained by him at Los Angeles.

WALNUT GROVE 2:05¼, black horse, foaled 1906, by Constantine 2:12½, dam Lindis by Jackdaw 2:28¼, grandam Voila by Silverthorne 2:15; bred by M. A. Low, Topeka, Kan. Has been raced since 1910 on both bull rings and Grand Circuit. Took record at Lexington, 1913, in third heat, second every other heat to Michigan Queen in 2:05, 2:05¼, 2:03¾. Won no races on Grand Circuit last year but was placed in fast company in a number of events, being second to Peter Stevens in two races, one heat in 2:03¼. Entered by A. F. Ruthven, Agt., Kansas City; trained by him at Pleasanton.

WHITE SOX 2:06¼, bay mare, foaled 1908, by Del Coronado 2:09½, dam Subito (dam of 2 in 2:10) by Steinway 2:25¾, grandam Jenny Mac 2:09 by McKinney 2:11¼; bred by Clarence J. Berry, Los Angeles. Originally a trotter, with a record of 2:13¼ at that gait, raced last year as pacer for first time. Won 5 races, twice second, once drawn (in the mud at Salem). Best performance was at State Fair at Sacramento—3 starts. Won one, second to Clara Mac in 2:07½, 2:05¾, 2:06¾, and was again second to same mare, winning second heat in 2:06¼ and forcing the Expressive Mac mare to pace third heat in 2:04½. Entered by "Durfee & Company"; trained at Los Angeles by W. G. Durfee.

ZULU BELLE 2:06¼, black mare, foaled 1906, by Petigru 2:10¼, dam Johanna Treat 2:24¾ (dam of Del Coronado 2:09½) by Thomas Rysdyk 10649, grandam Kate Treat by Venture 320; bred by F. W. Wadham, Nestor, Col. Raced both as trotter and as pacer in 1913, record of 2:10¼ at trot and 2:06¼ at pace, latter made at Phoenix, two heats in that notch. In 1914 had some hard luck but forced Vera Hal to pace in 2:05 at Santa Rosa, won at Woodland in 2:06½, 2:08¼, and at Sacramento made Airlie Demonio go two heats below 2:06. Was outside money at Phoenix but went faster than her record. Entered by Al Schwartz, Pleasanton, and trained there by him.

Sibyl Derby by Charles Derby, owned by President A. L. Scott of the California State Agricultural Society, foaled last week at San Jose a fine filly by The Bondsman.

◈◈◈

Havis James was a visitor in Toronto recently, going over from Brantford where he has two colts in training, and while there made arrangements with Al. Proctor to take the three-year-old trotting filly, Pearl Thorn, by Peter Leyburn, to Detroit for a course of training. Mr. James was very favorably impressed with the filly when she showed a mile in 2:35 over the Dufferin track and believes that she will develop Grand Circuit calibre. The horses will be shipped about May 1.—Canadian Sportsman.

THE SIRE OF INFERLOTTA 2:04¾.

Seattle, April 29, 1915.

The Breeder and Sportsman:

I am going to ask for some space, just to give some of the old-timers in California a little ancient history, so please pardon me for this intrusion. While going through the usual routine of a hotel keeper I was introduced to a gentleman named Dr. C. D. Crutcher, formerly a resident of Nashville, Tennessee, and of late years a practicing physician at Camas, Montana, on the famous Flathead reservation. Dr. Crutcher is a gentleman of the old school, and aside from being a very fine gentleman and a capable physician he is a lover of the standard bred horse. The Doctor surprised me by saying that he is the owner of the horse, Inferna, the son of Diablo and Biscara by Director, second dam Bicara by Harold. Inferna is well known to the California horsemen as the sire of Inferlotta 2:04¾.

I had supposed that Inferna was dead but Dr. Crutcher's story of him is somewhat like a romance. He tells me that Inferna was won in a bridge whist game by Captain R. E. McNally of the United States army and was taken from San Francisco to Fort Assiniboine, Montana, in 1906 and was sold by Captain McNally or his agents to his present owner, Dr. Crutcher, and was kept at Fort Benton, Montana, for a short while by Dr. Crutcher.

The doctor used Inferna in his practice, which is a large one and covers a lot of territory. He said that this highly bred horse made him a most ideal physician's horse and an ideal companion, whether he was used to harness or under saddle or driven to pole. The doctor said that he has been unable to give Inferna very much of an opportunity but from what little chance this great horse has had he has several fast pacers. Among the number are the three winners of last year on Montana tracks, namely Ferndot, winner with a record of 2:21¼, and Fernwood, with a winning record of 2:17¼ taken at Bozeman, Montana. I find that both of these horses were good race horses through the Montana circuit. The doctor tells me that there are quite a few others, and one that went to Canada. Dr. Crutcher is the owner of a few very choice mares, namely, Lady of the Period by Kentucky Volunteer, dam Dot, great brood mare by Mambrino Diamond. Dot will be better known as the dam of Modicum 2:13, the pacer that Ted Hayes campaigned. The doctor also owns the mare Ayress by George Ayress 2:17, dam Dot by Mambrino Diamond; also Mildred C. by Argot Wilkes, dam Cactus by Cuyler, second dam the dam of Star Pointer, by Snow Heels. Mildred C. is the dam of a very fast pacer by Inferna that has been taken to Western Canada. The nearest race track to Dr. Crutcher is Missoula, which is seventy miles from his home.

It strikes me that if Ira Pierce could come back from horse heaven he would smile when he read that this chestnut son of Biscara has been exiled on an Indian reservation in the most thinly settled part of the big state of Montana; however, as he is a horse of quality it is quite possible that he may yet found a family and that they will all be as fast as the little mare Inferlotta.

I believe that I have taken up a lot of space with this story, and there are many that it will not appeal to; however to those who will remember Inferlotta in her races they will be interested to know that her sire is still alive and is at present in Seattle, having recently been brought here by a phoney buyer, who deceived Dr. Crutcher by writing him that he would buy Inferna if he would land him in Seattle. Now that he is here, the supposed buyer has vanished, and nothing would give me more pleasure than to be able to land this beautiful horse back in his original stable at the Santa Rosa stock farm so that if the Pierce brothers could take a look back from horse heaven they would see Inferna's head out over the door. Inferna, I believe, is about 16 years old and he is as spry as a five-year-old, is a most beautiful chestnut horse, and what student of breeding could look over the dams of this horse without feeling a thrill of pleasure?

Hoping that this bit of story will be read with interest by many of the good old-time horsemen of California, and especially those around Santa Rosa, I am Yours very truly,

C. A. HARRISON.

[Mr. Harrison's interesting story of Inferna and his mention of the fast pacer out of Mildred C. awakens some old-time memories for the present editor of this publication, as one of the first "producers" that the writer recalls was the old bay mare Cactus by Cuyler, who was a "member of the family" in the early nineties. My remembrance of Cactus, who was purchased by my father when I was in the neighborhood of ten or eleven years of age, is that she was a rather high strung mare, Argot Wilkes being selected as a proper mate for her in 1893 largely on account of the fact that he was one of the "clock headed" kind as a race horse, though he had not as yet attained prominence as a sire. The two "greatest horses in the world" for me about that time were Argot Wilkes 2:14¼ and Vistigie 2:09¼, the latter owned by Walter Moore, now "Traveller" of the staff of our esteemed contemporary the Horse Review. Cactus proved safe with foal, but before delivery was due, if I remember aright, she was sold to a cousin, Charles E. Bishop, later a resident of Kalispell, Montana, and it was for him that the resultant youngster was named. The Bishop was of the very first crop of Argot Wilkes performers, racing to a three-year-old record of 2:12¼ in 1897, that year witnessing the advent of the Walter Dunn stallion to the Great Table of Sires with a representation of five pacers, including Argoreat 2:09¾. The Bishop justified my father's theory of breeding by becoming a fast, good headed, game pacer, racing to his fastest record, 2:06, in 1902, while as a four-year-old at Springfield, Ill., he was twice a heat winner in that memorable 2:11 pace, which still stands as the fastest ten heat affair on record. Before his removal to Montana Mr. Bishop also bred, from the same mare and stallion, the pacing mare Nelly Bishop 2:17¾, the speed sire Argorel (sire of Elsie S. 2:09¼) and the matron now owned by Doctor Crutcher. Cactus also produced two trotters and two speed sires before coming into the writer's ken, so it is not surprising that Mildred C. should produce speed when mated to Inferna 2:15½. The Doctor is mistaken, however, when he states that Mildred C.'s second dam is by Snow Heels, as Cactus had two top crosses to Hambletonian 10, her dam being Rising Sun by Logan 127, who was, like Cuyler, a son of William Rysdyk's famous sire. Probably he has confused the bloodlines of Mildred C.'s sire with those of her dam, Sweepstakes (dam of Star Pointer 1:59¼, etc.) by Snow Heels, being the grandam of Argot Wilkes 2:14¼.—Ed.]

AUTHORITIES DIFFER.

The statement that Andrew Albright, Jr., of Newark, was part owner of Nathan Axworthy 2:12¼ is credited by some of our contemporaries to "an eastern horse paper," which might mean The Trotter and Pacer, but it would not be true. Some weeks ago we quoted an item from the Breeder and Sportsman, of San Francisco, which stated that Mr. Albright owned an interest in the horse, but in our comment we expressed doubt of its accuracy; that was all. It has since developed that Mr. E. B. Oates, of Paterson, N. J., is still sole owner of the stallion.—Trotter and Pacer.

[Not knowing the Trotter and Pacer's source of information we are unaware as to its authenticity. Our own information, which led to the publication of the item that stirred up this momentous controversy, was voluntarily given in this office by Mr. Andrew Allbright, Jr., a gentleman quite able to keep track of his varied affairs and to know whereof he speaks.—Ed.]

STAKE ENTRIES AT MONTREAL.

The King George, 2:08 Class Trot, Purse $5,000.

Passall, blk s by Crystallion, E. A. Colburn; King Clansman, br h by The Clansman, Dick McMahon; Axtien, c h by Axworthy, Samuel Harris; Junior Watts, b s by General Watts, H. B. Drink Jackson's Napa Soda.

JOE McGUIRE'S STABLE.

The first string of trotters to arrive at the expos tion grounds to prepare for the June trots are thos entered by Joe McGuire of Denver and A. R. Gumae of Florence, Colorado, the quintette arriving Tuesda evening, with Joe in personal charge. They loade out from the Colorado city at noon Sunday and had pleasant ship by way of the Western Pacific, unloa ing in excellent condition and taking up comfortab quarters in barn number six.

Red Rock, Joe's entry for the 2:06 pacing stak and a couple of class races at each meeting, is Colorado bred gelding, six years old, by Lewis Wi kens 36848 (Lewis Wilkes 2:15¼), dam Red Bir 2:23½ by E. S. 2:11¼, sire of the dam of Roy Wilke 2:06¼. In 1913 he was raced over the northwester circuits on both sides of the line, six times first, fiv times second and but twice unplaced out of seve teen starts, taking his record of 2:12 at Salem, whe he trimmed Pointer's Daughter and a flock of Hal B pacers. In 1914 he made only two starts, both a Denver, winning both without damaging his win rac record and forcing out Espeire in 2:08¼ in the onl heat he lost. Direct Line, Joe's other pacer, has yet t make his debut, but is a husky bay son of Baron D rect (sire of Braden Direct 2:01½), out of the doubl producer Woodland Echo by Woodline, grandam Ech by Dictate, son of Dictator.

Two of Mr. Gumaer's youngsters are the result o his own breeding operations at his establishment a Florence—A. R. G., a bay youngster with engage ments in the big trotting stakes and some of th slower classes, and the black colt Peter E., entere in the five thousand dollar trot for three-year-old at the June meeting. They are brothers by Gumae Hal, one of Colorado's best bred stallions, out o Claudia Chimes (dam of Judge Dare 2:21¼ and Pris cilla 2:22¼) by Chimes, grandam Charmer (dam o Shadow Chimes 2:05 and three others) by Mambrin King, and both showed very nicely before leavin home. Monk, Mr. Gumaer's pacer, is by Saraway the sire of Winfield Stratton 2:05¼, and out of Dais H. (dam of two in 2:20 or better) by Clark Chief Jr grandam a daughter of Volunteer.

Mr. McGuire wintered at Overland Park and th elders of his stable were up to miles in 2:20 befor leaving home, so that they are in shape to fit wel for their early engagements. Passall, Mr. Colburn' trotter, will be out shortly, and L. C. Kinney expecte to ship from Bushnell some time this week.

FORDFOOLISHNESS.

"There was an old man who had a peg leg;
He was too poor to buy and to proud to beg.
With some spools, some cans and a few such things,
He built him a Ford, and it runs, by jings."
—Exchange.

There once was a cowboy named Sourdough Skaggs,
Who was hellbent on saving his "Horseshoe" tags,
For he'd get a fine premium if he gathered enough,
And he soon had a match box as full as 'twould stuff.
But, alas for his dreams of a sharp pocket knife
Or some new flumidoodle to please his fond wife
For he sent 'em to H. Ford, most generous of gents,
Who expressed him an auto—and thirty-two cents!

BREEDS RECOGNIZED IN P.-P. I. E. LIVESTOCK COMPETITIONS.

In the Prize List of the Department of Live Stock of the Panama-Pacific International Exposition, the horses will be judged from September 30 to October 4, with four breeds in each day's program, which will begin at 9 o'clock a. m. The following breeds will be recognized:

Percheron, Belgian, Clydesdale, Shire, Suffolk-Punch, Standard Trotter, Thoroughbred, Saddle Horse, Morgan, Hackney, Arabian, Shetland Pony, Welsh Pony, Jacks and Jennets and Mules.

Cattle will be judged from October 18 to October 26. The following breeds will be recognized:

Shorthorn, Hereford, Aberdeen-Augus, Galloway, Polled Durham, Red Polled, Devon, Jersey, Ayrshire, Guernsey, Holstein-Friesian, Dutch Belted, Dairy Shorthorn, Brown Swiss, French Canadian, Simmenthal, Kerry and Dexter.

Sheep and goats will be judged from November 3 to November 12. The following breeds will be recognized:

Shropshire, Hampshire, Cotswold, Oxford, Dorset, Southdown, Lincoln, Cheviot, Leicester, Romney, Tunis, Rambouillet B, Rambouillet C, Merino-Smooth, Merino-Wrinkly, Corriedale, Exmoor, Persian Fat Tailed, Karakule, Angora and Milch Goats.

Swine will be judged from November 3 to November 8. The following breeds will be recognized:

Poland-China, Berkshire, Duroc-Jersey, Chester White or O. I. C., Hampshire, Mule Foot, Tamworth, Large Yorkshire, Large English Black, Victoria, Essex, Chesshire.

Copies of the Prize List and rules may be obtained by addressing Chief D. O. Lively, Department of Live Stock, Panama-Pacific International Exposition, San Francisco, Cal.

SAN FRANCISCO-CALIFORNIA DRIVING CLUB.

For the past two weeks the members of the San Francisco and California Driving Clubs have been hard at work on a proposition to get together for this season's racing at the P.-P. I. E. track, and while for a time the weather reports were along the order of "thunder in the mountains" and "heavy seas outside the heads," a beautiful calm has at last succeeded the turmoil and all is peace in local amateur circles for the present. Late last week peace envoys from both clubs actively engaged in racing staged a "Portland conference" that resulted in the framing of terms upon which an amalgamation of the warring factions could be effected.

Neither club being willing to adopt the name of the other for the new organization and no entirely original acceptable substitute being offered, a compromise was effected by linking the old names as above. The San Francisco delegation won the toss for president, and George J. Giannini will be the new club's presiding officer, with D. E. Hoffman and Luke Marisch of the old California Club officiating as first vice-president and secretary, respectively. The selection of the remaining officers was left until the joint meeting at which the permanent organization of the new body was to be perfected.

In pursuance of these plans, the San Francisco club met Tuesday evening at the Mission Improvement Association hall and wound up its affairs, the "wake" of the California club being celebrated the following evening at Eagles Hall. It was the tentative program to hold the first joint meeting Friday night, but as our forms close Friday noon the results of this conference cannot be stated until next week. Racing will be conducted throughout the season at the P.-P. I. E. track, starting some time this month most probably, and as the club, as it now stands, has plenty of horses the sport will be of the first order. Sunday, May 16, was seriously considered as the date of the season's inauguration, but the inclement weather of the past several days may cause this plan to be abandoned.

MAY DAY AT DIXON.

In spite of the fact that the weather was the most unpleasant that had attended the event for some years, May Day at Dixon was a huge success in every way. Folks by the hundreds flocked in from the country and the surrounding towns in the Sacramento and San Joaquin valleys, while a goodly delegation went up from San Francisco and other bay points.

The harness races were the big events of the day and the big crowd was treated to the greatest exhibition of speed ever staged on a half mile track on the coast. Good horses were in evidence in every event, many of them entered at the early meetings here at the exposition and consequently "trained to a hair" right now. Loren Daniels, with horses from the stable of Charles F. Silva cleaned up the program, but not without competition of the hottest kind. Oro Mo by Demonio took Donald into camp in the 2:20 pace, with the fastest heat in 1:03, and Eloise Dell bested Future Tramp and Verne Antie in the twenty trot, one heat being in 1:05. Teddy Bear and Vera Hal, however, put on the "hair raiser" in the free-for-all pace, it requiring four heats for a decision. All of them were sizzlers, with the fastest in 1:01¼. Daniels had taken the Del Coronado pacer well down the stretch and was going a two-minute clip when the word was given, with the little bay mare lapped up on him and getting into her stride like a runner. They raced the entire heat just that way, Teddy winning by a small margin only. Della H. bested the balance of the field for third position.

So well was the crowd pleased with the afternoon's sport that there is a movement already under way to hold a three-day meeting over the same course later in the season.

SEBASTIAN-MORRISON STABLE GOING EAST.

Six horses from the Sebastian-Morrison stables at the Hemet Stock Farm will be shipped east Monday and will be raced during the summer over the Kansas-Oklahoma circuit. The horses will be shipped direct to Winfield, Kansas, where they will join the C. M. Clark stables. The Clark horses have been wintering in Winfield, and are reported in fine condition. The stable includes Hal McKinney, Copanacca and Tommy Hooper, all of them former Hemet horses. The horses will race in Kansas, Oklahoma, Nebraska and Arkansas and will complete the circuit in time to be brought to the fall meeting at the San Francisco exposition, where they are heavily staked.

The horses to be taken from Hemet are:

Pronto J. (trotter), did trial mile this week in 2:12, and the last half was trotted in 1:04½.

Frank H. Holloway (pacer), trial mile in 2:13, last half in 1:04½. This horse was bought by Mr. Morrison from the Hemet Stock Farm several months ago.

Selma Paley (two-year-old by Wilbur Lou), did mile in 2:33 as a yearling.

Three horses belonging to the Hemet Stock Farm will be taken and sold in the east. They are Tena G., Ittinaris (by Nutwood Wilkes), The Shark (by Kinney Lou).

Mr. Sebastian will drive all of the horses, including the Clark stable, and the outlook for a prosperous season is exceptionally good. Mr. Morrison will accompany the stable, and Mrs. Sebastian will accompany her husband.—Hemet News.

RACING AS AN INDUSTRY.

The revival of racing on a grand scale is now the promise and expectation of the Jockey Club and the public and The Rider and Driver predicts the fulfillment of the "wish that is father to the thought."

It is strange that while racing goes on in spite of the war some of the horse shows, especially in England and Canada, have been suspended; it was also the case with the National Horse Show Association of North America, last year, while racing was going ahead by leaps and bounds.

In regard to the question in England, the home of racing and one of the vital seats of the war, the sporting and news papers are full of arguments in behalf of keeping the sport alive.

Lord Roseberry, in the Times, speaking as to what the Allies think of the British, declares: "I think our Allies know that Englishmen do not think it necessary to put up the shutters whenever they are engaged in war. They know that we are paying two millions a day for this war, and do not think that we shall add the sacrifice of our thoroughbred horses, which are so invaluable for the future of our army. For, make no mistake, if our races are to cease our thoroughbred horses must disappear. No man can afford to keep blockstock for the mere pleasure of looking at them in the stable.

"Once before," adds Lord Rosebery, "our country has been 'engaged in a life and death struggle,' at least as strenuous and desperate as this; I mean against the French Revolution and Napoleon. All through that score of bloody years the Epsom and Ascot meetings were regularly held, nor indeed does it seem to have occurred to our forefathers that it was guilty to witness races while we were at war. I remember asking the late Lord Stradbroke which was the most interesting race that he had ever witnessed for the Ascot Cup. He replied (I am almost sure, though it is outside my argument) that for 1815, which was run on June 8, eight days before Quatre Bras, ten days before Waterloo, when Napoleon and Wellington were confronting each other to contend for the championship of the world."

To the Daily Telegraph the Right Hon. Henry Chaplin, M. P., a member of the Jockey Club since 1864, and the winner of the Derby with Hermit in 1867, writes: "No one would regret more than I that any action of ours in England should give pain or umbrage to our Allies, but for nearly fifty years of my life, I think I may say, I have been more or less intimately acquainted with the leading members of the turf in France, and I am satisfied of this, that it is not from the sportsmen among them that the alleged complaints of our racing proceed. If racing were stopped altogether during a war which may conceivably last for a long time yet, I know not by what means the cost of maintaining establishments and the payment of interest on the capital embarked in them is to be met; and if an institution like this is once to be stopped it becomes a serious question whether it can ever be started again. One thing is certain—racing, hunting, and the English breed of horses are so closely connected that they stand or fall together. I regard our breed of horses as a national asset of the utmost value, especially in time of war, and I, for one, should regard its disappearance as little short of a national disaster."

Lord Lonsdale declares that racing is entirely a question—apart from the sporting point of view—of trials of the superior animals of the world. If these trials are denied to those who are interested in breeding, it would be impossible to maintain the high standard of breeding that has up to the present time existed in England. Then his lordship adds: "If racing is to be abandoned, you will find that the highest class of trial (thereby producing the greatest value in the animals that win these respective races) will be entirely lost."

Mr. E. Somerville Tattersall makes the following remarks in a letter to the Telegraph:

"One Cambridge man writes: 'Does horse racing help the nation to prevail in the war? Now, however much the training of race horses may be a benefit in ordinary times, it can scarcely be so at present, when they might be used in ways far more serviceable to the nation.' This writer seems ignorant of the fact that a serviceable horse, according to the War Office, is not younger than five years old, and that the majority of race horses in training are two, three, and four years old. If racing is suspended now the horses of these ages will not be tested in a way which will enable us to know their value.

"We have recently seen His Majesty at the Agricultural Hall presenting the King's Cup for the second year in succession to the owners of Birk Gill. This horse and all the other King's Premium horses are the result of racing, and for years past have been nearly related to the best winners on the turf.

"Now, in breeding from these horses, at any rate one knows by Epsom and Ascot tests that there is stout blood in them. Remove the tests and all is chaos. Stop racing and many breeders will be compelled to give up their serviceable amusement. There are many with limited incomes who breed thoroughbreds which would then become absolutely useless and unsaleable. It would save expenses to shoot them rather than keep them till the end of the war on the chance of their being useful riding horses, or possibly sires of very low value."

That racing in England is to continue was the decree of the Jockey Club, which, on Tuesday, March 16, decided that it saw no reason to reverse its decision made last September to the effect that the sport should be carried out where local conditions permitted.

Captain Greer, senior steward, said:

"The cessation of racing for two years would break every breeder of bloodstock in Great Britain and Ireland who was dependent on the proceeds of his stud for his income; and their employees, chiefly steady, elderly married men, quite unfitted for any other form of employment, would be absolutely deprived of their livelihood.

"If racing were stopped for an indefinite period it was obvious that the business of the men who trained horses to race must stop with it. Every training stable was a center of industry. The flourishing town of Newmarket, with 12,000 inhabitants, depended entirely for its existence on the training and breeding establishments around it."

SADDLE HORSE AFFAIRS.

It was announced at the annual meeting of the American Saddle Horse Breeders' Association by Second Vice-President Thurman that President John B. Castleman was under treatment in the hospital at St. Augustine, and that First Vice-President Claude M. Thomas had been called to Baltimore by the illness of his father, E. K. Thomas, the old-time Shorthorn breeder. Later word announces that Gen. Castleman has returned from the hospital to his winter home in Eau Callie in better physical condition than for months past. He proposed to attend the meeting against the advice of his physician if his presence was deemed necessary.

The financial statement showed receipts during the year of $7,546.50, and a cash balance of $743.30. Securities to the amount of $4,991.82 are held by the association.

During the past year 1,475 mares were registered, and 500 stallions and geldings. This is a decrease in registration of 317. The number of foals registered in 1914 decreased 117 over the previous year. Volume 6, containing 3,000 registrations, was issued in December. Secretary R. H. Lillard submitted the following recommendations:

"To supply a constant and growing demand for information I would respectfully recommend that data concerning the original breeding, characteristics, achievements and utility of the saddle horse be arranged in pamphlet form for general distribution.

"I beg also to call the attention of not only the members of the association but all saddle horse breeders and dealers to their neglect in not having transfers officially recorded. The need for recording transfers is made apparent by the inability to answer inquiries in regard to the ownership of horses where transfer has not been made. Record of transfers would aid in preventing fraudulent and erroneous registrations and stallion owners especially should be required to show ownership of horse before certificate of breeding accompanying applications is accepted as evidence that mare was bred."

The preparation and publication of the pamphlet recommended by the secretary was authorized.

A committee—S. T. Harbison, Matt S. Cohen, I. H. Thurman, Allie Jones and Powhattan Wooldridge—had been appointed by Prof. J. J. Hooper at a Lexington meeting of saddle horsemen to draft a new form of stakes to be recommended to fairs. They recommended, taking a $3,000 stake as a basis, that the fair provide $1,500 and charge a nomination fee of 10 per cent of this amount, or $150 for each nomination, payable 60 days before the exhibition, and require at least ten entries to fill; the stake to be divided $1,000 to first, $750 to second, $500 to third, $400 to fourth and $350 to fifth winners. Of the first money $100 is to be in plate, which will be withheld at the decision of the stake early in the week, and awarded later when the winner will be required to give an individual exhibition. A special feature of this proposed stake is that the excess money received in fees when nominations total more than ten be shown for as a consolation stake by horses winning no part of the stake.

The committee's suggestions were adopted with one exception. The committee recommended that the consolation stake be divided 60 per cent to first and 40 per cent to second horse. By action of the association on that point the recommendation is that the consolation stake be divided 40, 30, 20 and 10 per cent among the four winners.

The publicity committee was ordered continued, with authority to take such steps in advertising the saddle horse as it deemed best.

The committee on increase of capital stock reported that the written consent of two-thirds of the stockholders must be obtained to such increase, and that the shares must first be offered to the present stockholders. The committee was instructed to take the necessary steps to increase the capital stock to $25,000.

Officers were re-elected as follows: President, John B. Castleman, Louisville, Ky.; first vice-president, Claude M. Thomas, Paris, Ky.; second vice-president, I. H. Thurman, Springfield, Ky.; treasurer, Harry Weissinger, Shelbyville, Ky.; secretary, R. H. Lillard, Louisville, Ky. Directors: John T. Woodford, E. W. McCormack, H. A. Greenwell, L. L. Wells, Powhattan Wooldridge, John T. Collins, Paul Brown, James A. Houchin, J. L. Gay, and Gus Ball. State vice-presidents were elected for 21 states, the District of Columbia and Hawaii.

The secretary was instructed to secure the age and date of death of all prominent registered sires, and allot a page to them in Volume 7, giving the name and post office address of last owner.—Breeders Gazette.

HOW TO BECOME A TURF JOURNALIST.

[By One of Them.]

Editor The Horseman:—Having a desire to travel over the country at somebody's expense except my own, and at the same time not to be burdened with too much work, I have selected a turf writer's job as being the best form of amusement. Have had no experience, but think you might put me wise as to what I must do should I secure such a job. Yours.—S. O. Ftsnap.

We are sorry to hear that you have selected turf writing as your ideal profession, because talents, such as you claim to possess, should not be wasted on such a life of ease as it enervates you for any other kind of work that you may wish to adopt later on, in case you meet with a failure in scribbling about horses, their owners and trainers. Once you become a turf writer, you will always dabble in the game more or less, and no man ever becomes rich or even gathers enough of the "gelt" to keep him from want when he becomes old and decrepit. You will always be a pensioner on some paper or hanging on to the coat-tails of some rich owner, taking any crumbs of subsistence that he may hand you. When you reach that ripe old age when a rocking chair and cambric tea are your most strenuous dissipations, you can only fall back on reminiscences of the past and exploit in your writings (if any paper is charitable enough to take them) the times you spent in the past, when you were allowed to address some big mug in the horse business. The chances are this rich owner did not know you were there, but in this autumn of your turf career, everybody else that could remember is dead and you are safe from contradiction. Remember that old saying, "It isn't what you used to be, but what you are today."

Some turf writers, however, reach a little bit further than this, in their advancing years; they become editors, not through their ability to write good horse stories, but because of their ability to masticate dictionaries and encyclopedias, the long words used by them in their effusions are rarely understood by the average horseman, and hence they are credited with being smarter than the average turf writer, thus securing the position of editor, which is indeed a soft berth for some. Others adopt the statistical feature of turf journalism to hold on and this job is as good an excuse as handling the blue pencil; statisticians on rival papers, through jealousy, are the only ones to find out any mistakes that may occur, as they apparently neglect their regular work, while hunting out the faults of their rivals. Some turf writers start as statisticians and never climb any higher. Other aged turf writers take up arranging advertising for others, some tabulate pedigrees at a bone or more per ped., some become race track officials, but the majority just drift along until their death notices appear and then they are forgotten. The very elite become stock farm managers, secretaries of parent trotting associations, or syndicate the turf news.

Now that we have shown you the finish of the average turf writer, mellow with age, whose knowledge of horses dates back to Volunteer and Hambletonian days, and who knows more about those days than the present, we will endeavor to give you pointers on how to become successful in the profession (?) since your mind is so set on adopting it.

The first important point is to become known. Make your first acquaintance large, mix in all groups of horsemen wherever you find them, do not care whether the conversation is private or not, never think you are not wanted. These groups may move away from you, but follow them up; as a representative of the power of the press they will not insult you; just stick until you break up the conversation; they will admire your bull-dog tenacity. This style of action should only happen, however, after you have secured a position on some turf journal or daily newspaper, even if you are only being paid for what you write.

Get a regular salaried position. This should be your aim, as you cannot have a very good time while paying your own expenses, and you do not stand as high in the community. It sounds better to hear the answer, "Why, he is a reporter for the 'Spavin Journal,'" than to hear someone say, "Oh, he gets paid for what he writes on the Daily Spasm." Then, again, your grafting will be better on a paper that circulates further than any local.

It is not a bad idea to establish yourself, by making a pet out of one or two trainers or owners. Keep plugging them all the time; take up any knocks that are registered against them and praise everything they do and every horse they own. The other owners and trainers soon notice this and say, "I wonder how much Billiken came across for that," or some other expression meaning the same thing. By this constant shooting the bull at a select few, you soon become known and your staff is gradually increased until you are fairly well known in all gatherings where horsemen are present, and you soon have the hand-shaking privilege wherever you go. After this you can safely feel that it is time to commence a little grafting to insure more comforts and be able to display a small bank roll. The possession of the latter also allows you the privilege of talking loud and making bets, but never when talking betting put up the money, as you must find some excuse for reneging if you lose. Some turf writers keep a book on such bets, as this gives them a chance for future and amusing arguments.

Talking about grafting, right here we would say that there are many ways of getting it. Some grafters are more expensive to the victim than others, and like manufactured goods, there are a number of grades, starting from the one who is satisfied with a drink or a drunk, up to the one that requires a large money consideration. Turf writers, as a rule, never reach the latter class, as their wants and style of living do not aspire to large sums of money. The paper they work for pays the railroad and hotel bills, they get enough cigars handed to them to keep them going, a touch made on some of their victims, and a winning bet now and then, puts ready cash in their pockets. Once in a while a turf writer becomes the owner of a brood mare, either through the form of a gife or otherwise. If he wants to breed on a small scale he can easily secure a free service by boosting the stallion he would like to use. Some turf-writing-owners have even tried to secure free entrance into futurities for the mares owned by them. These free-service getters must always protect the owners of these free stallions; in fact, it becomes a life-long job. Other turf writers manage to secure horses without paying for them, and when sold the profit is pocketed by them, but nobody knows where the original buying price of the horse goes to. Maybe the horses were only loaned.

Some turf writers secure their graft through butting in on the sale of a horse. They act as a go-between and often collect from both sides. They also make good sales agents, because if they hear an owner say that his horse is for sale, they will tout him far and near in their columns and, if sold, they must have their bit, and if the owner doesn't come across some fault is suddenly found in the horse, and so strong is the influence brought to bear that the sale is off.

The booze-grafter is the cheapest one in the profession, and it really requires the use of some diplomacy to become a success. But it is very successful, if properly worked, as is strongly evidenced when you see a turf writer come into the gate of a race track cold sober, and before the day is over, he is doing and saying foolish things, not even looking at the races. A grafter of this kind first locates the bar, then finds some horseman that is strong on the booze. He commences the conversation, after the hand-shaking is over, by praising the work or breeding of a certain horse, and slings this bull so strong that he is invited to "have one." Then he smiles and cuddles up at once, and in his journey along the "path" from point of conversation to the third rail, he is remarkably entertaining and good-natured. If the man buys two, the smile increases. After he cuts loose from this one, he looks for another live wire, and this new victim also has the best horse; in fact, there are more "best horses" than a sober man could count.

If this booze-fighting turf writer cannot find anyone to buy, he will take the path again all by his lonesome and upon looking into the barroom, if he sees someone he knows, he will straighten out his shoulders, brush into the room fast and speak cordially to the one buying, but he does not stop, unless halted by those magic words, "What will you have?" He does not accept at once, but is edging nearer and nearer, until he is finally halted by the hard woodwork of the bar, but this is as far as he wanted to go. Then listen to the bull he shoots, as, for instance, "That little bay mare of yours is stepping some. I saw her step that last quarter today in 31 seconds; is she staked?" The man may say, "Why, my mare has not been out of the barn for a week," but this turf writer is not feazed a bit; he swallows his drink and says, "Where do you race next week?" and then slowly draws away. He realizes that he must entertain a number of suckers during the afternoon and cannot waste too much time on any one individual.

To be a real successful turf writer, you must early in your career adopt the use of the pronoun "I" in all your writings, as this impresses yourself with your own importance, as you well know that your private opinion on any horse or any subject goes a long way with the public, "not." The general opinion that horsemen and others have of the average turf writer is, that he is the friend of the man that is coming across, either with coin, booze or advertising, and if the owner, trainer or driver is airtight on these propositions, why, the turf writer has no time for him and passes him up by not mentioning his name. For that reason the use of "I" in his effusions shows an aggravated form of egotism that would speedily cause death, if it was a killable disease. Of course, when you use this "I," you are put down by some of the other turf writers as good, but these are the only ones you impress, and as they do not give you any part of your living, it is best to leave it out. Some papers will not stand for it.

If the average turf writer has a man lined up as a future beneficiary, he will use such expressions as "I was much impressed with a bay mare which Jack Jones had out this morning"; "That I looked at"; "I was handed a great surprise"; "I predict a great future," or "A trotting prodigy." All these expressions are good excuses for filling up space; on the face of them they show the egotism of the man, because the proportion of horses that are thus written about rarely becomes sensational, and when they do, it is printed as an owner's statement in a sale catalogue.

More horses have become failures, which turf writers have raved about in the above style, than have become prominent, so be conservative in your opinions and hand the bull in a milder form, not staking your reputation too much.

Sometime during your career write a short biography of your childhood days, as that makes a good filler. Tell them how you became a turf writer, even going back to the time when you grabbed a year-book instead of a nursing bottle and almost starved yourself to death chewing on its edges. A story like this interests the horsemen as much as the early history of the swipes working on their horse.

When sent to report a race meeting, without a badge, get very indignant because that individual at the gate with the alfalfa hanging from his chin refuses to let you through, and tell him who you are. He should know, however, because he has spent the other 51 weeks since the last fair on a backwoods farm. After you have paid your admission into the grounds always remain on the track; never go near the press box. You may have a fight or two with the policeman, who has orders to keep the track clear, but that makes no difference—you are the supreme being, and not he, or anyone that gave him his orders. If he insists on removing you and an official of the association supports him, you assert your importance and threaten to roast the association, as that will help to keep the 50,000 people in the grandstand from coming again next year, and may also induce the association not to pay its advertising bill for the current year. Ejection from this point of vantage means more work for you in hunting up your constituents, on whose volunteer pay roll you now are. If there is a betting shed on the track, hang around there, as you may be able to sell your friends some inside information that they do not know about, and maybe they will give you a ticket, if you are real good.

We nearly forgot to tell you to call everybody by their first names. Whether you ever met them or not, it sounds good and makes people think that you are well acquainted. Another thing, if a horseman friend of yours roasts the officials in the stand or the association giving the meeting, you join in with them, and even write about it, as such work calls for a general good feeling, even if the association is an advertiser. What need you care if you hurt them and your paper, as long as you get your own benefits. The paper you work for is paying your expenses so that you can enjoy yourself.

Another thing that you should remember, never take your wife to any of the race meetings with you, because you would never take a ham sandwich to a banquet and, therefore, why should you take her and spoil your pleasure? Your health, both present and future, will be much better with her at home minding the kids. It would, indeed, be embarrassing to have some one come up to you in the hotel and say, "Why, I thought your wife was a blonde," after you had been doing some introducing. Such an incident as this might spoil a good story.

There are a lot of other things we would like to tell, that would be a success to a turf journalist, but as there is "Honor among thieves," we would not like to show up the fine points of the business in cold type; then again, you must learn to be self-reliant and we will allow you to find these out for yourself.—W. H. Shields, Horseman.

TROTTING HOLDS ITS OWN WELL IN NEW ZEALAND.

As far as actual racing is concerned, the present season does not offer many more opportunities to owners in Canterbury, and the Easter meeting, to be held at Addington on Thursday and Saturday of this week, will bring the New Zealand Metropolitan Trotting Club's campaign for 1914-15 to a close. Judging by present indications this week's fixture should prove a very successful termination to a season that has been marked by some very high-class sport. From a revenue point of view, judged by the totalisator returns, the year's operations will not show such a handsome profit as that recorded for the season 1913-14, but there should still be a very substantial balance on the right side of the ledger. The club's first meeting of the present season was held in August, just after the outbreak of the present great war, and under these circumstances it was scarcely surprising to find that there was a drop in the totalisator investments, which amounted to £76,952, as compared with £80,469 in the previous season. The New Zealand Cup Meeting in November last also showed a decrease in the investments from £124,362 to £117,999 10s, but at neither of these fixtures was there any perceptible falling-off in the attendance, and the sport is very clearly maintaining its very strong position in the public favor. Last month the meeting held on February 13th attracted a very large attendance, and the figures for the day were £23,151, as compared with £19,349 10s, this being a remarkably good showing for what is admittedly the least important of the club's fixtures. Taking into consideration the present state of our national affairs, the club's officials may well feel satisfied with the results that have so far been achieved, and with an ordinary measure of success this week, there should be no necessity for them to call a halt in the policy of progress. Very shortly the executives will have to take into consideration the programme for next season, and we feel sure that they will recognize their responsibilities by making provision for the highest class of racing.—New Zealand Referee.

Gen. C. C. Watts returned from California Friday, and says the boys over there are getting ready for the big stakes. He says trotters are working around 2:08 and pacers close to 2:05. He thinks the Exposition races will be high class and that nothing short of a phenomenal horse will have a chance for the money. Several stables will ship east as soon as the June races are over. Lon McDonald has wintered well, and feels he has a chance as his horses are very satisfactory.—Horseman.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

DOGS OF WAR IN EUROPEAN CONFLICT.

There is a popular impression that the European conflict is the first war of nations in which dogs have played such an important role. A writer in The Field points out that they were employed in war times centuries ago, and that there is evidence that the Egyptians made such use of dogs as long ago as 4000 B. C. In reviewing the part that dogs have played since the earliest time he says:

For centuries it has been recognized that dogs can be trained to be of the utmost value for military purposes, and it is certain that no metaphor was intended by Shakespeare when he made Antony exclaim, "Cry 'Havoc,' and let slip the dogs of war." Though dogs were little, if at all, used for military purposes in Elizabethan times, they were undoubtedly so employed by the Romans and other military powers of a bygone age. It is extremely likely that dogs, after becoming domesticated and brought into use for pastoral purposes, were soon adapted to both warfare and the chase. They were sometimes used as guards and videttes, and when they had their places on the battlefield they were usually protected by spiked collars or clad in coats of mail. The citadel of Corinth was guarded by fifty dogs placed outside the walls on the seashore, and it is stated that on one occasion before the garrison could shake off the effects of a night's debauch forty-nine of the brave hounds were killed by the besiegers.

As was related by a writer in The Field some years since, Soter escaped to communicate the news of the advancing foes, but he was in time to warn his masters. The Senate ordered a silver collar to be prepared for their canine savior, on which was engraved in Greek characters, "Soter, defender and preserver of Corinth." His slain companions were not forgotten, as a marble monument was erected in their honor and suitably inscribed. The Germans have paid particular attention to the training of their dogs, a fact which has not been lost sight of by English military authorities, and sentry dogs are now recognized as a source of strength. There is no reason why dogs trained to assist the soldiers in scouting duty should not be useful, as with their extremely delicate olfactory organs and acute hearing they would more speedily than their master detect the near presence of an enemy. They are more valuable still as a guard or companion to a sentry on outpost duty.

The ancients used dogs for both attack and defense, but today's war dog has to fulfill totally different duties—the ways of warfare being so different—as an agent of actual attack and defense his use is out of the question. There is evidence that dogs were employed in Egypt 4000 years B. C. Aneas mentions them as being used to carry dispatches in their collars, while both the Cymbrians and the Teutons had their battle dogs, and they undoubtedly inspired fear in the Roman legions. The Romans posted dogs on the fortifications to give the garrison timely warning of the approach of the enemy by barking, the Gauls had large packs of dogs clad in armor, and Attila, King of the Huns, used fierce hounds to guard his camps. In later days port-fires were placed on the dogs' backs to set fire to the enemy's camps. As a fact, most of the European nations have used dogs in warfare at one time or another. The French learned of their value from the Kabyle tribes of Tunis; the Austrians trained Dalmatians to scent out ambushes, though it was not till 1882 that this was done; while after the siege of Geoktepe the Russians trained dogs as a preventive to surprise. No nation, however, has paid so much attention to the subject as Germany, and on his return from the war base a few weeks since that good authority, Major Richardson, wrote a most interesting article to The Times, showing how valuable dogs are proving to be in the present campaign. "For many years past," he wrote, "the Germans have recognized the value that dogs were likely to be in battle for various uses, and have trained them as aids to their ambulance, and particularly as auxiliaries to their sentries and patrols. Besides these, they had large numbers of highly-trained police dogs, and at the outbreak of the war all these latter were also mobilized, and accompanied their masters to the battle fields, lines of communication, etc.

There are at present about 6,000 trained dogs helping the Germans on both fronts. In France before the war a good deal of attention had been given to training dogs for ambulance work, but the sentry dog idea was practically ignored. A few officers did their utmost to establish a training branch for this work, but the French war office gave them no encouragement. It has been found that the absence of such dogs is a distinct lack. Especially has this been so, I hear, at one of the big fortresses during the night attacks delivered by the Germans. The French therefore procured a few trained sentry dogs, and, after these had settled down and had become accustomed to the men, they were found to be of such service in giving warning of the approach of the enemy some time before the sentries are aware of the fact that orders have been given to procure as many dogs suitable for sentry work as can be obtained, and since the use of dogs in this particular region no night attacks of the Germans have been successful.

It is a pity that the value of these dogs has not been generally recognized by the French and English armies in peace time, as it must not be inferred that any dog (even one that proved itself to be a good ordinary watch dog) will make a good sentry dog. This idea is a common error. These dogs have to be of a special temperament, and have to be carefully selected, in the first place, and then carefully tested and trained. A dog that is of value in guarding things, such as its master's property, or at its kennel, may be useless away from this environment, in the fields, and with some one not its master.

When the story of the war comes to be written much must be said as to the part played by dogs. It has been seen that regimental dogs are not afraid to advance under fire, that the dogs of reservists have refused to leave their masters and have followed them to the front, and that several have been killed on the battlefield. A touching story is told of a spaniel that saved his master's life. At Aubervilliers a wounded Zouave was taken from a train, and on a surgeon major giving instructions for him to be removed to the American Hospital, the poor fellow begged that his dog might go with him. "He saved my life, Monsieur le Major. Let him go with me." The spaniel licked the hands of the wounded soldier as he spoke. "It is impossible, my poor fellow," said the surgeon. "I would like to comply with your request, but the hospital is not made for dogs." Such an order was regarded as final, and the manageress of the canteen at Aubervilliers relieved the wounded man's anxiety as to the future of his pet by undertaking to look after him. In bidding farewell to the spaniel, the Zouave told how his faithful companion had saved his life. A German shell had shattered the soldier's foot, wounded him in several parts of the body, and almost buried him under earth. The soldier lost consciousness, and would have died of suffocation but for the dog. Using his nose and paws the spaniel removed the earth, and when he had exhumed his master he licked his wounds and thus prevented gangrene from setting in. Then he began to howl. French ambulance men were attracted to the spot, and they carried the wounded soldier to the field hospital, where he was treated and then put in a train for Paris, the dog accompanying him. When the ambulance took the Zouave to the hospital everybody was sorry for the poor dog left behind. For three days he refused to touch the dainty food provided by the manageress of the canteen, and at last the woman decided to take the dog to his master. At the hospital she told how the spaniel had saved the owner's life. The story impressed the director of the hospital and he allowed the dog to join his master. It was a joyous meeting, and brought tears into the eyes of those who saw it. Since then the dog has never left the bedside, and his master is now looking forward to returning to the front. Could the dog give his opinion of the situation, there is not the least doubt that, in spite of all the attention paid to him at the hospital—for he is looked on as an honored guest—he would say that nothing could give him greater pleasure than to accompany his master when he returns to the base.

THE SEALYHAM TERRIER.

The Sealyham Terrier's rise to fame and popularity has been rapid and permanent. Previously to the Kennel Club show in October, 1910, the breed was comparatively unknown to the English exhibitor, and it fell to my privilege to be chiefly instrumental in introducing the Pembrokeshire production to the English public.

At the show in question I offered personally to guarantee several classes, provided the Kennel Club consented to their inclusion in the schedule. The ruling authority agreed to this course, and four classes were allocated to Sealyhams, and also, on my suggestion, Mr. H. Ridley was appointed to judge. The result was quite a decent entry, averaging, I think, six exhibits per class. In open dogs, Ch. Dandy Bach, which I had just sold to Lord Kensington, was placed first; Ch. Khisky Bach, then my property, came second; while Ch. St. Brides Demon, exhibited by Lord Kensington, was placed third. In open bitches, Ch. St. Brides Delight took premier honors, second going to Ch. Bess Bach, then owned by Mr. Charles Wynn-Griffith. It will thus be seen that the winners of that time must have been pretty good specimens, inasmuch as most of them subsequently acquired championship honors, and have continued their successful show-bench career down to the present day. This is more or less an interesting feature as showing that, notwithstanding the enormous amount of breeding that has since taken place, few individual good specimens have been produced. But there can be no question that the breed, as a whole, has vastly improved during the last four years, and the noticeable uniformity amongst the large numbers of Sealyhams which now appear at all the leading shows is evidence of much care and attention on the part of breeders.

The origin of the Sealyham is more or less wrapped in obscurity, but there are several features of interest which I think I am in a position to lay before readers of "Our Dogs," which will give an approximate idea of how the Sealyham was first evolved and came to be recognized as a distinct breed.

Capt. John Edwardes was an eccentric sporting gentleman of noble birth, and resided at Sealyham, an attractive country mansion situate between Haverford-west and Fishguard, and which is now in the occupation of Mr. and Mrs. Victor Higgon, the latter a well-known breeder and judge, and chairman of the Sealyham Terrier Club since its formation in January, 1908. The terrier is called after the residence of its founder.

Capt. Edwardes, as I have just stated, was a great sportsman, and he conceived the idea that the mongrel dog of sixty or more years ago which he was obliged to use in his numerous sporting excursions, was not quite the kind of animal for bolting the fox and otter, or digging out the badger, which he wished for. There seems little doubt that the terrier of that date was more or less a nondescript kind of creature, with no pretension to beauty or breeding, nor with the least claim to uniformity of type. It will therefore be apparent that to evolve a short-legged, smart, workmanlike terrier which, above all other considerations, must be dead game, was a problem not easy of solution, and only a man possessed of indomitable courage and tenacity would have persevered in his efforts to realize an ideal which repeated failures must sometimes have indicated was incapable of accomplishment. But Captain Edwardes, in his lonely country mansion, plodded on, and by careful selection and judicious breeding, eventually established a short-legged, rough-haired terrier capable of facing any vermin then prevalent in the county. At this period the polecat was fairly plentiful in the dense woods abounding in the vicinity of the captain's residence, and the old gent made it a sine qua non that no dog should be given lodging at Sealyham which would not dispose of a full-grown specimen of the putorius fœtidus; and anyone who has seen these denizens of the forest will at once realize that the standard of pluck fixed by the gallant captain was by no means insignificant.

His method of testing the young dogs, which took place when they were about a year old, was as follows: A live polecat was dragged across a field, and then enclosed in a small pit, roughly a couple of feet deep with an entrance about the size of an ordinary badger's hole. The quarry was secured with sufficient liberty to enable him to put up a fair and square fight. As the polecat is a notoriously odoriferous animal, the dog, which would previously have done plenty of ratting, usually experienced no difficulty in following the trail and arriving at the spot where the length of its stay in the world was to be decided by the character of the combat which then took place. If the dog "went in" and killed, all well and good; if he funked the encounter and minced about outside, and declined to tackle his quarry, his doom was sealed. But our old friend was not always wise in his estimate of the character of his dogs. One day a particularly good ratting dog turned craven, and refused to tackle the polecat. Every facility and encouragement was given, but without effect. The verdict was soon pronounced—the coward must die. The man who had walked the dog had become attached to the terrier, and begged hard that as he was such an excellent ratter, and so useful to him about the farm, he might be allowed to keep him. A reluctant consent was given, and before the dog was a year older he turned out one of the gamest terriers ever bred at Sealyham, and the old captain subsequently purchased him from the farmer. The dog lived to a ripe old age, and when he died was mourned as one of the best tykes that ever went to earth. There is nothing exceptional in this experience, and I have no doubt that many readers of this journal, like myself, could relate similar examples of a dog not really developing until he had reached two years of age or so.

To come to the present-day Sealyham it is necessary to jump several decades.

The standard of points drawn up, and subsequently adopted in a slightly amended form by the Sealyham Terrier Club at its first meeting in January, 1908, conveys, I think, a very fair and accurate description of the Sealyham Terrier.

It is often stated that there must be no resemblance to the fox terrier. I agree, but I don't agree with those breeders who prefer a Sealyham showing more resemblance to a clumber spaniel than a fox terrier. Of two evils I prefer the fox terrier type. But it is certainly not necessary to have either. I think the Sealyham should have a wider skull, shorter and wider jaw, broader chest, longer body, more profuse and harder coat, and, of course, very much shorter legs, than the fox terrier. When I add that larger ears are also permissible, I think I have covered the chief characteristics of the dog.

I am surprised to find in the standard of points issued by a new club, that "black markings are objectionable, even on head and ears, and a large black spot on the body should almost be a disqualification as showing fox terrier blood." Now, such rubbish should not be permitted to pass unchallenged. I agree that none of us care for body markings of any description, but to say that black body markings are

evidence of fox terrier blood shows an astonishing ignorance of the history of the Sealyham in particular and dogs in general.

My object in referring to this matter is to prevent novices from being misled by such nonsense, and they will no doubt be surprised to learn that I have bred scores of puppies by Huntsman and Peer Gynt with any amount of dark body markings, and I do not suppose anyone will dare dispute the statement that the Sealyham terrier of today owes more to these two dogs than to any other specimen, living or dead.

In conclusion, I do hope the novice will not be led away by the glamour of misleading descriptions. Let him be careful to consult a rational standard, and then endeavor to breed specimens as near to it as possible, and consign the fantastic fallacies of the newly-fledged theorists to the melting-pot of immaturity.—F. W. Lewis, in "Our Dogs."

OREGON FISH AND GAME LAW CHANGES.

In view of the fact that many California sportsmen hunt and fish every year in Oregon, the following statement by Chief Game Warden L. H. Darwin, concerning new and important features of the new Oregon fish and game statutes, will prove of interest:

The State game laws as they now stand should prove much more workable and satisfactory than they have in the past.

The last legislature passed a number of amendments to them. As the work of the body stands, with the vetoed section excluded, very few sportsmen object thereto.

A provision of the new law which should be highly acceptable to farmers and land owners is that requiring their consent before their holdings can be thrown into a game preserve. Admittedly it is going to be harder to create game preserves in the several counties of the State, for the law which permitted a man's land being thrown into one and him denied the privilege of shooting thereon was bitterly resented in many counties.

The new law also gives the Chief Game Warden and the Chief Deputy Game Warden the right to hire not more than two special deputy State game wardens on each side of the mountains and send them into another part of the State for the purpose of detecting violators.

It is believed that the new open seasons for the taking of both game and game fish are much more satisfactory than under the old law. The new law makes the trout and bass season both open on April 1. The trout season under the former law opened on May 1, and the bass season on July 15. While in some sections of the State the trout are spawning in April there is a saving clause in the new law which permits of the State Game Warden and the Deputy State Game Warden or the County Game Commissions closing any lake, stream or part thereof when it is deemed advisable to protect fish when they are spawning.

The new law permits the killing of three Chinese or English pheasants, Hungarian partridges, sage grouse or sharp-tailed grouse, or a mixed bag of the above named birds, in Kittitas county during a season.

It also makes the hunting week end at midnight on Saturday night, instead of at midnight on Wednesday, and increases the number of ducks, geese or brant one may have in his possession at one time from 20 to 30.

The same section that provided for the use of sneak boats also changed our State law to conform with the federal law in preventing shooting before sunrise and after sunset. In order to prevent the return of the sneak boat it was necessary to veto this section, and consequently our State law still reads that a man can shoot a half hour after sunset and a half hour before sunrise, but by doing this he violates the federal law, which makes the punishment much more severe, and there is less likelihood of a person attempting it.

A great majority of sportsmen will heartily approve of the governor's action in vetoing the attempt to restore the use of the sneak boat.

The seasons for game birds and game animals are so changed in a number of instances and in the varying sections of the State that it is necessary to print them in detail in order that they may be understood.

However, the new law gives permission to keep the flesh of game animals, game birds and game fish for a period following the close of the season, furnishing the County Game Commission a description thereof and informing them as to where the same is stored. Under the old law a man could not have any of these in his possession the day after the season closed.

Although the game bill makes no reference to it, it is a fact that hereafter the Fish Commissioner of the State will be Chief Game Warden, by virtue of his appointment as Fish Commissioner. This was accomplished by a provision in the new food fish law.

To my mind this makes greatly for the advancement of the game fish interests of this State.

Four out of every five persons who take out a fishing and hunting license make use of a rod rather than a gun. It would seem, therefore, that we owe a very large duty to the fisherman, as he furnishes four-fifths of our revenue.

Heretofore many of the county game wardens have sought to prevent sportsmen from acquiring a State hunting and fishing license, because of the fact that the county did not receive any portion of the $5, the entire amount going into the State game fund. The new law is amended so the county issuing a State license is given 20 per cent, or $1, which makes it better for them to sell a State license than get only 90 cents for a county license.

Had Governor Lister not vetoed that section of the new bill which would have prohibited the shipping of game into the State the game laws would have been practically impossible of enforcement. He did this, however, and by eliminating the other two sections with a veto, he left the bill as it will finally come to law in a condition that is very satisfactory to the great majority of the sportsmen of the State.

The economy of the situation is to take the eyed eggs and have them hatched as near as possible to their point of planting. Obviously with only five State trout hatcheries this would be impossible, but with our ability to make use of the State's salmon hatcheries it is very easy, in most instances. As a matter of fact, ever since I have been Fish Commissioner of the State we have used a number of the salmon hatcheries, for this could be done without in the least interfering with the salmon hatching operations.

The matter of transporting trout-fry any great distance is a serious problem, while eyed trout eggs can be sent to New York, or, for that matter, to Europe and under the methods which we employ would arrive in first-class condition. Thus it is if we wish to plant some Lake Chelan trout in the waters of Pacific county we simply send the eyed trout eggs to one of the two salmon hatcheries which are located in that county, where they are hatched out, and the planting is then rendered a comparatively simple process.

RAISING DROWNED BODIES.

[By Alfred Mathewson.]

A recent inquiry to my office relative to blasting for the recovery of the body of a drowned person, leads me to offer you further information in this connection.

About a year ago I was asked to blast in a stream with the view of recovering a body for which continual search had been made with grappling-hooks for more than ten hours.

I was just a little surprised to find that there are still some people who believe that a body will not "come up" until the gall-bladder bursts, and that blasting is done for this purpose to hasten its "coming up." The truth is that the specific gravity of a body is in no way affected by blasting; it will remain at the bottom until decomposition generates the gases that increase its buoyancy. Sometimes a body may be "brought up" by blasting as the result of its having settled in a muddy bottom, being held there after it is decomposed enough to float, and being washed loose by the currents caused by the explosion. Or it may have been caught on a snag and washed loose in the same way.

The washing loose of the held body after it is decomposed enough to float is one way by which blasting helps to recover bodies. Another is by washing off the mud that covers a body only a few hours in the water so that grappling-hooks will take hold, or a searcher may see it. I believe the latter was accomplished in the case at hand.

This drowning occurred in a fresh water stream, about 100 yards wide and 10 to 12 feet deep where the body was said to have gone down. There was a moderately swift current that would, presumably, carry a struggling, drowning person several yards down the stream before the body finally sank. And possibly this current was strong enough in the channel to carry a lifeless body onward to deposit it in an eddy or shallow anywhere below. Also, there were numerous snags on which it might have caught.

For the purpose of avoiding placing a charge where it might mutilate the body, we had every foot of the bottom thoroughly dragged and sounded for 10 or 15 yards around where we decided to make the blasts. We commenced just a few yards below where it was said the body went down, and placed, on the bottom, in mid-stream, two pounds of Du Pont straight nitro glycerine dynamite, by means of securing it to a pole at about two feet from an end that had been pointed. The pole was of a length to extend above the water when the pointed end was pushed firmly into the bottom. The detonator wires were previously fastened to the pole and extended to the top, where the wires from the blasting machine, brought over other poles set at intervals from the shore, were connected.

The blast seemed to have done what would be expected of a properly gauged charge: The water swelled against both shores, rolling up water-logged leaves, sticks, etc., and clouds of thick, muddy water. All this was promptly carried off by the current.

We proceeded down stream making similar blasts about 100 feet apart. After the sixth blast, a young man wading in shallow water, near the shore, about 150 feet below where the last blast was made, located the body.

Some persons who were present continue to attribute the finding of the body to the blasting; others doubt. One man said he had both waded and dragged over the spot just previous to blasting. My personal opinion is that the blasting washed off the mud and exposed the body, which, had it not been recovered when it was, would probably have settled deeper and possibly never have been found.

Drink Jackson's Napa Soda.

CHANGES IN GAME AND FISH LAWS.

The deer hunting seasons in California have been materially altered by the legislature in the new fish and game district bill, creating four large game districts, already passed by both houses, and by a senate bill passed by the assembly and ready for Governor Johnson's signature. In the coming fall the open seasons for deer will be:

August 15 to October 15 in game district No. 1, which covers the eastern half of the San Joaquin and Sacramento valleys, the Sierra Nevada mountains and the counties north of Mendocino and Glenn counties. The Sacramento and San Joaquin rivers are the western boundary of district No. 1.

August 1 to September 15 in game districts No. 2 and No. 3, which run from the northern boundaries of Mendocino and Glenn counties down through the coast counties, the coast range and the western half of the Sacramento and San Joaquin valleys to the northern boundary of Santa Barbara and Ventura counties.

September 1 to October 1 in game district No. 4, which includes all of southern California.

Other senate fish and game bills passed by the assembly establish the following changes:

Open season, wild ducks and geese, October 15 to Feb. 1. Open season valley quail and cottontail rabbit, November 1 to January 1. Open season mountain quail, grouse and sage hen, September 1 to December 1. Open season black bass, May 1 to December 21. Black bass limit is 26 fish a day and sale is forbidden.

Trout under 12 inches in length cannot be sold. Game birds and deer cannot be killed half an hour after sunset or half an hour before sunrise. Use of explosives to kill fish, or discharging of petroleum, acid, coal tar or deleterious substances into waters of state made a misdemeanor.

BEHOLD THE FISHERMAN.

He riseth up early in the morning
and disturbeth the whole household,
Mighty are his preparations.
He goeth forth full of hope—
And when the day is far spent
he returneth—
Smelling of strong drink,
And the truth is not in him.

FISH LINES.

Weather and atmospheric conditions were rather favorable for the opening of the Sierra trout season Saturday, May 1, but other things were against many limit catches. The storm of last week caused the streams to be muddy and as the result, disciples of Izaak Walton had a poor day of it generally.

Advices from all anglers are muddy streams and poor results. In the Feather river canyon some fairly good fishing is reported at the lower end, but this is bait fishing. All indications are that in a week or so the trout fishing will be good in the mountain rivers and creeks.

* * *

Napa creek near the railroad drawbridge still invites a visit for the striped bass rodster. Sunday Louis Gotthelf's two largest fish scaled 16 and 8 pounds. Another 8-pounder was captured by "Chicken Cam."

Despite the rainy weather three fine bass, weighing respectively 24, 18 and 14 pounds, were caught near Point San Quentin. Several bass were taken near Black Point. A 7-pounder was the heaviest.

The Wingo sloughs are showing some activity also. Mr. and Mrs. Charles Urfer caught four large fish Sunday, and Adam Hackmier picked up a 14-pound striped beauty just below the Wingo drawbridge.

Along the San Pablo flats, off San Pablo, schools of small sized bass have been running and many fish have been caught during the pleasant weather a fortnight ago. It is about useless to try that shore during the prevalence of the north winds.

* * *

An odd theory has been evolved explaining why bass hooks, used by night fishermen, slipped off the snells or leaders. It has been the custom of some of the striped bass fishermen to bait their hooks, drop them overboard and set the rod for a night session. Meanwhile the fisherman would turn in for a snooze or a game of cards. Time and again when a line was taken in the hook would be missing. Certain tackle dealers soon had the reputation of selling poorly tied bass hooks. The theory offered is this: Fish, it is well known, have extraordinary digestive powers. A bass having securely gorged the bullhead bait, and hooked with a No. 6 or 7-O hook, not being taken out of the water for some length of time, would naturally digest the bait, then the gastric juice would attack the shellac on the shank and dissolve it easily. Following which process the struggles of the fish would soon untwist or unloosen the thread wrapping when, presto! the leader would slip off and the poor fish would make its escape with the big hook sticking in its gullet. Most of the hooks used now are made up with an enameled and painted coating over the wrappings on the hook shank—a non-digestible compound, a scheme that works well and seems to bear out the first theory.

* * *

Rock cod fishing off Point Bluff, at the eastern end of Raccoon straits, last Sunday was a picnic for a number of handliners. Big strings of these fish, many half-pounders, were brought over to the city.

At the Traps

Live Birds.—Wing shots at the California Wing Shooting Club's monthly shoot, May 2, grassed pigeons during a downpour of rain. The birds supplied were a strenuous lot of swift-winged cooers, for but two straight scores were shot in the regular club programme during the day's skirmish.

Ed L. Hoag shot into second place in the medal race from the 31 yard mark; he stopped every bird trapped. In the purse match he killed 11 out of 12 birds, losing his last one, a strong-flying straightaway dark bird. In two six-bird pool shoots he also scored straight—35 out of 36 birds for the day.

Barney Worthen scored the only straight in the purse match event at 12 birds. Hoag, Riley and Walsh cut up second money with 11 birds each. Walsh, who has been a member of the club for the past forty odd years, dropped 21 birds out of 30 with single shots. The winners in the six-bird pools were Hoag, Nauman, Haight and Riley. E. R. Cuthbert, Bert Gracier, Dr. G. J. Sweeney and J. F. Dodds of San Diego shot as guests of the club.

Swat Terrill still leads in the medal match, with two straights and a back score to shoot. He missed last Sunday morning's train for Sobrante, he was loaded down with a basket of fine trout he caught the day previously in Lake Lagunitas, the fish were intended for lunch at the shoot. Being impeded in that manner the train slipped away, leaving him on the platform just a few feet out of reach of the car steps. Ed Schultz shot up a back score, 11 out of 12. The scores for the day follow:

Forenoon medal race, 12 white flyers, distance handicap; high guns to win:

E. L. Hoag	31 yds.	1122 2222 2221—12
P. J. Walsh	28 "	1*21 1111 2221—11

He Is Still At It.—Fred Gilbert has been shooting exceptionally well since leaving Wilmington after the "Fred Gilbert 20th Anniversary Shoot" in March. Following is a record of his work which is very exceptional indeed, a record which will be interesting to a great many of our readers:

April 2, Albert City, Iowa, 145x150; April 4, Grand Junction, Iowa, 193x200; April 11, Des Moines, Iowa, 92x100; April 13, Adell, Iowa, 145x150; April 15, Spencer, Iowa, 195x200; April 18, Grand Mound, Iowa, 196x200, April 20, Ames, Iowa, 144x150; April 21, Oskaloosa, Iowa, 98x100; April 22, Centerville, Iowa, 146x150; 1354x1400—96.71%.

* * *

Tacoma Trigger Pullers.—The Tacoma Gun Club recently entertained visiting shooters from that city, and also from Seattle and Sumner, a total of fifty guns on the firing line. The weather was ideal for trapshooting. There were 32 shooters from Tacoma, 12 from Sumner, while 6 represented Seattle. Many of the shooters had their wives and families with them. It was an invitation shoot, writes Secretary Carl Coon.

Al Riehl made the long run of the day, breaking 74 straight, scoring a win on the watch fob and also on the Dave Bales cup.

The ladies served a lunch that was fit for a king.

The scores made follow, at 100 targets, the Tacoma shooters being given an added target handicap: A. Riehl, 98; J. McAleer, 17 birds, 97; F. Riehl,* 97; J. A. Dague, 96; J. C. Jensen, 12—95; L. Raillinger, 4—95; V. Aubry, 12—95; D. H. Bales, 26—95; E. W. Cooper, 95; H. A. Scofield, 3—94; J. Cooper 4—94; F. Campbell, 20—94; G. W. Turnbull, 14—94; V. V. Eisenbeis, 4—93; F. L. Baker, 30—93; C. Coon, 2—93; A. Barlow, 3—92; C. R. Werner, 24—92; E. E. Young, 3—92; H. A. Sullivan, 3—91; G. H. Purdy, 8—91; A. Z. Smith, 8—90; H. King, 10—90; B. B. Eagen, 89; F. L. Griffin, 10—84; H. Sumner, 82; J. B. Lake, 71; L. Riehl, 66; L. S. Mellinger, 24—62; Wm. Knoble, 54; E. Emmerick, 87; F. W. Kelly, 82; H. R. Ludlow, 79; J. L. Messick, 78; H. Williams, 77; D. L. Cleveland, 76; G. E. Young, 75; J. A. Johnson, 71; W. Hummon, 67; F. J. Carter, 60; J. C. Riddell, 59; J. Bounds, 51; J. S. Ruppe, 95; J. McKilvey, 94; F. Landwehr, 90; G. Hambright,* 89; W. B. Taft, 78; R. W. Kinzer, 69; W. F. Maupin, 66x75, H. B. Litz 23x25.

Double targets, 12 pairs: Dague 22, E. W. Cooper 21, Johnson 10.

* * *

Orange Whiffs.—A lively pipestem shoot of Los Angeles Gun Club members took place at Venice April 18, when the "20 gauge shotgun championship of Los Angeles" match came off. O. Evans broke 40 out of 50 at 16 yards rise, and won a leg on the trophy. The scores follow:

20-gauge shotgun championship of Los Angeles:

O. Evans, 16 yards, shot at 50, broke 40; S. R. Smith, 17—50—39; W. H. Wilshire, 16—50—38; H. Pfirrmann, 17—50—38; S. A. Bruner, 16—50—38; R. H. Bungay, 18—50—37; P. E. Peterson, 16—50—37; H. A. Hoyt, 16—50—36; F. A. Johnson, 16—50—34; L. M. Packard, 17—50—26; Clement, 16—50—25; B. G. Adams, 16—50—24; McKeigan, 16—50—16.

Practice shoot:

F. H. Nichols, shot at 200, broke 163; F. A. Johnson 200—148, H. T. Brown 125—94, M. T. Tungate 125—85, C. F. Nichols 125—82; C. E. Groat, 100—70; S. C. Miller, 100—68, H. A. Hoyt, 75—60, R. H. Bungay 75—56, T. B. Sloan 75—56, H. P. Densel 75—55, Dr. S. B. Friend 75—53, H. Pfirrmann 50—47, S. A. Bruner 50—44, Mrs. C. E. Groat 50—41, S. R. Smith 50—39, P. E. Peterson 50—38, C. W. Clement 50—35, M. D. Towne 50—31, Mrs. Johnson 50—30, G. B. Adams 50—23, E. H. Kerri 25—23, L. M. Trapp 25—20, Dr. Packard 50—17, A. McKeigan 50—17, F. Teeple, Jr. 25—16, W. H. Wilshire 25—16.

* * *

Southern Sand Dune Notes.—Pastime Gun Club shooters put up some good shooting recently at the San Diego traps. Foster Couts made the corking fine score of 99 out of 100, L. Couts snuffed out 98 and Ed Mitchell trailed after with 97. Nine out of 15 shooters shot 90% or better.

F. Couts propped a leg on the Dodds' trophy, the third event, after shooting off one tie with Ervast and two with Mitchell, finally winning out, 25 to 24. The scores follow:

Birds—					
	25	25	25	25	100
F. Couts	24	25	25	25	99
L. Couts	25	24	25	24	98

May Blossom Smoke—Some exceptionally good shooting, considering the trying conditions which the marksmen had to face, featured the trapshooting tournament at Saratoga a week ago. A bad cross-wind was blowing and the traps installed by Ray Hogg had as mystifying a delivery as Christy Mathewson at his best, coupled with a deceptive change of pace. As a result the shotgun bugs could rarely judge from one shot just where to place the next.

O. N. Ford led in all three events, winning the 150-bird event from J. T. Dodds by a margin of 5 targets. He was tied by Ray Hogg of Saratoga in the 50-bird handicap, while Dr. A. M. Barker was but three breaks behind him in the 24-pair shoot. Dr. Barker's fast pointing and shooting in the doubles attracted considerable interest in the gallery.

A summary of scores follows:

150-bird race—O. N. Ford, San Jose, 141; Mrs. Ada Schilling, San Jose, 131; W. H. Price, San Francisco, 73 (out of 100); J. T. Dodds, San Diego, 136; A. Stadfeldt, San Francisco, 65 (out of 100); Dr. A. M. Barker, San Jose, 131; C. H. Nash, San Jose, 136 Ray Hogg, Saratoga, 126 Clem Arques, San Jose, 110; George H. Anderson, San Jose, 130; J. Ballinger, Campbell, 30 (out of 50); P. Sage, Saratoga, 27 (out of 50).

50-bird handicap—O. N. Ford 50, Ray Hogg 50, Dodd 49, Nash 49, Arques 49, Mrs. Ada Schilling 46, Bollinger 42.

Doubles, 24 pair—O. N. Ford 39, Mrs. Ada Schilling 29, Dr. A. M. Barker 36, Nash 33, Anderson 32, Hogg 28, Dodds 24, Arques 24, Sage 22.

* * *

Tom Marshall Now a Scribe.—Trapshooting is creating more interest and gaining new friends every day. This advance is particularly noticeable in the newspaper field. The more enterprising newspapers have men to cover this sport especially. Just recently Tom A. Marshall was engaged to write articles on this sport for all the Hearst newspapers. Tom's myriads of shooter friends will certainly study his dope and read his reminiscences with great interest.

* * *

Announcement of Removal.—The Remington Arms-Union Metallic Cartridge Company announces that on May 1, 1915, with the purpose of increasing its accommodations, it removed its New York offices to the Woolworth Building, 233 Broadway, 26th floor.

* * *

Pajaro Valley Birds.—The shoot and barbecue of the Rodeo Gun Club at Salinas, May 2, was attended by a large crowd, about 50 participating in the trap arguments. Those present enjoyed a royal outing.

* * *

Registered Tournaments—Pacific States and Territories:

May 5—Utah State Sportsmen's Ass'n Tournament, A. R. Bain, Secretary, Springville, Utah.

May 14—Pueblo Gun Club, F. S. Rainey, President, Pueblo, Colo.

May 18, 19—Washington State Tournament, under the auspices of the Seattle Trap Shooters Ass'n, Hugh Fleming, Secretary, Seattle Wash.

May 26, 27—Delta County Gun Club, Nick Powell and R. A. King, Managers, Hotchkiss, Colo.

May 29, 30—Utah State Tournament, under the auspices of the Utah State Sportsmen's Ass'n, A. R. Bain, Secretary, Salt Lake City.

May 29, 30, 31—San Jose Blue Rock Club, O. N. Ford, Secretary, San Jose.

June 3, 4, 5—Annual Tournament of Rocky Mountain Interstate Sportsmen's Association, under auspices of Mile High Gun Club, Wm. M. Bowman, Secretary, Denver, Colo.

June 7, 8, 9—Sportsmen's Ass'n of the Northwest Tournament, under the auspices of the Portland Gun Club, J. A. Addleman, Secretary, Portland, Ore.

TRADE NOTES.

Winchester Wins.

L. Rayburn, the recent winner of the Oregon State Trapshooters' championship and the representative of the State to the Grand American Handicap at Chicago this summer, started trapshooting three years ago. One year after learning the game he went from his home in La Grande to the Idaho State shoot at Boise and ranked as high man, with 486 out of a possible 500 birds.

Two years ago he ranged as third high amateur at the Seattle shoot, competing against the amateurs of the Coast. In the Pacific Coast Handicap last year he ranged as third high amateur. Three weeks ago Mr. Rayburn was awarded the Imperial Diamond Trophy for making the most wins for a period of six months shooting.

Mr. Rayburn states that he has had his mind made up to win the Oregon State Championship for a year, and when he went to the traps his nerve was as cool as could be. He is expecting to take some honors on his trip East to represent the State shooters. If he has as good a run as he had when he made the 98 out of 100 that gave him the championship, he will without a doubt bring the championship of the United States back to Oregon.

Mr. Rayburn always shoots a Winchester Repeating Shotgun, loaded with Winchester Factory Loaded "Repeater" shells—"the kind the champions use."

At Spokane, Washington, on April 25, Mr. A. W. Woodworth with a model 1912 Winchester Repeating Shotgun and Winchester Factory Loaded "Repeater" shells, won high general average by breaking 98 out of 100.

Peters Points.

At the tournament at Pomeroy, Wash., April 18, Lee Matlock and Jim Spence tied for the gold watch trophy, 91x100; Matlock won in the shoot-off. W. J. Houser and Jones, shooting Peters shells, tied for second prize, 90x100. Houser won, shooting Peters. Jim Spence made the long run of the shoot, using Peters. Gus Peret, the professional, was high over all, with no handicap, breaking 92x100. Each of the gentlemen mentioned above used Peters Loads, the kind with "steel where steel belongs."

High general average at the Newman, Cal., registered shoot, was won by Mr. Harry Ogilvie of Lindsay, Cal., score 382x400. Mr. L. S. Hawxhurst was third professional, 369x400, both using Peters Loads.

At Twin Bridge, Mont., April 11, high amateur average was won by Mr. Otto Schultz, 110x125, and high professional average by Mr. C. L. Flannigan, 120x125, both using Peters "steel where steel belongs" shells.

Rem-UMC Notes.

Berryville, Va., was the scene of an interesting shoot April 8. A. M. Shepherd, Roanoke, and B. B. Browning, Martinsburg, tied for first place. In the shoot-off Shepherd, shooting Nitro Club shells, won with the good score of 10 straight. The Shenandoah team, all shooting Nitro Club shells, won the cup. W. W. Wade was the high gun on the winners team.

Of the 29 enthusiasts who shot at the Philadelphia Shooting Academy on April 4, the three winners, S. H. Crothers and R. G. Fell, both of Philadelphia, and W. H. Kling of Camden, N. J., all used Nitro Club shells. Their scores were 84x100, 83x100, and 82x100, respectively.

THE FARM

MEXICAN FIBER INDISPENSABLE FOR THE COUNTRY'S HARVEST.

A serious calamity recently threatened the agricultural industry because of the disturbance in Yucatan and the announced blockade of the port of Progreso by Gen. Carranza. The harvesting of practically all grains with modern machinery was involved. If the port of Progreso had been closed it would have been impossible to secure the sisal fiber used in the manufacture of binder twine. It was urgent that this fiber be secured immediately and come forward in large quantities by the first of April, otherwise the factories could not have manufactured it in time in sufficient volume for the use of the farmers in harvesting this season's crop. It would have been necessary to harvest by hand, and to have harvested a large part of the grain in this way would have been impossible. The matter was so serious that the President and the Secretary of State, on representations from the Department of Agriculture and the Department of Commerce, took the matter promptly in hand. At the request of the President, Gen. Carranza abandoned the blockade of the port of Progreso.

In normal years about 200,000,000 pounds of binder twine are required for harvesting the grain, corn, and flax crops. From two-thirds to three-fourths of this is made from henequen (sisal) fiber, practically all of which is produced in Yucatan and exported from Progreso. This year the demand for twine is certain to be greater than ever. Last year's wheat crop was the largest the country has ever produced; this year's is expected to be still larger. Nine hundred million bushels is the estimate if normal conditions prevail from now to harvest. It is probable that the production of the other grains, especially of oats, will also be increased, and the other crops, the sorghums and corn, will be at least the equal of normal years.

The disturbances in Mexico have already caused an appreciable shortage in the stock of fiber now in this country. Between January 1 and February 28, 67,489 bales of 350 pounds each were brought in as compared with 156,659 bales in the same period last year and 111,654 in 1913. If further supplies had been permitted to be cut off the lack of twine would have resulted in the loss of a very large portion of the crops in the very year when they are most needed. In commenting upon the situation the Secretary of Agriculture said that the situation was vastly more serious than it was in 1912, when a threatened shortage of twine resulted in a sharp rise in price from 7 to 12 cents a pound. Then it was a matter of price; if Progreso were to be closed, this year it would be a matter of actual scarcity which would result in the waste of a great part of the crops.

SORE SHOULDERS—IT IS ALL IN THE COLLAR.

It is of the utmost importance that the collar fit the horse, and each horse should have his own collar, just as much as each workman on the farm has his own coat. Where colts are to be broken in to spring work this spring, it is good practice to take them to a harnessmaker and have them measured and a collar made especially for them, no other horse to be allowed to wear that collar. As time goes on and the work becomes steadier and harder, the colt will likely lose in flesh, and it will be necessary to adjust the collar in order to keep it fitting snugly, with just room enough at the bottom to insert the fingers between the collar and the neck or windpipe of the horse when he carries his head in the position at which he works. Avoid the use of sweat pads where possible, but when a colt or other horse has failed so much, due to heavy work, that the collar is altogether too large for him, it may become imperative. Some prefer a cloth-faced collar, others a leather-faced. We believe that the leather-faced collar is more easily kept clean than the cloth. Some good farmers claim that it is almost necessary that pads be worn with the leather-faced collar. Never buy a cheap collar. Fifty cents saved at the time of purchase may mean dollars of loss with sore shoulders and lost time when the animal does heavy work. Avoid the short-strawed collars, which are likely to become lumpy and injurious to shoulders of any horse which may be called upon to wear them.

Some recommend soaking the new collar over night in water to make it soft and put it in a condition to take the shape of the horse's neck and shoulders. This we have never found necessary, and most harnessmakers condemn the practice. There is a danger, where collars are soaked, that they go badly out of shape, and may be practically ruined. We would much rather fit the collar well to the horse, and buckle the hames as tightly as possible ,and take a chance on the results. If the collar fits properly and the horse's shoulders get the proper attention as to cleaning, occasional cooling and rubbing off in the fields, and washing off if necessary at night, there should be little trouble with sore shoulders where the horse is not overworked or overheated.—Farmer's Advocate.

RATION FOR A STALLION.

Nothing is better than good oats for the main ration of a stallion, but this should be varied by occasionally feeding corn or barley. Horses, like all other live stock, relish a change, which is conducive to health. Wheat bran is an invaluable adjunct because it is the cheapest, safest and best regulator for the bowels. At the same time it provides in large quantities one of the most important elements of nutrition.

No specific direction as to the amount to give daily can be given. The safest rule is to feed three times daily and with as much regularity as possible. Where a stallion is a considerable time on the road making a steady route it is essential to plan the trip so that he can be fed regularly. The quantity of feed will depend somewhat on the exercise and the drain on his system during the season.

Keep the stallion in good flesh. Never feed more than will be promptly eaten up clean. If any food should be left in the trough it should at once be removed and the next time less given. Feed so as not to overload the horse with fat. In addition to the green corn feed all the sweet hay the horse will clean up. Under no condition give hay that is dusty or moldy.

SPECIAL ACTIVITIES AT THE P.-P. I. E.

Among the special activities provided for in the Prize List of the Department of Live Stock of the Panama-Pacific International Exposition and which serve to characterize its work along educational lines may be mentioned the following:

From June 14 to 19 there will be held a Milk Show which will include all classes of commercial milk and cream received from many different localities, but all drawn from the cow on June 7. The quality, purity, fat content and bacterial count will enter into the judging competition for the prizes offered. Perhaps no better advertising could be secured by any city or other municipality than would be afforded through the winning of a prize in this competition, as this would indicate the high quality in flavor and purity of the milk supply in which every citizen is interested.

There will be a show of meat-producing animals intended to be educational in that it will serve to indicate to the inquiring visitor the type, quality and weight of animals most in demand by our markets.

There will also be a utility show of milk-producing animals, and a special prize will be given to the herd of grade milch cows consisting of four animals which shall most nearly conform to the ideal type and requirements for a utility dairy animal.

TREATMENT FOR CAKED UDDER.

Physic the cow with epsom salts in hot water. Give a tablespoonful of saltpeter night and morning in water. Foment the udder with hot water three times a day, milking at the same time, and at night rub well with a mixture of one part each of liquid extracts of pokeroot and belladonna leaves and turpentine and one ounce of lard or sweet oil.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio

Cussing the Rules of Racing

is a favorite pastime of a good many people in the harness horse game, the fault finders sometimes having a real grievance and sometimes not. I lose more money by adhering to the rules than any trainer on the coast, and

Here is the reason:

You, Mr. Race-Goer, can recall days on certain California tracks when

Durfee Horses

WON EVERY RACE ON THE CARD. But for the rules, you would have seen DURFEE HORSES win first and second in every race; but for the rules you would have seen DURFEE HORSES one-two-three in a few races, and you might have seen DURFEE HORSES win all the money in certain events. I had the goods and

I still have them

but so long as I can race but one to a class, what earthly use can all of them be to me? In other hands they would be dividend paying stock, and I offer you anything I own at a price based fairly on his or her earning capacity. I make no reserve on any horse my personal property—take the one in any class that suits you best and I will race the "leavin's." I will sell any part of a collection of thirty head, every one as represented, including proven race horses good in their class, the best racing prospects on this coast, matinee horses, stallions, brood mares, stake colts that can show, all bred in the purple.

See them at Los Angeles or San Francisco, write me for any desired particulars.

FOR SALE

RACING AND BREEDING MATERIAL

from the establishment of the late

WENDELIN J. MILLER

of Chico, Cal.

The death of Mr. W. J. Miller causes to be put on the market the choice assortment of Broodmares, Youngsters and Race Winners with which he achieved such signal success in recent years, including

JOHN MALCOLM (2) 2:11½
stake winner, world's champion two-year-old pacing gelding (1913), by Dan Logan 2:07½, dam Susie Miller by Prince Ansel (2) 2:20½, etc. Now four years old and can show as much or more than any pacer in California. Prime for this year's races.

CAPITOLA (2) 2:17¾, (3) 2:14½
stake winner, fastest two-year-old pacing filly of 1912, public trial in 2:06½ as three-year-old, by Dan Logan, dam Lulu Mack by Arthur Wilkes, etc. A great race mare for her class.

BONDALEAN (2) 2:20½
winner of second money in two-year-old division, Breeders' Futurity, 1914, and absolutely the best one in sight for this year's three-year-old pacing stakes. Entered and paid up. Trialed in 2:15 last year. By The Bondsman, dam Katalina 2:11¼ by Tom Smith 2:13¼, etc. As great a youngster as the country affords today.

KATALINA 2:11¼
(dam of Bondalean (2) 2:20½) by Tom Smith 2:13¼, dam Kate Lumry 2:20½ (dam of 5 trotters including Baby Doll 2:10¼, Ella Mac 2:11½, etc.) by Shadeland Onward 2:18½. Katalina was a stake winner, a great aged trotter, and her first foal is a fast, standard performer. She breeds regularly and will become more famous as a producer than is her dam.

TWO-YEAR-OLD FILLY
by All Style 2:10, dam Katalina 2:11¼. Staked, paid up. Good prospect.

BAY FILLY, WEANLING
by The Proof (2) 2:29¾, dam Katalina 2:11¼. Nice individual and bred to make a fast mare.

LULU MACK
(dam of Capitola (3) 2:14½), by Arthur Wilkes, sire of Maymack 2:04½, etc., dam Lady Merrill by Tilton Almont, sire of the dam of Monte Carlo 2:07¼, etc. Good breeder and a proven producer.

BAY FILLY
three years old, sister to Capitola (3) 2:14½, never broken.

FIRST NATIONAL
bay colt, two years old, brother to Capitola (3) 2:14½. Staked, paid up. Fine youngster.

John Malcolm and Bondalean are in training at the Woodland Stock Farm, Woodland, Cal., their workout days coming on Wednesdays and Saturdays. You can see them at any time and they show for exactly what they are—two of the best young pacers in the land to race in this and future seasons. Prices and particulars of all kind may be obtained upon application by mail or in person to either of the undersigned.

COPA DE ORO 1:59
WINNING PERFORMANCE

DURFEE'S STALLIONS

CARLOKIN 2:07 1-2
EXHIBITION MILE 2:05 1-4

Champion Pacing Stallion of the West and Sire of a Champion

Reg. No. 52785. Licensed Pure Bred. Cert. No. 1037

Golden Bay. Height 15.3½. Weight 1160.

Sire of CONTENTION B. (2) 2:24¼, (3) 2:08¼, the latter mark a world's record when made, and but one-quarter of a second removed from present record for three-year-old pacing geldings. Public trial (3) 2:07¼. Also sire of

Chango p. (3).....2:12¼ De Ora (3) 2:17
2-yr.-old record 2:13½. 2-yr.-old record 2:27¼.
Trial (3) .....2:09 Gold Lily p. (2)....2:24½

Patrick de Oro p (3)2:22¼, trial (3) 2:08¼, ½-mi. track

Copa de Oro has been retired to the stud for but a very few years and these are from his first foals. Where can you find a stallion whose get have made an equal showing?

COPA DE ORO is the fastest son of Nutwood Wilkes 2:16½ (sire of 8 in 2:10); first dam Atherine 2:16¾ (great brood mare) by Patron 2:14¼, sire of the dams of 7 in 2:10; second dam Athene (dam of 2 trotters, etc.) by Harold 413, sire of Maud S. 2:08¾ and the dams of 5 in 2:10; third dam Minerva (great brood mare) by Pilot Jr. 12, sire of the dams of Maud S. 2:08¾ and 3 others in 2:10, etc. He is one of the handsomest horses in the world, as well as one of the fastest, and is undoubtedly the best bred of all extremely fast pacing sires. From the first I heralded him as the Coast's future great pacing sire, and the performances of his youngsters recorded above certainly show that I had most excellent grounds for that belief.

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred. Cert. No. 1038

Mahogany Bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

Ethel D. (3).....2:11 Helen Belle (2)....2:22½
Johnny Dugan p (3)2:16 Nicola B. (2).....2:23½
John Warwick (2) 2:17 Santiago (3) 2:24¼
The Lark (3).....2:18½ May Marian p (3)..2:24¼
Carl (2) .....2:19¾ Carlrich p (2) 2:24½
Miss Carlokin p ....2:20 El Carbine (2).....2:27½
Carsto (2) .....2:22½ Eileen C. (3) 2:29
Carlschen (2) .....2:23 Carlos (2) 2:29¼
Fulton G. (2).....2:30

CARLOKIN is the best bred son fo McKinney 2:11¼, foremost among the progenitors of 2:10 speed, being out of that sterling producing matron Carlotta Wilkes (dam of Inferlotta 2:04¾, Mary Dillon 2:06¼, Guy Borden 2:07¼, Carlokin 2:07½, and 6 others in 2:30) by Charley Wilkes 3653; second dam Aspasia (dam of 4) by Alcantara 2:23, sire of the dams of 20 in 2:10; third dam Miss Buchanan (dam of 1) by Clark Chief 89, sire of the dams of 2 in 2:10, etc. Carlokin was not only a fast and rugged campaigner, but, point for point, one of the most ideal individuals ever foaled. I chose him from among all the best horses of the country as a prospective great sire, and in 1913-1914 his get won more coast futurities than those of all other sires combined. What more could you ask of them?

FEE: $75 For the Season, Usual Return Privilege

I am especially well equipped for caring for mares at reasonable rates in any way that owners may desire. Every attention will be given mares in my charge, but no responsibility is assumed for accidents or escapes. Further particulars may be had by applying to

W. G. DURFEE, 2019 So. Figueroa St., Los Angeles, Cal.

The only son of Jay McGregor 2:07¼ on the Pacific Coast, and the only stallion in California whose sire and dam both have records faster than 2:10.

Onward McGregor

TROTTING RECORD (3) 2:23¼.
YEARLING TRIAL QUARTER IN :33.

Bay horse, black points. Height 16 hands, weight 1100 lbs. Licensed Non-Standard, Cert. No. 24.

First dam MARY GORDON 2:09¾ by GORDON 3127 (son of Onward 2:25¼); second dam Nell by Young Octoroon, sire of Shadow (dam of 4 and grandam of Peter the Great 2:07¼, J. Malcolm Forbes 2:08, etc.) Will make a limited season of 20 mares at Pleasanton Driving Park at $35 with usual return privilege. Every mare bred to him this year will be nominated in the Breeders and State Fair Futurities for foals of 1916 and first payment made by his owner. Address for all particulars

WORLD'S CHAMPION YEARLING TROTTING STALLION 1910
Unbeaten Two-Year-Old in 1911

Winner of California State Fair and Pacific Coast Breeders' Association Futurities in 1912. Record in Third Heat of a Winning Race.

Also holder of the World's Record of a Five-Heat Race by a 3-yr.-old Stallion

Limited number of approved mares at $100 the season.

WILBUR LOU was bred to seven (7) mares in 1912 and got seven (7) foals; six (6) were trained, on the property of John Christiansen, of San Francisco, which was said to be the fastest yearling on the Pacific Coast.

The five (5) owned by the Hemet Stock Farm showed as follows:

FIESTA LOU, record 2:25, half-mile track, ½ mile—1:08¾
SELMA PALEY, trotted ½ mile 1:13¾; one-eighth— :17¾
GOLDSMITH LOU " ¼ mile :35½
GERTRUDE RIVES " ¼ mile :36¾
BILLIE BOYD " ¼ mile :38

This includes the entire get of WILBUR LOU.

KINNEY de LOPEZ 2:23, Son of KINNEY LOU 2:07¾ and BETSY DIRECT by Direct 2:05½

$50 THE SEASON

KINNEY DE LOPEZ is the sire of DON DE LOPEZ, trial one-half as a yearling 1:13¾, one-eighth 17½ seconds; could have trotted in standard time as a yearling. KINNEY DE LOPEZ is certain to sire early speed.

Terms: Cash at time of service with usual return privilege, or money refunded at our option. Excellent pasturage and best of care taken of mares, but no responsibility assumed for accidents or escapes.

BREED TO THE COAST'S CHAMPION CAMPAIGNER AND FUTURITY SIRE

JIM LOGAN 2:01¾

(3) 2:05½, world's record to 1912 and yet the fastest third heat ever paced by stallion of that age; (5) 2:04¼, (6) 2:03¼, (7) 2:02¾, (8) 2:01¾, race record for Pacific Coast.

Licensed Pure Bred—Cert. No. 1028.

All winning race records. Registry No. 44997.

Sire of MAXINE (3) 2:15 Winner Pacing Division Pacific Breeders Futurity 1914

Trial in 2:09, half in 1:01, quarter in :29 as a three-year-old.

Son of CHARLES DERBY 2:20, brother to Klatawah (3) 2:05½, etc., and sire of TEN in 2:10.

Dam, EFFIE LOGAN, California's greatest producer of extreme speed (dam of Jim Logan 2:01¾, Sir Albert S. 2:03¾, and Dan Logan 2:07½, sire of John Malcolm (2) 2:11½, champion two-year-old of 1913), by Durfee 11256; second dam Ripple, by Prompter 2305, sire of the dam of Gratt 2:02¼, etc.; third dam Grace (dam of Daedalion 2:08½, Creole 2:15 and Eagle 2:19½), by Buccaneer 2656, sire of the dams of 2 in 2:10; fourth dam Mary, great broodmare, by Flaxtail.

JIM LOGAN is not only a horse of most acceptable size and pleasing conformation, but is one of the most rugged campaigners ever raced. After acquiring a world's record as a three-year-old he reduced his record every year raced and is a sound horse today—no more eloquent testimony of his genuine natural qualities could be given. Of his very few living foals, every one trained has shown speed in convincing quantity, and the only one to be raced, Maxine (3) 2:15, began her career as a futurity winner. Could you ask more of a well bred horse than that he be a champion campaigner and transmit his qualities to his get?

In the stud, season of 1915, at Woodland Race Track

FEE: $50 for season, with usual return privilege, or $75 to insure living colt. Fees payable at time of service or before removal of mares. Excellent pasture at $5 per month, with best of care for mares, though no responsibility will be assumed for accidents or escapes. Call at race track, or address

J. ELMO MONTGOMERY, Davis, Cal.

Have You Tried The Improved Grand Grand Circuit Hopple?

No. 471.

THE PROOF 2, 2:29¾

A. T. R. No. 51956 LICENSED PURE BRED CERTIFICATE No. 1029

From the family of Bingen 2:06¼, foremost among present day champions of all ages and gaits.

Son of The Exponent 2:11¾ (by Bingen, dam Iva Dee by Onward 2:25¼), sire of 32 performers including The Temptress 2:08½, 6 three-year-olds, 20 two-year-olds and 1 yearling.

First dam Chord 2:27 (dam of 4) by Wilkes Boy 2:24½, sire of 4 and the dams of 11 in 2:10; second dam Sonata (dam of 3) by Dictator 113, sire of 2 and the dams of 7 in 2:10; third dam Cadenza (dam of 2) by King Rene 1278, sire of the dams of 2 in 2:10; fourth dam Virgie Wilkes (dam of 4) by Geo. Wilkes 2:22, sire of the dams of 16 in 2:10.

In the stud, season of 1915, at Pleasanton Driving Park, at $50 the season with return privilege. We have colts in training to show his qualities as a sire. Grandsons of Bingen are siring champions such as Etawah 2:03½, Anna Bradford (3) 2:00¾, etc. Address for all particulars,

KEEFER & SPENCER, Pleasanton, Cal.

Grandly Bred — A Colt Trotter — A Proven Sire

Bon McKinney 51480

Cal. State License, Pure Bred No. 1213.

Three-year-old record 2:24½; trial (3) 2:15, 1:05.

Sire of

Bon Courage (2) 2:12¾ — **Bon Bell (3) 2:17¾**

Son of BON VOYAGE 2:08 and DAPHNE McKINNEY (dam of Frank N. 2:07¼, etc.), by McKinney 2:11¼; second dam La Moscovita (dam of Bon Guy (3) 2:11¾ and 2 others) by Guy Wilkes 2:15¼; third, fourth and fifth dams also in great brood mare list. Bay horse, in every respect a great individual, with substance, finish, and natural, frictionless trotting action. Very sure foal getter and a steadily rising young sire, his few foals possessing his most excellent qualities to a marked degree. Bon Courage was the only California bred three-year-old to win a heat from Esperanza in 1914.

In the stud, season of 1915, at the Rush & Haile Ranch, Suisun, Cal., season closing August 1st. Fee, $25 with return privilege, payable cash at time of removal of mare. Good pasturage at $2.50 per month. For further particulars address

BEN F. RUSH, Suisun, Cal.

Derbertha Bells

Licensed Pure Bred, Cert. No. 1172.

NO. 60907 A. T. R. RULE 1.

DERBERTHA BELLS, foaled 1911, stands 15.3, weighs 1200 pounds, and is of magnificent conformation, style, trotting action and color; being a solid dark bay or brown with splendid mane and tail, massive well-formed limbs and feet, beautiful neck and head, fine, well set ear and eye as kindly as a fawn's and as courageous as a lion's. His breeding can only be hinted at here as he traces 20 times to Hambletonian 10—5 through Electioneer, 5 through George Wilkes, 4 through Strathmore and 4 through Abdallah 15 (the big four of the sons of Hambletonian), and twice through his daughters. This breeding is perfectly balanced by 18 crosses to Mamb. Chief 11—5 of these through his greatest son Mamb. Patchen 58 (leading progenitor of the dams of trotting sires), backed up by 2 crosses to Pilot Jr. 12, 4 to Black Hawk 5, 4 to Imp. Trustee and crosses to such other famous broodmare sires as American Star, The Moor, A. W. Richmond, Williamson's Belmont, etc.

I challenge any man to name a stallion with a broodmare inheritance approaching that of Derbertha Bells,—5 crosses to Green Mountain Maid (dam of 9 and Electioneer), 3 to Alma Mater (dam of 8 and 7 sires, including Alcyone and Alcantara), and 1 each to Miss Russell (dam of 7, including Maud S. 2:08¾ and 6 sires, including Nutwood), Dolly (dam of 4 and 5 sires, including Director, Onward and Thorndale), Beautiful Bells (dam of 11, including 4 world's champions and 10 sires) and Minnehaha (dam of 8 and 6 sires). These are pre-eminently the greatest mares of history in point of number of descendants in the standard list, besides 2 crosses to Bertha, the only mare with 2 in 2:04½, 5 in 2:10 and 13 in the list. Counting duplicates this pedigree contains the blood of 20 mares with an average of 9 performers each, and of the 14 mares appearing in the pedigree of two or more 2:10 trotters in 1910 this pedigree contains 8.

His disposition and deportment are in perfect harmony with his superlative breeding and conformation, all that could be desired. I own a yearling filly by him that stamps him as a sire of the first rank, and I invite the most critical inspection both of him and his get. He will be allowed a few choice mares at $25.00 the season with usual return privilege. Tabulated pedigree upon request.

J. W. PENDLETON, Owner,
1601 Seminary Ave., OAKLAND, CAL.

Peter The Great

Is the world's foremost progenitor of extreme speed; sire of 30 in 2:10, etc.

HIS SON

PETER McKLYO 3, 2:12 1-2

Cal. State License Pure Bred 2339

will make the season of 1915 in the training stable of James Thompson at the San Jose Driving Park beginning March 15 and ending July 1.

PETER McKLYO (3) 2:12½, the only California-owned son of Peter the Great of an age permitting stud duty, is out of a great-bred young matron by Jay McGregor 2:07¼—Klyo (2) 2:29½; second dam Miss Spears 2:21¾ (dam of 6 including Shakespeare (3) 2:09¾); third dam Medium's Last (dam of 7 including Trampfast (2) 2:14¼); fourth dam Suzanne (dam of 1 and grandam of 10 including Susie J. 2:06½).

This colt is four years old, having obtained his record last season with a very limited amount of work. He came into my hands perfectly green in February, 1914, and developed speed so fast that I had to take his shoes off and jog him for two months barefooted. Being by Peter the Great, the sire of the century, and, as you will notice, out of a daughter of Jay McGregor, another wonderful family of horses, he is one of the best bred young horses in the world and I can truthfully say he is one of the very best individuals that I ever had the pleasure of looking at. He can trot a quarter in 30 seconds, and I am firmly of the opinion that he will trot a mile this fall in 2:06 or better.

Fee, $75 the season with return privilege. Mares pastured at usual rates and accorded best of care, but no responsibility assumed for accidents or escapes. Service fee and pasture bills must be paid before removal of mares. Address for all particulars

L. H. TODHUNTER, Owner, Sacramento, Cal.

JAMES THOMPSON, San Jose Driving Park, San Jose, Cal.

EXPRESSIVE MAC 2:25 1-2

A. T. R. No. 41513 — Licensed Pure Bred, Cert. No. 1041.

Clara Mac 2:04½ — Sire of — **Vera Hal 2:05**

Only stallion in California to sire a new 2:05 performer in 1914, and one of three stallions in U. S. to sire two new ones in 2:05 that season.

Also sire of Madam Mac (4) 2:10¼, trial 2:07; Eddy Mac (3) 2:29½, trial 2:13; Nellie Mac, trial 2:18 trotting, good for 2:10 this year, and numerous others with fast trials. In four show classes at Fresno his colts won three firsts, one second.

Son of McKINNEY 2:11¼ and the great brood mare EXPRESSIVE 2:12½ by ELECTIONEER 125. Ideal in color, size and conformation—seal brown, height 16½ hands, weight 1275 pounds. Permanently in the stud at my ranch three miles south of Selma, at $25 the season, usual return privilege, or $35 to insure. Good pasture for mares at $2 per month and best of care given. No responsibility assumed for accidents or escapes. Address for all particulars

J. H. NELSON, Selma, Cal.

WOODLAND STOCK FARM

INCORPORATED

Offers for Service for the Season of 1915

PRINCE ANSEL

CERT. 1062

2, 2:20½ A. T. R. 29220

Sire of

Prince Lot 2:07¾
Joseph Ansel (3) 2:12¾
Lottie Ansel (2) 2:14¼
Laura Rogers 2:11¼
Adansel (3) 2:14½
Arista Ansel (2) 2:18¼, etc.
And the dams of
John Malcolm (2) 2:11½, etc.

PRINCE ANSEL is not only doing more than any other individual to perpetuate the fame of the great family of Dexter Prince, but he has few rivals in the land as a progenitor of futurity winning youngsters, as attested by the summaries of coast classics year by year. None more highly esteemed by horsemen in general. Fee, $50 with usual return privilege.

ROBERT BINGEN

CERT. 1061

2:11¼ A. T. R. 45033

Best Bred Son of

BINGEN 2:06 1-4

Sire of Uhlan 1:58; 14 in 2:10
First dam Episode 2:18 half sister to Peter the Great 2:07¾
Second dam Santos, dam of Peter the Great 2:07¾, J. Malcolm Forbes 2:08, etc.

ROBERT BINGEN, in every way one of the most desirable horses ever offered for service in California, represents the families whose blood is most eagerly sought by successful breeders today—Bingen and Peter the Great. He is the only son of Bingen standing for service in California and his book is rapidly filling. Fee, $75 by the season.

True Kinney 2:12¼

The best young McKinney stallion in California—a colt trotter and a coming sire. His first foals are among the best on the farm and show for themselves. Terms on application—season limited.

ALL STALLIONS LICENSED PURE BRED

JOHN W. CONSIDINE, PRESIDENT

Mares sent to these stallions will be cared for at $5.00 per month on pasture; $10.00 per month in box stalls. Colts entered in all the Futurities, Brood Mares, Racing Prospects and Saddle Horses for sale at all times. Correspondence solicited, visitors cordially welcomed. Address **HARRY DOWLING, Supt., Woodland, Cal.**

Care and Training of Trotters and Pacers....

Price $1.00 — Second Edition Revised and Enlarged.

The first book on its subject printed in over 20 yrs. Previous works belong to the high wheel sulky era.

THIS book enables anyone to do his own care-taking and training until it is time to send the colt to a professional trainer. It explains why promising speed prospects should be handled professionally after a certain period. It covers the intricate details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented; nothing is left to guess work. The entire field is covered in lucid language. The instructions are concise and easily understood. Every man who owns a trotting or pacing colt should read this book. The work contains 160 pages, is handsomely bound in cloth, is clearly printed, is handsomely illustrated and contains no advertisements—it is not a catch penny publication that looks big in the advertisement and is disappointing when received. The work is as modern as a 42-centimeter gun. Both theoretical and practical views are outlined and compared. The book incorporates the views of such authorities as Thomas W. Murphy, Walter R. Cox, Ed Geers and others. Many professional trainers have purchased the book and have found it interesting. Despite the war over 300 copies have been sold in Europe and Australia. The titles of the chapters are: The suckling colt; The weanling colt; Making speed with yearlings; Preparing for the two-year-old futurities; Three-year-olds; Six principal defects in gait, shoeing colts; Shoeing of 101 famous colts of the past four years; Types of shoes illustrated; and Miscellany. This last chapter is full of many useful and valuable hints, too numerous to mention here, such as why horses should have water before hay, and hay before grain. Send us your dollar now. This book contains hints you can make use of at once. If you forget you may regret

MODERN BREAKING

By W. A. BRUETTE

A revised edition of the latest Treatise on the Training of Setters and Pointers.

Price: Paper $1.00, Cloth $1.50. Sent Postpaid

THIS book enables anyone to do his own training and fully explains the methods employed by the most successful trainers in developing the setter and pointer. The important lessons are illustrated by photographs from life; nothing is left to guesswork. The entire subject is covered, from the selection, raising and development of puppies to the conditioning of dogs and their handling in the field. The amateur is told, in lucid language, how to make a dog a high-headed, stylish worker, stanch on his points, steady to shot and wing, and a prompt, tender retriever; all of this is accomplished by simple methods, some of them never before given to the public. The instructions for correcting the faults of bird dogs and keeping them up to their training are concise and easily understood. Every man who owns a bird dog or shoots in the field should read this book.

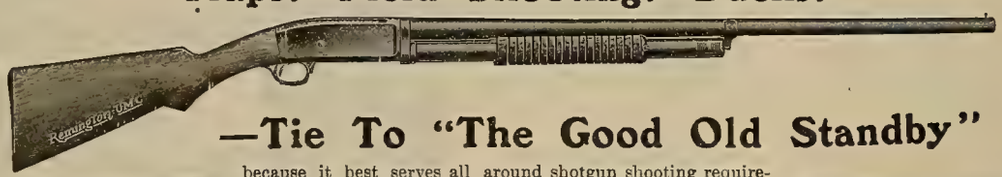
WINCHESTER

"LEADER" AND "REPEATER" FACTORY LOADED SHELLS



Shells may come and shells may go, but Winchester "Leader" and "Repeater" shells go on forever. This is because there's a steady demand for them. This steady demand has its basis in the shells themselves. In other words, "they satisfy." That's all there is to it, except their wide distribution, which has come about for the same reason, that is, "they satisfy." It's worth repeating. It's always safest to buy standard goods, like Winchester "Leader" and "Repeater" shells, and their large sale proves the majority of shooters do this. If you are not doing it, this thought is worth pondering over. Dealers everywhere sell Winchester shells.

WINCHESTER SHELLS ARE OF PROVEN WORTH AND STABILITY

What Do You Use A Shotgun For?

Traps? Field Shooting? Ducks?

REMINGTON UMC

REMINGTON UMC

—Tie To "The Good Old Standby"

because it best serves all around shotgun shooting requirements in this country, no gun is more popular with American sportsmen than this highly perfected Remington model.

This general popularity, proven over and over again every day in every community could only result from real merit.

You will find in the Remington Pump the beauty of line and finish and finely adjusted balance that delight sportsmen. Then, too, you will find that you can load it—even as a single-loader almost unconsciously, and the ease of action will be a pleasant surprise to you.

You will appreciate these other big Remington-UMC features—Solid Breech—Hammerless—Bottom Ejection—Take Down—all told about in a Pump Gun booklet which is yours for the asking.

THE CALIFORNIA STATE FAIR GAITED SADDLE HORSE FUTURITY No. 2.

FOR FOALS OF 1915. **OPEN TO THE WORLD**

ENTRIES TO CLOSE JUNE 1st, 1915

The produce of any mare bred in 1914 to a stallion registered in either the American or Pacific Coast Gaited Saddle Horse Association.
To be given under the direction of the California State Agricultural Society and to be shown as weanlings, yearlings, two-year-olds and three-year-olds.

ENTRANCE and PAYMENTS:

MARES.—Mares to be nominated by June 1, 1915, when a payment of $2 must be made. Each mare's name, color and the name of the horse to which she was bred in 1914 must accompany the entry fee.
On July 1, 1915, the color and sex of the foal to be given and an additional payment of $3 must be made.
On February 1, 1916, a payment of $10 will be due on yearlings.
On February 1, 1917, a payment of $15 will be due on two-year-olds.
On February 1, 1918, a payment of $25 will be due on three-year-olds.

CONDITIONS:

ENTRIES TO CLOSE JUNE 1st, 1915.

Every foal of 1915 produced by a mare nominated herein is eligible to compete in all four classes of this stake by its owner making payments as herein provided in the division in which it is entered. Winners will not be barred.

All nominations and payments must be made to the Secretary of the California State Agricultural Society, at his office in Sacramento.

Nominators must designate when making starting or show payments whether the horse is five or three gaited.

STARTING AND SHOW PAYMENTS

On the first day of August each year the following payments will be due:

	Five-gaited	Three-gaited
On weanlings, to be shown in 1915	$10.00	$ 5.00
On yearlings, to be shown in 1916	15.00	10.00
On two-year-olds, to be shown in 1917	25.00	10 00
On three-year-olds, to be shown in 1918	40.00	15.00

CLASSIFICATION and DIVISION of MONEY AS FOLLOWS:

Stallion, mare or gelding	Five-gaited	Three-gaited	To sire of first money winner in each division	To dam of first money winner in each division
Weanlings, 1915	$ 300.00	$200.00	$10.00	$10.00
Yearlings, 1916	500 00	300.00	15.00	15.00
Two-year-olds, 1917	800.00	500.00	25.00	25.00
Three-year-olds, 1918	1200.00	800.00	50.00	50.00

The amount contested for shall be divided into six moneys as follows:

To the winner	35 per cent
To the second colt	20 per cent
To the third colt	15 per cent
To the fourth colt	12½ per cent
To the fifth colt	10 per cent
To the sixth colt	7½ per cent

MANNER OF SHOWING:—Weanlings, yearlings and two-year-olds shall be shown to halter and three-year-olds under saddle.

The right is reserved to declare the stake off prior to August 1st, 1915, if same does not fill satisfactorily upon the refunding of all entries received.
In case a mare fails to produce a colt, produces a dead coalt or foals twins, or her colt dies, the right to substitute by the owner another colt from a mare bred to a registered stallion is reserved on or before January 1st, 1916.
In case a nominated colt is dropped out, and later his owner desires to re-enter same, this may be done upon a payment of all sums which should have been paid had the entry been kept good and $25 additional
The Board of Directors of the California State Agricultural Society reserves the right to interpret and determine all questions affecting this stake.

JOHN M. PERRY, President. **CHAS. W. PAINE, Secretary, Sacramento, Cal.**

Held Out Because of a Ruptured Tendon

THOUSANDS of races have been won by inferior horses simply because the horses that rightfully should have won were held out because of ruptured or sprained tendons. There's many a horse today pulling delivery wagons, suffering with limb diseases, whose place should be on the race track winning big purses for their owners. And they would be, if their owners would only give them proper treatment with

The Only Spavin Remedy in the

Mack's SPAVIN #1000 REMEDY

World Sold Under a $1000 Bond

There are no limb diseases known among horses that cannot be cured with this powerful, penetrating remedy. It goes right to the seat of the trouble and will absolutely cure Ringbone, Thoroughpin, Curb, Capped Hock, Shoe Boil, Sprung Knee, Ruptured Tendons, Sweeny, etc., quickly and without scars or blemishes. No matter how long the horse has been lame—from what cause—or what you have tried—we'll guarantee that Mack's $1000 Spavin Remedy will cure him permanently. If it fails, we will refund every cent you pay us.

You Can't Lose

We have a special deposit with the First National Bank of Binghamton, N. Y., of $1000 which we must forfeit if we do not do exactly as we say. You take absolutely no chances. Send for a copy of the bond. Read it.

Your Druggist Will Obtain Mack's $1000 Spavin Remedy for You

If you ask him. Price $5.00 a bottle. If he refuses, remit $5.00 to us and we will see that your order is filled without delay.

Our Expert Graduate Veterinarian

Is maintained for your benefit. He is a lame specialist, and will advise you how to treat your horse (no matter what ails it) to get it cured at the least possible cost. If you will mail the Free Diagnosis Coupon.

McKALLOR DRUG CO., Binghamton, N. Y.

On picture of horse mark with an X just where swelling or lameness occurs, then cut out picture and mail to us with a letter, telling what caused the lameness, how long it has been lame, if it affects the action and speed of horse, etc. We will then tell you what the horse needs and how to have it quickly. **Absolutely no charge.** Write today.

Free Book—"Horse Sense No. 2"

Send us the Free Diagnosis Coupon, get Free Book—"Horse Sense." Describes and illustrates diseases of horses, tells symptoms and treatment for every part of horse, and tells valuable facts about horses you want to know.

Cussing the Rules of Racing

is a favorite pastime of a good many people in the harness horse game, the fault finders sometimes having a real grievance and sometimes not. I lose more money by adhering to the rules than any trainer on the coast, and

Here is the reason:

You, Mr. Race-Goer, can recall days on certain California tracks when

Durfee Horses

WON EVERY RACE ON THE CARD. But for the rules, you would have seen DURFEE HORSES win first and second in every race; but for the rules you would have seen DURFEE HORSES one-two-three in a few races, and you might have seen DURFEE HORSES win all the money in certain events. I had the goods and

I still have them

but so long as I can race but one to a class, what earthly use can all of them be to me? In other hands they would be dividend paying stock, and I offer you anything I own at a price based fairly on his or her earning capacity. I make no reserve on any horse my personal property—take the one in any class that suits you best and I will race the "leavin's." I will sell any part of a collection of thirty head, every one as represented, including proven race horses good in their class, the best racing prospects on this coast, matinee horses, stallions, brood mares, stake colts that can show, all bred in the purple.

See them at Los Angeles or San Francisco, write me for any desired particulars.

Sweet Marie 2:02, Bob Smith's old homestake trotter, has foaled a bay colt to the cover of Bonington (4) 2:06½ down at Hillanddale Farm, New York.

◈◈◈

Please note a change of dates in the North Pacific Circuit—make it September 13 for Walla Walla and September 20 for the Washington State Fair at North Yakima.

◈◈◈

Columbus has had a relapse—the Hoster Columbus stake remains for 2:14 trotters and Hotel Hartman stake for 2:13 pacers. The faster classes are accommodated, however.

◈◈◈

W. E. Foster, formerly of Victoria, B. C., is now located at Marysville and the northwestern reports label him as a "good scout," personally, and a right good trainer, technically.

◈◈◈

The Petaluma Driving Club opens the season tomorrow with a matinee at which some nice rewards are in store for the winners, and a good crowd and a fine afternoon's sport are expected.

◈◈◈

F. W. Ready and Dr. Fred Bonine of Niles, Mich., have purchased of Stoughton Fletcher of Indianapolis the pacer King Couchman 2:02¾, last year's leading money winner among the sidewheelers. He will remain in Dick McMahon's stable.

◈◈◈

Walter Cox was defeated in his first race of the season. At Dover, N. H., April 22, Guy Hurst, driven by Arthur Morrison, defeated Benara, driven by Mr. Cox. The race took place on Fast Day, but evidently Walter's mount wasn't fast enough.—Horseman.

◈◈◈

The Chicago sale, with a number of California horses among the consignments, was held this week, beginning Tuesday afternoon. The Californians were among the last horses to be sold and we have no report on prices prior to the closing of our forms.

◈◈◈

"Stake Horse," care of this office, wants a starter for the 2:10 trot at the June meeting at the exposition, having decided that his own candidate, one of the original entries, will not "do." Someone with a real good trotter can make some money.

◈◈◈

The former California trotter Kid Wilkes 2:09¼ by Stanton Wilkes 2:10¼, out of the running bred mare Romeria by Balboa, has found a home clear across the continent from his birthplace, being at present a member of the Kingsley stable at Combination Park, Medford, Mass.

◈◈◈

J. E. ("Farmer") Strain of Marysville, who bred and raced the fast pacer Maurice S. 2:06, has another good King S. pacer that he is educating at the Marysville track, the seven-year-old mare Lucia S. She has as much, or more, speed as the other pacer of the same line, as she showed miles last year over the home course in 2:08½.

◈◈◈

Tom Gahagan, one of the best known of the trotting turf correspondents, arrived in the city Wednesday evening and will remain in this vicinity until after the June meeting, covering the local situation in the interest of a couple of the eastern horse journals and a number of dailies En route he spent a few days at Los Angeles, and reports the balance of the winter colony remaining there as progressing famously.

Dr. Burns Jr., according to recent reports from Los Angeles, has broken down entirely—two legs on the bum, acts bad, don't eat good, hits his knees, his back has gone down on him and they have even trimmed out his tail to keep it from toppling him over backwards while he is weak. Sunday—last Sunday—2:08, then 2:07⅛, then 2:05½, with the last half of the latter mile in 1:01! Looks like they might get him ready yet.

◈◈◈

Adverse weather conditions and the resultant shortage of work for the horses in training caused the postponement of the meeting at Woodland scheduled for today, and the opening matinee of the San Francisco-California Driving Club which was to have taken place tomorrow. The Woodland folks will pull off their races next Saturday, and the fun drivers will open their season the following day at the P.-P. I. E. track.

◈◈◈

Fred Ward decided that the company at the exposition meeting would be a little warm for him, and shipped out from Los Angeles the middle of the week for West Liberty, Iowa, to prepare to join in the fun down the Cedar Valley Circuit with the other Californians who shipped there some weeks ago. Fred's stable ought to grab a bit of coin down there in the central west as he took down four good ones—Dr. Wayo 2:12¼, Great Northern 2:12½, El Bel Maden (3) 2:25½, and the big Zolock pacer McVerde. Here's luck!

◈◈◈

Accounts from Lexington continue to be highly complimentary to the Prince Ansel yearlings in Hunter Moody's stable, all of which have gone quarters in :40 or better. Anselot, the brother to Prince Lot and Lottie Ansel, has manipulated that distance in :38, while Anselila, the Ila Moko filly that was so pleasing in Walter Maben's hands, has trotted a quarter in :35½, losing a shoe in the course of the performance but going on as serenely as ever. This is about the fastest quarter ever traveled at Lexington by a yearling at this season, and the lass is hailed as a coming champ.

◈◈◈

Dr. Samuel F. Spohn, who in his home town of Goshen, Indiana, answers "present" whenever anyone sends in a call for "his honor, the mayor," was among the visitors in the city this week, making the trip to the exposition as the climax of an enjoyable sojourn of several weeks' duration in the Golden State. Some years ago Dr. Spohn and the elder Joseph H. Lesh put Goshen on the map as the home of the old reliable "Spohn's Compound" and Online 2:04, a pair that made good in the very best way. Dr. Spohn departed for the east the latter part of this week, well pleased both with California and her expositions.

◈◈◈

The owner of the Knight of Strathmore, which we take to be a running horse, has but one rule to win in a race: "I do not give a damn," he says, "whether my horse starts with the bunch or sticks with the bunch when it starts. I instruct my driver to do one thing, and that is to put the Knight's nose under the wire first—to come in ahead at the home stretch."—Field and Farm. [Field and Farm can take Knight of Strathmore to be a runner if it so desires, or perhaps there is one of that name, but the "rule" set forth herewith "sounds to us" a whole lot like it might be a portion of the racing philosophy of George Bleiler of Monroe, Wisconsin. At any rate Sam Hawley did a fair job of obeying just such a rule behind Knight of Strathmore 2:03¾ last season, profiting thereby to the extent of about six thousand bucks.]

$9,000 AT DENVER.

Western horsemen will hear with pleasure that Denver announces a three-day meeting at Overland Park on June 30, July 1 and 2, a total of nine thousand dollars being hung up for the three days' sport. For trotters the classes are 2:05, 2:12 and 2:20 for purses of $2,000, $1,500 and $1,000 respectively, and the sidewheelers have $1,500 for the free-for-allers, $2,000 for the 2:07 class, and $1,000 for those eligible to the 2:20 class. Entrance fee is only three per cent and Secretary Talbott has been most generous in allowing double entry on a single payment save in cases where both horses start, or a horse starts in two races. Entries close June first, and horsemen eastward bound will find it convenient and profitable to make entry and "drop off" there en route. Full conditions appear elsewhere in this journal, and entry blanks may be secured from this office.

"RINGING THE BELL."

At last, the secret "is loose," as Kolb and Dill would say. All is explained.

From no less authoritative a source than a bulletin issued by the University of California the great light breaks.

In announcing a course in journalism, the bulletin sets forth in detail what will comprise the work. After promising the students the privilege of gathering and writing campus news, publishing a four-page paper and doing other odd jobs, the announcement continues:

"Arrangement has been made whereby students may do part of the laboratory assignment in publicity work for the Panama-Pacific Exposition."

So that's how it is!—Chronicle.

THE FAMILY OF EXPRESSIVE (3) 2:12½.

Of the older generation of living brood mares who have founded a family of their own, there are but few, if any, who can safely lay claim to higher rank than the famous matron of California lineage, Expressive (3) 2:12½, now the property of Hillanddale Farm, Mamaroneck, New York, for she has fulfilled all these requirements of greatness—a trotter in her own right, the dam of trotters, the dam of speed-siring sons and the dam of speed producing daughters.

Expressive, bred at Palo Alto and foaled there almost a quarter of a century ago, had for a foundation for her greatness these two prime requisites, a good sire and a good dam, she being a daughter of Electioneer and the famous thoroughbred mare Esther by Express. Four trotters own Esther as their dam, two of her sons became sires, and seven daughters gave birth to eighteen standard performers, but one a pacer, and three of them trotters in the 2:10 list.

Expressive's education was taken in the Hickok school for trotters, and in 1893 she made her first trip across the mountains, making five starts that season and always being in the money, racing in a number of events against the other speedy California lass in Monroe Salisbury's stable, Director's Flower (2) 2:20. In 1894 Hickok again took her east and in eighteen starts, from Denver to New York, she was but once unplaced and ten times winner. In the races she failed to win she was generally a heat-winning contender, and secured her record at Terre Haute in a class race against aged trotters. It was a wonderful campaign for a three-year-old filly, and it is an eloquent testimonial to her staying qualities and recuperative powers to note that in three instances in which she made two starts in one week and was defeated in the first one, she "came back" by trouncing practically the same field, or at least a number of the same starters, in faster time later in the week.

Retired to the brood mare ranks at Palo Alto she bore her first foal in 1897, the brown horse Exioneer by Boodle, who was to become in time a speed sire. Her next foal to live came three years later to the cover of McKinney and was later to become known to fame as Expressive Mac, trotter and speed sire, originally christened Alta Vista, the subsequent change becoming necessary for registration purposes, Alta Vista having been claimed some years previously for the Kentucky-bred son of Guy Wilkes and Amaryllis by Director. Before leaving the Golden Slope she produced also to the cover of Monbells 2:20¾ the trotter Esther Bells 2:08¼, as well as Excella, the dam of the two trotting mares now owned by Messrs. Adolph Ottinger and George J. Giannini of this city, Agnes Carter (2) 2:20 and Ella M. R. (2) 2:16¾, while from a mating with Nutwood Wilkes 2:16½ she gave birth to the double producer Beautiful Bird (dam of Alto Express 2:22¼ and Beautiful Morn 2:25), at present one of the most prized possessions of H. S. Hogoboom of Woodland, whose futurity winner Little Express (2) 2:20, is of the generation farthest removed from the matron who heads the line.

Purchased by Hillanddale Farm and mated with Bellini 2:13½ she has given further proof of her prolificacy by giving birth to four trotters, Elsa Bellini 2:25¾, John Bellini (3) 2:28¾, Evan Bellini (3) 2:30, and the great colt trotter and rising young speed sire Atlantic Express (3) 2:08¼, sire of three two-year-olds in standard time.

The greatest agent for the perpetuation of the family name remaining in California (though much may be expected in the future from other sources left to us in the younger mares mentioned above) is the stallion Expressive Mac 2:25½, permanently established in service at the ranch of J. H. Nelson near Selma, and rapidly rising in spite of the limitations of environment and the low ebb of the breeding industry, to a point of more than local prominence. No foal by him from a standard bred mare has as yet been trained for speed, yet he was the only stallion in California to sire a new 2:05 performer in 1914, and one of three in the United States to sire two new ones in such select company, the others being Newtown Boy 2:10¼ and Walter Direct 2:05¾, both of whom have had more opportunities in the stud than have fallen to the lot of the California horse. Madam Mac (4) 2:10¼ is "knocking at the door" with a trial in 2:07, and others are showing extremely well in their work. Vera Hal 2:05 forced Teddy Bear to race in 1:01¼ to beat her at Dixon, and Clara Mac 2:04½ is training like a two-minute performer, and in the light of the conditions set forth herein it is not a matter of wonderment that Expressive Mac has proven one of the best patronized horses of the year.

NORTH PACIFIC FAIR ASSOCIATION.

Coast horsemen should not overlook the fact that their "one best bet" for the time intervening between the exposition meetings is the circuit arranged by the North Pacific Fair Association, which provides racing for seven consecutive weeks, beginning August 13 at Vancouver, B. C., and closing October 2 and Salem. June first is the date for the closing of entries to the major stakes, and a card to John W. Pace, Circuit Secretary, Mutual Life Building, Seattle, will bring you the stake book with all information.

Arrivals at the Exposition

George Nugent of Phoenix, Arizona, who wintered at Riverside with the trotters Doctor D. C. 2:14¼ and Princess Louise 2:12¾, both owned by Mrs. E. D. Welsh of Phoenix, arrived in the city Friday with his horses, which are quartered in Barn Six at the exposition. Doctor D. C., entered in the 2:18 and 2:14 trotting classes, is a bay gelding by Del Coronado 2:09½, dam by Woolwich, that made his first appearance last season, racing in Texas and the northern states lying west of the river. He made a dozen starts during the season, being four times outside the money, three times fourth, twice third, once second and twice first, getting a winrace record of 2:18¼ in his first race at Phoenix and winning one heat from Ellen May in his last start in 2:14¼. He is a rugged made fellow and has worked right around 2:16 over the half mile track at Riverside during his training and was second to Loe Blossom at Phoenix in 2:11¼.

Princess Louise is a lass with a longer racing history, as she was the first of the get of Del Coronado 2:09½ to achieve a standard record. Ten years is a long time for a trotter to stay in the game, but it will be ten years this July since the Princess won the three-year-old trot at Los Angeles and took the record of 2:19. She started again the same season but with less fortune, being distanced in the fourth heat of the Occident stake by North Star and Bellmont, after having won the first heat in 2:20. Until 1913 she was raced but three times, once each in 1906, 1910 and 1912, being outside the cash division in the first and last but trotting a very nice race in 1910 at Phoenix, being third to Helen Stiles and Fair Maid in 2:11¾, 2:10¾, 2:09½.

In 1913 she made a campaign of sufficient length to bring up her average, making twenty-three starts from Arizona to Ohio, being once fourth, three times third, four times second and nine times first. She secured a record of 2:16¼ in the second heat of a losing race with Axtien 2:11¼, and at Kahoka, Mo., won a couple of races on successive days. In 1914 she was raced over the same circuit as Doctor D. C., twice outside the money in sixteen starts, taking her present record of 2:12¾ in a time performance at Phoenix. On March 17 of this year she startled folks considerably by trotting in a matinee at Riverside in 2:10¾, 2:15½ against Ulo Tolus, and looms as an almost sure new 2:10 performer for her sire. Both George's trotters look sure for the 2:10 list, for that matter.

J. W. Swank of Payette, Idaho, came in Saturday evening with his entry for the 2:25 and 2:20 pace, having wintered at his home and given his side-wheeler a pretty fair prep in spite of the fact that he comes from a section where early training would be considered an impossibility by trainers accustomed to more favored climes. Swank's pacer is a racy looking six-year-old chestnut mare, Marie Fitzsimmons, by the northwestern speed progenitor Bob Fitzsimmons 2:07¾, sire of Ovieda 2:05, etc., and her dam is Sulphura by Volcano 10029, grandam Ethel by Forest Golddust 2704. Both Ovieda and Marie Fitzsimmons were bred at the Fleming establishment near Helena, Montana. Mr. Swank is stabled in Number Five.

The bulk of the Los Angeles colony pulled up stakes last Saturday and headed for the big show, Alonzo McDonald with his Grand Circuit campaigners and California's own Wm. G. Durfee with the crack youngsters that have fattened his bank account during the last few seasons, as well as a number of others of the same brand. After some weeks of the bum speed-making weather that has blessed(?) the coast of late they were tickled to death to unload in a little more of the same, as it seems that the weather man is holding a grudge against California and her expositions. Owing to their arrival on Sunday they were not able to unload until the following morning, but with one or two exceptions the horses weathered the ship very well. The two strings are quartered in the center rows of barn six and are attracting a good many visitors, as it has seldom been granted to coast horse lovers to view the two leading stables of 2:10 trotters of any season side by side. Notwithstanding the sharp contest staged last year by Messrs. McDonald and Durfee for the 2:10 championship, the latter eventually winning out by a majority of one performer, there have been no riot calls from the barn and everything is serene as can be. Both gentlemen, however, have both eyes peeled full on the money in the big stakes and many of the class races at the June meeting and last year's rivalry will be continued with a vim from the tap of the bell for the 2:30 trot to the last heat of the 2:06 pace on getaway day.

As per usual, Ed Avery is in direct charge of the McDonald stable, and has them in top notch condition for their engagements here and farther on down the big line, as they are staked through the Grand Circuit and are due for an early trip back across the mountains. Star Winter 2:05 is one horse that managed to live up to his title, as he has been on of the stars of the big line for the past two seasons, annexing over seventeen thousand dollars in that time. He is the lad that forced Etawah to trot the first head of the 2:08 trot at Lexington last fall in 2:03½ and is the only trotter in the string that has beaten 2:10 in his work this season, having had a mile in 2:09 before leaving Angeltown. He is a bay gelding, eight years old, by Ed Winter 2:12¾ (sire of Allen Winter 2:06½, winner of the derby at Readville, etc.) out of Elsie B. E. 2:29¼ by Conquest Star 2:23, grandam Starlina (dam also of the trotter and speed sire Albingen 2:18) by Alcantara 2:23. He gets but one start at the exposition—in the free-for-all trot, for which entries do not close until June first.

McCloskey, whose work in 2:10½ is the second fastest mile credited to the stable's trotters, is an example of the kindly dispensations of the no-record rule, as he has a tag of 2:06¼, won over ten thousand dollars in 1914, has won heats in races in time below 2:10 on two occasions and only a quarter-second removed from it on another (in the Charter Oak) and is still a 2:30 trotter so far as classification is concerned. He was a contender in last year's M. & M. and will carry the stable's confidence at the exposition in the 2:30 and 2:14 trotting classes. He has the white nose and underlip that form the "Indian sign" of a tough horse, and his underpinning recalls the old "nursery rhyme" of the horseman—

"One white leg respect him,
Two white legs inspect him,
Three white legs doubt him,
Four, do without him,"

but there is another old saw that "it is the exception that proves the rule," or words to that effect, and this lad must be the exception. He is by Theodosius 2:18½, sire also of Lottie L. 2:09¼ and Theon 2:09¼, out of Maggie C. (dam of two) by Odd Socks 2:20½, grandam Astroth (dam of Hattie C. 2:10) by Aparka 2:27. The names of the two sires last mentioned do not "fall familiarly" on Californians' ears and to relieve curiosity we will say that Odd Socks, gelded early in life, was by Almomedo 7219, a son of Happy Medium and Ella B. by Almont 33, while Aparka was by Onward 2:25¼, out of a daughter of Magic 1451 by American Clay 34.

Duchess, the roan mare entered in the 2:08 trot here and in the M. & M. and other eastern classics, has wintered nicely since annexing the 2:12 trot last fall at Phoenix in which she obtained her present winrace record of 2:07¼, and has gone the route over the Los Angeles track in 2:11. In 1912 she was a good winner in the south and central west and in 1914 went some nice races for Mr. McDonald and Levi Turner. Her pedigree is a bit in question, Mr. McDonald entering her as by Allerteen, and the Racing Guide giving her as by Carl Scott 33260, dam the producing matron Cecilian Kate by Cecilian Prince 2:30. Pedigree or no pedigree, she demands respect when she faces trotters of her class, which is the prime consideration.

Miss Harris M., the juvenile pacer of the string, is a beautiful bay lassie by Peter the Great 2:07¼ out of Mary Allen Stout by Ondale 2:23½ (sire of the dam of Billy Burk 2:03¼), grandam Maudie Macey by Macey 2:29½ (sire of the dams of Charley Mitchell 2:04¼, Wandering Jew 2:09¾, etc.). She has been a "member of the family" since she was weaned and has developed most pleasingly in all respects. She will be started here in a couple of the slower class paces, 2:25 and 2:19, as a curtain raiser to her futurity engagements down east, and has already shown a sample of her pacing qualities by negotiating the Los Angeles oval in 2:11. She was started once last year, at Dallas in the two-year-old trot, and was second to the Kentucky Todd colt Toddling, but was switched to the lateral gait not long afterward.

Laramie Lad, who has a winrace record of 2:20 made in 1912 over a two lap track and a breeder's mark of 2:09½ made in a trial against time last season at Grand Rapids, is the most extensively entered trotter of the string insofar as the exposition meeting is concerned, Mr. McDonald evidently intending to give him an opportunity to pay for his last season's education in a bunch. He is named in the 2:14 (double entry with McClosky), 2:16 and 2:18 classes, and was also entered in the events for 2:13 and 2:17 trotters, which failed to fill and were reopened to close June first. Last year his work progressed to a nice mile in 2:06 and this year he has been down to 2:10½, so all he needs is a bit of good weather to put him in shape to pay a dividend. He is a son of Master Bo, by Oronteo 2:16½, and is a Wyoming product, taking his name from the famous old frontier town of Laramie, unless the writer's dope is twisted. He has two crosses to the son of Alfred G. and Emma C. by Onward, his dam being a sister to Aguilan 2:17¼, Oronteo's fastest trotter.

Baron Todd, entered in the 2:25 and 2:20 trots, is a brown horse by the dead Todd, whose descendants are playing such a great part in the rise of the family of Bingen 2:06¼, and is equally well bred on the maternal side, his dam being Baroness Rosalind by Baron Wilkes 2:18, grandam Rosebud by Mambrino King. The Baron was raced a bit last season in educational company and at Phoenix was given a breeder's record of 2:11¾, a performance that he is already up to surpassing this season, as he has worked nicely at Los Angeles in 2:12½.

Adbell M. is the colt that beat Miss Perfection (3) 2:09¼, St. Frisco, Hollyrood Ben, Adbella Watts and Kathryn Colette in the three-year-old class at Pittsburg last summer and attained a winrace rec-

McCLOSKEY 2:06¼

ord of 2:11¼, having previously been given a breeder's mark of 2:09¾. At Syracuse he ranked third in the summary to Lee Axworthy and W. J. Leyburn, trotting second to the former in the third and fastest heat in 2:09¾, and at Hartford was third to Peter Volo and Lee Axworthy in the Matron Stake in slower time. He is maturing into a great horse and is entered in the 2:12 trot; he has worked this season in thirteen. He is a nicely bred youngster by Moko, out of Miss Adbell 2:09¾ by Adbell (1) 2:23, the one-time champion yearling of California lineage; grandam Emma T. 2:17½ (dam also of Emma Brook 2:09¾) by Socrates.

Margot Hal 2:04¼, entered in the free-for-all pace and a possible starter in the big event for 2:06 pacers on closing day, has been working very nicely this season, after having been on the shelf for a portion of 1914, and was given one trip below 2:10 before leaving Los Angeles. She won six races for Mr. McDonald in 1913 and is rated as a pretty consistent little lady. She is an "F. F. V.," which stands in eastern circles for "First Families of Virginia," having been bred at Falls Mills in the "Old Dominion" by S. Walton. She is really a Tennesseean, being by Argot Hal, whose pacing record of 2:04¾ and trotting mark of 2:07½ rank him high among double gaited horses, while her dam is Mary Campbell by Tennessee Wilkes 2:27, grandam Chestnut Belle by Brown Trigham.

Hedgewood Patchen, Mr. McDonald's other side-wheeler, came to California as a youngster in the ownership of Dick Wilson, who sold him to Havis James, Mr. Stoughton Fletcher eventually getting him. He has a good inheritance along speed producing lines, being by Hedgewood Boy 2:01 out of

Lady Patchen 2:29¼ by The Patchen Boy (3) 2:10¾, and in previous training has gone the route in 2:07¼. This spring he has progressed to a mile in ten, and is entered here in the 2:15, 2:17 and 2:20 pacing classes.

Mr. McDonald also has with him, though not entered here, the green trotter His Nibs, a four-year-old owned by Alexander Maclaren of Buckingham, Quebec, that he is educating for future seasons. This lad is a son of Cochato 2:11½, one of the grandsons of Bingen that has proven a sire of two-minute speed, as Walter Cochato 2:02¼ has been perilously near the mark and is regarded very highly as one of the early candidates for two-minute honors; his dam is Ade Larabie by Larabie the Great 2:12¾, the good son of Jay Bird owned for years by Mr. Maclaren, grandam Adebel 2:29½ (bred at Palo Alto) by Advertiser 2:15¼, great-grandam Beautiful Bells. The breeding is right to make a trotter, and the Los Angeles railbirds say he is one, too.

The Durfee trotters are a great lot, headed by the four-year-old fillies Esperanza (3) 2:09 and Virginia Barnette (3) 2:08¼, to whom California looks to keep at home some of the money hung up for girls and boys of their gait. Esperanza, the best filly yet produced on this coast, is of Mr. Durfee's own breeding, a daughter of Carlokin 2:07½ and the great young matron My Irene S. (2) 2:28¾ by Petigru 2:10½. After making a good campaign as a two-year-old she proceeded to "clean up" on the coast classics for three-year-olds, winding up her season by heading the summary at Phoenix in a field of aged horses. During the same summer she trialed below 2:08 and before leaving home last week had been a mile in 2:11¾. She is one of the "dogged" kind, and as it has often been conclusively shown that "it's dogged as does it" she carries a whole lot of respect from horsemen who know her. Virginia Barnette is a trotter of a different type, with perhaps as great a flight of speed as any lass of her age. She is a daughter of Moko and that good old Zombro campaigner, Zephyr 2:07¼, grandam Gazelle G. 2:11½ (dam of Zolock 2:05¼, etc.), and obtained her record at Phoenix in her first and only race. She lacks Esperanza's experience, but her behavior at Phoenix was all that could have been asked of her. Some weeks ago she met with an injury to one hind foot and a severe shaking up in general, but she came through it excellently and has been down to thirteen in her work since that time.

Rags 2:09¼, the five-year-old son of Del Coronado 2:09½ and Atherine 2:16¾ (dam of Copa de Oro 2:01, etc.) by Patron, has wintered well and has matured into a big husky trotter. He "had his" as a three-year-old, winning the Breeders' and Oregon futurities and the Stanford and Occident stakes, and last year was three times first and once second out of four starts, Dean Swift proving the better mud lark at his last start at Salem. He has worked the home track this spring in 2:13¾. Bertha Pointer 2:08½, who completes the quartet of trotters with records faster than 2:10, carries the Durfee brand from infancy, as she is by Del Coronado and out of the double producer Belle Pointer by Sky Pointer, grandam Princess Wilkes by Ned Wilkes. She has never been raced, her mark being of the "breeder's" variety, but she is fast and good headed and comes from a cross that has produced at least one mighty good race mare, Little Bernice 2:06¼, who forced William to his record of 2:05 as a three-year-old.

Miss Quealy, full sister to the colt Manrico (3) 2:07¼ with which Will won the Kentucky futurity in 1912, was given a two-year-old record of 2:26¾ at Lexington and has had but little training since, having been bred and raised a colt or so—one now a two-year-old with a trial this spring in 2:26. She is one of the kind that knows nothing but trot when on the track and has trialed this season in 2:17, with a half at a 2:09 clip, Durfee regarding her as a likely new one for the 2:10 list before the season closes, which would make her dam a triple producer of speed of the "select" variety. Old Folks, by Del Coronado—Iran Belle by Iran Alto, tried to cash in some weeks ago at Los Angeles and has not been asked for any fast work since; he has a good turn of speed, however, as he trialed a year ago only a second removed from the ten list. The Lark (3) 2:18½, with a trial this spring in 2:16, is another one of the Carlokins and was bred by Clarence J. Berry, being out of his good matron Subito (dam of four, including White Sox 2:06¼ and Blanche 2:06¾) by Steinway, grandam Jenny Mc 2:09 by McKinney 2:11¼, third dam Leonor 2:24 by Dashwood, fourth dam Durferine (Geraldine) by Echo. The pedigree has a genuine "Durfee whang," as C. A. Durfee bred most of the matrons named, all of which are in the great brood mare table.

Will also has with him four three-year-old trotters all known to fame as two-year-olds. Byron, the futurity winner bred by Byron Erkenbrecker of Los Angeles, with a two-year-old mark of 2:20, has reached that same figure in his work this season and is doing famously in every way. He is the first performer for the trotter Tom Moko 2:13, now at the head of the stud of H. H. Boomer's establishment in Idaho, and is out of Rita H. 2:12½ by McKinney; his last year's war prizes include first money in the Breeders', State Fair and Pleasanton futurities, as well as a little neighborhood race at home, which is a pretty fair kind of a start for a young campaigner, a young sire, and a newcomer to the table of dams.

The other three of the same age are all Carlokins from producing dams—and by producers in this instance is meant producers of speed from two-ten to two minutes. Carlschen (2) 2:23, bred by Mrs. Lillian J. Boyd of Hemet, is out of Bonnie Ailsie 2:08½ (dam also of Contention B. (3) 2:10, who was "hard-lucked" out of a world's record at Phoenix) by Fausino 2:12¼, grandam Ailsie Medium 2:27¾ by Happy Medium, and has trotted this year in 2:17. The other two were bred by Mr. Durfee and are Carl (2) 2:19¼, full brother to Esperanza (3) 2:09, with a trial this season in 2:15½, and Nicola B. (2) 2:23½, out of Atherine 2:16¾, the dam of Copa de Oro 2:01 (who was also "hard-lucked" once at Phoenix and "rolled" for a record of 1:59) and Rags 2:09¼; Nicola B. is also a futurity winner, and had gotten along to a mile in 2:16 before leaving home. It may also be noted that the dams of these three were not merely producers but fulfill the "developed" theory as well, and it is doubtful if any stable can show three equally good ones by one sire. What a horse race the four Durfee three-year-olds would make if William could only develop about three "astral bodies" and drive them all himself.

Only a pair of two-year-old trotters were brought up, but they are bred to be the right kind. One is the bay filly Carleta by Carlokin, out of Alexandra, trial 2:20 by Bon Voyage 2:08, and the other is Miss Rico by the futurity winner Manrico 2:07¼, dam the great brood mare Subito by Steinway. Both are developing most promisingly, Carleta having negotiated the route in 2:26 with a half in 1:09½, while Miss Rico, to the best of the writer's knowledge, has set the pattern for two-year-old trotters so far this season with a mile in 2:21½. Manrico has not yet appeared in the great table of sires, but there are two youngsters in the Durfee string that can land him there with a bump the first time they are asked to do so.

The pacers of the stable are only three in number but they are long on quality and "Durfee fans" will be found in plenty who will be ready to chance a bet or so on them in any "reasonable" kind of company. White Sox, the Del Coronado—Subito lass originally campaigned as a trotter and given a winrace record of 2:13½ at that gait, has a world of speed as a pacer and has hauled Will his fastest ride of the season—2:08½. She won five races last season and forced Clara Mac to pace in 2:04½ to beat her at Sacramento, so she has had some "'sperience" in really fast company. She will be the Durfee entry for the fast pacing stakes and classes, being substituted in the big event for the dead Guy Borden. Contention B. is maturing nicely and has turned the Los Angeles track in 2:11, within a second of his three-year-old record. His mile in 2:08¼ at Phoenix was lost to him, officially, but that will not prevent him from hanging up some good race records whenever his teamster gives the word, as he is probably the fastest of the three three-year-olds by Copa de Oro that beat 2:10 last season. The third pacer is the two-year-old lad Rico, by Manrico 2:07¼—Pavlowa B. by Petigru 2:10½, and he has already developed standard speed, having unbelted a mile in 2:25 with a half in 1:08. Will could have brought along a number of other good colts, but didn't wish to put the exposition folks to the expense of building more stable room, so left quite a delegation at home in competent hands.

Here are the Durfee entries for the June meeting: 2:30 trot, Miss Quealy, Virginia Barnette, Bertha Pointer; 2:08 trot, Rags, Esperanza, Virginia Barnette; two-year-old trot, Carleta, Miss Rico; 2:25 pace, Contention B.; 2:16 trot, Byron, Bertha Pointer, Virginia Barnette; 2:20 trot, driving club, Miss Quealy; 2:25 trot, Bertha Pointer, Virginia Barnette; 2:18 trot, Bertha Pointer, Virginia Barnette; 2:17 pace, Contention B.; 2:30 trot, driving club, Old Folks; 2:10 trot, Esperanza, with Virginia Barnette as a possible substitute for her; free-for-all pace, White Sox; 2:20 pace, Contention B.; two-year-old pace, Rico; 2:20 trot, Old Folks, Bertha Pointer; three-year-old trot, Nicola B., Carl; 2:19 pace, Contention B.; 2:06 pace, White Sox. There will probably be other entries from the stable in the classes which close on June first, so Mr. Durfee has a fairly busy time ahead of him.

THE PART CHANCE PLAYS.

The element of "chance" has been prominent in the breeding and development of the light harness horse. Much more so than with the thoroughbred. With the latter breeding theories have been followed with more or less regularity. Not so with the trotter. Many of the trotting and pacing champions are the result of a definite purpose on the part of their breeders, but the number that have attained prominence through good fortune alone is truly remarkable. Among thoroughbreds the policy of breeding to the winners has been in vogue so many years the blooded horse has adhered closely to type with but few sporadic or chance matings which have resulted in champions.

There is no question but that the plan of selecting stallions of good size, good conformation and winning blood followed by the foremost breeders of the trotting horse is the only logical course to pursue in producing a champion, and the successful horsemen of the present day are those who are the most exacting judges of individuality and blood; but the history of the light harness horse is so full of examples of horses prominent through good fortune alone that their careers on the race course constitute some of the most brilliant pages of trotting history.

Rarus 2:13¼, the first trotter to beat the world's championship record of Goldsmith Maid 2:14, would never have ranked among the greatest race horses of all time had he not fallen into the hands of John Splan. His breeding, while not entirely a chance affair, was not the result of research of a practical horseman, and if Splan had not beaten Rarus earlier in his career with Kansas Chief 2:21¼ it is likely the Long Island trotter would have remained in obscurity. When C. W. Williams, a young telegraph operator of the Middle West, bred two common mares to Jay Bird and William L. he little dreamed he would give to the world such trotters as Allerton 2:09¼ and Axtell 2:12, the latter a champion of his age and gait. Beuzetta 2:06¼, the property of a Kentucky mountaineer, won the richest Kentucky Futurity ever trotted and lifter her owner from poverty to riches. Tommy Horn 2:04¼, a Colorado range horse, with a brand on his shoulder, beat the best of his division at Lexington last fall and became the holder of the record for the fastest seven-heat race ever trotted. Walter Cochato 2:02¼, the property of a cheese merchant in a little Indiana town, proved a Grand Circuit sensation two years ago and is now a candidate for two-minute honors. Poindexter 2:09, a trotter that was sold to Thomas W. Lawson for a long price, was purchased as a colt in a Frankfort, Ky., livery stable, where he was being held for a feed bill, while Cresceus 2:02¼, a stallion champion, had a narrow escape from death as a youngster because of his scrawny appearance.

Numerous instances of this character might be presented in supporting the chance theory. These circumstances are due almost wholly to the fact that the trotter is an animal suited to many purposes, a poor man's horse as well as a rich man's hobby, and as long as men in all walks of life are interested in the production of the light harness horse, just so long will the champions continue to come from the most humble surroundings. No greater tribute could be paid to the versatility and usefulness of the trotting horse, and it is this wide range of adaptability that is preserving the breed for future generations. Notwithstanding the advent of the motor car and the increasing sentiment against speculation on race courses, the light harness horse is breeding on, equally able to earn his fare on the track or the farm, under saddle along the bridle paths of the cities or amid the thundering of cannon on the battlefield of the world's greatest war.

A writer in the Philadelphia Record recently presented the facts surrounding the mating of the sire and dam of Peter the Great 2:07¼, the world's greatest sire of 2:10 trotters and the leading colt sire of America. Peter the Great was purely the result of a chance mating and while his blood lines are first class and the cross a successful one, as measured by speed on the race course and ability to sire speed, the fact remains that had it not been for the element of fortune Peter the Great would have been unknown to fame. The breeding of Axtell and Allerton by the youthful telegraph operator in the west is having its influence on trotters of the present day. Both horses have founded a family that is breeding on with increasing regularity, and in the matter of pure speed alone the trotters descended from Axtell have a slight advantage over those from Peter the Great 2:07¼, the fastest trotter in the Axtell family being Hamburg Belle 2:01, while Peter Volo 2:03¼ is the fastest of the get of Peter the Great.

Selecting the stallions that have descended from sire families and avoiding the failures in the male line, is a favorite rule with scientific breeders of the present day, and while a good rule which has worked well, it has many notable exceptions, prominent among them being Bingen 2:06¼, founder of the greatest family of trotters of the present day. Bingen was by May King, a horse of but little ability as a sire, and while he gave to the world one or two race horses, his presence in the pedigree of Bingen is a break in the chain of male line successes, tracing from Electioneer, a truly great progenitor. Peter the Great, likewise, is from a stallion of mediocrity. His sire, Pilot Medium, was decidedly ordinary, while his grandsire, Happy Medium, a sire of champions on the race course, is not prominent as a founder of a trotting family. The same may be said of the pedigree of Axtell, a stallion before the public today by reason of the wonderful showing of the colts and fillies by his son Axworthy.—H. A. Hamilton, Canadian Sportsman.

THREE STAKES FILL AT EMPIRE CITY PARK.

Manager R. M. Williams reports that three of the early-closing events of the Grand Circuit meeting at Empire City Park have filled, and it has been found necessary to declare the other two off. Those that have been successful are the Greater New York 2:08 trot, fifteen entries; the Manhattan 2:13 trot, twenty-five entries, and the Broadway 2:08 pace, twenty entries. The 2:05 trot and the 2:03 pace did not fill, nor did the handicap race, whose conditions the horsemen did not seem to understand. On the whole Mr. Williams is pretty well satisfied, and says the Grand Circuit meeting will go on as planned. The entries in the three classes which filled are very representative and include all the prominent stables which are coming down the big line this season. There is considerable disappointment in the knowledge that the 2:05 trot did not fill, although Mr. Williams does not share it to any great extent. He says he had not much faith that it would be well supported, but offered the purse with the idea of leaving nothing undone to provide the New York racegoers with the best talent in the country. A good list of class races for the Empire meeting will be announced later.—Trotter and Pacer.

A LETTER FROM CALIFORNIA.

Under the above caption the current number of the American Horse Breeder carries an interesting communication written from this city by Mr. A. W. Davis, of the "old school" of New England horsemen. Mr. Davis spent the winter in California, largely at Pasadena, taking advantage of the opportunity to visit Hemet Stock Farm, Exposition Park at Los Angeles, the fair grounds at Riverside, Pleasanton Driving Park, Palo Alto, the exposition and various other points of interest to lovers of the trotter. So well pleased was he that before his departure for the east early in May he announced his intention of becoming a resident of Pasadena or vicinity, a "good resolution" that we trust he will carefully observe, as California can use gentlemen of Mr. Davis' caliber in generous quantities.

Here is his letter to the Breeder:

"The writer recently made a visit to Palo Alto, the seat of Stanford University and the home of the late Leland Stanford, where at one time were quartered twelve hundred of the finest bred trotters in the world. Harry Peterson, formerly of Boston, entertained the party of which I was a member. We were shown the wonderful grounds where Senator and Mrs. Stanford expended millions in collecting curios from all parts of the world. Here are the skeletons of Occident, Electioneer and Palo Alto 2:08¾. Since the death of Senator Stanford, the horses have been disposed of, and the stables are now used for the farm horses. The land is the most fertile in California and the oats are now three feet high. A perfect gem of art is the memorial chapel, which cost $1,500,000. The earthquake did much damage to it, but it is being repaired.

"The trotters are beginning to arrive at the exposition track for the spring meeting, June 5-19. Lon McDonald moves his stable of twelve from Los Angeles on May 2. The Hemet Stock Farm, Hemet, Cal., the property of W. F. Whittier, of San Francisco, will be well represented in the races, and Budd Doble has the horses in fine condition. He is now located at the San Jose track, with nine head.

"Mr. Lively, the manager of the horse show and other live stock exhibits, told me that more than $900,000 would be offered in prizes in that department. The polo games have been very well attended and many of the finest ponies in the country are now here, but leave May 1 to give place to the trotters and show horses. The stables are palatial and decidedly well arranged. There are twelve hundred stalls, kept in the most perfect order.

"The exposition is wonderful! Its huge buildings, with their unique color schemes, and the tower of jewels is most unusual. The state buildings are a great show in themselves. The California building cost $750,000, and contains the products of one of the greatest states of the Union. The Oregon building, one of the most attractive on the grounds, is on the log cabin order, the front being made from forty-eight huge logs of Douglas fir, fifty feet long and from four to eight and one-half feet in diameter. The flagpole is 257 feet high and weighs forty-seven tons. It was hewn from a tree 347 feet high and contained enough lumber to build five eight-room houses. The tree was three hundred years old. It cost $5,000 to transport it to the exposition grounds and twenty tons of cement were used in building the foundation.

"The Massachusetts building has an imposing site, and with its gold dome attracts much attention. The fireworks and illumination effects are alone worth a trip to the coast.

"An Irishman visited the exposition a few days ago. When he saw the kangaroo at the Australian building, he said, 'What's that?' He was told that it was a kangaroo, a native of Australia. Pat replied: 'Begorry, he must be a brother-in-law of mine. My sister married a native of Australia.'"

LEXINGTON'S LIBERALITY.

Those who had hoped that President Tipton would arrange a class for free-for-all trotters at Lexington that would be likely to draw the stars should be pleased to learn that the Castleton Cup for $3000 has been made for the open class of trotters. As heretofore, the event carries also with it a cup to be presented to the winner by David M. Look, the master of Castleton. In the other fixed trotting events the Transylvania and Walnut Hall cup remain unchanged, as to class, purse and conditions, but some radical changes have been made in the Ashland, Kentucky and Lexington purses. In the Kentucky and Lexington, while the total entrance is three per cent., it costs nominators only one-fourth of one per cent to declare out by July 1, three-fourths of one per cent will carry to September, and 1¾ per cent to the night before the race. This radical and liberal change in conditions is made by the Lexington association because it is believed that owners of untried youngsters should be favored and it is hoped that these will appreciate the change by making a liberal entrance.

The conditions of the early closing trotting classes for Lexington are here given:

The Transylvania: for trotters eligible to 2:08 class (3-in-5), $5,000. Divided: $2,500 to first; $1,250 to second; $750 to third; $500 to fourth. Entrance: 1 per cent ($50) June 1; 1 per cent ($50) July 1; 1 per cent ($50) Sept. 1, with 7 per cent of purse additional from each money winner. Entries transferable on or before September 15, on which day starters are to be named.

The Castleton Cup: for trotters, free-for-all (2-in-3), $3,000. A gold cup to owner of winner from Mr. David M. Look, of Castleton. Divided: $1,400 to first; $700 to second; $400 to third; $300 to fourth; $100 to winner of fastest heat; $100 to driver of winner. Entrance: 1 per cent ($30) June 1; 1 per cent ($30) July 1; 1 per cent ($30) Sept. 1, with 7 per cent of purse additional from each money winner. Horses to be named June 1.

The Walnut Hall Cup; for trotters eligible to 2:12 class (3-in-5), $3,000. A $500 trophy to owner of winner from the proprietors of Walnut Hall Farm. Division of moneys, entrance and payments same as The Castleton Cup, No. 2.

The Ashland: for trotters eligible to 2:19 class (3-in-5), $2,000. The winners of The Transylvania, The Castleton Cup and The Walnut Hall Cup barred, but if eligible to start in this race the entrance will be refunded. Divided: $1,000 to first; $500 to second; $300 to third; $200 to fourth. Entrance: 1 per cent ($20) June 1; 1 per cent ($20) July 1; 1 per cent ($20) Sept. 1, with 7 per cent of purse additional from each money winner. Horses to be named June 1.

The Kentucky: for three-year-old trotters (2-in-3), $2,000. The winner of the Kentucky Futurity barred, but if eligible to start in this race the entrance will be refunded. Division of moneys, same as The Ashland, No. 4. Entrance: ¼ of 1 per cent ($5) June 1; ½ of 1 per cent ($10) July 1; 1 per cent ($20) Sept. 1, with a starting fee of $25, payable by 5 o'clock of evening before race; 7 per cent of purse additional from each money winner.

The Lexington: for two-year-old trotters (2-in-3), $2,000. The winner of the Futurity (2-y.-o.) barred, but if eligible to start in this race the entrance will be refunded. Division of moneys same as The Ashland, No. 4. Entrance: ¼ of 1 per cent ($5) June 1; ½ of 1 per cent ($10) July 1; 1 per cent ($20) Sept. 1, with a starting fee, $25, payable by 5 o'clock of evening before race; 7 per cent of purse additional from each money winner.—Western Horseman.

GOOD SPORT AT ANDERSON.

The races at Anderson, Cal., on May 8 were a grand success and were attended by a big crowd that gathered from all parts of Shasta and Tehama counties. The forenoon was given over to baseball and other sports, and by shortly after noon the grounds at the track were well filled. Stores closed, work on public and private enterprises was suspended, and everybody made for the track, where the ladies had prepared a toothsome luncheon, which was served on tables on the lawn before the grandstand. Mayor J. J. Noonan made a neat address of welcome to all, thanking the horsemen especially for their support and calling attention to the good work done by the association in former years. Nor had the gentlemen in charge been in any way remiss in their preparations for this event, as the old grandstand had been demolished and a new one constructed, the infield alfalfa had been harvested and the track had been put in the very best kind of shape.

Autos lined the stretch solidly and the grandstand was filled to its limit, the ladies being present in large numbers, their dainty apparel and smiling faces adding much to the day's brilliance and its pleasures. A dancing pavilion had been provided and with a lively band to furnish the music the younger set—and many of their elders—filled out the program with many dances.

At one o'clock Presiding Judge F. N. Frary of Red Bluff, one of our old-time horsemen and owner of the good stallion Howard Dillon 44624, trial 2:14, by that incomparable native son Sidney Dillon, called the races, and from then on the fun was "fast and furious." Bearcat (Martin), Preston Pans (Cox) and Adenia (Haltiser) came out for the three-eights and repeat, the money being divided between Bearcat and Preston Pans, Adenia being disqualified for a foul in the repeat after having won the first dash.

The saddle horse race was won by the entry of Mr. J. DeBerry, and the novelty event went to a horse owned by Mr. Arnold of Millville. Only two entries appeared for the free-for-all trot or pace, but they were allowed to start and cut the purse, H. Morgan with Star Direct getting the decision over Ike Stevenson with Longitude. The first heat was a merry one, but an accident to Longitude's sulky in the second caused his withdrawal and Star Direct made the circuit alone in slower time. The officials of the day were F. N. Frary and Herbert Burbank, judges; J. DeBerry and J. Mirandette, timers, and W. H. Fairbanks, starter.

Altogether it was a great day, and we had the best time ever and one of the biggest crowds ever seen for a place of our size. SHASTAN.

"Lousy and Wormy,"

and if they get distemper in one of its various forms in addition, they will be "done for." Such conditions don't pay. You know that usually where there are vermin or parasites on the inside they also are found on the outside and if on the outside sure to find 'em on the inside. Get busy—get rid of them. Spohn's Compound will do it and without purging, physicing or "drawing." Seventeen years' use surely proves the statement. All druggists or manufacturers. Read the booklet with each bottle.

Drink Jackson's Napa Soda.

PLANS FOR RACING AT TIJUANA.

For some days there has been talk around town concerning the proposal to hold running races just across the border from San Diego in Boja California, the most definite information we have concerning the same being found in the following clipping from a recent edition of a Southern California daily:

W. E. Tobias, representing the company which is to build the race course at Tijuana; Robert Farfan, secretary to Jose Cantu, brother of Governor Estaban Cantu; George Couts, and Lew Harris of the firm of Harris, Cromwell & Aldrich, civil engineers, met yesterday and drew up tentative plans for the race course.

It is planned to build the course similar to the fast Cleveland track. There will be a rise of sixteen inches from the starting wire to the quarter pole; a rise of two feet to the half mile; a drop of two and a half feet to the three-quarter pole, and a fall of ten inches to the finishing wire.

Lew Harris has drawn plans where the superelevation of the track has been carefully worked out. The track will be 85 feet wide, which will allow fifteen horses to start abreast. The final disposition of the work will be delayed until the arrival of C. C. Tucker, the contractor, and F. E. White, who are in Portland getting lumber prices.

Frank Calmons was instrumental in the engagement of Harris for the engineering work. In April, 1893, George S. Davis of the firm of Parke-Davis Co., wholesale druggists of Detroit, purchased the Monte Vista ranch in the Jamacha valley. Davis was the owner of many thoroughbreds at that time and decided to build a small track on his ranch, so that it would be possible to try out his string of horses during the winter months. Davis engaged Harris to lay out the course, and affairs progressed nicely until a slump hit the United States. Davis is said to have been hard hit at the time and sold out his California interests and returned East. Experience gained at that time in regard to the soil and the grading helped Harris in his engagement with the present company.

"It will take sixty days to grade the course after the starting of the work," said Harris. "At first we were of the opinion that it would be necessary to send East for a certain kind of soil, but upon inspection we ascertained that the soil, with a mixture of blue clay, to be found in that section would produce an exceptionally fast track. Three sites have been surveyed, and until the arrival of the rest of the company a definite decision will be withheld."

The opinion expressed at the meeting in regard to the cleaning up of the gamblers at Tijuana, Tuesday, was to the effect that it was a good thing, as it had saved them the trouble. "Full credit must be given to Governor Estaban Cantu for his co-operation with Chief Wilson," said Tobias. "It was a masterly stroke and well timed.

"When we start to race, on July 4, we propose to keep our concessions from fake propositions. We will run everything on the level. Some of the states have had a bitter experience from the forced shutting off of horse racing, due to public sentiment caused by crooked dealings. This will be the opportunity that has been looked for for a long time, and you can rest assured we are here to stay."

FIRST WORKOUTS AT P.-P. I. E.

In spite of the fact that the track could not be properly fitted for horses last week on account of the rains and the auto races scheduled for Saturday and Sunday, Superintendent Maxwell had some pretty fair footing for the initial workouts Saturday morning, and though no fast time was to be expected there were a few pretty fair miles and a number of fast brushes.

To Admiral Adolph Ottinger of the San Francisco and Portland Steamship Company fell the "honor" of riding the first mile in 2:30 on the new course, and also of going the fastest circuit for the day. Dick W. 2:06¼ snared the first standard performance trophy with a mile in 2:24, working later in 2:17½, while Zulu Belle 2:06¼ reeled off the day's record mile in 2:12¾, repeating within fractions of a second of the same mark. Owing to the carelessness of some workmen and the stupidity of their foreman and a guard who was standing idly by, Mr. Ottinger suffered a nasty fall while warming up the black mare, though no permanent injury either to himself or the speedy pacer resulted. Agnes Carter, the Ottinger stable's bay trotting mare, worked some very nice miles, the fastest in 2:20, and brushed some shorter distances at a merry clip.

Joe McGuire's best mile was in the neighborhood of twenty, but he opened up Red Rock through the lane for a quarter very close to a two-minute clip, and the little band of railbirds present developed a hearty respect for the chestnut fellow. Joe's green pacers appeared to be a fairly shifty pair, and his four-year-old trotter, A. R. G., got a good word from the first, as he is a nice individual, a perfect little gentleman in harness and an exceedingly nice gaited trotter.

George Nugent, who arrived only the previous evening, was content to take only an easy jog with Doctor D. C. 2:14¼ and Princess Louise 2:12¾, but they are both ready for fast work when the time comes, as they have been traveling miles around 2:10 to 2:16 over the two lap track at Riverside.

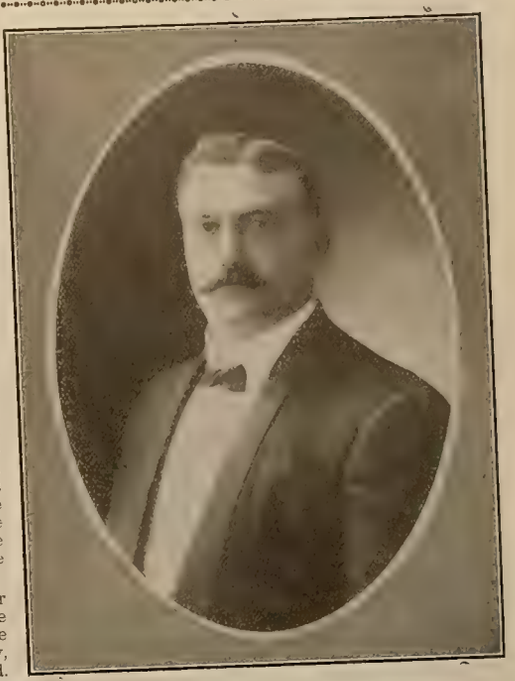
Eastern rumor has it that Tommy Murphy will put Directum I 1:58 and Anna Bradford (3) 2:00¾ to pole and go after the team record of 2:02 now held by Minor Heir and George Gano.

San Francisco-California Driving Club Organizes

GEORGE J. GIANNINI, President

At the meeting of former members of the San Francisco and California Driving Clubs held last Friday evening the organization of the new association, the San Francisco-California Driving Club, was effected under circumstances that speak eloquently for the future success and popularity of light harness matinees here by the Golden Gate. The representation present from both old clubs was very large, including almost all of the members actively engaged in racing, and so thoroughly did the spirit of harmony prevail that in the various actions taken, caucuses held and speeches made it was an utter impossibility to distinguish the previous affiliation of speakers and participants.

Previous to the meeting of Friday, the officers of the club had been decided upon by representatives of the former organizations, and the following executives were placed in power with a right good will: President, George J. Giannini; Vice-President, Daniel E. Hoffman; Secretary, Luke Marisch; Treasurer, Dr. Ira B. Dalziel; Sergeant at Arms, Daniel W. Keating; Directors, Adolph Ottinger, James J. Ryan, Ernest M. Doyle, John A. McKerron, Bert Edwards. The secretary was instructed to provide himself with all the necessary equipment for the transaction of the club's affairs, and the directors and secretary were instructed to draw up a set of by-laws and regulations to be submitted at a meeting in the near future.



The amount of dues payable was readily agreed upon and Tuesday evening was designated as the time for the weekly meetings throughout the racing season, the place to be the California Club's old quarter's in the Eagles' Building on Golden Gate avenue. All members in good standing in the former organizations were placed upon the membership roll, and the following applications for membership were approved: those of Frank Goularte, George Lowery and A. A. Michaletti.

The details of organization disposed of, the program for the summer's racing was next taken up, and it was decided that the season should open Sunday, May 16, at the "old familiar place" in Golden Gate Park, the Stadium, after which the matinees would be held on Sundays and such holidays as were mutually acceptable over the mile track at the exposition grounds, both club members and exposition managers believing that the fun races will prove a popular portion of the holiday features out at the big show. Tomorrow's affair at the Stadium will be "free as air" as usual, and announcement will then be made of the change of the scene of future activities to the P.-P. I. E. course, where an individual gate charge of twenty-five cents will be made, admitting to the full privilege of the grand stand.

Owing to the recent inclemencies of the weather and the resultant fact that some of the horses are a bit short of work as yet, Sunday's races at the Stadium will be three-quarter mile heats, only, though in the future the full route will be traveled. There was small time for argument as to the ways and means of providing prizes for Sunday's meeting, as cups galore, as well as minor remembrances for second and third horses, were donated in a jiffy by various enthusiastic members.

It is with quite a bit of reluctance that the Stadium track is abandoned even for one season, as it has been the scene of some famous matinees and jolly good times for both horsemen and general public. During the winter just passed the course was resurfaced with four inches of most excellent dressing, so that it should be better than ever. The directors of the club were instructed to convey to the park commissioners the news of their intention to race at the exposition beginning May 23, and to convey to them every expression of thanks and esteem for the courtesies extended and the cordial relations existing between both bodies in the past.

Throughout the evening there was manifest a spirit of hearty good-will that told that the hatchet had not merely been buried, but that it had been towed outside the heads and heaved overboard with an anvil attached to it. Business disposed of, the meeting resolved itself into an old time "love feast," with speeches from very many of those present, the general trend of all the utterances being along the line of "We're glad we're here—and we're going to stay."

LUKE MARISCH, Secretary

This spirit was unanimous, and after it had been thoroughly attested an adjournment was taken until the evening of Tuesday, May 11.

Just when everything was all set for the San Francisco-California Driving Club to open its matinee season tomorrow, old man Jupiter P. Pluvius had to spill the beans by soaking everything so thoroughly that there was no chance, and instead of the customary standing room only sign being displayed tomorrow at the Stadium there will be nothing stirring in the horse racing line. The track will no doubt be O. K., but many of the horses were already short of work and owners and trainers decided that the "safety first" movement was highly applicable to the situation and decided to put the opening off for a week, scheduling the inaugural event for Sunday, May 23, at the exposition track.

The club will meet Tuesday evening, May 18, at Eagles' Hall, when horses will be classified and Sunday's program arranged. The by-laws will also come up for consideration and all members are requested to be present.

PACIFIC BREEDERS FUTURITY STAKE No. 14.

Ninety fourth payments were made on May 1st, 1915, in Pacific Breeders Futurity Stake No. 14, for foals of 1914, as follows:

J. A. Alshouse's b c Roger McKinney by Prince McKinney, dam Nellie Gwin II by McKerron.

C. A. Arvedson's b or s c Ansel Mack by Prince Ansel, dam Constancia by McKinney.

E. T. Barnette's foal by Carlokin, dam Zephyr by Zombro.

C. J. Berry's foal by Copa de Oro, dam Subito by Steinway.

I. L. Borden's br f by Ed. McKinney, dam Dolly B. by Welcome; ch c by Ed. McKinney, dam Ramona by Prince Robert; b c by Ed. McKinney, dam Ella G. by Hamb. Wilkes; b or br c by Ed. McKinney, dam Hester McKinney by McKinney; bl c by Ed. McKinney, dam Maude Adams by Cresco Wilkes; bl c by Tom Smith, dam Directola by Direct; b f by Ed. McKinney, dam Miss Nutwood by Nutwood Wilkes; b g by Tom Smith, dam Carrie B. by Alex. Button.

A. M. Bracken's b f Jane Logan by Jim Logan, dam Bernice Marshall by Owyhee.

W. C. Brown's ch c Prince Pat by Prince Ansel, dam Princess Bessum by Egyptian Prince.

J. J. Campbell's b c J. Silver Bond by The Bondsman, dam Silver Fir by Silver Bow.

I. J. Cornett's b f Boness by The Bondsman, dam Salinas Princess by Eugeneer.

S. H. Cowell's foal by Palo King, dam Hulda by Guy Wilkes; b c by Jim Logan, dam Two Minutes by Wildnut.

C. L. DeRyder's b c by The Bondsman, dam Arawana B. by Sidney Dillon.

Wm. E. Detels' foal by Graham Bellini, dam Daphne McKinney by McKinney.

J. Doran's b f Nelley McCarty by Vernon McKinney, dam Zaalam by Searchlight.

W. G. Durfee's foal by Copa de Oro, dam Pavlowa B. by Petigru; foal by Carlokin, dam My Irene S. by Petigru; foal by Carlokin, dam Carolyn C. by Axtell; b c by Calokin, dam by Six Bells.

Revel Lindsay English's ch f by Wilbur Lou, dam Lady Bertha by Constantine.

Byron Erkenbrecher's foal by Copa de Oro, dam Reta H. by McKinney.

Sam Gault's b c Peter Klyo Bell by Peter McKlyo, dam Iran Belle by Iran Alto.

Mrs. E. M. Goold's b f Starlight G. by Search Pointer, dam Princess G. by Sample.

Alex. Grant's b c by Wilbur Lou, dam Sona by McKinney.

C. A. Harrison's b c Kinney Benton by True Kinney, dam Princess Viola by Prince Ansel.

Geo. F. Heilbron's b f by Lijero, dam Califa by Silver Bow.

Hemet Stock Farm's ch f by Kinney de Lopez, dam Louise Carter by Chestnut Tom; ch f by Wilbur Lou, dam Lady Zombro by Zombro; ch c by Wilbur Lou, dam Betsy Direct by Direct; ch c by Wilbur Lou, dam Little Louise A. by Boodle; ch f by Wilbur Lou, dam Zeta W. by Nutwood Wilkes; b f by Wilbur Lou, dam Stambia by Stam B.; bl f by Kinney de Lopez, dam Bonnie Ailse by Faustino.

H. A. Hershey's b c Galen by Jim Logan, dam Palo Maid by Palo King.

H. S. Hogoboom's b f Eva Dungan by Palo King, dam Miss Ione by Iran Alto; b f Lilly of the Valley by Palo King, dam by Iran Alto.

Wm. Howell's ch f Miss Sirius by Graham Bellini, dam Lady Sirius by Sirius.

S. H. Hoy's b c Elmo Logan by Jim Logan, dam Suisun by Demonio.

Craig Hyde's b f Mona Logan by Jim Logan, dam Switchtail by Demonio.

Abe W. Johnson's ch c Willie G. D. by Directum Penn, dam Babe by Son of McKinney.

Mrs. Mabel Lipson's s c Franklin B. by Chestnut Tom, dam Myrtle Ragan by Col. K. R.

R. J. MacKenzie's br f by Pan Boy, dam Merry Widow by Red Pac; b c by Copa de Oro, dam Hawthorne by McKinney.

J. W. Marshall's b f by Demonio, dam Bally Pointer by Star Pointer.

Roy D. Mayes' b g El Paso by True Kinney, dam Ella J. by Bob Mason.

J. R. McKay's b c J. R. McK. by Quintell, dam Josie Ansel by Prince Ansel.

J. E. Montgomery's b c by Jim Logan, dam Leota by Diablo; b f by The Proof, dam Margaret M. by Chestnut Tom.

A. L. Nichols' b f Silver Logan by Dan Logan, dam Silver Benton by Senator Boggs.

Chris G. Owen's br f Ella O. by Moko Hall, dam by Kinney Lou.

J. W. Pendleton's ch f Bertha Thrice by Derbertha Bells, dam Abbie McNutward by Guy McKinney; bl f Columbertha by Arner, dam Madsie McNutward by Madison McKinney.

W. A. Perley's b c Pietro Ghisleri by The Proof, dam Belle by Kinney Lou.

Mrs. Sadie L. Porter's br c by The Bondsman, dam Yu Tu by R. Ambush.

Ryan & Webster's b c by Frank Perry, dam Miss Harris by Sidney Dillon.

A. L. Scott's br f by Wilbur Lou, dam Weatewater by Sidney Dillon; ch f by Wilbur Lou, dam Lady Nez by Nutwood Wilkes.

McMyrtle, sire of the trotter John Gwynne 2:11¼, etc., is getting a nice business at Nicasio in the establishment of Dolcini & Dolcini, as the choicest mares in the Petaluma district are being mated with him.

HOW TO BECOME A SECRETARY.

Editor The Horseman:—Have just been elected secretary of a prominent fair association, but as I know little about the business and that little was gathered from newspaper work, I write to ask for a few pointers as to how to make myself the most popular secretary of all tracks. I feel that with your help, I can make myself successful, as I have a good gift of gab and can hand out the soft stuff without effort or with regard to the truth. Thanking you in advance, I remain, M. O. Neygrabber.

Your communication calls for a lot of thought, because there are many popular secretaries, but still more unpopular ones, and should a vote be taken from among the drivers and spectators after your first meeting, you will be surprised at how many things you have done that have displeased individuals, in spite of the fact that you have made yourself a slave to everybody and have changed your mind whenever asked.

From the standpoint of those who paid admission to see your fair, you have become unpopular for many things that transpired, outside of your control. You should have known that they were going to happen and prevented them; you are paid to think of everything. It is an understood fact, that you knew that the trains bringing people into town would be late, and you also knew in advance, that there would be blocks on trolleys to the grounds; you should have run all of these cars yourself and you then would be in better touch with your patrons to receive their knocks,—the fact that you were out of sight made the grievance more gigantic. Then again, those women at the box office, who had misplaced their money and held a crowd back while they found it, you should be there and loan them the money and save the feelings of others in line. You should also be at the turnstiles and see that there is no crowding, as you could have handled the crowd better than the police.

Those wet grounds after a hard night's rain are all your fault, as you should have remained up all night and, as soon as the rain stopped, got a sponge and soaked the water up. The fair might have been over before you got through, but you were trying and would also have been knocked for getting in the way of some of those large farm-bred families from twenty miles inland. You should not allow the barkers to make the noise that jars the old folks' nerves, these barkers pay for the privileges of keeping quiet. See that all exhibitors give away free samples, it is a poor fair if you don't; when the races start it is an outrage to keep those people standing around the fence, you should have a free grandstand and provide a seat for everyone; of course this is easy, if nothing else is available, hand everyone a folding chair or even a newspaper, of course each person that receives a chair will be careful to bring it back and hand it to you, if not the chair, some loose talk. Stand at the gates when the people go out and receive their congratulations (?), you will be pleased at the varieties of the language they will hand you.

From the standpoint of the concession man, exhibitor or sideshow artist, you will be so popular that a dog catcher's job would be out of your reach when they get through voting. The popcorn man will not like you because you have rented the same privileges to one or more rivals, who are giving larger packages than he, and hence you are robbing him, when he expected to do the same honor to his patrons. Then again, the location of the stand does not suit him, but your most glaring fault, in his eyes, is, that you want his rent in advance; these fellows are all so honest (?) that you could afford to take a chance until the last day, and in the meantime, if he skips after the "big-day's" business, of course he will send you a check. To be popular with him, trust him for everything, and lay out your grounds so that everybody can have the same position.

Your exhibitors in the horse, cattle, needlework, fruit and other departments will also have their smiles congealed to order for you. They also want preferred positions, especially in the needlework department, and you will require a fourteen inch armor to come out of that department alive. The danger here is greater after the prize awards are announced. Many secretaries visit fruit and eats department during the first day and sample everything edible, this is often done to save money and taste "home cooking." Our advice is to stay out of here unless you are prepared to give every one first prize. You are personally responsible for the work of the judges, and "pound cake" that weighs two pounds should have its prize, as well as its lighter brethren, as it serves its purpose to demonstrate the difference.

The horse, cattle and chicken exhibitors are generally a husky lot and only one visit to them is deemed advisable and that also on the first day, before the prizes are awarded. These men know that you caused their train to be late, which gave the local exhibitors the choice of the best quarters. In adjusting differences with these men, you must not only please them, but every "no-account" that hangs around them. If you should happen to stroll down in these departments later in the week, take a lawyer or good "cusser" with you to tell them why that horse, bull or chicken, that had never been defeated before, was only awarded second choice (by the way, see that your "official cusser" has Jess Willard's weight and fighting abilities.).

We will now instruct you about conducting the racing department, and your real troubles commence, as you are the target for everybody connected with the horses entered, as well as the officials, not excluding that important gentleman, who poses all afternoon on horseback, wearing a badge and whose duty is to hurry out the horses, but instead he prefers to wave his hand to friends and watch the races, while the drivers are wondering when the next heat is to be called. This same gentleman, when he does decide to earn his sixteen bits per day, rides a cavalry charge around the stables, calling out a class, and unless the drivers are good mind readers, he sounds like a Chicago elevated railroad conductor calling stations; the words sound like a hybrid between red hot mush and a diseased palate. To be a good fellow you must call this "necessary evil" to one side, tell him he is going fine and hand him a cigar, after that he will go to the barns every fifth heat, instead of every third.

That individual that gets out of the crowd's way, by stationing himself down the stretch, with a piece of red canton flannel tacked to an old broom handle, is a very important individual, and you should take care in selecting him. He should be strong minded enough to speak his piece properly. Don't appoint one that takes until the next heat is started, to wobble to the stand and report a horse out, then when he gets there, stops to talk to his friends on the track, while the judges are trying to drown the band, in their efforts to attract his attention. When at last he consents to report, he shows partiality to the local horse, whom he lets in and an outside horse is distanced. One of those kind of men who thinks a horse is out, unless both horse and driver have passed him, then when questioned closely, measures about a foot between his hands, as to what position the horse was in when the flag dropped; the chances are he forgot he had a flag in his hand. You do not want this kind.

In appointing your judge's stand, of course, you know who is the most prominent man in your city and burg, particularly one that might do you some good in your private affairs, coax him to preside; experience is not necessary, just so he can be used. If you can secure all personally useful friends, you are doing fine, as you are sure to eat regularly during the following winter. Never mind the remarks made by the horsemen on your selection, they must race under these men or be suspended. Your starter generally comes from out-of-town and has been recommended by several of the no-account drivers, whom he has favored in the past. Thus you have a model (?) and imposive set of officials that will heighten your popularity in the racing world. Now commence to race.

Your entry lists, which were mailed out several weeks or months in advance, we will say have brought you in a fair return, considering the fact that but few of the horsemen knew you, but took a chance at annexing some of your money. Some of these entries may have arrived several days after the closing date, or even the night before, so be careful to destroy the envelopes in which they arrived, as some inquisitive driver may protest the entry and you have thus destroyed the evidence, knowing full well that these late entries will start. Then again the entry may be enclosed in an envelope that has been intentionally mutilated around where the post-mark will go, so that the date of mailing cannot be deciphered; accept this also. Western Union Telegraph blanks were used for this purpose, several years ago, as the post-mark could not be seen under a magnifying glass, and many entries were obliged to be accepted, so you see you are doing nothing out of the way in destroying envelopes.

About the only time these late stamped envelopes are good, is when you have a grudge to settle with those interested in the horse, or else you want some excuse not to start the race, they are invaluable then for declaring off. Some secretaries who only have a few horses named, enter these in every class on the program, fill in the entry blanks to that effect and then try to hold the horses for the entrance; these cases seldom go through when taken before the parent associations, so don't try it the first year, wait until you have the game more in hand. Entries that are handed to you without mailing come in the same class as those received in afterwards destroyed envelopes.

Some secretaries make themselves strong with the drivers by promising to relieve them of paying on non-starters and then sending in the suspensions; this is good business for the association but a poor way to secure entries next year. However, you can promise anything and poor memory is not a state prison offense. When a driver's feelings have been hurt by your judges, because they punished him for something somebody else did, you must drop all work and go to the stand and demand the withdrawal of the punishment. In cases of this kind, you must have an understood fact with your officials that you are going to do this, they then look wise and say "We will consider the matter." The driver goes away happy, thinking you are the best fellow in the world. He comes to you later in the day or later in the week, and you stall him back to the judges. He then begins to realize what you are, but the rules forbid him telling you or the judges his thoughts in plain words.

After the races are over, pay the winners in checks and never have any money around to cash these checks, tell the holders of them that the rules of the association forbid cashing them and instruct them to cash them at the local bank next day; of course some of the horsemen may want to ship out that night, but what need you care for the extra expense they are put to, you are through with them for that year.

See that your local feed men are paid, also your stall rent, before the horses are allowed to leave. Then commence to make out your suspensions so that the money can be collected at the next town. Then go away for a health trip for a short time. This is fashionable and popular with hard worked secretaries. If during the meeting you want to pose, with out danger from the crowds, parade up and down the track, visiting the judges' stand often and once in awhile take up the megaphone and make an announcement. Those who do not know you will say "Who is that?" and the answer will be, "That's the secretary."

Most secretaries, however, prefer to keep under cover; to do this, they have an office, in which they bury themselves, and all inquiries are answered by employees and only the elite are allowed the supreme honor of addressing his majesty.

With these few pointers we will dismiss the subject, hoping with one year's ripe experience, you will give up the idea of being the "most popular" secretary and content yourself with emulating the ordinary "hail-fellow-well-individual," who is always trying to do the best he can, while under the strain of being nagged by officious presidents and idea-suggesting boards of directors, so good luck to you and may the world look as rosy after your first experience as it does now.—W. H. Shields in The Horseman.

MILWAUKEE AND THE MATINEES.

Milwaukee, May 8, 1915.

Milwaukee, the pioneer in the movement now spreading all over the United States to foster horse racing on public tracks by gentlemen owners, is preparing for another active season for this idea, which originated in Milwaukee and has been in successful operation for eight years, the season soon to open being the ninth.

In some cities the movement has started with the setting apart of broad boulevards for straightaway tracks, in some others the movement has so far developed as to cause a demand for a public circular track.

Milwaukee's horse racing by a private club has attracted so much attention that in Washington Park there is now a public half mile track, the equal of any track in Wisconsin.

Eight years ago Milwaukee horsemen conceived the idea of building a public race track, within the city limits, where free racing matinees could be staged, and the course conducted under the direct supervision of the city. Before this, Cream City horse owners held an occasional meet at the state fair park, to which admission was charged. Milwaukee, although it had never been rated as much in racing circles, patronized the matinees and the result was a paying venture. Later the Milwaukee driving club was organized, but soon died out for lack of spirit.

In 1905 the Washington Park driving club, now one of the best and largest gentlemen's driving clubs in the country, was incorporated. Plans were laid at once for a public course, and a request was made to the common council for an appropriation to buy a tract of land within the city where weekly meets could be staged.

After a year of urging, the common council finally gave $2,500 towards building a course at Washington Park, the finest park of the city and within the city limits. Two car lines run direct to the park. The course was mapped out in 1906, on a strip of vacant land at the extreme end of the park, and the first matinee was staged early in November. Although the temperature hovered around the zero mark, 5,000 were present on the opening day. No grandstand had been erected and the spectators were compelled to stand around the track. Two more matinees were staged before snow fell.

The next year the horsemen made a request for $10,000 with which to build a grandstand for the track. They showed where an average of 6,000 persons visited the park each Sunday during the summer for the express purpose of seeing the racing matinees, but the common council refused to grant an appropriation. The driving club went along staging its matinees weekly, and attracting more spectators each Sunday.

In 1910 the average weekly count at the track totaled 9,000 and then the common council set aside $10,000 for a grandstand. This was erected last season. Immediately the weekly attendance increased, until now 15,000 are present at each matinee.

It is the popular pastime for Milwaukee on Sunday afternoons. Workmen with their families make an afternoon of it at the park, and hundreds of automobile parties line the stretch each Sunday. Baseball is the only sport that has more admirers, and racing followers are increasing by leaps and bounds.

As a result of this success the common council, without any urging, granted an additional $10,000 to erect a roof over the grandstand and to build stalls for the horses.

The Washington Park Driving Club, backed by public sentiment, is responsible for the success of racing in Milwaukee. All of the horsemen competing in the matinees own and drive their own horses and bear the expense of the upkeep. The city takes care of the track, and this expense does not total over $500 each season.

When the course was built the driving club had thirty-three horses on its roster. Now ninety-two trotters and pacers take their turn showing before the public. No cash prizes are given the winners. The horses making the best showing for the season are awarded silver loving cups, donated by Milwaukee business men. Milwaukee was the first city to open a race track free to the public, and has found it a very profitable venture.

WARREN B. BULLOCK.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

BOOK OF ENGLISH DOGS.

The earliest known treatise on dogs written in English is a translation of a Latin book by John Caius or Keys, doctor of physic in the University of Cambridge, and better known as the second founder of Gonville and Caius College. It was translated by Abraham Fleming, described as a student, and first printed in 1576, a few years after Caius' death. It was apparently written in answer to a request from Gesner, the Swiss naturalist, for some information on the subject of English dogs, which he wished to incorporate in one of his treatises on natural history. The author divides his subject into three heads, distinguishing the different kinds of dogs according to their use; "a gentle kinde, serving the game," "a homely kinde, apt for sundry necessary uses," and "a currish kinde, meete for many toyes." There are further sub-divisions; for example, the "gentle kinde" includes hunting dogs, or those that "chase the beast," and fowling dogs, or those that "take the byrde." Several different breeds of each are again distinguished, of the former according as they excel in "perfect smelling," "quicke spying," and so forth, and of the latter according as they are used to find the game on land or water.

The style of the English version, with its apt and racy language, its nicely balanced antitheses and rhyming and alliterative phrases, is typically Elizabethan; but it is always clear and direct, and free from the affectations and exaggerated ornament so often found in the prose of the period. Among the hunting dogs the chief breeds mentioned are the harrier, the terrier, the greyhound ("a spare and bare kinde of dogge"), the bloodhound, the gazehound, so called "because the beams of his sight are so stedfastly setted," and the limer or leash-hound, which takes its prey "with a jolly quickness." The account of the blood hound occupies most space, and examples are given of its sagacity in tracking not only the game, but also "such pestilent persons as plant their pleasure in practices of purloining." The "fowling dogs" that work on land are comprised in two classes: spaniels, a general name for all those whose duty it is to search out and spy the bird, and setters, which are used to entrap birds which are to be taken in a net. The setter, a silent dog, stealthily approaches the nest of the bird, and when he has found it, lies down to mark the place until the fowler arrives. The dog then moves and startles the bird, which in attempting to escape is entangled in the net. The author appears to fear that his friend will hardly believe a dog to be capable of such cunning, and supports his words by a further example of animal intelligence.

A somewhat different breed is used to take duck and other waterfowl. The duty of this dog, the water spaniel, is to discover the bird's haunts, to retrieve the wounded ones from the water, and to find and bring back arrows which have missed their mark. As for the dog called a "fisher," mentioned by Boethius as catching fish by smelling about the rocks in a stream, Caius confesses that he knows none of the kind in England, but promises to pass on to his friend any information he may obtain on the subject. Among the "gentle kinde" he also includes the "Spaniel-gentle, or comforter," though this is not used for hunting, but is merely sought for to "satisfie the delicatenesse of daintie dames, and wanton women's wills." These are evidently toy dogs, for the object is to breed them as small as possible, and the author's scorn of women who pamper the little creatures and lavish on them the affection they should bestow on their children shows him to be a true dog-lover. He admits, however, that even toy spaniels have their uses. "Though some suppose that such dogges are fiyt for no service, I dare say, by their leaves, they be in a wrong boxe." "These little dogges are good to asswage the sickness of the stomacke, being oftentimes thereunto applyed as a plaster preservative, or borne in the bosom of the diseased and weake person. Moreover, the disease and sickness changeth his place and entered into the dogge."

Dogs of the "homely kinde" are classified into those which help man in dealing with other animals, such as the shepherd's dog, and those which protect him against "mischiefous men," such as the bandog or mastiff. The author, in traveling from place to place, has often reined in his horse at the sound of a shepherd's whistle, and stayed to watch the dog collect the sheep together and drive them to his master. This dog is not of a large or strong breed, for he has no very fierce enemies to encounter, since wolves were exterminated in this country by an edict of King Edgar, in the tenth century. From that time none has been seen in England except those brought over from beyond the seas, "for greedynesse of gaine and to make money, for gasing and gaping, staring, and standing to see them, being a straunge beast, rare, and seldom seen in England." The mastiff, one would imagine, is his favorite dog. "It is a kinde of dogge capeable of courage, violent, and valiunt, striking could feare into the harts of men, but standing in feare of no man." It is generally kept tied up in the daytime, lest it should injure innocent people, or at least frighten them by its fierce barking. But though Cicero was of opinion that dogs that bark in broad daylight should have their legs broken, our countrymen think differently, and in the night they allow the mastiff to roam at will, to protect their houses from thieves and vagabonds. The strength of these dogs is such that three or four of them will kill a bear, a bull, or even a lion. It is said that Henry VII. was so much displeased at the thought that an "yll-faured rascall curre" should attack the king of beasts, that he ordered all such dogs to be hanged. To sum up their disposition in a few words, they "love their masters liberally, and hate straungers despightfully"; and their fidelity is such that though they may have failed to save their master's life against superior odds, they will remain by the dead body for days, never deserting it unless some opportunity offers of tracking down the murderers. Their intelligence is equal to their courage, and many a man owes his life to the vigilance of his dog. "There was no fayntyng faith in that Dogge, which, when his master by a mischaunce in hunting, stumbel and fell, toppling downe a deepe dytche, being unable to recover himselfe, the Dogge signifying his master's mishappe, reskue came." Others have saved the lives of whole households by giving warning of fire, and some will not allow burning coals to lie scattered about the hearth, but rake them together with their paws, or if the cinders are too hot to touch, cover them with ashes before moving them.

Of the "currish kinde," or mongrels, the author has little to say. They include the Warner or Wappe (so-called from his barking wau! wau! to warn the household of the approach of a stranger), the turnspit, and the dancer, a performing dog which accompanies strolling players and vagabonds. Probably these are not three distinct breeds, but merely different names given to any kind of mongrel, according to the use to which it is put. A few other kinds not native to England are mentioned, such as that bred from a dog and a wolf; and one or two which are quite common at the present day.

Not the least interesting part of the book is the supplement in which the author gives the derivation of the names of the various breeds of dogs, for the benefit of his friend, who did not understand English. He derives "hound" (hunde) from "hunt," because it is the dog used for hunting. He admits that the similarity between the name and the German hund would suggest that there is some connection between the two; but as the German word is a general name for all kinds of dogs, while the English "hound" is restricted to an especial class, he inclines to the belief that the latter is derived from the use to which the dog is put, by the simple process of changing one letter to another, namely, "t" into "d." Equally ingenious are the derivations of "greyhound" from the Latin gradus, because he is the dog of highest degree, "being simply and absolutely the best of the gentle kinde," and of the ban-dog, so-called because he is at his master's commandment (ban).

FRENCHIES, PEKES AND JAPS.

Champion Noswal Nabob, owned by Charles N. Devault of Pittsfield, Mass., was judged the best dog at the recent seventh annual specialty show given by the French Bull Dog Club of America in New York. The contest for the chief honor of the show was between the winner and Gamin's Rival, the latter being easily the best of the class winners, but Nabob, entered in only the special classes, beat out Rival on head points. Especially in the foreface was Nabob the best, and it is the foreface that is the chief factor in French bulls.

One of the surprises of the show was the defeat of Mrs. C. C. Valentine's General Hunk's Poiret, which took the blue in the winner's class at the last Westminster Kennel Show at Madison Square Garden. Hunk's Poiret did not even get a place in the class for American-bred dogs, where he was entered.

The show this year was peculiar in two features—one that the dogs were of an inferior grade, being too big and coarse, and the other that the miniatures, it is claimed, were the best ever shown at a French Bull Dog Club show. The bitches were better than those usually shown, and Dr. M. D. Littig's Chablis and Jeunet, winners in the dog puppies and bitch puppies, were the best shown in produce stakes for several years, and were typical Frenchies. A new exhibitor this year was Miss Vera G. Bloodgood, daughter of H. J. Bloodgood. Miss Bloodgood entered Brackenside Ripette in three classes, and received two blues and a red ribbon, and in addition her entry was adjudged the third best bitch in the show, which is a remarkable achievement for a miniature. E. M. Dodge's Ch. Nellicote Gamin, 12 years old and famous as a winner, took the blue in the class for veteran dogs and bitches over five years old. Another dog which caused much interest at the show was Stephen C. Baldwin's white bull Ermine, which was shown by Mrs. Charlotte McClure, and took first in open dogs and bitches.

Frederic Poffet had seven entries and every one won a ribbon, he also received the blue for the best brace and the best team in the show. Nearly 150 dogs were benched, the entry being larger than at any other of the club's shows.

Boo Goo of Croydon, an American-bred Pekingese, carried off the honors for the best dog in the show of either sex at the semi-monthly exhibition of the Toy Dog Club of New York, held last month.

There were over sixty entries, and almost a dozen breeds represented. The Pekingese made the best showing, and had by far the largest number of followers. Boo Goo of Croydon not alone was adjudged the best in the show, but he won in all the classes in which he was entered, among them being the American-bred dogs, limit, open and winning classes. The blue for the best Pekingese bitch went to Mrs. H. A. Baxter's Aig Tarza. Mrs. Tobey's Aig Shausi carried off the first in the class for American-bred bitches.

Miss Lena Schilling captured the honors in the majority of the Pomeranian classes. Her Black Prince V. won the ribbon for the best of the breed shown, and the same owner's Sable Princess was the best female puppy. Ch. Tom Thumb, owned by Miss Clarise Lithaur, besides receiving the reserve to Boo Goo of Croydon for the best in the show, took the blue for the best English Toy dog exhibited.

The best Japanese spaniel was a handsome bitch named Kato entered by Mrs. George Lott. She had not a difficult field to beat, but was much superior to the other entries.

MATING AND SHOWING.

[By Rodney Stone.]

For the benefit of those people who are new to the game, the following hints are given. It is essential to the production of a strong and healthy litter of puppies that at the time of mating, both parents should be in a state of sound health. This means that they should not be fat, but, on the contrary, in a tough, lean condition. The chances for a successful union are considerably reduced when the dog and bitch are overfat, and if the mating prove successful, it is fairly certain that the puppies will not be strong as they should be in order to make a proper start in life. Overfeeding, or unsuitable feeding, are both responsible for many canine ailments and diseases, and when associated with a lack of proper exercise, so often met with, it is unreasonable to expect litters of strong, healthy puppies. Another point for close observance and attention is that both dogs should be as free as possible from worms at the time of union. These internal parasites have the effect of reducing the strength and vitality of their hosts and their expulsion is imperatively necessary in the interests of the expected puppies. A further point for attention is the fact that, if the mating is made in hot weather, the dogs should be brought together at daybreak, after they have had a night's rest, and when they are at the top of their physical condition. This is a better method than to mate the dogs after sundown, and for this reason. If joined at the close of a hot day, the dogs have not recovered from the slackness and lassitude consequent on the heat, and are therefore not at their best physically. On the other hand, after they had a good sleep, they are at their best in the cool of the morning—stronger physically than at any other time of the day—and are at their best for mating purposes.

An important item connected with the showing of dogs is that they should be trained to the showing. At many shows I have attended dogs were noticed which sadly lacked the necessary preparation, with the result that they did not give their owners a good and proper run. For instance, take Pomeranians. With these little dogs, gait and tail carriage are important points, yet it is quite a common thing to notice dogs that strain on the lead, or hang back, so that they have to be practically dragged along, both of which disabilities either completely destroy or considerably alter that dainty, trotting action which is part of the Pomeranian character. With this bad action a dropped tail is frequently found associated, than which nothing could more effectively destroy the chances of the dog with the judge, who cannot be expected to bother about a dog that is faulty in action and which moves round with a dropped tail. The dog won't show himself, and, if he doesn't, the judge can't estimate his value. The Pom. that moves round the ring with quick, dainty steps, and with tail carried well over his back, will almost always catch the judge's eye, even if he is only otherwise of average quality, and the dog that catches the judge's eye has made a good start. The bright, daintily moving Pom., with a good tail carriage, and who gets about as though he enjoys his life to the full, asks for the money directly he enters the ring, and will almost always score over the dog of better body and coat, if the latter moves badly and drops his tail. Training does it, and the Pom. that has a nice action and well-carried tail will often win, even though he has a long body, because his owner will so work him on the lead as to send him round with his head well up, which has the effect of appearingto shorten the back. Yes, training is an important matter, which is not given that serious consideration, generally speaking, that it deserves. The man who wants to win nowadays must train his dogs. He should secure a thorough sympathy between the dog and himself, after which he should put the dog on

the lead and take him about in those places where he will meet numbers of people and hear lots of noise. This treatment, if persisted with, will cause the dog to behave properly in the show-ring, because the people about will not upset him. But, in a few words, the well-trained dog will often beat a better-quality dog if the latter is untrained, and, this being the case, the fanciers should pay greater attention to the matter of show-ring education.

TOY DOG ASSOCIATION ELECTION.

The annual election of officers for the Pacific Coast Tay Dog Association took place in the green room at the St. Francis Hotel last week in this city and resulted in the selection of well-known dog fanciers from all parts of the State.

The officers elected were: Miss Lydia K. Hopkins of Menlo Park, president; Mrs. Leon L. Roos of San Francisco, first vice-president; Mrs. F. M. Connor of Pasadena, second vice-president; Mrs. D. T. Murphy of Burlingame, third vice-president; Mrs. C. J. Lindgren of Burlingame, secretary, and Miss Vera Lindgren of Burlingame, treasurer. The board of directors includes Mrs. Timothy Hopkins of Menlo Park, Leon L. Roos of San Francisco, Miss Mabel Lindgren of Burlingame, Mrs. Lorenzo Avelani of San Francisco, J. S. Severance of San Francisco, Dr. S. I. Wyland of Santa Rosa and M. S. Harris of San Francisco.

CARIBOU AND MOOSE.

The Alaskan caribou inhabit the treeless and semi-treeless parts of Alaska, including the bare mountain ridges of the interior, and the open rolling tundras of the coast from the Arctic to the Pacific side of the Alaska Peninsula, where the so-called reindeer moss on which they largely feed is most abundant.

They scatter widely in summer and in the fall collect in large herds, but at all times they roam widely. The great herds in the fall of the year perform a more or less regular movement in the nature of a migration, and within certain limits their course of travel and times of arrival at given points are well known. Except on the Alaska Peninsula caribou are very scarce on the shores of Bering sea, where formerly abundant, having been driven out or extirpated. Their place is being taken by the reindeer, which is practically a domesticated caribou.

The Alaska moose is the largest member of the deer family in the world, exceeding in size the moose of Eastern North America and the elk of the old world. They are generally distributed throughout the timbered portion, except in the Southeastern coast region, where they are absent. On the Alaska peninsula they range to the limit of timber and in the north and west likewise reach the edge of the tundra. They range above timber line, but most of their time is spent in the woods at moderate elevations, or in river bottoms with ponds and dense growth of willow and alder. The calves are born during May and June and follow the cows until the next spring or later. Beyond doubt they are most abundant on the Kenai peninsula and attain a larger size, but they are also fairly common near Circle City and many less known localities.

FISH LINES.

Up to the middle of the present week the angling fraternity have been baffled by a most unusual rainy season in May. Coast rivers and creeks, mountain streams and their tributaries a week ago were high and muddy and not at all fishable. Safe to say, every angler out last Sunday received a thorough soaking, for it rained heavily on most fishing creeks in this part of the State. Conditions for tomorrow are a bit improved, but roads in many sections are impassable.

The opening days of the Sierra angling season were handicapped in many sections by rainy and stormy weather conditions. Nevertheless, here and there, good catches have been reported. Most of the trout have been taken on baited hooks, some with the spinning spoon, and a fair percentage with fly patterns. A brief resume of doings a fortnight ago of the rodsters may be of some assistance to the angling enthusiasts eager to prospect trout waters when conditions have improved.

First of all ,the Truckee river has the right of line among the mountain anglers. May 1 the river was low and clear during the cold weather spell. W. L. Gerstle and T. C. Kierulff found fly fishing conditions very fair in the river near Union Mills, where the San Francisco Fly Casting Club members enjoy the sport. James Thomson and George Osgood had grand luck on the opening day. Bait fishing, however, is the proper caper along the river near Truckee.

Near Boca good catches were made, according to advices from A. D. Miller to Charley Breidenstein. H. Dorgeloh and A. Wilkinson had several days of extra good luck—limits each time out and a number of trout weighing a pound were landed.

George Roberts, a local enthusiast, who recently fished in the "fresh water lagoon," about forty miles above Eureka, landed a fine catch of both steelhead and cutthroat trout, fish running from eight to fourteen inches. This fishing water is regarded by good anglers as the finest steelhead trout fishing lagoon on the Coast. The resort is about 1½ hours by auto from Eureka, over a good road. Mrs. J. M. Vance, Etta Vance, Fred Houck, Milt Carson, and other Eureka anglers have drawn pleasing trout dividends from the lagoon this season.

It is reported that there are plenty of trout in the creeks of the eastern part of Calaveras county. The opening days were cold and disagreeable, but the sport should be now much improved, particularly in the vicinity of Murphys. Quite a few limits have been caught in the Stanislaus river. Good sized trout up to fourteen inches are said to be fairly plentiful. Bait fishing is the style at present, but the fly lure will be in vogue as soon as the sunshiny days come on.

The early creeks are the San Antone, O'Neils and Caldwell creeks, near Sheep Ranch, Murphys, San Domingo and Peppermint creeks, in the eastern belt. Later, when machines can reach the Big Trees, Avery and Dorrington, the branches of Love creek, Moran creek, San Antone, San Domingo and Little Mokelumne will be the favorite waters.

Feather river reports were most encouraging early in the season. At Big Bar, or Pulga, as the postal authorities know it, Alfred Grunewaldt, W. R. King and other anglers had no trouble in getting daily limits of trout running from eight to fourteen inches in size. Near Belden good fishing was found in Milk, Chambers, Yellow, Mesquite and other creeks. Near Camp Rodgers the river was somewhat high and roilly, but should be in proper shape now. A. P. McEwen was successful in landing a nice catch two weeks ago in the river.

Lagunitas lake has been well patronized by local anglers since May 1. O. Fincke, A. Beach and R. Spahn caught limits of nice sized fish this week. Dave Hearfield, Harold Hearfield, Dr. W. B. Sharp, Dr. Hawk, W. H. Tubbs, Fred Tobelman, Baldo Ivancovich, Charley Breidenstein, Ed Armstrong, Carl Westerfeld, Sam Wells, Swat Terrill and other good fishermen have taken a liberal toll of trout from the lake. The killing fly patterns have been March brown, grizzly king, a black hackle with a thin black, silk body, and a pale olive dun.

Good black bass fishing is reported on the Cosumnes river and the entire forecast for sport with this game fish is an optimistic one.

At the Traps

Trap Shooting Handicaps.—Generally speaking, trap shooting is as purely amateur as any sport in the long category. Yet it is a game of pool with a division of money prizes from those pools. Primarily on account of the very considerable expense attending participation in it, this division of money from pools is winked at by all other governing athletic bodies, and no man loses his amateur standing because he accepts a division of the pools. In this respect it is like the pools of the golf links.

Trap shooting is governed by the Interstate Association for the Encouragement of Trap Shooting, an organization which has it headquarters at Pittsburgh, because its ruling spirit, Elmer E. Shaner, has his residence there. There are kept the records on which the handicaps are based. Those records are as carefully compiled as are those of professional ball players, of amateur golfers, of tennis players, of the performances of harness race horses or thoroughbreds, at the respective headquarters of the governing bodies of each of those sports. On those records are based the handicaps under which men shoot at all the sectional contests, The Interstate and State contests, and the crucial test of all trap shooters, the Grand American Handicap.

There is no sport which is better organized or better conducted, from the point of handicapping, than trap shooting. Averages of all monthly shoots are the basis from which the handicaps are worked out. As the records are officially registered and published annually, a novice with a good head for figures can work out the problem as to whether a given shooter shall fire from scratch or from the 20 yard line, or at any of the intervening points. The rules for handicapping are as inviolable as the laws of the ancient Medes and Persians were said to be. Monthly revision keeps them thoroughly up to date. So keen are the trap shooters to always do their best that it is to their credit that there is almost never a charge of a trap shooter "dropping" at any of the regular shoots in order to get a better figure in a handicap.

* * *

Postponed Shoot.—The Moraga Valley Gun Club shoot billed for May 9 was postponed until Sunday, June 13, by reason of inclement weather. At that about a dozen gun bugs braved the rain and cut loose on the clay birds.

Fred H. Burnham, of Martinez, tied with W. G. Warren, of Tonopah, on a total of 23 out of 25 in the first event shot. Each man scored 24 in the shoot off, Burnham then won the cup with 24 to 23 on the final smokeless powder argument. The other scores were: J. F. Dodds 21, Mrs. Ada Schilling 22, Chas. H. Knight 18, Otto Feudner 21, Harry Overbaugh 19, E. H. Forestier 15, Henry Stelling 21.

J. F. Dodds, of San Jose, scored 25 in the second event and annexed the cup trophy. The other scores were: Burnham 24, Warren 20, Mrs. Schilling 23, Knight 24, Feudner 21, Overbaugh 23, Forestier 20, Stelling 20. The matches were bird handicaps as follows: Burnham 2 birds, Dodds 1, Mrs. Schilling 2, Forestier 5 and 8, Stelling 1.

Had fair weather prevailed there would have been an attendance of eight to ten squads. The three cup trophies are handsome and worth shooting for. The third cup—and other inducements—will no doubt bring out a good attendance next month.

The grounds are most pleasantly situated and the background about all that can be desired. The shooters adjourned to Fred Parrish's residence near by, after the shoot, and were hospitably entertained. A committee of the shooters formulated a testimonial of thanks to Mr. and Mrs. Parrish in appreciation of the pleasing entertainment they enjoyed. "Pop" Merrill and Fred Parrish should receive rousing support at the June shoot for their efforts in creating a new trap shooting resort. Merrill's address is 343 Thirteenth street, Oakland.

* * *

Three Day Fusillade.—The San Jose Blue Rock Club's fifth registered shoot for May 29, 30 and 31 offers a fine program. First and second days—Ten 20 bird races, $2.00 entrance and $10.00 added for each event. Event 11, miss and out, $1.00 entrance. Optional sweeps on each 100 birds, both days, $2.00, divided 40-30-20-10. All events divided Rose system, 5-4-3-2, 4 moneys.

Third day—Four 50 target events, entrance $5, $15 added, in each race. Event 5, miss and out, entrance $1.00. Optional sweeps, $1.00 on each 25 birds—40-30-20-10.

An Interstate trophy will be given to the high gun amateur, also a trophy for high "pro." Two Ford championship medals open for California and Nevada shooters. All moneys and other trophies open to all. The first 100 targets on May 30 open for the lady championship of the Pacific Coast for 1915—solid gold medal to winner, any contestant may shoot for price of targets in this race.

May 31—Event 1, O. N. Ford championship of California, 25 singles (now held by Bob Bungay, Ocean Park, Cal.). Event 2, Interstate trophy event, 50 birds. Event 3, Three man team championship of Pacific Coast. Event 4, O. N. Ford championship of California, 25 pairs. The "Little Joker" is down for the wind-up spell. This shoot should draw a crowd sure.

* * *

Webfoot Tournament.—The Oregon State tournament came off at Portland April 26 and 27, under the auspices of the Portland Gun Club with 58 shooters participating.

L. Rayburn, of Portland, won the Oregon amateur championship with the good score of 98 out of 100. The second trophy was won by Pete O'Brien, 96; third, Frank Van Atta, 95; fourth, A. R. Wilson, 93; fifth, R. L. Spangle, 92, F. Temppleton 92, Charles Leith 92.

F. M. Troeh, of Vancouver, Wash., with 382 out of 400, was high average for the tourney. Jim Seavey, of Eugene, 278, and Frank Van Atta 374.

Hugh E. Poston led the "pros" with 386 out of 400, Les Reid 384 and Frank Riehl 382. The total scores follow:

State Championship, 150 birds—L. Rayburn, 98 out of 100; *H. E. Poston 98, *F. C. Riehl 96, R. H. O'Brien 96, *P. J. Holohan 96, J. A. Dague 96, F. Van Atta 95, F. M. Troeh 94, *L. H. Reid 94, C. E. McKelvey 94, *J. P. Bull 94, A. R. Wilson 93, T. Templeton 92, R. L. Spangle 92, C. Hilgers 92, Chas. Leith 92, *E. B. Morris 92, L. Hargove 92, W. W. Caldwell 91, J. W. Seavey 91, M. Siddall 90, M. Richard 90, C. E. Feller 89, E. E. Young 89, H. F. Wihlon 89, O. D. Thornton 87, E. H. Keller 87, P. P. Nelson 86, Al. Eeguin 86, W. K. France 86, A. Blair 85, W. R. Allin 85, E. A. Bean 84, R. R. DeArmond 84, *C. W. McKean 82, A. W. Strowger 82, H. R. Everding 81, J. A. Addleman 79, Earl R. Goodwin 65, Miss Gladys Reid 63, C. Hargove 60, Mrs. Dolph 54.

Total scores shot, regular program 300 targets: *L. H. Reid 290, *H. E. Poston 288, F. Troeh 288, J. W. Leavey 287, *F. C. Riehl 286, *P. J. Holohan 286, P. P. Nelson 285, F. Van Atta 279, P. H. O'Brien 277, *J. P. Bull 273, L. Rayburn 275, H. Wihlon 273, M. Siddell 272, F. Templeton 272, C. E. McKilsey 271, *E. B. Morris 269, A. Riehl 268, J. A. Dague 268, A. Blair 264, *McKean 262, Chas. Leith 262, M. Rickard 262, Van Annon 261, C. E. Feller 260, *J. E. Reid 260, Con. Hilgers 259, J. A. Troeh 257, F. E. Butler 256, H. H. Veach 254, H. R. Everding 253, E. A. McBean 251, P. R. Alexander 249, E. W. Cooper 247, Ben. Bell, 247, W. G. Bullock 247, W. K. France 239, E. H. Keller 235, Al. Seguire 224, A. W. Strowger 217, E. E. Murphy 216, E. G. Hawman 216, A. G. Magers 196, F. O. Joy 183, J. K. Simpson 162. 195 targets, Gladys Reid 133. 150 targets—A. R. Wilson 137, W. R. Allin 127, E. L. Mathews 126, DeArmond 117, J. M. Donohew 117, L. E. Craswell 117, D. F. Allen 116, W. L. Woodcox 114, M. Rauw 111, M. D. Campbell 111. A. Woelen 69x90, E. E. Young 52x50, C. B. Handy 43x60, Mrs. O'Brien 36x60, Mrs. Keller 10x30.

* * *

Newman Traps.—A practice shoot of the Newman Blue Rock Gun Club was held recently. Among the new beginners was "Bill" Lange, who broke 12 out of 25, not so bad. The scores were: E. R. Dixon, shot at 250, broke 176; F. Stevinson, 250—205; H. Lorenson 150—142, C. C. Huber 150—125, A. Hansen 150—121, S. C. Bell 125—112, C. Stamper 125—105, E. McCormick 100—71, Geo. Brown 75—48, J. R. See 50—37, A. J. Stevinson 50—23, Mrs. McCormick 50—13, W. Lange 25—12, D. Fair 25—9, W. G. Newsome 25—8, S. J. Reed 25—16.

Doubles, 12 pairs—S. C. Bell 20, H. G. Lorenson 18, F. Stevinson 11, C. Stamper 19, Geo. Brown 16.

* * *

Galden Gaters.—The regular local blue rock snuffing out tomorrow will be the Golden Gate Gun Club's shoot at West Alameda station. Weather favoring, about 50 guns should be on the firing line.

Sacramento Bombardiers.—Scatter gun enthusiasts from different points will be in Sacramento Sunday, May 16, to compete with the crack shots of the Big Time Gun Club, which is increasing rapidly in membership and popularity. The club holds a shoot every other Sunday and the wives, sweethearts and friends of the members take a hand at the bang sticks, and several are becoming expert bird shatterers. The membership now totals 117.

Despite adverse weather conditions, an excellent shoot took place May 2. Although the cross winds were making the birds take all kinds of twists, fine scores were made.

In class 1, F. M. Newbert got 24 out of a possible 25. In class 2, M. Priest of Roseville led with 23 out of 25. First place honors went to Fred Ferris in class 3, with a score of 21 out of 25. E. L. Soule, with 19 out of 25, won in the fourth class, and William Dreher was the winner of the fifth class with 12.

E. L. Ilgner, Monte Newbert, H. E. Agbert, Ralph Jost, and W. C. Thielan were awarded DuPont silver spoons as winners in their respective classes at the preceeding shoot. In the double events E. L. Ilgner was first and M. Newbert second; L. Gorman and H. Tharp tied for third.

The new members joining in the last week are M. Silva, A. Lentz, M. Checchetini, W. Ogg, H. Heilbron and F. Cutting.

* * *

Garden City Traps.—The San Jose Blue Rock Club held a regular shoot May 9, and the following scores were shot:

O. N. Ford, 94 out of 100; Dr. Barker 90, C. H. Nash 89, George H. Anderson 88, W. J. McKagney 80. C. Arques 75, John Guilbert 70, W. M. McCarthy 65.

Class A results—Dr. Barker, 287 out of 300; George H. Anderson 282, C. H. Nash 277, Mrs. Ada Schilling 276, R. C. Hogg 256.

Class B—E. W. Jacks, first; W. J. McKagney, second; Fred Schneider, third.

Class C—Clem Arques, first; H. H. Clark, second; John Guilbert, third; Fred Riegel, fourth.

* * *

Southern Handicap—J. I. Chipley, Greenwood, S. C., won the Preliminary Handicap match at Memphis, Tenn., on Wednesday in the Southern Handicap of the Interstate Association, with 92 breaks out of a possible 100. Chipley shot from the 18-yard line. J. I. Austin, Monroe, La., won second place by breaking 19 out of 20 targets in a shoot-off with six other contestants who had scores of 91. I. Andrews, Spartansburg, S. C., who broke 18 in the shoot-off, was third.

Only amateurs competed for trophies. Walter Huff, Macon, Ga., was high professional, with 93.

A. B. Richardson, amateur, Wilmington, Del., made the largest run Wednesday, 58 straight breaks.

* * *

Interstate Association Tournaments—

June 15, 16, 17—The Interstate Association's Tenth Western Handicap Tournament, St. Louis, Mo., under the auspices of the Missouri Athletic Association Gun Club; $1,000 added money. Winner of first place in the Western Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

July 8, 9, 10—The Interstate Association's Tenth Pacific Coast Handicap Tournament, San Diego, Cal., under the auspices of the Pastime Gun Club; $1,000 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

August 16, 17, 18, 19, 20—The Interstate Association's Sixteenth Grand American Handicap Tournament, Chicago, Ill., under the auspices of the Chicago Association of Trap Shooters, $3,500 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

Registered Tournaments—Pacific States and Territories:

May 18, 19—Washington State Tournament, under the auspices of the Seattle Trap Shooters Ass'n, Hugh Fleming, Secretary, Seattle Wash.

May 27, 28—Utah State Tournament, under the auspices of the Utah State Sportsmen's Ass'n, A. R. Bain, Secretary, Salt Lake City.

May 29, 30, 31—San Jose Blue Rock Club, O. N. Ford, Secretary, San Jose.

June 3, 4, 5—Annual Tournament of Rocky Mountain Interstate Sportsmen's Association, under auspices of Mile High Gun Club, Wm. M. Bowman, Secretary, Denver, Colo.

June 7, 8, 9—Sportsmen's Ass'n of the Northwest Tournament, under the auspices of the Portland Gun Club, J. A. Addleman, Secretary, Portland, Ore.

July 1, 2—Vancouver Gun Club, C. A. Porter, Secretary, Vancouver, Can.

July 5—Eureka Blue Rock Club, H. A. Hine, President, Eureka, Cal.

July 5—Sunrise Gun Club, H. S. Hill, Secretary, Sunrise, Wyo.

July 5—Holbrook Gun Club, J. S. Hulet, Secretary, Holbrook, Ariz.

July 9, 10—Gem City Gun Club, Max Weick, Secretary, Laramie, Wyo.

July 10—Chehalis Rod and Gun Club, W. S. Short, Secretary, Chehalis, Wash.

July 12—Rawlins Rod and Gun Club, H. Breitenstein, Secretary, Rawlins, Wyo.

July 12, 13, 14—Los Angeles Gun Club, Fred H. Teeple, Secretary, Venice, Cal.

July 19, 20, 21, 22—Pacific Indians, F. C. Riehl, Secretary, Tacoma, Wash.

July 28, 29—Delta County Gun Club, Nick Powell and R. A. King, Managers, Hotchkiss, Colo.

August 10—Medford Gun Club, Dr. E. R. Seely, President, Medford, Ore.

September 13, 14—Omaha Gun Club, R. D. Vaught, Secretary-Manager, Omaha, Neb.

November 4—Williams Gun Club, F. E. Lowe, Secretary, Williams, Ariz.

November 5, 6, 7—Arizona State Tournament, under the auspices of the Tucson Blue Rock Gun Club, W. A. Julian, President, Tucson, Ariz.

DUPONT'S FIRST ANNUAL BEGINNER'S DAY FOR GUN CLUBS.

The DuPont Powder Company is announcing another shoot of interest to gun clubs and trapshooters generally which should be nearly as successful as the "Fred Gilbert Twentieth Anniversary Celebration" held in March. In every community where there is a gun club there are undoubtedly many men and women who would be glad to embrace the opportunity of joining the club and participating in the "Sport Alluring" if they could only get their courage up to the proper point. The object of the DuPont Powder Company's "First Annual Beginner's Day" is to make it easy for such interested men and women to get initiated into the grand order of trapshooters under the proper auspices.

An announcement of the event will be sent to the secretaries of all gun clubs who will be invited to participate in the shoot, which will be held in August and be nation-wide in its scope. A handsome bronze watch fob will be given each club by the DuPont Company to be used as a prize for the beginners. By "beginners" is meant men and women who have never before shot at clay birds. Under the rules prescribed by the DuPont Company covering the affair, each shooter is required to shoot at but 25 targets on beginner's day.

Unusual popularity for this event is predicted, and a great many club officials will welcome it as a means of reviving interest in their club by securing as members the friends of those who are already affiliated with their organization. The fob will be a reproduction of a photograph of Mr. Jack S. Fanning, pioneer trapshooter and for many years representative of the DuPont Power Company. Mr. Fanning is known throughout the country as one of the "Old Guard" in the trapshooting ranks, and as the most finished shooting instructor in North America. He has long advocated the use of the try-gun generally for the proper fitting of novices with guns, and for years has carried one for this very purpose, and thousands of shooters owe their shooting ability to the attention and skill displayed by Mr. Fanning in their behalf.

Gun club secretaries throughout the country should interest themselves in this great event, and write the DuPont Powder Co., Trapshooting Division, for further particulars.

A WONDERFUL MODEL.

The large acreage covered by the Winchester Repeating Arms Company's plant at New Haven, Conn., is most completely, in every outside detail, shown by a magnificent and artistically constructed model which has attracted the attention of throngs of visitors at the company's display in the Palace of Manufactures in the Panama-Pacific Exposition.

The display of firearms and ammunition is also worthy of close and attentive examination by every devotee of rifle, shotgun or revolver. "Just-Wait-For-Me" is in charge of the exhibit and will be pleased to explain the why and wherefore of everything shown—something every sportsman should not overlook.

NEW RIFLE MATCHES ARRANGED.

A new National Match has been authorized by the National Board for Promotion of Rifle Practice of the War Department, and will be incorporated in the national events of the National Rifle Association of America. The executive committee of the association at its meeting in Washington last week formulated the rules for a national shooting competition for civilian rifle clubs on outdoor ranges, using the service rifle. This match will mean for civilians what the National Matches mean for the military services. The conditions of the match will be the same as the shooting code for civilian clubs. Each club will be represented by a team of ten riflemen and will shoot simultaneously all over the United States during the month of July under the supervision of officers appointed by the N. R. A. The War Department has donated a handsome trophy to represent the club championship and medals will be given the winning team in each class. After the scores are all in, the clubs will be divided according to the scores made in the classes, of 10 or 12 clubs each.

Another new match authorized by the committee was a small bore short range outdoor match. This will be organized as a league and each club will shoot ten matches. The shooting will be done at 100 yards, slow fire, and 50 yards rapid fire. This series of matches will begin the first of June.

The program of the annual matches to be held at Jacksonville, Fla., beginning October 8 was approved. Several important changes were made. In the Leech Cup match the 800 yard stage was abolished and in place of it 1200 yards was substituted, making the match 7 shots at 900, 1000 and 1200 yards. Hereafter any rifle with any kind of sights can be used in the match. The United Service Match team was cut down from 20 to 16 and changes were made in the selection of the team so that it will automatically select itself by counting the scores made by individuals in other matches. It was also decided that 75 per cent of all the moneys received in entrance fees will be returned to the competitors in the form of cash prizes.

A radical change in the method of selecting the winning team in all of the N. R. A. league matches was made, which allows of any team in any of the lower classes winning the championship if they can do so. Heretofore a team could not win higher than first place in the class in which it was listed.

Forty-three civilian rifle clubs, 4 college clubs and 9 school clubs were elected to membership and 5 life members were also elected. The resignations of Lt. Frank S. Berlin as State secretary for Louisiana, and of Maj. Wm. G. Ramsey, State secretary for Delaware, were accepted.

VISITING GUN BUGS WELCOME.

The Remington-UMC exhibit in the Palace of Manufactures, at the Panama-Pacific Exposition, is "a notable showing of modern firearms and ammunition—a revelation alike to sportsmen, sporting goods dealers and the layman." Mr. C. J. Schilling is in charge of the artistic "Red Ball" booth and will make a visit of inspection interesting and pleasing—time well spent.

TRADE NOTES.

Rem-UMC Notes.

Fifty members of the Big Time Club, of Sacramento, turned out on April 18. The four high guns shot Arrow shells. D. J. Ruhstaller and Monte Newbert tied with 23x25, while H. E. Odbert and Geo. Newbert tied for a close third, scoring 22x25.

At Washington, D. C., on May 1, W. C. Blundon broke 98x100; the first 50 straight from 16 yards, the second 48x50 from 19 yards. Joe Hunter broke 97x100, 49x50 from 16 yards, and 48x50 from 20 yards. Both shot Nitro Club shells, while E. W. Ford, shooting a Remington pump gun, broke 86 straight, and scored 99x100.

The Amateur Championship shoot of the New York Athletic Club was held on Travers Island, May 1. Of the 147 who participated, the five high men all shot Remington-UMC ammunition. Mr. G. L. Lyon, shooting a Remington pump gun and Arrow shells, scored 192x200. His score, beside winning for him the championship, also establishes a new record for this event.

Red "W" In the Rain.

Fred Burnham of the Alhambra Gun Club and J. F. Dodds of the Pastime Gun Club each won a cup trophy May 9 at the Moraga Valley shoot—and it was raining some—but that could not dampen the Red "W" get there shells.

Peters Points.

At Grundy Center, Iowa, April 27-28, Mr. H. C. Hirschy won second professional average, 382x400, with Peters shells.

Mr. W. D. Stannard, using Peters "steel where steel belongs" shells, won high professional average at Wolcott, Ind., April 29, score 187x200.

High amateur average at Coles, Ill., May 4, was won by Mr. Geo. Dearing of Shelbyville, Ill., using the "P" brand shells, score 141x150. High general average was won by Mr. H. W. Cadwallader, score 142x150, also with Peters shells.

Mr. C. A. Young, shooting Peters shells, was high professional at Peru, Ind., May 5, 195x200, and on the following day at Logansport was again high, 99x100. At the latter point second general average was won by Mr. W. D. Stannard with Peters shells, 98 x 100.

"T. Bill" Crosby, as he is familiarly known to thousands of trapshooters in all parts of the country and who is now a representative of The Peters Cartridge Company, gave at Moberly, Mo., May 4-5, an impressive demonstration of his ability to break clay targets and of the efficiency of his ammunition. Mr. Crosby was easily high over all contestants with the fine score of 298x300, using Peters Target shells. Mr. Crosby feels that he is going to have, this year, one of the best seasons of his shooting career.

EXPOSITION GROUNDS, SAN FRANCISCO

THE FARM

AIM TO PREVENT RATHER THAN CURE EVIL OF WEEDS.

It has been shown in experiments with corn made by the United States Department of Agriculture that weed eradication is the principal if not the only beneficial result of cultivating this crop after planting. This means that in cultivating the corn crop the implements used should be designed prifarily for accomplishing the destruction of weeds in the easiest and cheapest manner. It seems to indicate further that as weed control becomes more thorough intercultural tillage of growing crops may be accordingly decreased.

Far more important than to kill weeds it to avoid having weeds to kill. In other words, the farmer should aim to prevent rather than to cure the evil. A farm may be made almost free of weeds by strictly observing the following three principles: (1) prevent the weeds from going to seed on the farm; (2) prevent weed seeds being brought to the farm; and (3) in case of perennial weeds, prevent them from making top growth, which will finally starve out the underground parts.

Equally as important as these three principles, however, is the man behind them. Many men make a start to clear their farm of weeds but quit too soon. Often the campaign is stopped when success is in sight, and the weeds soon recover. Clearing a farm of weeds, especially perennials, is no easy task; it requires more than average intelligence and perseverance. If however, one decides on a systematic plan of attack based on these three principles, and sees this plan faithfully through to a finish, he can practically rid his farm of weeds, and this without a great amount of labor and expense.—Rural World.

When you see that mowing machine standing exposed in a corner of the barnyard or of a field, remember that a certain farm machinery manufacturer once said: "If the farmer cared for his machinery as he should, there would be a need for us to manufacture but one machine where we are now putting out two."

THE BEST LINIMENT

OR PAIN KILLER FOR THE HUMAN BODY

Gombault's Caustic Balsam

IT HAS NO EQUAL

For Human Body —It is penetrating, stimulating and healing, and for all Old Sores, Bruises or Wounds, Fel ns Interior Cancers, Boils Corns and Bunions. CAUSTIC BALSAM has no equal as a Liniment.

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

THE HORSEMAN. 538 So. Dearborn St., CHICAGO, ILL.

FOR SALE

RACING AND BREEDING MATERIAL

from the establishment of the late

WENDELIN J. MILLER

of Chico, Cal.

The death of Mr. W. J. Miller causes to be put on the market the choice assortment of Broodmares, Youngsters and Race Winners with which he achieved such signal success in recent years, including

JOHN MALCOLM (2) 2:11½ stake winner, world's champion two-year-old pacing gelding (1913), by Dan Logan 2:07½, dam Susie Miller by Prince Ansel (2) 2:20½, etc. Now four years old and can show as much or more than any pacer in California. Prime for this year's races.

CAPITOLA (2) 2:17¾, (3) 2:14½ stake winner, fastest two-year-old pacing filly of 1912, public trial in 2:06½ as three-year-old, by Dan Logan, dam Lulu Mack by Arthur Wilkes, etc. A great race mare for her class.

BONDALEAN (2) 2:20½ winner of second money in two-year-old division, Breeders' Futurity, 1914, and absolutely the best one in sight for this year's three-year-old pacing stakes. Entered and paid up. Trialed in 2:15 last year. By The Bondsman, dam Katalina 2:11¼ by Tom Smith 2:13¼, etc. As great a youngster as the country affords today.

KATALINA 2:11¼ (dam of Bondalean (2) 2:20½) by Tom Smith 2:13¼, dam Kate Lumry 2:20½ (dam of 5 trotters including Baby Doll 2:10¼, Ella Mac 2:11½, etc.) by Shadeland Onward 2:18¼. Katalina was a stake winner, a great aged trotter, and her first foal is a fast, standard performer. She breeds regularly and will become more famous as a producer than is her dam.

TWO-YEAR-OLD FILLY by All Style 2:10, dam Katalina 2:11¼. Staked, paid up. Good prospect.

BAY FILLY, WEANLING by The Proof (2) 2:29¾, dam Katalina 2:11¼. Nice individual and bred to make a fast mare.

LULU MACK (dam of Capitola (3) 2:14½), by Arthur Wilkes, sire of Maymack 2:04½, etc., dam Lady Merrill by Tilton Almont, sire of the dam of Monte Carlo 2:07¼, etc. Good breeder and a proven producer.

BAY FILLY three years old, sister to Capitola (3) 2:14½, never broken.

FIRST NATIONAL bay colt, two years old, brother to Capitola (3) 2:14½. Staked, paid up. Fine youngster.

John Malcolm and Bondalean are in training at the Woodland Stock Farm, Woodland, Cal., their workout days coming on Wednesdays and Saturdays. You can see them at any time and they show for exactly what they are—two of the best young pacers in the land to race in this and future seasons. Prices and particulars of all kind may be obtained upon application by mail or in person to either of the undersigned.

MRS. W. J. MILLER,
L. B. DANIELS, Chico, Cal.

SAVE-THE-HORSE

(Trade Mark Registered.)

Used by America's Most Famous Reinsmen

Cures the Horse and Himself Too

R. S. Steth, Holliday, Mo., Jan. 4, 1915, writes:

Holliday, Mo., Jan. 4, 1915.

Troy Chemical Co., Binghamton, N. Y.

Dear Sirs:—I want to thank you for what Save-The-Horse did for me. I cured my mare of a bog spavin. I thought that if it would cure a bog it ought to cure a bog on a man, so I gave it a trial. I had a very bad case of Varicose veins. Doctors told me the only help was to wear an elastic stocking; and one said that an operation was the only resort because it would break soon, and there would be a running sore. The veins were as large as a broom handle. I began using it on myself, and after six months, I could not tell which leg was affected. It was a permanent cure, and it has not come back in 9 months. I recommend it to anyone suffering from same.

Respt., R. S. STETH.

HALF BOTTLE CURES THREE YEAR OLD SPAVIN

Oak Ridge, Mo., 2-8-1915.

Troy Chemical Co., Binghamton, N. Y.

Gentlemen:—About six years ago I bought a bottle of Save-The-Horse spavin cure for a spavin about three years old. I had used several kinds of spavin cure, but he continued to get worse until he was practically worthless. I cured that horse with a half bottle of your remedy so he has not been lame since. I have used him for all kinds of work and driving. I was the first in this part of the Co. to use your remedy for spavin. Since then neighbors who have used it with satisfactory results in every case are: Robt. Crites, Oak Ridge, Mo.; Brown Clippard, Oak Ridge, Mo.; Albert Liddy, Oak Ridge, Mo.; Ory Kenison, Oak Ridge, Mo.; P. C. Fulbright, Jackson, Mo.

Yours truly

S. A. SMITH, R. F. D. No. 2.

TWO PERMANENT CURES—IT PAYS

Weston, Texas, 1-27-1915.

Troy Chemical Co., Binghamton, N. Y.

Sirs: I have neglected to write you. Better once than never. I want to praise Save-The-Horse above any liniment I have ever used. I cured my horse of bog spavin; sound and well. It is nearing two years and he has never lamed any yet. Last spring, I bought another bottle for my driving horse which had a bad ringbone; today he is sound and well.

I am, yours truly, E. A. CANDLE.

NOTHING EQUALS IT FOR HOOFS

Clark's Hill, Ind., 2-14-15.

Troy Chemical Co.,
Binghamton, N. Y.

I used Save-The-Horse on a case of Navicular disease; it did the work up right. I had tried everything I could think of, but your remedy did the work.

Yours, LLOYD STINGLEY.

McAllister, Wis., April 28, 1914.

Troy Chemical Co.,
Binghamton, N. Y.

Gentlemen: The mare that was bothered with coffin joint lameness is cured and we thank you for it, because it is Save-The-Horse that cured her. She works every day, and I will recommend it to anybody that has a lame horse.

Very much obliged to you.

Respectfully, ED. PETERSON.

Our 19 years' experience is in the directions with every bottle of Save-The-Horse—tells just HOW to treat every kind of lameness and complication. With this unrivalled remedy the way to accomplish results is made plain and clear for you—NOW—ready to cure your horse—AND THE CURE IS GUARANTEED!

WE ARE THE ORIGINATORS of the Plan of—Treating Horses Under Signed Contract to Return Money if Remedy Fails.

$5 with a binding contract to refund money or cure any case of BONE AND BOG SPAVIN, THOROUGHPIN, RINGBONE (except low), CURB, SPLINT, CAPPED HOCK, WIND PUFF, SHOE BOIL, BROKEN DOWN, INJURED TENDONS AND ALL OTHER LAMENESS. No scar or loss of hair. Horse works as usual.

SAVE-THE-HORSE is sold by Druggists and Dealers Everywhere or sent prepaid by

TROY CHEMICAL CO., Binghamton, N. Y.

Grandly Bred — A Colt Trotter — A Proven Sire

Bon McKinney 51480

Cal. State License, Pure Bred No. 1213.

Three-year-old record 2:24½; trial (3) 2:15, 1:05.

Sire of

Bon Courage (2) 2:12¾ — Bon Bell (3) 2:17¾

Son of BON VOYAGE 2:08 and DAPHNE McKINNEY (dam of Frank N. 2:07¼, etc.), by McKinney 2:11¼; second dam La Moscovita (dam of Bon Guy (3) 2:11¾ and 2 others) by Guy Wilkes 2:15¼; third, fourth and fifth dams also in great brood mare list. Bay horse, in every respect a great individual, with substance, finish, and natural, frictionless trotting action. Very sure foal getter and a steadily rising young sire, his few foals possessing his most excellent qualities to a marked degree. Bon Courage was the only California bred three-year-old to win a heat from Esperanza in 1914.

In the stud, season of 1915, at the Rush & Haile Ranch, Suisun, Cal., season closing August 1st. Fee, $25 with return privilege, payable cash at time of removal of mare. Good pasturage at $2.50 per month. For further particulars address

BEN F. RUSH, Suisun, Cal.

THE PROOF 2, 2:29¾

A. T. R. No. 51956
LICENSED PURE BRED
CERTIFICATE No. 1029

From the family of Bingen 2:06¼, foremost among present day champions of all ages and gaits.

Son of The Exponent 2:11¾ (by Bingen, dam Iva Dee by Onward 2:25¼), sire of 32 performers including The Temptress 2:08½, 6 three-year-olds, 20 two-year-olds and 1 yearling.

First dam Chord 2:27 (dam of 4) by Wilkes Boy 2:24½, sire of 4 and the dams of 11 in 2:10; second dam Sonata (dam of 3) by Dictator 113, sire of 2 and the dams of 7 in 2:10; third dam Cadenza (dam of 2) by King Rene 1278, sire of the dams of 2 in 2:10; fourth dam Virgie Wilkes (dam of 4) by Geo. Wilkes 2:22, sire of the dams of 16 in 2:10.

In the stud, season of 1915, at Pleasanton Driving Park, at $50 the season with return privilege. We have colts in training to show his qualities as a sire. Grandsons of Bingen are siring champions such as Etawah 2:03½, Anna Bradford (3) 2:00¾, etc. Address for all particulars,

KEEFER & SPENCER, Pleasanton, Cal.

Peter The Great

is the world's foremost progenitor of extreme speed; sire of 30 in 2:10, etc.

—HIS SON—

PETER McKLYO 3, 2:12 1-2

Cal. State License Pure Bred 2339

will make the season of 1915 in the training stable of James Thompson at the San Jose Driving Park beginning March 15 and ending July 1.

PETER McKLYO (3) 2:12½, the only California-owned son of Peter the Great of an age permitting stud duty, is out of a great-bred young matron by Jay McGregor 2:07¼—Klyo (2) 2:29½; second dam Miss Spears 2:21¾ (dam of 6 including Shakespeare (3) 2:09¾); third dam Medium's Last (dam of 7 including Trampfast (2) 2:14¼); fourth dam Suzanne (dam of 1 and grandam of 10 including Susie J. 2:06½).

This colt is four years old, having obtained his record last season with a very limited amount of work. He came into my hands perfectly green in February, 1914, and developed speed so fast that I had to take his shoes off and jog him for two months barefooted. Being by Peter the Great, the sire of the century, and, as you will notice, out of a daughter of Jay McGregor, another wonderful family of horses, he is one of the best bred young horses in the world and I can truthfully say he is one of the very best individuals that I ever had the pleasure of looking at. He can trot a quarter in 30 seconds, and I am firmly of the opinion that he will trot a mile this fall in 2:06 or better.

Fee, $75 the season with return privilege. Mares pastured at usual rates and accorded best of care, but no responsibility assumed for accidents or escapes. Service fee and pasture bills must be paid before removal of mares. Address for all particulars

L. H. TODHUNTER, Owner, Sacramento, Cal.

JAMES THOMPSON, San Jose Driving Park, San Jose, Cal.

Derbertha Bells

Licensed Pure Bred, Cert. No. 1172.

NO. 60907 A. T. R. RULE 1.

DERBERTHA BELLS, foaled 1911, stands 15.3, weighs 1200 pounds, and is of magnificent conformation, style, trotting action and color; being a solid dark bay or brown with splendid mane and tail, massive well-formed limbs and feet, beautiful neck and head, fine, well set ear and eye as kindly as a fawn's and as courageous as a lion's. His breeding can only be hinted at here as he traces 20 times to Hambletonian 10—5 through Electioneer, 5 through George Wilkes, 4 through Strathmore and 4 through Abdallah 15 (the big four of the sons of Hambletonian), and twice through his daughters. This breeding is perfectly balanced by 18 crosses to Mamb. Chief 11—5 of these through his greatest son Mamb. Patchen 58 (leading progenitor of the dams of trotting sires), backed up by 2 crosses to Pilot Jr. 12, 4 to Black Hawk 5, 4 to Imp. Trustee and crosses to such other famous broodmare sires as American Star, The Moor, A. W. Richmond, Williamson's Belmont, etc.

I challenge any man to name a stallion with a broodmare inheritance approaching that of Derbertha Bells,—5 crosses to Green Mountain Maid (dam of 9 and Electioneer), 3 to Alma Mater (dam of 8 and 7 sires, including Alcyone and Alcantara), and 1 each to Miss Russell (dam of 7, including Director, Onward and Thorndale), Beautiful Bells (dam of 4 and 5 sires, including Maud S. 2:08¾ and 6 sires, including Nutwood), Dolly (dam of 11, including 4 world's champions and 10 sires) and Minnehaha (dam of 8 and 6 sires). These are pre-eminently the greatest mares of history in point of number of descendants in the standard list, besides 2 crosses to Bertha, the only mare with 2 in 2:04½, 5 in 2:10 and 13 in the list. Counting duplicates this pedigree contains the blood of 20 mares with an average of 9 performers each, and of the 14 mares appearing in the pedigree of two or more 2:10 trotters in 1910 this pedigree contains 8.

His disposition and deportment are in perfect harmony with his superlative breeding and conformation, all that could be desired. I own a yearling filly by him that stamps him as a sire of the first rank, and I invite the most critical inspection both of him and his get. He will be allowed a few choice mares at $25.00 the season with usual return privilege. Tabulated pedigree upon request.

J. W. PENDLETON, Owner,
1601 Seminary Ave., OAKLAND, CAL.

EXPRESSIVE MAC 2:25 1-2

A. T. R. No. 41513 — Licensed Pure Bred, Cert. No. 1041.

Clara Mac 2:04½ Sire of Vera Hal 2:05

Only stallion in California to sire a new 2:05 performer in 1914, and one of three stallions in U. S. to sire two new ones in 2:05 that season.

Also sire of Madam Mac (4) 2:10¼, trial 2:07; Eddy Mac (3) 2:29½, trial 2:13; Nellie Mac, trial 2:18 trotting, good for 2:10 this year, and numerous others with fast trials. In four show classes at Fresno his colts won three firsts, one second.

Son of McKINNEY 2:11¼ and the great brood mare EXPRESSIVE 2:12½ by ELECTIONEER 125. Ideal in color, size and conformation—seal brown, height 16½ hands, weight 1275 pounds. Permanently in the stud at my ranch three miles south of Selma, at $25 the season, usual return privilege, or $35 to insure. Good pasture for mares at $2 per month and best of care given. No responsibility assumed for accidents or escapes. Address for all particulars

J. H. NELSON, Selma, Cal.

CONDITIONS

Enter any time. Records after entry no bar. Ten to enter, six to start. Entries close June 1, 1915.

3% to enter. 7% from first money winners; 6% from second; 5% from third; 4% from fourth. Full 3% of purse must be paid at time of entry. No entry will be accepted without this payment.

One horse may enter two classes and be held for but one entry fee, unless two starts are made. Entry fee must be for the larger purse. Two horses may enter one class for one entry fee unless both start, in which case an additional entry fee must be paid.

Three heats. Combination plan.

In $2,000 purses, $600 to each heat, extra purse $200.
In 1,500 purses, 450 to each heat, extra purse 150.
In 1,000 purses, 300 to each heat, extra purse 100.

Money divided 50, 25, 15 and 10% at the end of each heat. The extra purse goes to the horse standing best in the summary at the end of the race. Should two or more horses be winners of an equal number of heats at the completion of the three heats, such horses only to start in the fourth heat for the EXTRA PURSE, the whole of which shall go to the winner of that heat.

A horse distancing the field or any part thereof shall be entitled to one money only. A distanced horse in any heat will be entitled to money already won. There will be no more moneys than there are starters.

In determining the eligibility of horses to compete, only records made by winners of races shall be considered. Records made against time or by non-winners not considered. Rules of The American Trotting Association, of which we are members, shall govern all races.

The right is reserved to declare off any race that does not fill satisfactorily or change program, if necessary. In case class in which horse is entered does not fill satisfactorily, entry will be transferred to another class in which horse is eligible, subject to the approval of the owner.

Any race not finished on the last day of the meeting may be declared ended and the money divided according to the summary.

No stall rent will be charged.

UNLESS DECLARED OUT BEFORE 5 O'CLOCK P. M. THE DAY BEFORE THE RACE EVERY HORSE ENTERED WILL BE CONSIDERED A STARTER AND WILL BE HELD AS SUCH.

Entry blanks may be secured from The Breeder and Sportsman office..

INFLAMED, BOWED TENDONS

are quickly cooled, soothed and strengthened with ABSORBINE. It is powerfully penetrating and efficient, but does not blister or cause any inconvenience, and horse can be used.

ABSORBINE

is used by successful trainers, in developing fast, high-class race horses, getting them to the races fit and ready and keeping them sound and strong throughout the season. They require a dependable, efficient liniment—one that does its work well, in a mild soothing manner, and which, when used as a leg brace or wash, will stop inflammation and keep out the soreness from the strained, fatigued muscles, so that there will be no stiffness or "tying up" after a hard work-out or race.

ABSORBINE, used full strength when needed, and diluted for a wash or brace, helps the horse stay strong and win a race that otherwise might have been lost.

ABSORBINE reduces bog spavins, thoroughpins, wind puffs, shoe boils and similar swellings and soft bunches; allays pain and inflammation; stops lameness quickly.

SEND FOR FREE HORSE BOOK G

ABSORBINE, $2.00 a Bottle at Druggists or postpaid.

W. F. YOUNG, P. D. F., 54 Temple St., Springfield, Mass.

NEW EDITION OF JOHN SPLAN'S BOOK **"LIFE WITH THE TROTTER"** PRICE $3.00 POSTPAID

"Life With the Trotter" gives us a clear insight into the ways and means to be adopted to increase pace, and preserve it when obtained. This work is replete with interest, and should be read by all sections of society, as it inculcates the doctrines of kindness to the horse from start to finish."

VICTORIES OF PARAMOUNT PARKER GUNS 1915

Look, Read, Remember!!!

At the Pinehurst Mid-Winter Handicap Shoot the four contestants making the highest scores in the preliminary event all shot Parker Guns.

RATHER STARTLING, ISN'T IT?

In the main event, the PINEHURST HANDICAP, Mr. S. A. Huntley, although placed further back than any other contestant, scored

95 out of 100 Targets at 23 Yards

and landed the Trophy. Furthermore Mr. Huntley was high over all for the entire tournament. and as usual shot his 34-inch barrel PARKER GUN.

In 1914 Parker Guns won **The Grand American Handicap, The National Championship** at single and double targets, the

FIRST and SECOND YEARLY AVERAGES

and made the best scores on the Pacific Coast.

Follow the pace set by the champions of America and for either single or double target shooting use

Long Tom Parker Guns

For game shooting afield, enhance the pleasure of the day's sport and improve your skill by shooting a small gauge PARKER GUN, pioneer makers of small bores in America. Instructive booklet on small bore guns sent free on request.

For further particulars regarding guns from 8 to 28 gauge, address,

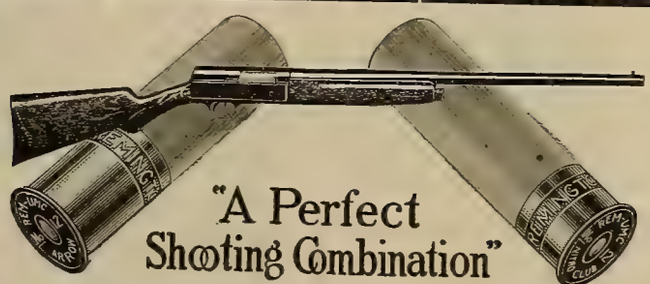
WINCHESTER

"LEADER" AND "REPEATER" FACTORY LOADED SHELLS

Shells may come and shells may go, but Winchester "Leader" and "Repeater" shells go on forever. This is because there's a steady demand for them. This steady demand has its basis in the shells themselves. In other words, "they satisfy." That's all there is to it, except their wide distribution, which has come about for the same reason, that is, "they satisfy." It's worth repeating. It's always safest to buy standard goods, like Winchester "Leader" and "Repeater" shells, and their large sale proves the majority of shooters do this. If you are not doing it, this thought is worth pondering over. Dealers everywhere sell Winchester shells.

WINCHESTER SHELLS ARE OF PROVEN WORTH AND STABILITY

REMINGTON UMC



THE GUN

FIRES five shots—you simply pull the trigger for each shot. Action always sure. Recoil reloads for you. A simple gun to shoot—and simple to take down. Has three positive safety devices making accidental discharge impossible.

Hammerless—Solid Breech—Safe

Send for a complete description of the "Autoloader that works."

Next time you go out, try a *Remington-UMC* "*Perfect Shooting Combination.*"

"A Perfect Shooting Combination"

At the Traps :: In the Field :: And for Ducks —A *Remington-UMC* Autoloading Shotgun and Either Arrow or Nitro Club STEEL LINED Shells.

REMINGTON UMC

THE SHELLS

IT was at a big trap event in Ohio about a month after the Arrow and Nitro Club steel lined shells first came out that a happy sportsman nicknamed them the "Speed Shells"—the name stuck and spread from coast to coast. The *Remington-UMC* Steel Lining is one of those simple but fundamental discoveries that come along now and then and revolutionize standards all along the line. The speed shells eliminate the guess work—you take a shorter lead and get to the mark faster. You can buy them everywhere.

Famous Spokane Derby and World's Championship Relay Races will be given this year. Write for particulars. Special folder concerning running races sent on application.

Due principally to the fact that Walla Walla has the same dates as our Fair, only four days harness and running races will be put on, same to commence Wednesday, September 15th. This arrangement will make it possible for those who might be at Walla Walla to make entries for our races also. Our program will be so arranged that races held at Walla Walla on Monday will be given by us on Thursday, and so on.

The Walla Walla Fair Association together with this Association will do everything possible to arrange for cars and service on the part of the railroad companies, so there will be no delay in getting horses to Spokane in plenty of time.

CONDITIONS

The closing date is stated in each schedule or in each event. Early events close June 1, when 1 per cent is payable and horse must be named; 1 per cent on July 1, and 1 per cent August 1. Deduction of 7 per cent from money winners. In early closing events fifteen entries will be required. Entrymen may declare out at any time, but must be paid up to date of declaration, and must declare out in writing.

Late events close fourteen days before the opening of each fair unless otherwise stated. Five per cent to enter with five per cent from money winners. Not less than seven entries required and five starters in each event.

Races designated as the "three heat plan" or "every-heat-a-race" end with the third heat and each heat is a race. Ten per cent of the whole purse or stake is held out to be divided 75 per cent to first horse which takes the record or mark, and 25 per cent to the second horse, according to summary of the three heats. The standing of the horses will be determined under "the old placing system." Thirty per cent of the whole purse is placed on each heat to be divided 50, 25, 15 and 10 per cent. Horses draw for position in each heat of the "three-heat-plan." If at the end of the three heats two horses are tied for the first money of the summary, they may be sent for a decisive heat, the two horses only participating, only winner getting record.

Two-year-old and three-year-old events are for colts bred and owned in Oregon, Washington, Idaho, Montana, Utah or British Columbia; two in three heats; no colt race longer than three heats.

Send all entries to the Secretary of the Fair and not to the Circuit Secretary.

A stake book is issued containing more details as to conditions, etc., to be had from any Secretary or at the office of this paper.

NOTICE: Each track has a programme of Running Races, Special Features, Relay and Novelty Races—ask for it.

Dates have been assigned to the following tracks; programmes to be announced later.

L. C. Kinney of Bushnell, Neb., who wishes a substitute pacer for the 2:06 stake here in June, may be most quickly reached by addressing him at 2050 Grape Street, Denver, Colo., or care of this office.

◈◈◈

Woodland's one day meeting was held today and the horsemen there who have entries at the June meeting will ship down to the exposition track about the middle of the coming week.

◈◈◈

Walter Tryon arrived at the exposition track Wednesday with S. H. Cowell's top matinee pacer, George Woodward 2:07½. George already has one scalp hanging to his belt for this season and never appeared to be in better racing trim.

◈◈◈

Some weeks ago the dates for the Fresno District Fair were furnished to us as October 5 to 9 and so appeared in these columns, but a note from President J. E. Dickinson a day or so ago corrects them—September 28 to October 2 being the proper schedule, thus avoiding conflict with the fairs farther south.

◈◈◈

Bakersfield horsemen pulled off a card of six events last Sunday, five of them for the runners and one a free-for-all mixed trot and pace, the latter event being won by Dolly Varden, Conbrino second and Madge Diablo third, four heats being necessary for a decision.

◈◈◈

Joe McGuire has set a custom at the exposition that other trainers could well afford to adopt, that of having a printed card tacked on the upper door of every stall, setting forth the identity of the equine occupant. The public appreciate the information, as they know then what they are looking at without resort to a long string of questions being put to a busy man.

◈◈◈

J. Elmo Montgomery, Frank Wright, Will Ivey, F. J. Ruhstaller, H. S. Hogoboom, Dr. E. J. Weldon and Superintendent Harry Dowling are among the teamsters taking part in the activities at the Woodland record meeting today. Quite a number of youngsters are being run through the mill, and the free-for-all pacers probably sizzled along right around 2:07.

◈◈◈

The Enterpriser, a yearling bay colt by The Exponent 2:11¾, sire of Keefer & Spencer's fast young trotter, The Proof, that worked the Pleasanton course recently in 2:08½, topped the Chicago sale at $950. Alarich 2:09 went to R. M. Lawton of Minneapolis at $300, Johnny Dugan to John Bangert of Chicago at $200, while Nelly Mc topped the Durfee consignment at $410, being purchased by H. S. Denny of Ligonier, Pa. The new owners will find it no hard task to win 'em out at these figures.

◈◈◈

Nellie Mac, Harry Nelson's Expressive Mac trotter in the stable of Charley Clark at Fresno, is working better than 2:15 at present and is up to a mile in 2:12, both her owner and trainer having every confidence that she is going to make good by developing into better than a 2:10 trotter. She gets the thoroughbred cross not far removed on both sides, as her dam is by Altimont, grandam by Alexander Patchen, third dam a thoroughbred, while on the sire's side she traces through Expressive to the great thoroughbred matron Esther by Express.

The matinee season opens tomorrow at the exposition track with a good card.

◈◈◈

We are advised by Secretary Richardson of the Western Canada Fair and Racing Association that the entries to the harness races at Regina, originally advertised to close April 23, will not close until tomorrow, May 23. First payment is three per cent, two per cent further being due June 23. J. C. Currie is the secretary and the events are $500 purses for 2:25, 2:20 and 2:15 trotters and 2:20, 2:15 and 2:10 pacers.

◈◈◈

W. T. Stevens, one of the most prominent export merchants of New York City, has recently purchased the business of the Miller Cart Company at Goshen and will place his brother, A. A. Stevens, in charge and continue its operations along the customary lines. Mr. Stevens has a wide acquaintance all around the world, and when conditions assume a normal aspect expects to develop a good export business with the countries in which the trotter has a hold.

◈◈◈

Will Durfee has been the busiest man at the exposition since his arrival, and has had good rides behind all the members of his stable with the exception of a couple who contracted a bit of cold in shipping. Here are some of his rides so far: White Sox 2:07, Esperanza 2:10¼, Virginia Barnette 2:11½, Contention B. 2:12 with a quarter in :29¼, The Lark 2:14 with a half in 1:05¼, Rags 2:15, Miss Quealy 2:20, Byron (3) 2:16½, Carl (3) 2:18¼, Carlschen (3) 2:19 with a quarter in :31½, Miss Rico (2) and Carleta (2) in 2:27, Rico (2) 2:23½ with a quarter in :31¾ to cart, and Nicola B. (3) 2:16¼.

◈◈◈

Alhambra Prince, the great young show horse owned and exhibited by Charles W. Winter of Alhambra added new laurels to his fame recently by being awarded first prize of $50 in the Los Angeles La Fiesta Flower Parade. The turnout was most elaborate, over a thousand white and Cecile Brunner roses being used in the decoration of the vehicle and trappings, the combination forming a most pleasing sight. This is the fourth first for the son of Redlac in just a few days over a year—at the Pasadena Horse Show April 2, 1914, the Alhambra Parade July 11, 1914, the Pasadena Tournament of Roses January 1, 1915, and the La Fiesta Parade May 3, 1915. The Prince will be among the attractions at the fall shows at the exposition.

◈◈◈

Vallejo King 2:10½, the trotter owned by Mr. Thomas Smith of Vallejo and a "regular member" of the training stable of Sutherland & Chadbourne at Pleasanton, was emasculated last week as a precautionary measure against someone being seriously injured. Last season he worked on his caretaker in a manner that cost his owner and trainer some money, and a few days ago made a vicious and unlooked for attack upon Mr. Sutherland, good fortune alone saving that gentleman from being badly hurt. The operation will prevent the King from filling his engagements at the June meeting at the exposition, but he is much more extensively entered in November and ought to be a sufficiently improved horse to earn enough more to offset his lost entrance money.

◈◈◈

Captain E. T. Barnette of Los Angeles has been among the "fence riders" at the exposition track several mornings of late and has derived a great deal of satisfaction from the performance of Virginia Barnette (3) 2:08¼, whom he bred, and from the signs of speed shown by the get of his other great Moko trotter, Manrico (3) 2:07¼. The Captain is also watching other members of the Durfee stable with much personal interest, especially White Sox, as he was one of the first to advance the theory that the daughter of Del Coronado and Subito would make a fast pacer, her performance last season and to date this spring proving the soundness of his contention most emphatically. Her mile Wednesday morning in seven, after a break in the first quarter, stamps her as both ready and dangerous and the pacers who outfoot her in the 2:06 class are going to have to travel some.

◈◈◈

One of the nicest bred fillies of this year's crop in Oregon is owned by T. L. Davidson, Jr., of Salem, the young lady being a daughter of Excellency 49288 and Addiola Mack by McKinney 2:11¼, grandam Viola J. Cameron by Direct 2:05½, third dam Addie S. (dam of one and grandam of two) by Steinway (3) 2:25¾. Addiola Mack has already given some indication of her qualities by producing Bonniola, one of the best youngsters bred in Oregon, a winner as a two-year-old for Al McDonald, for whom she trotted in 2:25¼ over a two lap track, and as a three-year-old for Henry Helman, in whose stable she now is. She has a three-year-old record of 2:22 and was right up second in 2:16¼, Henry regarding her very highly indeed. Good blood is not lacking on the parental side either, Excellency, a young horse owned by J. B. Stetson, being a full brother to Exton (4) 2:10¾—by Expedition 2:15¾, a speed sire who carried the blood of both Electioneer and Maude S. 2:08¾, dam Lady Howth by Sternberg 2:15¼, grandam Stella F. (dam of four) by Wilkes Boy 2:24½, third dam Mary Force (dam of two) by Happy Medium 400.

MATINEE AT THE P.-P. I. E. TRACK TOMORROW.

Last week's bad weather caused the postponement of the opening matinee of the San Francisco-California Driving Club, but the horses had a bit more work this week and the club's initial event of the season of 1915 will be held tomorrow afternoon at the P.-P. I. E. racetrack, beginning at one o'clock. The matinee horses have taken up quarters at the exposition stables in large numbers during the last several days, and while there are a good many more that will race later in the season, enough were entered for the opening day's races to insure some spirited contests.

"As per usual," the classification committee had its work cut out for it, and to have pleased most participants a program of events including an individual class for every horse would have been necessary, but after considerable sweating the following six races were carded:

First Race, 2:30 Trot—Jonesie Mac, D. E. Hoffman; G. M. S., D. E. Hoffman; Darby Mac, J. W. McTigue; Valeen M., E. M. Doyle.

Second Race, 2:15 Pace—Mabel Dillon, B. Cohen; Hamburg Belle, J. Ginocchio; Delilah, J. Welch; Bradmont, G. J. Giannini.

Third Race, Free-for-all Pace—Vera Hal, H. Cohen; Teddy Bear, Chas. Silva; Potrero Boy, Chas. Silva; Dick W., A. Ottinger; Zulu Belle, A. Ottinger; George Woodward, S. H. Cowell. The entries of George Woodward and Dick W. were made originally on the supposition that the pair would stage a match race, and it is hoped that the committee will yet arrange for this event, as it would attract considerable interest and form a good feature for the opening day, while still leaving plenty of horses in the free-for-all to make a good race.

Fourth Race, Free-for-all Trot—Columbia T., Chas. Silva; Future Tramp, T. D. Sexton; Muggins, H. Cohen; Agnes Carter, A. Ottinger; Ateka, Boyle & Cohen; Eloise Dell, Chas. Silva; Birdeye, A. Combatalade; Graham Bellini, G. J. Giannini; St. Patrick, J. J. Ryan.

Fifth Race, 2:20 Pace—Emma M., Wm. Malough; Jack, McDonnell & Conlon; King Pointer, H. Campodonico; Zorankin, Boyle & Co.; Wm. Tell, R. Roberts.

Sixth Race, 2:25 Pace—J. V., J. Vermont; Marie Fitzsimmons, J. W. Swank; Marin, J. T. Kane; Golden Buck, W. G. Walkup; Bessie Barnato, D. E. Hoffman.

In addition to the above, arrangements have also been made with Millard Sanders for an exhibition by the guideless pacer, Barney Oldfield, alias Jimmy Ray of Stockton. Millard has made this lad into a right good performer after his own peculiar way, as he has gone the route over the Pleasanton track in 2:15, with halves at a 2:10 gait, and his appearance at the exposition track should create quite a pleasant sensation.

More cups having been donated than there were races arranged for, the names of the donors were placed in a hat and seven drawn, the trophies to be awarded the winners in tomorrow's races being the gifts of Messrs. John P. McLaughlin, T. D. Sexton, W. H. Clawson, Jack Welch, Al Hoffman, S. Christenson and Harold Cohen. The remaining trophies will be raced for at a future date; minor awards were provided for second horses, and Joe McTigue presented a set of sulky whips to be parceled out among teamsters whose horses ranked third in the summary.

"Dick" Dwyer, well known among horsemen both on the coast and in other sections where the light harness horse is popular, has been designated as the starter for the club's events, the other officials for Sunday being as follows: Judges, J. A. McKerron, Jack Holland, T. D. Sexton; Timers, Fred Lauterwasser, E. T. Ayres, Joe Kidd; Marshal, Dr. I. B. Dalziel.

The first race will be called promptly at one o'clock and a good attendance is expected, as matinee racing has long been among the city's most popular Sunday afternoon diversions. A two-bit piece carries all the grandstand rights save boxes, a number of the latter having already been reserved.

TRANS-BAY FUN DRIVERS MEET.

The Oakland Stadium Riding and Driving Club held an enthusiastic meeting last Friday evening, the occasion principally being for the purpose of adopting a new set of by-laws and the election of officers. Asa V. Mendenhall and Charles W. Shaw were unanimously re-elected president and secretary respectively. G. C. Schreiber was elected vice-president. Isadore Arth was elected treasurer and Charles Miller sergeant-at-arms. The Governing Board of the club is as follows: T. W. LeBallister, Dr. Geo. Donnelly, T. Sexton, Fred Wooescher, O. G. Newhall, and the president and secretary. The Financial Committee are William Rutherford, A. Engstrom and A. L. Anhambeauh.

Within a few weeks the club expects to afford the public a great deal of amusement and pleasure in the way of outdoor sports, on the new stadium.

The next meeting of the club will take place Wednesday night, May 26, at its club rooms.

Ed Anderson of Portland and Joe Carson of Winnipeg blew in at Pleasanton on the wings of one of the recent gales and were at once admitted into full membership in the local chapter of the clockers' union.

JOE PATCHEN II 2:03¼

MAYMACK 2:04½

THE GREAT PAIR OF FREE-FOR-ALLERS IN THE MACKENZIE STABLE

"Speed Bugs" Infest the Pleasanton Colony

Only two short weeks from today Starter O. P. Updegraff will ring the bell at the new track down by the Golden Gate and Marshal Dalziel and his assistant, Officer Merchant of the municipal police, will rout out the horses for the first heat of the 2:30 trot—and anyone who wishes to bet that the first heat of the slowest race of the meeting, by classification, is not trotted in 2:10 or better, given a good day on track and weather conditions, can get accommodated. There have been all sorts of wails about "not being ready" on account of the weather of the last several weeks, but with green trotters working way below ten, and green pacers going still faster, it rather looks like there would be plenty of "readiness" displayed when the races are called. Work over all the California tracks for the two weeks just closed has been of the "sparkling" variety, and that poor old ten figure has been battered up in an awful shape.

Pleasanton, in spite of the competition afforded by the recent arrivals at the exposition track and by the home guards yet holding down quarters at such training centers as San Jose, Woodland, Fresno and Los Angeles, continues to occupy the limelight up to this writing, though a number of her horses have come down to the bay since my trip there last Saturday, and more will arrive in the next week. Indeed, by next Saturday night almost all the trainers will have their stake candidates housed in the exposition stables.

Perched on the fence at the MacKenzie plant, there was just one old "song" that kept running through my head that seemed to cover the situation, the drone of the roulette dealer that ran something like

"Round she goes an' round she goes
An' where she stops nobody knows
But the Lord—
An' he don't care a whoop!"

Like many old songs, its popularity has waned and there may be those of a younger generation who have never listened to its measured cadences, but there was a time back in the days of old, the days of gold, the early days of the Forty-Nine Camp on the Zone when she was as popular as any modern ditty. You remember how it was? You put your money on a number from double ought to thirty-six and then the handsome (?) cuss in the pink shirt with the big rocks in his cuffs spun a little ball and when the ball fell in a certain slot—yes! we knew all along you remembered it, Mabel. That's the way up there in the Livermore valley. Round they go and round they go, and where they're going to stop you'll find out when they get there, but if the Pleasanton track was conducted on the roulette order there would have been only six numbers worth playing last week, seven, eight, nine, ten, eleven, twelve. A consistent play on those numbers at regular wheel odds would have run a shoestring into a stake big enough to choke a steer.

Just where the honor of the "best mile" lies is something that is just a little too much for me to say—there are so blamed many best ones, and so very many things to consider. A fast mile by any young horse is a wonderful thing, but how about the fast miles of horses that have been at some time or another "on the pot" so emphatically that they were practically given up? How about the fast miles of the old campaigners who have outlasted the ordinary run of horseflesh for season after season and still are "there" with brilliant performances? Like the whiskies you get in Woodland and other dry towns, they are all so good that there's really no distinguishing any among them as best. Every workout day—which means about every day—the grandstand at Pleasanton assumes a "racing season" air by reason of the numbers of members of both sexes who turn out to watch the workouts, and it's a dull day indeed when the clocks fail to register a number of miles from seven to eleven. However, such days are as rare as the thirtieth of February just now, and every once in a while someone springs a "real mile" that starts the birds to twittering like a sewing circle the next day after the suit for divorce is filed.

Peter McCormick's 2:08½ mile some days ago was the first real jolt administered to the clockers' union, but they have suffered others equally as severe since that time, one of the next ones being the performance of the six-year-old stallion The Proof, some days prior to my last visit. This boy was a fast two-year-old and was given a standard record at that age but was a disappointment here in California owing to trouble with his feet. Up at Woodland last year Dan O'Keefe got onto the combination of his ailment, however, and straightened him out so that late in the season he progressed to a mile right around 2:12. When Keefer & Spencer came to Pleasanton with their string, Bates Parker proceeded to let himself in for a lot of kidding by predicting that The Proof would trot in 2:08 by June, but now the kidding is the other way about, as the boy worked for Charley Spencer in 2:08½, coming back in 2:13¼ and 2:12¼. So far as I am aware this is about the fastest mile ever trotted at Pleasanton by a green horse. Bonnie Ansel, the stable's candidate for the 2:10 trot, is also working fast and is liable to drop under ten at any day—probably has done so before this appears—as she has worked three heats in 2:10¼ to 2:11, with a half in 1:01¾. She is not the handsomest thing in the world but she certainly can trot, which, in modern breeding operations, is the "consummation devoutly to be hoped for." The Expense, the two-year-old trotter by The Proof, is working around 2:26 with halves in 1:10 and doing it very nicely, while the green pacer Mona Ansel has gone the route in 2:16 with a half in 1:03.

One of Saturday's sparkling performances—in fact the best one for the day among the trotters—was pulled off by Will DeRyder behind the Baron McKinney—Helen Simmons gelding Spriggan, purchased at the December sale by George Lowery for V. K. Dunne of this city for seven hundred dollars. The previous week this lad had gone the route in 2:10¼, and he had made himself a lot of friends by his general demeanor. Saturday, after a good warming up, Will worked him in 2:12½, with the last half at a 2:05 clip in company with the pacers Zomblack and Strathtell, and then tramped a merry mile in 2:08½, "tying up" with the McCormick horse and The Proof for the season's record. Then, just to show what a perfect little gentleman he is, he worked an easy mile, without the least worry from restraint, in 2:25 in company with a colt, and then took a laying away heat in 2:12. He has all the "earmarks" of a high class trotter and the bunch is wishing Will the best of luck with him. Dicto, the unmarked pacer in the same stable, worked in 2:08½ and repeated in 2:08 some days ago, and Asa Pointer has gone the route in ten flat, with the last half in 1:02, so that Will looks to have an even break for some of the money next month.

LIZZIE DILLON (3) 2:15½
Whose mile in 2:07¼ Saturday made the railbirds twit-twit-twitter.

San Felipe, after a couple of disappointing experiences down east, is getting back into his old time form, much to the gratification of his owner and his former and present trainers—Messrs. Wm. T. Sesnon, C. L. DeRyder and C. A. Durfee, respectively. Evidently what the big Zombro gelding most craved was a permanent return to his native climate; down east he was hopeless, out here he has done everything asked of him, and a few days ago Mr. Durfee buckled into him for a nice mile in 2:09½, 1:03, :30, so that it looks like he would fill his stake engagements in the big trots at the exposition and have a chance to grab entrance money or more in spite of the hot company he is in. Twinkling Dan has not yet been let down faster than 2:15 but is standing up nicely, while Horseshoe Boy, the big Oakland matinee horse, has been only in 2:26, 1:10, :33. He has previously been given as untraced, but recent advices show him to be a son of Del Coronado 2:09½, whose services are beginning to be much more valued now that they are not accessible. Charley also has in his stable Tim Sexton's trotter Future Tramp, but the "hobo hoss" developed a bit of trouble behind in his May Day races and is enjoying a let-up at present.

And now comes a "miracle mile" that is respectfully submitted to the attention of one of our esteemed far eastern contemporaries who, judging from the price the lad sold for in December, took a flash at the statement that he was led into the ring all gone to pieces, or a total wreck, or words to that effect. The bird in question is the yearling champ, Frank Perry, who, having gone through about all the ills and mishaps that horseflesh is heir to, now threatens to become a "real hoss" and upset all the dope. He has had "troubles in front and troubles behind, internal disorders and disease of the mind" but unless some new affliction besets him he is going to worry somebody besides his owners in some of his races next month. Bert Webster has been careful with him but has given him plenty of work, figuring that he couldn't stand racing if he couldn't stand training, and last week set him down to what was at the time the track record for the season, with a fourth heat in 2:10½ and fifth one in 2:07¼. He came out of it as good as before he went into it, and may yet fill his engagement in the 2:06 pace, in which he is one of the original entries. Bert's candidate for the three-year-old pace, Rodney Patchen, has gone the rout in 2:25 with a repeat in 2:22, and his other stuff, with no early engagements, is all working nicely.

Charley DeRyder hung up the season record Saturday morning with the old warrier that our friend Deacon Partridge (who referred in his sermon to a verse in the "one-eyed chapter of the two-eyed John") would doubtless characterize as "Joe Patchen the two-eyed." Joe has had a number of trips in and around ten, and after a few fair warming up miles Saturday Charley camped on his hocks for a mile in 2:07, a clip that he negotiates very easily indeed. It isn't a case of how fast the cunning old scamp can go but of how fast he will go, but he and his boss are getting along better right along. Joe must be the identical lad that the poet had in mind when he pulled that one about "in the spring a young man's fancy lightly turns to thoughts of love," but if Charley succeeds in getting him to a point where he will turn his thoughts to racing a few heats with equal wholeheartedness he will gather another brace of brackets no matter how fast they step. Mahomet Watts has not yet beaten ten, as the weather interfered on some of his regular days, but he is up to a hard race and can surely mock a real trotter.

aymack beats ten like going down the road, her st effort so far being in 2:08, and Madam Mac is so on the two-minute side of the charmed circle id working mighty well. Miss Perfection, the able's main dependence for the stakes, missed a w workouts owing to some trouble with her front et but was out Saturday morning, chipper as could e and ready to run away trotting. Rumor had it at she was "on the heap" indefinitely, but she may et be ready for her engagements. Zomblack, the onverted pacer, is still standing up fine at the new ay of going and continues to promise to make a ery fast horse at that gait. He was the first mem- er of the stable to work in ten and came out of that ork some weeks ago in the very best shape. He as had a lot of healthy work in the same neighbor- ood and some a bit faster, so that he is pretty well rtified to go up against fast company.

Railey Macey hasn't dropped anything into the ten st as yet, but is crowding that figure very close ith Princess Patch, who will probably take the ntry of Dazzle Patch in the 2:06 pace, having gone he route with her in 2:11, 1:03, :30. Electric Patch nd Jean Arion, the furthest developed of the trot- ing brigade, have worked in 2:14 and 2:13 respec- ively, with halves in 1:04 and quarters in :31. Mary . Patch has made the circuit in 2:16, Power Patch n 2:15, Buzz Patch in 2:14, with a half in 1:05 and uarter in :31, and Agnes Patch and Drift Patch ave "paired" in 2:17, 1:06. Judith Patch, the baby f the stable, hasn't been asked for a fast mile as et, but has traveled halves in 1:10 and quarters in 32. The weather has retarded their training some- what, but they will summer here and have lots of ime to make up at the fall meeting any shortcom- ngs that may appear at the earlier session.

Will Fleming has The Beaver ready to let down ny day, as he has had a number of miles around :12 and is taking his work like a high class horse. Alberta Dillon is coming along, with work so far in :18, and Seneca Boy and Tropic Dawn have done a rother and sister act in 2:15. Grattan Boy is show- ng all the signs of a horse that will be ready, and Barney Barnes is running with the fast bunch. He was content to ride around twelve or fifteen the last time I was out with the local railbirds, but stated that his pair "had it with 'em" whenever called on to deliver, a statement that he proceeded to make good last week. Strathtell, the rugged little bay horse, has done ten nicely in company, and the big black fellow, College Gent, has gone the route in 2:07½ mighty handily. The exposition accommoda- tions for the Gent were substantially increased by the opening of a 2:07 class in place of the unfilled 2:08 pace, and Barney is headed for it full tilt. Nobody knows the black fellow's full capacity, but Barney has the satisfaction of knowing that while he may just naturally be outfooted, he won't be out- gamed or out-mannered.

Frank Childs has also had a ride "in the list," O. U. C. going to the three-quarters Saturday in 1:39 and coming the last quarter in :30½. He is well hardened for the faster work that he will get shortly, as he has had a lot of work around eleven to thirteen, and his behavior is O. K. He does well in company, has squared away in good shape and promises to furnish someone with some real thrills when the races start. Loe Blossom is ready for the let down, having been in 2:11 with plenty of work just slower than twelve, but the most improved horse in Frank's stable is Bon Guy. This "Guy" at the time of my last visit was scarcely up to a mile much better than 2:25, but he was beginning to act like a trotter and last week, going good and flattening out into a nice stride, he worked in 2:15½. His legs are carry- ing him well and both Mr. Bailey and Childs are well satisfied with the showing he is making.

V. L. Shuler and Peter McCormick haven't been the causes of any more attacks of heart failure since their ride in 2:08½, but the big brown boy has had four miles better than ten since that time and is standing up staunch as a church in a high wind. Shuler has been working on him to get him away quick and Saturday morning sent him a first quarter in :30½ accompanied by George Ryan and the Mac- Kenzie prompter. He was scheduled for "leveling" about Tuesday or Wednesday of this week for a mile between six and seven and looked good for that figure without much argument. John Gwynne is going easily around fourteen. Fleeta Dillon is behaving like a lady for Millard Sanders and has all her old time speed, working last in 2:08¼. Peter Howard's youngster in the same stable has trotted in fifteen and came so fast that Millard eased up on him a bit, while Barney Oldfield, the guideless pacer, has steered himself "of his own will and accord" over the full course in 2:15¼. He operates very nicely all by his lonesome and Millard is negotiating with the exposition people for a series of exhibitions with his pupil. It would be a very pleasing attrac- tion, as Californians are not as familiar with the guideless kind as are the folks across the mountains, and Barney, suitably decorated and moving at a merry clip, would be a handsome and novel sight.

A pair that the wise guys are still according plenty of respect are those two shifty central westerners, A. F. Ruthven and Walnut Grove 2:05¼, who are entered in the big pacing stakes and the faster classes at both meetings. The Grove is working sound and a few days ago Al sampled him in 2:08½, 1:02½, :30¼, no ill effects of any kind resulting. Rose Equity has not yet beaten ten, but has wound up a mile with the half in 1:03¾ and the quarter in :29¾, while Miss Johnson, G. C. W. and Little Grove are gradually being let down a little.

Marvin Childs warmed up Lizzie Dillon pretty thoroughly Saturday morning and thein proceeded to take a real ride, his first one of the season, behind the daughter of Sidney Dillon and Angela S. Going away from the stand he set his bonnet a little lower on his head, drew a bead through the terret against the quarter, the half and the three-quarters and siz- zled under the wire in 2:07¼. Marvin has said all along that this little mare, now eight years old and raced but once since she was a three-year-old, was fast, but this display of speed was a bit of a surprise to a good many, including myself. Hal Boy's best work was in 2:10, but Marvin planned to set him down a few seconds early this week. Tom Smith, Jim Hill and Imbro are all working between ten and eleven and R. C. H., the Helena trotter, has gotten

STRATHTELL 2:14¼
A husky little Canuck that is pacing in 2:10 for Barney Barnes.

on the short side of fifteen. Tom Smith, Esquire, still looms as a probable starter in the 2:10 trot, as he is training pretty sound, thanks to Lou's private prescription.

Sutherland & Chadbourne have had 2:10 or better stare them square in the face behind three different pacers and are not far away from that figure with all the string they will race at the exposition. Zoetrix, the big bald faced, white legged daughter of Zolock 2:05¼ and Jim Marshall's great old matron, Trix Marshall, has gone the route in 2:07¼ with a half in 1:01¼, and the other Zolock mare Zorene, the first foal of My Irene S., has worked in 2:08½. Both of them have racing experience and look like great performers for their sire and dams. A. B. C., the husky black boy owned by Humboldt county parties, has turned the oval in ten flat handily, and the trio look like a good combination. Harold C. is trotting in 2:12½, Bon Cres in 2:13, and Trix McAdrian is pacing in 2:12. Any one of the three can shade ten right now, so it looks like plenty of racing around 2:06 to 2:10 will be required to outfoot "Chad" when he and Pa Jim hit the fair. They have a baby pacer that is staked for the fall meeting that is about as oily as they come—the two-year-old filly Verna Mc- Kinney by Vernon McKinney 2:01½ and out of the dam of Del Rey. This lass has already gone the distance in 2:19½ with quarters in :32, and looks as though she might be able to hang up a new mark in November for the junior pacing divisions of the coast futurities.

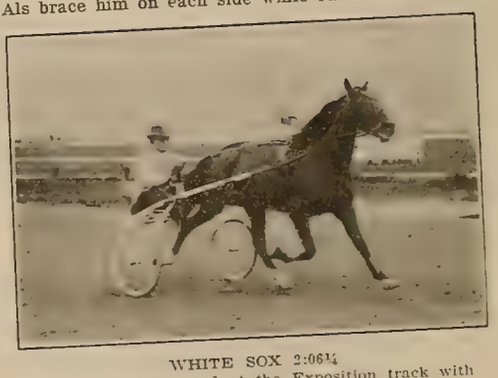
Will Duncan of Colusa, having wound up his affairs at that city for the time, has joined the colony at Pleasanton and is training his big Clarence Wilkes gelding in person. Will has worked him a half in 1:04 with the final quarter in :29½, and has tooled him the full route in 2:17½, coming through the lane in :30½.

Henry Smith has a pair of pacers entered at the exposition, Star Tilden 2:15¾ and Alton S. 2:15, both winners on California tracks last season and both working nicely at present, with miles in 2:14, halves in 1:03 and quarters at a two-minute clip. Della H. is working around the same notch, and Henry's Charley D.—Cricket filly, Lottie D., looks like a real pacer and has gone the route in 2:16, 1:04, :30.

A. B. C., trial 2:10
Humboldt County's "Black Hope" for the green pacing classes—Fred Chadbourne.

On the Picket Line

Definite details of the onslaught upon old Pappy Time's trenches that are being made at the outposts of the "far-flung battle line" from one end of Cali- fornia to the other are lacking, but the reports that have dribbled in through the mail, by wireless, or the personal recitals delivered in broken fragments by recently arrived couriers, all tell of lots doing



STAR WINTER 2:05
Buzzing toward the first turn at the P.-P. I. E. with McDonald up.

in the way of sizz and speed. Up at Woodland today the boys are staging a little meeting that will give the local free-for-all pacers and some of the others their fastest work of the season, and the side- wheelers are probably buzzing pretty fast. Clara Mac has been spinning along around 2:08, with some hot halves and quarters, and recent visitors at Woodland Stock Farm say she is taking the fast work like she wanted more. Jim Logan has gone the route in 2:07, and Potrero Boy, the big brother to Airlie Demonio 2:05½, is only a half-second re- moved from that figure. Booze and Teddy Bear are another couple that have burned the dirt recently, and the trotting mares in the Silva stable, Columbia T. and Eloise Dell, are showing a raft of speed, the former yanking Lon Daniels over the course in 2:10¾ and the latter in 2:13½, with a half in 1:05.

Jack Tolliver, the San Jose shoer, "howdied" with the bunch at the exposition track Wednesday and warned 'em to look out for the Hemet string, Ben Walker and Johnny Quinn. Blackwell is riding right along with Hemet (3) 2:08¼ and some others of the stable, and Quinn has had rides in twelve behind both his grand circuit entries, Albaloma and Baby Doll, with halves from 1:02 to 1:03 and quarters in thirty seconds. Mountain Dee has invested in a round trip ticket for the 2:10 journey for Walker, and Jack opines that Dione II is going to be a mighty strong dose for someone to swallow in her events.

Los Angeles is a long way off but rumors persist in getting by the censor to the effect that the expo- sition entrants still remaining there are fit as fit and moving right along. Jim Stewart continues to ride fast behind that "monarch of the Canadian prairies," Homer Mac, who gets another show for the money in the opening of a class for 2:07 pacers on opening day—a race that ought to be one of the real kind, as a bunch of the fast birds are eligible to that and can get away from Doctor Burns, Jr., who by the way, following his recent collapse, is now exercising in the paddock. The paddock is about eighty feet wide and fenced on two sides continuously for a mile; when they want to get the old horse out in the air Jack and the two Als tail him up and the Als brace him on each side while Jack dresses him

WHITE SOX 2:06¼
Who holds the record at the Exposition track with a mile in 2:07.

so he don't take cold, using a nice complete set of harness for a preventative. Then they ease him into the shafts of the cart, merely to steady the poor old cuss, and Whitney gets in so as to balance things and take the weight of the shafts off his back. Then he staggers out into his special paddock and wanders around a while, with Al holding his head up with the reins and cheering him occasionally by a few kind words. It don't seem to be much use, though. Sometimes he goes clear around his little runway but the way he does it is discouraging—to some folks. It's hard to realize how bad off he is, but a

reliable man who saw him out puttering around one day lately vouches for the statement that he consumed a whole hundred and twenty-five seconds going around his paddock and was almost a minute making the last half of the little journey. Bessie Custer, the green trotting mare that is the Doctor's stable mate, is not so severely bunged up ,as she has gone the route in 2:11¾, with a half in 1:03½ and a quarter in :29¾, but "chances is" that she will be put on the shelf so that she won't be able to beat 2:07 or 2:08 before she hits the big fair. Ain't it awful, Mabel? Little Bernice is another pacer who gets further "show for her white alley" in that 2:07 class, and Sam Watkins will not yet admit that his hold on that money in the wager with Will Durfee has in any way relaxed.

* * *

Out at the P.-P. I. E.

Hi Johnson and the weather man have established so many precedents of late in this part of the world that both native sons and professional Californians from the corn belt have been kept busy explaining to visitors that we do not usually have this much rain at this season, that the prevailing nor'wester should have given way to a westerly or sou'westerly breeze that would not be so noticeable on the back stretch at the exposition track, and so on and so on. However, speed is being manufactured just the same and if the powers that be will just relent and furnish a little run of real California weather there are going to be some miles at that June meeting that will be genuine sizzlers. Las week the footing was heavy up until the latter part of the six days and the trainers were inclined to be a bit dubious as to its qualities, but were much more optimistic on Friday and Saturday. Sunday gave it another drenching, but it dried quickly and has been a fast bit of dirt since then.

Some fair miles and some fast fractions were traveled last week, but not until Sunday was the 2:10 mark molested, when Al Schwartz piloted Zulu Belle over the course in 2:09½, the black lady having turned the route a week previously in 2:12¾. Will Durfee was out with his stake trotters the same morning, Esperanza and Virginia Barnette, the former negotiating the distance in 2:12 and the Moko lass going a half second better, with a hot last quarter in :29¾.

Wednesday morning the "sea gulls" were treated to their first real feast when Will Durfee cut out the muffler and threw in the high gear on his candidate for the fast pacing classes, White Sox. No one save the Angeleno, Owner Berry, and a few of the training crew were aware that William was out for a record ride, though he went away from the wire at a two-minute clip. Before leaving the straight the mare broke and a number snapped back, but Durfee settled her and went on, going to the quarter in :32¼, the half in 1:04¾, the three-quarters in 1:38 and the mile in 2:07. A bit later, bucking a stiffer breeze, Adolph Ottinger, just home from Portland, teamed Zulu Belle to the quarter in :32, the half in 1:04½, the three-quarters in 1:38¼ and home in 2:09¼. Lon McDonald with Duchess, his M. & M. candidate, went to the quarter in :31¾, eased up against the wind and around the short turn and romped the final quarter in :30½, the roan mare showing a lot of class. I missed a good deal of Lon's work, but his bunch was scheduled for letting down a bit yesterday and today, a bit too late for publication. McGuire's green ones are showing plenty of pep and the newcomers and the matinee horses are limbering up nicely. Tomorrow's matinee will give a line on a number of the latter, and next week will furnish plenty of interest for those who like to watch 'em go.—[N.]

A NEW NEED FOR THE PURE-BRED BEEF BULL.

Alfalfa growers as well as range men are evidencing more and more interest in the possibilities of feeding range steers a ration composed of alfalfa and either grain or silage, for it has long been recognized that any such connecting link between the beef grower and the alfalfa grower would result in much good to both.

In the past two years experience of immense value along this line has been gained by farmers and stockmen in various parts of the state and the conclusions of these operators may be summed up briefly by saying that under conditionos found on our local markets the man who makes the most money from cattle feeding will be the man who has better than the average bred stock which can be turned off at around 1,000 pounds as long yearlings or two-year-olds.

Mexicans, Arizonas, or poorly bred native stock will not meet these requirements, so say the experimenters. On the other hand they must be stock sired by good bulls, out of fairly decent native cows and animals that have been "kept going" from calfhood till the time they are put in the feed lots.

The condition facing the California feeder is different from those facing the eastern farmer in many respects, but chiefly in feeds and markets. The markets there, so explain the California packing concerns, are much broader than our local ones and as a result have a much wider spread, one demand being for heavy cattle while another favors lighter stock, thus consuming the ordinary run of both kinds.

In California, and especially in the San Francisco market, where most of the cattle are handled, the buying public demand a small, well finished animal, and for such stuff are willing to pay a premium.

As it is almost an impossibility for the range man to meet this requirement profitably, it naturally follows that here is the hole into which the cattle feeder can very profitably fall, providing he has the equipment for economical feeding and the right kind of young stock to feed.

What is perhaps the greatest headway so far reported along this line is on the Vina ranch in the extreme northern alfalfa country of the interior valley and on the Tehachapi Cattle Company's ranch in the extreme southern alfalfa boundary of the interior valley.

On the former ranch, as has before been noted in these columns, an endeavor is being made to turn off light steers without the use of of feed lots and silos. Good breeding is considered the big essential there, although the continual forcing of the calves on good forage is considered highly important. As the nature of the ranch itself allows of feeding methods which could not be pursued in most locations the chief lesson there is the value of the constant use of purebred sires, for it has been an underlying principle with this ranch to use purebred bulls on their range stock for many years.

On the principle that when he can make two-year-olds weigh 1,100 pounds it does not pay to carry them over as three-year-olds, R. G. Hill, manager of the Tehachapi Cattle Company's ranch at Bakersfield, has decided after two years' feed-lot experience that hereafter he will handle yearlings exclusively.

Before arriving at this conclusion Mr. Hill fed out over 2,000 head of steers, some of which were Arizonas and some natives, varying in weights and quality.

As was set forth in these columns after his first experience in 1914, Mr. Hill found that while he secured satisfactory gains on the common native and Arizona stock, when alfalfa hay, cottonseed meal and corn silage were used, his better bred stuff proved far more profitable.

As Mr. Hill has fortified his feeding operations with a large range where he can raise his own feeders, the matter of securing suitably bred animals has with him been mostly a matter of time in raising calves sired by purebred Herefords to an age suitable for feeder purposes.

During the past season he has finished all of the older steers at his feeding plant together with a sufficient number of young ones to demonstrate the feasibility of his future plan of turning off baby beef which the buying public has so long desired.

Red Kaffir silage, alfalfa hay and cottonseed meal was the ration used this year, the steers whose average weight when feeding started in the fall was 875 pounds were fed silage from the start, the ration was gradually being increased till they were receiving 33 to 36 pounds daily, 30 days after they were put in the lots. With this was fed all of the alfalfa hay they would eat, the hay being fed in racks, adjacent to shed shelters which were built in each lot as a protection against rain and mud. The last 50 days, two to two and a half pounds of cottonseed meal was added to the daily average of each steer, the amount of silage being cut down after this date.

At the end of 155 days when the feeding was discontinued the average weight was 1275 pounds, or an average gain of 425 pounds per steer.

From a financial point of view the gains made for the expense incurred was satisfactory on both this and last year's feeding operations, yet there was not the spread in price for quality either year that would naturally be expected, and it is for that reason that the well bred yearlings will be taken from the range next year, for when finished they will command the top price and the gains will, it is thought, be still more satisfactory than those secured on the average this year.

Others who are anxious to enter the feeding game are considering this same condition which Mr. Hill is allowed, through his range, to overcome before erecting suitable feed lots, silos, etc., and it is questionable whether any but those in a position to raise their own feeders will be able to profit by Mr. Hill's experience till such time as the man on the range who is raising the cattle can be shown the money loss which is resulting from his breeding to mongrel bulls of little or no merit.—Pacific Rural Press.

$75,000 ON NORTH PACIFIC CIRCUIT.

Elsewhere in this issue of the Breeder and Sportsman appears the detailed announcement of the North Pacific Fair Association, which has kept the game alive in the northwest for the last decade, and which offers horsemen the best racing opportunities of the year on the coast. For over sixty days weekly meetings are provided on generous plans, the circuit closing at Salem in ample time for getting to San Francisco some days in advance of the opening of the fall meeting at the exposition.

The feature events throughout the circuit close June first, in some instances the entire program of individual meetings closing on that date. The announcement is complete concerning events, entrance, system of racing, etc., and is most respectfully recommended to you for consideration. Stake books may be obtained either from this office or John W. Pace, Circuit Secretary, Seattle, and we bespeak a generous patronage of the circuit on the part of California horsemen.

Drink Jackson's Napa Soda.

STILL SOME GOOD ONES AT LOS ANGELES.

Los Angeles, May 11, 1915.

Breeder and Sportsman:

Just a little letter from Los Angeles, where the winter and spring have been busy times for horses and horsemen; so many of the good ones have gone to San Francisco and other places that we are almost lonesome now, but I can say we still have some good ones here—they are not all gone.

As my own health is so bad with heart trouble that I am not able to drive at times, I feel as though, for my part, I had better stay close to home, but there are times when I forget all my troubles—such as when I get up behind our Julia Clay, Happy Clay or King Lilly Pointer, by Star Pointer, dam by Direct. They have all stepped quarters in thirty seconds, Julia and Pointer doing even a little better, and we have others that have stepped in :32. King Lilly Pointer, that has had about one workout a week, on last Friday paced in 2:12, 1:03¾, :31, going the last half in the middle of the track. Week before last he worked in 2:12, with the last quarter in :30, and today's work included an easy mile in 2:15, with the last half in 1:05 and the quarter in :30. A few days ago I stepped our Julia Clay almost in her old form—a mile in 2:08¾, and it was only her fourth workout this season. She can always brush a quarter in :32 after warming up, and in the past has stepped her best mile in 2:08, half in 1:03½ and quarter in :29¾.

I must speak of our Happy Clay, the two gaited freak that has in the past paced a mile in 2:15 and twenty-five minutes later trotted a mile in exactly the same figure. He has been halves in 1:04 and quarters in :30 at both gaits. We took him up a few days ago for use as a prompter for our good colts, and by the second week let him finish halves in 1:06 and 1:07 and quarters in :31. He surely will do well this season at trotting.

Our good colt Imbro Clay, Imbro's only son, can't help but go because he has a Clay dam—a full sister to Happy Clay, the sire of our King Clay, the inbred pacer that has worked without straps in 2:16½, halves in 1:05, quarters in :32 and eighths in :14½. Today was the Imbro horse's third workout for full miles this season, stepping his best one in 2:30 with quarters in :35. They all smile at him and call him a good one.

Our colts by King Lilly Pointer are all doing fine. We have two fillies that have never trotted a step and two bay horse colts that have never struck a pace, all four called good ones. One pacing filly at six and a half months of age, led beside her sire for the seventh time, paced eighths in 25 seconds, a mark that the two together have since beaten. They will surely all go, for they have Clay dams.

The first of the Clays that I worked have all gone quarters from :29¾ to :32, and the first five of the next generation have all stepped from :32 to :36, with miles accordingly. I think I can say that the dead Clay Edwin was surely a sire of extreme speed, as the training of his foals was my first experience with track work and these were the first of his get ever handled so far as I know. Our horses are all green ones, as they have never raced for a dollar.

Very truly yours,

WM. H. NESMITH.

YOUNGSTERS MAKE SPEED AT HEMET.

When Budd Doble moved from Hemet Stock Farm o San Jose he brought with him about all of the iorses of racing age owned at the Whittier establishment, leaving at home in the capable hands of Frank Rees the youngsters that are just being given their kindergarten work, and the two-year-olds from which the farm will pick its starters for the junior divisions of the coast classics that are to be raced in November. Rees has been progressing famously with them and from among the lot there promises to come some performers of the calibre of those who brought world's records to Hemet in days gone by.

Don de Lopez (2), trotter, by Kinney de Lopez 2:23—Eradiate by Geo. W. McKinney 2:14½, has trialed recently in 2:35, 1:14, :36½; Goldsmith Lou (2), trotter, by Wilbur Lou (3) 2:10¼—Little Louise A. 2:17 by Boodle, in 2:41, :36, :16¾; Gertrude Rives (2), trotter, in 2:45, 1:15, :36¾; Fiesta Lou (1), 2:25 pacing, now a two-year-old, in 2:40, 1:15, :33½, :16¼, while the four-year-old Nealon by Worth While—Nealy W. 2:27 has paced in 2:14, 1:06½, these being all the horses in training other than yearlings.

Among the latter contingent Rees is educating a pair that stand comparison with the cracks of any farm and which he is confident have in them the real qualities of trotting greatness. One, the filly Louise de Lopez by Kinney de Lopez—Louise Carter (dam of Wilbur Lou, etc.), has brushed a quarter in :37½, eighth in :18, which is decidedly more trot than Wilbur showed at this season of the year in which he established a world's record for yearling colts, and the other one, a chestnut filly by Wilbur Lou—Zeta W. by Nutwood Wilkes, has negotiated the same distance in :37, :17½. Matilda Lou, a very late foal by Wilbur Lou and out of the great brood mare Lady Zombro has trotted eighths in :22, while the bay filly Rosebudd M., by Wilbur Lou—Stambia by Stam B. has gone the short brush a bit faster. The latter filly is a sister to Selma Paley, that trialed a half as a yearling in 1:13¾ and was sold for a nice price some weeks ago.

TROTTERS LOST IN FIRE.

Yorktown, Sask., May 1, '15.

Lady Arrod 2:14¼ and Minnie K. (3) by Baron Axtellion 2:24¼, dam Moxie K. 2:18¼, were burned to death at 4:30 a. m. today, when the stables of M. L. Loblaw, Yorkton's genial blacksmith, were burned to the ground.

Lady Arrod's performances are too fresh in the minds of horsemen to need any mention, but Minnie K. was a green filly only nicely broken last summer, winning a race here last fall (half mile heats), best time 1:08½.

Mr. Loblaw has the sympathy of the entire community, not from the mercenary standpoint, but from the loss of horses that he as a breeder has taken nine years to attain—his heart was in his horses and to have two such promising youngsters snuffed out in such a few minutes, in such a way, is a severe blow.

The money loss was also large, as his entire equipment, bike, harnesses, bike buggy, matinee cart, speeder and everything necessary to complete a perfect stable, aside from the building, was destroyed.

The fire, occurring when it did, got a good headway before being seen. Mr. Loblaw was first on the scene but could only stand and see his horses die. He did get in to one, but was driven back by the smoke and flames.

The game has sure lost two promising youngsters as well as a genial owner and driver.—Canadian Sportsman.

LOE BLOSSOM NOT A "DESERT RAT."

Loe Blossom 2:10½, trial 2:06½, the heavily staked trotting mare in Frank Child's string and due for a Grand Circuit career, is credited in the Year Book as having been bred in Arizona, but this is an error, she being a product of Rossmoyne, Ohio, and was shipped to Tempe, Ariz., which is near to Phoenix, by her breeder-owner, Mrs. Loe Schenck, when she left her Buckeye state home to seek renewed health in the west. After taking up her residence in the west she used the daughter of Lepide continually and in a short time she was able to show a great lot of speed, in fact in order to test her ability she was sent to the Phoenix track and the very first time she was on the oval, a mile in 2:27 resulted. Desiring to have her registered, Mrs. Schenck wrote Cliff Todd, the well known Montgomery, O., trainer, to look after the registration and incidentally sent along three names which she preferred. Neither of these, however, would be accepted by the Association owing to their being duplicates, so Cliff then sent in the name Loe Blossom, which is the maiden name of Mrs. Schenck. In filing the necessary papers, Todd notified the Association to send the certificate direct to Mrs. Schenck at Tempe, Ariz., and this no doubt accounts for the fact that Loe Blossom 2:10½ appears in the Year Book as being a product of Arizona when she rightfully belongs to the Ohio column.—American Sportsman .

Saddle horse breeders should not overlook the fact that Futurity No. 2 of the California State Agricultural Society closes on June first, full particulars appearing elsewhere in this issue.

INDIANAPOLIS RECORD MEETING.

Thanks to the courtesy of The Horseman, we are in receipt of a report of the record meeting at the Indianapolis track on May 12, when an even dozen youngsters, mostly trotters, were given "breeders' marks" from 2:16¼ to 2:28¾. There was quite a bit of speed on tap for the season, and the day's details are as follows:

May 12—To beat 2:30¼ trotting:

Emily Axworthy (2), b f by Morgan Axworthy 2:17, dam Sally Rau 2:16¾ .....(J. B. Chandler) 2:20
Lowell Axworthy (3), b c by Axworthy 2:15½, dam Carpet 2:28 .....(A. L. Thomas) 2:21½
Last Sheet (2), b f by Mainsheet 2:05, dam S. Alta Thomas .....(A. L. Thomas) 2:22½
Lee Aubrey (3), ch c by Captain Aubrey 2:07¼, dam Orox Lee (3) 2:29¼.....(A. L. Thomas) 2:28½
Bin Bon (3), b c by Binjolla 2:17¾, dam Miss Louise S. (2) 2:29¾.....(Zach Chandler) 2:26½
Ella the Great (3), b f by Peter the Great 2:07¼, dam Ella Hewett 2:21½.....(Zach Chandler) 2:28¾
*Zorando (4), b h by Zombro 2:11, dam Alicia .....(W. P. Wickert) 2:17½
Miss Silver Todd (4), b m by Kentucky Todd 2:08¾, dam Onward Silver Belle.....(Eugene Mettler) 2:21¾
Topmast (3), b g by Mainsheet 2:05, dam S. Alta Thomas .....(A. L. Thomas) 2:24½
Grattell (7), b m by Grattan 2:13, dam Annetell 2:20½ .....(Zach Chandler) 2:25¾

May 12—To beat 2:25¼ pacing:

Minnequa Princess (5), blk m by Prince McKinney, dam Princess of Kent 2:22¾..(A. L. Thomas) 2:16¼
Shadeland Nutwood (3), b h by Wilkes Nutwood p. 2:24¾, dam Alice Onward.....(E. McGriff) 2:18¼

THE PACIFIC COAST KIND OF A KING.

We are not sure whether the ancient sages ever said that a great war is sure to break kings and to make kings. If not, they certainly lost a good chance to get between quotation marks, for it does look as though such a declaration would fit the present potentialities—as it were. However, we do not care much for kings, as such, and do not care if they all go broke; which they will not, probably, for we read the other day of a certain royal bunch which had sent seventeen million dollars to this country to be blown into American real estate and securities for their joint account. They are evidently laying up treasures where royal moth and rust do not corrupt. If they would come to California both the kings and queens might become aldermen and alderwomen—which is more than they are now sure of in Europe. But if the war is to make kings as well as break kings, then we are content also, for the Pacific coast has helped to fit out a man who is every inch a king—and he has seventy-five inches to qualify on. And this means, that if it comes to measuring men for the general managership of the European Monarchies Consolidated, which may result from this war, then Albert of Belgium has the call on the job. From the American point of view he has the goods for it; and we say this without the hope of getting a touch on his press bureau either. We take particular interest in Al, because the Pacific coast helped to give him his depth and breadth of view in the humanities; also because in his ordering for the future of Europe he would be sure to remember our canned goods, prunes and dried 'cots. Lest some of our readers may not have had a chance to slap him on the back while he was a Pacific Coaster, we are going to quote a portrait-sketch, which will help them to remember him. It also gives Albert a chance to speak for himself, which is the American essential in candidature. In the course of an interview, a reporter spoke to the king of the affection in which he was held by the Belgian people. The king smilingly said:

"You see my people know me and I know them. I have had advantages few men in my station can ever enjoy. I have traveled freely and mixed with all men, and I know how people live and think. When I was in Seattle and along the Pacific coast I lived just like any other citizen, and in my own country I have seen for myself and been able to compare the manner of living in our industrial and producing centers. I know what it is to drive an engine and to work in a coal mine. Only those who work can be really happy."

Surely, if the world has any farther use for kings and Emperors, Albert is the man who has the thoughts and acts which will last, and he particularly designates the Pacific coast as the place where he met his awakening.—Pacific Rural Press.

The stables of Will DeRyder and G. P. Machado, owned for the most part by residents of either San Francisco or Oakland, arrived at the exposition track Tuesday from Pleasanton. Spriggan, Dicto and Asa Pointer in the DeRyder string all beat ten before leaving their winter quarters, while Bradmont, in the other stable, has paced right at that figure and Graham Bellini has been trotting around 2:16.

◈ ◈ ◈

Charles Atkinson, the Los Angeles trainer who accompanied the Durfee horses to the Chicago sale, took with him a number of the horses he has been training throughout the season at Exposition Park and will race through some of the central western circuits. Directum Penn 2:12¼ made the trip across the mountains, as did the trotters Trix by Redlac, out of Hawthorne by McKinney, and Alexandria by Bon Voyage 2:08, out of Lucy May by Oakland Baron. All have been working in the very nicest way at Angeltown, and Charley will no doubt be in the coupon clipping crowd at most or all of the places where he races.

A REMINISCENCE OF THE RANGE.

Through dry and barren canyons the cowboys follow the herd. At the end of the canyon the trail leads up the mountainside. The way is steep and the trail rocky, narrow and dangerous. Afoot they work all the long hours of an endless afternoon, coaxing the weary, thirsty and reluctant cattle up a trail, to them unknown. Just before sundown the leaders reach the summit; they press on and the cheering news is in some mysterious manner telegraphed down the long line of cattle; they all hasten now and quickly scramble up the last steeps of the climb. They come out on a green meadowy mountain top, beset with little groves of aspen trees, an unbelievably sweet, cool and grassy paradise where cow kind can graze and stand under the aspens, and graze again.

With the last stragglers on top, the cowboys mount and ride down the mesa trail, till they come to a deep ravine, its sides set with spruce and pine and its bottom flat and grass-covered. A spring of icy water wells out from beneath a great rock. They make camp, and the aspen poles crackle in the campfire. They wash in the cold stream and drink and drink again. Soon is the bake oven on the coals, the coffee pot steams and fresh venison is frying in the pan. Across the wide and dusty plain the beef herd travels. To the right and to the left of them the line riders endlessly ride, while the other vaqueros with pack horses bring up the rear. At last the sun goes down, and the herd is turned loose to graze at will; only the horse wrangler and two of the younger boys keep them company, restraining them but little as they graze. Then is the burro unpacked and supper quickly prepared over the coals. The cowboys recline upon the ground, smoking and saying but little, for the way has been long and the day hot. The horse wrangler comes riding in with fresh horses for the night. Each rider selects one from his string and saddles it. Now two of them go to round the cattle up for the night's bedding down. They mount their fresh horses.

The feel of a fresh horse under one is almost enough to make a weary man feel rested. The cattle have scattered far, grazing as they go. They turn at our approach; easily they draw again toward a common center. We decide upon the place where they are to be herded for the night. It is a smooth place where we may ride around them and find no pitfall of badger hole or soft ground for the horses. Two of us then take shift; the others go back to camp, and are soon wrapped in blankets and in the dreamless slumber of the cowboy. We two ride about our herd, bringing the beasts a little nearer all the time, until we have them in a rather compact body, but yet not too close for their own comfort. On opposite sides we are, and endlessly we ride about in wide circles, heading in the straying ones, seeking to venture out to grass once more.

The stars have come out now. How brilliant they are in the heavens. The moon rises over the distant hills, flooding the plain with the light that never was on land nor sea. Long shadows our horses cast. The cattle are unquiet; they do not lie down; we must sing to lull them to sleep. We strike up then the old familiar ditties of the cowboys; we tell those cattle of "Sweet Betsy from Pike," and of how "Once in our saddle we used to go dashing, Once in our saddle we used to be free." We resurrect old forgotten camp-meeting songs and sing these.

Endlessly we ride and endlessly sing, occasionally shouting across at each other, for it is not noise but silence that cattle on the plains will fear. At last we have our reward; the steers begin to lie down, one by one; then we see them nearly all sleeping upon the ground, and are glad. Still we ride, still we sing, still the cool air of the desert plain refreshes us and still the silvery moon floods the world with its unreal light. We ride and sing, but our songs now are low. Across the way we hear our comrade singing, "Shall We Gather at the River." The cattle sleep on; it is 1 o'clock at last. Quietly, cautiously, stealthily two comrades come riding across the plain. They are two sleepy boys, dragged out by a merciless, pitiless cook, and are our relief. We exchange good-humored salutations and tell the news of the night. On the distant hills the coyote, embittered of life, gives voice to his accumulated woes. What relief to ride to camp, our long day's work ended at last! We unsaddle and stake our horses near by, to be ready in case of need. We wrap in blankets, with boots for pillows; the stars twinkle and the moon shines down on two sleepy boys. The cool, sweet air of the plain caresses them; they know no more, not even of dreams, until in the early dawn comes the foreman, with a kind face and humorous smile, a touch on the shoulder and a cheery voice, "Turn out, fellers; turn out, fellers! Here's another bran' new day."—Joseph E. Wing, Breeders' Gazette.

In response to an inquiry from a subscriber concerning the standing of a trotter with a winrace record of 2:23¼ over a non association track at a meeting which was never made a matter of record with either of the parent organizations, we wish to say that those figures constitute a bar which defines the horse's eligibility. Over any and all tracks he is eligible to the 2:24 class, or faster ones.

◈ ◈ ◈

M. W. Savage, who with Mrs. Savage and his son Harold has been spending several weeks in Southern California, was among the visitors at Pleasanton this week.

ANDY WELCH SQUEALS ON "PA" HAMLIN.

A group of horsemen were gathered in New York last winter. A. J. Welch, familiarly known as "Andy," joined the group just as the discussion began to wax warm as to whether "Nick"Hubinger or E. E. Smathers was the heaviest investor in auction pools in the great days of the plungers. The man from Hartford, who has handled millions of dollars in wagers on the trotters, listened a few moments to the tales that were told of the memorable killings at Cleveland, Pittsburg and Buffalo and then he said, with an air of authority:—

"Do you want to know who would bet more money than either of them and never let anybody know he had a dollar on a race? You couldn't guess in a week, so I'll tell you—nobody but 'Pa' Hamlin of Buffalo. He was the biggest bettor, on occasions, that ever followed the trotters. Why, many a time he has put an open order in the box and bet the whole crowd to a standstill. Of course, he had fifteen or twenty millions to do it with, and what he lost or won was only a drop in the bucket, but I have seen him stand to win a snug little fortune over more than one horse that Ed Geers was driving for him.

"Mr. Hamlin was not only a good horseman, but a mighty smart man. I never saw it come out quite so plain as it did at Cleveland in '92, just after the first pneumatic sulky made its appearance. He had Honest George in the Village Farm string that summer, and out at Detroit, where the Grand Circuit opened, he got into as hot a race as you ever saw, with Hazel Wilkes, Little Albert, Walter E. and some more of them.

"It was postponed on account of darkness after they had gone three heats. Honest George had two of them, but he was a little short bred, and had the reputation of being soft and it looked as they ought to beat him the next day. Well, that night or the next morning Geers or Mr. Hamlin borrowed the only bike sulky on the ground for Honest George to finish out the postponed race. He won the final heat like breaking sticks in the fastest time of the four; I think in about 2:16. That was the first time a pneumatic sulky was ever used in a Grand Circuit race. It was one that Fred Clark of Boston had built, and was just an old-fashioned sulky fitted with the bicycle wheels.

"Geers let the cat out of the bag by finishing in a jog with Honest George that day, but nobody except him and Mr. Hamlin seemed to wake up to what made the bay horse win so easy and go so fast. The next week, when we moved over to Cleveland, and the same horses came together again, Honest George was favorite, but I don't believe he would have been if Mr. Hamlin hadn't backed him as he did, because Turner, Johnny Goldsmith, Charley Green, Bob Stewart, George Starr and all the others were out to down him, and they had such horses as Abbie V., Hazel Wilkes, Sprague Golddust, Walter E. and Little Albert to do it with. But they were going to high wheels and Honest George had the bike.

"They went at him one at a time in as desperate a fashion as you ever saw, first with Sprague Golddust, a flash horse but a fast one, and then with Hazel Wilkes. Colonel Edwards let Goldsmith get her off two lengths ahead of the pole horse in the second heat, and in trying to hold his position Honest George went to a break. Say, those fellows had a stone wall built in front of him before you could wink you eye, and he never had a chance for that heat. George Starr made his try with Little Albert in the third. He had laid him up twice and he went an awful mile when they cut him loose, but old George squeezed home first by a head, just the same. It took his life to win, though, and it really looked pretty bad for him when they came out to go the fourth heat, because Turner and Stewart had been holding Abbie V. and Walter E. in reserve for just this heat, and, if any of you remember them, there were not two gamer, tougher trotters on earth than Turner's old gray mare and 'Bob' Stewart's horse that year.

"I want to tell you, when we saw Orrin Hickok put on Bob's red and green jacket and get up behind Walter E. to help those allies win 'Pa' Hamlin's money it was pretty good odds they would land it. They used to call Hickok the 'Tallyrand of the turf,' but if the original Mr. Tallyrand ever classed with Orrin he was certainly some strategist.

"I couldn't tell you now how much Mr. Hamlin stood to win or lose when they started for that heat. But the finish made a difference of at least fifty thousand dollars to him, if I remember right. Nobody would have thought he had fifty dollars bet on it, though, if they had seen him standing out there in front of the grandstand in his linen suit, under his old green sun umbrella. He was 72 years old at that time.

"Turner's mare proved to be the one Geers had to beat when it came to the last line of trenches. They both went at him like demons over on the far turn, but Walter E. couldn't quite reach, in spite of all Hickok's skill. Turner nor nobody else ever drove a greater heat than the little General did with Abbie V. He just carried her along on her tiptoes the whole length of the stretch, trotting, but right on the verge of a break. Honest George—they named him right—was a horse that would die on a trot, and, say, he died all right, but old Eddie boy kept him alive that time long enough to nose out Turner's mare in the fastest heat of the race. I think the time was 2:15¼.

"We didn't know it then, but we all know now that if it hadn't been for the bike sulky they borrowed for Honest George he couldn't have saved his entrance money in that company that day. Of course, Mr. Hamlin knew it meant a whole lot, and he was betting his money on the sulky, not the horse. Still, neither he nor any of the rest ever dreamed that it meant four or five seconds. The boys caught on after they lost their money, and by the time they got to the next town all the smart ones had their sulkies cut down and fitted with bicycle wheels. One of 'em—Roy Wilkes Davie—was too smart. He put a pair of 55-inch wheels, with pneumatic tires, on his sulky, thinking they would beat the small ones, but he got his horse shut out in his first race, and that was the last of his invention.

"Mr. Hamlin wasn't always quite as smart as he was about that bike sulky," continued Mr. Welch. "I remember a race on his own track, there at Buffalo, when he lost more money than he won at Cleveland. He had a black pacing mare called Moonstone, and he just bet her off the board on the last day of the meeting: It must have been in '94. Anyhow, 'Jack' Curry had a horse in the race that nobody except 'Jack' and his crowd thought much about, and 'Jack,' you know, hardly ever drove one that he wasn't cock sure could win, so the Hamlin people—'Pa,' Harry and Pendleton of Providence—didn't pay much attention to him. They knew the Mambrino King mare could go three heats in 10 or better, which was mighty fast in those days, and when 'Jack' began to talk about having a two-minute horse they thought he was crazy.

"What do you suppose they were betting against? Nothing but Joe Patchen. If he hadn't won it they still wouldn't have had an outside chance, for second money went to John R. Gentry. It was the first year for the stallions in the Grand Circuit, and people didn't then know the difference between them and ordinary pacers."—New York Herald.

WHERE THE STEAKS COME FROM.

To the big, red-blooded American who does big things, and especially to the western man who is constantly looking for big things to do, the exhibit of utility beef animals in the Department of Live Stock, Panama-Pacific International Exposition, will have a strong appeal.

The dominant races of mankind and the dominant men in these races are meat-eaters and the supplying of this food element is one of the most important of human industries.

Upon this food man has conquered the wild places, made a highway of the trackless sea and built his home on the rim of the world. He has brought his race from savagery to civilization, turned the land from a wilderness to wealth, girdled the earth with spidery wires, bound nations together with rails of steel, divided continents, over-topped Babel with his offices and created greater problems for the future because of the great accomplishments of the past.

This meat food supply must continue not only for the domination of the race but for its very continuance, and the value of such object lessons as are here presented can scarcely be overestimated.

Here are shown the Shorthorns, Herefords and Aberdeen-Angus cattle for a study of the types and breed characteristics of some of the best beef breeds with large and early development of the valuable parts. In contrast are the Mexicans and American "Natives" of no breeding. Good blood, early maturity and large development of choice beef on the one hand and "cold" blood, slow development and no choice cuts on the other.

This exhibit is made by leading packers of the Pacific coast, and economy of production and profits for the producer as contrasted with expensive production and loss for the producer are shown by the following figures:

The Shorthorns in this exhibit weigh 1112 pounds each at two years of age and sell at 7¼c per pound, making their value $80.00 per head.

The Aberdeen-Augus weigh 1088 pounds each at two years and sell for 7 1-3c per pound, value $79.75 each.

The Herefords weigh 1325 pounds each at three years of age and sell at 7c per pound, fixing their value at $92.75 each.

All these are profitable beef producers and show that "baby beef" at two years old is the most economical.

The "natives" may have had a small infusion of good blood but not much nor recently. They weigh 1056 pounds each at four years of age and sell at 6¼c per pound, giving a value of $66.00 per head. These cattle require twice the length of time to reach a marketable maturity that is needed by the "baby beeves."

The Mexicans weigh 750 pounds each at eight years of age and sell for 3¾c per pound, giving them a value of $43.10 per head. These animals require four times the period needed for maturity by the "baby beeves" and sell for about one-half as much per pound.

The "Natives" and the Mexicans are distinctly unprofitable animals for ordinary conditions while the "baby beeves" offer a pleasant and remunerative field of activity which is not likely to be overdone.

These steers are shown as one of the educational or view herds now on exhibition in the Department of Live Stock. In the comprehensive plans of Chief D. O. Lively, he gave large attention to the economic and utility as well as to the ideal and fancy in breeding, and the object lessons here taught are as valuable in showing what not to do as they are in showing what should be done to win success in the live stock industry.

—I. D. GRAHAM.

IN THE BLUE GRASS.

Lexington, Ky., May 8.—In January H. C. Moody received a draft of yearlings from the Woodland Stock Farm, Woodland, Cal., owned by John W. Considine, the well known theatrical magnate, all of which were sired by Prince Ansel (2) 2:20, the premier stallion at the establishment. Since arriving here each of the yearlings has shown speed of a high order. This is particularly true of Anselila, a bay filly out of Ila Moko, that has trotted a quarter in 35½ seconds. This is not only the fastest quarter trotted by a yearling here this season, but is also the fastest quarter ever trotted so early in the season by a yearling. The filly is a nice substantial bay filly and is just the sort one would expect to be a good trotter at first glance. Her dam is one of the mares bought by Mr. Considine in the New York sale three years ago when he secured a number of good matrons. Her pedigree is gilt-edged, as the dam of Ila Moko is the producer, Dictator's Last, by Dictator 113; second dam, Medium's Last (dam of the former champion two-year-old trotter, Trampfast (2) 2:12¼).

Anselot, by Prince Ansel out of Lottie Whippleton 2:15, by San Diego, has been a quarter in 38 seconds and an eighth in 18. He is a brother to the good California trotters Prince Lot 2:07¼ and Lottie Ansel (2) 2:14¼. Verbena Ansel, out of Verbena Mac, by Directum Spier 2:11¼, has been a quarter in 38 and an eighth in 18½ seconds. Bonnie Ansel, out of Woodland Bonnie Derby, has been a quarter in 39¼. Edna Ansel, out of Edna Saunders, sister to Adlon (3) 2:07¼, Rusticoat (2) 2:13¼, and Dorothy Axworthy (2) 2:21¼, trotted a quarter in :41½, last eighth in :20½. Lord Ansel, out of Lauress, by Mendocino 2:19½, trotted a quarter in 40 seconds and is a much faster colt. He is a brother to the pacing mare, Laura Rogers 2:11¼ (trial 2:06¼). Alma Ansel, out of Alma McGregor (2) 2:24¼, by Jay McGregor 2:07¼, second dam Alma Vista 2:20¼ (dam of Alma Forbes (3) 2:10, etc.), has not been worked a quarter, but has been an eighth in 22½ seconds.

This is rather a remarkable showing for seven yearlings. Few owners have ever shipped colts of their age so far to be trained and Mr. Considine deserves success with them. The shoes have been pulled off of Anselila and she will be turned out for a short rest.

Besides these colts Moody has two Kentucky bred ones that have shown well, in a yearling bay colt by Peter the Great 2:07¼, out of Carrietta, and the two-year-old Suldine (1) 2:24¾, the colt that had the distinction of being the fastest yearling trotter of last year. The latter looks like a show horse and is going well. His best move of the season was a mile Wednesday (in company with Dixie Craig 2:12¾) in 2:29½, coming the last half in 1:12. The Peter the Great colt is highly considered by Mr. Moody. He was bred by Mr. Considine, who also owns a filly foal, sister to him.

* * *

There has been considerable fast work at the track the past week by juveniles. The most sensational performance was that of the two-year-old bay colt, Maple Tree, by Siliko (3) 2:11¼, out of Bertha Leyburn (3) 2:17 (sister to Crito Leyburn 2:13¼) by Arion 2:07¾, that trotted a mile in 2:21½, last half in 1:09. The three-year-old filly, Silquis, that trotted in 2:14 the past season, stepped a handy mile in 2:17, last half in 1:06, last quarter in :32. Hayes rates her as up to a mile in 2:12, and the two-year-old in 2:15 or 2:16 at the present time. These colts will shortly be shipped to Tommy Murphy to finish their season's training and race later in their engagements. There is a two-year-old filly in the stable by Siliko, out of Markala p. 2:18¾, by Peter the Great, that Hayes rates higher than any trotter in his stable. She recently trotted an eighth in 15 seconds.

* * *

H. C. Moody is the owner of a very handsome black colt which arrived last week. It is by Manrico (3) 2:07¼, out of Ollie Wood (two-year-old trial 2:19¼), by Bingen 2:06¼. Moody has received from W. H. L. McCourtie, Minneapolis, Minn., the two-year-old bay colt by San Francisco 2:07¾, out of Widow Maggie by Peter the Great 2:07¼. This is the first colt bred in these lines that has been trained here and the outcome of the line will be watched with interest.

* * *

James Snell received seven head of youngsters the past week from Curles Neck Farm to be trained and given records this season. They are: Ben Billings (2) 2:29½, b. c. (4), by Bingen—Lou Dillon 1:58½; Barbar Wise, c. h. (2) 2:26¼, ch. f. (3) by Peter the Great—Kokomo by Moko; The Gloaming, b. f. (3) by Moko—Twilight Maiden, by Peter the Great; Expressive Lou, b. f. (2) by Atlantic Express—Lou Dillon; Virgie Spier, b. f. (2) by Directum Spier—Ariello (sister to Albia 2:08 and Vice Commodore 2:11) by Bingen; Peter Dillon, b. c. (2) by Peter the Great—Aidoo Dillon 2:24¼ (dam of Dillon Axworthy (3) 2:10¼), by Sidney Dillon. These were the property of Curles Neck Farm, the seventh being the property of A. E. Saunders—The Reminder, b. c. (1), by The Harvester 2:01—Memories (dam of Todd Forbes (3) 2:15, and sister to Todd 2:14¾) by Bingen 2:06¼.

Possibly the choice of the lot on looks is the two-year-old Peter Dillon, a very handsome bay colt of beautiful size and color and a half-brother to Dillon Axworthy, the best two-year-old of his year. The two-year-old bay filly, Expressive Lou, is also of considerable interest because of the fact of her being out of the champion mare and by the fast colt trotter, Atlantic Express.—Western Horseman.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

FISHING FROM A TOGOBBAN.

Angling in the streams of India, from most accounts, seems to be confined to the capture of the mahseer, a fish related to the carp family, and in these waters a game fish and worthy of the rodster's attention. The following story recounted by an Indian sportsman is not without interest for the reader, particularly so to those who have fished some stretches of the McKenzie river in Washington, near Medford. There the river rips along at a 10-mile or more an hour gait. Skiffs are launched and the anglers, once in the current, have no recourse but to keep the boat properly pointed down stream. Zipping through rapids and eddies, in the splashing spray, opportunity is given for a cast here and there, as the guide directs, if one is a novice, and well filled creels of fine sized fish can be taken. On this particular trip down stream the anglers generally make shore at Cook's, for breakfast and things—after a most exciting 10 or 12 mile ride down stream. The boats? Oh, they are taken back by wagon to the starting place. Now for the odd ride down a famous river in India:

It was early in November, out of the usual leave season, that by a combination of fortunate circumstances I found myself for three weeks on the banks of the Jumna near where it leaves the hills and but a few miles below its junction with the Giri. November is really late for mahseer fishing. On the Giri I used to find the spring, from March up to "the rains," towards the end of June, the best time, but on rivers like the Jumna, affected in summer by the melting snows, the fishing was spoiled as soon as the snow-water came down. However, these proved weeks of great sport, with game, both big and small, varied by quite good fishing.

My camp was pitched near Pounta Pool, a magnificent picturesque spot, overshadowed by cliffs, on which stood two very ancient Hindu temples with domed roof and tapering spires. Just below these temples a tearing, foaming rapid formed the head of the pool, below which 300 yards of deep, swirling water swept the base of the cliffs, gradually slackening in pace, and increasing from about 60 yards in width till it spread fan-shaped into a broad, gravelly shallow 100 yards across, the picture, from an artist's point of view, being rendered even more attractive by dozens of native women in gay-colored garments standing knee deep in the water washing clothes. Pounta Pool held enormous mahseer, but these were not easily killed, being well fed by the priests belonging to the temple, so they did not take a spoon well, and my experience was that it was only the smaller ones which rose to a fly.

Personally, a 20-pounder was my largest from Pounta, but the far side under the cliffs was beyond reach, and unworkable from a boat, even if one could have been obtained, the nearest approach being a surnai. This consists of two mussucks or inflated skins, usually of goat, with the legs cut off close to the body and securely tied; it forms a buoyant conveyance even in the roughest water, and is quite unsinkable unless the skins are cut, a most unlikely contingency, as they are exceedingly tough and strong, so much so that even when dashed against a rock they bound off like a football, with very little feeling of concussion to the passenger.

The surnai has a small native bedstead lashed across the two bladder-like skins, forming a narrow but secure platform on which you can sit straddle-legged as if on a very broad, flat saddle. I do not describe it as the height of comfort. Moreover, casting in a sitting position with a 17-foot salmon rod was pretty hard work.

The previous evening my two surnai men had arrived with one for me and a single mussuck for each of them. The plan was that each man, lying flat across his mussuck, using a hard paddle and also his legs for steering, worked my surnai across the river, if necessary, or into position for me to cast over an otherwise unfishable spot; in shallow water they did this by wading. Another advantage was that these skin rafts were so light they were easily carried tied across a man's back.

Before starting for the day I always had my "river-side companion" securely tied on my surnai close in front of where I sat. Perhaps it is as well to explain that this was not a lady, but a square tin case conveniently fitted with divisions to hold reels, lines, and every kind of fishing tackle, to say nothing of there being room for a flask and a packet of sandwiches—a very complete outfit for a day on the river.

Now to my story. Leaving camp early, I began to work a couple of miles below Pounta, and fished slowly down stream, killing several fish, but nothing over 5 pounds. Halting in the shade for a midday lunch, I enjoyed a magnificent view of the distant white-domed temples, the swirling, foaming river, with its background of jungle-clad hills, far beyond which a lofty snow peak stood out clearly defined against a cloudless sky. Starting again after lunch, I soon killed a nice, sporting 12-pounder, then one of 3 pounds. At this time I had reached a long run of heavy water, which ended in a tearing rapid, about a couple of hundred yards of foaming river, with huge rocks showing here and there, before it fell into a deep, eddying pool. At the head of this run I was taken by something big. At one rush out went seventy or eighty yards of line, the reel shrieking sweet music. Slipping, stumbling (and possibly swearing) over the boulders, I ran as fast as my legs would carry me, at the same time shouting to my men to have my "surnai" ready for all contingencies, for it looked any odds on having to follow my fish down the rapid, the bank just below us being impassable. Running along the water's edge, I reeled in as fast as possible, but a bad slip, and down I went in a sitting position, in waist-deep water. Luckily no damage was done. Moreover at this minute the mahseer stopped and sulked deep in mid stream, giving me time to pull myself together.

Reeling in, I got opposite to where the fish lay, and clearly realized it was a choice of a break or else of following him down the rough water, now so short a distance below us that his next run would to a certainty take him down it whether he wanted to go or not. It was not a pleasant prospect, but I felt sure the "surnai" would not burst or turn over, and I was determined not to lose my fish if I could help doing so.

Meanwhile all had been prepared. Rod in hand and line tight, I settled myself securely straddle-legged, got one man to hold the "surnai" ready to push it off into the stream, and directed the other to bombard and start the fish. At the first large stone, most deftly hurled by my boatman, away went the mahseer straight for the rapid, followed by me on my mussuck raft. Whirr! went the reel, out tore yards of line. I was in for it, feeling none too happy, though the excitement of this wonderful piece of sport made one rather forget the dangers ahead. In a minute we were in such strong water that there was no command over the "surnai." Down we rushed at a great and increasing pace, the fish well ahead. Once or twice protruding rocks seemed to threaten disaster, the inflated skins tumbled about most alarmingly, dashing over huge boulders scarcely submerged, grazing and bumping off others to the imminent risk of my legs. It was a most exciting ride, to say nothing of the anxiety lest I should lose the fish, which, when about three-parts of the way down the rapid, stopped, doubtless having taken shelter behind a stone, and I actually passed him.

It was really all over in a few seconds, though it seemed far longer before we plopped into the smooth water of the pool below, with nearly a hundred yards of line out behind me, and the fish probably lost. Quickly paddling ashore, I reeled in, put on the strain, and—joy! The fish was still on and completely played out by his bucketing in the rapids, so I soon had him down stream, rolling dead beat on the surface of the water, and my men, who had run round and rejoined me, waded in, and shortly had him safely stranded on the gravelly beach, a fine mahseer of 23 pounds, though I fully expected him to be bigger from the rush with which he started. Stirring memories of a strenuous past that haunt the evening of one's life. What days! What sport!

Fish Lines

Prospects for well-filled trout creels the past week were not overly encouraging. Reports from many of the fishing resorts are that rivers and creeks are bank high and muddy. The recent rains put an embargo on trout angling operations far and near.

In some waters bait fishing has been fairly well rewarded. Fair weather for the past two days will make conditions favorable to a moderate extent for tomorrow. The outlook, however, is most excellent for splendid fly-fishing in a week or ten days.

Prior to the recent unusual rainy spell trout fishermen who visited the San Mateo coast streams and lagoons were well satisfied with results and looked forward to good sport. Since then, however, it is another story. The few rodsters who flaunted weather conditions were up against high water and muddy roads conditions that put a veto on the sport. For machine trips the roads, in some places, were impassable. One party started for Waddell creek. They nearly reached their destination when the machine was stalled. They had to abandon the auto, and managed to continue along the coast until Santa Cruz was reached. Another party was compelled to leave their machine near San Gregorio and return by stage. Latest reports are that the coast roads are not yet in shape for machine going.

The Klamath river, near the Hot Springs, seems to be an exception to general unfavorable conditions. Dave Hearfield, Harold Hearfield, A. M. Cumming, Hugh Copeland, E. W. Bosqui, Joel Harlan, J. B. Coleman, D. Duncan and other local rod and reel sportsmen are on the river at present, and catching large trout daily. The killing lures are spoons and helgramite baited hooks, nor is tyee roe refused by the big steelheads.

R. C. Spinks advises Sam Wells from Chiloquim, in Oregon, that there are lots of big fish in the Williamson river and a few in Spring creek, and a good fishing season is anticipated. It might be timely to mention here the favorite flies for that water: Improved governor, light caddis, McGinty, March brown, California royal coachman and Williams cow dun, dressed on No. 6 or No. 8 hooks. Also bear in mind that a spinning spoon will be effective, and later on, when the grasshoppers appear, the trout are just crazy for a hopper diet.

The creeks in Marin, Sonoma and Lake counties were running bank high. Fly fishing was out of the question. Tomorrow should be fairly good for the bait fishermen. Bob Bowman fished Sonoma creek from Kenwood up for several days prior to the rainy spell with good success. There must be a few left in that stretch of water worthy of angleworm efforts tomorrow.

Lagunitas lake was tried out with fair success during the past week by Charley Breidenstein, Baldo Ivancovich, Fred Tobelman, Carl Westerfeld, Fred Willet and others. Monday the floodgates were opened to allow surplus water to run off. The creek near Libertys looked like Paper Mill in flood time, there was so much water.

Feather river fishing was most promising up to Monday, last week. At Cresta, Ed Thompson watched the river rise seven feet in that many hours. Fish are plentiful in that stretch, however—fine, large, healthy fish that spawned early in the season. The outlook for good spoon fishing in the near future is most auspicious. Near Big Bar the best results at present are found in the small creeks. Advices from Big Bar, or Pulga as it is known now, are that good fishing can be enjoyed when the weather moderates. Fishing in the Feather river for two weeks or so will be bait or spoon fishing. Before the rains salmon flies were out by the millions in the Big Bar region. Good catches were made on salmon fly and helgramite baited hooks. When the time for fly-fishing sets in you might use to advantage a light caddis fly pattern, or gray hackle with a yellow body; gold standard, pale watery dun, professor, red ant, red spinner or black gnat fly, tied on No. 8 or No. 10 hooks. The No. 8 is said to be preferable. In the creeks use a No. 10 fly hook.

* * *

Many striped bass fishermen use detachable motors to propel their skiffs and fishing boats up and down the sloughs and creeks in and about the bay waters—and thereby hangs a tale. One Petaluma fisherman paid a fine of $15 because he was running a motor boat without complying with the "Government regulation for navigable waters." He was overhauled on Petaluma creek and questioned about the equipment of his skiff, which was propelled by a small detachable motor. He rather scoffed at the information he received and paid no subsequent attention to the request to visit the office of the Collector of the Port at the Custom House building. In due course he received a communication from the U. S. officials to come to town and pay fifteen simoleons for non-compliance with the Federal statute. Another boat owner, while spinning through San Rafael canal in his motor driven skiff, also fell in the toils to the extent of $10. A number of up-river fishing boat owners have also been gathered in the net of the custom house scouts.

The fact that the little boats driven by detachable power motors come within the scope of the United States law may not be generally known, but such is the case, and it stands one in hand to get in line and avoid complications. None of the bass fishing sportsmen would willingly ignore the law in the matter, but ignorance, just the same, will not excuse anyone here.

The regulation that covers the situation is as follows: Class One includes all boats less than 26 feet in length. Every boat in this class must carry the folliwing lights: A white light aft; a combined lantern at the fore part of the vessel, showing green to starboard and red to port. Every motor shall be provided with a whistle or other sounding mechanical device capable of producing a blast of two seconds or more in duration. Such motor boats shall carry life preservers, life belts or buoyant cushions, ring buoys or other device prescribed, sufficient to sustain afloat every person on board. Also must be carried for immediate use the means to promptly and effectually extinguish gasoline (a can of sand or salt will answer). No style or size of whistle, fog horn or bell is prescribed, provided such device is available and efficient for the use intended. A mouth whistle capable of producing a two-second call which can be heard for at least one-half mile, or an ordinary fish horn, it is said, will meet the requirement of the law.

Therefore get busy and have your motor boat, large or small, outfitted as required by Uncle Sam.

* * *

From striped bass fishermen's point of view the recent rains put the sport on the shelf decidedly. The San Antone ark colony, however, put in an off day in straightening up quarters and repairing such damage as was done by the stormy weather. Dr. A. P. Matson joined the flotilla of arks and boats with the ex-racing sloop Corinthian, now housed over and comfortably equipped for a fisherman's outing. But few bass have been taken in the creek recently.

Bob Sangster and Guus Christianson's two 15-pounders are the best catches reported—before the rains, however.

Reports are that bass have recently been taken at Port Costa by wharf rodsters. Another report gives the Marin shores off California City as the scene of bass catches.

The Wingo phalanx have not much opportunity to try for striped bass in that section. This Sunday, however, should find fishing conditions there better than for two weeks past; in fact, such should be the rule at all of the bass fishing resorts.

* * *

Black bass fishing in Middle river, about 14 miles below Stockton, has been good since the season opened, May 1. R. B. Murdoch, Louis Gotthelf and J. J. Bemis have made fair catches of nice sized black bass during several recent trips. Bass caught in that district, No. 2, cannot be brought into this city, in the third district. The open season for black bass will begin on June 1 in district No. 3.

ONE OF THE OLD GUARD GONE.

The late Manuel L. Cross, a Deputy Fish and Game Commissioner for the past twenty-five years, was most popular and well esteemed by the sportsmen of this State. For many years past he had charge of the Wawona hatchery, and through his painstaking efforts the Yosemite streams were annually stocked with trout. For a number of years his work was devoted to transplanting black bass, which he did successfully in practically all of the waters of this State. He was at one time an active and efficient official in the patrolling of Russian river, Petaluma creek and the bay waters.

FLY-CASTING CONTESTS.

San Francisco Fly-Casting Club members were busy Saturday afternoon and Sunday forenoon, May 15 and 16, in a special series of contests—back scores for the regular series of gold medal contests, that wehe postponed and handicapped by reason of previous unfavorable weather.

Event 1 was accuracy fly-casting percentages, five casts at each of three ring buoys. Event 2, delicacy percentages fly-casting, five casts at each of three ring buoys. Event 3, heavy trout tackle distance fly-casting, in feet. Event 4, lure casting, with half-ounce frogs, percentages. Event 5, lure casting, half-ounce frog, distance, in feet. Event 6, "slam" casting, longest in feet of five casts with half-ounce frog.

The "in and out" event Sunday, at the target rings, counts as follows: the contestant, if he makes a hit the first cast continues, at the same target, until a miss is made, he then casts at the second target, continuing at that mark until he again misses, thence to the third ring. The scores Sunday were: C. H. Kewell 9.2, Cooper 3, Burgin 3, Denzel 3, Davis 2, Reed 2, Kierulff 2, The scores follow:

Special Re-Entry Contest. Medal Series, Stow Lake, May 15, 1915.

Drink Jackson's Napa Soda.

CLEANING AND FIELD MANAGEMENT OF MODERN HIGH-POWER RIFLES.

These notes are not for target shots; the writer is well aware that they know (?) all that can be known about rifles. Also that so long as they have every comfort and appliance and unlimited time they can make those marvelous "scores," which just ordinary mortals can never hope to equal.

A pamphlet on our military rifle begins by instructing how to rasp down the wood under the fore-end bands; how to dust emery powder on the bolt; and how to clean by resting the muzzle on a "soft board," etc. If you can secure a new arm at your pleasure; if you don't object to blowing your face off; and if you care nothing about how your rifle shoots, probably this is good advice; but a mere hunter or soldier had better beware of all such amusements.

How shall a rifle be cleaned in the field? How to do it in some cheerless bunkhouse in the Rocky mountains, the Sierras, or in some dreary log camp on the route of the Canadian Pacific Railroad, let us say. "Always clean from the breech," says our target dandy; "remove the bolt," "rest the muzzle on a soft board"—all utter rot.

You are half-drenched; the shack has a floor of begrimed "splits." There is no "soft smooth board" within one hundred miles, but you have in your kit (1) a little tin box, a lump of carbonate of soda (washing soda); (2) a jointed cleaning-rod; (3) a packet of twilled muslin rags wrapped in oilcloth; (4) a small can of oil.

Proceed as follows: Boil about two table-spoonfuls of water in your tin cup; while boiling drop in a lump of soda, say the size of your little finger joint; take a piece of clean rag, oil it slightly, and place it in the chamber of the rifle; close the bolt on it; this will keep water, etc., out of the action and firing pinhole. Place a rag of suitable size in the slot piece of your cleaning rod; dip it in the soda solution and scrub the barrel with butt resting on the floor.

With a brass rod free from all grit, used in this manner, a moderately careful man will harm a rifle less in two years than he will do in a week by removing bolt and resting muzzle on a board in camp. Use three or four of these soda rags, then dry the barrel thoroughly with four or five rags, and the rifle is clean.

Dry the cleaning-rod, place in the slot a rag rather wet with "Three-in-One," the "Rem-UMC" or "Winchester" gun grease, and rub the barrel for several minutes. Take out the rag from the chamber, wipe off all moisture, and put a little oil on the bolt and lugs. The arm is ready for another day in the open.

The rod barrack cleaner of our service is excellent, but it appears to be the duty of no one to carry it on service. Our wretched "thong" or pull-through is of little use, but is better than nothing, if the bit of rag is soaked with nitro solvent oil. There are several forms (consisting of mineral oil containing a percentage of caustic soda) on the market. They must be carried in a glass bottle and are apt to be a nuisance, but will do the work; never put them in a tin oil-can, as corrosion quickly occurs and leakage is certain.

Again I beg to say I am not writing for target shots and would-be-such; these have many admirable books to consult. Many oils come in a pasteboard carton, which keeps the bottle fairly safe and allows space for packing dry rags also. If one of these alkaline oils be used, a little plain hot water will suffice for the first scrubbing, the oil being freely applied after thorough drying.

A rifle so treated will be all right for about twenty-four hours if it has not again been used. At the end of that time a brush rubbing with a fresh oiled rag will keep it in good condition. Assuredly, no one in your party or company will have any "boiled linseed oil"; but if yours is an exception, beg or steal a few drops and finger-rub it into the wood of the fore-end. If not, spare a little "Three-in-One" for the same purpose; it is not as good as the linseed oil for this purpose, but will serve and may prevent warping of the fore-end and changing decidedly the rifle's shooting.

Fortunately, most American hunting rifles cannot be easily dismounted, and there is no danger of laying down a bolt on a gritty floor; so there will not be that risk to avoid. It is quite possible to ruin the shooting of a fine rifle in a few minutes by using a rough and rusty steel rod or a wooden one full of embedded grit, from the muzzle; but with a smooth, clean, brass rod it will take longer to accomplish than the rifle will last, anyway, and is of no moment.

The writer has a .25-.35 rifle which he has cleaned thousands of times with a brass rod; yet a magnifying glass shows no injury to the lands, and the rifle, after several thousand shots, is as accurate as when purchased. Lieutenant Whelan has purposely deformed the muzzle of a .30-40 rifle for experimental purposes to a degree that could not be done by any sane use of the cleaning-rod. Yet the rifle so injured shot a group which very few men indeed can hope to equal with any arm.

Therefore, though the advice is scientific and a good rule for target work proper, forget all you read about always "cleaning from the breech." Never take apart your rifle if you can help it; even the regulations are stringent concerning this, and it remained for a lieutenant of United States cavalry to advocate converting your arm into a dangerous rattle-trap by meddling with rasps and emery powder. All this is very highly dangerous to yourself, and practically certain to ruin the arm.

Our Springfield-Mauser has many faults, and the sights are built for white and black targets, unlimited time, and a safe and comfortable place to shoot from; but even fairly expert riflemen cannot remedy it. The beginner is courting disaster by trying to do so. Even our factory sporting rifles are mostly very good indeed, a little sight adjustment being all that is required for reasonable use. The full powers and limitations of these sights very few soldiers or sportsmen understand.—R. W. Seiss, M. D., in Arms and the Man.

At the Traps

Golden Gaters.—The Golden Gate Gun Club regular monthly shoot at West Alameda trap arena drew a tournament attendance, about 50 shooters being on the firing line during the day—and a day that was rainy and windy at that.

Tom Wilks came through the fray for high amateur average with 48 x 50. Toney Prior, Barney Worthen, and "Bud" Havens were next up with 47 each. Prior's 20 straight was high club score in Event 1, the cup race. Geo. Thomas and Havens also ran out straights in Event 2, the challenge trophy match.

In the "grub" team shoot, at 10 birds, eight men snuffed out straights. Fred Willet's "O'Leary Guards" won over Field Marshal Stelling's Grenadiers.

Otto Feudner broke every bird in the first match and also a 10 in the "grub" shoot. The day's program called for 50 birds—two 20's, in 10 bird sections, and a 10 bird race. The scores follow:

Martinez Traps.—Fred K. Burnham, president of the Alhambra Gun Club, writes that a ten-man team smokefest with the Richmond Gun Club will take place tomorrow on the Alhambra trap ground.

The Alhambra representation to compete in the three-man team championship of California match at San Jose next week will be—"Bud" Havens, Billy Sears and F. K. Burnham.

The "good time shoot" referred to last week, to be correct, was an 800 bird argument between teams from the Family Club and the Straits Castillians. A high wind cut down the scores materially. The results were:

Alhambra Knights.		Family Men.	
F. K. Burnham	82	J. Brickel	75
H. Havens	76	Col. J. W. Dorsey	66
C. H. Knight*	77	Harry Harrison	85
F. Webster	74	W. B. Sanborn	74
E. Hoelle	92	W. Landry	81
Dr. E. Merithew	68	R. Splivalo	65
Dr. Fitzpatrick	65	J. Miller	44
W. Veale	69	D. Horndorf	58
Total	603	Total	547

Near the Navy Yard.—The Vallejo Gun Club has divided its membership into three classes, A, B, and C. This does away with all bird and distance handicap shoots. The club will hold its regular monthly shoot on the fourth Sunday of each month at the new ground north of Germania Park.

A new rule has been adopted by the club that a member cannot shoot off more than two back scores.

A number of prizes have been donated to the club and will be given to the shooters making the highest scores in their respective classes.

It is planned to award two prizes to each of the three classes which will make two first prizes for each division.

Prizes have been donated by the following: Bronze plaque, Hercules Powder Works; gold medal, J. V. O'Hara; gold medal, Wisecarver; Fred Gilbert trophy, won and presented back to the club by A. G. Flickinger; bronze dog, Roney; silver spoon, Selby Powder Company; silver tea server, W. King.

* * *

Webfoot Cracks.—A summary of results for the recent Capitol City Gun Club shoot at Salem places Frank M. Troeh, of Vancouver, Wash., high amateur with 146 out of 150. Pete O'Brien of Portland, second, 146. Frank Van Atta, Vancouver, Wash., and L. Rayburn, Portland, Ore., third, 144 each.

Jim Seavey, of Eugene, Ore., won the trophy shoot, 47 out of 50, 19 yards rise. E. H. Keller, Portland, 20 yards, 46, second. Pete O'Brien (21 yards), H. H. Veatch, Salem (20 yards), W. H. Dalrymple, Salem (19 yards), Al Jones, Joseph, Wash. (19 yards), tied for third with 45 each. O'Brien won the shoot-off, 22 out of 25.

Hugh E. Poston was high "pro" and high over all, 147x150. Pete Holohan 143, E. B. Van Arnam 136.

Total scores at 150 birds: H. E. Poston* 147, F. M. Troeh 146, P. H. O'Brien 146, F. Van Atta 144, L. Rayburn 144, P. J. Holohan* 143, M. Rickard 143, F. Templeton 139, W. McCornack 138, E. H. Keller 138, L. Dennison 137, Dr. Leininger 137, H. Veatch 137, O. Wilson 137, Van Arnam* 136, J. Bull* 135, H. R. Everding 135, C. McKean* 135, P. R. Alexander 135, B. Pearson 135, W. R. Allen 134, J. Seavey 133, W. Dalrymple 132, E. B. Morris* 132, W. Ballock 132, A. Jeurs 132, P. H. Baltimore 131, J. Reid* 131, J. J. Fenton 128, R. DeArmond 126, B. Hubbard 124, M. Sidall 142, P. Salinas Echoes.—The recent shoot of the Rodeo Gun Club was pulled off under a handicap of wind and showers. At that eight squads faced the traps—shooters from Salinas, Hollister, Watsonville, San Jose, Pacific Grove, San Francisco and other points.

The scores shot were: At 75 birds—P. J. Holohan* 66, J. T. Downs 66, H. Barstow 65, E. Henshaw 61, F. Tholcke 60, M. O. Feudner 58, D. McFadden 55, F. Pura 50, C. McFadden 40, B. Breschini 40, H. Elisio 40, V. Messara 40.

At 50 birds—A. Elishio 44, Billy Varien 43, R. Vierra 40, Bunting 37, F. Casey 37, A. Winckler 36, A. Horton 36, G. Tholcke 36, J. Douglas 34, Billy Price 34, E. Wincke 32, H. Gross 28, Dr. Chappele 28, A. Dayton 26.

At 25 birds—Horstman 22, J. Tynan 21, F. Sargent 20, W. W. Black 19, L. Townsend 17, McHenry 16, Horigan 16, Miller 15, H. Collins 14, W. Snow 13, Jenkins 9.

Amateur Championship U. S.—George L. Lyon, of Durham, N. C., won the New York Athletic Club tenth annual amateur championship tournament. He led a field of 144 shooters with 192 out of 200 targets. He also won the preliminary championship by breaking 191 out of 200 targets, 115 shooters lined up in this event.

H. J. Thielman, of Portland, Ore., was the only Coast shooter participating in the main event. He broke 166 out of the 200.

High amateur averages were: G. L. Lyon, 383 out of 400, A. B. Richardson, of Dover, Del., 377, J. L. Snow, of Boston, 372, A. L. Burns, of New York, 370, R. L. Spotts, of New York, 369, C. H. Newcomb, of Philadelphia, 365.

Richardson, in the five man team race, made a new ground record with a run of 131 straight. The Philadelphia Independent Gun Club team won over five other teams, 927 out of 1,000.

A list of the winners of the New York Athletic Club's annual amateur championship of America shoot is as follows:

1905—John H. Hendrickson of Jamaica, L. I. . .94x100
1906—Wm. M. Foord, Wilmington, Del. 94x100
1907—Edward F. Gleason, Boston. 95x100
1908—George S. McCarty, Philadelphia. 96x100
1909—George S. McCarty, Philadelphia. 98x100
1910—No tournament.
1911—Harry W. Kohler, Philadelphia. 173x200
1912—B. M. Higginson, Jr., Newburg, N. Y. . 185x200
1913—Chas. H. Newcomb, Philadelphia. 179x200
1914—Ralph L. Spotts, New York. 188x200
1915—George L. Lyon, Durham, N. C. 192x200

* * *

"Cap" Pointed Straight.—In describing a recent Du Pont Trapshooting Club meet, near Wilmington, Del., E. R. Galvin writes: "Our old friend the captain from the West, one Wm. A. Simonton, sometime known as Bill, was right there with the goods. The genial captain was the hero last week also, and yesterday he laid low 95 out of his quota of 2 birds over his nearest competitor, J. H. Minnick.

"John Henry was sliding over the ice some himself, as he annexed 93 out of 100, and gave strong evidences of coming back into his own, for once upon a time John was the pride and joy of the local club, and seldom missed more than one or two of an afternoon. J. T. Skelly with 92, Wm. Coyne with 91 and Laurence D. Willis, completes the roster of those who shot 90 per cent or better on 100 birds.

"In the contest for the Bill A. Simonton Double Target Cup, the same Bill led the field, but of course he is not shooting for the cup presented to the club by him. His score was 21x24. In the leading position with him was Eugene Du Pont, who knocked out 21 also. To say that both of them shot a pretty clip would be expressing it mildly. They sure did 'go and get 'em' and were roundly applauded for their good work. J. H. Minnick broke 19, and Doremus, Leedom and Jensen saw 16 of their 24."

* * *

Montana Tarbirds.—The Deer Lodge Gun Club shoot, May 10, took place during a heavy wind which cut down scores to quite an extent. Bad weather prevented a larger attendance. H. Z. Bielenberg won the Coleman medal and the Du Pont spoon shoot, with 21 and 22 out of 25. Results in three 15 and two 25 bird races were: Tippetts, 14-13-19-20-21; Dye, 14-10-15-15-21; Coleman, 10-12-16-17-21; McMullen, 8-13-17-17-18; Bielenberg, . . -. . -17-21-22.

* * *

Tournament On Floating Barges.—Shooting on dry, firm land and shooting on water are quite different things, so the marksmen of the different gun clubs in and around Spokane, Wash., found out during the first get-together trap tournament on floating barges ever held in the Northwest, and, so far as is known, the first ever staged anywhere. The meet was held on Lake Coeur d'Alene and attracted a hundred shooters from the Northwest.

Two large 70-foot barges were securely cabled, one on each side of the boat. On one end of each barge were located three Expert traps, the marksmen shooting from the other ends of the barges, while from the decks of the Flyer the spectators enjoyed the events.

The trapmen soon got their "sealegs," and in spite of the wobbly boats were splintering the clay birds for good scores as the sun set.

At the end of the day's shooting F. A. Dryden, local professional shooter, led with the best record for all events of the day.

The program of the day included team shooting among five men combinations of the different towns represented, old timers' events, professional exhibition shoot, pool shoot, women's shoot and individual handicap.

The individual handicap, consisting of five 10 bird events, was won by Mr. Dryden, who broke 49 of the 50 pigeons released for him. He was third in the professional shoot, with 45 birds out of 50, and was second in the old-timers' event with 13 out of 15. Mrs. Dryden led in the women's shoot.

F. J. McAndrews, of St. Maries, was high amateur in the individual handicap, winning in the shoot-off against M. L. Werkheiser, Wallace; George Gilmore, Wallace; Dr. R. P. McCrea, and nine others.

Spokane won the five-man team shoot with a squad composed of C. A. O'Connor, O. Gorkow, Hugh McElroy, E. C. Gregory and T. B. Ware.

The old-timers' event was won by L. A. Jahnke of St. Maries with 14 out of 14. In this event he was tied with Woodworth, a professional.

George K. Marsh, T. B. Ware and W. Ahrens divided the pool shoot.

The meet was a success in every way. It combined both the exhilarating sport of trapshooting with a pleasant boat ride in a cool and comfortable temperature. About 250 excursionists were aboard the Flyer during the day.

* * *

"Reno" Stellings Says—"Here's a bit of advice that may help some hard working novice to better scores: To this fascinating outdoor sport give every atom of concentration possible. If there's one game a josher loses out in, it's trapshooting. Think of only one thing, smashing the birds. Pay absolutely no attention to what your fellow shooters are doing. Frequently a single miss has led to several because some member of the squad temporarily forgot and allowed his attention to wander from the elusive little saucer. Another thing—don't get flustered, keep cool, and for heaven's sake don't try too hard. The reason for this is because it gets you keyed up too high. Slip the gun muzzle in a fast, smooth motion and as it passes the bird let fly. Follows then the thrill of pleasure, for the tantalizing little kiln-bird disappears in black dust—caught in the center of the load. There are a lot of don'ts and perhaps the keystone of them all is, don't point a gun at anyone, no matter if you have just unloaded it and you are positively sure the weapon is safe. Sometimes gun kidders forget to make sure the loads have been removed and—anyhow, pointing a gun at anyone is a cardinal sin and should be shunned like the plague."

* * *

Powder Puffs.—The Exposition City Gun Club regular monthly shoot will be the local blue rock attraction for tomorrow.

A report and scores of the Southern Handicap tournament at Memphis, Tenn., May 10 to 15, was received too late for publication in this issue. W. H. Cochrane of Bristol, Tenn., won the Southern Handicap, 97x100, 19 yards. J. I. Chipley, of Greenwood, S. C., won the Preliminary Handicap, 92x100, 18 yards. S. A. Huntley won the Columbus Cup, high amateur average, 523x550.

Interstate Association Tournaments—

June 15, 16, 17—The Interstate Association's Tenth Western Handicap Tournament, St. Louis, Mo., under the auspices of the Missouri Athletic Association Gun Club; $1,000 added money. Winner of first place in the Western Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

July 8, 9, 10—The Interstate Association's Tenth Pacific Coast Handicap Tournament, San Diego, Cal., under the auspices of the Pastime Gun Club; $1,000 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

August 16, 17, 18, 19, 20—The Interstate Association's Sixteenth Grand American Handicap Tournament, Chicago, Ill., under the auspices of the Chicago Association of Trap Shooters, $3,500 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

Registered Tournaments—Pacific States and Territories:

May 27, 28—Utah State Tournament, under the auspices of the Utah State Sportsmen's Ass'n, A. R. Bain, Secretary, Salt Lake City.

May 29, 30, 31—San Jose Blue Rock Club, O. N. Ford, Secretary, San Jose.

June 3, 4, 5—Annual Tournament of Rocky Mountain Interstate Sportsmen's Association, under auspices of Mile High Gun Club, Wm. M. Bowman, Secretary, Denver, Colo.

June 7, 8, 9—Sportsmen's Ass'n of the Northwest Tournament, under the auspices of the Portland Gun Club, J. A. Addleman, Secretary, Portland, Ore.

July 1, 2—Vancouver Gun Club, C. A. Porter, Secretary, Vancouver, Can.

July 5—Eureka Blue Rock Club, H. A. Hine, President, Eureka, Cal.

July 5—Sunrise Gun Club, H. S. Hill, Secretary, Sunrise, Wyo.

July 5—Holbrook Gun Club, J. S. Hulet, Secretary, Holbrook, Ariz.

July 9, 10—Gem City Gun Club. Max Weick, Secretary, Laramie, Wyo.

July 10—Chehalis Rod and Gun Club, W. S. Short, Secretary, Chehalis, Wash.

July 12—Rawlins Rod and Gun Club, H. Breitenstein, Secretary, Rawlins, Wyo.

July 12, 13, 14—Los Angeles Gun Club, Fred H. Teeple, Secretary, Venice, Cal.

July 19, 20, 21, 22—Pacific Indians, F. C. Riehl, Secretary, Tacoma, Wash.

July 28, 29—Delta County Gun Club, Nick Powell and R. A. King, Managers, Hotchkiss, Colo.

August 10—Medford Gun Club, Dr. E. R. Seely, President, Medford, Ore.

September 13, 14—Omaha Gun Club, R. D. Vaught, Secretary-Manager, Omaha, Neb.

November 4—Williams Gun Club, F. E. Lowe, Secretary, Williams, Ariz.

November 5, 6, 7—Arizona State Tournament, under the auspices of the Tucson Blue Rock Gun Club, W. A. Julian, President, Tucson, Ariz.

Peters Points.

At a recent shoot of the Everett, Wash., Gun Club some very creditable scores were made, and throughout, were better than have heretofore been made over the traps at Everett. L. H. Reid and H. E. Poston tied in the 50 target event, each breaking 49. Sumner broke 48; Becker 40; Dunkelberger 39, and Sarff 34. Reid led in the 100 target event, breaking 98, Poston coming second with 97, followed by Sumner with 93. An interesting feature in connection with the shooting of Reid was the fact that he used Peters shells that passed through fire and water in the blaze in the store of A. A. Baily in the year of 1909, five years ago. Members of the club present consider as remarkable the fact that ammunition so tried should be found perfect after so many years and under such adverse conditions. Shooters will recall that Mr. Reid won the Pacific Coast high general average 1912 and 1913 and the U. S. professional championship for 1914, and all of his shooting is done with ammunition taken from the shelves of dealers in the respective localities, and uses Peters shells exclusively.

BREAKING AND TRAINING COLTS.

The erroneous idea that cruelty in horsebreaking and training is necessary is practically a thing of the past. Well directed patience has been found to give better results than inconsiderate applications of the "persuader." However, all horses are not to be treated alike; a high-strung, sensitive horse must be handled gently, the dullard treated sharply. "The first thing in training a horse is to get his attention; second, make him understand what is wanted," says the new Farmers' Bulletin No. 667, "Breaking and Training Colts," by the U. S. Department of Agriculture. The education of the horse, continues the bulletin, is based on reward and punishment and each should immediately follow the act. The advantage of breaking a horse when he is young before he has developed a strong independent instinct is easily seen. The plan generally followed is to break the colt to being led and handled before it is weaned, and to break to harness between the ages of 2 and 3 years. Colts should not do heavy work until they are 4 years old and should be accustomed to it gradually.

The following description of a rope harness to be used in teaching the colt to stand is also used in the first lesson on leading. A colt tied with this harness cannot easily injure himself, exerts a pressure almost simultaneously on the crupper, surcingle and on the halter.

Before a colt is broken to being led it should be taught to stand tied; this applies to unbroken horses of all ages. To do this, put a strong halter on the colt; then take a rope about 14 feet long, double it, putting the loop under the horse's tail as a crupper, twist the two ends together about three times so the twisted rope lies on the colt's back a few inches ahead of the tail, then let one come forward on each side of the horse ,and tie them together in front against the chest just tight enough so that it will not drop down; then run a surcingle loosely around the horse behind the withers, tying into it the crupper rope at both sides. Have an additional rope about 12 feet long, run it through the halter ring, and tie it at the breast to the rope that forms the crupper. Tie the other end of the rope to a solid post, allowing about 3 feet of slack. Leave the colt tied for an hour. Another method is to have a loop in one end of the rope, run the lead strap through this loop, and tie with a little slack to the rope that forms the crupper, the other end, of course, being tied to a solid post.

While tied the colt should be gentled and accustomed to being handled on both sides, on the hind parts, and on the legs. To do this, hold the headstall in one hand, and with the other hand pet and rub the colt, first on the neck and head, then on the back and side, and lastly on the legs. To gentle the hind parts take a stick about 4 feet long, wrap a gunny sack around one end, and tie it. Allow the colt to examine the stick with his nose, then rub it all over his body.

With this arrangement the colt's hind legs may be rubbed without placing oneself in danger of his heels. If he kicks at it do not hit him, but allow him to examine it again, and proceed as before. This lesson should continue until the colt will stand being approached from either side and rubbed all over. The second day he may be tied up again and further gentled with sacks, blankets, and noises until he has no fear of them around him, under him, or upon him.

Another method of gentling a horse is to tie the halter rope to the tail. This forces him to go in a circle. When he gives in and stands quietly he may be harnessed, saddled, mounted, accustomed to strange sights and sounds, and handled with safety. This is one of the best aids in use in gaining a horse's submission.

The horse is now ready to lead. Loosen the rope from the post, step off from the horse, and tell him to 'come," following the command with a pull on the rope. As soon as the horse advances pet, him, then step away and repeat. He will soon follow without the pull on the rope.

The next day the crupper should be put on at the beginning of the lesson, but should be discarded after a short work-out and the halter alone used so that the colt will not depend on the crupper rope. These lessons should be continued until the colt leads satisfactorily.

To break to lead without crupper ropes use a strong halter with a lead rope. Step back about 6 feet from the colt, opposite his shoulders, cluck to him, and pull on the rope. The colt will be forced to take a couple of steps; reward him; cross in front to a similar position on the other side and repeat the command with a pull. Continue the lesson until the colt follows. Never pull straight ahead on the colt; he can outpull. Use diplomacy rather than force.

After the colt has been broken to lead he may be accustomed to the harness and trained to rein. The horse should never be hitched to a wagon or ridden before he is broken to drive in the harness. He should be trained to answer the ordinary commands. In familiarizing the colt with bit and harness the "bitting harness," which consists of an open bridle with a snaffle bit, check and side reins, and surcingle with crupper, may be used. This rigging is put on the colt leaving the side and check reins comparatively loose, and he is turned loose in a small paddock for an hour. The second lesson consists of teaching the colt the feeling of the reins which may be tightened somewhat. The third day the driving reins may be used and the colt is taught to go ahead. Cluck to the colt, or tell him to "getup," use the whip and let him know what is meant. Both sides of the colt should be trained, as objects viewed from different angles may frighten him badly. Driving in a right and left circle will facilitate this training. The next lesson consists in teaching the horse to answer the commands of "Whoa," "Get up," and "Back."

After teaching the horse to go satisfactorily in the bitting rig, the work harness with breeching can be substituted. The traces and breeching should be joined loosely together and gradually tightened, as the work progresses, thus familiarizing the colt with the sensation of wearing the collar and breeching. He is then ready to be hitched to the wagon or cart single, or double.

Breaking the colt to drive double, also to ride, dealing with bad habits, throwing a horse, etc., are other features of this bulletin No. 667, which may be had upon application to the Department of Agriculture.

SWAT THE FLY BEFORE IT FLIES.

A great deal has been said and written during the last few years about fly-swatting campaigns. It is generally recognized that a very large part, probably 95 per cent of all house flies, are hatched in collections of manure, especially horse manure. It is very imporant, therefore, that all manure be hauled to the fields and the stables be kept free from collections of manure during the spring and summer months at least. This involves no hardship on farmers, because by spreading the fresh manure directly they save all the most valuable fertilizing elements and by so doing swat the flies before they become flies.

Swatting the flies and using fly traps are useful in that they lessen the number of annoying flies, but their use is like giving medicine to relieve painful symptoms of a disease. We should treat, not the symptoms, but the disease itself. To treat the disease we must prevent the flies from breeding.

"PASTURE"-IZED MILK.

The ladies were engaged in social welfare work, and the pure milk question had come up for discussion. One member remarked: I believe we should compel all the dairymen to pasteurize all their milk."

"That can't be done," answered another, a leading official of the club. "One day last spring I went to a dairy which sells milk here and found all the cows in the barn. I asked the man why he didn't turn the cows out to pasture. He said they had no pasture so early in the spring.

"So you see, ladies, it is impossible to pasture the cows during a great part of the year and consequently we cannot have pasteurized milk all the year round."—Young's Magazine.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio

1915 WINRACE
—and—
ELIGIBILITY
BOOK

The National Trotting Association Winrace and Eligibility Book for 1915 is now ready for delivery. It is a work of 858 pages, bound in cloth and contains official reports of all races and time record meetings held by members of the National and American Trotting Associations as well as copies of all special reports received by the two Associations, and all reports of non-association meetings which appeared in the columns of the turf and daily papers in 1914 as well as an index giving the starts made by each horse. In addition to this, it also contains an Eligibility List which presents the names of all live horses that acquired records or winraces in 1912, 1913 and 1914. When a winrace was made over a mile track it is designated by the letter (m) and if a horse also has a winrace over a half mile track within the four seconds limit fixed by the rule, it is also given and marked (½m).

Last year after the new eligibility rule was adopted, the National Trotting Association issued a Winrace and Eligibility Book, which covered 1912 and 1913. It assisted materially in the application of the new rule, but members and horse owners were frequently in doubt as to whether a horse was entitled to a time allowance. This resulted in a very voluminous correspondence and in order to obviate it in 1915, the present book has been compiled and issued as approved by the President under an order of the Board of Review.

In the matter of time allowance, a horse with a winrace is allowed one second for each year, if raced, in which he fails to equal or reduce his record or win a race, providing same is claimed by the nominator when making the entry. If a horse was not raced in 1914, he is not entitled to a time allowance and a reference to the index in this book will show whether he was raced or not, while by referring to the summaries, it can be determined whether he equaled or reduced his record or won a race. Also in order to give all the information possible, the reports of meetings contain all races at half mile heats as well as at mile.

This book presents reports of 1,400 meetings at which 12,673 horses started in 3,730 races and 939 performances against time, for which the premiums amounted to $3,228,617.82, while the Eligibility List presents the names of over 14,000 horses.

The 1915 Winrace and Eligibility Book will be sent postage prepaid to any address for $2.00 by

$20,000 FUTURITY
ESPECIALLY ADAPTED TO PACIFIC COAST BREEDERS

You can stay at home and win money in the half-mile track division. If you have a prospect you cannot afford to ship east for our big stake. Now the only futurity with a four-year-old division. A colt can win over $12,000—40 chances to win money. Write for blanks—a postal will do. Entries close June 1. Entrance only $1 per mare.
THE HORSEMAN. 538 So. Dearborn St., CHICAGO, ILL.

FOR SALE
RACING AND BREEDING MATERIAL
from the establishment of the late
WENDELIN J. MILLER
of Chico, Cal.

The death of Mr. W. J. Miller causes to be put on the market the choice assortment of Broodmares, Youngsters and Race Winners with which he achieved such signal success in recent years, including

JOHN MALCOLM (2) 2:11½
stake winner, world's champion two-year-old pacing gelding (1913), by Dan Logan 2:07½, dam Susie Miller by Prince Ansel (2) 2:20½, etc. Now four years old and can show as much or more than any pacer in California. Prime for this year's races.

CAPITOLA (2) 2:17¾, (3) 2:14½
stake winner, fastest two-year-old pacing filly of 1912, public trial in 2:06½ as three-year-old, by Dan Logan, dam Lulu Mack by Arthur Wilkes, etc. A great race mare for her class.

BONDALEAN (2) 2:20½
winner of second money in two-year-old division, Breeders' Futurity, 1914, and absolutely the best one in sight for this year's three-year-old pacing stakes. Entered and paid up. Trialed in 2:15 last year. By The Bondsman, dam Katalina 2:11¼ by Tom Smith 2:13¼, etc. As great a youngster as the country affords today.

KATALINA 2:11¼
(dam of Bondalean (2) 2:20½) by Tom Smith 2:13¼, dam Kate Lumry 2:20½ (dam of 5 trotters including Baby Doll 2:10¼, Ella Mac 2:11½, etc.) by Shadeland Onward 2:18½. Katalina was a stake winner, a great aged trotter, and her first foal is a fast, standard performer. She breeds regularly and will become more famous as a producer than is her dam.

TWO-YEAR-OLD FILLY
by All Style 2:10, dam Katalina 2:11¼. Staked, paid up. Good prospect.

BAY FILLY, WEANLING
by The Proof (2) 2:29¾, dam Katalina 2:11¼. Nice individual and bred to make a fast mare.

LULU MACK
(dam of Capitola (3) 2:14½), by Arthur Wilkes, sire of Maymack 2:04½, etc., dam Lady Merrill by Tilton Almont, sire of the dam of Monte Carlo 2:07¼, etc. Good breeder and a proven producer.

BAY FILLY
three years old, sister to Capitola (3) 2:14½, never broken.

FIRST NATIONAL
bay colt, two years old, brother to Capitola (3) 2:14½. Staked, paid up. Fine youngster.

John Malcolm and Bondalean are in training at the Woodland Stock Farm, Woodland, Cal., their workout days coming on Wednesdays and Saturdays. You can see them at any time and they show for exactly what they are—two of the best young pacers in the land to race in this and future seasons. Prices and particulars of all kind may be obtained upon application by mail or in person to either of the undersigned.

MRS. W. J. MILLER,
L. B. DANIELS, Chico, Cal.
Woodland, California.

$5,000.00 Guaranteed | $3,000 TO FIVE-GAITED DIVISION :: $2,000 TO THREE-GAITED DIVISION | **$5,000.00 Guaranteed**

THE CALIFORNIA STATE FAIR GAITED SADDLE HORSE FUTURITY No. 2.

FOR FOALS OF 1915. **OPEN TO THE WORLD**

ENTRIES TO CLOSE JUNE 1st, 1915

The produce of any mare bred in 1914 to a stallion registered in either the American or Pacific Coast Gaited Saddle Horse Association.
To be given under the direction of the California State Agricultural Society and to be shown as weanlings, yearlings, two-year-olds and three-year-olds.

ENTRANCE and PAYMENTS:

MARES.—Mares to be nominated by June 1, 1915, when a payment of $2 must be made. Each mare's name, color and the name of the horse to which she was bred in 1914 must accompany the entry fee.
On July 1, 1915, the color and sex of the foal to be given and an additional payment of $3 must be made.
On February 1, 1916, a payment of $10 will be due on yearlings.
On February 1, 1917, a payment of $15 will be due on two-year-olds.
On February 1, 1918, a payment of $25 will be due on three-year-olds.

CONDITIONS:

ENTRIES TO CLOSE JUNE 1st, 1915.

Every foal of 1915 produced by a mare nominated herein is eligible to compete in all four classes of this stake by its owner making payments as herein provided in the division in which it is entered. Winners will not be barred.

All nominations and payments must be made to the Secretary of the Ca ornia State Agricultural Society, at his office in Sacramento.

Nominators must designate when making starting or show payments whether the horse is five or three gaited.

STARTING AND SHOW PAYMENTS

On the first day of August each year the following payments will be due:

	Five-gaited	Three-gaited
On weanlings, to be shown in 1915	$10.00	$ 5.00
On yearlings, to be shown in 1916	15.00	10.00
On two-year-olds, to be shown in 1917	25.00	10 00
On three-year-olds, to be shown in 1918	40.00	15.00

CLASSIFICATION and DIVISION of MONEY AS FOLLOWS:

Stallion, mare or gelding	Five-gaited	Three-gaited	To sire of first money winner in each division	To dam of first money winner in each division
Weanlings, 1915	$ 300.00	$200.00	$10.00	$10 00
Yearlings, 1916	500.00	300.00	15.00	15.00
Two-year-olds, 1917	800.00	500.00	25.00	25.00
Three-year-olds, 1918	1200.00	800.00	50.00	50.00

The amount contested for shall be divided into six moneys as follows:

To the winner	35 per cent
To the second colt	20 per cent
To the third colt	15 per cent
To the fourth colt	12½ per cent
To the fifth colt	10 per cent
To the sixth colt	7½ per cent

MANNER OF SHOWING:—Weanlings, yearlings and two-year-olds shall be shown to halter and three-year-olds under saddle.

The right is reserved to declare the stake off prior to August 1st, 1915, if same does not fill satisfactorily upon the refunding of all entries received.
In case a mare fails to produce a colt, produces a dead coalt or foals twins, or her colt dies, the right to substitute by the owner another colt from a mare bred to a registered stallion is reserved on or before January 1st, 1916.
In case a nominated colt is dropped out, and later his owner desires to re-enter same, this may be done upon a payment of all sums which should have been paid had the entry been kept good and $25 additional
The Board of Directors of the California State Agricultural Society reserves the right to interpret and determine all questions affecting this stake.

CHAS. W. PAINE, Secretary, Sacramento, Cal.

No. 1. 2:12 Trot.....$1,500 — No. 4. 2:07 Pace.....$2,000

SECOND DAY, JULY 1st

No. 2. 2:20 Trot..... 1,000 — No. 5. 2:20 Pace..... 1,000

THIRD DAY, JULY 2nd

No. 3. 2:05 Trot..... 2,000 — No. 6. Free for All Pace..... 1,500

CONDITIONS

Enter any time. Records after entry no bar. Ten to enter, six to start. Entries close June 1, 1915.

3% to enter. 7% from first money winners; 6% from second; 5% from third; 4% from fourth. Full 3% of purse must be paid at time of entry. No entry will be accepted without this payment.

One horse may enter two classes and be held for but one entry fee, unless two starts are made. Entry fee must be for the larger purse. Two horses may enter one class for one entry fee unless both start, in which case an additional entry fee must be paid.

Three heats. Combination plan.

In $2,000 purses, $600 to each heat, extra purse $200.
In 1,500 purses, 450 to each heat, extra purse 150.
In 1,000 purses, 300 to each heat, extra purse 100.

Money divided 50, 25, 15 and 10% at the end of each heat. The extra purse goes to the horse standing best in the summary at the end of the race. Should two or more horses be winners of an equal number of heats at the completion of the three heats, such horses only to start in the fourth heat for the EXTRA PURSE, the whole of which shall go to the winner of that heat.

A horse distancing the field or any part thereof shall be entitled to one money only. A distanced horse in any heat will be entitled to money already won. There will be no more moneys than there are starters.

In determining the eligibility of horses to compete, only records made by winners of races shall be considered. Records made against time or by non-winners not considered. Rules of The American Trotting Association, of which we are members, shall govern all races.

The right is reserved to declare off any race that does not fill satisfactorily or change program, if necessary. In case class in which horse is entered does not fill satisfactorily, entry will be transferred to another class in which horse is eligible, subject to the approval of the owner.

Any race not finished on the last day of the meeting may be declared ended and the money divided according to the summary.

No stall rent will be charged.

UNLESS DECLARED OUT BEFORE 5 O'CLOCK P. M. THE DAY BEFORE THE RACE EVERY HORSE ENTERED WILL BE CONSIDERED A STARTER AND WILL BE HELD AS SUCH.

Entry blanks may be secured from The Breeder and Sportsman office..

M. J. DUNLEAVY, Asst. Sec. JOHN O. TALBOTT, Sec.

Cussing the Rules of Racing

is a favorite pastime of a good many people in the harness horse game, the fault finders sometimes having a real grievance and sometimes not. I lose more money by adhering to the rules than any trainer on the coast, and

Here is the reason:

You, Mr. Race-Goer, can recall days on certain California tracks when

Durfee Horses

WON EVERY RACE ON THE CARD. But for the rules, you would have seen DURFEE HORSES win first and second in every race; but for the rules you would have seen DURFEE HORSES one-two-three in a few races, and you might have seen DURFEE HORSES win all the money in certain events. I had the goods and

I still have them

but so long as I can race but one to a class, what earthly use can all of them be to me? In other hands they would be dividend paying stock, and I offer you anything I own at a price based fairly on his or her earning capacity. I make no reserve on any horse my personal property—take the one in any class that suits you best and I will race the "leavin's." I will sell any part of a collection of thirty head, every one as represented, including proven race horses good in their class, the best racing prospects on this coast, matinee horses, stallions, brood mares, stake colts that can show, all bred in the purple.

See them at Los Angeles or San Francisco, write me for any desired particulars.

William G. Durfee

2019 So. Figueroa St., Los Angeles.

WOODLAND STOCK FARM

INCORPORATED

Offers for Service for the Season of 1915

PRINCE ANSEL

CERT. 1062

2, 2:20½ A. T. R. 29220

Sire of
Prince Lot 2:07¾
Joseph Ansel (3) 2:12¾
Lottie Ansel (2) 2:14¼
Laura Rogers 2:11¼
Adansel (3) 2:14½
Arista Ansel (2) 2:18¼, etc.
And the dams of
John Malcolm (2) 2:11½, etc.

PRINCE ANSEL is not only doing more than any other individual to perpetuate the fame of the great family of Dexter Prince, but he has few rivals in the land as a progenitor of futurity winning youngsters, as attested by the summaries of coast classics year by year. None more highly esteemed by horsemen in general. Fee, $50 with usual return privilege.

ROBERT BINGEN

CERT. 1061

2:11¼ A. T. R. 45033

Best Bred Son of

BINGEN 2:06 1-4

Sire of Uhlan 1:58; 14 in 2:10
First dam Episode 2:18 half sister to Peter the Great 2:07¾
Second dam Santos, dam of Peter the Great 2:07¾, J. Malcolm Forbes 2:08, etc.

ROBERT BINGEN, in every way one of the most desirable horses ever offered for service in California, represents the families whose blood is most eagerly sought by successful breeders today—Bingen and Peter the Great. He is the only son of Bingen standing for service in California and his book is rapidly filling. Fee, $75 by the season.

True Kinney 2:12¼

The best young McKinney stallion in California—a colt trotter and a coming sire. His first foals are among the best on the farm and show for themselves. Terms on application—season limited.

ALL STALLIONS LICENSED PURE BRED

JOHN W. CONSIDINE, PRESIDENT

Mares sent to these stallions will be cared for at $5.00 per month on pasture; $10.00 per month in box stalls. Colts entered in all the Futurities, Brood Mares, Racing Prospects and Saddle Horses for sale at all times. Correspondence solicited, visitors cordially welcomed. Address **HARRY DOWLING, Supt., Woodland, Cal.**

This is The

Grandly Bred A Colt Trotter A Proven Sire

Bon McKinney 51480

Cal. State License, Pure Bred No. 1213.

Three-year-old record 2:24½; trial (3) 2:15, 1:05.

Sire of

Bon Courage (2) 2:12¾ **Bon Bell (3) 2:17¾**

Son of BON VOYAGE 2:08 and DAPHNE McKINNEY (dam of Frank N. 2:07¼, etc.), by McKinney 2:11¼; second dam La Moscovita (dam of Bon Guy (3) 2:11¾ and 2 others) by Guy Wilkes 2:15¼; third, fourth and fifth dams also in great brood mare list. Bay horse, in every respect a great individual, with substance, finish, and natural, frictionless trotting action. Very sure foal getter and a steadily rising young sire, his few foals possessing his most excellent qualities to a marked degree. Bon Courage was the only California bred three-year-old to win a heat from Esperanza in 1914.

In the stud, season of 1915, at the Rush & Halle Ranch, Suisun, Cal., season closing August 1st. Fee, $25 with return privilege, payable cash at time of removal of mare. Good pasturage at $2.50 per month. For further particulars address

BEN F. RUSH, Suisun, Cal.

THE PROOF 2, 2:29¾

A. T. R. No. 51956
LICENSED PURE BRED CERTIFICATE No. 1029

From the family of Bingen 2:06¼, foremost among present day champions of all ages and gaits.

Son of The Exponent 2:11¾ (by Bingen, dam Iva Dee by Onward 2:25¼), sire of 32 performers including The Temptress 2:08½, 6 three-year-olds, 20 two-year-olds and 1 yearling.

First dam Chord 2:27 (dam of 4) by Wilkes Boy 2:24½, sire of 4 and the dams of 11 in 2:10; second dam Sonata (dam of 3) by Dictator 113, sire of 2 and the dams of 7 in 2:10; third dam Cadenza (dam of 2) by King Rene 1278, sire of the dams of 2 in 2:10; fourth dam Virgie Wilkes (dam of 4) by Geo. Wilkes 2:22, sire of the dams of 16 in 2:10.

In the stud, season of 1915, at Pleasanton Driving Park, at $50 the season with return privilege. We have colts in training to show his qualities as a sire. Grandsons of Bingen are siring champions such as Etawah 2:03½, Anna Bradford (3) 2:00¾, etc. Address for all particulars,

KEEFER & SPENCER, Pleasanton, Cal.

Peter The Great

Is the world's foremost progenitor of extreme speed; sire of 30 in 2:10, etc.

HIS SON

PETER McKLYO 3, 2:12 1-2

Cal. State License Pure Bred 2339

will make the season of 1915 in the training stable of James Thompson at the San Jose Driving Park beginning March 15 and ending July 1.

PETER McKLYO (3) 2:12½, the only California-owned son of Peter the Great of an age permitting stud duty, is out of a great-bred young matron by Jay McGregor 2:07¼—Klyo (2) 2:29½; second dam Miss Spears 2:21¾ (dam of 6 including Shakespeare (3) 2:09¾); third dam Medium's Last (dam of 7 including Trampfast (2) 2:14¼); fourth dam Suzanne (dam of 1 and grandam of 10 including Susie J. 2:06½).

This colt is four years old, having obtained his record last season with a very limited amount of work. He came into my hands perfectly green in February, 1914, and developed speed so fast that I had to take his shoes off and jog him for two months barefooted. Being by Peter the Great, the sire of the century, and, as you will notice, out of a daughter of Jay McGregor, another wonderful family of horses, he is one of the best bred young horses in the world and I can truthfully say he is one of the very best individuals that I ever had the pleasure of looking at. He can trot a quarter in 30 seconds, and I am firmly of the opinion that he will trot a mile this fall in 2:06 or better.

Fee, $75 the season with return privilege. Mares pastured at usual rates and accorded best of care, but no responsibility assumed for accidents or escapes. Service fee and pasture bills must be paid before removal of mares. Address for all particulars

L. H. TODHUNTER, Owner, Sacramento, Cal.

JAMES THOMPSON, San Jose Driving Park, San Jose, Cal.

Derbertha Bells

Licensed Pure Bred, Cert. No. 1172.

NO. 60907 A. T. R. RULE 1.

DERBERTHA BELLS, foaled 1911, stands 15.3, weighs 1200 pounds, and is of magnificent conformation, style, trotting action and color; being a solid dark bay or brown with splendid mane and tail, massive well-formed limbs and feet, beautiful neck and head, fine, well set ear and eye as kindly as a fawn's and as courageous as a lion's. His breeding can only be hinted at here as he traces 20 times to Hambletonian 10—5 through Electioneer, 5 through George Wilkes, 4 through Strathmore and 4 through Abdallah 15 (the big four of the sons of Hambletonian), and twice through his daughters. This breeding is perfectly balanced by 18 crosses to Mamb. Chief 11—5 of these through his greatest son Mamb. Patchen 58 (leading progenitor of the dams of trotting sires), backed up by 2 crosses to Pilot Jr. 12, 4 to Black Hawk 5, 4 to Imp. Trustee and crosses to such other famous broodmare sires as American Star, The Moor, A. W. Richmond, Williamson's Belmont, etc.

I challenge any man to name a stallion with a broodmare inheritance approaching that of Derbertha Bells,—5 crosses to Green Mountain Maid (dam of 9 and Electioneer), 3 to Alma Mater (dam of 8 and 7 sires, including Alcyone and Alcantara), and 1 each to Miss Russell (dam of 7, including Maud S. 2:08¾ and 6 sires, including Nutwood), Dolly (dam of 4 and 5 sires, including Director, Onward and Thorndale), Beautiful Bells (dam of 11, including 4 world's champions and 10 sires) and Minnehaha (dam of 8 and 6 sires). These are pre-eminently the greatest mares of history in point of number of descendants in the standard list, besides 2 crosses to Bertha, the only mare with 2 in 2:04½, 5 in 2:10 and 13 in the list. Counting duplicates this pedigree contains the blood of 20 mares with an average of 9 performers each, and of the 14 mares appearing in the pedigree of two or more 2:10 trotters in 1910 this pedigree contains 8.

His disposition and deportment are in perfect harmony with his superlative breeding and conformation, all that could be desired. I own a yearling filly by him that stamps him as a sire of the first rank, and I invite the most critical inspection both of him and his get. He will be allowed a few choice mares at $25.00 the season with usual return privilege. Tabulated pedigree upon request.

J. W. PENDLETON, Owner,
1601 Seminary Ave., OAKLAND, CAL.

Like Begets Like - Champions Beget Champions

HERE ARE TWO EXAMPLES OF THESE MAXIMS:

Carlokin 2:07 1-2

VICTORIES OF PARAMOUNT PARKER GUNS 1915

Look, Read, Remember!!!

At the Pinehurst Mid-Winter Handicap Shoot the four contestants making the highest scores in the preliminary event all shot Parker Guns.

RATHER STARTLING, ISN'T IT?

In the main event, the PINEHURST HANDICAP, Mr. S. A. Huntley, although placed further back than any other contestant, scored

95 out of 100 Targets at 23 Yards

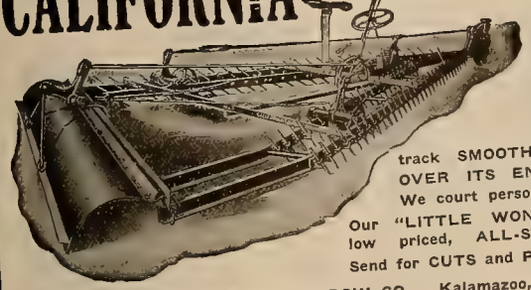
and landed the Trophy. Furthermore Mr. Huntley was high over all for the entire tournament, and as usual shot his 34-inch barrel PARKER GUN.

In 1914 Parker Guns won **The Grand American Handicap, The National Championship** at single and double targets, the

FIRST and SECOND YEARLY AVERAGES

and made the best scores on the Pacific Coast.

Follow the pace set by the champions of America and for either single or double target shooting use



Long Tom Parker Guns

For game shooting afield, enhance the pleasure of the day's sport and improve your skill by shooting a small gauge PARKER GUN, pioneer makers of small bores in America. Instructive booklet on small bore guns sent free on request.

WINCHESTER

.22 CALIBER
AUTOMATIC RIFLE

Name over all the good points of other makes of .22 caliber recoil-operated rifles, and you mention only a few of the many that can be claimed for the Winchester .22 Automatic. Others are: real beauty of outline; a handsome and clean receiver (having no pins, screws or unsightly protruding parts); a reliable, strong and sure Winchester action; and the accurate Winchester shooting qualities. The Winchester .22 Automatic was the first and is the best rifle of this type and caliber on the market—proven so by use in the hands of thousands of shooters, who have given it every possible test. It holds ten shots, which are fired by simply pressing the trigger for each shot, thus enabling great rapidity of shooting with *accuracy*. It weighs only 5¾ pounds, takes down, and is easy to clean and keep in good order. A rifle like this is a great sport maker, while at the same time it has no equal for shooting the smaller kinds of game. It lists at $25.00 and is sold by dealers everywhere for less.

A COMPARISON WILL CONVINCE YOU OF THE MERITS OF THIS WINCHESTER

REMINGTON UMC
